First-year applicants should select an additional major when applying for admission. Additional choices may include any of the W. P. Carey business BA programs or any other degree program outside of the W. P. Carey School of Business. Students who are not admissible to a W. P. Carey business BS major and who did not select a second major or are not admissible to their second major choice are placed in a business BA program in the W. P. Carey School of Business.

Readmission requirements: Students must meet first-year admission requirements by way of high school GPA, test score or class rank and must have a transfer GPA of 3.00 (if applicable) and a cumulative ASU GPA of 3.00.

Transfer admission requirements: Students are required to have met ASU transfer student admission requirements, have a transfer GPA of 3.00 (and 3.00 ASU GPA, if applicable), and have met one of the following: an SAT Reasoning score of 1160 (prior to March 2016), or an SAT Reasoning score of 1230 (after March 2016), or an ACT score of 25, or graduated in the top 8% of their high school class, or have an overall high school GPA of 3.40 in ASU competency courses (scale is 4.00 = "A").

Transfer students who do not meet the above requirements may still qualify for direct admission by meeting all of the following: ASU general transfer student admission requirements, a transfer GPA of 3.00 (and ASU GPA, if applicable), and a 3.40 cumulative GPA in the following courses or equivalents. Students must have completed at least six of the eight courses.

- ACC 231 Uses of Accounting Info I
- ACC 241 Uses of Accounting Info II
- CIS 105 Computer Applications and Info Technology

• ECN 211 Macroeconomic Principles
• ECN 212 Microeconomic Principles
• ECN 221 Business Statistics
• MAT 210 Brief Calculus
• MAT 211 Math for Business Analysis

Transfer students should select an additional major when applying for admission. Additional choices may include any of the school's BA programs or any other business or other degree program outside W. P. Carey School of Business.

Students who are admissible to the university but do not meet admission requirements for this program and did not select a second major, or are not admissible to their second major choice, will be placed in a BA program in the W. P. Carey School of Business. Students not interested in the program or campus location may reach out to wpcareyug@asu.edu (mailto:wpcareyug@asu.edu) for assistance in selecting another degree program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students should refer to the W. P. Carey School of Business (https://students.wpcarey.asu.edu/degrees-and-advising/degree-programs/change-majors) website to determine if they meet change of major requirements. Students ready to change their major should submit their request through the school's advising website (https://students.wpcarey.asu.edu/advising-sos).
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-marketing/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=BAMKTBS~null&college=CBA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: As globalization continues to impact the way the world lives and works, international experiences have become vital to a successful career for marketing majors. Through more than 300 available Global Education programs (https://goglobal.asu.edu/), students can gain valuable skills employers are looking for: communication and interpersonal skills, flexibility, motivation, and a practical perspective on business applications worldwide. Understanding how cultural norms and values impact the marketing of goods and services in an international context makes graduates a valuable contributor to many marketing careers.

The W. P. Carey School of Business recommends these programs (https://goglobal.asu.edu/w-p-carey-marketing) for students majoring in marketing.

Career opportunities

The degree program provides fundamentals, flexibility and specialization opportunities, and through the proper selection of coursework and other educational experiences, a marketing graduate may prepare for a variety of careers in areas such as:

- business development
- business-to-business marketing
- customer relationship management
- international marketing
- market research and information management
- marketing communications
- professional sales and relationship management
- retail management
- sales management
- services marketing

Marketing (Digital), BS (BAMKDIMCBS)

College/School: W. P. Carey School of Business

Campus: Tempe, Online

Program description

The digital concentration builds on the Bachelor of Science in marketing curriculum to prepare you with specialized knowledge and training in advertising, brand management and digital marketing.

In this program, you acquire specialized expertise in an area that's growing in importance in the marketplace.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Artificial Intelligence in Business, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Management, MS

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
First-year admission requirements: 1230 SAT Reasoning or 25 ACT score, or graduated in the top 8% of high school class, or have an overall high school GPA of 3.40 in ASU competency courses (scale is 4.00 = "A").

First-year applicants should select an additional major when applying for admission. Additional choices may include any of the W. P. Carey business BA programs or any other degree program outside of the W. P. Carey School of Business. Students who are not admissible to a W. P. Carey business BS major and who did not select a second major or are not admissible to their second major choice are placed in a business BA program in the W. P. Carey School of Business.

Readmission requirements: Students must meet first-year admission requirements by way of high school GPA, test score or class rank and must have a transfer GPA of 3.00 (if applicable) and a cumulative ASU GPA of 3.00.

Transfer admission requirements: Students are required to have met ASU transfer student admission requirements, have a transfer GPA of 3.00 (and 3.00 ASU GPA, if applicable), and have met one of the following: an SAT Reasoning score of 1160 (prior to March 2016), or an SAT Reasoning score of 1230 (after March 2016), or an ACT score of 25, or graduated in the top 8% of their high school class, or have an overall high school GPA of 3.40 in ASU competency

courses (scale is 4.00 = "A").

Transfer students who do not meet the above requirements may still qualify for direct admission by meeting all of the following: ASU general transfer student admission requirements, a transfer GPA of 3.00 (and ASU GPA, if applicable), and a 3.40 cumulative GPA in the following courses or equivalents. The W. P. Carey School of Business recommends these programs (https://goglobal.asu.edu/w-p-carey-marketing) for students majoring in marketing.

Career opportunities

The digital concentration program equips graduates with knowledge in the marketing communications area. Graduates are well prepared to assume jobs in the areas of advertising, brand management and digital marketing. While the number and quality of job opportunities in advertising and brand management are relatively small, the number of entry-level positions in digital marketing has exploded. A sampling of career opportunities includes:

- digital account manager
- digital marketing analyst
- digital marketing coordinator
- digital marketing specialist
- electronic marketing specialist

Real Estate and Applied Finance, BS (BAREAFBS)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

Real Estate and Applied Finance description
In the Bachelor of Science program in real estate and applied finance, you gain the real estate knowledge and finance skills necessary to contribute to and succeed in these complex, interrelated industries. Through a combination of coursework, practical projects and immersive experiential learning, you develop a strong foundation in both theory and practice. You also build critical thinking and problem-solving skills to effectively apply solutions to industry challenges.

Why study Real Estate and Applied Finance at ASU?
As part of ASU's highly ranked W. P. Carey School of Business, you learn from faculty who are respected educators, researchers and industry experts. They bring deep experience in corporate finance, asset pricing, portfolio management, governance, market structure, real estate and related fields.

The Department of Finance (https://wpcarey.asu.edu/finance-degrees) within W. P. Carey emphasizes connecting classroom learning with real-world practice. You gain hands-on experience (https://wpcarey.asu.edu/finance-degrees/undergraduate-learning-experiences) through practicums, internships, applied projects and other experiential opportunities that prepare you to excel in your chosen career path.

You also benefit from resources like the W. P. Carey Center for Real Estate and Finance, which is dedicated to advancing real estate education and research. The center's Experiential Learning Lab (https://wpcarey.asu.edu/finance-degrees/undergraduate-learning-experiences) bridges classroom theory with practical application, giving you access to interactive exercises, professional tools and opportunities to collaborate with industry professionals.
Additional program details
This program is offered in person at ASU's Tempe campus (https://campus.asu.edu/tempe), home to a thriving community of students and business leaders. Nearly a quarter of undergraduates at Tempe pursue business degrees, providing you with a strong network of peers and mentors.

There are many ways to customize your experience (https://wpcarey.asu.edu/undergraduate/opportunities) at W. P. Carey. If you're interested in pursuing your salesperson license, you can complete the Arizona Department of Real Estate (ADRE) Pre-licensing Program (https://real-estate.wpcarey.asu.edu/arizona-department-real-estate-adre-salesperson-pre-licensing-program).

You can also join the student-run ASU Real Estate Club, which offers opportunities to engage with guest speakers, attend workshops, participate in site tours and network with industry professionals. Learn more about W. P. Carey student organizations through the Business School Council (https://www.wpcbsc.com/wpc-clubs-and-organizations).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: As globalization continues to impact the way people live and work, international experiences have become vital to success in every field of business. Through international study and internships, students gain valuable skills employers are looking for, including communication and interpersonal skills, flexibility, motivation and a real-life perspective on business applications worldwide. Business students can participate in Global Education programs (https://goglobal.asu.edu/) nearly anywhere in the world and gain valuable internship experience in many global business hubs.

The W. P. Carey School of Business recommends these programs (https://goglobal.asu.edu/students/major/wpcarey) for students majoring in real estate and applied finance.

Career opportunities

Careers this Real Estate and Applied Finance degree prepares you for

This degree equips you with a comprehensive understanding of financial principles and real estate investment strategies, preparing you for success in a variety of professional roles. You'll learn to analyze markets, assess investment opportunities and make informed decisions that influence the built environment.

Graduates are ready to thrive in fields spanning real estate investment, property development, financial management and related areas that shape the future of communities and commerce.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Supply Chain Management, BS (BASCMBS)

College/School: W. P. Carey School of Business

Campus: Tempe, Online

Program description

Supply chain managers play a crucial role in coordinating the seamless flow of goods and services, from raw material procurement to the delivery of final products to consumers. In today's globalized marketplace, where supply chains span multiple vendors and geographical regions, effective supply chain management is essential for ensuring timely delivery, cost efficiency and customer satisfaction.

The Bachelor of Science program in supply chain management offers you a comprehensive understanding of integrated supply chain management principles and practices. Rooted in theoretical frameworks and practical applications, the curriculum encompasses a wide variety of topics, including:

- execution systems
- logistics
- negotiations
- operations management
- planning
- procurement
- strategy development

By integrating these topics with quantitative methodologies such as statistical modeling, data warehousing, data mining, programming, forecasting, operations research techniques, optimization, stochastic modeling, operations analysis, and design and prototyping, you gain a comprehensive understanding of how to leverage data-driven insights. You also acquire advanced analytical tools to optimize supply chain performance and drive strategic decision-making.

Classes are kept small to foster a collaborative learning environment, enabling you to engage actively with faculty and peers. Through hands-on projects and practical case studies, you have the opportunity to apply theoretical concepts to practical scenarios, bringing the material to life and gaining valuable insights into industry best practices.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Artificial Intelligence in Business, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Business Analytics, MS

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Supply Chain Management, MS

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Management, MS

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
First-year admission requirements: Students must have a score of 1230 SAT Reasoning OR 25 ACT score, OR graduated in the top 8% of high school class, OR have an overall high school GPA of 3.40 in ASU competency courses (scale is 4.00 = "A").

First-year applicants should select an additional major when applying for admission. Additional choices may include any of the W. P. Carey business Bachelor of Arts programs or any other degree program outside of the W. P. Carey School of Business. Students who are not admissible to a W. P. Carey business BS major and who did not select a second major or are not admissible to their second major choice are placed in a business BA program in the W. P. Carey School of Business.

Readmission requirements: Students must meet first-year admission requirements by way of high school GPA, test score or class rank and must have a transfer GPA of 3.00 (if applicable) and a cumulative ASU GPA of 3.00.

Transfer admission requirements: Students are required to have met ASU transfer student admission requirements, have a transfer GPA of 3.00 (and 3.00 ASU GPA, if applicable), and have met one of the following: an SAT Reasoning score of 1160 (prior to March 2016), or an SAT Reasoning score of 1230 (after March 2016), or an ACT score of 25, or graduated in the top 8% of their high school class, or have an overall high school GPA of 3.40 in ASU competency

courses (scale is 4.00 = "A").

Transfer students who do not meet the above requirements may still qualify for direct admission by meeting all of the following: ASU general transfer student admission requirements, a transfer GPA of 3.00 (and ASU GPA, if applicable), and a 3.40 cumulative GPA in the following courses or equivalents. Students must have completed at least six of the eight courses.

- ACC 231 Uses of Accounting Info I
- ACC 241 Uses of Accounting Info II
- CIS 105 Computer Applications and Info Technology
- ECN 211 Macroeconomic Principles
- ECN 212 Microeconomic Principles
- ECN 221 Business Statistics
- MAT 210 Brief Calculus
- MAT 211 Math for Business Analysis

Transfer students should select an additional major when applying for admission. Additional choices may include any of the school's BA programs or any other business or other degree program outside W. P. Carey School of Business.

Students who are admissible to the university but do not meet admission requirements for this program and did not select a second major, or are not admissible to their second major choice, will be placed in a BA program in the W. P. Carey School of Business. Students not interested in the program or campus location may reach out to wpcareyug@asu.edu (mailto:wpcareyug@asu.edu) for assistance in selecting another degree program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students should visit the W. P. Carey School of Business (https://students.wpcarey.asu.edu/degrees-and-advising/degree-programs/change-majors) website to determine whether they meet change of major requirements. Students who are ready to change their major should submit their request through the advising website (https://students.wpcarey.asu.edu/advising-sos).
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/supply-chain-management-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=BASCMBS~null&college=CBA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and

resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: As globalization continues to impact the way people live and work, international experience has become vital to success in every field of business. Through international study and internships (https://goglobal.asu.edu/), students gain valuable skills that employers are looking for, including communication and interpersonal skills, flexibility, motivation and a global perspective on business applications worldwide.

The W. P. Carey School of Business recommends these programs (https://goglobal.asu.edu/w-p-carey-supply-chain-management) for students majoring in supply chain management.

Career opportunities

Career track progression could lead to the vice president level in supply chain-related areas. Graduates of this program are recruited by firms around the world and in all sectors of the economy, including:

- health care
- manufacturing
- public and private
- retail
- service

Graduates of this program are highly sought-after and have excellent placements. Positions that supply chain management graduates have obtained include:

- buyer or planner
- distribution manager
- internet marketing analyst
- inventory specialist
- logistics planner
- materials manager
- operations planner or analyst
- planner or analyst
- production coordinator
- supply management analyst

Design and the Arts, Herberger Institute for

Apparel Technical Design, AA (HIATDAA)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Los Angeles

This program is not accepting applications at this time.

Program description

The Associate of Arts program in apparel technical design is a distinctly professional, hands-on degree program that prepares you for a dynamic career in the fashion industry. You gain key skills sought across this global industry, such as flat and digital patternmaking and development, technical design, garment construction, technology for design, tech pack making and fit analysis.

Studio and lecture courses guide you in developing a strong foundation of industry acumen, design aesthetics, and garment and pattern construction valuable for technical design career paths. All courses are embedded within the principles of sustainability, producing the next generation of environmentally conscious industry leaders.

Los Angeles location
If you're interested in using GI Bill® benefits, you should consider another ASU program.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors to another associate degree program. Students who wish to change to a bachelor's degree program should talk to their academic advisor.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIATDAA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This programs learning outcomes include the following:

- Create a final garment that uses technical design fundamentals including technical flat sketching, illustrating for tech packs, creating prototypes, and producing pattern corrections.
- Apply digital patternmaking and construction techniques to designs when creating a final digital capsule collections.
- Analyze product development and supply chain functions in their fashion industry operational plans.

Career opportunities

Graduates are prepared for careers such as patternmaker, technical designer, garment construction worker and apparel production manager.

Architectural Studies, BSD (ARSTDBSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The preprofessional Bachelor of Science in Design program in architectural studies offered by The Design School helps you understand architecture as both a cultural expression and technical achievement, and it offers an interdisciplinary approach to architecture.

You are prepared for alternative practices with architecture firms and in related fields such as landscape architecture, engineering, art, construction, urban planning, urban design and historic preservation, or for graduate studies in the professional Master of Architecture program, in business fields or in law.

This program offers two possible paths: cross-disciplinary focus and professional focus. For the first three years, you take two project-topic courses yearly, together with other classes, to develop your skills. In the third year, if you intend to pursue professional licensure as a registered architect, you must declare to your advisor your interest in pursuing the professional focus.

Second language requirement: No
STEM-OPT extension eligible: No

First required math course: MAT 114 - College Mathematics Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors into this program and would be new to this major must have a minimum cumulative GPA of 2.75 and understand their GPA must be brought up to a 3.00 or above within one semester to remain in good standing. An ASU student who is returning to this major (having previously studied this major in a prior semester) must have a minimum cumulative GPA of 3.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/architecture-bachelors/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ARSTDBSD~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop design fundamentals in the context of diverse visual settings, demonstrating familiarity with their understanding of their core principles.
- Critically evaluate their designs and methodology to develop visual works that convey messages to broad audiences.
- Develop skills to creatively address ecological, cultural and social issues.

Global opportunities

Global experience: International experiences supplement a major in architectural studies while also introducing students to new cultures, skills and perspectives. Whether in a foreign country, in the U.S. or online, students in architectural studies can learn about the complex differences between societies, which fosters a sense of empathy and understanding of the many ways people live in this world.

With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their interests and skill sets. The Herberger Institute for Design and the Arts recommends these programs (https://goglobal.asu.edu/students/major/architectural-studies) for students majoring in architectural studies.

Career opportunities

Graduates of the bachelor's degree program are prepared for graduate school as well as a range of design-related careers.

Those who wish to become licensed can complete their professional studies by attending an accredited professional master's degree program. The Design School offers a two-year professional MArch degree for graduates of the undergraduate program.

Art (Animation), BFA (HIARTANBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Fine Arts program in art with a concentration in animation, you acquire a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. As an animation student, you develop the ability to think critically and communicate through your art. You learn a wide variety of approaches to advancing ideas and discourses, including 2D, 3D and stop-motion animation.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including independent animation filmmaking, computer-generated imagery, machine learning, virtual reality and extended reality. Capstone research courses guide you through the process of developing a portfolio of completed works and provide you with practical experience presenting art in a variety of professional contexts.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which enable you to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the animation areas of study (https://art.asu.edu/degree-programs/animation) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop concepts into completed animation works.
- Develop a comprehensive toolkit for self-promotion that will position them for success in the field of art and design.
- Create animation short film organized and shared in a professional showcase.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to broaden their intercultural sensitivity, communication skills and leadership ability, and develop their personal and professional self-confidence. Students who participate in global education programs learn to adapt and persevere, growing along the way.

Career opportunities

An art degree offers graduates a pathway to creative careers as artists, scholars and educators in the public and private spheres. Artists find employment opportunities as practitioners in the field through commercial galleries, public art commissions, private collectors and cultural institutions. Possible positions include museum or gallery professional, art dealer, art director, private art instructor, studio artist and community-based artist. Venues might include health care settings, nonprofit agencies, and local and national public arts. Other options for graduates include working at arts agencies and public art programs, gaining admission to prestigious graduate programs, and setting up their own art businesses. The skills acquired to produce art also have a wide variety of non-art applications.

Animation graduates work within the realms of film, television, special effects, games and game development, augmented and virtual reality, fine arts, design, illustration, robotics, and scientific and data visualization. In recent years, job opportunities for multimedia artists, animators, and film and video creators have consistently increased nationwide. ASU alumni have pursued diverse career paths as animators, storyboard artists, 3D modelers, concept designers, creative directors, graphic artists, multimedia designers and educators, among others.

Art (Art Education), BFA (FAARTEBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Fine Arts program in art with a concentration in art education offers you a dynamic foundation in both artistic practice and the teaching of art. The program combines hands-on studio work, the study of art history and global cultures, and direct teaching experience with learners of all ages. You explore how art education takes place across diverse settings, including K-12 classrooms, community programs, and museums. Courses are guided by faculty

with expertise in innovative curriculum design, creative learning strategies, and inquiry-based approaches that support a wide range of learners.

Courses invite you to approach art education from multiple perspectives, emphasizing critical thinking, interdisciplinary connections and teaching in inclusive contexts. Alongside these broader frameworks, you gain practical skills in lesson planning, arts integration and effective instructional methods. In the capstone year, you apply your knowledge through supervised teaching experiences.

In addition to learning in the classroom, you also have opportunities for internships in a variety of educational settings and access to arts organizations and cultural institutions, enabling you to build your professional network. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the art education areas of study (https://art.asu.edu/degree-programs/art-education) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students are admitted directly to the art education concentration upon admittance to the BFA program in art.

Transfer admission requirements: Transfer students who have completed the foundational core and pre-art requirements are admitted directly to the art education concentration upon admittance to the BFA program in art. To complete an undergraduate degree in four years, it is recommended that community college transfer students who are completing a two-year degree and have completed the foundational core and pre-art requirements apply and submit a declaration form in the semester in which they are completing their community college degree or the semester before they plan to enter Arizona State University.

Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 credit hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 credit hours of resident credit in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAARTEBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Understand historical and contemporary practices within the field of art education through the development of curriculum incorporating fine arts techniques for a range of settings and populations.
- Demonstrate professional preparedness, including writing an articulate statement of their teaching philosophy and assembling a documented cohesive body of pedagogical materials and creative work.
- Demonstrate effective teaching dispositions in the classroom through successful firsthand engagements with learners that meet established pedagogical standards with culturally responsive techniques and methods.

Global opportunities

Global experience: Creativity and inspiration find fuel during a study abroad program. Global experiences (https://goglobal.asu.edu/) provide a platform on which aspiring art educators develop and broaden the intercultural sensitivity, communication skills and leadership ability that they can take into the classroom. Study abroad can prove to be a vital accompaniment to a concentration in art education.

Career opportunities

An arts degree offers graduates a pathway to creative careers as artists, scholars, advocates and educators in the public and private spheres. Artists find employment opportunities as practitioners in the field through commercial galleries, public art commissions, private collectors and cultural institutions. Positions of employment include museum or gallery professional, art dealer, art director, private art instructor, studio artist and community-based artist. Venues might include health care settings, nonprofit agencies, and local and national public arts organizations. Other options for graduates include working at arts agencies and public art programs, gaining admission to prestigious graduate programs, and setting up their own art businesses. The skills acquired to produce art also have many valuable applications beyond the arts.

Art education graduates find employment opportunities with charter schools, art museums, nonprofit art spaces, and recreational or community-oriented service groups that offer art instruction. Those who also complete the state certification requirements for an art specialist certificate may teach in public and private elementary schools, middle schools and high schools. Graduates who do not seek state certification may find opportunities for jobs with some charter schools, art museums, nonprofit art spaces and recreational or community-oriented service groups that offer art instruction. Many graduates of this program have gone on to exhibit their work in notable institutions and have received prestigious grants and residency opportunities.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Art (Art History), BA (FAARTHBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in art with a concentration in art history, you acquire a foundation in art and material culture that explores art history in aesthetic, economic, social and political contexts. You learn to critically assess and analyze works of art from many periods and geographies. Your research practice draws connections between a variety of fields, including museum studies, archaeology, anthropology, media and performance studies, gender and ethnic studies, history, literature, philosophy and economics. You learn about visual art, architecture, archeology, collecting, world film and the art market.

The curriculum emphasizes interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of art history, including ancient, African, Asian, Baroque, contemporary, Latin American, medieval, modern, Native American, Indian, Oceanian, pre-Columbian and Renaissance. Capstone courses guide you through the process of developing advanced research skills and methodologies for writing art history.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which provide you with opportunities to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the art history areas of study (https://art.asu.edu/degree-programs/art-history) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students meeting the university requirements for admission may matriculate in the Herberger Institute for Design and the Arts. Separate admission procedures and approvals are required for some programs within the college. Students must contact specific departments or schools for details.

First-year students applying to the Herberger Institute School of Art enter ASU as art exploratory majors in the School of Art. There is no portfolio review process for first-year-students at the time of admission to ASU.

Typically, students in their second year who are interested in studio art and art education submit a portfolio for review once they have completed their core requirements and are completing the last of the 12 hours of 200-level art requirements; students who are interested in art history or museum studies submit a declaration form in the semester in which they complete 30 hours.

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 hours of resident credit in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-art-history/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site

while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAARTHBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Distinguish significant works of art from different periods and cultures of Western and non-western art history.
- Demonstrate research skills in the field of art history.
- Synthesize art history research into written and oral communication.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to broaden their intercultural sensitivity, communication skills and leadership ability, and develop their personal and professional self-confidence. Students who participate in global education programs learn to adapt and persevere, growing along the way.

Career opportunities

An arts degree offers students a pathway to creative careers as artists, scholars and educators in the public and private spheres. Artists find employment opportunities as practitioners in the field through commercial galleries, public art commissions, private collectors and cultural institutions. Positions of employment include museum or gallery professional, art dealer, art director, private art instructor, studio artist and community-based artist. Venues might include health care settings, nonprofit agencies, and local and national public arts organizations. Other options for graduates include working at arts agencies and public art programs, gaining admission to prestigious graduate programs, and setting up their own art businesses. The skills acquired to produce art also have a wide variety of non-art applications.

Art (Art Studies), BA (FAARTSTDBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The Bachelor of Arts program in art with a concentration in art studies is a flexible, hands-on program that encourages you to explore a wide variety of artistic practices while developing your own creative voice. You take studio courses taught by professional artists in painting, drawing, printmaking, sculpture, animation, photography, illustration and more. These are supported by courses in art history and contemporary practice.

This program teaches you how to think critically, experiment fearlessly and translate ideas into visual form, even if you don't have art experience. You gain skills in visual communication, creative problem-solving and critical thinking. Along the way, you learn to make unexpected connections, solve problems creatively and develop a distinctive body of work. Faculty mentors and a vibrant community of peers support you and help you grow personally and professionally. Dedicated courses in professional practices prepare you to present your work, connect with creative networks and pursue opportunities after graduation.

You should visit the art studies areas of study (https://art.asu.edu/degree-programs/art-studies) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra or MAT 119 Finite Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students meeting the university requirements for admission may matriculate in the Herberger Institute for Design and the Arts. Separate admission procedures and approvals are required for some programs within the college. Students must contact specific departments or schools for details.

First-year applicants may apply directly to the art studies program; there is no portfolio review for this major.

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 credit hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 credit hours of resident credit in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/art-studies-bachelors/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAARTSTDBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Participate in the process of making art and through this process will effectively visualize their ideas and build their creative thinking and problem-solving skills.
- Develop a comprehensive toolkit for self-promotion that positions them for success in the field of art and design.
- Articulate their place as artists in the contemporary field of art.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world, and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to develop and broaden their intercultural sensitivity, communication skills and leadership ability, and challenges them to think differently. Whether in a foreign country, in the U.S. or online, students learn to adapt and persevere, and they have a chance to look inside themselves in a way they haven't done before, growing their personal and professional confidence along the way.

Career opportunities

Completion of this program opens the door to a variety of creative career paths. Many graduates work as practicing artists, exhibiting in galleries, securing public art commissions or selling work to private collectors. Others become

educators, community-based artists or arts advocates, using their skills to connect art with audiences in health care settings, nonprofit agencies and public arts organizations.

Graduates have valuable transferable skills that make them strong candidates in many industries. Possible careers include museum or gallery professional, art director, arts administrator, art dealer or private instructor. For those interested in further study, the program provides opportunities to prepare for admission to competitive Master of Arts, Master of Fine Arts and other graduate programs nationwide.

Art (Art Therapy), BFA (HIARTATBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Fine Arts program with a concentration in art therapy is the only one of its kind in the Southwestern U.S. This program brings together mental health and artistic practice. You are educated in art therapy concepts, methodologies and fundamental principles, as well as in the history and traditions of art production. Courses include art history, art education, art therapy, psychology, studio art and professional development, including internships, pro-practice, seminars and exhibitions.

All registered art therapists are required to gain board certification, which includes a master's degree in art therapy. The courses offered in this program meet the requirements for entry into credentialed American Art Therapy Association art therapy graduate programs, including the required 18 hours of undergraduate courses in psychology and 18 hours in studio art.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 170 - Precalculus Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, art therapy students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Art therapy majors interested in study abroad are advised to consider programs focused on either psychology or art.

Career opportunities

Graduates are well prepared for entry-level positions in community art programs, youth programs and other social service programs, as well as entry-level art therapy positions, including art therapy assistant. Graduates have the guidance and tools to advance their academic careers and pursue professional opportunities, including exhibitions, residencies and grants.

Graduates are also prepared to pursue graduate study in art therapy --- required to become a registered art therapist --- and eventually gain board certification.

Art (Ceramics), BFA (FAARTCBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Fine Arts program in art with a concentration in ceramics, you acquire a foundation of skills and knowledge that draws connections between historical methods and emerging art practices. You develop the ability to think critically and communicate through your art as you explore a wide variety of approaches to advance ideas and discourses, including hand building, throwing, moldmaking and installation.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research, and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including functional ceramics, sculpture, installation, design and performance. Capstone research courses guide you through the process of developing a portfolio of completed works, and you gain practical experience presenting art

in many professional contexts.

In addition to classroom learning, the program is also enriched by arts organizations and cultural institutions, which provide you with the opportunity to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the art areas of study (https://art.asu.edu/degree-programs/ceramics) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Art (Craft and Sculptural Practices), BFA (FAARTSBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

This program's name has changed effective Fall 2026. The previous name was Art (Sculpture).

Program description

In the Bachelor of Fine Arts program in art with a concentration in craft and sculptural practices, you acquire a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. You develop the ability to think critically and communicate through your art, learning a wide variety of approaches to advancing ideas and discourses, including woodworking, foundry, fine metals, jewelry, neon, large-scale fabrication and textiles.

The program embraces all media. If you are interested in working in three dimensions, you have access to an extensive variety of materials and equipment, including a world-class foundry; neon studio; steel fabrication facilities; machine shop; wood studio; fine metals and jewelry studio; felting, basketry, sewing, knitting, quilting and weaving studio; and textiles dye lab. You can move in the direction your art takes you.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research, mentorship, exhibition experience and portfolio building. Distinguished faculty provide expertise across an array of areas within contemporary art, including object-making, public art, site-based projects, interactive and kinetic sculpture, installation and social practice. Courses emphasize post-colonialism, queer art and culture, critical craft, Indigeneity, sustainability, migration, data visualization, site specificity and public art.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions that provide you with opportunities to build professional networks through fellowships, internships and residencies. The program is further augmented by public events supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the craft and sculptural practices areas of study (https://art.asu.edu/degree-programs/sculpture) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Art (Digital Photography), BFA (HIARTDPBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Online

Program description

In the Bachelor of Fine Arts program in art with a concentration in digital photography, you acquire a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. As a digital photography student, you develop the ability to think critically and communicate through your art. You learn a wide variety of approaches to advancing ideas and discourses, including digital workflow, image sequencing, digital compositing and alternative processes.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including photobooks, video art, portraiture and landscape. Capstone research courses guide you through the process of developing a portfolio of completed works and provide practical experience for presenting art in a variety of professional contexts.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which enable you to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIARTDPBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Create artwork for exhibitions in galleries, museums and other venues demonstrating technical artistic abilities and conceptual development.
- Demonstrate professional preparedness by developing a comprehensive toolkit for self-promotion that will position them for success in the field of art and design.
- Create a cohesive body of artwork organized and shared in a professional digital portfolio.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to enhance their intercultural sensitivity, communication skills and leadership ability, and develop their personal and professional self-confidence. Students who participate in global education programs learn to adapt and persevere, growing along the way.

Career opportunities

An art degree offers graduates a pathway to creative careers as artists, scholars and educators in the public and private spheres. Artists find employment as practitioners in the field through commercial galleries, public art commissions, private collectors and cultural institutions. Possible positions include museum or gallery professional, art dealer, art director, private art instructor, studio artist and community-based artist. Venues might include health care settings, nonprofit agencies, and local and national public arts organizations. Other options for graduates include working for arts agencies and public art programs, gaining admission to prestigious graduate programs, and setting up their own art businesses. The skills acquired to produce art also have a wide variety of non-art applications.

Art (Drawing), BFA (FAARTDBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Students interested in drawing should apply to the painting and drawing concentration.

Program description

The Bachelor of Fine Arts program in art with a concentration in drawing offers a dynamic environment for creative and conceptual growth that promotes an active studio practice. The program's curriculum encourages a wide spectrum of approaches to painting and drawing techniques. Students develop proficiency through working from a variety of sources and subjects and a range of materials and processes. Faculty encourage students to develop their own unique artistic vision and critically assess imagery in context to the history of art and contemporary practices. Faculty emphasize critical concepts in their teaching and encourage research (https://art.asu.edu/research), interdisciplinary engagement and coursework from disciplines across the university.

Faculty provide students with professional mentorship regarding opportunities such as assistantships, internships, scholarships, residencies and exhibitions. Additionally, the School of Art galleries (https://art.asu.edu/galleries), the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/) and the ASU Art Museum (https://asuartmuseum.org/) support a robust schedule of public exhibitions and visiting artist and scholar lectures. These events (https://art.asu.edu/events) offer students the opportunity to develop their knowledge and appreciation of contemporary art and culture while building a professional network. Further augmenting the curriculum are numerous internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide range of arts organizations.

Graduates from the BFA program are prepared for the future with a portfolio of completed works that showcases their

unique artistic vision. Capstone and research studio courses engage students intellectually and critically as they gain the practical experience of developing a distinctive body of work and presenting that work (https://portfolios.art.asu.edu/) in one of the School of Art galleries.

Students can visit the painting and drawing area of study page (https://art.asu.edu/degree-programs/drawing-painting) to learn more about the program and faculty.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 119 Finite Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Currently, all art students are admitted to ASU into the BA (art studies) program. They must complete a series of requirements that include foundational coursework to be eligible for study in one of the school's BFA degree programs, which include upper-division coursework in the studio. There is no portfolio review process for admission to the School of Art.

Students in their second year who are interested in studio art and art education obtain a signed BFA declaration form after completing the core requirements and during completion of the last of the 12 hours of 200-level art requirements. Students interested in art history or museum studies submit a major declaration form in the semester in which they complete 30 credit hours. The student's major is changed upon successful completion of the major declaration form. Students may choose to remain in and complete the Bachelor of Arts (art studies).

Beginning fall 2019, students are admitted directly to the drawing concentration upon admittance to the BFA program in art.

Transfer admission requirements: Transfer students who have completed the foundational core and pre-art requirements may submit a major declaration form before they have been admitted to ASU. To complete an undergraduate degree in four years, it is recommended that community college transfer students who are completing a two-year degree and have completed the foundational core and pre-art requirements apply and submit a declaration form in the semester in which they are completing their community college degree or the semester before they plan to enter Arizona State University.

Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 credit hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 credit hours of resident credit in the major as

approved by the faculty.

Beginning fall 2019, transfer students are admitted directly to the drawing concentration upon admittance to the Bachelor of Fine Arts program in art.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAARTDBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Global Education (https://goglobal.asu.edu/) programs provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture uniquely different from their own. Study abroad encourages students to develop and broaden their intercultural sensitivity, communication skills and leadership ability, and challenges them to think differently. Whether in a foreign country, in the U.S. or online, students learn to adapt and persevere, and they are provided with a chance to look inside themselves in a way they haven't done before, growing their personal and professional self-confidence along the way.

Career opportunities

A degree in the arts offers students a pathway to a rich and varied choice of careers. School of Art programs prepare students to initiate creative careers as artists, scholars and educators in the public and private sphere.

Art graduates find employment opportunities as artists in the field, selling their works through commercial galleries and commissions and to private collectors; as museum or gallery professionals, art dealers and directors; as private school art teachers and college professors; and as community-based artists (venues might include health care settings, nonprofit agencies, and local and national public arts). Other options include working at arts agencies and public art programs or gaining admission to prestigious graduate programs across the nation.

Art (Expanded Arts), BFA (FAARTIBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Fine Arts program in art with a concentration in expanded arts, you acquire a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. As an expanded arts student, you learn to think critically and communicate through your art. You learn a wide variety of approaches and gain proficiency in combining video, sculpture, sound, digital media, interaction, installation and performance to advance ideas and discourses.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including durational, immersive and context-specific art. Capstone research courses guide you through the process of developing a portfolio of completed works, and you gain practical experience presenting art in many professional contexts.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which offer you the opportunity to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the expanded arts areas of study (https://art.asu.edu/degree-programs/expanded-arts) page to learn more about the program. To engage the school's creative community, subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Art (Museum and Curatorial Practices), BA (FAARTMSBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

This program's name has changed effective Fall 2026. The previous name was Museum Studies.

Program description

In the Bachelor of Arts program in art with a concentration in museum and curatorial practices, you focus on current themes and issues at the forefront of contemporary art museum and heritage sites. You develop the ability to think critically and communicate by studying various ethical and institutional issues, such as decolonization and repatriation claims, activist curating and broadening museum audiences. Distinguished faculty provide expertise across an array of courses within the field of museum and curatorial studies, including art history, visual culture, liberal studies, education, global studies, justice and critical studies. These courses offer a variety of learning opportunities led by scholars and museum practitioners across ASU and in the art world. In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which enable you to build your professional network through fellowships and internships. The program is further augmented by public events supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You can visit the museum and curatorial practices areas of study (https://art.asu.edu/bachelors-degrees/majorinfo/FAARTMSBA/undergrad/false/11) page to learn more about the program. If you want to engage with the creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students meeting the university requirements for admission may matriculate in the Herberger Institute for Design and the Arts. Separate admission procedures and approvals are required for some programs within the college. Students must contact specific departments or schools for details.

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 hours of resident credit in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/art-museum-studies-ba/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAARTMSBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will recall the general history and function of museums and heritage sites domestically and globally.
- Students will comparatively analyze elements of potential careers within the museums and heritage site sectors utilizing evidence-based research.

- Students will write at an academic level suitable for further graduate study.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles. With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to develop and broaden their intercultural sensitivity, communication skills and leadership ability, challenging them to think differently. Whether in a foreign country, in the U.S. or online, students learn to adapt and persevere. They have a chance to look inside themselves in a way they haven't done before, growing their personal and professional confidence along the way.

Career opportunities

Graduates find employment opportunities with art museums, university and commercial art galleries, historical societies and archives, libraries and other nonprofit organizations. An arts degree offers students a pathway to creative careers as artists, scholars and educators in the public and private spheres. Museum professionals find opportunities as practitioners in the field, working with commercial galleries, public art commissions, private collectors and auction houses, and for nonprofit cultural institutions. Possible positions include museum or gallery administrator, curator, educator, exhibition manager, art dealer, art director, consultant and private instructor. Other employment venues might include health care settings, nonprofit agencies and local and national public arts organizations. Additional options for graduates include working at arts agencies and for public art programs, and gaining admission to prestigious graduate programs.

Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIARTPDBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Create artwork for exhibitions in galleries, museums and other venues demonstrating technical artistic abilities and conceptual development.
- Demonstrate professional preparedness by developing a comprehensive toolkit for self-promotion that will position them for success in the field of art and design.
- Create a cohesive body of artwork organized and shared in a professional digital portfolio.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture distinctly different from their own. Study abroad encourages students to broaden their intercultural sensitivity, communication skills, and leadership ability, and develop their personal and professional self-confidence. Students who participate in global education programs learn to adapt and persevere, and grow along the way.

Career opportunities

An art degree offers graduates a pathway to creative careers as artists, scholars and educators in the public and private spheres. Artists find employment as practitioners in the field through commercial galleries, public art commissions, private collectors and cultural institutions. Possible positions include museum or gallery professional, art dealer, art director, private art instructor, studio artist and community-based artist. Possible venues include health care settings, nonprofit agencies, and local and national public arts organizations. Other options for graduates include working at arts agencies and public art programs, gaining admission to prestigious graduate programs, and setting up their own art businesses. The skills acquired to produce art also have a wide variety of applications beyond the arts.

Art (Photography), BFA (FAARTPHBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Fine Arts program in art with a concentration in photography, you gain a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. As a photography student, you develop the ability to think critically and communicate through your art. You learn a wide variety of approaches to advancing ideas and discourses, including alternative processes, documentary, landscape and portraiture.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including experimental, durational, immersive and context-specific art. Capstone research courses guide you through the process of developing a portfolio of completed works, and you gain practical experience presenting art in many professional contexts.

In addition to classroom learning, the program is enriched by arts organizations and cultural institutions, which provide you with the opportunity to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the ASU Art Museum, the Ceramics Research Center and Archive, Pyracantha Press and the School of Art galleries, including the Northlight Gallery (https://art.asu.edu/about/galleries-and-facilities/northlight-gallery), a collecting institution with significant historical holdings. Northlight serves as a laboratory for you to study and respond to its collection, learn exhibition strategies and exhibit your work.

You should visit the photography areas of study (https://art.asu.edu/degree-programs/photography) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
There is no portfolio review process for admission to the School of Art.

Transfer admission requirements: To complete an undergraduate degree in four years, it is recommended that community college transfer students complete the foundational core and pre-art requirements.

Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 credit hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Art (Printmaking), BFA (FAARTPMBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Interested students should apply to the Art (Painting, Drawing and Printmaking), BFA program.

Program description

In the Bachelor of Fine Arts program in art with a concentration in printmaking, you acquire a foundation of skills and knowledge that draws connections between traditional methods and emerging art practices. As a printmaking student, you develop the ability to think critically and communicate through your art. You learn a wide variety of approaches to advancing ideas and discourses, including photogravure, letterpress, zines and papermaking.

The curriculum emphasizes conceptual and material knowledge, interdisciplinary research and professional mentorship. Distinguished faculty provide expertise across an array of distinct areas within the field of contemporary art, including intaglio, lithography, book arts, relief and screen printing. Capstone research courses guide you through the process of developing a portfolio of completed works and provide practical experience for presenting art in a variety of professional contexts.

In addition to classroom learning, the program is also enriched by arts organizations and cultural institutions, which provide you with opportunities to build your professional network through fellowships, internships and residencies. The program is further augmented by public events (https://art.asu.edu/events) supported by the School of Art galleries, the ASU Art Museum, the Ceramics Research Center and Archive, and Pyracantha Press.

You should visit the printmaking areas of study (https://art.asu.edu/degree-programs/printmaking) page to learn more about the program. To engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

Art (Textiles), BFA (FAARTFBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

The Bachelor of Fine Arts program in art with a concentration in textiles mentors and educates you in challenging technical and creative methods of studio art practice; critical thinking in the context of cultural diversity, global awareness and community engagement; and the history, traditions and innovations within art. Working from fundamental techniques, you gain mastery of skill, along with an immersion in related critical theory. An emphasis is placed on how investigations into the material and the political and social histories of textiles can inform contemporary art practice. You develop proficiency through working from a variety of sources and subjects, and a range of materials and processes.

Faculty encourage you to develop your own unique artistic vision and critically assess imagery in context to the history of art and contemporary practices. Faculty emphasize critical concepts in their teaching and encourage research (https://art.asu.edu/research), interdisciplinary engagement and coursework from disciplines across the university. Faculty also provide you professional mentorship regarding opportunities such as assistantships, internships, scholarships, residencies and exhibitions.

The School of Art (https://art.asu.edu/events/visiting-artist-and-scholar-series), the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/), and the ASU Art Museum (https://asuartmuseum.org/) support a robust schedule of public exhibitions and visiting artist and scholar lectures. These events (https://art.asu.edu/events) offer you the opportunity to develop your knowledge and appreciation of contemporary art and culture while building a professional network. Further augmenting the curriculum are numerous internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide variety of arts organizations.

Capstone and research studio courses engage you intellectually and critically as you develop a distinctive body of work and present that work (https://portfolios.art.asu.edu/) in one of the School of Art galleries (https://art.asu.edu/galleries), meaning that as a graduate of this program you are prepared for the future with a portfolio of completed works that showcases your unique artistic vision.

You can visit the sculpture area of study page (https://art.asu.edu/degree-programs/sculpture) to learn more about the program and faculty, and you can sign up for the School of Art newsletter (https://art.asu.edu/events/email-list) to learn more about its creative community.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens, deepen their understanding of the world and gain valuable career-building experiences. Study abroad can prove to be a vital accompaniment to any art concentration, allowing for broad historical and archaeological explorations. Students develop insight into the cultures and minds of some of the world's most notable artists when they experience the places that gave rise to specific artistic styles.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture uniquely different from their own. Study abroad encourages students to develop and broaden their intercultural sensitivity, communication skills and leadership ability, and it challenges them to think differently. Whether in a foreign country, in the U.S. or online, students learn to adapt and persevere; and they are provided with a chance to look inside themselves in a way they haven't done before, growing their personal and professional self-confidence along the way.

Career opportunities

A degree in the arts offers graduates a pathway to a rich and varied choice of careers. The BFA program prepares graduates to initiate creative careers as visual artists and as professionals in the public and private sphere. Career opportunities depend on focused concentrations within the area of art and additional education or training per industry standards. School of Art programs prepare graduates to initiate creative careers as artists, scholars and educators in the public and private sphere.

Art graduates find employment opportunities as artists in the field, selling their works through commercial galleries and commissions and to private collectors; as museum or gallery professionals, art dealers and directors; as private school art teachers and college professors; and as community-based artists (venues might include health care settings, nonprofit agencies, and local and national public arts). Some textile artists have established careers in design, in settings as varied as working in industry creating commercial items and setting up boutique studios for the creation of one-of-a-kind fabrics for garments and interiors. Other options include working for arts agencies and public art programs; gaining admission to prestigious graduate programs across the nation in art or design; or finding employment in fields adjacent to textiles, such as business or technology.

