

March 30, 1928.

Dearest Agnes:

I am delighted to have your letter of the 18th and also a letter from Jo Bennett, saying that you are out of the hospital and recovering. It is always slow recovery with a temperament like yours, I knew, because I am much the same.

It was nice of you to express so appreciatively the little that Mr. Slee has done. I hope it will help you to get on your feet again and to stay well.

I do wish that your clinic could be open at least a half day. Two hours is very little - even as a start.

1. I am sending you a draft for \$300.00 for three months. If you wish to use \$100.00 of that for equipment and then to start the first of May, it will be perfectly agreeable to me. I think \$100.00 a month is a good deal for only two hours a day. We get our doctors for \$5.00 a half day, and you know we pay good prices in America.

2. Now as to Hirschfeld, I like him all right and believe that he can do a certain amount of good, but I am absolutely with you as to connecting his name with Birth Control. I would not go on his International Committee for the same reason, and it was very difficult to refuse him, because I think he does good work in his own field. Your judgment is in accord with my own on that ground, so I think you can stand as firm as your two feet will let you.

3. I am sending you, under separate cover, three copies of all the cards and printed material that we use in the Clinic.

4. I do not like "Margaret Sanger Ambulatorium". Put Birth Control in it, if you can. If you cannot say clinic, then call it center or any word that is understood in the German language.

I am very anxious to have Dr. Schmieke report or get in touch with me, especially if he reads or writes English. If not, I shall have to trouble you each time I correspond.

-2-

By all means go to Frankfurt and get all the information you can on the Advice Bureaus. As soon as Kaethe Kollwitz is through with the chapters, will you please return them by registered mail so I can go ahead on the book. Also let me know when you send the drawings, so I can be on the lookout for them.

I am so glad that you like Dr. Wiesner. I think he is a rare find. I am afraid, however, that I will be unable to do anything on the moving picture. If we get the clinic started in Germany and get support for a year, that will be as much as Mr. Slea and I can do at the present time. 

All best wishes to you and my thanks to Jo for her newswy letter.

With much love,

MS:al
