Spotlight: Crime Analyst Unit

When it comes to solving crimes, television and movies are filled with action-packed detective stories and crime dramas with little depiction of the behind-the-scenes investigative work that solves crimes. Our Gilbert Police Crime Analysts perform some of the most complex investigative case work and they often do it quietly behind the scenes. Crime Analysts use statistical and qualitative methods to research crime patterns and trends contribute intelligent and actionable information to a criminal investigation. This valuable information often shapes the outcome of criminal investigations - and sometimes leads to the story you see on the big screen!

Data plays a vital part in law enforcement investigations to help solve crimes, prevent crime and promote overall public safety. Our team of four Crime Analysts work in the department's Criminal Investigations Division where they provide investigative support to many of the department's work teams. They also support the greater East Valley area through their cooperative work with the East Valley Fusion Center. Fusion centers are a collaborative effort between law enforcement agencies to promote information sharing, expertise, and data analysis to help detect criminal activity including terrorist activity. Our Crime Analysts work to develop information to:

- Solve crimes
- Develop effective strategies and tactics to prevent future crimes
- Find offenders
- Prosecute and convict offenders
- Improve safety and quality of life for our community
- Promote efficiency and detail in criminal investigations
- Detect and solve community problems
- Plan for future resource needs
- Share and network with other law enforcement professionals

Skilled Crime Analysts are able to extract data from a variety of information systems, ask questions and turn it into useful and actionable information. Crime Analysts also have a strong ability to visually present data and information in varying ways – written reports, charts, graphs, and maps – making it easier to understand and share.

Crime Analysts are responsible to be in the know about criminal activity; they review police reports and criminal activity every day to look for patterns and unique characteristics as they emerge – they understand that time is of the essence. Their analysis of a robbery case may link it to multiple other robberies – even robberies that are outside of our jurisdiction. They are also quick to identify new trends in fraud and forgery cases or a pattern among theft cases. Identifying patterns and trends – sometimes called “hot spots” – leads detectives to develop best practice tactics and strategies to solve crime and prosecute cases. Crime Analysts' work is also often credited with preventing victimization and reducing crime.

While their work may not always be featured prominently on the big screen, rest assured their work is a prominent contributor to law enforcement criminal investigations – increasing case solvability and criminal prosecution.