Arts (BA in the Arts), BA (FAATSBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Arts program in the arts is an interdisciplinary offering for you if you are passionate about the arts and design, and interested in exploring multiple arts disciplines rather than specializing in one.

You gain an understanding of the theoretical, historical and cultural forces that shape the expression of arts and design. You pursue open-ended paths to explore and develop a variety of skills suitable for advanced study in multiple areas.

The major includes a common core for all students; you may choose a focus from arts administration or entertainment design, or you may design an individualized focus that's subject to approval by the institute's standards committee and the dean's office.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
OR any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAATSBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students whose program of study is in the arts have the ability to further their studies around the world (https://goglobal.asu.edu/). Equipped with the knowledge obtained in classes, students can explore cultural aesthetic practices while studying abroad, furthering their understanding and enhancing their portfolios.

Career opportunities

As Arizona's population grows, numerous arts organizations are being developed to provide cultural and artistic experiences for the state's residents. These organizations need individuals who understand the impact of the arts on society and who are committed to supporting the arts. This program provides the necessary skill sets, including critical thinking, for such careers as:

- arts administrator
- arts critic
- entertainment designer
- media arts author or publisher
- museum curator or director
- public art specialist

Costume Design and Technology for the Creative Industries, BFA (HICOSBFA)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Los Angeles

Program description

The Bachelor of Fine Arts program in costume design and technology for the creative industries provides you with a multidisciplinary education, combining the practical application of knowledge with professional industry experience. The Herberger Institute Creative Economy Hub™ in Los Angeles allows you to gain practical experience working with teams from across disciplines in the entertainment industry. You connect directly to the industry, working on productions and learning key technical skills that make you a valuable contributor in internships and apprenticeships.

In this program you learn foundational skills in garment construction, script analysis, character development, illustration and production practices as you begin to work with interdisciplinary creative teams to create costumes for film, television and theatre. Access to professional-level facilities offers an immersive environment for you to gain industry-recognized training for a career in the entertainment industry.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: More than 300 study abroad opportunities are available through the Global Education Office (https://goglobal.asu.edu/), which expose students to unique cultural environments and enable students to expand their knowledge in diverse settings. Students are challenged to adapt and persevere under unfamiliar social and cultural circumstances, which allows them to grow and prosper in their professional and personal lives. Students have the opportunity to enhance their resume and portfolio with a global perspective gained by studying abroad.

The Herberger Institute for Design and the Arts recommends these programs (https://goglobal.asu.edu/students/major/fashion) for ASU FIDM students majoring in fashion and costume design.

Career opportunities

Graduates are prepared to enter graduate programs or pursue professional creative careers. Career examples include:

- costume illustrator
- craft artist
- curator

design assistant
fabric and apparel designer
film, television and theatre costume designer
production design
production supervisor

Dance, BFA (FADANBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The School of Music, Dance and Theatre provides a dynamic environment where you grow as a creative artist, innovator and scholar. The Bachelor of Fine Arts program in dance emphasizes collaboration, creativity, and a wide variety of transferable skills that prepare you for success both in the arts and in related fields.

The program's core values --- creativity, inquiry and humanity --- are woven throughout the curriculum. You receive comprehensive dance training in diverse forms, including Afro-Latin salsa, contemporary ballet, hip hop, contemporary modern, and somatic practices. You also engage in choreographic exploration, digital arts, pedagogy, dance history and philosophy, cultivating both artistic voice and critical understanding.

In addition to coursework, you benefit from robust performance opportunities, hands-on choreographic projects, and a senior capstone experience that showcases your individual artistry and skill sets. Internships and community connections provide real-world experience, preparing you to enter professional dance careers or apply your skills across a wide spectrum of disciplines.

At the School of Music, Dance and Theatre, you're empowered to discover who you are as a mover and maker, to engage with your community, and to chart a future shaped by your creativity and passion.

Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students are strongly encouraged to attend the Dance Summit held in the fall semester or the Be a Dance Major days held in the spring semester to learn about the dance program at ASU. Dance scholarships are available to all applicants. Details on how to register for a dance event and dance scholarships are found on the School of Music, Dance and Theatre (https://musicdancetheatre.asu.edu/admission/apply-dance-major) website.

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 hours of resident credit in the major as approved by the faculty.

Students should review the School of Music, Dance and Theatre (https://musicdancetheatre.asu.edu/admission/apply-dance-major) website for more details.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors to one offered by the Herberger Institute for Design and the Arts must have a minimum cumulative GPA of 2.50.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FADANBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply creative perspectives and skills in their art-making that reflect broad understandings of current dance and digital media practices.
- Implement culturally sensitive, moral, and socially grounded teaching, facilitation and community building practices.
- Apply knowledge of the diversity and significance of past and current dance practices, traditions and trends as they are situated within human cultures to the creation and assessment of new work.

Global opportunities

Global experience: Dance transcends language, so students can explore their art in various countries, no matter what it is. When studying abroad (https://goglobal.asu.edu/), students expand their view of dance through an international

lens while exploring various dance forms at their origins.

Career opportunities

The comprehensive academic foundation of the BFA program in dance prepares graduates to be leading dance professionals. Graduates have the expertise to pursue professions as choreographers, performers, educators, community artists, scholars and more. After leaving ASU, many graduates participate in activities such as:

curating or producing dance festivals and events
directing or managing performing art companies, studios or dance-related organizations
facilitating community partnerships and projects
performing and making dance in varied settings
producing dance media for performance or instruction
pursuing certification in somatic practices (Laban Movement Analysis, Feldenkrais Method®, Alexander Technique, Body-Mind Centering®, etc.)
working in the areas of health and wellness (fitness, yoga, massage therapy, etc.)
working in the field of arts management and administration
writing about dance for websites, blogs, magazines and other publications

Dance (Dance Education), BFA (FADANEBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Fine Arts program in dance with a concentration in dance education, you prepare to become a certified K-12 dance teacher in Arizona (and many other states, through reciprocity agreements).

At the School of Music, Dance and Theatre, you train in a supportive and inclusive environment that helps you grow as an artist and educator. You study dance technique (Afro-Latin, contemporary ballet, hip hop, modern, somatics), dance history, music, movement science, digital media and stage production.

The curriculum combines creativity, research and hands-on experience --- including student teaching internships --- so you complete the program ready to teach, choreograph and inspire the next generation of dancers.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students are strongly encouraged to attend the Dance Summit held in the fall semester or the Be a Dance Major days held in the spring semester to learn about the dance program at ASU. Dance scholarships are available to all applicants. Details on how to register for a dance event and dance scholarships are found on the School of Music, Dance and Theatre (https://musicdancetheatre.asu.edu/admission/apply-dance-major) website.

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 hours of resident credit in the major as approved by the faculty.

Students should review School of Music, Dance and Theatre (https://musicdancetheatre.asu.edu/admission/apply-dance-major) website for more details.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change their major to one offered by the Herberger Institute for Design and the Arts must have a minimum cumulative GPA of 2.50.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FADANEBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply creative perspectives and skills in their art-making that reflect broad understandings of current dance and digital media practices.
- Develop pedagogical approaches and curricular content for PreK-12 and community dance education settings.
- Apply knowledge of past and current dance practices, traditions and trends in one or more global or historical dance forms.

Global opportunities

Global experience: Dance transcends language, so students can explore their art in various countries, no matter the language. When studying abroad (https://goglobal.asu.edu/), students expand their view of dance through an international lens while exploring various dance forms at their origins, gaining knowledge that helps them become educators of the art.

Career opportunities

The concentration in dance education lays the foundation for a career in teaching in public and private settings, as a dance educator in K-12 settings, as a teacher in private studio or community environments, or as an independent dance artist and performer. Graduates have an Arizona teaching certification and a degree in dance, and they can expect to find employment in one of many thriving middle school and high school dance programs throughout the state, community settings or dance studios.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Environmental Design, BS (HIEDSBS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Science program in environmental design at The Design School has an integrated curriculum that emphasizes general knowledge and design research and is built around the three pillars of sustainability, technology and the environment. You develop a specialized understanding of design methods, theories, technologies, social issues and management related to your specific area of interest. You hone a sustainability focus by developing skills in sustainable practices that address climate change, resource conservation and urban ecology.

You gain practical experience through studio projects, internships and collaborations with industry professionals. The curriculum takes an interdisciplinary approach to sustainability --- you work alongside experts in ecology, architecture and social sciences to create holistic design solutions.

This program provides you with a broad base of skills and knowledge drawn from natural science, social science, arts, technology and integrated environmental design, preparing you for a variety of careers in the design, planning and management of the built environment.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some

combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIEDSBS~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Examine design creative processes through theory and research articles as measured through the final assignment.
- Apply key skills in the field related to the analysis of existing landscape conditions and the design of new proposals
- Synthesize iterative ideas and design concepts into plans for built works that meet professional standards.

Global opportunities

Global experience: Students can complement their ASU coursework with study abroad programs (https://goglobal.asu.edu/). Programs that focus on topics such as sustainability, design and ecotourism increase a student's multicultural engagement and expose them to the design of built environments in other parts of the world.

Career opportunities

Graduates find careers in design, urban planning and environmental consulting and take on roles in offices, businesses,= public institutions and industries that require an awareness of issues that affect environmental design. Graduates may= also pursue professional or other graduate degree programs.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Learn design and commercial production techniques.
- Produce projects relevant to fashion industry practices.
- Successfully use industry-based information.

Global opportunities

Global experience: Fashion varies from country to country, city to city and culture to culture. Studying abroad (https://goglobal.asu.edu) exposes students to distinct cultural environments and enables them to expand their fashion knowledge in diverse settings. Students are challenged to adapt and persevere under unfamiliar social and cultural circumstances, allowing them to grow and prosper in their professional and personal lives. Students have the opportunity to enhance their resume and portfolio with a global perspective gained by studying abroad.

The Herberger Institute for Design and the Arts recommends these programs (https://goglobal.asu.edu/students/major/fashion) for students majoring in fashion.

Career opportunities

Graduates are prepared to enter the fashion industry in any of a number of roles. Some examples are:

- brand coordinator

e-commerce or digital fashion specialist
fashion business analyst
fashion designer
fashion historian or curator
fashion merchandiser
fashion stylist
product developer
supply chain manager
technical designer
textile and apparel production manager

Fashion (Apparel Product Development), BA (HIFSHAPDBA)

College/School: Herberger Institute for Design and the Arts

Campus: Online

Program description

The Bachelor of Arts program in fashion with a concentration in apparel product development is designed to immerse you in the full product development lifecycle, from ideation to the finished garment available in stores. This concentration blends creativity, technical expertise and business strategy to equip you with the essential skills and knowledge needed to succeed in the fast-paced world of fashion product development.

Through a combination of studio-based projects, lectures and hands-on learning, you master vital product development skills, including flat and digital patternmaking, tech pack creation, fit analysis, garment construction and sourcing. These skills enable you to navigate complex production workflows, manage timelines and collaborate with cross-functional teams, while ensuring high-quality standards are maintained throughout. The curriculum emphasizes a holistic approach to product development, providing you with the expertise to oversee the end-to-end creation of a product. You learn how to transform creative ideas into commercially viable products, addressing market needs, forecasting trends, selecting materials and managing production. You also gain a deep understanding of line architecture and how to create cohesive product lines that align with brand identity and consumer expectations. You prepare to drive product strategy and innovation by integrating creative design with practical business decisions.

Another key element of the program is its emphasis on technology integration and innovation in product development. You explore the tools and software that are transforming the fashion industry, such as 3D design software, CAD systems and virtual prototyping tools. By mastering these technologies, you are equipped to streamline the product development process, enhance design accuracy, and reduce time-to-market. This technological proficiency prepares you to lead in an industry increasingly driven by digital solutions and innovative design.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Fashion (Merchandising), BA (HIFSHMBA)

College/School: Herberger Institute for Design and the Arts

Campus: Downtown Phoenix, ASU at Los Angeles, Online

Program description

Fashion merchandising is the art of blending creativity with strategic insight to transform trends into tangible retail= success, bringing style from the runway to the retail floor. More than selecting the latest styles, merchandisers= interpret market demands, research customer preferences, and craft curated shopping experiences that inspire,= engage and drive results.

This immersive, product-focused program offers a holistic understanding of the fashion industry, preparing you with= the practical skills to balance creativity and business acumen.

What sets the program apart is the integration of hands-on courses, such as apparel construction, textile lab,= illustration and fashion history, with a diverse curriculum that connects design thinking with merchandising, marketing,= styling and fashion forecasting. Through collaborative design and product development projects, along with real-world= industry internships, you learn to transform ideas into market-ready fashion experiences that inspire and engage.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to= change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year.= Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/fashion-merchandising/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college= experience in which students take advantage of in-person success coaching and programming experiences on site= while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction= and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIFSHMBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply fashion merchandising skills such as retail math, forecasting, planning, and sales analysis when creating Final Projects.
- Communicate merchandising ideas through creative visual display.
- Apply knowledge of the global fashion industry when creating final business projects.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available, fashion students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Students can spend a summer term in France in the "Exploration of French Fashion, Language and Culture" program led by ASU fashion faculty.

Career opportunities

This program is a distinctly professional, hands-on degree program that prepares graduates for dynamic careers in the business of fashion. Some example careers include:

- business manager
- display and window designer
- manufacturer
- marketing analyst
- merchandiser
- production manager
- retail manager
- sales manager
- supply chain manager

Graduates often find themselves doing tasks such as merchandising, buying, trend forecasting, business analysis, marketing, supply chain management and retail management.

Fashion Styling, AA (HIFSHAA)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Los Angeles

This program is not accepting applications at this time.

Program description

The Associate of Arts program in fashion styling is a distinctly professional, hands-on degree program that prepares you for an exciting career in fashion styling. You learn key skills sought across the fashion industry, such as flat and digital patternmaking and development, technical design, garment construction, merchandising, supply chain management, retail management and branding.

Studio and lecture courses guide you in developing a strong foundation of industry acumen, design aesthetics, and garment construction and creative styling skills that are valuable for all career paths in the industry. All courses are embedded within the principles of sustainability, so you can develop into the next generation of environmentally conscious industry leaders.

Los Angeles location
If you are interested in using GI Bill® benefits, you should consider another ASU program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing their major to another associate degree program. Students who wish to change their major to a bachelor's degree program should talk to their academic advisor. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIFSHAA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply fundamental fashion design and construction principles when creating final garments and illustrations.
- Present visual techniques inherent to the Fashion Industry through the design of creative briefs and merchandising plans.
- Analyze the product development and supply chain functions of the Fashion Industry when preparing and presenting operational plans for these areas.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates of the AA in fashion styling are prepared to enter the fashion industry in a number of roles. Some examples are:

- commercial stylist
- creative director
- editorial stylist
- fashion editor
- fashion show stylist
- personal stylist
- personal shopper
- retail salesperson

Students may also continue on to a bachelor's degree program in fashion at ASU or elsewhere.

Film (Film and Media Production), BA (FAFLMBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options, such as the BFA in film and media production.

Program description

You pursue the Bachelor of Arts in film with a concentration in film and media production, developing a comprehensive and practical knowledge of digital media production, an awareness of the impact of media and entertainment on audiences and culture, and an understanding of the role of the artist in society.

In this program, you have access to digital cameras, lighting and sound equipment, postproduction software and facilities, and other resources --- including talented and dedicated peer and faculty colleagues who give you multiple opportunities to produce projects of exceptional quality.

You choose one of three upper-division tracks of study: directing; producing and screenwriting; or media technology, including cinematography, postproduction and sound. Each course of study is supported by the degree-wide emphasis on ethical filmmaking practices, innovative creative expression, and preparation for a career as an industry professional.

The program is offered by The Sidney Poitier New American Film School.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
All film students are admitted to ASU into the BA program in film, filmmaking practices concentration. Students who wish to pursue the highly selective studio-based Bachelor of Arts in film with a concentration in film and media production must complete the 15-hour film core and successfully pass an interview and review of their creative work to enter the concentration. This interview and creative work review generally take place in the third or fourth term at ASU.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAFLMBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Study abroad provides students a once-in-a-lifetime opportunity to explore the globe while developing unique skills that can make them stand out in the competitive field of film and media. Students can observe international media culture firsthand. Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to explore their creative side through an intercultural lens. Not only do the programs encourage students to build communication skills, but they challenge them, as artists, to think differently. In addition to acquiring intercultural, communication and leadership skills, students have the chance to learn languages and expand their international network.

With more than 300 options available, Global Education programs give students a breadth of knowledge in arts and culture uniquely different from their own. Whether in a foreign country, in the U.S. or online, students are challenged to adapt and persevere and to look inside themselves in a way they haven't done before, growing their self-confidence along the way.

Career opportunities

Graduates possess the knowledge and experience they need to enter the media and entertainment field in careers as:

- cinematographers and camera operators
- directors for motion pictures, television and documentaries
- editors and postproduction specialists
- producers and production executives
- screenwriters for motion pictures and television
- videographers and digital media content creators

The bachelor's degree program is an excellent broad-based foundation for work in the profession, and it prepares students for further training at graduate schools or conservatories.

A Bachelor of Fine Arts from The Sidney Poitier New American Film School empowers you with the critical thinking skills to navigate new, complex and changing environments in the film industry. Programs nurture you as a part of the next generation of creatives, emphasizing the interconnectivity of filmmaking, the evolving landscape of the screen and the journey of a story from idea to intended audience. With a foundation in ethical and collaborative practices and project-based learning using state-of-the-art technology, the school offers the most inclusive, affordable and innovative film programs in the country.

The BFA program in film and media production takes you beyond theory and teaches you how to communicate a vision and manage resources to take a story from page to screen. It provides a deep dive into film production, and you can choose to complete the general degree program or pursue a concentration in cinematography, directing, post-production or screenwriting.

Directing concentration
The concentration program in directing instructs you in the creative and technical processes of directing, empowering you to realize your vision and translate scripts into compelling visual-narrative experiences. You hone your individual voice while gaining the leadership and management skills needed to lead collaborative and complex productions.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change their major to this program and would be new to this major must have a minimum cumulative GPA of 2.25 and understand that their GPA must be brought up to a 2.50 or higher within one semester to remain in good standing. An ASU student who is returning to this major (having studied this major in a prior semester) must have a minimum cumulative GPA of 2.50.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIFMPDBFA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze a film including the script, its ability to visually tell a story and for its aesthetics supporting their analysis with diverse sources.
- Produce a media-based project following all of the production stages required for successful completion.
- Communicate their own vision using their knowledge of visual language, film and actor directing, set protocols and crew.

Global opportunities

Global experience: The Sidney Poitier New American Film School's Semester in Los Angeles program is an opportunity for upper-division students to live and study in Los Angeles for one semester. The program includes an internship with a film industry company as well as networking events, screenings and site visits to Panavision, Universal Studios, the Academy Museum and more. This is a chance for students to take exclusive, in-person courses at the ASU California Center locations while staying on their path to graduation.

For those who wish to go further afield, study abroad provides students a once-in-a-lifetime opportunity to explore the globe while developing distinct skills that can help them stand out in the competitive field of film. With more than 300

Global Education programs (https://goglobal.asu.edu/) available to them, students have an opportunity to explore their creative side through an intercultural lens and acquire a breadth of knowledge in arts and culture uniquely different from their own. Not only do the programs encourage students to build communication skills, but they also challenge them, as artists, to think differently. Besides acquiring intercultural, communication and leadership skills, students have the chance to learn languages and expand their international network.

Whether in a foreign country, in the U.S. or online, Global Education programs challenge students to adapt and persevere, providing them with a chance to look inside themselves in a way they haven't done before, growing their self-confidence along the way.

Career opportunities

Graduates are equipped with the technical know-how and critical thinking skills to thrive in a continually changing media industry and to pioneer new media careers that require advanced production skills and a strong creative voice.

Graduates who earn this degree are prepared to pursue a wide array of skilled professions, including:

cinematographer or director of photography
editor
film, television and documentary writer or director
producer
sound designer or sound recording engineer
visual effects artist

Film and Media Production (Post-Production), BFA (HIFMPPBFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

A Bachelor of Fine Arts from The Sidney Poitier New American Film School empowers you with the critical thinking skills to navigate new, complex and changing environments in the film industry. Programs nurture you to be a part of the next generation of creatives, emphasizing the interconnectivity of filmmaking, the evolving landscape of the screen, and the journey of a story from idea to intended audience. With a foundation in ethical and collaborative practices and project-based learning using state-of-the-art technology, the school offers you the most inclusive, affordable and innovative film programs in the country.

The BFA program in film and media production takes you beyond theory and teaches you how to communicate a vision and manage resources to take a story from page to screen. It provides a deep dive into film production, and you can choose to complete the general degree or pursue a concentration in cinematography, directing, post-production or screenwriting.

Post-production concentration
The concentration program in post-production enables you to shape and polish stories with precision, using the latest in editing and visual effects techniques to bring stories to life. This program helps you better appreciate the critical final stages of filmmaking. You develop a keen eye for effective storytelling and the confidence to use post-production techniques to deepen audience impact.

Game Design, BS (HIGMDESBS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Science program in game design is an interdisciplinary offering that combines a hands-on approach to creating games with a rich conceptual understanding of the cultural context of games, play, simulation, virtual environments and interactive media. This program, housed in The GAME School, prepares you to be a culturally aware, technologically savvy, critically thinking global citizen who strives to use expertise in game design and media arts to bring about positive change in a society increasingly shaped by revolutions in new technologies.

You develop the skills needed for design and development of games and related media, including those used in ideating and designing augmented and virtual reality, mobile gaming, esports, and immersive interactive environments and experiences. Sitting at the intersection of advanced technology, cultural relevance and social impact, this program uses new educational technology, new models of mentorship and peer learning, and hands-on industry-embedded curriculum to provide you with the requisite skills in technology, the humanities and the arts to craft meaningful digital

experiences for millions of people worldwide --- improving society and societal systems in areas as varied as health care and education.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change their major to this program and would be new to this major must have a minimum cumulative GPA of 2.00. They must maintain this GPA to remain in good standing and to graduate. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIGMDESBS~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Craft rich, narrative-driven gameplay experiences that explore complex themes and resonate with diverse audiences.
- Collaborate effectively in multidisciplinary teams to bring complex game projects from concept to completion.
- Evaluate how social, ethical, and historical landscapes inform game design and game industry and vice versa.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, game design students are able to tailor their experience to their specific interests and skill sets. Whether in a

foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

A degree in interdisciplinary game design leads to various career paths in gaming and beyond. In the gaming industry, graduates can work on the artistic or programming side of game design --- they may become a level designer, creating immersive worlds, or a UX designer, shaping how players interact with games. Many graduates also work as producers, managing teams and projects to bring games to life.

This mix of creative, technical and project management skills opens doors outside gaming in diverse fields. Skills and knowledge from game design apply well to fields such as film, architecture, animation, marketing and e-commerce, enabling the creation of engaging experiences through interactive product demos or extended reality. Graduates are also valued for roles that involve data visualization, in which they make complex information easier to understand, and for their ability to create simulations used for training and planning.

Game Studio Production, BS (HIGSPBS)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Los Angeles

Program description

The Bachelor of Science program in game studio production prepares you to lead and manage creative teams in the fast-paced global games industry. Blending design, technology and business, this interdisciplinary program focuses on the coordination of game development pipelines --- from concept and prototyping to launch and live operations. You learn production management, scheduling, budgeting and communication strategies essential to guiding diverse teams and transforming creative ideas into successful interactive experiences.

Hands-on coursework in game design, project management and player-centered development is complemented by studies in marketing, entrepreneurship and intellectual property. Collaborative industry practicums and applied studio projects provide you with direct experience with real-world production environments. You emerge with technical literacy, leadership skills and professional readiness for roles across studios, publishers and emerging media sectors.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some

combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIGSPBS~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu) available to them, game studio production students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S., or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

A degree in game studio production prepares graduates for leadership roles that combine creativity, technology and organization across the game and interactive media industries. Graduates may guide development as associate producers, production coordinators or project managers, managing interdisciplinary teams and driving projects from concept to launch. Others pursue careers in community management, user experience, business analysis or product marketing, helping shape how games reach and engage global audiences.

With its strong emphasis on entrepreneurship and collaborative production, this program also equips graduates to launch their own game studios or independent ventures. The ability to manage creative pipelines, budgets and teams translates to success in startups, emerging media and innovation-driven fields such as animation, simulation, education technology and digital marketing.

Graphic Design, BSD (ARGRABSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The graphic design program in The Design School is committed to excellence in traditional and contemporary graphic design education, professionalism, research and service for the community at large. Faculty, alumni, students and visiting designers and educators constantly reinforce the link between society and nature, and they vigorously advocate quality in developing communication strategies.

The Bachelor of Science in Design curriculum acknowledges the need for creative environments that address ecological concerns. You are encouraged to develop sustainable, transdisciplinary work sensitive to cultural aesthetic. You develop a strong foundation of design principles through lower-division studio and lecture courses, using this to build an overall understanding of how design can shape perception and meaning using visual media. Upper-division studio courses provide opportunities for you to work in collaborative teams addressing professional projects in information design, interaction design, exhibition design, animation, motion graphics, branding, publication design, web design, interface design and the multiple contemporary facets of sensorial design.

Graphic designers are responsible for designing how information is communicated. Forms of communication include print, video, film and electronic (web). Graphic designers are concerned with appearance, choosing the appropriate mechanism for communication, clarity of information and its effectiveness, and how communication is transferred and received.

The BSD program in graphic design places an emphasis on strategic communication developed through a design process that includes research, analysis, conceptualization, planning and realization. The process leads to innovative visual communication design solutions for contemporary design problems that are local to global in scope.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors into this program and would be new to this major must have a minimum cumulative GPA of 2.75 and understand their GPA must be brought up to a 3.00 or above within one semester to remain in good standing. An ASU student who is returning to this major (having previously studied this major in a prior semester) must have a minimum cumulative GPA of 3.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/graphic-design-major/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ARGRABSD~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop design fundamentals in the context of diverse visual settings, demonstrating familiarity with their understanding of their core principles.
- Critically adapt their designs and methodology to convey clear messages to broad audiences.
- Address creative environments that respond to ecological concerns, sensitive to cultural aesthetics, sustainability, and social issues through skills for reading, analyzing, and discussing interactions between designers and society.

Global opportunities

Global experience: Study abroad provides graphic design students with a chance to explore their creative side through an intercultural lens, challenging them to think differently as an artist and to explore different ways of communicating information visually across cultures as they build communication skills.

With more than 300 options available, whether in a foreign country, in the U.S. or online, Global Education programs (https://goglobal.asu.edu) give students a breadth of knowledge in arts and culture. Students can gain a global perspective and knowledge while earning ASU credit. Students learn to adapt and persevere and to look inside themselves in a way they haven't done before, growing their self-confidence along the way.

Career opportunities

Based on a diversified portfolio upon graduation, those who opt for the graphic design profession gain employment in:

- advertising and marketing design
- brand and corporate identity design
- broadcast design (TV graphics)

- information design
- interaction and interface design
- museum or exhibition design
- publication design
- visual communication design
- web design

Specific examples of graphic designers' work include:

- annual reports
- books
- environmental graphics
- motion graphics
- multimedia presentations
- publications
- websites

Graduates may also pursue graduate studies that lead to careers in design education and other fields of professional endeavors in design.

Industrial Design, BSD (ARINDBSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The Bachelor of Science in Design program in industrial design at The Design School prepares you to envision the future by following the process of ideating, iterating, developing, testing and prototyping new products, services and strategies. You use interdisciplinary learning to turn creative ideas into successful projects for society.

The program has a strong commitment to the environment and the human being. In the program, you center your approach on delivering solutions that are beneficial for society, with a strong sense of humanity, empowered by the latest trends and technologies, always looking to get a positive impact on every scale.

The curriculum of lower-division studio and lecture courses helps you develop a strong foundation of design skills. Upper-division studio courses enable you to collaborate as you address design challenges and work on professional projects and case scenarios. As an industrial design student, you also follow an internship program to balance classroom theory with periods of practical, hands-on experience before graduation.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors into this program and would be new to this major must have a minimum cumulative GPA of 2.75 and understand their GPA must be brought up to a 3.00 or above within one semester to remain in good standing. An ASU student who is returning to this major (having previously studied this major in a prior semester) must have a minimum cumulative GPA of 3.00.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/industrial-design-bsd/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ARINDBSD~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Transform an original product design concept into a deliverable that demonstrates creative, technical, & communication skills
- Employ visual and graphic language effectively to envision and create products, systems, services, and experiences that are socially beneficial, ecologically sound, and foster positive impact on society at every scale.
- Develop a product suitable for production that enhances the human experience while implementing sustainability principles, promoting social benefits, and driving technological advancements.

Global opportunities

Global experience: Through study abroad programs (https://goglobal.asu.edu/), industrial design students learn flexible ways of thinking that contribute to their ability to meet the program goal of creating products and service systems that benefit society. They gain a global perspective and knowledge in preparation for a future-focused career, all while in an international setting. Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

After completing the program successfully, graduates can work as designers in several capacities or develop startup ventures.

Some career examples include:

- accessory designer
- automotive designer
- consumer goods designer
- design strategist
- furniture and homeware designer
- industrial or product designer
- toy designer
- trade show exhibit designer

user experience designer
user interface designer

Graduates obtain employment with consulting firms that design products, services and experiences for various clients, such as corporate industries, nonprofit institutions and nongovernmental organizations. They keep an entrepreneurial conscience, addressing specific social or environmental problems and providing successful market innovations.

Some graduates pursue teaching courses in art and design schools, colleges or universities. Others have established successful design and manufacturing ventures or led product development teams and innovations at renowned organizations.

Interior Design, BSD (ARINTBSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Science in Design program in interior design at The Design School is accredited by the Council for Interior Design Accreditation and prepares you to enhance human well-being and the common good. Interior designers create code-compliant, accessible and inclusive environments that address the complex physical, mental and emotional needs of individuals and communities --- including environments in residential and commercial spaces, health care facilities, hospitality settings and civic institutions.

As a professional practice, interior design requires expertise in spatial planning, building systems, lighting, materiality, and design history and theory. You learn to navigate building codes, life-safety regulations, and universal design principles while developing creative problem-solving and communication skills grounded in integrity and social responsibility.

Working within The Design School, you collaborate with complementary disciplines and the larger community in a living laboratory that keeps decision-making agile and inclusive. This transdisciplinary approach provides a foundation for understanding integrated practice and designing environments that enable people to thrive.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Transform an original interior design concept into a project that demonstrates creative, technical, & communication skills.
- Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice, as identified by the Council for Interior Design Accreditation.
- Distinguish the basic context and framework of history as it relates to 1) interior design and 2) furniture, decorative arts, and material culture, 3) architecture, and 4) art.

Global opportunities

Global experience: Interior design students have the chance to see many different design styles across cultures when studying abroad. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, interior design students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates find employment opportunities with interior design firms, architecture firms and corporations, and government entities of all sizes. Firms may specialize in interior design for residential, commercial, retail, hospitality, institutional and health care spaces. Career specialties include historic restoration, branding, sustainability, new product innovation, and incorporation of new technology.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for

licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Landscape Architecture, BSLA (ARPLABSLA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Science in Landscape Architecture at The Design School is an accredited undergraduate professional degree program (https://design.asu.edu/about/accreditation) that provides you with the knowledge and skills necessary to become a professional landscape architect. You have the opportunity to engage with the community in applied projects that focus on designing socially and environmentally sustainable outdoor environments.

Undergraduate landscape architecture projects can range from large-scale work encompassing open space preservation and recreation planning, landscape ecological planning, community planning and design, and urban design, to projects at a more intimate scale, such as parks, campus spaces and residential landscapes. Emerging areas of focus include creative placemaking, social and environmental equity, green roofs and living walls, biodiversity, green storm water infrastructure, restorative environments, sustainable design, and urban climate design.

The BSLA program is accredited by the Landscape Architectural Accreditation Board. Upon graduation, you are qualified to begin taking the Landscape Architect Registration Exams, which lead to registration as a professional landscape architect. www.asla.org/accreditationlaab.aspx (https://www.asla.org/accreditationlaab.aspx)

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors to this program and would be new to this major must have a minimum cumulative GPA of 2.75 and understand that their GPA must be brought up to a 3.00 or higher within one semester to remain in good standing. An ASU student who is returning to this major must have a minimum cumulative GPA of 3.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ARPLABSLA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Examine design creative process through theory and research articles measured through the final assignment.
- Apply professional skills including drafting, collaboration, and technical proficiencies appropriate for existing landscape analysis and new design proposals.
- Transform an original landscape design concept into a project that demonstrates creative, technical, & communication skills.

Global opportunities

Global experience: Study abroad provides students the opportunity to view marvels of landscape architecture up close and in person. With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their interests and skill sets. Whether the program is in a foreign country, in the U.S. or online, students in landscape architecture are exposed to distinct and diverse cultural environments and expand their knowledge and skills in design and related disciplines. Students gain a global perspective and knowledge in preparation for a future-focused career while earning ASU credit for completed courses and staying on track for graduation.

The Herberger Institute for Design and the Arts recommends these programs (https://goglobal.asu.edu/students/major/herberger/landscape-architecture) for students majoring in landscape architecture.

Career opportunities

Graduates are prepared for landscape architecture professional practice and advanced study at the graduate level. They have found employment in large multinational firms, nationally recognized firms and public agencies, working alongside notable landscape architects. Graduates have also gone on to pursue advanced study at universities with distinguished graduate programs in landscape architecture and allied design fields.

The U.S. Bureau of Labor Statistics projects that employment for landscape architects will grow 3% between 2024 and 2034 --- about as fast as the average for all occupations. The bureau also notes that employers prefer hiring entry-level landscape architects with internship experience, which can significantly reduce the on-the-job training needed. Internships are encouraged during summer after the third year of the program, and internship opportunities are announced throughout the year.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Graduates of this program have the qualifications to sit for the Landscape Architect in Training examination, which leads to registration as a professional landscape architect. For detailed information on licensure requirements, students can review the Council of Landscape Architectural Registration Boards requirements at https://www.clarb.org (https://www.clarb.org/).

Media Arts and Sciences, BA (HIDGCBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications.

In the Bachelor of Arts program in media arts and sciences, you gain the technical skills to develop computational media, and the cultural skills to apply them meaningfully. You immerse yourself in hands-on projects; explore the intertwined evolution of culture, society and tech; and create computational media systems with sound, video, objects, space and immersive media. This fusion of arts, humanities and engineering foundations enables you not only to craft innovative digital media but also to think critically about how technology and society are coproductive. The program's overarching goal is to develop you to be a socially conscious global citizen who is ready to navigate and shape a more connected and creative digital world.

This program is also offered as an accelerated degree with the Master of Arts in creative enterprise and cultural leadership (https://design.asu.edu/degree-programs/creative-enterprise-and-cultural-leadership).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.

Global opportunities

Global experience: Exploring programs around the world furthers students' ability to apply their studies to a global context. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, media arts and sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Equipped with skills and sound judgment, graduates work in cultural communication, marketing, design, social media, health, education, entertainment and creative arts, and all areas in which culture is shaped by technology and computational media. They know techniques to make an impact through communication using contemporary computational media, a vital power in today's world. Some graduates go on to invent fresh techniques.

Career opportunities include the following fields:

- audio
- comparative literature
- computing
- creative writing
- technical writing
- technology
- visual media

Media arts and sciences alumni have obtained careers as:

- designers
- engineers
- graphic designers
- programmers
- software specialists
- special effects artists
- 3D modelers
- visual media artists

Media Arts and Sciences (Art), BA (HIDGCABA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications.

In the Bachelor of Arts program in media arts and sciences with a concentration in art, you gain the technical skills to develop computational media, and the cultural skills to apply them meaningfully. You immerse yourself in hands-on projects; explore the intertwined evolution of culture, society and tech; and create computational media systems with sound, video, objects, space and immersive media. This fusion of arts, humanities and engineering foundations enables you not only to craft innovative digital media but also to think critically about how technology and society are coproductive. The program's overarching goal is to develop you to be a socially conscious global citizen who is ready to

navigate and shape a more connected and creative digital world.

The concentration program in art is offered in partnership with the School of Art in the Herberger Institute for Design and the Arts. In this concentration, you specialize in visual composition aspects of new media and focus on the historical and theoretical aspects of visual arts, learn foundational visual arts skills, and practice hands-on knowledge of visual composition through digital means.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Integrate knowledge from interdisciplinary arts and performance to create innovative, participatory media and live experiences.
- Critique digital media systems through a multi-disciplinary framework, including the critical exploration of media arts applications and knowledge of principles of communication and generation of knowledge.
- Integrate knowledge from artistic principles and practices into participatory media arts applications.

Global opportunities

Global experience: Exploring programs around the world furthers students' ability to apply their studies to a global context. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, media arts and sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The Herberger Institute for Design and the Arts recommends these programs (https://goglobal.asu.edu/students/major/herberger/) for students majoring in media arts and sciences.

Career opportunities

Equipped with skills and sound judgment, graduates work in cultural communication, marketing, design, social media, health, education, entertainment and creative arts, and all areas in which culture is shaped by technology and computational media. All graduates know techniques to make an impact and communicate using contemporary computational media, a vital power in today's world. Some go on to invent fresh techniques.

Graduates of the media arts and sciences program have a wide array of career opportunities in new media involving the fields of:

- communications (Cisco, Google, Facebook)
- computing (Apple, Microsoft)
- gaming and entertainment (Industrial Light & Magic, Electronic Arts, Pixar)
- media arts (engineering multimedia shows, video and sound production)

Graduates are also prepared for roles in the development of modern media systems that address complex socio-technical problems, such as:

- diagnostic, monitoring and assistive cyber-physical tools and systems that can be used by health care providers
- new systems for collaborative, participatory content creation and sharing
- social networking and reflection tools for promoting sustainability
- systems for interactive, adaptive learning and computational assessment in educational organizations

Graduates who are interested in continuing their higher education are well prepared to apply for admission to graduate programs in The GAME School at ASU and other top interdisciplinary new media programs across the nation.

Media arts and sciences alumni have received job opportunities in:

- audio and video
- engineering
- graphic design
- illustration
- iOS development
- journalism
- programming
- software engineering
- special effects
- 3D modeling and fabrication

visual media

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Create digital media systems, using a cross-disciplinary lens of research and theories from humanities, arts, and sciences through a final capstone project.
- Critique digital media systems through a multi-disciplinary framework, including the critical exploration of media arts applications and knowledge of principles of communication and generation of knowledge.
- Integrate knowledge from design principles and practices into participatory media arts applications.

Global opportunities

Global experience: Exploring programs around the world furthers students' ability to apply their studies to a global context. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, media arts and sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Equipped with skills and sound judgment, graduates work in cultural communication, marketing, design, social media, health, education, entertainment and creative arts, and all areas in which culture is shaped by technology and computational media. All graduates have learned techniques to make an impact and communicate using contemporary computational media --- a vital power in today's world. Some go on to invent fresh techniques.

Graduates have a wide array of career opportunities in new media involving the fields of:

- communications (Cisco, Google, Facebook)
- computing (Apple, Microsoft)
- gaming and entertainment (Industrial Light & Magic, Electronic Arts, Pixar)
- media arts (engineering multimedia shows, video and sound production)

The media arts and sciences curriculum also prepares students for roles in the development of modern media systems that address complex socio-technical problems, such as:

- diagnostic, monitoring and assistive cyber-physical tools and systems that can be used by health care providers
- new systems for collaborative, participatory content creation and sharing
- social networking and reflection tools for promoting sustainability
- systems for interactive, adaptive learning and computational assessment in educational organizations

Graduates of the program who are interested in continuing their higher education are well prepared to apply for admission to graduate programs through The GAME School at ASU and to other top interdisciplinary new media programs in the nation.

Media arts and sciences alumni have received job opportunities in:

- audio and video
- engineering
- graphic design
- illustration
- iOS development
- journalism
- programming
- software engineering
- special effects
- 3D modeling and fabrication
- visual media

Media Arts and Sciences (Education), BA (HIMASEDBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications.

In the Bachelor of Arts program in media arts and sciences with a concentration in education, you gain the technical skills to develop computational media, and the cultural skills to apply them meaningfully. You immerse yourself in hands-on projects; explore the intertwined evolution of culture, society and tech; and create computational media systems with sound, video, objects, space and immersive media. This fusion of arts, humanities and engineering foundations enables you not only to craft innovative digital media but also to think critically about how technology and society are coproductive. The program's overarching goal is to develop you to be a socially conscious global citizen who is ready to navigate and shape a more connected and creative digital world.

Learning happens everywhere. Through concentration coursework in education provided by the Mary Lou Fulton College for Teaching and Learning Innovation, you learn the role of education in society and how humans learn. You also develop effective communication skills and become skilled in facilitating learning experiences across a variety of spaces. You learn to effectively share your passion for media arts and technology and inspire a new generation of technofluent creators --- kids, teens, adults and learners of all ages --- empowering them to craft their own stories.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change their major to this program and would be new to this major must have a minimum cumulative GPA of 2.00. They must maintain this GPA to remain in good standing and to graduate. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/media-arts-sciences-education/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIMASEDBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and

resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply a hands-on understanding of the role of digital media in human culture to design and create digital media systems, using a cross-disciplinary lens of research and theories from humanities, arts, and sciences.
- Critique digital media systems through a multi-disciplinary framework, including the critical exploration of media arts applications and knowledge of principles of communication and generation of knowledge.
- Design educational activities and learning environments related to media arts and sciences using educational theory.

Global opportunities

Global experience: Study abroad programs enable students to think critically about how computation impacts lives and the ways that culture makes a difference in how people experience computational media --- critical skills in this dynamic age. With more than 300 Global Education program opportunities (https://goglobal.asu.edu) available to them, media arts and sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared to thrive in an increasingly digital world, whether they're teaching STEAM workshops, creating new technology-infused learning experiences, or embedded in the local community at art hackerspaces, science centers and digital fabrication labs. They can develop and facilitate learning experiences and become advocates for technology, media arts and education.

Graduates work in a variety of settings related to media arts and education, including schools and classrooms, libraries, museums and science centers, nonprofit organizations, and technology and educational companies.

Media Arts and Sciences (English), BA (HIDGCENBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Students interested in this program should apply to the Media Arts and Sciences, BA program.

Program description

The Games, Arts, Media and Engineering School educates the next generation of learners, empowering you with technofluency --- its development, application and implications. The school prepares you to be a socially aware, critically thinking global citizen who strives to bring about positive change in a society that will be increasingly shaped by new technologies.

The Bachelor of Arts program in media arts and sciences equips you with the knowledge, abilities and technical skills you need for creating computational media.

You learn to create computational media, which is computation combined with objects, sound, video, time, space, culture and bodies, and to breathe behavior into media, objects or systems by programming; you also learn to think critically about how computation impacts lives and how culture makes a difference in how people experience computational media --- a critical skill in this dynamic age.

The media arts and sciences program with a concentration in English is designed to help you explore the historical, scientific and theoretical intersections of art, media and technology. The sharing of stories and media through electronic communities, participatory art-making and creativity forums on the web, gaming, digital movies and effects, mediated public spaces and electronic design are only a few of the new activities that are defining and evolving culture. You assist in the establishment, evolution and proliferation of such culture at the state, national and international levels. You use tools of inquiry to examine, analyze and create works of art through a hands-on approach to communication, writing, rhetoric and literacies, in collaboration with the English department.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Media Arts and Sciences (Games and Interactive Media), BS (HIMASGIMBS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications. You are prepared to be a socially aware, critically thinking global citizen who strives to bring about positive change in a society that is increasingly shaped by new technologies.

In the Bachelor of Science program in media arts and sciences with a concentration in games and interactive media, you learn to create computational media, which is computation combined with objects, sound, video, time, space,

culture and bodies; breathe behavior into media, objects or systems by programming; and think critically about how computation impacts lives and how culture makes a difference in the ways that people experience computational media --- a critical skill in this age.

The concentration in games and interactive media pairs a maker approach with a rich historical and conceptual understanding of games, augmented and virtual reality, esports, and location-based and themed environments and experiences. Working within this interdisciplinary program, you create, envision and critique digital and hybrid spaces that impact work, education, communication, interpersonal relationships, entertainment, physical and mental health care, and lifelong learning.

