

May 4, 1928.

Dear Agnes Smedley,

We are having some reprints made of Dr. Stone's paper in the Medical Journal and Record of which we expect copies from the printer any day, when a few will be sent to you.

The formula marked "B. C. Investigation Committee" is issued by the Clinics in London, and Mrs. Sanger suggests that you write to Mrs. Edith Bow-Martyn for it. Her address is:

Mrs. Edith Bow-Martyn,
33 Hogarth Hill,
Golders Green,
London, N.W.11

I enclose you some "F.L.S." and an enclosing two letters that we use in the clinic as "follow-up" also an appointment sheet.

We shall also send you four extra copies of the Review each month, until further notice, and know that you can do good with them.

Mrs. Sanger is in the midst of expanding the Clinic. She has taken another floor in the same building, and this will certainly relieve the jam to a great extent.

Hoping all goes well with you,

Very sincerely,
