

(BENNETT, Jo)

Dr. H. H. H. H.

Cincinnati, Ohio

Dear Sir -

March 2, 1928

Amg
Agnes

Dear Margaret:

I have been with Agnes since
seven this morning. They gave
her an injection last night and she
slept wonderfully. They gave her
another this morning and in a
half hour rectal anesthesia. She
has had other the usual way
she fought it, but was quiet after
I had impressed on her that I was
there and all was well. She quieted
down & soon was completely under.

The operation was successful and
simple. She did not wake up
from her sleep, and when she did
she wanted, with her first breath,
that I should tell you that she
had no ill-effects from the
anesthesia, & you must insist
on having it administered in
that way if you were had to
be operated upon again.

She also wanted me to
tell you how much peace and
relief your child had from her
and how wonderful she thought
both you and Mr. Stue had
been to her. She has certainly

had a hard fight all her life
against poverty - ill health and I
believe almost insanity. But
she is better now than I have
ever seen her. This ~~is~~ ^{is}
the irritating appendix ~~out~~ ^{out} of
her way, she should be
a quite normal person -

I will see to your article
and also will get busy on
the clinic and write you
as soon as anything is
definite.

I do hope that your knees
are all right again!

Best regards and much
appreciation from Margaret
from many standpoints!

Love and greetings
to Mr. Stearns.

I am so sorry about Emily!