If you are interested in the entirety of game infrastructure, you may also pursue a certificate in computer gaming (https://degrees.apps.asu.edu/minors/major/ASU00/ESSCICERT/computer-gaming). This certificate program focuses on game development and is offered by the Ira A. Fulton Schools of Engineering at the Tempe campus. You may also pursue a certificate in arts and humanities in games (https://degrees.apps.asu.edu/minors/major/ASU00/ASAHGCERT/arts-and-humanities-in-games), offered by the New College of Interdisciplinary Arts and Sciences at the West Valley campus.

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications. You are prepared to be a socially aware, critically thinking global citizen who strives to bring about positive change in a society that is increasingly shaped by new technologies.

In the Bachelor of Arts program in media arts and sciences, you gain the knowledge, abilities and technical skills you need for creating computational media.

You learn to create computational media, which is computation combined with objects, sound, video, time, space, culture and bodies; breathe behavior into media, objects or systems by programming; and think critically about how computation impacts lives and how culture makes a difference in the ways that you experience computational media --- a critical skill in this dynamic era.

This concentration in interdisciplinary arts and performance is offered in partnership with the New College of Interdisciplinary Arts and Sciences. The program focuses on a transdisciplinary and collaborative approach to the arts, technology and performance. It emphasizes the traditions of transdisciplinary, avant-garde and experimental arts, and contemporary art and performance. Courses include digital media arts, music and electronic sound art, performance studies, theater and performance practice, and digital graphics.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIDCIAPBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Create digital media systems, using a cross-disciplinary lens of research and theories from humanities, arts, and sciences through a final capstone project.
- Critique digital media systems through a multi-disciplinary framework, including the critical exploration of media arts applications and knowledge of principles of communication and generation of knowledge.
- Integrate knowledge from interdisciplinary arts and performance to create innovative, participatory media and live experiences.

Global opportunities

Global experience: Exploring programs around the globe furthers students' ability to apply their studies to a global context. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, media arts and sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Equipped with skills and sound judgment, graduates of the media arts and sciences program work in cultural communication, marketing, design, social media, health, education, entertainment and creative arts, and all areas in which culture is shaped by technology and computational media. All graduates have learned techniques to change the world and communicate using contemporary computational media, a vital power in the modern world. Some go on to invent fresh techniques.

Graduates have a wide array of career opportunities in new media involving the fields of:

- communications (Cisco, Google, Facebook)

computing (Apple, Microsoft)
gaming and entertainment (Industrial Light & Magic, Electronic Arts, Pixar)
media arts (engineering multimedia shows, video and sound production)

Graduates are also prepared for roles in the development of modern media systems that address complex sociotechnical problems, such as:

diagnostic, monitoring and assistive cyber-physical tools and systems that can be used by health care providers
new systems for collaborative, participatory content creation and sharing
social networking and reflection tools for promoting sustainability
systems for interactive, adaptive learning and computational assessment in educational organizations

Graduates who are interested in continuing their higher education are well prepared to apply to the nation's top interdisciplinary new media programs, including graduate programs in The GAME School.

Media arts and sciences alumni have received job opportunities in:

audio and video
engineering
graphic design
illustration
iOS development
journalism
programming
software engineering
special effects
3D modeling and fabrication
visual media

Media Arts and Sciences (Media Processing), BS (HIDGCMPBS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications.

In the Bachelor of Science program in media arts and sciences with a concentration in media processing, you gain the technical skills to develop computational media, and the cultural skills to apply them meaningfully. You immerse yourself in hands-on projects; explore the intertwined evolution of culture, society and tech; and create computational media systems with sound, video, objects, space and immersive media. This fusion of arts, humanities and engineering foundations enables you not only to craft innovative digital media but also to think critically about how technology and society are coproductive. The program's overarching goal is to develop you to be a socially conscious global citizen who is ready to navigate and shape a more connected and creative digital world.

The concentration program in media processing is offered in partnership with the Ira A. Fulton Schools of Engineering.

You complement your knowledge of media arts and sciences with computer science coursework, which provides you with a more advanced understanding of programming, data structures, signal processing and system architecture.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change their major to this program and would be new to this major must have a minimum cumulative GPA of 2.00. They must maintain this GPA to remain in good standing and to graduate. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIDGCMPBS~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Create digital media systems, using a cross-disciplinary lens of research and theories from humanities, arts, and sciences through a final capstone project.
Create digital media systems, using a cross-disciplinary lens of research and theories from humanities, arts, and sciences through a final capstone project.
Integrate knowledge from computational principles and practices into participatory media arts applications.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) enable media arts and sciences students to think critically about how computation impacts lives and the ways that culture makes a difference in how people experience computational media --- highly important skills in this dynamic age. With more than 300 options available to them, students can tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students in media arts and sciences can be exposed to diverse cultural environments and differences worldwide and take in the broad uses of technology on a global scale.

Career opportunities

Career opportunities include positions in graphic design, design, audio, visual media, computer science, technology, technical writing, creative writing and comparative literature.

Media arts and sciences alumni have obtained careers as graphic designers, 3D modelers, special effects artists, visual media artists, programmers, engineers and software specialists with Apple, Microsoft, Cisco, Industrial Light & Magic, Pixar and other techno-centric companies.

Media Arts and Sciences (Theatre), BA (HIDGCTBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Students interested in this program should apply to the Media Arts and Sciences BA program.

Program description

The Games, Arts, Media and Engineering School educates the next generation of learners, empowering you with technofluency --- its development, application and implications. The school prepares you to be socially aware, critically thinking global citizens who strive to bring about positive change in a society that is increasingly shaped by new technologies.

The Bachelor of Arts program in media arts and sciences equips you with the knowledge, abilities and technical skills you need for creating computational media.

You learn to create computational media and computation combined with objects, sound, video, time, space, culture and bodies, and to breathe behavior into media, objects or systems by programming; you also learn to think critically about how computation impacts lives and how culture makes a difference in how people experience computational media --- a critical skill in this dynamic age.

If you desire to integrate principles of design and production with digital culture, the concentration in theatre is for you. You complement your knowledge of media arts and sciences with discipline-specific courses in the School of Music, Dance and Theatre; these courses focus on the fundamentals and principles of theatre design, including scene, lighting, sound, costume and multimedia design, while enabling you to develop art and technical direction and digital design skills.

Merchandising, AA (HIMERCHAA)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Los Angeles

This program is not accepting applications at this time.

Program description

The Associate of Arts program in merchandising is a distinctly professional, hands-on degree program that teaches you the fundamentals of fashion merchandising.

Course offerings emphasize key skills sought across the fashion retail industry, such as merchandising, trend forecasting, consumer behavior analysis, retail management and branding. All courses are embedded within the principles of sustainability, preparing you to be a part of the next generation of environmentally conscious industry leaders.

Los Angeles location
If you are interested in using GI Bill® benefits, you should consider another ASU program.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

Music, BA (FAMUSBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Arts program in music offers you a well-rounded liberal arts education with a strong foundation in music theory and history. Through lessons on your primary instrument and a comprehensive curriculum, you explore

music as a reflection of human history, cultural heritage and social behavior. This flexible degree program can be combined with another major or minor at ASU, enabling you to tailor your academic journey to your specific interests and career goals.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission).

Students must submit a separate music application which includes:

• personal statement
• resume detailing their engagement with music
• an example of the applicant's musicianship (e.g., YouTube video recording, SoundCloud page, Demo CD, blog, podcast, compositions, research paper on music)
• any other materials that showcase musicianship (repertoire list, additional examples of musicianship)

Students who wish to take studio instruction as part of the degree program must audition for the appropriate performance faculty members. Students choosing to audition for lessons should prepare the audition repertoire and sign up for an audition in the music application as indicated on the School of Music, Dance and Theatre website.

Application Deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application Deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student should submit the separate School of Music, Dance and Theatre supplemental application and adhere to the deadlines listed above. In addition, students who are interested in auditioning for lessons as a part of the curriculum should contact mdtadmissions@asu.edu (mailto:mdtadmissions@asu.edu) to schedule an audition. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAMUSBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key creative and artistic processes from at least two musical styles and historical periods.
- Analyze specific musical products within the context of a specific historic or cultural tradition.
- Write research papers applying the conventions of scholarly discourse in music.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, music students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared to work in various professional or entrepreneurial capacities, including:

music criticism and research, ethnomusicology and musicology
music entrepreneurship, concert management and promotion
music publishing
performing in community and professional ensembles in a variety of styles and traditions
teaching in a private studio or community program

Many graduates pursue a master's degree or a doctorate in music or another professional field.

Music (Music and Culture), BA (HIMUSMCBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Arts program in music with a concentration in music and culture is a broadly based liberal arts program offering the most elective flexibility of any ASU music major.

You develop artistic and research skills by performing, composing and writing about music of all genres, including the classical and popular music of Western Europe and the United States, and a variety of forms and genres from the Middle East, Asia, Latin America and Africa.

You may also focus on concepts across diverse cultures and styles, such as theories and practices of listening, acoustics, advocacy of wellness through music, ecomusicology, dance as musical embodiment, and teaching about music. You explore music as a cultural artifact, through the lenses of human history and social behaviors, and engage in interdisciplinary thinking and academic research and writing. You may tailor both the general studies courses and the music electives to suit your career goals. The program supports you in your wide-ranging explorations, while emphasizing verbal and nonverbal thought and communication skills.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission). Admission to the School of Music, Dance and Theatre is based on an audition. Auditions (https://musicdancetheatre.asu.edu/admission/apply-music-major/audition-interview) take place in November (spring admission) and in January and February (fall admission) of each year.

Admission to the music program is highly selective and based on an audition process. Students are admitted as music audition students and must successfully complete the audition before enrolling in music major courses. Upon admission to both ASU and the School of Music, Dance and Theatre, the applicant's major is changed to music. If a student is admitted to ASU but not to the School of Music, Dance and Theatre or misses the audition deadline, the student remains a music audition major and must successfully pass the music audition milestone in the first semester to gain admission into the program.

The audition process for admittance to the music and culture concentration comprises the following:
• Students must submit a writing sample, which is evaluated by all musicology faculty members.
• Students must submit evidence of musicianship broadly defined (basic notational literacy plus live audition on, for example, didgeridoo, or gospel-style composition, or documented transdisciplinary installation including music), which is evaluated by all musicology faculty.
• Students must attend an interview with at least two musicology faculty members.
• Students who wish to take studio lessons as part of the degree must audition for the appropriate performance faculty members. Students should follow the audition requirements for the BA in music.

Application Deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards. Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application Deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students who want to change their major to this one should reference the audition requirements listed in the admission requirements section above.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=HIMUSMCBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key creative and artistic processes from at least two musical styles and historical periods.
- Analyze specific musical products within the context of new musical fields, cultures, or practices.
- Write research papers applying the conventions of scholarly discourse in music.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, music and culture students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates have skills applicable to careers in music and many other fields (e.g., librarianship, arts festival management or production, criticism, audience education, recruitment, artist representation, publishing and development, and creative writing). The program prepares graduates for potential careers in fields that require skilled written communication, the ability to conduct research in both electronic and print media, critical and logical thinking, the dissection of an argument, and careful time management. In addition to the careers listed below, graduates may pursue jobs in music and medical humanities or copyright and entertainment law.

Graduates are prepared to work in various professional capacities, including:

- community and professional ensemble performance in a variety of styles and traditions
- music criticism and research, ethnomusicology and musicology
- music entrepreneurship, concert management and promotion
- music in culture, music blogging
- music librarianship
- music publishing, program annotation
- private studio or community program teaching

Music (Popular Music), BA (HIMUSPMBA)

College/School: Herberger Institute for Design and the Arts

Campus: Downtown Phoenix

Program description

The Bachelor of Arts program in music offers a popular music concentration, for musicians like you who are interested in various popular music genres, such as singers, songwriters, laptop performers, producers, composers, instrumentalists and vocalists. You can choose between performer and nonperformer tracks, following a flexible major map.

The program equips you with foundational skills in musicianship, preparing you for specialized areas such as songwriting, production, composition, performance and more. You engage in group and individual applied study with robust extracurricular opportunities that include visiting artists, an annual music industry career conference, organized trips to key industry cities, and yearly special programming. Internships offer practical experience, while a capstone senior year enables you to work on your own large-scale project that prepares you to enter the industry. You need a personal laptop with digital audio workstation capability, which may require purchasing music software applications.

The program fosters excellent musicianship, a strong understanding of the music industry, and business and entrepreneurial skills to ensure that you're well-prepared for careers in popular music.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Audition Process for admittance to BA in Music (Popular Music) concentration:

Artist Statement:
All auditioning students must submit an artist statement explaining both their current work and vision of their future work in popular music. A minimum of 250 words is required.

Audition:
Live auditions or recorded auditions are required for admission to the BA program in popular music and for placement in MUP 111 Studio Instruction in popular music. A live audition consists of a 15-minute performance or presentation consisting of three to five selections of live or digital music performance. The selections may be original works or selections from popular music repertoire. The audition also includes scales, improvisation and aural skills. Students may also provide a recorded sample of their creative popular music work if they so choose.

For students seeking to pursue popular music performance, a live or recorded performance video is required for at least part of the audition. For other disciplines in which a video is not possible (studio recording, music creation and composition), students are required to submit a digital audio sound recording of three to five selections.

The audition also includes a live or remote interview. A live audition is preferred. Applicants who are unable to visit the campus for a live audition may upload a recorded audition to the School of Music, Dance and Theatre application. These students are contacted by faculty to arrange a remote interview.

Students interested in pursuing classical music lessons are required to follow the classical repertoire audition requirements for MUP 111 Studio Instruction in addition to auditioning for MUP 111 Studio Instruction in popular music.

Transfer admission requirements: Students transferring from community colleges, other universities or other ASU programs engage in the same audition process as first-year students.

Transfer students are encouraged to audition during the semester before they wish to enroll at ASU. They will also take piano and music theory diagnostic exams at that time to ensure placement in appropriate coursework.

Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum, and departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 credit hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students who want to change their major to this one should reference the audition requirements listed in the admission requirements section above.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key creative and artistic processes from a range of musical styles and historical periods.
- Apply music industry studies as it pertains to popular and contemporary music industry starting from the late 19th century to modern day.
- Execute professional level techniques in their chosen specializations.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, music students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared for careers in the popular music industry that involve creativity and creating new work, being a flexible musician, collaborating with others in the community, and having music business and music marketing knowledge. Possible jobs include:

concert or artist manager and promoter
contemporary composer for film, TV and games
entrepreneur and music marketer
label or music executive
live event production and experience designer
music performer in the popular music sector
musical director, arranger and publisher
nonprofit arts-related professional
songwriter, producer or teacher in a private studio
sound designer or studio engineer

Music Learning and Teaching, BMUS (FAMUSEBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Music program in music learning and teaching, you develop strong pedagogical and musical abilities to deepen and broaden music-making in varied styles and contexts, including contemporary digital music-making, through coursework and lab participation. You also learn how to design and facilitate supportive, generative and equitable music programs that support all music students, helping them grow and thrive.

Upon completion, you can earn a K-12 teaching certification in Arizona with reciprocity in multiple states.

Second language requirement: No
STEM-OPT extension eligible: No

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply skills needed for teaching music in K-12 classrooms, such as organized instructional plans, clear delivery, effective pacing and assessment techniques.
- Develop a repertoire of teaching strategies appropriate to the developmental characteristics and learning styles of children and adolescents through observation and teaching experience.
- Write research papers applying the conventions of scholarly discourse in music.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available, music learning and teaching students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates can become music educators in a variety of K-12 school and community settings. They are prepared to teach in public and private school music programs that offer a variety of music classes and ensembles, including general music, choir, band, orchestra, strings, guitar, jazz, music production, music technology and popular music.

Graduates may also work in various professional or entrepreneurial capacities, including:

- performing as a freelance musician in venues, such as art galleries, churches, clubs, cruise ships, resorts, restaurants and theme parks
- performing in community and professional ensembles in a variety of styles and traditions
- presenting school and community programs as artist-in-residence
- teaching and directing in a private studio or community program
- working in music-related fields such as media production, music business, publishing, marketing and education

Many graduates pursue a master's degree or a doctorate in music learning and teaching, in music or the arts, or in another professional field.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Music Therapy, BMUS (FAMUSTHBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

Music therapy is a dynamic profession that uses receptive and active music-making to help clients achieve individualized therapeutic goals. In the Bachelor of Music program in music therapy, you learn to use carefully planned music interventions for desired changes in a client's behavior and functioning. You gain essential clinical skills through many opportunities to work in real-world settings. The curriculum is strengthened by studies in human anatomy, psychology, musical improvisation, songwriting, popular music styles, special education, and music from different cultures.

Second language requirement: No

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply competent music foundation skills across their secondary instruments of voice, piano, and guitar.
- Apply basic knowledge of the causes, symptoms of, and basic terminology used in medical, mental health, and educational settings to the implementation of therapeutic interventions.
- Write research papers applying the conventions of scholarly discourse in music.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, music therapy students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are eligible to sit for the music therapy certification examination given by the Certification Board for Music Therapists.

The program prepares students for careers in health care, community-based and special education settings. Positions are available regionally and nationally in hospitals, schools, rehabilitation centers, nursing homes and other health care facilities. Graduates are prepared to work in the fields of community music therapy and wellness, geriatric care, mental health, physical rehabilitation, and special education, or within veteran and military populations.

A music therapy career may also provide an opportunity for private practice with flexible hours.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Performance (Collaborative Piano), BMUS (FAMUSPPBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Music program in performance with a concentration in collaborative piano offers you private instruction in solo and collaborative piano; coaching with faculty members on chamber music, song, operatic and musical theatre repertoire; and opportunities with large ensemble and choral programs. This diverse training leads directly to vibrant collaborative performance experiences in all areas, including collaboration with colleagues in dance and theatre.

As a collaborative piano student, you regularly perform with your vocal and instrumental colleagues in concerts at ASU and throughout the valley, including at Scottsdale Center for the Performing Arts, the Kerr Cultural Center, Tempe Center for the Arts and the renowned Musical Instrument Museum.

The program combines two years of focused study of solo piano repertoire and two years of collaborative piano training, and focuses on the core repertoire of song, piano chamber music, opera and musical theater. Collaboration within the School of Music, Dance and Theatre involves all performance areas, including classes and opportunities with the music theatre and opera programs, concerts with large ensembles and choirs, duo recitals with instrumental and voice colleagues, and performances of chamber music literature as part of the Visiting Quartet Residency program.

Second language requirement: No
STEM-OPT extension eligible: No

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of one's instrument, as well as an overview of vocal and instrumental literature.
- Evaluate piano and related repertoire and pedagogy to develop a unique musical style.
- Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions.

Global opportunities

Global experience: Students who experience music in different countries expand their understanding of musical performance. Many ASU faculty members are involved in summer music festivals throughout the world and often bring their ASU students to experience this global environment of collaboration.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, piano students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared to work in various professional or entrepreneurial capacities, including:

- performing as a collaborative pianist with singers and instrumentalists
- performing as a pianist with large instrumental ensembles
- performing as a pianist for music recording and studio work
- rehearsing and performing as a pianist with choral ensembles
- rehearsing and performing as a pianist for musical theatre or opera productions
- teaching in a private studio or community music program
- working as a vocal coach

Graduates also find collaborative work in music-related fields such as:

- marketing
- media production
- music business
- publishing

Many graduates pursue a master's degree or a doctorate in music, or in another professional field.

Campus: Tempe

Program description

In Bachelor of Music program in performance with a concentration in guitar, you join a vibrant and collaborative studio where you engage with distinguished faculty, dedicated teaching assistants and renowned guest artists who help shape your artistic journey. You take part in weekly technique workshops, ensemble rehearsals and studio classes that foster both individual growth and collective excellence as a community. Together with members of the guitar community, you work each week toward a shared goal: empowering you to discover and express your unique musical voice while building the skills and resilience needed for a thriving career in music.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission). Admission to the School of Music, Dance and Theatre is based on an audition. Auditions (https://musicdancetheatre.asu.edu/admission/apply-music-major/audition-interview) take place in November (spring admission) and in January and February (fall admission) of each year.

Admission to the music program is highly selective and based on an audition process. Students are admitted as music audition students and must successfully complete the audition before enrolling in music major courses. Upon admission to both ASU and the School of Music, Dance and Theatre, the applicant's major is changed to music. If a student is admitted to ASU but not to the School of Music, Dance and Theatre or misses the audition deadline, the student remains a music audition major and must successfully pass the music audition milestone in the first semester to gain admission into the program.

Application deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer

students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students who want to change their major to this program should reference the audition requirements listed in the admission requirements section above.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAMUSPGBM~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of their instrument.
- Students will be able to critically evaluate their instrument’s repertoire and pedagogy to develop a unique musical style.
- Graduates will be able to produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers and institutions.

Global opportunities

Global experience: Students who experience music in different countries can expand their understanding of musical performance. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, guitar students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared to work in various professional or entrepreneurial capacities, including:

- performing as a concert soloist, in chamber music ensembles or as a freelance musician in venues such as art galleries, churches, clubs, cruise ships, resorts, restaurants and theme parks
- presenting school programs or serving on state or community arts councils as an artist-in-residence

recording and studio work
teaching in a private studio or community program
working in music-related fields such as media production, music business, publishing and marketing

Many graduates pursue a master's degree or a doctorate in music or in another professional field.

Performance (Jazz), BMUS (FAMUSPJBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Music program in performance with a concentration in jazz prepares you for professional careers and leadership roles in jazz and related fields of contemporary music by promoting flexible musicianship and an understanding of the jazz tradition.

The curriculum includes course offerings in jazz performance, composition, arranging, history, theory, aural skills and pedagogy and is designed to incentivize artistic expression, innovation, and the exploration of blues-based improvisation, bebop, Latin jazz, swing and soul music.

You find an abundance of performance opportunities in the many university ensembles and professional groups that perform in the greater Phoenix metropolitan area.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Execute long-range performance projects.
Analyze musical elements and social uses of music, including in interactions between performers and composers.
Develop performance practices in the context of jazz genres, demonstrating familiarity with the repertoire of the student's instrument.

Global opportunities

Global experience: Students who experience music in different countries can expand their understanding of musical performance. Their exposure to distinct and diverse cultural environments enables them to develop an understanding of other forms of artistic expression. Global Education opportunities (https://goglobal.asu.edu/) can shape students musically while offering the global perspective and knowledge they need when pursuing a career as a professional musician in an international environment.

With more than 300 Global Education options available to them, whether in a foreign country, in the U.S. or online, students can tailor their experience to their interests and skill sets. Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

Graduates are prepared to work in various professional or entrepreneurial capacities. Some perform as freelance musicians in venues such as art galleries, churches, clubs, cruise ships, resorts, restaurants and theme parks. They work in music-related fields such as media production and music business, publishing and marketing.

Graduates may find jobs that include:

accompanying
composing or arranging jazz
recording and studio work
teaching in a private studio or community program

Many graduates pursue a master's degree or a doctorate in music or in another professional field.

Performance (Music Theatre), BMUS (FAMUSPMBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Music program in performance with a concentration in music theatre is an intensive, performance-oriented offering.

A key feature of the program is a carefully designed sequence of musical theatre performance courses. Every semester, you receive training in acting and music theatre performance, dance training in a variety of styles, and private voice lessons. The program also provides specialized training in audition techniques, technical production, repertoire, scene study, and performance experience. These comprehensive courses give you the tools and confidence needed to succeed as a professional musical theatre artist.

ASU stands out by providing professional training across a wide variety of musical and theatrical styles, including classic and contemporary musical theatre and opera. Each season features two musicals and two operas, along with student-led productions and new works. Annual music theatre showcases in New York City and Phoenix, plus potential collaborations with The Phoenix Theatre Company and Arizona Opera, give you exciting performance opportunities and real-world career experience.

Performance (Orchestral Instrument), BMUS (FAMUSPOBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Music program in performance with a concentration in an orchestral instrument offers a focused study of music literature and advanced techniques for a specific orchestral instrument. You benefit from coaching by distinguished faculty and visiting guest artists; master classes; and extensive performance opportunities in large ensembles and chamber groups, and as soloists.

Over eight semesters, you engage in intensive study of major repertoire, solo literature and chamber music with a dedicated faculty mentor. In addition to receiving musical training, you develop essential skills for success as a professional musician, including audition preparation, networking, organizational strategies, opportunity creation and fostering an entrepreneurial mindset.

Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission). Admission to the School of Music, Dance and Theatre is based on an audition. Auditions (https://musicdancetheatre.asu.edu/admission/apply-music-major/audition-interview) take place on campus in November (spring admission) and in January and February (fall admission) of each year.

Admission to the music program is highly selective and based on an audition process. Students are admitted as music audition students and must successfully complete the audition before enrolling in music major courses. Upon admission to both ASU and the School of Music, Dance and Theatre, the applicant's major is changed to music. If an applicant is admitted to ASU but not to the School of Music, Dance and Theatre or misses the audition deadline, the student remains a music audition major and must successfully pass the music audition milestone in the first semester to gain admission into the program.

Application deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students who want to change their major to this one should reference the audition requirements listed in the admission requirements section above.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAMUSPVBM~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will develop vocal performance practices and techniques in the context of diverse musical settings and genres, demonstrating familiarity with voice-specific literature and different singing styles.
- Students will be able to critically evaluate vocal repertoire and pedagogy to develop a unique musical style.
- Graduates of the voice concentration of the BMus in performance will be able to produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers and institutions.

Global opportunities

Global experience: Students who experience music in different countries can expand their understanding of musical performance. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, performance students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared to pursue careers in various professional and entrepreneurial capacities. Opportunities include work as a soloist, stage performer, choral singer or freelance musician in venues such as opera houses, theatres, concert halls, churches, clubs, cruise ships, resorts, restaurants and theme parks.

Graduates may also find work in music-related fields, recording in a studio, or teaching in a private studio or community program. Possible career areas include:

arts administration
marketing
media production
music business
publishing

Many graduates pursue a master's degree or a doctorate in music or another professional field.

Performance and Movement, BA (HIPERMVBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Arts program in performance and movement, you refine your skills in a community of versatile performers. You gain practical, current industry knowledge in both dance and theater that prepares you for professional careers. Most importantly, the program provides you with the opportunity to grow as an artist and leader while you do what you love.

You choose one of three focus areas:

Dance and theater: You blend movement, acting, voice and storytelling. Whether you're a dancer wanting to act, an actor wanting to move, or a writer or director looking to bring ideas to life, this focus area provides the tools to create bold, original performances and collaborate across disciplines.

Social and partnership dance: You turn your love of dance into leadership. You explore Afro-Latin and ballroom styles, learn how to teach and perform, and use dance to connect communities, making real change through movement.

Hip Hop arts: You immerse yourself in the culture and artistry of Hip Hop. You train in dance, music, visual art and spoken word, and collaborate with leading artists and scholars. This focus area prepares you to create, perform and share your work with audiences while honoring Hip Hop's roots and future.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some

combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students graduating with a BA in performance and movement will be able to apply creative processes in their art-making that reflect contemporary understandings of dance and theatre practices.
- Graduates will be able to execute the stages of long-range creative projects.
- Students graduating from the BA in performance and movement will be able to implement culturally sensitive, ethical and socially grounded teaching, facilitation, and community-building practices.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, performance and movement students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared for careers in performance, choreography, teaching, directing, arts leadership, and community engagement.

They have an excellent broad-based foundation for work in the arts or entertainment professions and are ready for further creative development and research via graduate programs or conservatories. The program's liberal arts framework, combined with rigorous physical practice and culturally aligned performance standards, prepares graduates for a variety of occupations in both performance and movement-related fields. Opportunities include:

arts entrepreneurship
professional performing
studio ownership and management
themed entertainment

Theatre, BA (FATHEBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Bachelor of Arts program in theatre provides you with a hands-on theatre education within a broad range of academic opportunities. You develop your own creative skills through collaboration, and have the opportunity to pursue a variety of theatre and performance areas.

The program offers specialty coursework in:

• acting and directing
• community engagement
• design and production
• dramatic literature and dramaturgy
• educational certification and teaching artistry
• intimacy coordination
• new work development and playwriting
• theatre history
• theatre for youth
• voice and movement

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Creative Enterprise and Cultural Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Transfer admission requirements: Direct transfer of courses from other accredited institutions to the Herberger Institute for Design and the Arts is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the college must complete a minimum of 15 hours of resident credit in the major as approved by the faculty.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FATHEBA~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Execute the stages of long-range creative projects.
- Explain how theatre shapes the cultural and political landscapes of societies.
- Apply key creative and artistic processes relevant to their area of focus in theatre (design processes, historical research for production, development of performer skills with an eye toward production, etc.).

Global opportunities

Global experience: Students studying theatre can find inspiration and deepen their understanding of theater through a study abroad program. Study abroad provides an opportunity for students to explore their creative side through an intercultural lens. Not only do the programs encourage students to build communication skills, but they also challenge them, as artists, to think differently.

With over 300 options available, Global Education (https://goglobal.asu.edu) programs give students a breadth of knowledge in arts and culture distinctly different from their own. Whether in a foreign country, in the U.S. or online, students are challenged to adapt and persevere, and to look inside themselves in a way they haven't done before,

growing their self-confidence along the way.

Vital qualities in the field of theater, such as leadership, teamwork and communication, can be developed and honed abroad. Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

The bachelor's degree program in theatre provides an excellent foundation for work in the arts and entertainment and prepares graduates for further training at graduate schools or conservatories.

The program's broad range of academic opportunities prepares graduates for a variety of occupations in the entertainment industry. Opportunities may include work with:

arts entrepreneurship
concert venues
corporate events
literary agencies
schools and training programs
theatre and arts festivals
theme parks

Theatre (Design and Production), BA (FADSNPRBA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

This Bachelor of Arts program in theatre with a concentration in design and production provides you with opportunities to hone your craft while creating exciting work on stage in areas including dance, opera, theatre and more. The concentration provides you with the distinct opportunity to explore your own creative process, while enhancing your ability to collaborate with others.

The program offers specialty coursework in the following areas:

• costume construction, design and technology
• digital fabrication
• lighting design and stage electrics
• media design and technology
• properties construction
• scenic design, art and construction
• sound design and technology
• sound and media systems design
• stage management
• technical direction

In addition to building knowledge and skills, you are mentored by professional designers and technicians to successfully transition from college to your future career in entertainment design and production, or to graduate programs for additional training.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Theory and Composition (Composition), BMUS (FAMUSTCBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Bachelor of Music in theory and composition, you choose a concentration in either theory or composition.

As a composition student, you focus on developing varied techniques for writing music for assorted genres and media, including chamber, orchestra and electronic music, and film and video scoring. You have multiple performance opportunities each year, including readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the ASU Wind Bands and the Philharmonia Orchestra; commissions for the PRISMS contemporary music festival; and collaborations with student performers and student animators, filmmakers and dancers.

This degree program provides you with extensive faculty interaction and professional development. You have opportunities to broaden your skills in compositional techniques from a wide variety of styles and traditions, with emphasis on fostering your personal approach to composition. Opportunities to collaborate with music scholars, theorists, performers, educators and other composers give you a broad and well-rounded foundation for careers in music.

If you are interested in the theory concentration, you can look into the BMUS in theory and composition program with a concentration in theory (https://degrees.apps.asu.edu/bachelors/major/ASU00/FAMUSTTBM/theory-and-composition-theory) for more information.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission). Admission to the School of Music, Dance and Theatre is based on a composition interview (https://musicdancetheatre.asu.edu/admission/apply-music-major/audition-interview). Interviews take place in November (spring admission) and February (fall admission) of each year.

Admission to the music program is highly selective and based on an interview process. Students are admitted as music audition students and must successfully complete the composition interview before enrolling in music major courses. Upon admission to both ASU and the School of Music, Dance and Theatre, the applicant's major is changed to music. If a student is admitted to ASU but not to the School of Music, Dance and Theatre or misses the audition deadline, the student remains a music audition major and must successfully pass the interview milestone in the first semester to gain admission into the program.

Application deadlines: Students should review the complete music deadline
(https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 1.

Fall admission: The deadline to apply for admission to this program is December 1.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application deadlines: Students should review the complete music deadline

(https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 1.

Fall admission: The deadline to apply for admission to this program is December 1.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors to this program should reference the interview requirements listed in the admission requirements section above.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAMUSTCBM~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key creative and artistic processes from at least two musical styles and historical periods.
- Critique specific musical products within the context of a specific historic or cultural tradition.
- Apply theoretical understanding of musical techniques to composing music in varied styles.

Global opportunities

Global experience: Music transcends language and cultural boundaries, and students deepen their understanding of composition through study abroad (https://goglobal.asu.edu/) experiences. Students gain an enhanced understanding of how music affects culture and how they can communicate globally through their compositions.

With more than 300 programs around the world available to them, students can build the experience most suited to their personal goals and skill sets.

Career opportunities

Graduates are prepared to work in various professional or entrepreneurial capacities, including:

- arranging
- composing
- performing in community and professional ensembles in a variety of styles and traditions
- serving as an artist-in-residence in school programs
- teaching in a private studio and community program
- teaching theory and composition

They also find work in music-related fields such as:

marketing
media production
music business
publishing

Many graduates pursue a master's degree or a doctorate in music or another professional field.

Theory and Composition (Theory), BMUS (FAMUSTTBM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

When you pursue the Bachelor of Music program in theory and composition, you choose a concentration in either theory or composition.

The theory concentration provides opportunities for you to dive into the science behind how people perceive and understand music while developing fluency with the theoretical foundations of musical analysis. You collaborate with expert faculty members and peers who share your curiosity for how music interacts with critical aspects of human experience, such as memory, emotion, culture and meaning. Through coursework, you learn techniques to analyze form, melody, harmony, rhythm and timbre across diverse styles of music, and you develop research skills to generate new insights about musical experience.

If you are interested in the composition concentration, you can look into the BMus in theory and composition with a concentration in composition (https://degrees.apps.asu.edu/bachelors/major/ASU00/FAMUSTCBM/theory-and-composition-composition) program for more information.

or any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:

Important: Applicants must submit an ASU application for undergraduate admission in addition to a separate School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission). Admission to the School of Music, Dance and Theatre is based on an audition. Auditions (https://musicdancetheatre.asu.edu/admission/apply-music-major/audition-interview) take place in November (spring admission) and in January and February (fall admission) of each year.

Admission to the music program is highly selective and based on the audition process. Students are admitted as music audition students and must successfully complete the audition before enrolling in music major courses. Upon admission to both ASU and the School of Music, Dance and Theatre, the applicant's major is changed to music. If a student is admitted to ASU but not to the School of Music, Dance and Theatre or misses the audition deadline, the student remains a music audition major and must successfully pass the music audition milestone in the first semester to gain admission into the program.

Application Deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Transfer admission requirements: Transfer applicants: Transfer of courses from other accredited institutions is subject to the existence of parallel and equal courses in the college's curriculum and to departmental or school evaluation of studio and class piano courses with respect to performance standards.

Every candidate for the bachelor's degree must earn a minimum of 30 hours in resident credit at ASU. Transfer students enrolled in the institute must complete a minimum of 15 resident credit hours in the major as approved by the faculty.

Application deadlines: Students should review the complete music deadline (https://musicdancetheatre.asu.edu/admission/apply-music-major) information.

Spring admission: The deadline to apply for admission to this program is October 15.

Fall admission: The deadline to apply for admission to this program is January 5.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

An ASU student who would like to change majors to this program should reference the audition requirements listed in the admission requirements section above.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FAMUSTTBM~null&college=CHI) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key creative and artistic processes from at least two musical styles and historical periods.
- Critique specific musical products within the context of a specific historic or cultural tradition.
- Conduct scholarly research on topics in music theory resulting in scholarly papers and/or presentations.

Global opportunities

Global experience: Students may deepen their understanding of music theory through ASU's study abroad experiences. They gain an enhanced understanding of how music affects culture and how they can communicate globally through music.

With more than 300 programs around the world (https://goglobal.asu.edu/) available to them, students can build the experience most suited to their personal goals and skill sets.

Career opportunities

Graduates find work in many fields, such as arts administration, media production, music technology, music business, publishing and marketing.

Graduates are prepared to work in various professional capacities, including:

- arranging and composing
- music research and data analysis
- performing in ensembles in a variety of styles and traditions
- teaching in a private studio or community program
- teaching music theory

Many graduates pursue a master's degree or doctorate in music or another related professional field (e.g., psychology, musicology, music business).

Engineering, Ira A. Fulton Schools of

Aeronautical Management Technology (Air Traffic Management), BS (ESAMTATBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Bachelor of Science program in aeronautical management technology with a concentration in air traffic management provides a technical foundation in the procedures used by air traffic controllers in control towers and radar facilities.

You acquire a strong background in aircraft operations and business principles, and you gain management skills through coursework specific to air traffic control and aviation. As part of the degree program, you take courses that qualify you to earn your airline dispatcher certificate.

This intensive program of classroom study and laboratory practice uses state-of-the-art air traffic control simulators to enhance and reinforce classroom study. You receive training in the methodologies and technologies that are currently being developed for the next generation of air traffic control systems. You develop the skills of analytical thinking, clear and concise communication, problem-solving and teamwork.

ASU is a partner in the Federal Aviation Administration Air Traffic-Collegiate Training Initiative.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Management of Technology, MS

Technology (Aviation Management and Human Factors), MSTech

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The Federal Aviation Administration has minimum requirements for employment in civil aviation. Students should see https://www.faa.gov/jobs/career_fields/aviation_careers (https://www.faa.gov/jobs/career_fields/aviation_careers/) for more information. Graduates of the program are not guaranteed employment by the FAA. Students who do not have U.S. citizenship may be admitted to the program but are not eligible for employment by the FAA.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00 (scale is 4.00 = "A").
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESAMTATBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, aeronautical management technology students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Advancements in automation and next-generation air traffic control technologies are enhancing controller productivity; however, maintaining a strong pipeline of qualified professionals remains essential to ensuring the safety and efficiency of U.S. airspace.

The FAA's 2025-2028 Air Traffic Controller Workforce Plan projects hiring at least 8,900 new air traffic controllers over this period to address ongoing staffing needs resulting from retirements, training attrition and increased air traffic volume.

New computerized systems support controllers by performing routine tasks, enabling them to manage greater volumes of traffic more effectively.

Despite the growing demand for new controllers, admission to FAA-approved training programs remains highly competitive, as the number of applicants continues to exceed available openings. Graduates who meet all FAA training and certification requirements are eligible for consideration for employment as air traffic controllers.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Aeronautical Management Technology (Air Transportation Management), BS (TSAMTMBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Bachelor of Science program in aeronautical management technology with a concentration in air transportation management, you acquire a strong foundation in aviation concepts, including airline administration, airport planning, aviation law and policy, and human factors, as well as technical knowledge focusing on power plants, structures and aerodynamics. You progress into courses on the business, management and operational aspects of aviation. You complete the program by participating in an internship within the industry and completing a capstone project.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: The aviation industry is a global one, and understanding intercultural communication is vital to succeeding in it. Through the rich educational and interpersonal experiences inherent in study abroad, students learn to thrive in a global environment.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

A resume enhanced by valuable study abroad experiences impresses prospective employers and helps students who wish to pursue advanced study stand out.

Career opportunities

Graduates with a degree in air transportation management are prepared for careers in:

- airline management
- airline operations management
- airport management
- aviation consulting
- fixed-base operations management
- general aviation operations management

Graduates are prepared for leadership positions within airlines; at airports; and in government, consulting and entrepreneurial enterprises.

Graduates are also well positioned for entrepreneurial ventures and government positions with organizations such as the Federal Aviation Administration, the Department of Transportation and the National Transportation Safety Board.

Aeronautical Management Technology (Professional Flight), BS (TSAMTFBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the professional flight concentration of the Bachelor of Science program in aeronautical management technology, you learn to fly in an academic environment that prepares you for a career as a professional pilot.

Flight training is offered by an ASU-approved flight provider in late-model aircraft equipped with state-of-the-art avionics.

You may take advantage of pathway agreements for guaranteed interviews with regional air carriers.

If you're seriously interested in becoming a professional airline pilot, this program is for you. You prepare to assume responsibilities in a wide variety of technically related areas within professional aviation flight operations.

The Federal Aviation Administration certifies flight and ground instruction.

Additional course-related fees apply; you should see the program website (https://poly.engineering.asu.edu/aviation/professional-flight-bs/) for more information.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Aeronautical Management Technology (Unmanned Aerial Systems), BS (TSAMTUASBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Bachelor of Science program in aeronautical management technology with a concentration in unmanned aerial systems, you prepare for careers in the rapidly growing area of unmanned aerial systems, including operations, remote sensing, data collection and analysis.

The concentration incorporates all aviation management technology core courses and unmanned aerial systems concentration courses. You receive an overview of unmanned aerial systems operations, followed by coursework that enables you to acquire detailed knowledge of relevant systems, technology (ground control stations; data links; flight planning and operations; search, detect and avoid technologies; and payloads), and sensor operations. A critical aspect of this academic area of study is the data capture and transfer of the sensor information collected from the unmanned aerial vehicle.

This innovative concentration brings together the most up-to-date and relevant aspects facing multiple industries today by addressing flight system planning and operations and the employment of the systems in the congested National Airspace System.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Unmanned aerial systems are used across the globe. Students who participate in a study abroad experience learn a great deal about global practices, laws and emerging technologies within the aviation field.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, aeronautical management technology students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Students graduate from this program ready to find various employment opportunities as unmanned aerial vehicle pilots and sensor operators in the U.S. and throughout the world. This concentration prepares students to operate small to midrange platforms that are used by emergency responders and in industries including forestry, agriculture, energy and oil. Entry-level pay is competitive for this highly specialized field.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. Aerospace Engineering (Aeronautics), BSE (ESAEROBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The aerospace engineering curriculum provides you with an education in technological areas critical to the design and development of aerospace vehicles and systems. The aeronautics concentration within the Bachelor of Science in Engineering program in aerospace engineering emphasizes engineering and the design of aircraft, helicopters, missiles and other vehicles that fly through the atmosphere.

Topics in required courses cover aerodynamics, aerospace materials, aircraft structures, flight mechanics, propulsion, and stability and control. Required astronautics topics include altitude control and orbital mechanics.

You culminate your major study in the aeronautics concentration with a two-semester capstone design project that incorporates the multiple disciplines involved in aeronautical engineering. Capstone courses AEE 344 and AEE 468 are taken in consecutive semesters.

In the aerospace engineering program, you are expected to attain the ability to:
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• apply engineering design to produce solutions that meet specified needs, with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• acquire and apply new knowledge as needed, using appropriate learning strategies

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Aerospace Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Exploration Systems Design (Sensor Networks), MS

Robotics and Autonomous Systems (Mechanical and Aerospace Engineering), MS

Exploration Systems Design (Instrumentation), MS

Aerospace Engineering, MS

Exploration Systems Design (Systems Engineering), MS

Exploration Systems Design, MS

Mechanical Engineering, MS

Astrophysics and Astronomy, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission requirements shown below, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:

• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in all critical courses: MAE 201 Mechanics of Particles and Rigid Bodies I: Statics, MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics, MAE 213 Mechanics of Materials, and MAE 242 Introduction to Fluid Mechanics

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESAEROBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply principles of mathematics and science to solve complex engineering problems (ABET Outcome).
- Apply engineering design to a student project with consideration of public welfare/other factors (ABET Outcome).
- Develop and conduct engineering experiments, and analyze and interpret data (ABET Outcome).

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, aerospace engineering students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The Ira A. Fulton Schools of Engineering recommends these programs (https://goglobal.asu.edu/aerospace-engineering-bse) for students majoring in aerospace engineering.

Career opportunities

The majority of individuals who enter the field of aerospace engineering desire to work on the design and analysis of aerospace vehicles. Most graduates are employed in the aerospace industry or in government positions related to aerospace. Specific careers in aerospace engineering include:

- aeronautical and space systems integration
- configuration development
- material and structural design
- propulsion engineering
- space mission design and analysis
- vehicle and component analysis using computer-aided tools
- vehicle design and performance
- wind tunnel and flight testing

The aerospace engineering program has the following educational objectives:

Through activities such as volunteering, entrepreneurial endeavors, community service and their employment, graduates of the aerospace engineering program demonstrate commitment to the Sun Devil ideals of global engagement, social embeddedness, social transformation and sustainability.

Graduates of this program should attain one or more of the following objectives within a few years of degree completion:

- employment in aerospace or other field in a position that capitalizes on the skills and abilities gained through the program in aerospace engineering, leading to positions of increasing responsibility and leadership within the organization
- admission to a graduate degree program in aerospace engineering or another technical field
- admission to a professional degree program, such as law or business, in accordance with the graduate's specific interests and abilities

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Aerospace Engineering (Astronautics), BSE (ESAEASBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Bachelor of Science in Engineering program in aerospace engineering, you gain expertise in technological areas critical to the design and development of aerospace vehicles and systems.

The astronautics concentration curriculum covers:

• attitude determination and control
• elective topics in aeronautics
• gas dynamics
• orbital mechanics
• rocket propulsion
• space environment
• space structures
• telecommunications

You culminate your major study with a two-semester capstone design project that incorporates the multiple disciplines involved in the creation of a space-going vehicle. Capstone courses AEE 445 and AEE 480 are taken in consecutive semesters.

You are expected to attain the ability to:
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• apply engineering design to produce solutions that meet specified needs, with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• acquire and apply new knowledge as needed, using appropriate learning strategies

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Aerospace Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Exploration Systems Design (Sensor Networks), MS

Robotics and Autonomous Systems (Mechanical and Aerospace Engineering), MS

Exploration Systems Design (Instrumentation), MS

Aerospace Engineering, MS

Exploration Systems Design (Systems Engineering), MS

Exploration Systems Design, MS

Mechanical Engineering, MS

Astrophysics and Astronomy, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency

courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in all critical courses: MAE 201 Mechanics of Particles and Rigid Bodies I: Statics, MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics, MAE 213 Mechanics of Materials, and MAE 242 Introduction to Fluid Mechanics

Tuition information

Aerospace Engineering (Autonomous Vehicle Systems), BSE (ESAEAVSBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Emerging emphasis on autonomous aircraft technology and operations in military and civilian sectors signals a new era within the aeronautical community that is focused on autonomous vehicles and systems.

In the Bachelor of Science in Engineering program in aerospace engineering with a concentration in autonomous vehicle systems, you gain the knowledge and skills required for any career in aerospace engineering, plus those specific to unmanned aerial vehicles and systems.

The curriculum is structured to give you general exposure to the engineering of autonomous aircraft. In the

autonomous vehicles concentration, you culminate your major study with a two-semester capstone design project that incorporates the multiple disciplines involved in the creation of autonomous vehicles. Capstone courses AEE 478 and AEE 479 are taken in consecutive semesters.

In the program, you are expected to attain the ability to:
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• apply engineering design to produce solutions that meet specified needs, with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must involve considering the impact of engineering solutions in global, economic, environmental and societal contexts
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• acquire and apply new knowledge as needed, using appropriate learning strategies

All paths through this concentration satisfy accreditation criteria for aerospace engineering.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Aerospace Engineering Program Criteria.

Applied Science (Aviation), BAS (TSAMTABAS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

If you've received training and education in some aspect of the air transportation industry, such as air transportation management or flight maintenance, as part of your associate degree, the concentration in aviation within the Bachelor of Applied Science program is for you. You receive an orientation in management practices.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: Any math course with the MATH general studies designation will satisfy the math requirement.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:

Students applying to this program must have completed an Associate of Applied Science degree from a regionally accredited institution. This program is not available to first-year students.

Transfer admission requirements: This BAS program allows students who have an applicable AAS degree from an accredited institution to transfer 60 credit hours toward a BAS degree at ASU. Following transfer to ASU, students pursuing this degree may have more than 60 credit hours to complete in order to obtain their BAS. Students who have earned an AAS degree from a regionally accredited Arizona community college may be eligible to transfer up to 75 credits toward the BAS degree. Students should work with their academic advisor to ensure their courses meet degree requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students interested in changing to this BAS program must have completed a related Associate of Applied Science degree from a regionally accredited college.

A current ASU student must have a minimum cumulative ASU GPA of 2.00 (scale is 4.00 = "A").
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSAMTABAS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Aviation is a global industry, and understanding intercultural communication is vital to succeeding in it. Study abroad programs (https://goglobal.asu.edu/), offered around the globe, give students insight into the study of aviation. Students can further their skills in communication and administration, and gain commercial experience in an international setting. Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

Graduates are prepared for advanced positions in the aviation management field, including:

- airline manager
- airline operations manager
- airport manager
- aviation consultant
- entrepreneur
- fixed base operator
- general aviation operations manager

Graduates are also prepared for government positions with the Federal Aviation Administration, the Department of Transportation and the National Transportation Safety Board.

Applied Science (Graphic Information Technology), BAS (TSGITBAS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Bachelor of Applied Science program with a concentration in graphic information technology, you prepare to become a visual design technologist. You gain skills in front-end web design and development, printing and digital publishing, commercial photography and video production, and motion graphics and visual effects. This is an intensive program of study that emphasizes theory and hands-on laboratory practice.

If you have an applicable Associate of Applied Science from an accredited institution, you can transfer 60 credit hours toward a BAS at ASU. You may have more than 60 credit hours to complete in order to obtain your BAS upon transfer to ASU. If you've earned an AAS from a regionally accredited Arizona community college, you may be eligible to transfer up to 75 credits toward the BAS. You should work with your academic advisor to ensure that your courses meet degree requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Graphic Information Technology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree in a similar field, such as animation, desktop publishing, digital arts, digital photography, e-learning design, game technology, graphic design, video production technology or web design.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students interested in changing to this BAS program must have completed a related AAS at a regionally accredited university in a similar program, such as graphic design, animation, visual communication, web design and development, commercial photography and video.

A current ASU student must have a minimum cumulative ASU GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/graphic-information-technology-bas/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSGITBAS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Synthesize technical information into written and visual documentation for cross-media projects.
- Sketch solutions to cross-media problems utilizing industry-standard workflows.
- Implement appropriate industry-standard tools and techniques for managing complex cross-media projects.

Global opportunities

Global experience: Students learn intercultural applications of design and technology skills through hands-on learning and cultural engagement opportunities in an international setting. Through the rich educational and interpersonal experiences inherent in study abroad, students learn to thrive in a global environment.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

A resume enhanced by the valuable study abroad experience impresses prospective employers and helps the student stand out should they decide to pursue advanced study.

Career opportunities

The cross-media nature of the graphics industry requires tomorrow's graduates to understand the full spectrum of visual design and production as well as current business practices. Graduates of this program are prepared for technical and management positions in visual design in such diverse areas as:

- art direction
- commercial photography and video production
- front-end web design and development
- graphic design
- motion graphics, animation and game art
- premedia, digital printing and publishing
- production management
- quality assurance of graphic and visual design products
- technical and digital media production
- user experience and user interface design
- video editing
- visual design

Applied Science (Internet and Web Development), BAS (TSIWDBAS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

The Bachelor of Applied Science program with a concentration in internet and web development is an intensive program of study that emphasizes hands-on laboratory practice. You develop skills in front-end web design and development, including advanced web markup and scripting, user experience design, usability, multimedia design and emerging web technologies.

If you have an applicable Associate of Applied Science from an accredited institution, you may transfer 60 credit hours toward a bachelor's degree at ASU, and if you've earned an AAS from a regionally accredited Arizona community college, you may be eligible to transfer up to 75 credits toward this program. Upon transfer to ASU in pursuit of this BAS, you may have more than 60 credit hours to complete. You should work with your academic advisor to ensure that your courses meet degree requirements.

All courses for this program are available on campus and through ASU Online.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Graphic Information Technology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree in digital animation, graphic design, media arts, web design or web development.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/graphic-information-technology-bas/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSIWDBAS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply industry-level knowledge of web design and development key concepts and best practices to provide web-based solutions
- Propose solutions to complex web design and development projects utilizing industry-standard tools and techniques
- Construct effective user interactions and system functionalities in web-based systems

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, internet and web development students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared for careers in front-end website design and development, usability and user experience design, user interface design and visual design.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: Any math course with the MATH general studies designation will satisfy the math requirement.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree from a regionally accredited institution. This program is not available to first-year students.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students interested in changing to this BAS program must have completed a related AAS at a regionally accredited institution and have a minimum cumulative ASU GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-applied-science-operations-management-technology/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Implement industrial management of technology, management of processes, and management of human capital.
- Demonstrate proficiency in collaborating with diverse team members through a professional team presentation that conveys innovation improvements for businesses or organizations.
- Apply systems thinking, data-driven decision making, and research to optimize decisions to solve complex problems for a variety of industries and organizations.
- Demonstrate proficiency in critical thinking by developing a strategic management plan that includes analysis of issues, assumptions, evidence and implications.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, operations management students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for supervisory and management functions in industry, manufacturing, public service and other service organizations.

Biomedical Engineering, BSE (ESBMEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Bachelor of Science in Engineering program, you gain the in-depth knowledge needed to translate an idea for a health solution into a viable prototype of a biomedical device.

With knowledge you gain from engineering and life sciences courses, you are able to apply your skills in an ethical and sustainable manner to make contributions that address societal and individual needs.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Bioengineering and Biomedical Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Management of Technology, MS

Innovations in Medical and Patient Care Technologies, MS

Biomedical Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency

(https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 3.00 in ASU courses (or equivalents) in CHM 114, MAT 265, MAT 266, BIO 181, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/biomedical-engineering/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESBMEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students studying biomedical engineering gain valuable hands-on experience when studying abroad --- experience that enhances their resumes. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, biomedical engineering students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Biomedical engineers are primarily employed in:

- governmental regulatory agencies
- hospital and research facilities
- medical and educational institutions
- medical device, biotechnology and pharmaceutical industries

In industry, they may work in all aspects of product development, including:

- business development
- manufacturing
- marketing
- quality
- regulatory compliance
- research and design
- sales

Because of their background in both engineering and medical fields, biomedical engineers often serve a coordinating or interfacing function and have a key role in transdisciplinary teams. Government positions may involve evaluating new technologies, testing product quality and safety, and setting standards.

In the hospital, biomedical engineers serving in a clinical engineering function may provide advice on the selection and use of medical equipment, and supervise performance testing and maintenance. Biomedical engineers may also build customized devices for special health care, rehabilitation or research needs.

Biomedical Engineering (Biological Devices), BSE (ESBMEBDBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Bachelor of Science in Engineering program in biomedical engineering with a concentration in biological devices, you gain in-depth knowledge of cell biology and learn to apply that knowledge to solve engineering problems pertinent to medicine and other fields, including synthetic biology.

The biomedical industry has many branches that require depth of understanding of cell biology and its techniques, including immunohistochemical diagnostics, blood-contacting materials, controlled-release therapeutics and local delivery of therapeutics.

With engineering and life sciences courses, the program enables you to apply your skills in an ethical and sustainable manner to address societal and individual needs.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/ (http://www.abet.org/), under the General Criteria and the Bioengineering and Biomedical Engineering Program Criteria.

Chemical Engineering, BSE (ESCHEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Chemical engineering deals with the application of chemistry, physics and mathematics to the process of converting raw materials or chemicals into more useful or valuable forms. Chemical engineering also involves the design of valuable new materials and chemical products. The modern discipline of chemical engineering is intertwined with biology and biomedical engineering.

In the Bachelor of Science in Engineering program in chemical engineering, you build on a broad base of knowledge within the basic and mathematical sciences and engineering.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Chemical, Biochemical, Biomolecular Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Chemical Engineering, MS

Materials Science and Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer credit hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in ASU courses (or equivalents) in FSE 100, CHM 113, CHM 116, MAT 265, MAT 266, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCHEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply key principles in engineering and applied chemistry through chemical process design.
- Demonstrate the ability to effectively communicate in written and oral methods in student assignments including an oral project defense and lab report.
- Apply fundamental knowledge of mathematics, science, and engineering to complex chemical engineering problems.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) give students an important opportunity to develop valuable skills and have experiences that help to grow their self-confidence and enable them to develop their communication skills, giving them an advantage.

Students learn intercultural applications of design and technology skills through hands-on learning and cultural engagement opportunities in an international setting. Participation in a Global Education program exposes students to unique environments and cultures, challenges them to adapt and persevere, helps them increase their professional and educational networks, and enhances their portfolio of experience through the kinds of hands-on research and community-based opportunities they need to compete and succeed in today's challenging and quickly changing STEM fields.

The Ira A. Fulton Schools of Engineering recommends these programs (https://goglobal.asu.edu/chemical-engineering-bse) for students majoring in chemical engineering.

Career opportunities

Graduates are prepared for excellent career opportunities. Chemical engineers are engaged in the development and production of a diverse variety of products, including high-performance materials needed for aerospace, automotive, biomedical, electronic and environmental applications. They have traditionally played a key role in industries as varied as:

- artificial fibers
- biotechnology

ceramics
food
glass
petrochemicals
petroleum
plastics
primary metals
semiconductors
specialty chemicals

Chemical engineering graduates are also in great demand in many newer fields, such as biomedical engineering and modern materials science (composites, superconductors), and those that center on solving environmental problems.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Civil Engineering, BSE (ESCEEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

As a civil engineering major in the Ira A. Fulton Schools of Engineering, you have two choices within the accredited Bachelor of Science in Engineering program: civil engineering and civil engineering with the sustainable engineering concentration. Regardless of your choice, the BSE in civil engineering is accredited by ABET.

Civil engineering involves the analysis, planning, design, construction, maintenance and application of sustainable practices in all areas of urban infrastructure for government, commerce, industry and the public domain. These include airports, bridges, canals, dams, factories, office towers, roadway systems, schools, tunnels and subway systems, and water purification facilities. Civil engineers are concerned with the impact their projects have on the public and the environment --- they coordinate the needs of society with technical and economic feasibility.

The curriculum exposes you to the following areas of civil engineering, with a strong emphasis on sustainability:

• construction engineering
• environmental engineering
• geotechnical engineering
• hydrosystems engineering
• structures
• transportation

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Civil Engineering Program Criteria.

The following are the civil engineering undergraduate program educational objectives within three years of graduation:
• Graduates will be employed as engineers or will be enrolled in (or have graduated from) engineering or professional graduate school.
• Graduates will provide engineering and program management services for civil infrastructure development that protect and enhance the environment while stewarding natural resources.
• Graduates will demonstrate professionalism and will hold positions of increasing responsibility within their organizations.

Graduates are expected to achieve the following outcomes by graduation:
• An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
• An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil, Environmental and Sustainable Engineering, MS

Construction Engineering, MSE

Environmental Engineering, MS

Public Administration, MPA
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English proficiency test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum ACT composite score of 24, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum ACT composite score of 24, or minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies if Admission Services requires submission of a high school transcript

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 3.00 in ASU courses (or equivalents) in FSE 100, MAT 265, MAT 266, MAT 242, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCEEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in civil engineering to learn intercultural applications of design and technology skills through hands-on learning and cultural engagement in an international setting.

Whether in a foreign country, in the U.S. or online, students build communication skills and learn to adapt and persevere, and they are exposed to research and internships across the world, which increases their professional network. Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

The expanded education that students acquire while participating in a Global Education program (https://goglobal.asu.edu/) demonstrates to employers their ability to thrive in a global environment, helping them to stand out when pursuing their choice of careers in a competitive industry.

Career opportunities

ASU graduates with a bachelor's degree in civil engineering readily find employment. Civil engineers work in many different types of companies, including large corporations and small, private consulting firms, as well as government agencies. A civil engineering background is an excellent foundation for jobs in management and public service.

Civil engineering is one of the best engineering professions from the viewpoint of international travel opportunities or eventually establishing one's own consulting business.

The bachelor's degree program prepares graduates for the Fundamentals of Engineering examination, the Principles and Practice of Engineering exam, and graduate degree programs.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Civil Engineering (Sustainable Engineering), BSE (ESCEESUBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

If you are a civil engineering major, you have two options within the accredited Bachelor of Science in Engineering program: civil engineering and civil engineering with sustainable engineering concentration. Regardless of choice, the BSE in civil engineering is accredited by ABET.

The bachelor's degree in civil engineering with a concentration in sustainable engineering incorporates systems modeling and life cycle approaches to assessing the resiliency and material selection across all areas of urban infrastructure or the built environment currently addressed within the civil engineering degree. The program exposes you to material from several disciplines that comply with the principles of economic, social and ecological sustainability and apply these principles to traditional civil engineering areas.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/ (http://www.abet.org/), under the General Criteria and the Civil Engineering Program Criteria.

The following are the civil engineering undergraduate program educational objectives within three years of graduation:
• Graduates will be employed as engineers or will be enrolled in (or have graduated from) engineering or professional graduate school.
• Graduates will provide engineering and program management services for civil infrastructure development that protect and enhance the environment while stewarding natural resources.
• Graduates will demonstrate professionalism and will hold positions of increasing responsibility within their organizations.

Graduates are expected to achieve the following outcomes at graduation:
• An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
• An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil, Environmental and Sustainable Engineering, MS

Construction Engineering, MSE

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 3.00 in ASU courses (or equivalents in FSE 100, MAT 265, MAT 266, MAT 242, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCEESUBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 programs available, study abroad (https://goglobal.asu.edu/) enables students to tailor their experience to their unique interests and skill sets. Students in sustainable engineering are able to gain hands-on experience in a variety of countries.

Graduates stand out in a competitive field when their resume is enhanced with the heightened cultural competency, and leadership and critical thinking skills they acquired while studying abroad.

Career opportunities

Civil engineers with knowledge of sustainable engineering may find employment in many different types of companies, including large corporations and small, private consulting firms, as well as government agencies.

Civil engineering is one of the best engineering professions from the viewpoint of international travel opportunities or eventually establishing one's own consulting business.

Graduates of the program are prepared for the Fundamentals of Engineering examination, the Principles and Practice of Engineering examination, and graduate degree programs.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure

(https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Computer Science, BS (ESCSEBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

The Bachelor of Science program in computer science is anchored with core courses that provide a solid foundation in theoretical and practical aspects of computer science. These courses ensure that you have essential critical thinking knowledge along with effective programming and problem-solving skills in a variety of modern programming languages. The core courses give you the necessary knowledge for a career in computer science with an emphasis on understanding security and systems issues.

The program caters to a variety of interests in subfields of computer science and related disciplines. As part of your program of study, you have access to a flexible set of electives that enable you to develop in-depth knowledge and skills. The electives are in the areas of artificial intelligence, machine learning, robotics, database systems, informatics, or other engineering and science disciplines. You can also pursue concentrations in software engineering or cybersecurity as part of your degree program.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Computer Science Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in CSE 110 Principles of Programming, CSE 205 Object-oriented Programming and Data Structures, MAT 265 Calculus for Engineers I, and MAT 266 Calculus for Engineers II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-computer-science/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers, and it also helps the student stand out should they decide to pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Computer science professionals design, analyze and improve the quality of computer software and systems. Graduates of this program secure employment in a variety of capacities, such as computer and software design, and development of information technologies. Their jobs are often distinguished by the high level of theoretical expertise applied to solving complex problems and to the creation and application of new computing technologies.

Computer science graduates work in a variety of areas, including:

artificial intelligence
computer vision
cybersecurity
graphics
information management
multimedia
networking

Computer science-related jobs include:

creating computer games and graphics systems
designing artificial intelligence systems
developing mobile computing applications
developing network security applications
discovering data management and mining solutions for large-scale data analytics
inventing and implementing more efficient computing systems for managing data and information, including information retrieval and search on the Internet

With the theoretical foundation built into the program, computer science graduates can excel in system and software development, as well as in designing effective computing solutions for emerging and challenging problems in modern society. Skills in system development and research can lead to entrepreneurial activity that produces innovative computing products and services.

Graduates are able to embark on further studies in graduate degree programs.

Computer Science (Artificial Intelligence), BS (ESCSEAIBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Bachelor of Science program in computer science with a concentration in artificial intelligence prepares you to design and implement intelligent systems. You gain a strong foundation in computer science while developing expertise in areas such as machine learning, natural language processing, robotics, data mining and reasoning.

The program emphasizes both theoretical foundations and hands-on applications. You learn to build models and algorithms that support decision-making and autonomous behavior, while also understanding the practical implications of AI deployment.

A flexible set of electives allows you to deepen your knowledge in specialized areas, including advanced machine learning, knowledge representation, and AI for robotics or natural language. This ensures you can adapt your skills to evolving challenges across industries.

The program aligns with the Ira A. Fulton Schools of Engineering commitment to innovation and societal impact. You graduate ready to contribute to diverse domains where AI is transforming practice, including medicine, transportation, business and environmental systems.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Computer Science Program Criteria.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 if taken before January 21, 2026 in a testing center; a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined

score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in CSE 110 Principles of Programming, CSE 205 Object-oriented Programming and Data Structures, MAT 265 Calculus for Engineers I, and MAT 266 Calculus for Engineers II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEAIBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers, and it also helps the student stand out should they decide to pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates of the computer science program with a concentration in artificial intelligence apply advanced computing knowledge to create and improve intelligent technologies. They design algorithms, build models, and deploy systems that support pattern recognition, perception and automation.

Career opportunities exist in areas such as:

autonomous systems and robotics
computer vision and natural language processing
data mining and large-scale analytics
game design and simulation
human-computer interaction
knowledge representation and reasoning
machine learning and statistical modeling

Typical roles for graduates include:

AI software engineer
data scientist
machine learning engineer
natural language processing specialist
robotics engineer
research and development scientist

With the program's emphasis on strong fundamentals and applied projects, graduates are prepared for careers in technology, health care, finance, government and emerging industries. Many also continue to pursue graduate studies to advance research in AI and related fields.

Computer Science (Cybersecurity), BS (ESCSEIBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Students in the Bachelor of Science program in computer science with a concentration in cybersecurity are prepared to protect digital information and systems by combining foundational computing principles with specialized security knowledge. The program covers how to design and build secure information systems and networks, while also focusing on ensuring the integrity, confidentiality and quality of data.

The information assurance courseware at Arizona State University is certified to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

Domestic students enrolled in the cybersecurity concentration are eligible for federal fellowship, such as the National Science Foundation CyberCorps: Scholarship for Service (https://ctf.asu.edu/education/scholarship/) program.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Computer Science Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science (Cybersecurity), MCS

Computer Science (Cybersecurity), MS

Computer Science (Big Data Systems), MCS

Computer Science (Media Arts and Sciences), MS

Computer Science, MS

Computer Science (Biomedical Informatics), MS

Computer Science (Big Data Systems), MS

Computer Science, MCS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)

Career opportunities

Career opportunities are plentiful for software engineers.

Graduates of the software engineering concentration have the knowledge and skills to work across the spectrum of software development process activities, including:

architecture

coding
project management
quality assurance
requirements engineering
testing

Job opportunities include these positions:

software analyst
software architect
software engineer
software task leader
software tester

Graduates find employment in large and small organizations that develop, deploy and manage software systems. They work on all types of projects, such as large, complex engineering systems, distributed banking, financial and government software, and gaming.

Computer Science and Artificial Intelligence, AS (ESCSEAIAS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

The Associate of Science program in computer science and artificial intelligence equips you with foundational knowledge and interdisciplinary skills to pursue careers in technology-driven fields. Developed in partnership with the U.S. Naval Community College, this program is tailored to support the educational and professional advancement of enlisted personnel in the Navy, Marine Corps and Coast Guard.

You explore core principles of computer science, including programming, data structures and algorithms, while gaining specialized exposure to AI topics. The curriculum emphasizes practical problem-solving, ethical considerations in AI, and the application of computational thinking to real-world challenges.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students must be accepted to the U.S. Naval Community College to be admitted to this program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEAIAS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Career opportunities

Graduates are prepared to support and innovate within defense and maritime technology environments, as well as contribute to broader industries that rely on AI and computer science expertise. They can pursue careers across the private sector, government, military and nonprofit organizations. Graduates from this program are also equipped to succeed in further undergraduate study.

Computer Systems Engineering, BSE (ESCSEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Bachelor of Science in Engineering program in computer systems engineering, you focus on the analysis, design, testing, integration and evaluation of hardware and software systems. The curriculum is grounded in many engineering disciplines, including the applications of science and technology to the design of:

• computer architecture
• cybersecurity
• digital circuits
• distributed and embedded systems
• networking
• operating systems

You engage in the design of integrated hardware and software solutions for computing, communication and control applications. You practice many aspects of engineering activities, such as the development of:

• computer networks
• embedded and ubiquitous systems
• high-performance computer systems
• individual digital components

You become skilled in interfacing different pieces of hardware and software components, and systems with products, to create new capabilities and improved quality and performance.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Computer Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

Computer Science, MS

Computer Science (Biomedical Informatics), MS

Computer Engineering (Computer Systems), MS

Data Science, Analytics and Engineering (Computing and Decision Analytics), MS

Computer Science (Big Data Systems), MS

Computer Science, MCS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in all critical courses: CSE 110 Principles of Programming, CSE 205 Object-oriented Programming and Data Structures, MAT 265 Calculus for Engineers I, and MAT 266 Calculus for Engineers II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and helps the student stand out if they pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Computer systems engineers are employed in industry, government, education and consulting firms. Computer systems engineers engage in the design, development and operation of hardware and software systems of computer and networking equipment.

Computer systems engineers often focus on engineering problems or challenges of emerging computer systems. Some of the challenges may involve chips, device controllers, embedded systems and high-performance computing servers. Their jobs usually involve research into the design and development of computer hardware and software for practical applications. Their work results in innovative, state-of-the-art products that integrate computing and communication capabilities. Examples of products that computer systems engineers work on:

- avionics and space vehicles
- digital television and photography
- intelligent highways and control systems for vehicles
- mobile devices and smart applications
- new apparatuses for health care and for sight-impaired individuals or those with physical disabilities
- security and defense systems

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Computer Systems Engineering (Cybersecurity), BSE (ESCSEIBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Bachelor of Science in Engineering program in computer systems engineering with a concentration in cybersecurity, you prepare to build secure and reliable information systems and networks. The program focuses on ensuring the integrity and quality of all stored, processed and transmitted information.

The information assurance courseware at Arizona State University is certified to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

If you are a domestic student enrolled in the cybersecurity concentration, you are eligible for federal fellowship, such as the National Science Foundation CyberCorps: Scholarship for Service (https://ctf.asu.edu/education/scholarship/).

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Computer Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science (Cybersecurity), MCS

Computer Science (Cybersecurity), MS

Computer Science (Big Data Systems), MCS

Computer Science (Media Arts and Sciences), MS

Computer Science, MS

Computer Science (Biomedical Informatics), MS

Computer Science (Big Data Systems), MS

Computer Science, MCS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum SAT score of 1210 for evidence-based reading and writing plus math or minimum ACT composite score of 24, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum SAT score of 1210 for evidence-based reading and writing plus math (or 1140 if taken prior to March 5, 2016) or minimum ACT composite score of 24, or a minimum high school GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary OR the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in all critical courses: CSE 110 Principles of Programming, CSE 205 Object-oriented Programming and Data Structures, MAT 265 Calculus for Engineers I, and MAT 266 Calculus for Engineers II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and helps the student stand out should they decide to pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Computer systems engineers are highly sought-after in diverse areas and industries, including education, logistics, tech, government and security.

Graduates find employment in a variety of capacities, such as developing computer systems and software, and conducting research on information assurance technologies. Related jobs include:

- computer forensic data analysis
- information security consulting
- information systems security engineering
- network security engineering
- secure information systems and networks design

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit theASU professional licensure (https://admission.asu.edu/academics/licensure)webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Construction Engineering, BSE (ESCONBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Bachelor of Science in Engineering program in construction engineering, you gain a professional engineering license while working at the interface of design and construction. The program prepares you for a career that emphasizes the construction of infrastructure.

The degree program's engineering design and construction management courses include a focus on sustainability and building information modeling topics. Construction management content includes construction methods, contract management, cost and schedule control, people management and project estimating.

The curriculum's design content includes structures, geotechnical engineering and transportation. You are further prepared with the computer, management, technical and people skills you need to succeed.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Construction Engineering Program Criteria.

Program educational objectives:
The educational objectives of the construction engineering program at Arizona State University are to prepare its graduates such that three to five years after graduating, they have demonstrated in their professional practice that they can:
• Lead collaboration with professionals across the architectural/engineering/construction community to improve the project delivery process.
• Ethically engage in professional practice
• Demonstrate lifelong learning skills through certifications, professional development and registration, as appropriate. for their employers.
• Address sustainably the needs of society through the built environment.
• Successfully balance technical aspects of engineering and practical applications of construction.
• Foster respectful, collaborative and professional work environments that leverage the strengths and perspectives of multidisciplinary teams.

ABET student outcomes:
Construction engineering graduates are expected to achieve the following student outcomes by graduation:
• An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• An ability to communicate effectively with a range of audiences
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil, Environmental and Sustainable Engineering, MS

Construction Engineering, MSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before Jan. 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum SAT score of 1210 for evidence-based reading and writing plus math or minimum ACT composite score of 24, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high

school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum ACT composite score of 24, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in ASU courses (or equivalents) in FSE 100, MAT 265, MAT 266, MAT 242, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCONBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students gain valuable experiences through study abroad (https://goglobal.asu.edu/) that enhance their resumes. With more than 300 programs available, study abroad enables students to tailor their experience to their unique interests and skill sets. Students in construction engineering are able to gain hands-on experience in a variety of countries. In a competitive field, students stand out with the heightened cultural competency, and leadership and critical thinking skills they have acquired studying abroad.

Career opportunities

The construction engineering graduate, with this strong background in design and management, is prepared to enter a career in the engineering and construction industry as a field engineer, project engineer or project designer. Potential employers include:

- construction companies
- design firms
- facility owners
- material suppliers
- specialty subcontractors

Graduates have the unique skills needed to take on the role of integrator in the delivery of design-build projects or development activities. As their careers progress, graduates should be able to take on leadership roles in the delivery of sustainable facilities in the built environment, advancing to successively higher levels of management responsibility. The graduate should be particularly attuned to the design and construction of heavy civil and industrial facilities, meeting the infrastructure needs of society.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Construction Management and Technology, BS (ESCONMGTBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Bachelor of Science program in construction management and technology, you specialize in construction and facility management. You learn to organize, lead and manage the building construction business processes related to real estate, facility and infrastructure projects.

Construction management is the most vital function on a job site. Construction managers represent the interests of the building owner or the contractor and interact with architects, engineers, subcontractors, vendors and suppliers to ensure the success of construction projects in the built environment.

This program focuses on the business of construction and technology, such as building information modeling.

You learn the basics of design; the construction methods specific to each type of construction (heavy, residential, commercial, specialty); and the process of sustainable or green construction. You learn how to estimate, schedule and control the costs of a project and what it takes to manage the people involved and the various types of contracts. At the end of the program, you have the computer, management, technical and people skills you need to succeed.

This is one of two construction programs in the state of Arizona and one of approximately 80 accredited programs in the nation.

The BS program in construction management and technology is accredited by the American Council for Construction Education, or ACCE: https://www.acce-hq.org/ (https://www.acce-hq.org/)

• Annual continuous improvement assessment and actions (https://ssebe.engineering.asu.edu/wp-

content/uploads/sites/28/2025/10/2025-SLO-Achievement-Graphs-10-14-2025.pdf) (PDF)
• Quality improvement plan (https://ssebe.engineering.asu.edu/wp-content/uploads/sites/28/2025/09/QIP-9-2-25.pdf) (PDF)
• Number of graduates and enrollments (https://engineering.asu.edu/enrollment/)
• ACCE public disclosures page for ASU construction management and technology (http://acce-hq.org/membership-directory)

Accredited by the Applied and Natural Science Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Construction Management Criteria.

Program educational objectives:
The educational objectives of the construction management and technology program at Arizona State University are to prepare its graduates such that three to five years after graduating, they have demonstrated in their professional practice the ability to:
• Lead collaboration with professionals across the architectural/engineering/construction community to improve the project delivery process.
• Ethically engage in professional practice.
• Demonstrate lifelong learning skills through certifications, professional development and registration as appropriate for their employers.
• Address sustainably the needs of society through the built environment.
• Successfully balance technical aspects of applied construction science and practical applications of construction.

Student outcomes:
Upon graduation from the DEWSC construction management and technology program, a graduate will have:
• An ability to identify, formulate and solve broadly defined technical or scientific problems by applying knowledge of mathematics, science and technical topics to areas relevant to the discipline.
• An ability to formulate or design a system, process, procedure or program to meet desired needs.
• An ability to develop and conduct experiments or test hypotheses, analyze and interpret data, and use scientific judgment to draw conclusions.
• An ability to communicate effectively with a range of audiences.
• An ability to understand ethical and professional responsibilities and the impact of technical and scientific solutions in global, economic, environmental and societal contexts.
• An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty

Printable program brochure

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Construction Management and Technology, MS

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet either the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.50 for 24 or more transfer hours, and
• minimum GPA of 2.75 in ASU courses (or equivalents) in CON 100, CON 101, CON 252, MAT 170 and CON 244

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/construction-management-technology/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCONMGTBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students enhance their resumes with the valuable experience they gain through study abroad (https://goglobal.asu.edu/). With over 300 programs available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students in construction management and technology are able to gain hands-on experience, heightened cultural competency, and leadership and critical thinking skills while studying abroad. They earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

The construction management and technology program provides a foundation for those who wish to pursue careers as project managers, project engineers, estimators or schedulers and eventually become principals of firms engaged in the construction of industrial, commercial or residential projects.

Graduates of the heavy construction emphasis area are prepared for careers related to public works such as highways, airports, bridges, utility systems, and water or waste treatment facilities.

Graduates of the commercial and residential emphasis areas are prepared for careers in real estate development, home production systems, commercial construction, health care and special industrial building projects. They are also prepared to enter the sustainable or green construction market.

Graduates of the specialty construction emphasis are prepared to organize, lead and manage the building process at the subcontractor level and for careers as contractors working with mechanical and electrical systems. They are also prepared for careers in management at specialty contracting firms, such as those with expertise in control systems, electrical distribution or heating, and ventilation and air conditioning systems for large and complex facilities such as data centers, health care organizations, semiconductor manufacturing plants and commercial facilities.

Electrical Engineering, BSE (ESEEEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Bachelor of Science in Engineering program in electrical engineering, you are prepared for positions as electrical engineers.

Following initial coursework in mathematics and sciences, the foundation courses enable you to build a solid base of engineering knowledge. The electrical engineering curriculum includes a number of required upper-division electrical engineering and technical elective courses in such areas as circuits, communication, signal processing, control systems, computer engineering, electromagnetics, electric power, energy systems, physical electronics, photonics, photovoltaics and quantum engineering.

Approved technical elective courses provide you with an opportunity either to broaden your background in electrical engineering or to study in greater depth the technical subjects you're particularly interested in.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/ (http://www.abet.org/), under the General Criteria and the Electrical and Electronics Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, MS

Data Science, Analytics and Engineering (Electrical Engineering), MS

Exploration Systems Design (Sensor Networks), MS

Exploration Systems Design (Instrumentation), MS

Exploration Systems Design (Systems Engineering), MS

Robotics and Autonomous Systems (Electrical Engineering), MS

Exploration Systems Design, MS

Electrical Engineering (Media Arts and Sciences), MS

Computer Engineering (Electrical Engineering), MS

Electrical Engineering, MSE

Astrophysics and Astronomy, MS

Artificial Intelligence Engineering (Electrical Engineering), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and

• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary OR the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.50 for 24 or more transfer hours, and
• minimum GPA of 2.75 in MAT 265, MAT 266, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-engineering-electrical-engineering/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESEEEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts; ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Global opportunities

Global experience: Students gain valuable experience when studying abroad (https://goglobal.asu.edu/) and enhance their resumes. With more than 300 programs available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students in electrical engineering are able to gain hands-on experience in a variety of international locations. In a competitive field, students stand out with the heightened cultural competency, and the leadership and critical thinking skills they gained studying abroad.

Career opportunities

Graduates of the BSE program in electrical engineering find many exciting opportunities in various industries. These include positions with:

- communication equipment and network providers
- computer and peripheral device manufacturers and defense organizations
- consulting companies
- electric power utilities
- semiconductor chip designers and manufacturers

Graduates are also prepared for continued learning experiences, in either a formal graduate program or continuing education applications.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Electrical Engineering (Electric Power and Energy Systems), BSE (ESEEEPBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Bachelor of Science in Engineering program in electrical engineering with a concentration in electric power and energy systems, you are prepared for positions in industries that deal with the generation, transmission and use of electric power. Generation includes conventional power generation (fossil fuel and nuclear) and alternative energy systems, such as solar, wind and fuel cells.

You first complete the foundation courses in math, science and engineering. Next, you take the pathway course in energy systems and power electronics, and complete nine of the 15 technical elective credit hours with electrical power and energy systems courses. Your senior design capstone project focuses on the area of electric power and energy systems.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (http://www.abet.org/), under the General Criteria and the Electrical and Electronics Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Apply knowledge of mathematics, science, and engineering, with focus on electrical power systems.

Global opportunities

Global experience: Students gain valuable experience when studying abroad, enhancing their resumes. With more than 300 programs available, study abroad (https://goglobal.asu.edu/) enables students to tailor their experience to their specific interests and skill sets. Students in electrical engineering get hands-on experience in a variety of international locations. In a competitive field, students stand out with the heightened cultural competency as well as leadership and critical thinking skills they acquired while studying abroad.

Career opportunities

Career opportunities for graduates with a concentration in electric power and energy systems include positions with:

- engineering consulting firms
- entrepreneurial startups
- power equipment manufacturers
- research and design organizations
- state, federal and municipal agencies
- utility companies

This concentration also prepares students to pursue graduate degrees in the areas of:

- power generation
- power systems
- power transmission and distribution
- renewable and sustainable energy sources

Graduates are also prepared for continued learning experiences, either in a formal graduate program or in continuing education applications.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Engineering, BSE (TSEGRBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Bachelor of Science in Engineering program in engineering prepares you to collaborate across disciplines in order to design and build solutions to practical problems.

You apply engineering fundamental knowledge and design thinking to actual projects every semester. You choose a disciplinary concentration that enables you to develop in-depth knowledge in a specific area, and you choose a secondary focus area. This flexibility enables you to tailor your degree in a way that helps you to achieve your individual career and life goals. You develop sophisticated technical skills in tandem with the professional skills of communication, teamwork, collaboration, self-motivation and adaptability, and the program's emphasis on open-ended design and project-based learning supports the development of entrepreneurial skills and attitudes.

You can choose from the following concentrations: automotive systems, electrical systems, mechanical engineering systems and robotics.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Engineering, General Engineering, Engineering Physics, and Engineering Science Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00 (scale is 4.00 = "A").
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSEGRBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Design engineering systems including components, and processes to meet needs within realistic constraints including social, political, economic, ethical, health and safety, manufacturing and/or sustainability.
- Communicate engineering findings to colleagues, clients, other stakeholders and the public in written, oral and graphical form.
- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET)

Global opportunities

Global experience: Study abroad enables students to gain valuable, resume-building experience. Participation in a Global Education program (https://goglobal.asu.edu/) provides students with the heightened cultural competency, and leadership and critical thinking skills that help them stand out in a competitive industry.

Whether in a foreign country, in the U.S. or online, students build communication skills, are challenged to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Engineers on transdisciplinary teams collaborate to design, manufacture and deliver innovative technological products and services.

Graduates are prepared to work in large corporations, government agencies and small businesses, and to go on to graduate school to pursue advanced degrees. Some graduates start companies of their own.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Engineering (Automotive Systems), BSE (TSEGRASBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Bachelor of Science in Engineering program in engineering with a concentration in automotive systems prepares you to collaborate across disciplines to design and build solutions to real-world problems.

In the program, you apply fundamental engineering knowledge and design thinking to practical projects every semester. You first build a broad engineering foundation, to which you add the skills and knowledge necessary for vehicle design and testing. The curriculum focuses on automotive engineering fundamentals, including powertrain engineering and chassis system design, as well as hands-on projects that involve designing, analyzing and building actual automotive systems.

Upon graduation, you will be able to provide leadership in automotive engineering settings, especially in automotive testing and hybrid propulsion systems, which are intrinsically transdisciplinary.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (http://www.abet.org), under the General Criteria and the Engineering, General Engineering, Engineering Physics, and Engineering Science Program Criteria.

STEM-OPT for International Students on F-1 Visas

- Design engineering systems including components, and processes to meet needs within realistic constraints including social, political, economic, ethical, health and safety, manufacturing and/or sustainability.
- Communicate engineering findings to colleagues, clients, other stakeholders and the public in written, oral and graphical form.
- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET)

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and helps students stand out when they pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Engineers collaborate on transdisciplinary teams to design, manufacture and deliver innovative technological products and services. Through the program, graduates have developed sophisticated technical skills in tandem with the professional skills of communication, teamwork, collaboration, self-motivation and adaptability that many employers seek.

Graduates of the automotive concentration are prepared for employment in companies related to the automotive industry, from large original equipment manufacturing companies and their testing grounds, to smaller specialty or aftermarket companies. The program's emphasis on open-ended design and project-based learning supports the development of entrepreneurial skills and attitudes, and some students start companies of their own.

Because of the transdisciplinary nature of the BSE, graduates also have opportunities to perform functions traditionally associated with mechanical, manufacturing, automation and development engineers.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Engineering (Clean Energy Systems), BSE (ESEGRCEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Fossil fuel dependency puts future generations in jeopardy --- not only because these energy sources is depleted, but also because they threaten the survival of life on the planet through global warming effects. The goal of the concentration in clean energy systems within the Bachelor of Science in Engineering program is to educate you in promoting and establishing new and renewable energy sources to reduce carbon footprints. Emphasis on clean energy systems is truly a global phenomenon, and there is a need for collaborative work on a global scale, ranging from developing ideas for new designs to implementing those designs into viable energy production systems. In this program, you prepare to collaborate across disciplines to design and build solutions to practical problems.

You apply fundamental engineering knowledge and design thinking to real projects every semester. In this concentration, you build a broad engineering foundation to which you add the skills and knowledge you need to contribute clean energy systems expertise in transdisciplinary engineering teams; you learn energy conversion processes and gain knowledge and skills in batteries, photovoltaics, fuel cells, wind energy and solar heating. This expertise includes hybrid energy systems and applications.

The program enables you to develop sophisticated technical skills in tandem with the professional skills of communication, teamwork, collaboration, self-motivation and adaptability, and the program's emphasis on open-ended design and project-based learning supports the development of entrepreneurial skills and attitudes.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Engineering, General Engineering, Engineering Physics, and Engineering Science Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Management of Technology, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Clean Energy Systems, MS

Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

(https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00 to change majors to this program. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESEGRCEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, engineering students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Students are encouraged to leverage available resources, such as study abroad programs, internships at international industry partners and multinational team participation, to develop new design ideas.

Career opportunities

Graduates have the knowledge and skills necessary to be successful in the area of clean energy systems and related applications, including:

- emerging technology areas that use clean energy resources such as batteries, fuel cells, and wind and solar energy
- the fields of electric and hybrid vehicles, autonomous vehicle systems, and power generation from alternate energy sources
- other related industries as the transition from traditional to other energy sources takes place in all sectors of engineering

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure

(https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Engineering (Electrical Systems), BSE (TSEGRESBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Bachelor of Science in Engineering program in engineering with a concentration in electrical systems, you prepare to collaborate across disciplines as you design and build solutions to relevant, practical problems.

As a BSE student, you apply fundamental engineering knowledge and design thinking to authentic projects every semester. In the electrical systems concentration, you build a broad engineering foundation, to which you add the skills and knowledge you need to contribute electrical subject matter expertise on transdisciplinary engineering teams. This expertise includes theory and application of sensors, actuators, microcontrollers and microprocessors, as well as the integration of these components into electrical and mechatronic systems. The electrical systems curriculum also provides you with significant hands-on experience designing and implementing electrical and mechatronic systems to meet the needs of users.

The program enables you to develop sophisticated technical skills in tandem with the professional skills of communication, teamwork, collaboration, self-motivation and adaptability. The program's emphasis on open-ended design and project-based learning supports the development of entrepreneurial skills and attitudes.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design engineering systems including components, and processes to meet needs within realistic constraints including social, political, economic, ethical, health and safety, manufacturing and/or sustainability.
Communicate engineering findings to colleagues, clients, other stakeholders and the public in written, oral and graphical form.
Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET)

Global opportunities

Global experience: Study abroad enables students to gain valuable, resume-building experience. Participation in a Global Education program (https://goglobal.asu.edu/) provides students with the heightened cultural competency as well as leadership and critical thinking skills that help them stand out in a competitive industry.

Whether in a foreign country, in the U.S. or online, students build communication skills, are challenged to adapt and persevere, are exposed to research and internships across the world, and increase their professional network.

Career opportunities

Engineers on transdisciplinary teams collaborate to design, manufacture and deliver innovative technological products and services.

Engineers with electrical expertise are in high demand in many industry sectors, especially manufacturing, utilities, and communications and defense systems. Electrical systems also pervade the service sectors in areas such as health care, finance, education and entertainment.

Graduates of this program have the broad base of technical knowledge and operational skills that make them invaluable members of multidisciplinary engineering teams and well suited for employment across a broad spectrum of engineering endeavors. They are prepared to work in large corporations, government agencies and small businesses, and to go on to graduate school to pursue advanced degrees. Some graduates start companies of their own.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Engineering Management, BSE (ESEMGBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Some accelerated combinations are not available to ASU Online students. Interested students should contact their academic advisor for more information.

Program description

The Bachelor of Science in Engineering program in engineering management provides you with skills required for effective management and leadership of engineering-driven enterprises.

Through a broad curriculum, you gain the knowledge needed for engineering science and design careers. This knowledge is augmented with an understanding of business practices and organizational behavior. You gain a deep understanding of at least one industry sector based on the focus area courses. Topics covered in the core curriculum include:

- configuration management
- entrepreneurship
- financial engineering
- operations management
- process development
- product design
- product liability
- project and resource management
- risk management
- service plans

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Engineering Management Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Industrial Engineering, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• Minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• Admission may be granted with one deficiency in no more than two competency areas

(https://admission.asu.edu/apply/first-year/competency-requirements). Deficiencies in both math and laboratory science are not acceptable.

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 2.75 for fewer than 24 transfer hours, and
• meet first-year admission requirements

Transfer students with more than 24 transferable college credit hours:
• Minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• If ASU Admission Services requires submission of a high school transcript, admission may be granted with one deficiency in no more than two competency areas (https://admission.asu.edu/apply/first-year/competency-requirements). Deficiencies in both math and laboratory science are not acceptable.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/engineering-engineering-management-bse/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESEMGBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will have an ability to function effectively as a member or leader of a team. Graduates will successfully perform work related tasks including establishing goals, work plans, tasks, meets deadlines in order to create a collaborative and inclusive environment that establishes goals, plans, tasks, meets deadlines, and creates a collaborative and inclusive environment. (ABET)
- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET)

Communicate effectively with a range of audiences.(ABET)

Global opportunities

Global experience: Students gain valuable experience through study abroad. With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, they can tailor their experience to their specific interests and skills.

As students learn to thrive in a global environment, they build communication skills, are challenged to adapt and persevere, and are exposed to research and internships across the world, in addition to increasing their professional networks.

Participation in a global education program, whether in a foreign country, in the U.S. or online, provides students with heightened cultural competency, enhancing their resumes and helping them stand out in a competitive field.

Career opportunities

An engineering management graduate is prepared to begin a career as a:

manufacturing engineer
operations analyst
production supervisor
project engineer
project management team member or lead
supply logistics engineer
system specification and customer relationship management specialist or similar role

Graduates succeed in the management of a scientific or engineering enterprise. They are ready to progress successively through higher levels of management positions such as:

engineering project manager
logistics manager
operations manager
product manager
quality manager

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Engineering Science (Business), BS (ESESCBUSBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: West Valley

Program description

You prepare to solve the most pressing problems facing society in the Bachelor of Science program in engineering science with a concentration in business in the School of Integrated Engineering. The program connects you with the core values of ASU through an innovation-focused interdisciplinary education that's open to you even without an intensive science and math background.

Coursework emphasizes basic engineering and business principles, including engineering design, science, mathematics, artificial intelligence, business intelligence, accounting, supply chain management and grounded theory in hands-on, project-based courses taught in makerspaces. Electives enable you to customize your degree for your preferred career pathway. Program faculty bring rich interdisciplinary perspectives to courses that foster creativity, critical thinking, communication, context and community by having you solve practical problems in partnership with local industry.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESESCBUSBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and

resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, engineering science students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are well-prepared for a diverse and rewarding career landscape in areas such as:

- academia and education
- data analysis and modeling
- energy and environmental engineering
- engineering consulting
- manufacturing and quality control
- product design and development
- project management
- research and development
- technical sales and marketing

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Engineering Science (Microelectronics), BS (ESESCMEBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: West Valley

Program description

The Bachelor of Science program in engineering science with a concentration in microelectronics prepares you to excel in the microelectronics industry.

In this program, you master fundamental mathematics, coding, digital design and physics in your first year, while simultaneously learning how engineers solve problems, approach the design process, and consider societal and business aspects of their work. In your second and third years, you learn the engineering and computing tools used in the microelectronics industry and how they're used to design and fabricate complex microelectronic circuits. The final year focuses on methods of testing, developing and manufacturing semiconductors. You also complete a year-long capstone project with your peers and a faculty mentor.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Environmental Engineering, BSE (ESEVEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Bachelor of Science in Engineering program in environmental engineering educates you to become tomorrow's engineer who solves complex environmental problems and designs systems at the human, urban and planetary scales.

As an environmental engineer, you are actively involved in air quality monitoring and air pollution control technology; analysis of the fate and transport of pollutants; application of sustainable design principles; design and operation of water and wastewater treatment systems; design of hazardous waste containment systems; design of solid waste management systems; remediation of contaminated soil, sediment and water; and water quality, water conservation and water reuse.

In recognition of the interdisciplinary nature of environmental engineering challenges, the degree program incorporates courses from the humanities, social sciences, natural sciences, mathematics and engineering. Environmental engineering courses build on strong foundations in chemistry, microbiology, geology, physics and mathematics. You learn fundamental engineering concepts applied to environmental processes and environmental engineering design. Applied learning experiences, including a required internship or research experience and a capstone design course, are also part of the program.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Environmental Engineering Program Criteria.

Program educational objectives
The educational objectives of the ASU Environmental Engineering program are to prepare its graduates such that three to five years after graduation they can:
• Pursue successful careers in environmental engineering or related fields, demonstrating technical competence, ethical practice, and professional integrity.
• Contribute to the development and implementation of solutions that address critical environmental challenges and protect public and ecological health.
• Engage in ongoing professional development¿through industry experience, licensure, certifications, or graduate education¿to enhance their expertise and support the well-being of society and the environment.

Student outcomes
ASU environmental engineering graduates are expected to achieve the following outcomes by graduation, which map

directly to ABET student outcomes (1) through (7) listed in Criterion 3.
• An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
• An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Environmental engineering, BSE (https://ssebe.engineering.asu.edu/wp-content/uploads/sites/28/2023/06/SSEBE-Environmentalengineering-TrifoldBrochure-2022-v6-toPRINT-rev1.pdf) (PDF)

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil, Environmental and Sustainable Engineering, MS

Environmental Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with more than 24 transferable college credit hours:

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in ASU courses (or equivalents) in FSE 100, MAT 265, MAT 266 and MAT 242

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESEVEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) enable students with an open mind to further their understanding of the impact that the industrial world has on the environment around the globe. With more than 300 programs available to them, students can tailor their experience to their unique interests and skill sets.

Whether in a foreign country, in the U.S., or online, students broaden their educational experience, build

communication skills, are challenged to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Students' participation in study abroad demonstrates to employers that they can thrive in a global environment, helping them to stand out in a competitive industry.

Students earn ASU credit for completed courses while staying on track for graduation, and they may apply financial aid and scholarships to program costs.

Career opportunities

Graduates from the environmental engineering program have career opportunities in the private and public sectors.

Opportunities exist in the private sector in the consulting and manufacturing industries. The consulting industry is growing as greater environmental awareness and emerging novel pollutants require continual refinement of regulations and environmental system design standards, and the manufacturing industry employs environmental engineers to aid in environmental compliance and eco-efficiency.

In the public sector, municipalities and regulatory agencies require a knowledgeable workforce that understands how public policy can improve human health and ecosystem services through environmental engineering processes.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Environmental and Resource Management, BS (TSETMBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Bachelor of Science program in environmental and resource management provides you with critical scientific, engineering, regulatory and management skills for careers in industry, government or nongovernmental organizations. The program focuses on ensuring the health of engineered and natural ecosystems and mitigating the environmental impact of the industrial world.

The curriculum combines a strong foundation in chemistry, physics, biology and mathematics with a solid grounding in environmental law and policy, engineering, and management principles. You learn to apply environmental technologies to manage engineered environmental operations such as drinking water and wastewater treatment, management of hazardous and solid wastes, and the control of industrial and mobile sources of air pollution. You study Occupational Safety and Health Administration, U.S. Environmental Protection Agency and U.S. Department of Transportation regulations on health and safety, as well as strategies to protect workers in hazardous environments. International environmental issues and legal frameworks are included, along with U.S. environmental laws.

An accelerated BS/MS degree option is available, in which up to 12 credit hours of the bachelor's degree may be applied toward the 30 credit hours required for the master's degree in environmental and resource management. A special application is required for this option.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Environmental and Resource Management (Water Management), MS

Environmental and Resource Management, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSETMBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate environmental policies and regulations that apply to environmental and resource management.
- Apply management, scientific, and technical solutions to natural and anthropogenic environmental problems.
- Apply sustainable development practices and trends to environmental systems.

Global opportunities

Global experience: Study abroad enables environmental resource management students to further their understanding of how the industrial world impacts the environment. With an open mind, students further their studies and understanding of the various environmental conditions around the globe.

Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

A resume enhanced by the valuable study abroad experience impresses prospective employers and helps students who pursue advanced study stand out.

Career opportunities

Graduates with the skills gained in this program are in high demand and can find work in industry, governmental management and regulatory agencies or in policymaking organizations.

Graduates are firmly grounded in the scientific, technical and legal problems facing environmental managers in today's business climate. They are prepared to be environmental, health and safety professionals in industrial settings such as manufacturing, mining, and oil and gas, and in environmental engineering consulting firms. They also ensure compliance with OSHA and EPA requirements in laboratories at pharmaceutical companies, water and wastewater treatment facilities, and academic institutions. On the regulatory side, graduates work for agencies such as the EPA or state and county departments of environmental quality.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Graphic Information Technology, BS (TSGITBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Bachelor of Science program in graphic information technology, you prepare to become a visual design technologist. You develop skills in front-end web design and development, print and digital publishing, commercial photography and video production, and motion graphics and visual effects.

This is an intensive program of study that emphasizes both theory and hands-on laboratory practice.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Graphic Information Technology, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-graphic-information-technology-concentration/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSGITBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Sketch solutions to graphic communications problems utilizing industry-standard workflows.
- Apply individual and collaborative skills to engineer solutions to cross-media challenges.
- Compose written and visual documentation for complex cross-media processes.
- Synthesize content into digital collateral for cross-media output.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, graphic information technology students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

The cross-media nature of the graphics industry requires tomorrow's graduates to understand the full spectrum of visual design and production as well as current business practices. Graduates of this program are well prepared for technical and management positions in visual design in such diverse areas as:

- art direction
- commercial photography and video production
- front-end web design and development
- graphic design
- motion graphics and visual effects
- pre-media, digital printing and publishing
- print technology
- production management
- quality assurance of graphic and visual design products
- technical and digital media production

- user experience and user interface design
- visual design

Graphic Information Technology, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/web-development-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESGITFSWBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze accepted coding and design techniques to apply the most appropriate to web design and development solutions.
- Demonstrate ability to guide a project through a development cycle using industry-standard tools and techniques.
- Implement individually- and collaboratively-built components into cohesive solutions for web design and development challenges.
- Display ability to build and evaluate effective user interactions in web-based systems.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, graphic information technology students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Employers looking to fill full-stack web developer positions seek those who can create web applications from the ground up.

The Bureau of Labor Statistics (https://www.bls.gov/ooh/computer-and-information-technology/web-developers.htm) shows that salaries for these positions can be two to three times higher than the national average and that growth of the field from 2024 to 2034 is expected to far outpace that of the average for all careers (7% compared to 3%).

Full-stack web developers' knowledge of programming languages and concepts enables them to shift and grow with the ever-evolving field of web development and to work across teams to complete projects. An article from MongoDB (https://www.mongodb.com/resources/basics/full-stack-development) notes that the top languages listed for these positions include HTML, CSS, JavaScript, Python, Java, Node and PHP, all of which are used in program courses or electives.

Top industries where graduates land include computer software, IT, financial services and higher education. Google, Apple, Fidelity Investments, IBM and Capital One are among the top companies hiring full-stack developers

Graphic Information Technology (User Experience), BS (ESGITUEBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The Bachelor of Science program in graphic information technology with a concentration in user experience provides you with an interdisciplinary foundation in design, research and communication to prepare you for the rapidly growing area of user experience.

You gain a conceptual understanding of methods for gathering user information, analyzing data and communicating through visual design technologies, as well as applied skills in those methods.

While graphic information technology is its disciplinary home and primary focus, the concentration also includes courses from the fields of human systems engineering and technical communication; this curriculum enables you to learn the multiple perspectives and complementary skills needed for user experience work.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Graphic Information Technology, MS

User Experience, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

Human Systems Engineering, BS (ESHSEBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The Bachelor of Science program in human systems engineering provides you with an understanding of the science of human performance. You gain experience using methods and tools to apply this understanding to design and problem-solving in a wide variety of domains, such as product usability, learning design, sports performance, and workplace and hospital safety.

Many diverse professions need experts in human factors to work on problems that involve an understanding of human performance; these areas include user experience, aviation human factors, cognitive performance, consumer psychology, transportation human factors, patient safety, effective teamwork, health psychology, learning optimization, social cognition, threat detection and sports psychology.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Human Systems Engineering (User Experience), BS (ESHSEUEBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The user experience skills increasingly valued by industry are not typically covered in traditional psychology or engineering programs. The Bachelor of Science program in human systems engineering with a concentration in user experience combines topics in psychology, the web, human factors, visual displays and technical communications. Through the program's innovative curriculum, you learn to make products and services useful, usable and desirable.

User experience focuses on the design, development and evaluation of products and services. The user experience program addresses UX research, design, content development, communication, tone of voice and evaluation of all components and products that end users interact with.

You learn how to research customer needs, identify criteria for successful products and services, prototype those products and services, and refine them through usability testing and other user-centered methods.

Industrial Engineering, BSE (ESIEEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Industrial engineering pertains to the design, improvement, installation and operation of integrated systems of people, materials, information, equipment and energy. An industrial engineer's expertise centers on determining efficient ways to make a product or provide a service. Industrial engineering draws on specialized knowledge and skills in the mathematical, physical and social sciences, and the principles and methods of engineering analysis and design.

The Bachelor of Science in Engineering program in industrial engineering prepares you to apply business principles alongside mathematics and information technology to build models that describe, analyze and improve system performance. Depending on the subspecialties involved and the intended application, industrial engineering may also be known as operations management, management science, operations research, systems engineering or manufacturing engineering.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Industrial Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes

First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Industrial Engineering, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:

The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary OR the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary Criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in CSE 110 Principles of Programming, MAT 265 Calculus for Engineers I and MAT 266 Calculus for Engineers II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESIEEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- ABET 1: Will demonstrate the ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
- ABET 6: Will demonstrate an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- ABET 7: Will demonstrate the ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, industrial engineering students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared to design, enhance and manage systems for a wide variety of organizations. They find exciting career opportunities in all types of manufacturing and service industries, including:

- banking and finance
- defense and government
- health care
- hospitality, sports and entertainment
- management consulting
- manufacturing (e.g., aerospace, automotive, semiconductor)
- software
- telecommunication
- transportation and logistics

Common job titles include:

- industrial engineer
- logistics analyst
- manufacturing engineer
- operations analyst
- process engineer
- production planner
- quality assurance analyst
- supply chain coordinator

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure webpage (https://admission.asu.edu/academics/licensure).Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Informatics, BS (ESCPIBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Informatics is about discovering, developing and understanding computer applications that improve people's lives. The Bachelor of Science program in informatics prepares you to become a skilled professional who takes a transdisciplinary, user-oriented perspective toward information and computing systems, applies current informatics methods to address society's needs and contributes to the next generation of such systems.

The informatics bachelor's degree program provides an option if you are interested in a flexible program in applied information and computing technologies. You acquire skills in design and implementation of computer systems and have opportunities to build applications that'll be used by people in many fields. You learn to develop software for devices of all sizes, from supercomputers to cell phones and even smaller. The challenges of informatics include designing, developing and applying tools that model, aid or automate activities within science, engineering, business, geography, education and entertainment environments.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 265 Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in all critical courses: MAE 201 Mechanics of Particles and Rigid Bodies I: Statics, MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics, MAE 213 Mechanics of Materials, and MAE 241 Introduction to Thermodynamics.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCPIBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Master principles for the usage, design, construction and evaluation of Informatics systems (ABET target)
- Demonstrate an in-depth understanding and development skill of the Informatics knowledge of the chosen focal area
- Apply principles of computing and other relevant disciplines to analysis of practical problems and development of solutions

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, informatics students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Informatics careers center on solving problems through the design and creation of information systems, user interfaces, mobile technologies and social media.

Graduates have the ability to develop future information technology solutions that place a strong emphasis on user needs, enabling users to adapt and change dynamically with society's needs. This makes the informatician a strong candidate for jobs in:

- data analytics
- management consulting firms
- technology research centers
- technology startups

Additionally, they are prepared for graduate programs that offer an emphasis in emerging technologies.

Information Technology, BS (TSIFTBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

Technology continues to evolve each day. Every organization needs information technology professionals to protect their networks, troubleshoot computer systems, develop applications and manage IT projects.

The Bachelor of Science program in information technology covers key disciplines that incorporate emerging technologies, including agile software development, data management and analytics, network administration, cloud computing and cybersecurity.

You have the opportunity to select technical electives in different interdisciplinary areas. Within a project-driven curriculum, you take a learn-by-doing approach that prepares you for careers in IT.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Information Technology Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Information Technology, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Artificial Intelligence in Information Technology, MS

Data Science, Analytics and Engineering (Human-Centered Applications), MS

Human Systems Engineering (Intelligent Systems), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00 (scale is 4.00 = "A").
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-information-technology/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSIFTBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements
- Ability to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
- Ability to communicate effectively in a variety of professional contexts
- Ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
- Ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
- Ability to use systemic approaches to select, develop, apply, integrate and administer secure computing technologies to accomplish user goals.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, information technology students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

IT careers are growing fast, according to the Bureau of Labor Statistics:https://www.bls.gov/ooh/computer-and-information-technology/home.htm. The exciting career path of an IT professional can place graduates in positions around the world, in any industry. These industries include:

- biomedical
- construction
- defense
- education
- entertainment
- geospatial
- informatics
- sports
- sustainable environments

Information Technology (Cybersecurity), BS (ESIFTCSBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Bachelor of Science program in information technology with a concentration in cybersecurity, you acquire both the academic and technical background for a career in information technology security. The concentration is designed to incorporate emerging technologies that are used in current business models, and courses provide you with a comprehensive understanding of system orchestration, network forensics, configuration management, security

analysis, security risk assessment, cloud security and mobile security. You gain knowledge and skills through coursework designed by industry experts, hands-on experience with a virtual cybersecurity lab, and preparation for industry careers.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Information Technology Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Demand for information security professionals is increasing because of the need to create innovative solutions to prevent hackers from stealing, changing or destroying information and technology infrastructures. According to the U.S. Department of Labor, employment of information security professionals is projected to grow 29% from 2024 to 2034; the median annual wage for an information security analyst in 2024 was $124,910 ($60.05 an hour). There is a significant shortage of cybersecurity professionals around the globe, and ISC2 research states that about 500,000 of the three million positions are located in North America.

Graduates can pursue careers in cybersecurity analysis, cloud security engineering, security architecture, and red or blue team ethical hacking.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Information Technology (Networking), BS (ESIFTNBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Bachelor of Science program in information technology with a concentration in networking, you acquire both the academic and technical background for a career in information technology networking. Networking involves setting up and managing the network, hardware, software and facilities (i.e., data centers) that are necessary for an organization's operations.

The courses in this program provide you with a comprehensive understanding of network design and implementation, network performance analysis and management, and the latest networking technology. You engage in topics including forensics and cloud architecture. Hands-on labs created by experts prepare you for successful careers in industry. The concentration is designed to incorporate emerging technologies that are used in current business models.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Information Technology Program Criteria.

Manufacturing Engineering, BS (TSMEGRBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Successful manufacturing enterprises prosper in the global marketplace through a balance of design, sustainability, quality and automated production. Manufacturing engineering combines manufacturing processes (e.g., how materials are altered in either shape or properties) and the processes of manufacturing (e.g., use of industrial robotics and design and management of factory manufacturing systems).

In the Bachelor of Science program in manufacturing engineering, you learn to analyze, synthesize and control manufacturing operations and production systems using digital fabrication techniques, industrial robotics, and quality control methods; to collaborate across disciplines to design and build automated manufacturing systems for factory operation; to design innovative products and the equipment, tooling and environments necessary for their manufacture; to model, simulate and analyze manufacturing production processes for both small- and large-scale environments; and to provide technological leadership.

The curriculum is project-based, hands-on and teamwork-oriented, and delivered in outstanding manufacturing facilities.

This program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Manufacturing Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes

First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Robotics and Autonomous Systems (Systems Engineering), MS

Clean Energy Systems, MS

Artificial Intelligence Engineering (Manufacturing), MS

Manufacturing Engineering, MS

Engineering, MS

Artificial Intelligence Engineering (Robotics), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSMEGRBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and helps students stand out if they pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Engineers collaborate on transdisciplinary teams to design, manufacture and deliver innovative technological products and services.

Graduates possess the technical skills in tandem with the professional skills of communication, teamwork and collaboration and the self-motivation and adaptability that many employers seek. Graduates are prepared to work in large corporations, government agencies and small businesses, and to pursue advanced degrees in graduate school. The program's emphasis on open-ended design and project-based learning supports the development of entrepreneurial skills and attitudes, and some students start companies of their own.

Graduates typically work as manufacturing engineers in a variety of companies, large and small. They are often members of design and development teams, cooperating with people within and outside their companies. Career employment opportunities include direct manufacturing support, manufacturing management, and quality control and assurance. Small and new startup companies value the strong, broad and practical engineering skill set of program graduates. Graduates become key team members who create and implement processes for making such varied products as semiconductor chips; aerospace, defense and automotive equipment; surgical instruments; and industrial equipment. Graduates find excellent employment opportunities and command top salaries.

Manufacturing Systems, BAS (ESMFGSYBAS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

If you have completed an Associate of Applied Science degree and wish to earn a four-year degree in manufacturing, the Bachelor of Applied Science program is designed for you.

Through hands-on projects, simulation-based learning, and industry-aligned coursework, you develop expertise in modern manufacturing technologies and process optimization. You apply your learning to practical industrial matters through direct access to courses in:

- advanced manufacturing processes
- automation
- digital design and fabrication tools
- industrial data analytics
- production management
- quality assurance
- robotics

• smart manufacturing

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree from a regionally accredited institution. This program is not available to first-year students.

Transfer admission requirements: Applicants must hold a completed AAS degree in engineering, engineering technology, industrial technology, manufacturing production technology, semiconductor manufacturing or a related AAS area.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students interested in changing to this BAS program must have completed a related AAS degree at a regionally accredited college. A current ASU student must have a minimum cumulative ASU GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESMFGSYBAS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and also helps students stand out should they decide to pursue advanced study.

With over 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for roles in emerging sectors within microelectronics, medical, aerospace and space manufacturing. They find roles in manufacturing leadership, process optimization and industrial innovation.

Career opportunities include:

facilities manager
factory manager
field service representative
field service technician
industrial automation specialist
maintenance manager
manufacturing specialist
production supervisor

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Materials Science and Engineering, BSE (ESMSEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Novel materials are tailored to meet the needs of targeted applications and become the foundation for all engineering disciplines. Such materials enable many new technologies and are commonly used in bioengineering and medicine, pharmaceuticals, electronics, optics, architecture and transportation, aviation and aerospace, energy conversion, environmental engineering and numerous industrial systems.

Materials science and engineering involves the discovery, synthesis, processing, manufacturing and characterization of substances within these general classes of materials: sustainable materials, polymers, metals, semiconductors, ceramics and composites. An understanding of the molecular structure and well-designed processing are the keys to engineering materials with outstanding properties for next-generation applications.

Courses in the undergraduate program in materials science and engineering prepare you to discover and design new and better materials that improve people's lives and keep the U.S. on the cutting edge of technology.

Program education objectives
The materials science and engineering program has the following educational objectives:

• You can solve practical materials engineering challenges within your organization by applying the required technical knowledge, skills and critical thinking.
• You have made demonstrable progress toward a graduate degree or can be considered for a technical promotion within three to five years of graduation.
• You can demonstrate professionalism, leadership, lifelong learning, professional development and the ability to work in teams, and hold positions of increasing responsibility within your organization.
• You can demonstrate an ethical approach to your profession, including consideration of economic, societal, cultural and environmental impact.

Outcomes
You are expected to attain the ability to:

• acquire and apply new knowledge as needed, using appropriate learning strategies
• apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

An additional outcome for ASU materials science and engineering students is to demonstrate integration of relationships of structure, properties, processing and performance related to material systems using experimental, computational and statistical methods.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Materials Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Materials Science and Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary OR the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• minimum GPA of 2.75 in ASU courses (or equivalents) in MAT 265, MAT 266, PHY 121 and PHY 122

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESMSEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Demonstrate integration of relationships of structure-property-performance-processing and apply them to modern engineering problems involving electronic, sustainability, polymeric, ceramic, and other material systems using materials science characterization, computational and statistical methods.
- Solve complex engineering problems by identifying, formulating and applying principles of material science and engineering.
- Develop and conduct appropriate experimentation, by analyzing and interpreting materials characterization or computational datasets, and conduct appropriate experimentation and use engineering judgment to draw scientific and engineering conclusions applicable to modern engineering questions.

Global opportunities

Global experience: A study abroad (https://goglobal.asu.edu/) experience can equip students with the skills they need to effectively and efficiently work with people anywhere in the world. They have the opportunity to gain an international viewpoint not only on engineering itself, but also on being a human in this increasingly global world.

Participating in a Global Education program broadens students' horizons and opens up opportunities they may not have known existed. Students gain valuable, resume-enhancing experience when studying abroad, and they stand out in a competitive field with the heightened cultural competency and strengthened leadership and critical thinking skills they have acquired.

The Ira A. Fulton Schools of Engineering recommends these programs (https://goglobal.asu.edu/materials-science-and-engineering-bse) for students majoring in materials science and engineering.

Career opportunities

Because materials science and engineering has such a wide variety of applications, graduates find jobs in virtually every field, such as aerospace, defense, the auto industry, telecommunications, microelectronics, computers, bioengineering, sports, renewable energy, academia and national research labs. They are among the highest paid scientists and engineers.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Mechanical Engineering, BSE (ESMAEMBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

Mechanical engineering is a creative, diverse discipline. Mechanical engineers design, build and control the devices, machines, processes and systems that are the mainstay of modern industrialized society.

In the Bachelor of Science in Engineering program in mechanical engineering, you prepare for a career through a curriculum that includes the study of the principles that govern energy transfer, mechanical design, sensors and control devices, and the application of these principles to the creative solutions of practical modern problems.

As a mechanical engineering student, you are expected to be able to:

• acquire and apply new knowledge as needed, using appropriate learning strategies
• apply engineering design to produce solutions that meet specified needs, with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Mechanical Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Exploration Systems Design (Sensor Networks), MS

Robotics and Autonomous Systems (Mechanical and Aerospace Engineering), MS

Exploration Systems Design (Instrumentation), MS

Aerospace Engineering, MS

Exploration Systems Design (Systems Engineering), MS

Exploration Systems Design, MS

Manufacturing Engineering, MS

Modern Energy Production and Sustainable Use, MS

Mechanical Engineering, MS

Astrophysics and Astronomy, MS

Materials Science and Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in all critical courses: MAE 201 Mechanics of Particles and Rigid Bodies I: Statics, MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics, MAE 213 Mechanics of Materials, and MAE 241 Introduction to Thermodynamics

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/undergraduate/bachelor-mechanical-engineering/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESMAEMBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply principles of mathematics and science to solve complex engineering problems.
- Apply engineering design to a student project with consideration of public welfare/other factors.
- Develop and conduct engineering experiments, and analyze and interpret data.

Global opportunities

Global experience: Students gain valuable, resume-enhancing experience when studying abroad (https://goglobal.asu.edu/). With more than 300 programs available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students in mechanical engineering are able to gain hands-on experience in a variety of countries around the world. In a competitive field, students stand out with the heightened cultural competency and strengthened leadership and critical thinking skills they have acquired studying abroad.

The Ira A. Fulton Schools of Engineering recommends these programs (https://goglobal.asu.edu/mechanical-engineering-bse) for students majoring in mechanical engineering.

Career opportunities

Mechanical engineers are employed in virtually every kind of industry. They are involved in seeking new knowledge through research; in generating creative design and development; and in the production, control, management and sales of the devices and systems needed by society. Therefore, a major strength of a mechanical engineering education is the flexibility it provides for its graduates regarding future employment opportunities.

The BSE program in mechanical engineering has the following program educational objectives:

Through activities such as volunteering, entrepreneurial endeavors, community service, and their employment, graduates demonstrate commitment to the Sun Devil ideals of global engagement, social embeddedness, social transformation and sustainability.

Graduates should attain one or more of the following objectives within a few years of earning their degree:

- admission to a graduate degree program in mechanical engineering or other technical fields
- admission to a professional degree program, such as law, business or medicine, in accordance with the graduate's interests and abilities
- employment in engineering or other fields in a position that capitalizes on the skills and abilities gained through the degree program in mechanical engineering (holding positions of increasing responsibility and leadership within their organizations)

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Mechanical Engineering (Computational Mechanics), BSE (ESMAECBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The concentration in computational mechanics within the Bachelor of Science in Engineering program in mechanical engineering teaches you the modern computational tools available for solving large-scale and complex technical problems. The curriculum focuses on high-performance computing and the accurate modeling of large- and small-scale systems.

You are able to:

• acquire and apply new knowledge as needed, using appropriate learning strategies
• apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Mechanical Engineering Program Criteria.

Mechanical Engineering (Energy and Environment), BSE (ESMAEEBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The concentration in energy and environment within the Bachelor of Science in Engineering program in mechanical engineering prepares you to analyze technical problems in:

• air pollution
• climate change
• energy efficiency
• environmental sustainability
• renewable energy
• timely issues facing the global community

Although the primary focus of this program is technical, the general education courses in the areas of the humanities and social and behavioral sciences introduces you to the global, political and societal issues relating to energy and the environment. In the energy and environment concentration, you culminate your major study with a two-semester capstone design project that incorporates the multiple disciplines involved in mechanical engineering. Capstone courses MEE 445 and MEE 446 are taken in consecutive semesters.

You are able to:

• acquire and apply new knowledge as needed, using appropriate learning strategies
• apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
• communicate effectively with a variety of audiences
• develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
• identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
• recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Mechanical Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Aerospace Engineering, MS

Modern Energy Production and Sustainable Use, MS

Mechanical Engineering, MS

Materials Science and Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:
• minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• no high school math or science competency deficiencies

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 3.00 for fewer than 24 transfer hours, and
• no high school math or science competency deficiencies, and
• minimum 1210 SAT combined evidence-based reading and writing plus math score (or 1140 if taken prior to March 5, 2016) or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class

Transfer students with 24 or more transferable college credit hours must meet EITHER the primary or the secondary criteria (not both):

Primary criteria
• minimum transfer GPA of 3.00 for 24 or more transfer hours, and
• no high school math or science competency deficiencies (if ASU Admission Services requires submission of a high school transcript)

Secondary criteria
• minimum transfer GPA of 2.75 for 24 or more transfer credit hours, and
• minimum GPA of 2.75 in all critical courses: MAE 201 Mechanics of Particles and Rigid Bodies I: Statics, MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics, MAE 213 Mechanics of Materials, and MAE 241 Introduction to Thermodynamics

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESMAEEBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply principles of mathematics and science to solve complex engineering problems.
- Apply engineering design with consideration of public welfare/other factors.
- Develop and conduct engineering experiments, and analyze and interpret data.

Global opportunities

Global experience: Students gain valuable experience when studying abroad (https://goglobal.asu.edu/) --- experience that can enhance their resumes. With more than 300 programs available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students focusing on energy and the environment are able to gain hands-on experience in a variety of countries around the world. In a competitive field, students stand out with the heightened cultural competency and strengthened leadership and critical thinking skills acquired through study abroad.

The Ira A. Fulton Schools of Engineering recommends these programs (https://goglobal.asu.edu/mechanical-engineering-bse) for students majoring in mechanical engineering with a concentration in energy and environment.

Career opportunities

Mechanical engineers are employed in virtually every kind of industry. They are involved in generating creative design and development; seeking new knowledge through research; and the production, control, management and sales of the devices and systems needed by society. Therefore, a major strength of a mechanical engineering education is the flexibility it provides for its graduates in future employment opportunities. Graduates who have completed this concentration have opportunities as environmental consultants; heating, ventilation and air conditioning engineers; and power plant designers.

The program's focus on issues such as air pollution, water scarcity and the lack of alternative transportation makes graduates attractive to employers in the greater Phoenix area and nationwide.

The mechanical engineering program has the following program educational objectives:

Through activities such as volunteering, entrepreneurial endeavors, community service, and their employment, graduates of the mechanical engineering program demonstrate commitment to the Sun Devil ideals of global engagement, social embeddedness, social transformation and sustainability.

Graduates of the program should attain one or more of the following objectives within a few years of degree completion:

- admission to a graduate degree program in mechanical engineering or other technical field
- admission to a professional degree program, such as law, business or medicine, in accordance with their specific interests and abilities
- employment in engineering or other fields in a position that capitalizes on the skills and abilities gained through the degree program in mechanical engineering (holding positions of increasing responsibility and leadership within their organizations)

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Robotics and Autonomous Systems, BSE (ESRASBSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Autonomous systems are those that can work for an extended period without human control or intervention --- such as driverless cars or autonomous mobile robots.

The Bachelor of Science in Engineering program in robotics and autonomous systems provides you with a well-rounded education in robotics, controls, autonomous systems and automation. It's develops your general expertise in robotics and autonomous systems, including both theory and application of robotics and autonomous systems technologies, systems integration and data fusion techniques, and modeling and simulation development.

You learn to perform analysis, evaluation and synthesis for a wide variety of problems related to the design, implementation and efficient operation of robotics and autonomous systems.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Robotics and Autonomous Systems (Systems Engineering), MS

Artificial Intelligence Engineering (Manufacturing), MS

Manufacturing Engineering, MS

Artificial Intelligence Engineering (Robotics), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESRASBSE~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, robotics and autonomous systems students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Professionals with a degree in robotics and autonomous systems have substantial opportunities at all levels in manufacturing engineering and in research and development at companies, research institutes and national laboratories (e.g., Department of Defense, Department of Energy, NASA). They find work in industries such as aerospace, defense, medical and industrial manufacturing. Relevant careers and related titles include:

engineer
manufacturing engineer
mechanical engineer
mechatronics engineer
researcher and scientist

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Robotics and Autonomous Systems, BS (ESRASBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

ASU is no longer accepting new students to this program. Students interested in this program should apply to the BSE in Robotics and Autonomous Systems.

Program description

Robotics and autonomous systems are transforming the way people live and work, driving advances in transportation, manufacturing, health care, aerospace and beyond. Autonomous systems --- such as driverless vehicles, mobile robots, industrial robots and intelligent machines --- operate with minimal human intervention, requiring a deep integration of engineering disciplines to achieve reliable, safe and efficient performance.

You receive a comprehensive engineering education in robotics, controls, automation and intelligent systems in the Bachelor of Science program in robotics and autonomous systems. The program emphasizes both theoretical foundations and practical applications, with particular focus on systems integration, sensing and perception, data fusion, and modeling and simulation. You gain the ability to analyze, design, implement and optimize robotic and autonomous technologies across diverse domains, preparing you to contribute to innovations that define the future of engineered systems.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Software Engineering, BS (TSSERBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Some accelerated combinations are not available to ASU Online students. Interested students should contact their academic advisor for more information.

Program description

The Bachelor of Science program in software engineering blends engineering, computing, project leadership and software construction.

You learn how to create innovative software solutions to today's problems. Software systems are complex, often including millions of lines of code. You develop the knowledge and skills required to take a defined engineering approach to complex systems analysis, planning, design and construction.

The program's distinct, project-driven curriculum is establishing a new model for software engineering education. The program is built around the concepts of engaged learning, discovery-based education, and learning by doing. You learn by solving engaging projects, commonly as a member of a development team. In each semester of the program, you complete projects that emphasize communication, teamwork, critical thinking and professionalism. You have flexibility in designing your course of study and select technical electives from a pool of courses in different software engineering application areas, including web and mobile applications, embedded systems and other interdisciplinary areas.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Software Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science (Cybersecurity), MCS

Computer Science (Cybersecurity), MS

Computer Science (Big Data Systems), MCS

Robotics and Autonomous Systems (Artificial Intelligence), MS

Computer Science (Media Arts and Sciences), MS

Computer Science, MS

Computer Science (Biomedical Informatics), MS

Software Engineering, MS

Computer Science (Big Data Systems), MS

Computer Science, MCS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Ira A. Fulton Schools of Engineering, shown below, are higher than minimum university admission standards. International students must meet the same admission standards, with the possible additional requirement of a minimum English language proficiency (https://admission.asu.edu/apply/international/undergrad/english-proficiency) test score. If the university requires an English proficiency test score from the applicant, then admission to engineering requires requires a minimum total TOEFL iBT® score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a score of 79 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; a minimum PTE score of 58; a minimum Duolingo English score of 105; or a minimum Cambridge English exam score of 176.

First-year admission:

• Minimum 1210 SAT combined evidence-based reading and writing plus math score or minimum 24 ACT combined score, or a minimum high school cumulative GPA of 3.00 in ASU competency courses, or class ranking in top 25% of high school class, and
• Admission may be granted with one deficiency in no more than two competency areas (https://admission.asu.edu/apply/first-year/competency-requirements). Deficiencies in both math and laboratory science are not acceptable.

Transfer admission requirements: Transfer students with fewer than 24 transferable college credit hours:
• minimum transfer GPA of 2.75 for fewer than 24 transfer hours, and
• meet the first-year admission requirements

Transfer students with more than 24 transferable college credit hours:
• Minimum transfer GPA of 2.75 for 24 or more transfer hours, and
• If ASU Admission Services requires submission of a high school transcript, admission may be granted with one deficiency in no more than two competency areas (https://admission.asu.edu/apply/first-year/competency-requirements). Deficiencies in both math and laboratory science are not acceptable.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Admission requirements (https://engineering.asu.edu/admission-requirements/) for many majors in the Ira A. Fulton Schools of Engineering are higher than university admission standards.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-software-engineering/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSSERBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics (ABET 1)

- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. (ABET 2)
- Use the techniques, skills, and modern engineering tools and processes necessary for software engineering practice. (ABET-SER1)

Global opportunities

Global experience: Students in software engineering gain valuable hands-on experience when studying abroad --- experience that enhances their resumes. With more than 300 programs available (https://goglobal.asu.edu/) in a variety of countries around the world, study abroad enables students to tailor their experience to their specific interests and skill sets. In a competitive field, students stand out with the heightened cultural competency and strengthened leadership and critical thinking skills they gain when studying abroad.

Career opportunities

Software engineers solve a broad set of transdisciplinary problems and apply new technologies to improve quality of life.

Graduates are prepared most commonly for a career as an application software engineer. They design and engineer innovative systems that may include mechanical and electrical components that interact with software.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in the number of employment opportunities. Software engineering jobs may focus on:

- creating applications for mobile devices
- creating web applications
- designing, creating and validating software for avionics, robotics and similar systems

Job titles may include:

- application support analyst
- back-end developer
- front-end developer
- full-stack developer
- mobile app developer
- QA engineer (quality assurance)
- software developer
- software engineer
- web developer

Technological Entrepreneurship and Management, BS (TSTEMBS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The Bachelor of Science program in technological entrepreneurship and management brings a STEAM --- science, technology, engineering, arts and mathematics --- focus to coursework in order to prepare you to initiate far-reaching change by addressing social and corporate issues. You learn to create, launch and improve technology-based products, services and ventures and to identify and solve open-ended problems using engineering and technological approaches.

After completing this program, you are able to identify, analyze and synthesize information to address and solve use-inspired, open-ended problems, assessing their impact on social, cultural and economic environments; formulate methodologies to advance the knowledge of entrepreneurship and innovation; launch technology-based products and services, from idea generation through actualization; use quantitative and qualitative methods to demonstrate continuous improvement of products, services and processes; and use a systems approach for the effective design and improvement of entrepreneurial and innovation ventures.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Management of Technology, MS

Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS

Global Management, MGM

Applied Leadership and Management, MALM

Technology (Management of Technology), MSTech

Leadership and Management, MLM

Global Technology and Development, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSTEMBS~null&college=CES) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Implement venture management of technology, management of processes, and management of human capital.
- Demonstrate proficiency in collaborating with diverse team members through a professional team presentation that conveys innovation improvements for businesses or organizations.
- Apply systems thinking, data-driven decision making, and research to optimize decision(s) to solve complex problems for a variety of industries/organizations.
- Demonstrate proficiency in critical thinking by developing a strategic management plan that includes analysis of issues, assumptions, evidence, and implications.
- Demonstrate proficiency in navigating the intersection of technology management and engineering through management of a creative engineering solution to innovate a new product or process.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, technological entrepreneurship and management students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates of the technological entrepreneurship and management program have the skills needed to develop and innovate products and services that meet corporate and social demands.

They are prepared for a wide variety of career possibilities, including technology-based entrepreneurship, product development, consulting, venture capital analysis, business development, market analysis and technology marketing.

Global Futures, Rob Walton College of

Complexity Science, BS (LAAMLBS)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The 21st century is the century of complexity, and the Bachelor of Science in complexity science at ASU is the first comprehensive undergraduate program in the United States dedicated to mastering it.

You learn to think across disciplines and apply computational tools to solve real-world problems. The curriculum blends complexity methods, advanced mathematics, and complexity understanding courses, developing practical skills in data analysis, Python programming, and agent-based modeling.

Complexity science courses challenge you to explore the big questions: How can data and models guide better decisions? How do health, education, business and policy interact to shape specific outcomes? You can combine your degree with electives, a minor or a second major to focus on the areas that excite you the most.

Through this program, you have the unique opportunity to intern at ASU's Decision Theater (https://dt.asu.edu/), where you can apply what you learn in class to real-world projects that model systems in industries like health care, transportation and energy.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

ASU students who would like to change their major to complexity science must have a minimum cumulative ASU GPA of 2.50 based on at least 12 credit hours of ASU coursework.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAAMLBS~null&college=CGF) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities available to them, students of all majors, including programs in the Rob Walton College of Global Futures, are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

In a world defined by constant change and interconnection, complexity science is the new literacy for leadership, innovation and impact.

Graduates of the BS program in complexity science are uniquely equipped for careers where they have to make sense of complex, data-rich systems. After this program, they can move confidently into roles that involve research, strategy, analytics and innovation; or pursue advanced study in fields such as data science, medicine, law, public policy or sustainability.

Because complexity science reveals how patterns emerge across human, natural and technological systems, its principles apply everywhere, from predicting market trends and managing supply chains to modeling disease outbreaks and designing resilient cities.

The program emphasizes applied learning and interdisciplinary fluency, preparing graduates for high-demand careers in areas such as:

- bioinformatics and epidemiology
- business intelligence and innovation strategy
- climate and sustainability analytics
- data and network science
- finance, insurance and risk management
- policy analysis and public administration
- technology, security and systems design
- urban systems and smart infrastructure

As the world's problems become increasingly interconnected, professionals who understand complexity have a decisive advantage --- they see not just the parts, but the whole system.

Innovation in Society, BS (FIFISBS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

Innovation is fundamentally about empowering people and unlocking their potential to create positive change. That requires a human touch and knowledge of how to put people and communities --- not technology --- first. The Bachelor of Science program in innovation in society is specifically designed to prepare you to be a leader in this exciting and fast-growing field.

The program centers on building a foundational knowledge in innovation while enabling you to hone skills such as scenario planning, policy analysis, the responsible design of innovations, and public engagement. You are equipped to understand the intricacies of modern challenges, and anticipate and navigate future trends.

The program's small classes, one-on-one opportunities to work with faculty, and extensive community partnerships create a valuable experience in which you can learn how to develop the imagination, creativity, skills and expertise needed to help envision, plan and implement effective strategies for change. You learn how to use approaches such as policy analysis, foresight and scenario building, knowledge system creation and strategic plan development.

You explore:

• artificial intelligence --- diving into its potential and grappling with its integration into society
• biotech breakthroughs --- harnessing insights from biotechnologies that are reshaping the world
• eco-conscious strategy --- merging technology insights with environmental imperatives for sustainable solutions
• emerging technologies --- exploring new technologies, such as quantum computing and augmented reality, and their global impact
• impact on society --- engaging with simulations and projects that reflect technology's societal interplay
• vantage point --- grasping how technology impacts different roles, such as policymaking, technology consulting and digital ethics

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Interest Technology, MS

Science and Technology Policy, MSTP

Global Technology and Development, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/innovation-society-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=FIFISBS~null&college=CGF) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze and deconstruct complex social, technological, legal, ethical and social justice issues using multiple strategies.
- Apply foresight methods to analyze emerging trends and plausible futures.
- Design creative strategies to address current societal and technological challenges.

Global opportunities

Global experience: With more than 300 Global Education program opportunities available to them, students of all majors, including programs in the Rob Walton College of Global Futures, are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

As the landscape of science and technology rapidly transforms, the demand for graduates with a nuanced grasp of these changes becomes paramount. Across industries, there is a growing need for expertise in interpreting and guiding advancement in science and technology that can improve people's lives.

Graduates are poised for success in a range of sectors, including cities, aid agencies, charities and companies that are helping tackle difficult challenges. Alumni have highly sought-after jobs at NASA, the U.S. Department of Energy, Intel, OpenAI and beyond. Preparation in both theoretical and practical facets of innovation makes graduates invaluable assets in technology startups, corporations, nonprofit organizations and governments.

Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Innovation in Society, BA (FIFISBA)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

Innovation is fundamentally about empowering people and unlocking their potential to create positive change. That requires a human touch and knowledge of how to put people and communities --- not technology --- first. The Bachelor of Arts program in innovation in society is specifically designed to prepare you to be a leader in this exciting and fast-growing field.

The program centers on building a foundational knowledge in innovation while honing skills such as scenario planning, policy analysis, the responsible design of innovations, and public engagement. You are equipped not only to understand the intricacies of modern-day challenges but also to anticipate and navigate future trends.

The program's small classes, one-on-one opportunities to work with faculty, and extensive community partnerships create a distinct experience in which you can learn how to grow and strengthen community leadership, capabilities and

collaboration for innovation --- all while using tools such as narrative, storytelling, visual art, participatory design and community-centered inquiry.

You explore how to:

• champion humanity --- craft strategies, turning innovations into societal solutions
• combat climate change --- use interdisciplinary knowledge for a sustainable tomorrow
• engage beyond theories --- explore the global challenges with other perspectives
• fuse creativity --- merge artistry with technology, tackling issues from social inequality to digital divides
• navigate digital dynamics --- decode social media and digital landscapes, ensuring ethical integration
• reimagine health --- blend technology and empathy, advancing global well-being

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Ocean Futures, BS (GFSEABS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

For those of you passionate about the ocean and who want to make a difference, the Bachelor of Science in ocean futures provides the skills needed to understand and help protect them. You learn about marine ecosystems; ocean health; and how environmental, social and cultural factors all connect.

In this program, you study coral reef restoration, sustainable fishing and coastal protection while learning how to include community perspectives and Indigenous knowledge. Through this degree, you build additional skills in problem-solving and leadership.

Hands-on experiences and field work opportunities are also available in Arizona, ASU's Bermuda Institute of Ocean Sciences (https://bios.asu.edu/), ASU's Center for Global Discovery and Conservation Science (https://globalfutures.asu.edu/gdcs/) in Hawai'i, or even a study abroad trip to Antarctica.

In this program, you explore how the ocean works, understand the challenges it faces, and discover how science, society and leadership can work together to protect marine ecosystems and the people who depend on them.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Coastal and Marine Science and Management, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

(https://acceleratedmasters.asu.edu/how-apply).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/ocean-futures-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=GFSEABS~null&college=CGF) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply key stakeholder engagement skills in advancing healthy ocean systems with partners.
- Write a decision-focused analysis about an ocean science challenge with recommendations for action.
- Effectively communicate their co-produced ocean science work and its value to diverse audiences, using appropriately selected media.

Global opportunities

Global experience: With more than 300 Global Education program opportunities available to them, students of all majors, including programs in the Rob Walton College of Global Futures, are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional

network.

Beyond these, students in the BS in ocean futures program have special opportunities to enhance their learning in locations like Bermuda, Hawai'i and Antarctica. Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage and additional opportunities and information on the Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Career opportunities

The BS program addresses the crucial role of healthy oceans and coastal communities in the future of the planet and human well-being. Graduates are prepared for professional roles in high demand across sectors such as county, state and federal agencies, along with nongovernmental and community organizations. Graduates are equipped to work collaboratively with diverse communities to become the next generation of leaders dedicated to stewarding coastal and marine resources.

Career paths include:

- conservation manager
- environmental consultant
- environmental scientist
- fisheries manager
- marine biologist
- marine educator
- marine research assistant
- marine research technician
- marine scientist
- natural resource manager

Ocean Futures (Coastal and Marine Science), BS (GFSEACMSBS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

In the Bachelor of Science in ocean futures with a concentration in coastal and marine science, you study marine biology, ocean chemistry and ecosystems, as well as learn how the ocean interacts with the climate. This program also trains you in the skills of tech literacy, critical thinking and problem-solving that can be applied across a variety of impactful career fields.

You can dive into research on coral reefs, ocean dynamics and coastal ecosystems. Hands-on experiences and field work opportunities are available in Arizona, ASU's Bermuda Institute of Ocean Sciences (https://bios.asu.edu/), ASU's Center for Global Discovery and Conservation Science (https://globalfutures.asu.edu/gdcs/) in Hawai'i, or even a study abroad trip to Antarctica.

The BS in ocean futures with a concentration in coastal and marine science is designed to prepare you to be a part of the next generation of ocean innovators, leaders and stewards working to protect this blue planet.

Sustainability, BS (SUSUSTBS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

In the School of Sustainability, you tackle real-world challenges shaping the planet. Through hands-on projects, research with faculty and community engagement, you gain the skills and experience needed to create meaningful impact. The program emphasizes systems thinking and quantitative analytical skills.

If you love science and problem solving, the Bachelor of Science program in sustainability is for you. You dive into topics like sustainable energy, economics and ecosystem science, learning how to use data and systems thinking to create solutions for local and global challenges. You also build a strong foundation in science to explore how technology, policy and innovation can enhance environmental and social sustainability. You learn to understand and address complex sustainability challenges through a holistic, systems-based approach.

As a student in the program, you can be an active, engaged member of a community that helps drive ASU's No. 1 ranking for its impact in advancing the United Nations Sustainable Development Goals.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: SOS 211 - Calculus and Probability
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Innovation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Sustainability Solutions, MSUS

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

ASU students who would like to change their major to sustainability are required to have a minimum cumulative ASU GPA of 2.50, based on at least 12 credit hours of ASU coursework.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-sustainability/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=SUSUSTBS~null&college=CGF) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities available to them, students of all majors, including programs in the Rob Walton College of Global Futures, are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

The growing focus on sustainability is creating opportunities far beyond government and business. Careers now span nonprofits, community development, justice, equity and inclusion efforts. Roles include sustainability coordinators, managers and leaders.

Students can explore alumni employment data on theRob Walton College of Global Futures website to see where graduates are making an impact.

Graduates are highly valued by employers seeking people who can lead meaningful, long-term change. The program builds a strong foundation for graduate studies in both professional and academic fields.

Graduates leave with a deep understanding of complex systems across multiple disciplines. They excel in strategic thinking, stakeholder engagement and clear communication --- skills strengthened through coursework and hands-on experiences. Their ability to build strong teams and collaborate across diverse settings prepares them to create real, lasting change for the planet and society.

Sustainability, BA (SUSUSTBA)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

In the School of Sustainability, you learn the connection between people and the environment. Through hands-on= learning, research and community projects, you gain real-world experience and develop skills to make a difference.

The Bachelor of Arts program in sustainability focuses on the social and human dimensions of sustainability, including= how policies, cities and global systems shape the world. You study topics like governance, policy, urban systems and= international development while learning how to design solutions that balance environmental, economic and social= needs.

This program helps you understand and address complex sustainability challenges through a holistic, systems-based= approach. It trains you to be a catalyst of social and environmental change through systems thinking, problem analysis= and solution design.

You can be an active, engaged member of a community that helps drive ASU's No. 1 ranking for its impact in advancing= the United Nations Sustainable Development Goals.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Innovation), MGM

Global Management, Thunderbird School of

Global Management, BGM (TBTGMBGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix, Online

Program description

The Bachelor of Global Management program offers you two tracks: the international business, language and culture track, for which two years of foreign language is required, and the international business and culture track, with no foreign language requirement and greater emphasis on management-related courses. If you select the foreign language track, you may complete coursework in a variety of languages. The international business, language and culture track is offered to only if you are an on-campus student. If you are an online student, you may pursue only the international business and culture track.

You have the opportunity to explore the politics, cultures and economics of different countries around the world while putting the skills you've learned into practice in practical settings through a required international internship. Although you are strongly encouraged to pursue internships outside your home country, you may satisfy this requirement by doing a local internship with an international component.

You may choose to apply your electives toward a minor or certificate (https://degrees.apps.asu.edu/minors) offered by another department, enabling you to specialize in a second area of interest that complements your major. Electives may include areas such as communications, cybersecurity, data analytics, digital media, languages, nonprofit leadership, political science, psychology, public relations, risk management, sales and marketing, and sustainability.

You also complete a senior capstone project that draws on the skills you've developed throughout the program. In the capstone project, you work together in consulting teams to provide recommendations for a global organization on a challenge it faces internationally. The internship and the capstone project enable you to demonstrate your skills and work experience for potential employers as part of your professional development plan.

The BGM program is also offered in a flexible online format. You should visit the ASU Online website (https://asuonline.asu.edu/online-degree-programs/undergraduate/global-management-bgm/) for more information.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their careers in leadership and management within the global and digital landscape of today's interconnected world. ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate international business opportunities based on global entrepreneurship concepts.
- Apply cross-cultural communication strategies to interact effectively with diverse groups.
- Analyze data using critical thinking skills to make informed decisions.

Global opportunities

Global experience: As globalization continues to impact the way people live and work, international experiences (https://goglobal.asu.edu/) have become vital to success in every field of business, especially global management.

Through international study and internships, students gain skills employers highly value, including communication and interpersonal skills, flexibility, motivation, and a global perspective on business applications worldwide. Upon completing their required Thunderbird internship abroad, students thrive in leadership roles globally upon graduation.

Career opportunities

The global economy continues to face volatility and disruption as it expands, contracts and interconnects. Partly because of this, demand for specialists with a global mindset is rapidly increasing.

The BGM program prepares students to take on leadership roles in multinational corporations, government agencies or nongovernmental organizations. Students gain experience and develop skills that international companies, governments and nonprofit entities highly value in employees.

Graduates can thrive in leadership roles in the following fields:

- consulting
- entrepreneurship
- foreign service
- global marketing
- human resources

Career opportunities include:

- chief sustainability officer
- compliance manager
- country manager
- foreign service officer
- general manager
- global entrepreneur
- international marketing manager
- international sales manager
- manager of a nonprofit organization
- regulatory affairs manager

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze global trade contexts to support strategic decision-making in international markets.
- Apply cross-cultural communication strategies to interact effectively with diverse groups.

- Analyze data using critical thinking skills to make informed decisions.

Global opportunities

Global experience: As globalization continues to impact the way people live and work, international experiences (https://goglobal.asu.edu/) have become vital to success in every field of business, especially international trade. Through international study and internships, students gain valuable skills that employers are looking for, including communication and interpersonal skills, flexibility, motivation and a global perspective on how international trade functions worldwide.

Career opportunities

In the increasingly globalized economy, the dramatic expansion of international trade has created tremendous opportunities for global business, and Thunderbird's BS program prepares students for a career in this growing field, in which skilled managers are in demand all over the world. Trained negotiators with a strong grasp of economics and politics on an international level are more valuable than ever to employers operating across borders.

Thunderbird's rigorous curriculum and renowned faculty members prepare students for leadership positions in a wide variety of career fields. Graduates have the intercultural skills and global mindset needed to do business or take on leadership roles in any part of the world. Graduates of this program have mastered a repertoire of globally transferable skills that open doors to an abundance of opportunities, including these positions:

- commodities broker
- compliance manager
- financial risk specialist
- import and export agent
- international business development manager
- international market analyst
- international product or brand manager
- regional manager

Health Solutions, College of

Applied Nutrition and Health, BS (NHFNUENBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

The Bachelor of Science program in applied nutrition and health introduces you to nutrition principles, along with= essential skills in communication, leadership and community engagement, to develop and apply innovative solutions to= health concerns across populations.

Coursework explores the fundamentals of nutrition, such as macro- and micronutrients and developing nutrition care= plans. You develop a deep understanding of more specialized topics such as cultural aspects of food and health, food= and health policy, food safety and food sustainability. This curriculum prepares you to apply your nutrition expertise to= a variety of careers. You also engage in experiential learning with community partners specializing in food and nutrition= to gain practical experience, develop professional relationships and establish a foundation for your future goals.

You select from one of three focus areas that align with your interests and professional goals: community nutrition,= food service operations, or pre-dietetics. In community nutrition, you delve into strategies for promoting health and= wellness within communities. Through evidence-based social media efforts, you address critical public health issues.= Food service operations courses teach principles of management, strategy, supply chain management and= entrepreneurship in food and nutrition. If you are interested in becoming a registered dietitian, the pre-dietetics focus= offers the additional science and leadership courses required for dietetics-focused graduate programs.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Medical Nutrition, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply
(https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/food-and-nutrition-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHFNUENBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Communicate evidence-based food and nutrition information and basic food science information in oral and written form.
- Apply the principles of food management and systems in the provision of food and nutrition services to individuals and organizations.
- Explain improvements in a food preparation workplace using the tenets of food safety.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, applied nutrition and health students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in applied nutrition and health.

Career opportunities

Graduates are prepared for careers in:

- community nutrition and public health
- management of food service and sustainable food systems
- marketing and development of food products
- nutrition consulting
- nutrition and health communication and promotion

Graduates with the pre-dietetics focus are eligible to apply to a graduate program in dietetics that prepare them to take= the registered dietitian exam.

Graduates also have the capability to launch startups and businesses focused on individual practice, consulting, and= new product and service development.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Applied Science (Applied Nutrition and Health), BAS (ECNTRBAS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

Through the Bachelor of Applied Science program with a concentration in applied nutrition and health, you gain= practical knowledge and specialized skills necessary to promote health and wellness through nutrition within= communities. If you're aspiring to become a registered dietitian, you may customize your experience to prepare for= dietetics-focused graduate programs.

The program is specifically designed for students who have earned an Associate of Applied Science degree from a= regionally accredited institution and who wish to further their education through a nutrition-focused bachelor's degree= program.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree. This program is not available to first-year students.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Only students who have completed an AAS degree are eligible to declare BAS majors at ASU.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/applied-science-nutrition/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ECNTRBAS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Communicate evidence-based food and nutrition information and basic food science information in oral and written form.
- Identify and explain improvements in a culinary workplace using the tenets of food safety.
- Apply the principles of food management and systems in the provision of food and nutrition services to individuals and organizations.

Global opportunities

Global experience: Food is at the center of culture. Studying abroad (https://goglobal.asu.edu/) helps students gain a deeper understanding of how food and culture intertwine, and they learn how to communicate nutritional and sanitary standards to a diverse audience.

Students' resumes are enhanced with the heightened communication, cultural competency and critical thinking skills they acquire through study abroad.

The College of Health Solutions recommends these study abroad programs (https://goglobal.asu.edu/students/major/chs/nutrition) for students majoring in applied nutrition and health.

Career opportunities

Graduates are prepared for careers in food service management and marketing, nutrition education, nutrition and health communication, community nutrition and public health, and nutrition consulting. With additional education or professional training, graduates may also become credentialed as:

- certified dietary managers
- registered sanitarians
- school food service and nutrition specialists

Applied Science (Health Sciences), BAS (NUHSCBAS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Polytechnic, West Valley, Online

Program description

If you have earned an Associate of Applied Science from a regionally accredited institution and wish to further your= education through a health-focused bachelor's degree program, the Bachelor of Applied Science program with a= concentration in health sciences is designed for you.

You learn about health care systems and how these systems are financed and structured. Leadership and= professionalism are highlighted, along with the role of providers in delivering evidence-based care.

You develop ethical and effective communication skills, analyze today's challenges and develop innovative solutions= that prepare you for careers in the health care workforce.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 114 - College Mathematics

Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree. This program is not available to first-year students.

Transfer admission requirements: The BAS program is specifically for those who have earned an Associate of Applied Science degree from a regionally accredited institution. Students pursuing this degree may have more than 60 credit hours to complete in order to obtain their Bachelor of Applied Science following transfer to ASU. In completing the bachelor's degree program, students fulfill all ASU graduation requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Only students who have earned an AAS are eligible to change their major to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-applied-science-health-sciences/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUHSCBAS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate health care systems and their role in influencing health outcomes.
- Understand the role and scope of health care professions in providing evidence-based care.
- Apply interpersonal professional skills required to work within a healthcare-related organization.

Global opportunities

Global experience: With more than 300 programs available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students in health sciences are able to expand their knowledge of how health care impacts society in a variety of cultures, and experience new and distinct health environments across the globe. The valuable experience that students acquire while studying abroad enhances their resume.

More information on available programs can be found on the Global Education Office website (https://goglobal.asu.edu/).

Career opportunities

Graduates may continue their area of expertise in allied health (e.g., radiology, nuclear imaging) and qualify for a managerial position, work as an educator or instructor within their field of expertise, or attain a higher-grade position within their current place of employment.

Other career options include positions such as:

- community nutrition aide for the Women, Infants, and Children program, known as WIC
- elder services program coordinator
- health maintenance organization or insurance company client coach
- health and patient educator
- Healthy Start coordinator
- home health care coordinator
- long-term care health and wellness coordinator
- school health and program specialist

Applied Science (Medical Laboratory Science), BAS (NUMLSBAS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

The Bachelor of Applied Science degree program with a concentration in medical laboratory sciences enables you to= perform analytical tests on blood, tissue and body fluids in order to provide laboratory information for the detection,= diagnosis and treatment of human diseases.

You learn to work independently using skills and knowledge that are greater in depth and breadth compared with= those of medical laboratory technicians, who are typically graduates of a two-year or community college program.= Receiving a BAS in medical laboratory science is possible through two distinct pathways: the online professional

program or the Phoenix College partnership with ASU. Either way, you are eligible to sit for a national certification examination for MLS credentials.

Online professional program
The traditional medical laboratory science program coursework is offered 100% online if you're currently working as a medical laboratory technician in the field. The program has one start date per year in fall and may be completed in two years. You're required to have existing employment in a laboratory setting, with permission from your employer to perform practical assignments at work. You're responsible for identifying and obtaining laboratory placement as well as completing necessary affiliation agreement requirements.

Phoenix College partnership program
The Phoenix College partnership pathway is offered both in person at Phoenix College and via asynchronous coursework. You can gain admission to this program through a competitive application process. Once admitted, you complete your laboratory practicums through ASU contracted sites.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Science: https://www.naacls.org (https://www.naacls.org/); 5600 N. River Rd, Suite 720, Rosemont, IL 60018; (773) 714-8880.

Recent program outcomes include:
In 2023, the program had a graduation rate of 100%, a certification exam pass rate of 82%, and a job placement rate of 94%.
In 2024, the program had a graduation rate of 100%, a certification exam pass rate of 79%, and a job placement rate of 94%.
In 2025, the program had a graduation rate of 100%, a certification exam pass rate of 75%, and a job placement rate of 90%.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:

Online professional program
Applicants must show evidence of the following criteria in order to be admitted to this pathway:
• Associate of Applied Science degree in medical laboratory technician
prerequisite coursework with a grade of "C" or higher; ASU equivalents in parentheses
• College Algebra or higher (MAT 117 or higher)
• General Biology I with Lab (BIO 181)
• General Biology II with Lab (BIO 182)
• General Chemistry I with Lab (CHM 113)
• General Chemistry II with Lab (CHM 116)
• Human Anatomy and Physiology (BIO 160 or 201)
• Medical Terminology* or comparable course (CHS 260)
• Microbiology with Lab (MIC 205/206)
• Organic Chemistry with Lab (CHM 231/235)
• two years of experience working in medical lab sciences or MLT certification
• verification statement or letter of intent from current lab facility employer to host practicum or clinical rotations

*The medical terminology prerequisite may be waived for those with a previous degree in a science concentration or experience in the medical field.

Applicants to the online program are encouraged to submit their application by July 15 to ensure adequate time for review prior to the start of the term.

Phoenix College partnership program
Students who have been admitted through Phoenix College and who have completed the prerequisite coursework, verified by the program director or program advisor, are eligible to apply to this program. The following requirements are a part of the application process and are included in the separate program application, which is released to those who are considered eligible during a specified application cycle:
• Gain admission to Phoenix College.
Complete the program application, which should include:
• student information
• coursework
• immunizations
• proof of basic life support or CPR certification
• background check
• health declaration
• experience in medical laboratory sciences
• employment observation verification
• references
• Review and sign the checklist.
Submit the materials to:

Jeff Wolz - PC/ASU MDL Program
HE Building #359
1202 W Thomas Rd
Phoenix AZ 85013

• Apply to Arizona State University.

Applications for the immersion program are accepted between July and September. Applicants are encouraged to submit their applications by September 1.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students who wish to change their major must meet the admission requirements for the program. Interested students should consult with their academic advisor to review eligibility, prerequisite coursework and the application process for either the online professional program or the Phoenix College partnership program. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUMLSBAS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze patient specimens in the area of immunohematology/antibody identification using various testing procedures
- Will adhere to laboratory protocols in the clinical chemistry area to identify proper quality control and patient values.
- Identify the clinical significance of various microbiology culture results with accurate patient workups and result reporting.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, applied science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for advanced employment opportunities within the fields of medical technology, cytology, clinical laboratory science and related areas.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Biomedical Informatics and Data Science, BS (ESBMIBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in biomedical informatics and data science empowers you to harness data and analytics, including machine learning and artificial intelligence, to advance health care and biomedical innovation. You are immersed in a broad, interdisciplinary curriculum spanning computer science, biology, health systems and data analytics --- all of which are necessary to work at the forefront of precision health, digital health, biotechnology and public health innovation.

The program blends computational, biological and digital health sciences to give you a strong foundation in algorithm development, data integration, software development and predictive modeling. You gain hands-on experience with AI tools, data science methods and digital health software to monitor health in real time, detect critical health events, predict symptoms and forecast impending adverse outcomes at individual and population levels.

You develop critical skills in:

• data acquisition and analysis: gathering, processing and gaining insight from biomedical data
• data management: understanding how to organize and maintain vast amounts of health information
• knowledge representation: transforming complex data into understandable and usable formats
• modeling and machine learning: using advanced algorithms to predict health trends and inform clinical decisions

You also have the opportunity to conduct next-generation research with faculty experts in areas such as bioinformatics, AI, clinical informatics, medical imaging and population health, preparing you to address practical health challenges.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biomedical Informatics and Data Science, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESBMIBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Articulate informatics solutions to improve patient care.
- Implement existing informatics solutions to improve patient care.
- Analyze large data sets to improve decisions for patient care or population health.
- Implement informatics solutions to represent and manage biomedical data

Global opportunities

Global experience: Students gain valuable experience when studying abroad (https://goglobal.asu.edu/) --- experience that enhances their resumes. With more than 300 programs available, Global Education programs enable students to tailor their experience to their specific interests and skill sets. Students in biomedical informatics are able to expand

their knowledge of how health care systems impact society in a variety of cultures, and they experience new and distinct information science and technology environments across the globe.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in biomedical informatics and data science.

Career opportunities

Whether they want to improve patient care, develop new medical technologies or contribute to public health initiatives, graduates with a degree in the rapidly expanding field of biomedical informatics and data science are prepared for careers in a wide variety of settings.

They are employed in positions such as:

- bioinformatician
- data science analyst
- public health informatics scientist
- software engineer

Those with interests in life sciences and technology may see this program as an innovative way to combine the two. Others may use this degree as the first step toward medical school, a career in advanced medical research or graduate-level study in biomedical informatics.

Clinical Exercise Science, BS (ECEXERBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

In the Bachelor of Science program in clinical exercise science, you develop a detailed understanding of how the human body responds to and benefits from exercise.

This program prepares you for an artificial intelligence-integrated health care future by combining practical training with next-generation technology. You learn to use AI tools to support data analysis and to streamline repetitive tasks while developing the interpersonal skills, problem-solving abilities and clinical judgment that technology can't replace.

Hands-on laboratory courses with innovative exercise, metabolic and cardiopulmonary equipment provide you with the skills and experience you need to change lives through exercise.

This program is accredited through the Commission on Accreditation of Allied Health Education Programs (https://www.caahep.org (https://www.caahep.org/)) and endorsed by the American College of Sports Medicine.

Recent program outcomes include:
In 2025-26, the program had a graduate satisfaction rate of 100% and a graduate positive placement rate (employed within the field, pursuing graduate school, or engaging in military service within 12-months after graduation) of 89%.
In 2024-25, the program had a graduate satisfaction rate of 100% and a graduate positive placement rate of 83%.
In 2023-24, the program had a graduate satisfaction rate of 100% and a graduate positive placement rate of 88%.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Clinical Exercise Physiology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ECEXERBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and

resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply mathematical skills related to bioenergetics and exercise intensities.
- Apply the principles guiding evidence-based practice learned through the appraisal of scientific literature.
- Create exercise prescriptions for healthy clients and clients with chronic conditions.
- Apply professional competencies (i.e., job-related skills) commonly required in the fitness industries.
- Apply concepts of basic human anatomy and physiology as they relate to exercise.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, clinical exercise science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in clinical exercise science.

Career opportunities

Graduates enter areas such as exercise physiology, physical therapy, occupational therapy and athletic training, where human-centered expertise and complex decision-making remain essential and least impacted by automation. They are prepared for a career as an exercise physiologist, a versatile occupation with a faster than average growth rate, according to the U.S. Bureau of Labor Statistics (https://www.bls.gov/ooh/healthcare/exercise-physiologists.htm).

Graduates may obtain positions as clinical exercise specialists, exercise scientists or weight management consultants in settings such as:

- cardiac rehabilitation facilities
- corporate wellness firms
- health care agencies and medical centers
- hospitals
- lifestyle and weight management consulting firms
- medical fitness centers
- nonprofit disease prevention agencies (e.g., American Heart Association)
- outpatient fitness centers
- university fitness and wellness centers

Specialty areas may include:

- bariatric weight loss (counseling and pre- or postsurgery fitness training)
- cancer rehabilitation
- cardiac rehabilitation
- corporate fitness and worksite wellness
- exercise and weight counseling and management

Graduates are well prepared for admission to graduate programs in clinical exercise physiology, athletic training, obesity prevention and management, rehabilitative fields (e.g., physical therapy, occupational therapy) and medicine.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for

licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Dietetics, BS (NHDIETCSBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in dietetics provides a comprehensive foundation for you to become a registered dietitian. This program blends coursework in anatomy, physiology, chemistry and nutrition. You are equipped with the knowledge to promote health through dietary interventions and readied for diverse roles in health care.

Crucially, you are prepared to apply for a dietetic internship and related master's degree programs, both of which are required by the Commission on Dietetic Registration to sit for the registration exam. More information can be found on the Academy of Nutrition and Dietetics website at https://www.eatright.org/become-an-rdn (https://www.eatright.org/become-an-rdn).

This program is accredited as a Didactic Program in Dietetics by the Accreditation Council for Education in Nutrition and Dietetics, 120 S. Riverside Plaza, Suite 2190, Chicago IL 60606-6995; phone: 800-877-1600, ext. 5400; https://www.eatrightpro.org/acend (https://www.eatrightpro.org/acend). More information about the Didactic Program in Dietetics is available in the student handbook (https://chs.asu.edu/dpd-handbook).

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.
- Use the Nutrition Care Process to make decisions, identify nutrition-related problems and determine and evaluate nutrition interventions.
- Apply management theories to the development of programs or services.
- Demonstrate effective and professional oral and written communication and documentation.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, dietetics students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in dietetics.

Career opportunities

The nutrition and dietetics field provides graduates with employment opportunities in a variety of areas:

- client consultation, including for diabetes management or weight loss education
- food and nutritional product development
- food and nutrition marketing and sales
- nutrition and health promotion
- pediatric and geriatric settings
- public health
- school food service

Graduates may find opportunities in hospitals and other health care facilities or public health agencies.

Most graduates of this program pursue further education and credentials such as:

- registered dietetic technician
- registered dietitian or nutritionist
- school nutrition specialist

These credentials provide further job opportunities in clinical, community and food service settings listed above.

Health Care Administration and Policy, BS (NHHCDBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

In the Bachelor of Science program in health care administration and policy, you examine the design of health care= systems, processes, leadership, quality improvement and management. This expertise empowers you to become a part= of the next generation of leaders who optimize health care delivery and enhance health outcomes for all.

You acquire foundational knowledge of health care administration and health policy with a focus on leadership,= economics, finance, social drivers of health, informatics and systems engineering. The multidisciplinary faculty,= comprising tenure-track and clinically trained professionals, collaborate to create, teach and share knowledge with you= in the program.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Management, MGM

Health Care Administration and Policy, MS

Biostatistics, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-health-care-admin-policy/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHHCDBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Implement effective leadership and management strategies to enhance performance of the health care workforce.
- Critically analyze public and population health structures and frameworks through the lens of socio-cultural factors and diverse cultural perspectives to enhance healthcare delivery.
- Analyze data and processes to improve outcomes in population health.
- Analyze how policy and economics influence professional health service delivery.

Global opportunities

Global experience: Studying health care administration and policy abroad (https://goglobal.asu.edu/) enables students to develop valuable skill sets. Being exposed to distinct health environments, learning culturally specific health approaches, and improving intercultural communication skills help prepare students to lead, giving them an advantage in their professional careers.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in health care administration and policy.

Career opportunities

Opportunities for graduates include entry-level positions in health care administration, hospital management, program management, policy, advocacy, system design, quality improvement and health services research.

Graduates may pursue further education through graduate programs in areas such as health care delivery, population health, data science, administration and management.

Health Education and Health Promotion, BS (NHHEHPBS)

College/School: College of Health Solutions

Campus: Online

ASU is no longer accepting new students to this program. Students interested in this program should apply to the Health Sciences (Healthy Lifestyles and Fitness Science), BS, which has a health education and health promotion track.

Program description

In the Bachelor of Science program in health education and health promotion, you learn how to improve health outcomes and prevent chronic and infectious disease. You develop an understanding of how to help communities advocate for healthier environments and champion health equity. You learn to plan, implement, manage and evaluate health promotion programs.

You can specialize your knowledge in areas such as:

• body image and wellness
• climate and health
• diabetes prevention
• emergency preparedness
• HIV and substance abuse prevention
• school health
• sexual health
• social media and health

• violence prevention

After you graduate, you'll be eligible to sit for the certified health education specialist exam through the National Commission for Health Education Credentialing (https://www.nchec.org (https://www.nchec.org/)). This is a globally recognized credential for health professionals. The health education and health promotion program rigorously prepares you for the CHES exam.

persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in health education and health promotion.

Career opportunities

The need for health education specialists, or health educators, has never been more critical than it is today.

Health education specialists can work with nonprofit organizations, tribal nations, schools, hospitals, clinics, businesses and government agencies. Graduates can hold an assortment of roles, such as program evaluator, patient education coordinator, public information specialist and grant writer.

Common job titles include:

- community health educator
- community outreach coordinator
- prevention specialist
- wellness coordinator

Professional licensure

Health Sciences, BS (NHHSCBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Polytechnic, West Valley, Online

Program description

In the Bachelor of Science program in health sciences, you learn about health care systems and how systems are= financed and structured. The role of providers in delivering evidence-based care is highlighted, along with the= development of skills in leadership, professionalism, effective communication and ethical conduct. Modern challenges= are analyzed, enabling you to work on developing innovative solutions.

You focus your learning in one of the following areas:

• community-based health outcomes
• health legislation and regulation
• health and media
• integrative care
• mental and behavioral health

A limited number of students each year may apply to pursue the echocardiography certificate through Mayo Clinic after taking prerequisite courses. Following certificate completion, you may apply the credits to the bachelor's degree in health sciences. If you're interested, you should seek advising before starting coursework.

Second language requirement: No
STEM-OPT extension eligible: No

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Understand the role and scope of health care professions in providing evidence-based care.
- Assess the role of domestic and global health care systems in influencing health outcomes for a given population.
- Apply interpersonal professional skills required to work within a healthcare-related organization.

Global opportunities

Global experience: Study abroad (https://goglobal.asu.edu/) provides health sciences students with the opportunity to develop valuable skills, such as flexibility and communication, that can give them an advantage in their professional career. Students gain personal enrichment through exposure to distinct health environments, where they learn culturally specific health approaches and much more.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in health science.

Career opportunities

Graduates are prepared to continue their education in graduate or professional school or to enter the health field or health care workforce in a variety of capacities, including indirect patient, direct patient and community care roles.

Career opportunities include:

- community nutrition aide for the Women, Infants, and Children program, known as WIC
- elder services program coordinator
- health maintenance organization or insurance company client coach
- health and patient educator
- Healthy Start coordinator
- home health care coordinator
- long-term care health and wellness coordinator
- school health and program specialist

Graduates also may choose to pursue advanced degree programs in various discipline-specific health and medical= fields.

Health Sciences (Healthy Lifestyles and Fitness Science), BS (NUHSCHLCBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

The Bachelor of Science in health sciences with a concentration in healthy lifestyles and fitness science blends multidisciplinary coursework with practical training, providing you with a strong foundation in promoting healthy lifestyles. You gain expertise in nutrition, fitness, stress management, substance abuse prevention, behavior change, health coaching and health promotion program management.

You are equipped to make a meaningful impact on individual and community health, addressing challenges related to social determinants of health.

The program offers three academic tracks that prepare you for nationally accredited certifications:

Fitness science: You learn to assess clients and create personalized exercise programs to optimize health. Courses cover physical activity planning, exercise prescription, body image, wellness and injury risk assessment. This track prepares you for a personal training certification exam through the American College of Sports Medicine (https://www.acsm.org (https://www.acsm.org)).

Health education and health promotion: You develop, lead and evaluate health education and health promotion programs, addressing topics such as diabetes prevention, sexual health, emergency preparedness, digital health communication and stress management. This track prepares you for the Certified Health Education Specialist exam administered by the National Commission for Health Education Credentialing (https://www.nchec.org (https://www.nchec.org)).

Health and wellness coaching: You learn behavior change strategies and motivational interviewing techniques to support clients in developing healthy lifestyle plans. This track prepares you for the National Board Certified Health and Wellness Coach exam through the National Board for Health and Wellness Coaching (https://nbhwc.org (https://nbhwc.org)).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Medical Nutrition, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply evidence-based concepts to promote healthy lifestyles.
- Integrate ethical standards in all aspects of health promotion.
- Design comprehensive health promotion programs to meet the health needs of individuals and communities.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, nutritional science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, expanding their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in health sciences with a concentration in healthy lifestyles and fitness science.

Career opportunities

According to the U.S. Bureau of Labor Statistics, employment for health coaches and health educators is projected to grow a steady 4% between 2024 and 2034.

Health, wellness and fitness coaches work in a multitude of professional environments. Specialty areas may include bariatric weight loss clinics, healthy lifestyle behavior counseling and management, and corporate fitness and worksite wellness.

Health educators work in a variety of professional environments. Specialized placement may include working for government agencies such as the Arizona Department of Health Services, national organizations such as the American Diabetes Association, and public and private education sectors such as university health and wellness centers.

The globally recognized credentials available through this program open doors to careers in health education, promotion and coaching worldwide and create a long-term pathway to becoming a certified diabetes care and education specialist (https://www.cbdce.org) or a lifestyle medicine professional (https://lifestylemedicine.org/certification).

Career options include positions such as:

- community health educator
- community nutrition aide for the Women, Infants, and Children program, known as WIC
- community outreach coordinator
- corporate wellness coordinator
- fitness center director
- health education specialist (program developer)
- health and patient educator
- personal trainer
- prevention specialist
- school health and nutrition program specialist
- worksite wellness coach or coordinator

Graduates are also well prepared for admission to graduate programs in health promotion, population health, lifestyle management, integrative health, health administration, psychology and medicine.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Health Sciences (Pre-professional), BS (NUHSCPREBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Interested students should apply to the BS in medical studies.

Program description

The Bachelor of Science program in health sciences provides you with the academic knowledge and skills you need to move directly into a range of employment opportunities within the health field or to continue your education in discipline-specific programs.

The preprofessional program is for you if you are planning to enter medical, dental, osteopathic, physical therapy, veterinary, pharmacy and similar professional schools. In addition to a comprehensive core of basic science courses, the concentration is unique in that it provides you with a solid base in ethics; communication; the evaluation of research (the cornerstone of evidence-based practice); and healthy lifestyles (the foundation of health promotion and chronic disease risk reduction avenues of health care), including the role of complementary and alternative care within the U.S. health care system. You have the ability to incorporate electives that contribute to your knowledge of and sensitivity to the needs of populations impacted by health disparities.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUHSCPREBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available, health sciences students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for entrance into an advanced degree program in the medical field. Their immediate employment opportunities include:

- clinical research coordinator
- health officer
- sales and marketing representative (pharmaceutical or medical device companies)

International Public Health, BIPH (NHIPHBIPH)

College/School: College of Health Solutions

Campus: Online

Program description

The Bachelor of International Public Health program is designed to build and strengthen the international public health workforce.

Aligned with U.S. accreditation standards in public health, the program teaches new approaches to:

• communicable disease prevention, control and surveillance
• environmental and occupational health
• global health systems and management
• health promotion and education
• public health issues and solutions
• public health policy

You develop a holistic, equitable, ethical and sustainable approach to public health practice, collaborating with diverse stakeholders to create and implement strategies to ensure health for all.

You engage in evidence-based practice and community collaboration, preparing you to work across sectors, cultures and borders to design effective, culturally responsive and sustainable strategies that advance health equity and improve public health on a global scale.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-international-public-health/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHIPHBIPH~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Critically analyze health challenges and develop context-relevant solutions that protect and promote health in diverse communities.
- Incorporate a holistic approach to public health practice, by being able to collaboratively implement strategies that ensures health for all.
- Incorporate principles of public health including equitable, ethical, and sustainable development within their public health practices.
- Locate, assess, analyze, and effectively communicate public health information to diverse audiences.
- Engage professionally by having the foundation for lifelong learning, innovation, and leadership.

Global opportunities

Global experience: Through study abroad, international public health students have the opportunity to gain exposure to culturally specific health approaches and community-based opportunities and to learn about distinct health environments and differences in the human condition worldwide.

With more than 300 options available, whether in a foreign country, in the U.S. or online, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their specific interests and skill sets.

Career opportunities

The most recent report of the United Nations High-Level Commission on Health Employment and Economic Growth described the importance of a global workforce that will support the creation of 40 million new jobs by 2030,

particularly in low- and middle-income countries. Critical needs include global health policy, data and informatics, quality and process improvement, ethics, economics and community-based care.

Potential career titles include:

- environmental health specialist
- epidemiologist
- program coordinator
- program evaluator
- program manager
- program officer
- public health analyst
- public health scientist
- research associate

Commonly cited hiring organizations include the Peace Corps, the Centers for Disease Control and Prevention, the= United Nations Children's Fund, other nongovernmental organizations, and state and federal agencies.

Kinesiology, BS (NUKINBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

The BS/MS accelerated option for this program is not currently available to ASU Online students.

Program description

The Bachelor of Science program in kinesiology offers you an in-depth exploration of how the human body moves and= functions, with a strong focus on health and performance.

This program provides you a comprehensive and scientifically inclusive curriculum that covers the mechanical,= anatomical, neural, developmental, physiological and psychological aspects of human movement. In the program, you= complete the required coursework needed for many health professional schools, ensuring a strong foundation for= advanced study.

The rigorous coursework is complemented by hands-on opportunities to work directly with faculty members on= research projects, in labs, as teaching assistants or through independent study experiences.

With access to practical opportunities and the ability to tailor elective coursework to specialty areas, you are well= prepared to contribute to the fields of health and human performance, whether you choose to enter the workforce or= pursue further education.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Clinical Exercise Physiology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/kinesiology-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUKINBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply biomechanical principles to the understanding and explanation of human movement.
- Apply principles of motor behavior to the understanding and explanation of human movement.
- Demonstrate the ability to synthesize data to make evidence-based practice decisions.
- Apply psychological principles to the understanding and explanation of human movement.
- Apply physiological principles to the understanding and explanation of human movement.

Global opportunities

Global experience: Professional health education is competitive. Fewer than 50% of the students who apply to medical schools are admitted, and there are four applicants for every seat in physician assistant programs. Medical and professional school admissions increasingly focus on students with dedication to community service, so engaging in community activities and research abroad helps any student who plans a career in a health field to create a diverse, accomplished portfolio.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, kinesiology students have the chance to experience distinct health environments, practice alternative approaches to health care, and witness the human condition in a global context. Opportunities also exist for hands-on research and community-based service, which can prepare students to lead in a future-focused career. Kinesiology students gain cultural competency, language skills and vital leadership experience while studying abroad.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in kinesiology.

Career opportunities

Graduates with a degree in kinesiology are prepared for graduate study that can lead to a variety of clinical and research occupations, including:

- allopathic, osteopathic or naturopathic physician
- athletic trainer
- biomechanist
- chiropractor
- clinical exercise physiologist
- occupational therapist
- orthopedic surgeon
- physical therapist
- physician assistant
- prosthetist or orthotist

Medical Studies, BS (NHMEDBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Polytechnic, West Valley, Online

Program description

The Bachelor of Science program in medical studies enables you to meet the prerequisites for medical and professional= school. This program also prepares you for required postgraduate entrance exams, including the revised MCAT.

You can customize the medical studies degree to meet the prerequisites of the health professions programs to which= you intend to apply. In addition, you have the opportunity to learn directly from health care providers who are currently= practicing in the field, and you can select clinically related internships or electives during your junior year.

This degree program integrates evidence-based research, communication, ethics, critical thinking, teamwork and= leadership --- all essential competencies for members of today's health care teams.

Because of the high volume of overlap in curriculum, if you are enrolled in this degree you are not permitted to declare= a concurrent degree combination with certain majors, such as the BS in biological sciences, including the following= concentrations: biomedical sciences; genetics, cell and developmental biology; and neurobiology, physiology and= behavior.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Health Care Administration and Policy, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/medical-studies-bs-premed/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHMEDBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply the communication skills required to deliver effective patient-centered health care.
- Formulate decisions in accordance with ethical, legal, and philosophical principles of the healthcare profession in assigned projects.
- Analyze the health consequences of chronic disease, social determinants of health, and the overall impact on population health.
- Create a portfolio representing their experience and accomplishments in preparation for employment or graduate studies.

Global opportunities

Global experience: Professional health education is competitive. Fewer than half of students who apply to medical schools are admitted, and there are four applicants for every seat in physician assistant programs. Medical and professional school admissions increasingly focus on students who are dedicated to community service, so engaging in community activities and research abroad will help any student pursuing a health career to create a diverse, accomplished portfolio.

Students pursuing medical studies who study abroad can advance their cultural awareness, medical experience and global health understanding. Global Education programs (https://goglobal.asu.edu/) expand students' knowledge of culturally specific health approaches while helping them develop strategies to adapt to distinct social circumstances.

Study abroad is a chance to fine-tune communication, critical thinking and leadership capabilities while taking advantage of opportunities for research, internships and service.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in medical studies.

Career opportunities

Graduates are equipped with a diverse set of applicable skills for a number of exciting careers in the allied health fields, education, government, health care industries and nonprofit organizations.

Opportunities include these positions:

- community health worker
- project coordinator
- research assistant
- sales or marketing representative (e.g., medical device or pharmaceutical industry)

Graduates also are well prepared to pursue postgraduate health degrees in areas such as:

- dentistry
- medicine (Doctor of Medicine, Doctor of Osteopathic Medicine and naturopathic)
- occupational therapy
- optometry
- pharmacy
- physician assistant training

Further study can result in a career as a:

- chiropractor
- dentist
- naturopathic physician
- optometrist
- pharmacist
- physician
- physician assistant
- podiatrist
- public health professional

Nutrition, BS (NHNTRBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

ASU is no longer accepting new students to this program. Students interested in nutrition should apply to the Food and= Nutrition Entrepreneurship BS program.

Program description

The Bachelor of Science program in nutrition includes exploration of important emerging topics, including developing= an evidence-based online presence through social media, blogging and podcasting; creating stand-alone businesses in

nutrition, such as individual practices and consulting programs; and entrepreneurship in the food industry through development of new products and services.

Experiential learning is integrated into the program's curriculum; students have opportunities to work with external stakeholders and community partners specializing in food and nutrition entrepreneurship to gain applicable experience, develop professional relationships, and establish a foundation and direction for their future careers.

This program prepares students to work in the expanding field of food- and nutrition-related entrepreneurial ventures and program initiatives. Graduates are poised to meet within food and nutrition industries the demand for the application of valid nutritional concepts.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MA designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: In the field of nutrition, global experiences (https://goglobal.asu.edu/) can expose students to unique health environments and expand students' knowledge of culturally specific health approaches. Students gain a deeper understanding of how food and culture intertwine and how to communicate nutritional and sanitary standards to a diverse audience. Students' resumes are enhanced with the heightened communication, cultural competency and critical thinking skills they acquired through study abroad.

The College of Health Solutions recommends these study abroad programs (https://goglobal.asu.edu/students/major/chs/nutrition) for students majoring in nutrition.

Career opportunities

Nutrition graduates are prepared for careers within companies looking to innovate, in the delivery of products and services, in research and development, in management of food service and sustainable food systems, and in nutrition and health communication and promotion. They have the capabilities to launch startups and businesses focused on individual practice, consulting, and new product and service development. There are a wide array of career opportunities available for graduates of this program.

Nutrition (Dietetics), BS (ECNTRDBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Interested students should apply to the BS in dietetics.

Program description

The Bachelor of Science program in nutrition with a concentration in dietetics prepares students with the required coursework and skills they need in order to apply for a dietetic internship, which is required before they can sit for the registration exam to become a registered dietitian, which is a food and nutrition expert. In addition to a core of professional nutrition courses, students complete a broad range of science, management and communication classes. The program emphasizes the application of nutrition within clinical, community, food production and wellness areas.

More information about this credential and the requirements for this credential can be found at https://www.eatrightpro.org/acend (https://www.eatrightpro.org/acend).

ASU's bachelor's degree program in nutrition with a concentration in dietetics is accredited as a Didactic Program in Dietetics by the Accreditation Council for Education in Nutrition and Dietetics, 120 S. Riverside Plz., Ste. 2190, Chicago IL 60606-6995, phone: 800-877-1600, ext. 5400.

Nutritional Science, BS (NHNUSCIBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in nutritional science provides a comprehensive foundation in nutrition, biology, chemistry and anatomy --- core areas crucial for understanding the body's functions and developing strategies to maintain and improve health. In this program, which includes specialized courses in integrative and functional health, you learn how to design personalized health interventions across the life span.

The curriculum equips you with the knowledge and skills to prevent and treat health conditions through nutrition, making it an ideal foundation if you plan to pursue medical school, dental school, pharmacy school or other advanced health professions.

Hands-on learning is emphasized through a research capstone in which you work closely with experienced nutrition faculty. This experience not only deepens your understanding but also enhances your applications to graduate programs.

You also develop essential skills in leadership, teamwork, communication and critical thinking, preparing you for diverse careers in health or further studies in nutrition and related fields.

If you're interested in becoming a registered dietitian (commonly termed RD), you're encouraged to apply to the BS in dietetics (https://degrees.apps.asu.edu/bachelors/major/ASU00/NHDIETCSBS/dietetics).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHNUSCIBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will be able to interpret scientific literature to make evidence-based conclusions for the general public.
- Students will be able to assess clinical and scientific data to make individual and community intervention or research implementation decisions.
- Students will communicate food and nutrition information by reflecting on information and evaluating ethics of different approaches.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, nutritional science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in nutritional science.

Career opportunities

Graduates can find job opportunities in medicine, clinical and life sciences research, molecular and cellular biology, industry research and development, dentistry and pharmacy.

In completing this program, graduates meet the prerequisites for medical and professional school. Graduates can go on to study:

- dentistry
- medicine (Doctor of Medicine, Doctor of Osteopathic Medicine, Doctor of Naturopathic Medicine)
- nutrition and related fields
- optometry
- pharmacy

Graduates are also prepared to enter physician assistant programs.

Population Health, BS (NHPOPHLBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, West Valley

ASU is not currently accepting applications for this program. Interested students should apply to the BS in Public Health= program.

Program description

In the Bachelor of Science program in population health, you learn how social determinants of health, access to care,= and infrastructure influence the health of defined groups. You also gain understanding of how community and= professional stakeholders work across systems to improve health.

The multidisciplinary program features many modes of learning to enable and empower you. One is experiential= learning, including your engagement as a citizen scientist, to better understand population health. The program= provides training in biomedical informatics, economics, social determinants of health, program and community= assessment, program planning and health care delivery. This education leaves you well equipped to enter a growing= field.

In the program, you can choose a track tailored to your professional interests. This allows you to customize your= learning by focusing on health care compliance, health education, environmental systems, health systems design and= improvement, or health informatics.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=NHPOPHLBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Locate informatics and knowledge management technology in ethical ways to summarize data and information relevant to population health.
- Explain the role that social determinants of health, as reflected in the diversity of individuals and groups (e.g. culture, language, health status, literacy), has on the nature of civil discourse and its influence of policies, programs, services, and the health of populations.
- Identify and examine health-related organizational structures and functions in a community and contribute to the population health evidence base.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available, population health students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Multiple career opportunities exist for graduates with a degree in population health, depending on the areas of expertise that they developed via core training in population health and the track that they pursued. Those who pursued the biomedical information track, for example, are most qualified for positions that require working with a variety of datasets, while those who chose the health education specialist track are trained to work at the interface of health care and public health.

Specific job titles that currently exist for those trained in population health include:

- community health worker
- health care data analyst
- program coordinator
- population health analyst, coordinator or specialist
- population health practice liaison for population outreach
- research assistant

Speech and Hearing Science, BS (LASHSBS)

College/School: College of Health Solutions

Campus: Tempe, Online

The BS/MS accelerated option for this program is not currently available to ASU Online students.

Program description

The Bachelor of Science program in speech and hearing science engages you in study of the normal aspects of the communication process, with emphasis on:

• the human communication system, including the anatomy and physiology of the hearing and speech mechanisms
• normal development of speech and language production and perception
• speech, language and hearing science

The curriculum enables you to develop knowledge and skills to evaluate and determine speech and language deficits and disorders. Upper-division coursework introduces clinical methods and disorders of speech, language and hearing.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Health Care Administration and Policy, MS

Auditory and Language Neuroscience, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/undergraduate/speech-and-hearing-science-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASHSBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply knowledge of typical adult speech and language profiles to evaluate speech and language deficits.
- Apply knowledge of typical speech and language development to evaluate developmental speech and language disorders.
- Evaluate the results of audiograms, applying knowledge of normal hearing to determine hearing loss and auditory pathologies.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, speech and hearing science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs/speech-hearing-science) for students majoring in speech and hearing science.

Career opportunities

Positions in speech-language pathology and audiology are in high demand, rated as careers with bright outlooks by the U.S. Department of Labor's Occupational Information Network. Potential employment opportunities for program graduates include these positions:

- audiology assistant
- hearing aid or cochlear implant company representative
- research assistant or associate in a behavioral discipline
- speech-language pathology assistant
- support staff member in a rehabilitation or health facility

Many graduates of speech and hearing sciences gain entrance to graduate-level programs in speech-language pathology or audiology. In both fields, a graduate degree is required for employment.

The undergraduate degree in speech and hearing science is also excellent preparation for those who wish to enter professional or graduate programs in fields such as:

- counseling
- education
- medicine

rehabilitation
social work
special education
teaching for the deaf

Graduates work with a variety of populations, including people on the autism spectrum, bilingual language learners, those with delayed or disordered speech and language or those experiencing hearing impairment or stuttering, patients recovering from strokes, or patients with degenerative or neurological disease. Graduates work with patients and clients across the life span, from infants to geriatrics, in a variety of settings.

Sports Science and Performance Programming, BS (NHSPTSPPBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in sports science and performance programming prepares you to work directly with athletes, tactical personnel and recreational participants, equipping you to use evidence-based approaches to elevate human performance.

You gain hands-on experience with performance technologies such as force plates, motion capture systems and wearable monitoring tools, enabling you to learn how to collect and analyze data that informs training and recovery strategies. Coursework emphasizes the integration of physiology, biomechanics and data analytics in the design of innovative performance solutions tailored to the needs of diverse populations.

This program emphasizes critical thinking and problem-solving. Through applied training in assessment, exercise programming and recovery planning, you develop the expertise to recognize and respond to the stresses the body undergoes during sport and occupational demands.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHSPTSPPBS~null&college=CHL) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply coaching strategies to maximize efficiency and performance of individuals and reduce the risk of injury under high stress during performance training.
- Understand the scientific foundations that govern adaptation and movement optimization identified as foundational competencies for the Certified Strength and Conditioning Specialist examination and necessary to properly construct advanced performance programs.
- Create evidence-based sports performance programs designed to improve individual and/or team performance and reduce the risk of injury potential during their participation in their activities.

Global opportunities

Global experience: Students who study sports science and performance programming work to push the limits of peak sports performance. When participating in a Global Education program (https://goglobal.asu.edu/), they gain valuable skills in leadership, communication and critical thinking, enabling them to push the limits of their personal knowledge and experience as well. Study abroad experience enables students to stand out in a competitive field and leads to cultural enrichment and competency.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in sports science and performance programming.

Career opportunities

The program is designed to equip graduates with the skills to lead in rapidly evolving fields where technology and human performance intersect. As innovative technologies and data analytics continue to expand, so too do opportunities for professionals who can translate complex information into practical solutions that improve health,

performance and recovery. Unlike AI-driven tools, graduates of this program bring critical thinking, hands-on expertise, and a human-centered approach to solving performance challenges across diverse populations.

Graduates are prepared to sit for nationally accredited certification exams in performance training and corrective exercise or to work with tactical populations through the Tactical Strength and Conditioning Facilitator credential. Graduates can pursue careers in sports performance, rehabilitation, tactical training and performance, or strength and conditioning, well as advanced graduate study in sports science, athletic training, sports medicine or other exercise-science-related disciplines.

Career options span high school, collegiate, professional, and private sector sports performance training, along with tactical performance roles supporting police officers, firefighters and military personnel. Graduates stand at the forefront of a growing industry driven by the integration of human expertise and technological innovation.

Potential career options include:

athletic trainer
fitness center director
gait analyst
performance center director
physical therapist
sports data technician
sports engineer
sports scientist
strength and conditioning coach
tactical performance coach

Some of these positions may require additional education.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Sports Science and Performance Programming (Strength and Conditioning), BS (NHSSPPSCBS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in sports science and performance programming with a concentration in strength and conditioning is designed to align with the accreditation standards required for eligibility to sit for the Certified Strength and Conditioning Specialist® exam available through the National Strength and Conditioning Association. This program offers you a powerful combination of scientific foundations, practical application and technological innovation.

You learn by doing --- working in sport and performance settings where you apply advanced technologies and evidence-based strategies to assess, train and elevate performance. The curriculum emphasizes not only the ability to design and implement effective training programs, but also the critical thinking and problem-solving skills that

distinguish elite coaches from automated or AI-driven solutions.

You are prepared with the competencies, confidence and experience necessary to succeed on the CSCS exam and enter the profession as a qualified strength and conditioning specialist.

This program is accredited by the Council on Accreditation of Strength and Conditioning Education, https://www.nsca.com/education/casce/ (https://www.nsca.com/education/casce/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply coaching strategies to maximize efficiency and performance of individuals and reduce the risk of injury under high stress during performance training.
- Explain the concepts of adaptation and movement optimization necessary to properly construct advanced performance programs.

Create evidence-based sports performance programs designed to improve individual and/or team performance and reduce the risk of injury potential during their participation in their activities.
Create specific assessment and training programs to enhance performance and reduce the risk of injury by applying an understanding of sport requirements and athlete health.

Global opportunities

Global experience: Sports science and performance programming students work to push the limits of peak sports performance. When participating in a Global Education program (https://goglobal.asu.edu/), they gain valuable skills in leadership, communication and critical thinking, which they can use to push the limits of their personal knowledge and experience as well. Study abroad experience enables students to stand out in a competitive field and leads to cultural enrichment and competency.

The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in sports science and performance programming.

Career opportunities

Graduates are well positioned to enter a field that continues to grow, even in times of economic uncertainty. As the demand for improved athletic performance, tactical readiness and evidence-based training strategies increases, so too does the need for professionals who bring both scientific expertise and applicable skills to their work.

Graduates have the competencies required to sit for the challenging Certified Strength and Conditioning Specialist® exam, widely recognized as the gold standard in the profession, as well as the Tactical Strength and Conditioning Facilitator credential. By earning these credentials, graduates distinguish themselves for higher-level and higher-paying opportunities across the sports and performance industry.

Career options include roles in sports performance training at the high school, collegiate and professional levels, and in the private sector. Graduates also pursue tactical performance positions with local, state and federal government agencies, supporting police officers, firefighters and military personnel. They are also prepared to enter the emerging sports science and consulting fields, applying advanced technologies and data-driven insights to athlete development and performance optimization.

Potential career options include:

athletic trainer
fitness center director
gait analyst
movement consultant
performance center director
scout
sports data technician
sports engineer
sports scientist
sprint coach
strength and conditioning coach
tactical performance coach

Some positions require additional education.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Honors - Barrett, The Honors College

Honors College, (9HOHONALL)

College/School: Barrett, The Honors College

Campus: Downtown Phoenix, Polytechnic, Tempe, West Valley, Online

Program description

Barrett, The Honors College creates a foundational educational experience that encourages you to respond to the= challenges of principled leadership through independent and collaborative scholarly and creative activities, community= and civic engagement, transformative study and research, and travel and service opportunities.

At Barrett, curious, motivated students like you learn from one another in an inclusive, supportive environment that= rewards exploration and encourages responsibility and care for self and others. Barrett values courage and curiosity,= belonging and community, agency and leadership, and provides meaningful academic and co-curricular opportunities= to support these principals for you.

As a Barrett student, you enjoy the opportunities afforded to you through Arizona State University, a premier Research= I university (https://www.asu.edu/about/rankings) with considerable resources in the sheer number and variety of= degree programs, and you take part in the nation's top honors college (https://barretthonors.asu.edu/rankings) with= benefits more typical of a small, residential college. You leverage the honors experience to dive deeper into your= interests through faculty mentorship, access to distinct research and internship opportunities, specialized projects in= classes, domestic and international travel programs, co-curricular opportunities, and student-led engagement activities.

While pursuing the same 120 college credit degree plan required for ASU students, you earn a portion of your= undergraduate credits as honors credits. There are a variety of ways to earn honors credit, including major-specific= classes and honors special topics courses, honors internship credit, the Barrett College Fellows Research Program, and= honors travel and study abroad. You also complete an undergraduate thesis project. The honors thesis is the= culmination of your honors experience and your entire undergraduate education.

The residential and academic community of Barrett allows you to feel at home at ASU. Through the comprehensive= residential communities at each Barrett campus, you can enjoy gathering spaces, special events, and Barrett student= organizations right where you live. Over half of the first through fourth year honors students live in the Barrett= community. Barrett Online students are also included in community events and special virtual engagement= opportunities. You are supported by full-time master teacher-scholars, the Barrett faculty fellows, full-time staff= members, the dean and vice dean of the college, and associate and assistant deans for all Barrett locations including= Downtown, Polytechnic and West Valley campuses.

With a focus on excellence beyond college experience, Barrett students have the opportunity to take advantage of the= Lorraine Frank Office of National Scholarship and Advisement (https://onsa.asu.edu/), which serves all of ASU, and is= located in the Barrett Complex on the ASU Tempe campus. There, Barrett faculty and staff mentor students as they= apply for national and international fellowships. Each year, ASU students are selected for prestigious recognitions and= awards, including the Rhodes Scholarship, Gates Cambridge Scholarship, Thomas R. Pickering Foreign Affairs= Fellowship, Goldwater Scholarship, Boren Awards for International Study and Killam Fellowship Program. In addition,= ASU students are recipients of the Benjamin A. Gilman International Scholarship, receive awards from the National= Science Foundation Graduate Research Fellowship Program, and the Fulbright U.S. Student Program, placing ASU= among the nation's top producers of fellowship winners.

Second language requirement: No
STEM-OPT extension eligible: No

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students must complete an application to Arizona State University before submitting a separate application to Barrett, The Honors College (https://barretthonors.asu.edu/).

Students who have demonstrated high levels of academic achievement in high school or college may apply for admission to Barrett. Each candidate must file an application to the college separate from the ASU application, in accordance with the appropriate Barrett deadlines.

Applicants are evaluated on the basis of their academic records and their ranking within the graduating class. Currently, ACT and SAT scores are not required. The college also values students who have special talents and aptitudes, exhibit exceptional leadership qualities, have had unusual life experiences, or display significant community involvement.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=9HOHONALL~null&college=CHO) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Barrett students are connecting their education to the world and earning honors credits in the process. Barrett, The Honors College, encourages honors students to expand their education through global learning

and travel (https://students.barretthonors.asu.edu/enhance-your-experience/global-initiatives-overview). With ASU offerings of more than 300 programs in over 65 countries, ranging from one week to a full academic year, Barrett students can participate in honors-specific travel experiences, as well as academic department programs focused on language, service, research, culture and more. Studying abroad helps students build global awareness, cross-cultural skills, and a deeper understanding of their fields while pursuing their undergraduate education. Participants earn ASU credit for completed coursework and can apply financial aid or scholarships toward program costs.

Career opportunities

Graduating from Barrett, The Honors College at ASU, sets students apart in today's competitive job market and in applications to top graduate, medical and law schools.Barrett graduates are recognized for their academic excellence, intellectual curiosity, and hands-on experience through research, leadership and community engagement. Employers and graduate programs seek Barrett students and alumni for their proven ability to think critically, innovate and make an impact beyond the classroom. Graduates are shaping industries, advancing discovery, and leading with purpose.

Integrative Sciences and Arts, College of

Applied Biological Sciences, BS (TSABSABS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

In the Bachelor of Science program in applied biological sciences, you acquire a comprehensive foundation in biology and related sciences, along with the flexibility to specialize in areas of personal interest.

You gain a deep understanding of core biological concepts, including energy and matter dynamics, genetic information exchange, and the structural and functional relationships that govern life processes. Additionally, the program addresses ethical considerations and policy challenges that arise when biological principles are applied to societal issues.

You engage in a variety of experience-based learning opportunities to apply your knowledge, including:

• case studies
• faculty-guided research and service learning projects
• field trips
• hands-on laboratories and field experiences
• internships

Through these immersive activities, you acquire the theoretical knowledge and practical skills necessary for success in the biological sciences.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Applied Biological Sciences, MS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSABSABS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 programs available in more than 65 countries, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their educational experience to their specific interests and skill sets. Applied biological sciences students are able to expand their knowledge of how science impacts society in a variety of cultures, and they can acquire a global perspective, preparing them to lead in a future-focused career. Students earn ASU credit for completed courses while they stay on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

Graduates may pursue entry-level careers in wildlife and restoration ecology, urban horticulture and secondary education. Graduates are also prepared to succeed in graduate and professional schools in disciplines such as:

- biological research
- dentistry
- environmental biotechnology
- human health
- medicine
- physical therapy
- secondary education

Applied Biological Sciences (Natural Resource Ecology), BS (LSABSNRBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

Through the concentration in natural resource ecology within the Bachelor of Science program in applied biological sciences, you gain an in-depth understanding of sustainable resource management across diverse ecosystems. This program emphasizes the scientific principles underlying the stewardship of critical natural resources, including soil, water, flora and fauna.

You acquire expertise in key field techniques and analytical tools --- such as quantitative ecology, geographic information systems and remote sensing --- to use as a framework to explore patterns of plant and animal distribution, diversity, physiology and conservation. These skills are further refined through the application of theoretical knowledge to case studies, laboratory work and applied projects.

You contextualize knowledge through experience-based learning activities, including:

• faculty-guided research and career-connected projects
• field trips and hands-on activities
• internships that provide professional experience
• laboratories and fieldwork integrated into the curriculum

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: The natural world is complex and diverse, providing different resources from one biome to the next. It's not only natural resources that are varied across the globe --- their uses vary as well. Students who participate in Global Education programs (https://goglobal.asu.edu/) gain a deeper understanding of global resources, how different cultures use the resources and how best to communicate sustainable use to a diverse audience.

Career opportunities

Through experiential learning opportunities, students develop the practical expertise necessary to pursue careers in environmental management, conservation and related fields, with a focus on maintaining ecological balance and promoting sustainability. Career opportunities include employment with public agencies and private consulting firms, as well as positions such as:

- environmental consultant
- environmental researcher and educator
- natural resource manager
- park manager
- watershed manager
- wildlife biologist or ecologist

Applied Biological Sciences (Pre-Dental), BS (LSABSPDBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

The pre-dental concentration in the Bachelor of Science program in applied biological sciences prepares you to successfully complete the admission requirements to pursue an advanced degree in dental medicine.

The concentration curriculum emphasizes a solid foundation in biology, chemistry, physics and mathematics. The program also offers specialized courses related to dental medicine and opportunities for internships in the field.

You contextualize knowledge through experience-based learning activities, including:

• case studies
• faculty-guided research and service learning projects
• field trips
• laboratory activities

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/biological-sciences-pre-dental/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSABSPDBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, pre-dental students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Career opportunities for graduates may include entry into professional programs in dental medicine. In addition, graduates can pursue dental-focused careers outside of dental medicine.

Graduates are also prepared to succeed in graduate and professional schools in disciplines such as:

- biological research
- environmental biotechnology
- human health
- medicine
- physical therapy
- secondary education

Applied Biological Sciences (Preveterinary Medicine), BS (LSABSPMBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

In the Bachelor of Science program in applied biological sciences with a concentration in preveterinary medicine, you prepare to pursue an advanced degree in veterinary medicine.

The program emphasizes a solid grounding in biology, chemistry, physics, animal science and mathematics while offering specialized courses in veterinary medicine and opportunities for internships in the field.

You contextualize knowledge through experience-based learning activities, including:

• case studies
• faculty-guided research and service learning projects
• field trips
• internships
• laboratory activities

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

If you want to teach biology at the middle school and high school levels, the Bachelor of Science program in applied biological sciences with a concentration in secondary education in biology is designed for you.

The curriculum includes standard courses as well as hands-on laboratory instruction. The program prepares you to become a teacher who excels in biology and related sciences.

You contextualize knowledge through experience-based learning activities, including:

• case studies
• faculty-guided research
• service-learning projects
• secondary education clinical experience

If you enroll in this concentration, you should contact the Mary Lou Fulton College for Teaching and Learning Innovation for information on teacher preparation coursework.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TSABSSBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Those who wish to pursue a future in education must understand how classrooms are shaped by students' diverse experiences, backgrounds and cultures. Global Education programs (https://goglobal.asu.edu/) offer students firsthand experiences in many cultures and communities, which can enhance a degree program. Students earn ASU credit for completed courses while they stay on track for graduation, and they may apply financial aid and scholarships toward program costs. Programs can be found in a variety of countries around the world.

Career opportunities

Graduates of this concentration program are prepared to teach biology in high schools or pursue numerous entry-level careers in biology, and they can find employment opportunities in the private and public sectors. Graduates of the general program in applied biological sciences are also prepared to succeed in graduate or professional schools in disciplines such as:

- animal health
- dentistry
- medicine
- nonprofit education
- physical therapy
- teaching

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Applied Biological Sciences (Sustainable Horticulture), BS (TSABSUBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

If you want theoretical and practical experiences in distinct aspects of plant culture in an urban desert environment, the sustainable horticulture concentration within the Bachelor of Science program in applied biological sciences is designed for you.

You acquire the skills to produce, design and care for ornamental and edible plantscapes. If you are interested in sustainable practices, you have the opportunity to specialize in vertical farming and other plant-related technologies. In this program, you contextualize knowledge through experience-based learning activities, including:

• case studies
• faculty-guided research and service-learning projects
• field trips
• greenhouse experiences
• internships

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students can explore habitats and ecosystems around the world in one of several Global Education programs (https://goglobal.asu.edu/). Opportunities include working with scientists and conducting independent research. Students can stay on track for graduation by earning ASU credit while they become immersed in other cultures. Studying abroad helps students to build professional skills that employers demand, such as collaboration and critical thinking.

Career opportunities

Horticulture is a multibillion-dollar national and international enterprise that offers a diverse and exciting choice of professional careers. Graduates can pursue numerous entry-level careers in horticulture. Employment opportunities exist in the private and public sectors. The general program in sustainable horticulture also prepares graduates to succeed in roles such as:

- arboretum or botanical garden manager
- city horticulturist
- horticultural consultant, plant researcher or educator
- horticulture supply sales representative
- integrated pest management specialist
- interior plant specialist or plant propagator
- landscape designer or contractor
- nursery plant broker or cultivator and plant salesperson
- organic urban farmer or permaculturist
- urban plant ecologist, forester, tree specialist or arborist

Career opportunities for urban horticulture graduates are not limited to any geographic location; graduates can embark on careers throughout the United States, Canada, Mexico and overseas.

Applied Mathematics, BS (LSMATBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Science program in applied mathematics is a cross-disciplinary offering that prepares you to become a strong problem-solver with broad mathematical skills. The program focuses on applying mathematics to challenges in a variety of scientific areas, including biology, physics and engineering.

You build a solid foundation in mathematical modeling and data analysis, with a focus on applying results to real-world situations. You can also shape your education by choosing electives in science and engineering, which adds practical, hands-on experience to your mathematical training.

With its broad and flexible design, the program helps you connect theory to practice, preparing you to contribute in science and technology. The number of high-tech companies in the Phoenix area is growing, providing you with valuable opportunities to meet industry leaders and explore career options before graduation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSMATBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students gain valuable experience when they study abroad, enhancing their resumes. Students often cite participating in Global Education programs (https://goglobal.asu.edu/) as the highlight of their academic career and a crucial part of helping them gain a clearer view of the world and its peoples, and the complex challenges faced by populations globally.

The Global Education Office offers a suite of faculty-directed global experience programs designed to connect students with modern issues that impact local communities yet transect borders. Through any of the more than 300 programs available, students can see the world as they never have before and come away with memories to last a lifetime. Graduates who have the heightened cultural competency and strengthened leadership and critical thinking skills acquired through studying abroad may stand out in a competitive field.

The College of Integrative Sciences and Arts recommends these programs (https://goglobal.asu.edu/students/major/applied-mathematics) for students majoring in applied mathematics.

Career opportunities

Graduates are prepared to apply their analytical skills and technical knowledge in a variety of careers in industry, government, education and the nonprofit sector. Some pursue advanced degrees in the mathematical sciences (e.g., mathematics, statistics and applied mathematics such as mathematical biology).

Applied Military and Veterans Studies, BA (LSAMVSBA)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

The Bachelor of Arts program in applied military and veteran studies is the nation's first interdisciplinary program that provides you with a comprehensive understanding of the military's role in society, and the experience and culture of veterans. The curriculum covers various aspects of military studies, including the historical and societal impacts of conflict and the personal experiences of veterans in media, literature, employment and leadership. You obtain transferable skills in leadership, critical thinking, resiliency, adaptability and transparent communication.

This career-connected program gives you a deeper understanding of military service and veterans, whether you are a historian, museum specialist, nonprofit or government coordinator, counselor, health care provider and U.S. Department of Defense contractor.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Security (Irregular Warfare), MA

Global Security (Cybersecurity), MA

Global Security, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/applied-military-veterans-studies) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSAMVSBA~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Assess the military-civilian divide using their knowledge of military culture and history.
- Effectively communicate their synthesis of secondary sources and foundations texts in military studies in writing.
- Apply academic and theoretical knowledge to real-world situations through coursework simulations and internship experience.

Global opportunities

Global experience: The study of applied military and veterans studies transcends geographic boundaries, spanning cities, states, provinces, countries and even continents. Global education programs (https://goglobal.asu.edu/) help students dive deeper into their studies by enabling them to experience many cultures firsthand and to explore places where history and military action have intermingled. Through these encounters, students can discover the interconnections of ideas and places at primary source sites.

Career opportunities

Graduates are prepared for roles that support public policy development and political activism, roles in the military, and leadership positions in military- and veteran-serving organizations.

Graduates are well-positioned for employment in:

- federal agencies across the U.S. and worldwide, such as with the DoD and the U.S. Department of Veterans Affairs
- the government sector in Arizona and other states
- health care-related organizations that serve veteran populations
- nonprofit organizations around the U.S. that are dedicated to supporting military-connected individuals and veterans

Applied Physics, BS (LSAPHYBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Science program in applied physics offers a dynamic pathway if you are passionate about science to explore and apply the fundamental laws of nature to address current challenges. You acquire the knowledge and skills necessary to excel in advanced technology, engineering or pioneering research.

You engage deeply with the core principles of physics while mastering next-generation computer simulations and applied mathematics. You are equipped to solve complex problems across physics, materials science and engineering. The program's distinguished faculty --- experts in areas such as physical system modeling and materials science --- provide guidance and mentorship throughout your academic journey.

Beyond traditional coursework, the program emphasizes practical experience through hands-on projects and research opportunities, ensuring that you gain the skills that set you apart in the field. Additionally, with the expansion of high-tech companies in the Phoenix area, you have valuable opportunities to connect with industry leaders and advance career prospects even before graduation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSAPHYBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: By studying abroad, students majoring in applied physics gain valuable hands-on experience tailored to their specific interests and skill sets, along with personal enrichment, heightened cultural competency, and leadership and critical thinking skills that will be an advantage in their careers.

With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, whether in a foreign country, in the U.S. or online, students build communication skills, are challenged to adapt and persevere, are exposed to differences across the world, and increase their ability to work with diverse groups of people.

Career opportunities

Graduates apply their knowledge in high-performance and scientific computing, biophysics, condensed matter physics, chemistry, material science, electrodynamics and radar physics. This knowledge is vital for employment in chemical and pharmaceutical companies, environmental management agencies and firms that specialize in scientific software. Graduates are also prepared to continue their studies in graduate programs in physics and chemistry.

Applied Quantitative Science, BS (LSAQSBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

You develop deep STEM expertise in the Bachelor of Science program in applied quantitative science. You select one focus area from a menu of more than 25 quantitative and scientific disciplines, complemented by a robust foundation of interdisciplinary science, technology, engineering and math coursework across statistics, computer skills and research methods.

In the core classes, you learn how to connect your chosen area with math reasoning, data analysis and computer problem-solving, preparing you to tackle complex challenges across different STEM fields. You can specialize in areas including applied mathematics, data science, computational life sciences, human systems engineering and informatics, while developing skills that are in high demand.

Applied quantitative science involves answering questions, solving problems and addressing today's challenges by combining math, statistics and computer methods with specific scientific knowledge. You take an active role in planning your education and setting your career goals within STEM fields. The program focuses on math reasoning, data

analysis, research skills, critical thinking and flexibility --- key areas in today's technology-driven world and careers that require STEM knowledge.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in applied quantitative science are able to gain hands-on experience in a variety of countries around the world. Graduates who have the heightened cultural competency and strengthened leadership and critical thinking skills they acquired through study abroad may stand out in a competitive field.

Career opportunities

Employers are increasingly seeking candidates who know how to use quantitative information, and graduates of this program are well equipped with the skills and knowledge to meet that demand. People who work in any business or industry use quantitative skills to solve problems.

Applied Science (Animal Biology), BAS (LSANBIOBAS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Applied Science program with a concentration in animal biology provides a direct pathway from an Associate of Applied Science degree to a BAS degree that prepares you for careers in management and scientific and medical fields relevant to animals.

You learn the underlying principles of animal health --- grounded in knowledge of cells, biological systems and behavior --- to solve problems in animal health and care. The curriculum emphasizes a solid foundation in biology, animal science and mathematics while offering specialized courses and opportunities for placement in internships in the field.

You have access to a variety of career resources and opportunities to explore professions and engage with established professionals in a variety of areas.

Second language requirement: No
STEM-OPT extension eligible: No

Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree. This program is not available to first-year students.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Only students who have completed an AAS degree are eligible to declare BAS majors at ASU.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSANBIOBAS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 programs available in more than 65 countries, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their educational experience to their specific interests and skill sets. Students expand their knowledge of animal biology and how it impacts society in a variety of cultures, and they can acquire a global perspective that prepares them to lead in their career.

Students earn ASU credit for completed courses while they stay on track for graduation, and they can apply financial aid and scholarships toward program costs.

Career opportunities

Graduates have numerous entry-level career opportunities in animal health and nutrition, and they are also prepared to succeed in graduate or professional schools in disciplines such as:

- animal biology
- animal health
- biological research
- veterinary medicine

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Examine core organizational leadership concepts.
- Analyze ethical principles in leadership.
- Apply principles of team dynamics.

Global opportunities

Global experience: Students who are studying applied leadership can become influential and innovative leaders in the world. Through distinct study abroad experiences across the globe, students gain valuable leadership and communication skills. Whether in a foreign country, in the U.S. or online, by participating in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/), students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures. Many of the School of Applied Professional Studies programs (https://cisa.asu.edu/study-abroad) allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

Graduates have the skills and knowledge needed for leadership positions in a wide variety of organizations, including businesses, government offices and agencies, nonprofit agencies and the service industry. They are prepared to become effective leaders in diverse positions, such as team leader, manager and shift captain.

Applied Science (Technical Communication), BAS (LSTECBAS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Applied Science program with a concentration in technical communication is designed for students who have completed an Associate of Applied Science program from a regionally accredited institution.

This flexible, career-focused program builds on your existing technical foundation and expands your expertise with essential skills in leadership, management, critical thinking and effective communication.

The program focuses on making complex information clear, accessible and actionable across diverse audiences. Through this concentration, you learn to create, design and manage content using both established methods and emerging technologies --- preparing you to communicate technical ideas with impact in today's dynamic workplaces.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Prepare informative and persuasive communication for diverse audiences.
- Critically revise professional communication for accuracy, clarity, and impact.
- Select appropriate emerging technologies for the delivery of content for different audiences and purposes.

Global opportunities

Global experience: Technology is connecting the world, and future technical communication professionals must be proficient in cross-cultural communication --- a skill well developed through study abroad. Through distinct study abroad experiences across the globe, students gain valuable skills. Whether in a foreign country, in the U.S. or online, by participating in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/), students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures.

Many of the School of Applied Professional Studies programs (https://cisa.asu.edu/study-abroad) allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

Software and electronics companies, media corporations, financial institutions, government agencies, nonprofits and other industries need technical communicators.

Graduates of the program are prepared for careers as:

- advertising and promotions managers
- copy writers
- correspondence clerks
- court clerks
- desktop publishers
- editors
- media and communication workers
- proofreaders and copy markers
- public relations specialists

Communication, BA (LSCOMBA)

College/School: College of Integrative Sciences and Arts

Campus: Downtown Phoenix, Polytechnic

Program description

In the Bachelor of Arts program in communication in the College of Integrative Sciences and Arts, you explore how= communication processes create, maintain and transform identities, relationships, workplaces and communities.

Through the study, analysis and application of human communication, you gain the knowledge, creativity and skills you= need to facilitate healthy relationships and workplaces, civil and sustainable communities, and constructive= intercultural interactions. With an integrative and applied emphasis on culture and communication, community= advocacy and communication technologies, the program allows you to have a concerted focus on the rapidly changing

modalities of communication occurring today. You learn to speak effectively, communicate across cultures and critically analyze public controversy.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSCOMBA~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students have the exciting opportunity to gain intercultural experience through tailored, international programs of study. Study abroad can help students improve their language and cross-cultural skills for

effective communication. They can also develop critical teamwork and problem-solving skills and expand their= knowledge of the liberal arts through lenses of different cultures.

Participation in one of more than 300 Global Education (https://goglobal.asu.edu/) programs --- whether in a foreign= country, in the U.S. or online --- provides students with personal enrichment and the opportunity to develop valuable= skill sets that can give them an advantage in their career. Students build communication skills, are challenged to adapt= and persevere, and are exposed to differences across the world, enhancing their ability to work with diverse groups of= people.

Career opportunities

Graduates pursue careers in public affairs, digital communication, community organizing and human resources. While= growth across media and communication occupations is expected to be moderate, demand remains strong in key= areas such as digital media, public relations and internal communications. The versatility of communication skills= provides graduates with lasting career potential across many sectors.

Counseling and Applied Psychological Science, BS (LSCAPSBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

Counseling and applied psychological science is a specialty in promoting psychological well-being. Counselors and= applied psychologists provide the tools and resources necessary for individuals, families and organizations to cope with= everyday problems.

You receive foundational training in counseling theories, addictions, trauma, lifespan development, group counseling= and professional ethics in the Bachelor of Science program in counseling and applied psychological science. A distinct= aspect of the program is its attention to cultural diversity, focusing on age, gender, race, ethnicity, sexual orientation,= religion and socioeconomic status. As part of the program, you participate in an internship in which you shadow a= licensed therapist and apply counseling theory.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.

Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/counseling-psychological-science/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSCAPSBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Distinguish counseling skills used in service delivery through mock sessions and field work.
- Evaluate ethical judgment within a multicultural framework when working with patients/clients.
- Apply statistical tools to test hypotheses and draw valid conclusions.

Global opportunities

Global experience: To make a positive impact in the lives of others, students must understand the diverse sets of experiences, backgrounds and cultures that shape the people with whom they wish to work. When studying abroad, students gain firsthand experience of a wide variety of cultures and communities. Global Education programs (https://goglobal.asu.edu/) provide students with a distinct global perspective, enabling them to have an impact.

Career opportunities

Graduates with a degree in counseling and applied psychological sciences are prepared for careers in various settings:

- community centers
- government (sales and marketing, human resources management)
- mental health professions (youth counselor, substance abuse counselor, behavioral health technician)

- schools and colleges (school psychologist, educator, professor)
- social services (high school psychology teacher, occupational analyst)
- substance abuse treatment clinics

Graduates may qualify for employment in behavioral health care delivery settings such as community agencies,= hospitals and rehabilitation centers to support counselors and other mental health professionals. They are prepared= for a variety of positions, such as vocational rehabilitation assistant, human service worker and life skills instructor. The= Bureau of Labor Statistics shows a projected job growth of 17% (2024 to 2034) --- much faster than average --- for= substance abuse, behavioral disorder and mental health counselors.

Graduates are not license eligible as professional counselors but are well prepared with an excellent foundation to= enter graduate degree programs in disciplines such as counselor education, counseling psychology, clinical psychology,= social work, family studies and related fields.

Counseling and Applied Psychological Science (Counseling Military Members and Veterans), BS (LSCAPSMVBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Tempe, Online

Program description

The Bachelor of Science program in counseling and applied psychological science focuses on the promotion of= psychological well-being. You learn basic counseling skills and techniques to complement a variety of social science and= health majors, including psychology, public health, interdisciplinary studies, social work and the humanities.

The concentration in counseling military members and veterans provides you with foundational skills and knowledge= that are critical in your work with veterans, military populations and military families. You take interdisciplinary courses= to better understand the U.S. military, focusing on the specific psychosocial experiences of service members and the= mental health needs of this population.

Graduates of this program are not license-eligible as professional counselors.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSENGBA~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze short stories, focusing on narrative and literary elements.
- Compose effective visual and multimodal narratives.
- Compose an effective applied project related to their area of study.

Global opportunities

Global experience: Students of English can explore the hometowns of famous authors and visit locations that have inspired masterpieces of fiction and nonfiction. Study abroad programs (https://goglobal.asu.edu/) offer students the chance to build a global perspective and knowledge in distinct environments as preparation for leadership in a future-focused career. Students earn ASU credit for completed courses while staying on track for graduation, and they may

apply financial aid and scholarships toward program costs.

The College of Integrative Sciences and Arts recommends these study abroad programs (https://goglobal.asu.edu/students/major/english) for students majoring in English.

Career opportunities

This program prepares scholars and teachers for graduate or professional study and for careers in education, writing and other related fields. Career prospects for secondary language arts teachers in Arizona are particularly strong.

Additionally, graduates have acquired skills that employers value, such as the ability to analyze ideas and problems, find and evaluate information, communicate effectively, and present clear and logical arguments. With these skills, graduates can find jobs such as:

- advertising and promotions manager
- copy writer
- editor
- lawyer (with further education)
- media and communication worker
- paralegal or legal assistant
- public relations specialist
- teacher or instructor
- technical writer
- writer or author

General Studies, BA (LSGNSBGS)

College/School: College of Integrative Sciences and Arts

Campus: Downtown Phoenix, Polytechnic, Online

Program description

The Bachelor of Arts program in general studies offers you a purpose-built, transfer-friendly degree, designed to serve= the more than 39 million adults in the United States who have college credit but no degree. This program expands your= access to degree completion by maximizing previously earned credits and offering a flexible curriculum. The program= fosters critical thinking, communication, adaptability and problem-solving skills, and the ability to work across= disciplines to prepare you for graduate study or to meet employer expectations in a variety of careers.

You can align your degree program with your experience or career aspirations while building toward graduate= education in areas such as public administration, health innovation or applied leadership.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/general-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSGNSBGS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, general studies students are able to tailor their experience to their specific interests and skill sets. Whether in a

foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates with a degree in general studies have a broad educational foundation and the flexibility to explore multiple career paths. The program's versatility allows graduates to prepare for opportunities in business, social services, organizational management, government and beyond.

Graduates may pursue careers including:

administrative services manager
business operations or project coordinator
curator (with additional training or relevant experience)
general and operations manager
health education or program specialist
human resources specialist
military or veterans services coordinator
purchasing manager
social and community service manager
sustainability specialist

History, BA (LSHISBA)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Arts program in history focuses on American history, with coursework in European, Latin American and global historical perspectives. Faculty expertise includes the history of technology and science, biography, war and its effect on society, public history, aviation, environmental history and related fields.

You are trained in methods of historical research and study the development of human society from social, cultural and political perspectives. The capstone course and other research courses enable you to apply research and writing skills as a practitioner of history and creator of analytical narratives.

In the program you develop skills in:

• analyzing and assessing ideas and problems
• communicating effectively orally and in prose
• finding and evaluating information
• presenting clear and logical arguments

You must complete a minimum of 12 upper-division credit hours of HST courses offered by the College of Integrative Sciences and Arts.

If you'd like to combine this degree with grades 6-12 teacher preparation you should consider adding a secondary education certificate offered through the Mary Lou Fulton Teachers College.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Construct a well-reasoned argument supported by primary and secondary historical evidence.
- Analyze continuity and change across historical contexts.
- Communicate historical knowledge clearly and effectively in writing.

Global opportunities

Global experience: History transcends a city, state, province, country and even a continent. Studying abroad (https://goglobal.asu.edu/) helps students dive deeper into their studies by enabling them to experience firsthand the cultures and places where history has taken place. Students are able to use these encounters to discover the interconnections of ideas and places at primary source sites.

Career opportunities

Graduates are well prepared for careers in education, writing and other related fields. Career prospects for secondary history and social studies teachers in Arizona are particularly strong.

Graduates of the program may find jobs in these fields (some require further education):

Education

- college and university faculty
- middle school teacher
- secondary school teacher

Legal professions

- court reporter
- law clerk
- lawyer
- paralegal or legal assistant

Media and communication

- broadcast news analyst
- historian
- media and communication worker
- news columnist
- reporter or correspondent
- writer

Public history

- archivist
- museum curator
- museum technician or conservator

Graduates are also prepared for graduate and professional studies.

History (Military and Veterans Studies), BA (LSHISVSSBA)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

This program's name has changed effective Fall 2026. The previous name was History (Veterans, Society and Service).

Program description

In the military and veterans studies concentration of the Bachelor of Arts program in history, you explore war, military service and veterans as a means to investigate how violence, conflict, military service and trauma-bearing experiences have shaped political, social and cultural formations in the past and continue to do so in the present.

Along with military history, you take courses that place veterans as their subject for critical interdisciplinary investigation, which focuses on exploring scholarship and other narratives about military service, veteran journeys, war-making and social change; the impact of armed conflict and military service on individuals, communities, culture, politics and governments; and how societies remember.

The curriculum situates your study of the veteran and military subject from a historical perspective, while examining and explaining veteran identities and cultures as a sequence of sociocultural events influenced by a multitude of factors. In addition, a robust variety of elective coursework provides you with a systematic examination of veterans and military institutions as they evolve over time.

This program also provides you with critical thinking and analysis skills needed throughout your career. You develop skills in:

• analyzing and assessing ideas and problems
• communicating effectively, orally and in prose
• finding and evaluating information
• presenting clear and logical arguments

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics

History of Science, Technology and Innovation, BA (LSHSIIBA)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Arts program in history of science, technology and innovation prepares you to understand and shape the future of technology through critical analysis of the past. This transdisciplinary program combines natural and applied sciences coursework with historical and philosophical approaches, giving you the analytical framework to evaluate emerging technologies, anticipate market trends and effectively communicate complex technical concepts.

You explore how major innovations emerged --- through engineering breakthroughs or digital revolutions --- while developing research, writing and critical thinking skills that employers value across industries. Core courses cover the history of science and technology, environmental history, engineering history and research methods, while electives enable you to specialize in areas such as artificial intelligence, sustainability or technology policy.

The program's interdisciplinary approach means that you gain insight into both technical literacy and humanistic understanding. Through internships, specialized coursework and hands-on research projects, you build a portfolio that demonstrates your ability to bridge technical knowledge with strategic thinking --- exactly what today's innovation-driven economy demands.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Integrative Social Science, BS (LSISSBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

In the Bachelor of Science program in integrative social science, you master the disciplines of the social sciences to meet the complex issues that confront today's society. The social sciences encompass a wide variety of disciplines that focus on societies, institutions, behaviors and interactions. Some of the most important social sciences include economics (inquiry into the production, distribution, and consumption of goods and services), political science (inquiry into government, public management systems, public institutions and citizen engagement), and sociology (inquiry into society, social behavior, patterns of social relationships, social interaction and culture). Individually, these disciplines provide valuable insights into various aspects of human life and can help efforts to address societal challenges and problems. However, when the disciplines are brought together in an integrative approach, the model provides an even more powerful lens through which to understand the world.

Examples of the integrative model include:

• sociologists and economists combining models to address issues of homelessness and poverty
• sociologists and political economists collaborating to understand how cultural practices impact economic development
• sociologists, political scientists and economist perspectives coming together to undertake community impact analysis

Benefits of integrative studies include:

• Enhanced collaboration: Integrative studies encourage teamwork and knowledge-sharing.
• Expanded set of problem-solving tools: Instead of the narrow tools of one discipline, you have an expansive set of tools to apply to complex sociological issues.
• Holistic understanding: Combining perspectives provides you with a comprehensive view of complex issues.
• Innovative solutions: Integrative approaches foster creativity and innovation.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Integrative Social Science, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSISSBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students are able to enhance their understanding of societal structure and human interaction through distinct cultural experiences found by studying abroad (https://goglobal.asu.edu/). They gain heightened cultural competency, and communication and critical thinking skills while exploring a new and exciting part of the world.

Career opportunities

Because of their mastery of the multiple methodologies of the social sciences, graduates of the program have many more professional opportunities available to them as compared with their peers with single-discipline training.

Professionals with expertise in analyzing complex social and global issues are in high demand across sectors and industries, including business, public administration, politics and community organizations. Those who have skills in the analysis of social phenomena and complex social problems are valuable to businesses and institutions that rely on data-driven strategies for engagement and growth.

Career examples include:

- administrator
- government agent
- public relations specialist
- social and community service manager
- social science research analyst
- social scientist
- solutions resource specialist

Interdisciplinary Studies, BA (LSBISBIS)

College/School: College of Integrative Sciences and Arts

Campus: Downtown Phoenix, Polytechnic, Tempe, Online

Program description

In the Bachelor of Arts program in interdisciplinary studies, one of the top ranked in the country, you select two areas= of study --- known as concentration areas --- from a broad selection of nearly 200 options.

The core curriculum provides you with the intellectual tools to integrate your concentration areas, engage in= transdisciplinary problem-solving, and prepare for careers and graduate programs that increasingly cross disciplinary= boundaries. As an interdisciplinary studies student, you could choose to integrate concentrations such as business and= project management, psychology and social welfare, communication and justice studies, public administration and

ethics, digital culture and computer gaming, or many other distinct combinations.

Interdisciplinary studies is an approach to answering questions, solving problems and addressing contemporary social issues from multiple perspectives. You take an active role in designing your educational plan and defining your career goals. The program emphasizes written communication, versatility, self-assessment and critical thinking --- essential skills for today's world.

If you are interested in the online program for interdisciplinary studies, you should visit the ASU Online website for more information.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying and interning abroad can be among the most valuable experiences for interdisciplinary studies students. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, interdisciplinary studies students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The College of Integrative Sciences and Arts recommends these programs (https://goglobal.asu.edu/students/major/interdisciplinary-studies) for students majoring in interdisciplinary studies, as well as ASU Global Career Accelerator (https://www.globaltech.asu.edu/).

Career opportunities

The flexibility of the interdisciplinary studies program enables graduates to take many exciting career paths after they leave ASU. Some go on to graduate or professional programs, while others immediately enter the job market. For example, one graduate combined business and communication and now owns a small business; another integrated sociology and family studies to further a career in law enforcement; another studied philosophy and economics to prepare for law school; another combined biology and chemistry in preparation to pursue a Master of Pharmacy; and yet another studied Spanish and religious studies and now works as an employee trainer for a major company.

Possible career opportunities include:

- archivist or curator
- climate change analyst
- compliance manager
- computer network support specialist
- editor or web developer
- environmental restoration planner
- general and operations manager
- higher education professional
- regulatory affairs manager
- wholesale and retail buyer (except farm products)

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for

licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-interdisciplinary-studies-organizational-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSORGBIS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying and interning abroad can be one of the most valuable options available for interdisciplinary studies students. Global Education programs (https://goglobal.asu.edu/) provide students in the organizational studies concentration with the opportunity to develop a valuable intercultural communication skill set that can give them an advantage in a future-focused workforce.

The College of Integrative Sciences and Arts recommends these programs (https://goglobal.asu.edu/students/major/interdisciplinary-studies) for students majoring in interdisciplinary studies.

Career opportunities

Graduates have a breadth of knowledge and experience and have gained the skills needed to integrate various domains of knowledge. They are prepared for a variety of professional positions, including:

- human resources specialist
- industrial organizational psychologist
- investment fund manager
- loss prevention manager
- management analyst
- regulatory affairs manager
- supply chain manager
- urban and regional planner

Many graduates of this program already have a chosen career field and desire a degree that is versatile, flexible, meaningful and useful for continued career development and advancement. Because of the flexibility of the program, graduates take many different career paths. Recent graduates have found opportunities in many exciting fields, such as:

- business
- education
- health care administration
- nonprofit administration
- tourism

Liberal Studies, BA (LABLSBLS)

College/School: College of Integrative Sciences and Arts

Campus: Downtown Phoenix, Polytechnic, Online

Program description

The Bachelor of Arts program in liberal studies provides a humanities-based education, wide freedom to choose from multidisciplinary courses, and specialized seminars that build critical thinking and communication skills that employers value.

Liberal studies are the oldest form of higher education in the Western tradition, with roots in ancient Greece. A liberal education differs from political liberalism in the modern sense; people from all political perspectives have made significant contributions to and drawn on this knowledge and these skills.

The program offers you a course of study that emphasizes the humanities and social sciences and gives you great flexibility in constructing your own educational path. You are prepared to meet the challenges of a complex world.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
OR any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management - Executive (Space Leadership, Business and Policy), MGM

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Data Science), MGM

Liberal Studies, MLSt

Project Management, MPM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Organizational Leadership, MS

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Transfer admission requirements: The MyPath2ASU pathway allows Arizona transfer students to complete a prescribed sequence of courses that meet the requirements for the community college's AA degree along with the lower-division requirements for the ASU major.

Students completing their ASU BA degree at Yuma: Once the MyPath2ASU pathway requirements are complete, students complete the remaining requirements for the ASU bachelor's degree at the community college.

Students should visit Admission Services (https://admission.asu.edu/apply/transfer) for more information about ASU degrees offered at local community colleges.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-liberal-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABLSBLS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, liberal studies students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

The College of Integrative Sciences and Arts recommends these programs (https://goglobal.asu.edu/students/major/liberal-studies) for students majoring in liberal studies.

Career opportunities

Graduates are prepared to advance in their current careers, pursue new job opportunities, change fields or continue on to graduate or professional study. Possible careers and positions include:

- creative writer
- grant writer
- higher education professional
- public relations personnel
- research analyst
- training specialist

Military Studies, AA (LSMILSTAA)

College/School: College of Integrative Sciences and Arts

Campus: Online

Program description

The Associate of Arts in military studies is designed as a partnership with the U.S. Naval Community College to provide training to enlisted personnel sailors, marines and coast guards. The degree is a rigorous program that provides a comprehensive foundation of study in the history of war and warfare, the history of regions identified in the National Defense Strategy, the U.S. foreign policymaking process, international relations theories, and U.S. political and military systems. Through the interdisciplinary curriculum, you gain the tools to use historical analysis, demonstrate critical thinking, and develop strong written and verbal communication skills. The program includes capstone research or an applied project in which you explore the role of the U.S. Navy in advancing the goals of the nation in the past, present or future.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students must be accepted to the U.S. Naval Community College to be admitted to this program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students must be accepted to the U.S. Naval Community College to be admitted to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Create interdisciplinary arguments about military culture, veteran identity, and civil-military relations.
- Design a feasible research project related to military and veteran studies by asking appropriate and answerable research questions.
- Evaluate primary and secondary sources for credibility and relevance.

Career opportunities

Graduates of this program are prepared to further advance in careers in military service or in undergraduate study to complete a bachelor's degree.

Organizational Leadership, AA (LSORGLAA)

College/School: College of Integrative Sciences and Arts

Campus: Online

Program description

The Associate of Arts program in organization leadership provides leadership training to active duty Navy, Marine Corps and Coast Guard enlisted personnel. This program uses transdisciplinary methods to prepare you to build a leadership foundation. You gain skills that are applicable to any work environment, regardless of assigned role, in a variety of organizations and sectors: private, nonprofit, government and military. You develop the skills leaders need to solve problems, communicate effectively, assess programs, manage resources and evaluate emerging technologies.

If you complete the program, you can continue in an established transfer path to the Bachelor of Arts program in organizational leadership and other ASU degree programs. The flexible AA program allows you to complete general education coursework and concentrated coursework in a second disciplinary field to prepare for leadership in a specific industry or sector.

Second language requirement: No

Organizational Leadership (Military and Veterans Studies), BA (LSORGLVSBA)

College/School: College of Integrative Sciences and Arts

Campus: Tempe

This program's name has changed effective Fall 2026. The previous name was Organizational Leadership (Veterans, Society and Service).

Program description

If you aspire to make a profound impact on organizations and the veteran community, the Bachelor of Arts program in organizational leadership with a concentration in military and veterans studies is for you. This program combines a robust leadership curriculum with specialized training to equip you with the expertise needed to lead diverse teams and drive innovation. You master key competencies such as problem-solving, effective communication, resource

management and the strategic use of emerging technologies.

Beyond traditional leadership skills, this program emphasizes the distinct needs of veterans and military personnel. You gain hands-on experience in engaging with these communities through sensitive counseling, facilitating impactful group discussions and providing tailored support. By blending theory with practical skills, the curriculum ensures that you are not only a visionary leader but also a compassionate advocate for those who have served. This concentration prepares you to lead with purpose and make a difference.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation
Math intensity: Moderate

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) while earning a political science degree adds a global component to students' education, increasing their ability to analyze complex sociopolitical issues and affording them skills and knowledge that prepare them to lead in their chosen career.

Students earn ASU credit for completed courses while they stay on track for graduation, and they may apply financial aid and scholarships toward program costs.

Career opportunities

The program serves as excellent preparation for staff, manager or policy analyst positions in local, state and federal government. This degree is recognized by employers as qualification for many careers in business (for-profit and nonprofit) and industry. Opportunities include binational, cross-border positions linking U.S. and Mexican businesses, Arizona-Sonora local government or local community groups on both sides of the border.

Many students use the degree as a gateway to law school or as a basis for further study in such applied fields as:

- community development
- political science
- public administration
- public policy
- social science
- urban affairs
- urban and regional planning

Professional Studies, AA (LSPRFSTAA)

College/School: College of Integrative Sciences and Arts

Campus: Online

Program description

The Associate of Arts program in professional studies offers you a flexible foundation for both career advancement and continued education. This program combines essential general education courses with personalized professional studies options, allowing you to tailor your studies to personal and professional goals. Each personalized study option equips you with practical, in-demand skills --- whether analyzing data, managing projects, supporting IT systems,

building cloud solutions, or applying interdisciplinary problem-solving.

The program empowers you to build confidence, adaptability and a clear path toward academic and career success. You emerge with critical thinking, communication and decision-making skills that prepare you for immediate workforce opportunities or seamless transfer into a bachelor's degree program.

You must be in Accelerate ASU Pathways to be admitted to this program.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students must be in Accelerate ASU Pathways to be admitted to this program.

Transfer admission requirements: Students must be in Accelerate ASU Pathways to be admitted to this program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Only students who are in the Accelerate ASU Pathways are eligible to be in this program, so most current ASU students are not able to change their major to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college= experience in which students take advantage of in-person success coaching and programming experiences on site= while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction= and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSPRFSTAA~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Career opportunities

Graduates are prepared to enter a diverse range of roles across industries, depending on their selected career track.= Graduates have developed essential skills in areas such as business analytics, IT support, project management, and= interdisciplinary problem-solving.

In addition to workforce readiness, this program provides a pathway toward completing a bachelor's degree,= positioning graduates for long-term career growth and leadership opportunities in their chosen fields.

Project Management, BS (LSPMGBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Tempe, Online

Program description

The Bachelor of Science program in project management is grounded in the latest project management theories and= practices.

You have the opportunity to apply these practices in professional situations through simulations and other forms of= career-connected learning. You learn the foundations of project leadership and communication, as well as how to= manage project costs, schedules, resources and risks.

This program was first in the nation to partner with Green Project Management, infusing the curriculum with= sustainability practices and helping lead change.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to= change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year.= Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/project-management-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college= experience in which students take advantage of in-person success coaching and programming experiences on site= while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction= and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSPMGBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This= program's learning outcomes include the following:

- Create a project management plan.
- Apply leadership theory to project situations presented in course materials.
- Evaluate project value across key project management domains.

Global opportunities

Global experience: Experience studying and interning abroad can be one of the most valuable tools for project management students. Global Education programs (https://goglobal.asu.edu/) enable students to develop valuable intercultural communication and project management skills that can give them an advantage in the workforce.

Career opportunities

Graduates have the skills and knowledge needed for project management positions in many types of organizations, including businesses, government agencies and nonprofits. Project managers can thrive in many industries, such as

health care, the service industry, information technology and construction management.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.The Project Management Institute has two options for certification:
• The Certified Associate Project Manager credential requires 23 hours of project management education and a secondary degree (high school diploma, associate degree or the global equivalent) for students to test.
• The Project Management Professional credential requires either a four-year degree and 36 months of experience leading projects within the last eight years, or a secondary education diploma (high school diploma, associate degree or the global equivalent) with 60 months of experience leading projects within the past eight years. In addition, students must have 35 hours of project management training to sit for the PMP designation test.

Psychology, BS (LSPGSBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

Psychology is the scientific study of the mind and behavior.

The Bachelor of Science program in psychology emphasizes critical thinking, reasoning, quantitative research and scientific writing.

You have the opportunity to participate in faculty-led research labs on a wide variety of topics (https://cisa.asu.edu/sccp/research-labs-and-projects). Some labs include:

• PLENA Research Lab
• Couples Coping with Stress Lab https://ashleykrandall.wixsite.com/asucouplescoping (https://ashleykrandall.wixsite.com/asucouplescoping)
• Race and Relationships Lab, also known as the R&R Lab: https://www.raceandrelationshipslab.com (https://www.raceandrelationshipslab.com/)

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or MAT 170 Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to= change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSPGSBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This= program's learning outcomes include the following:

- Develop a broad understanding of psychological principles to explain mental processes and behavior.
- Apply statistical tools to test hypotheses and draw valid conclusions.
- Integrate biopsychological principles when conceptualizing human behavior and emotions.

Global opportunities

Global experience: Study abroad students are exposed to distinct differences in the human condition worldwide, are able to improve language and cross-cultural skills for effective communication, and are challenged to adapt under new social and cultural circumstances. Participating in one of the more than 300 Global Education programs (https://goglobal.asu.edu/) provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career and provide personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world and improve their ability to work with diverse groups of people.

Career opportunities

According to the Bureau of Labor Statistics, the job growth outlook (2024 to 2034) for psychologists is 6%, which is faster than average.

A degree in psychology prepares students for careers in various settings:

- consulting firms
- government (sales and marketing, human resources, research, administration, management)
- hospitals
- industries and organizations
- mental health agencies

social services (high school psychology teacher, occupational analyst)

The program also provides an excellent foundation for graduate study in areas such as public administration, law, family studies and communication, and the various graduate program fields in psychology:

clinical and counseling
cognitive neuroscience
developmental
environmental
experimental
quantitative
physiological
social

Science, Technology and Society, BS (ECSTSBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Bachelor of Science program in science, technology and society prepares you to shape the future at the intersection of innovation and human impact. As societies navigate decisions about artificial intelligence, biotechnology and digital platforms in health care, governance, communication and the environment, organizations increasingly seek leaders like you who can guide these choices toward positive outcomes by understanding their social, ethical and policy dimensions.

This interdisciplinary degree program equips you with technical skills, research expertise and cultural awareness to advance meaningful change. You explore pressing issues, including the technological divide, global sustainability, the politics of technology, economic and health disparities, and resource insecurity. Drawing on diverse perspectives from policy analysis, sociology, economics, history and ethics, you develop decision-making skills to analyze problems from multiple viewpoints and design human-centered solutions. You prepare to lead cross-sector innovations, influence policy, shape public discourse, and address global challenges in ways that benefit both organizations and communities.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
OR any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Integrative Social Science, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ECSTSBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, science, technology and society students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared for impactful careers that connect innovation, policy and social change. With expertise in research, critical analysis, policy evaluation and strategic problem-solving, they are prepared to lead initiatives in:

- global development and social impact --- designing programs that reduce inequities and strengthen communities
- governance and public policy --- influencing decision-making in government and regulatory bodies
- public health and health care innovation --- shaping policies and systems to improve health outcomes
- technology management --- guiding innovation strategy for tech companies, startups and public-sector projects
- sustainability and environmental policy --- addressing climate challenges through science-based solutions

Potential job titles include:

- compliance manager
- data warehousing specialist
- logistics analyst
- political analyst
- regulatory affairs manager
- social services director
- supply chain manager
- technical director

Technical Communication, BS (LSTECBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

Technical communication is workplace communication that makes technical or specialized information clear and= accessible to a wide variety of users. It involves using different types of technologies to craft an ever-expanding array of= print and digital information products: websites, social media sites, help files, training materials, grants and proposals,= and data visualizations, to name just a few.

In the Bachelor of Science program in technical communication, you learn how to analyze, write, design, produce and= manage print and digital information using traditional and developing technologies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to= change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year.= Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-technical-communication/) for program descriptions and to request more= information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college= experience in which students take advantage of in-person success coaching and programming experiences on site= while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction= and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSTECBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This= program's learning outcomes include the following:

- Design clear, ethical and persuasive communication products for diverse audiences.
- Develop recommendations to improve the design and impact of technical content using user experience research methods.
- Evaluate emerging technologies to determine appropriate methods for delivering content for different audiences and purposes.

Global opportunities

Global experience: Students who learn technical communication while studying abroad have an advantage in many workplaces. With a global view of applied workplace communication, students become well-rounded communicators who can use various print and digital information products to convey technical and specialized information. Through participation in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/), students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures.

Many of the School of Applied Professional Studies programs (https://cisa.asu.edu/study-abroad) allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

Technical communicators work in many professional roles, such as information developer, grant writer, web interface designer and user experience specialist. What all of these roles have in common is the focus on creating accessible and appealing communication that has a practical purpose and is intended for a particular audience.

Technical communicators are needed in many industries and settings, including software and electronics companies, media corporations, financial institutions, government agencies and nonprofit organizations.

Graduates are prepared for careers such as:

- communication manager
- content strategist
- data visualization specialist
- engineering support specialist
- information architect
- new media or social media specialist
- public relations specialist
- user experience specialist
- web content creator

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSTECDVBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This= program's learning outcomes include the following:

- Design clear, ethical and persuasive communication products for diverse audiences.
- Develop recommendations to improve the design and impact of technical content using user experience research methods.
- Evaluate emerging technologies to determine appropriate methods for delivering content for different audiences and purposes.
- Evaluate the affordances and limitations of visualization methods, tools, and techniques.
- Visualize data for a range of contexts and audiences.

Global opportunities

Global experience: Studying abroad while learning about data visualization in the world of technical communication gives students an advantage in many workplaces. Understanding the global view of applied workplace communication, students become well-rounded communicators, able to use various print and digital information products to relate technical and specialized information. When they participate in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/), students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures.

Many of the School of Applied Professional Studies programs (https://cisa.asu.edu/study-abroad) allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

Software and electronics companies, media corporations, financial institutions, government agencies and nonprofits are among the organizations that need technical communicators. Graduates of the program prepare for careers such as:

- big data engineer
- communication manager
- computer and information systems manager
- data specialist or analyst
- data visualization developer
- digital designer
- information architect
- market research analyst

Graduates are prepared for high-demand data visualization and data scientist roles across many industries and= workplace environments.

Technical Communication (Medical and Health), BS (LSTECMHBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

Communication skills are essential in the health professions, given the complex information, diverse audiences and= regulatory guidelines that shape the field. Medical and health writers partner with doctors, scientists, engineers, end= users and government agencies to produce information products, such as websites, social media content, mobile= applications and educational materials.

In the Bachelor of Science program in technical communication with a concentration in medical and health, you learn advanced writing and communication strategies for the multifaceted information environments of health-related professions. You develop various applied skill sets, including drafting, adapting and reviewing messages for various audiences and formats; managing multiple projects that require analysis, negotiation, persuasion and collaboration skills; and gathering and using feedback from end users to develop products.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/technical-communication-medical-health/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU.= Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LSTECMHBS~null&college=CLS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to= create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and= resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This= program's learning outcomes include the following:

- Design clear, ethical and persuasive communication products for diverse audiences.
- Develop recommendations to improve the design and impact of technical content using user experience research methods.
- Evaluate emerging technologies to determine appropriate methods for delivering content for different audiences and purposes
- Explain complex health and medical user experiences
- Write medical communications on related health topics addressing clinical and public audiences

Global opportunities

Global experience: Technical communication students can become strategic communication specialists, with opportunities all over the world. Through study abroad experiences, students gain valuable leadership, communication and design skills. Whether in a foreign country, in the U.S. or online, by participating in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/), students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures.

Many of the School of Applied Professional Studies programs (https://cisa.asu.edu/study-abroad) allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

People with medical and health writing skills fill varied positions, such as editor, project manager, media specialist, coordinator, administrator, manager and educator. Graduates are well positioned to seek employment with hospitals, hospice organizations, government agencies, pharmaceutical companies, nonprofit organizations and academic institutions, as well as software and electronics companies, insurance providers, media corporations and financial institutions --- all of which rely on skilled technical communicators.

Graduates are prepared for careers such as:

- communication manager
- content strategist
- information architect
- public relations specialist
- user experience specialist
- web content creator

Technical Communication (Social Media Management), BS (LSTECSMMBS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Online

Program description

Technical communication entails communicating with, about and on technology. Social media is a rapidly developing= aspect of the technology landscape. In the social media management concentration in the Bachelor of Science program= in technical communication, you focus on the management, history, theory, culture, practice and ethics of social media.

While the technical communication major gives you a wide look at how professional technical communicators do many= types of work inside and outside organizations, this concentration homes in on social media creation as a specific type= of technical communication work. You learn the practical aspects of social media creation alongside the history, legal= concepts, ethical ideas and current concerns that shape and inform that practice. You also learn about existing and= emerging social media in ways that enable you to adapt and thrive in the constantly changing social media= environment.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

User Experience, BS (LSUSEXBS)

College/School: College of Integrative Sciences and Arts
Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Bachelor of Science program in user experience, you focus on users' interactions with a company or= organization, including its products and services. The UX elements of psychology, research, design and communication= determine user needs and wants when they're using a product. Research drives design, design drives content, and= content drives communication --- all result in a user experience.

You learn the UX research, design, content development, communication and tone of voice elements and skills needed= to successfully evaluate all components and products that end users interact with. Topics covered include:

• hardware and software user interfaces
• help systems
• identification of user needs
• informational products
• interacting with print, digital and aural information
• tasks, procedures, capabilities and limitations of using technology
• user support

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes

First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

Interdisciplinary Arts and Sciences, New College of

Aging, BS (ASALDBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The world's population is rapidly aging, and older adults now compose the largest-ever demographic segment. Although longer life spans are an enormous gain for human welfare, this rapid shift presents tremendous challenges, including health care costs, labor-force shortages and long-term care demands.

In the Bachelor of Science program in aging, you develop skills in identifying challenges and developing solutions that are critical to managing these profound demographic trends. Completing courses such as Communication and Aging, Aging and the Life Course, and Supporting the Health of Older Adults gives you the skills and mindset to contribute solutions as the proportion of retired adults increases faster than the number of people in the workforce. Completion of the degree includes a culminating experience, such as a capstone project or internship experience for learning opportunities beyond the classroom.

This program prepares you to be a leader in this burgeoning field. You learn to develop solutions in areas of personal finance, transportation, increased demands for health care, assisted-living options and recreational needs for an aging population.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASALDBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the aging program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings worldwide.

Career opportunities

Career opportunities for graduates include advising organizations to better serve older adults, researching service delivery modalities, developing policies for public and private organizations, and providing services directly to older populations. Employment in associated career fields is expected to increase commensurately with the needs of a growing and diverse population. People who work with aging populations are employed in public and private agencies that deal with a wide variety of social issues, including:

- access to primary and specialized health care
- assisted-living facility management
- disabilities
- discrimination
- elder abuse and family support
- health, mental health and end-of-life decisions
- housing
- recreational opportunities
- transportation

Applied Computing, BS (ASACOBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

ASU is no longer accepting new students to this program. Students interested in this program should apply to the BA in Computer Science.

Program description

In the Bachelor of Science program in applied computing, you learn a computer science foundation and then explore the established knowledge and emerging developments in the high-demand areas of database systems, computer networks and cybersecurity. The program also provides the opportunity for you to investigate interdisciplinary connections, including the combination of computing with its practical application in other disciplines, through concurrent degrees and minors.

Hands-on class projects, internships, industry partnerships, and authentic and impactful research conducted with faculty provide numerous opportunities for you to apply your knowledge before you graduate. You can use your programming expertise, systems knowledge and critical thinking skills to effectively problem-solve and articulate your experience through presentations, scientific posters and professional papers.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Global Management, MGM

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASACOBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply foundational concepts in database systems to design, implement, and evaluate data management solutions.
- Apply discrete mathematical concepts to analyze and solve computing problems.
- Communicate computing results effectively to diverse audiences using written format.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the applied computing program are able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared to integrate technology with human activities, respond to global changes, solve problems, and create and manage the technological production of information and creative products.

Core information technology industries are among the fastest growing sectors in the U.S. economy. Graduates find employment opportunities with corporations and businesses, nonprofit and government agencies, and digital arts media industries, as well as in the academic world.

With a depth of knowledge and experience in information technology best practices, graduates have a strong foundation in systems with established interconnections among these fields. They are prepared for graduate study or positions such as cybersecurity analyst, database architect and network engineer.

Applied Computing (Cybersecurity), BS (ASACOCBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

ASU is no longer accepting new students to this program. Students interested in cybersecurity should apply to the Computer Science (Cybersecurity), BA program.

Program description

The innovative cybersecurity concentration builds on the Bachelor of Science degree program in applied computing.

You acquire the technical knowledge of how to secure networks and applications, an understanding of cybersecurity governance models and risk management fundamentals, methods of communicating complex risk issues, and solutions for the challenges of implementing cybersecurity controls within various organizational models. Leadership, critical thinking and effective communication are also emphasized.

You gain experience with authentic cybersecurity organizations, protecting digital assets against compromise or theft.

The cybersecurity concentration prepares you for a continuing and progressive career in cybersecurity.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASACOCBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and

resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the applied computing cybersecurity concentration program are able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

This is an ideal degree for students interested in careers in cybersecurity. Opportunities are available both in the private sector and within governmental agencies (e.g., the FBI, U.S. Department of Homeland Security, the National Security Agency and the Department of Defense).

Graduates of the applied computing program with a concentration in cybersecurity are well prepared for graduate study as well as entry-level employment with businesses, nonprofits, government agencies and academic institutions. Cybersecurity-focused positions include:

- chief information security officer
- cyber risk analyst
- information security engineer
- network security engineer
- security operations center analyst

Applied Mathematics, BS (ASMATBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in applied mathematics emphasizes practical problem-solving and critical thinking through the study of mathematical theory and applications. You build a strong foundation in calculus, linear algebra, probability and statistics while exploring how these tools are used to model and solve real-world problems. Coursework highlights applications in science, engineering, business and technology, preparing you to analyze data, predict outcomes and design solutions.

With its focus on both theory and practice, this program enables you to develop the flexibility to tackle complex challenges in a variety of environments.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Biostatistics, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASMATBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Solve problems in applied mathematics and related scientific applications using mathematical theories and modeling techniques
- Apply computer science principles and algorithms to solve mathematical, computational, and scientific problems.
- Analyze data using statistical and probabilistic methods in scientific and applied contexts

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the applied mathematics program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are equipped with the skills valued in many career paths and are well prepared for entry-level positions in data analysis, finance, technology, research, education, nonprofits and government, among others. The program also provides excellent preparation for graduate study in mathematical sciences (e.g., mathematics, statistics and computer science), applied sciences or related fields. Career opportunities may involve:

- applied mathematical networks
- financial mathematics
- general applied mathematics
- mathematical biology
- operations research

Applied Science, BAS (ASBASBAS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

If you've already completed an Associate of Applied Science, the Bachelor of Applied Science program is designed for you. You build on your technical knowledge while broadening your education through a personalized concentration. Options include applied computing, business, communication, creative writing, cybersecurity, environmental science, forensic psychology, political science and more.

You design a plan of study that reflects your interests and career goals, culminating in a capstone or internship experience. This flexibility helps you apply what you've already learned while you prepare for new opportunities in advanced study or the workforce.

If you've earned an AAS from a regionally accredited Arizona community college, you may apply up to 75 credits toward the BAS. If you've earned an AAS from other accredited institutions, you may transfer up to 60 credits.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

English, MA

Interdisciplinary Studies, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree. This program is not available to first-year students.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must hold an AAS to change their major to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=ASBASBAS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Examine philosophical, religious, and ethical theories.
- Effectively communicate their ideas in writing and other modalities.
- Produce an original argument that applies ethical or religious theories to a real-world problem.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the applied science program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Students who have participated in a study abroad program have the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Because they are able to tailor their concentration, graduates are prepared for a wide variety of career opportunities, as well as graduate programs, in fields such as law, business, social sciences and education.

Applied Science (Biotechnology), BAS (ASBASBTBAS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Applied Science program with a concentration in biotechnology is designed for students who have earned an Associate of Applied Science degree from an accredited institution and are looking to expand their scientific and professional skills for career advancement in biotechnology and related fields.

This program builds on your prior technical training through upper-division coursework and laboratory experiences in genetics, cell biology, microbiology and molecular biology. You'll gain practical skills in lab techniques while deepening your understanding of modern biological systems and biotechnological applications in health care, pharmaceuticals and biomedical research.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. You can find more information about education benefits offered by VA at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree. This program is not available to first-year students.

Transfer admission requirements: This BAS program allows students who have an applicable AAS degree from an accredited institution to transfer 60 credit hours toward a BAS degree at ASU. Following transfer to ASU, students pursuing this degree may have more than 60 credit hours to complete in order to obtain their BAS. Students who have earned an AAS degree from an accredited Arizona community college may be eligible to transfer up to 75 credits toward the BAS degree. Students should work with their academic advisor to ensure their courses meet degree requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Biology, BA (ASLSCBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in biology with an emphasis in the natural sciences, you examine the interdisciplinary nature of the life and physical sciences, focusing on how these disciplines intersect and overlap. The program's organization and flexibility enable you to study another subject outside your major simultaneously. You are encouraged to add a minor or concurrent degree in another subject area.

You gain hands-on experience as you work in small groups and one-on-one with individual faculty members. You may participate in pioneering scientific research by assisting in faculty research laboratories, and even publish in top journals and present your results at regional and national scientific meetings.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Social Justice and Human Rights, MA

Social Data Science, MA

Forensic Science, MS

Biological Data Science (Biotechnology), MS

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the biology program to expand their knowledge of how science impacts society through a variety of cultures.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural

competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for entry-level jobs in research, nonprofit, education and outreach organizations and for other roles in the life sciences.

Graduates have a wide variety of options, including pursuing graduate studies or seeking careers in areas that include:

- environmental management and conservation
- health professions
- laboratory research
- primary and secondary school teaching
- science advisement to businesses and government
- science writing

out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

This program prepares graduates for a wide variety of careers by offering course and laboratory work and quantitative research opportunities that develop fundamental problem-solving, critical thinking, writing and communication skills. Graduates may enter careers in:

- business
- laboratory or field research
- medicine
- publishing
- scientific journalism
- teaching

Undergraduate laboratory experience --- both on and off campus --- enhances employability as a laboratory technician or research associate in university and government research settings; hospital and diagnostic laboratories; and pharmaceutical, biotechnology, agricultural and food processing industries.

Graduates with experience in field studies are prepared for entry-level positions in private companies and state and federal agencies, such as wildlife biologist, environmental consultant or conservation officer. They are also prepared for graduate or doctoral programs in human or veterinary medicine, pharmacy, dentistry or scientific research.

Biology (Environmental Justice), BS (ASLSCEJBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Science program in biology with a concentration in environmental justice, you examine living systems through experiential learning and scientific inquiry. By learning in an integrative environment that emphasizes the interconnectedness of the life sciences and social sciences through the lens of justice and equity, you gain an understanding of broader scientific concepts and how science can be applied to social policies to achieve positive outcomes for communities and ecosystems.

All the program's core courses include laboratories to provide you with ample practice in science inquiry, including the development of scientific questions, designing experiments and collecting data, and data analysis.

You are encouraged to conduct independent research under the mentorship of faculty members or during internships. Some even publish in top journals and present their results at scientific meetings. You can apply your research to inform social policies, aiming to improve outcomes for marginalized communities and natural ecosystems.

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASLSCEJBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the biology program with a concentration in environmental justice are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates of the program can apply their science research skills and knowledge to a variety of careers in the life sciences. Opportunities include careers in wildlife or animal conservation, formal or informal science education environments, or environmental consulting; some go on to pursue science or policy graduate study.

Biology (Environmental Justice), BA (ASLSCEJBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in biology with a concentration in environmental justice, you examine the interdisciplinary nature of the life and physical sciences, social sciences and moral theories as applied to environmental systems and health, focusing on how these disciplines intersect.

You gain a foundation in the key principles of biology, including cell theory, ecosystem dynamics and energy exchange, and genetics. The program's organization and flexibility enable you to study another subject outside your major simultaneously.

You gain hands-on experience with advocacy for marginalized communities that often bear the disproportionate impacts of inequitable environmental policies. You work in small groups and one-on-one with individual faculty members to practice communication and advocacy skills. You may participate in advanced scientific research by assisting in faculty research laboratories and even publish your findings in top journals, presenting your results at regional and national scientific meetings.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASLSCEJBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. Biology (Pharmacology/Toxicology), BS (ASLSCPBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The pharmacology and toxicology concentration of the Bachelor of Science program in biology emphasizes the biochemical, molecular and physiological components of chemical and body interactions.

Experiential learning is a core component of the program, and all required core courses have laboratories. By learning in an integrative environment that emphasizes the interconnectedness of disciplines, you gain a deeper understanding of larger scientific concepts and can view these concepts from multiple perspectives. To have a thorough understanding of the interactions of chemicals in the biological system, you study biology and chemistry, and you become familiar with chemical interactions at physiological, molecular and cellular levels.

You have the opportunity to conduct independent research under the mentorship of faculty members or in internships outside the school.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Forensic Science, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASLSCPBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the biology program to expand their knowledge of how science impacts society through a variety of cultures.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for occupations such as:

- laboratory researcher
- pharmacist
- physician
- physician assistant
- risk assessor
- veterinarian

They may work in governmental agencies or private companies in areas such as:

- clinical trials
- product safety evaluation
- regulatory affairs
- teaching

Graduates are also prepared for entry-level employment in the growing field of environmental toxicology and for graduate and professional programs in pharmacology and toxicology.

Biotechnology and Bioenterprise, BS (ASBITEBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in biotechnology and bioenterprise provides you with hands-on experience in biotechnology research, combining knowledge and skills from multiple fields. You acquire the associated business and entrepreneurship skills needed to develop and market biotechnological innovations and address challenges in the biotechnology and health sciences communities in Arizona, the nation and beyond.

The program emphasizes coursework in the biological, biomolecular and biotechnological sciences, which underpin biotechnology. You may tailor the degree to your specific interests and aspirations through focus areas in biotechnology, bioentrepreneurship and biostatistics.

The program's distinction is its focus on blending biotechnology and entrepreneurship.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: First math varies depending on the focus area chosen.
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Global Management, MGM

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

Communication, BS (ASCOMMBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in communication is a versatile offering that you can tailor to your personal and career goals.

Working closely with award-winning faculty, you explore intercultural, relational and professional communication as you gain experience connecting people in local and global spheres to build strong communities. You learn to communicate creatively by studying media, culture and narrative to influence and inspire various audiences. You also learn to advocate for yourself and others by researching ethics, social issues and persuasion to promote positive change.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

English, MA

Interdisciplinary Studies, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASCOMMBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Explain how core communication theories relate to communication across interpersonal, organizational, and mediated contexts.
- Design communication materials appropriate for specific goals, contexts, and audiences.
- Interpret communication research by noting methodological strengths and weaknesses.

Global opportunities

Global experience: Studying abroad enables students in the communication program to improve language and cross-cultural skills for effective communication, develop critical teamwork and problem-solving skills, and expand their knowledge of the liberal arts through lenses of different cultures.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates have been trained in effective communication skills; are able to speak and write well; can convey complex ideas effectively; and are able to perform various forms of data analysis, communication assessment and technical reporting. They are prepared for employment in communication-intensive fields in business, media, technology, government, nonprofit and educational sectors, and for further graduate study in the social sciences, law, humanities and management.

Graduates pursue careers in a variety of fields, such as digital content creation, public relations, law practice, sales and marketing, customer experience management, strategic communication and nonprofit advocacy. They can work in communications-focused fields such as:

- advertising
- community education

- corporate communications
- crisis management
- customer service and customer relations
- health communication
- human resources management
- media and public relations
- new media
- social media
- training and development

Career opportunities

Graduates are prepared for careers in social media and technology, global communication, public relations and strategic communications, risk and crisis communication, communication training and mentoring, sport communication and communication philosophy. Graduates pursue careers in a variety of communication-driven fields such as digital content creation, law practice, sales and marketing, customer experience management and nonprofit advocacy. Because communication skills are crucial to many professions, graduates work in a variety of fields, including:

- customer service and customer relations
- health and human services
- human resources
- lobbying
- management
- marketing
- media and public relations
- mediation
- social media design and implementation
- training and development

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have a minimum cumulative ASU GPA of 2.00 (scale is 4.00 = "A").
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEBA~null) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers and helps the student stand out should they pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are well-prepared for careers in a wide variety of computing-related fields or to pursue graduate study. They secure employment in a variety of capacities, such as in computer and software design and development of information technologies. Computer science graduates can excel in system and software development. Computer science-related job opportunities include:

- creating computer games and graphics systems
- developing mobile computing applications
- developing security applications
- discovering data management and mining solutions

Computer Science (Cybersecurity), BA (ESCSEIBA)

College/School: New College of Interdisciplinary Arts and Sciences
Ira A. Fulton Schools of Engineering

Campus: West Valley

Program description

You gain a solid foundation in the practical aspects of computer science in the Bachelor of Arts program in computer science with a concentration in cybersecurity.

You learn how to think critically, use effective programming and apply problem-solving skills for a future in the cybersecurity industry. You work with authentic cybersecurity organizations and learn how to protect digital assets against compromise or theft. Additionally, you acquire technical knowledge in:

• cybersecurity controls within various organizational models
• cybersecurity governance models and risk management fundamentals
• methods of communicating complex risk issues
• network and application security

You can customize your degree to include other areas of interest. Computing electives are available in the following disciplines:

• app development
• databases
• data science
• networking
• software development

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ESCSEIBA~null) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad. A resume enhanced by the valuable study abroad experience impresses prospective employers, and it also helps the student stand out should they decide to pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are well prepared for careers in a wide variety of computing-related fields or to pursue graduate studies. They secure employment in a variety of capacities, such as computer and software design and the development of information technologies. Computer science graduates can excel in system and software development careers, to include:

- creating computer games and graphics systems
- developing mobile computing applications
- developing security applications
- discovering data management and mining solutions

Conflict Resolution, BA (ASCNRBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in conflict resolution provides an interdisciplinary foundation for understanding the dynamics of conflict and strategies for effective resolution. Grounded in communication, the curriculum introduces you to key theories and practical approaches for addressing conflict in various settings. Coursework explores challenges at both the individual and group levels, as well as within organizations and communities and across cultures. You learn skills in negotiation, mediation, dialogue and collaborative problem-solving that'll prepare you to transform conflict into opportunities for constructive change.

This program is for you if you are interested in professions that require strong interpersonal, organizational and cross-cultural communication.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=ASCNRBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate core concepts and theories relevant to conflict resolution.
- Evaluate messages and texts as they relate to conflict resolution.
- Employ conflict resolution best practices in real-world scenarios.

Global opportunities

Global experience: Studying abroad enables students in the conflict resolution program to develop an expanded worldview. They learn to resolve issues not only within the workplace, but also within international partnerships.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are ready to pursue further education or careers in several diverse areas. They have great career prospects in business, education, government, nongovernmental agencies, law, advocacy, nonprofit and community leadership, public and government administration, and mediation.

Digital Forensics, BS (ASCPFBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Digital forensics is the discipline that employs data generated and stored on computers, mobile devices, networks and cloud environments to systematically collect, analyze and preserve evidence related to crimes or incidents. Using this process, professionals help determine the causes of crimes and provide reliable evidence for court proceedings.

The Bachelor of Science program in digital forensics provides a comprehensive curriculum that equips you with the specialized skills and legal knowledge required for collecting and analyzing digital evidence. By integrating diverse fields such as digital forensics and cybersecurity, the program prepares you to effectively address the complex challenges of cybercrime and digital misconduct.

You engage in hands-on learning activities --- including laboratory exercises, internships and field experiences based on authentic cases --- to systematically master state-of-the-art software and analytical techniques, strengthening both your theoretical understanding and practical expertise. Active faculty research and strategic industry partnerships expose you to innovative technological trends and security issues, enabling you to thrive as a professional in the rapidly evolving digital landscape.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/digital-forensics-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASCPFBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply core forensic methodologies and information security principles to the preservation of digital evidence in investigative scenarios.
Implement scripts and tools to optimize forensic workflows and automate data analysis by leveraging computational thinking and programming expertise.
Analyze cybersecurity incidents across complex technological environments, including cloud, mobile, and IoT systems.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the digital forensics program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

With the multidisciplinary skill set they have acquired --- spanning technical, legal and investigative domains --- graduates are prepared for fast-growing, emerging roles in digital investigations and cybercrime. The U.S. Bureau of Labor Statistics estimates that between 2024 and 2034, employment of one such role, information security analyst, will increase 29% --- a rate much greater than that for most occupations. Graduates of this program are prepared to work in government agencies and law enforcement, for consulting firms and on cybersecurity teams.

Disability Studies, BA (ASDISASBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: ASU Sync , Online

Program description

Disability is a basic feature of human diversity. In fact, people with disabilities form the largest minority group in the United States, making up approximately a quarter of the population. Disability studies has become an increasingly prominent academic field, providing you with a multifaceted understanding of the social, cultural, political and economic dimensions of disability.

In the Bachelor of Arts program in disability studies, you are prepared to make a positive impact on society. You learn to confront the marginalization of people with disabilities and to acquire skills in research, advocacy and policymaking that are increasingly important in a variety of professions.

Format options
This program is offered in two formats: ASU Online and ASU Sync.

ASU Online: The online BA program in disability studies offers all coursework 100% virtually (https://asuonline.asu.edu/students/courses/). Courses are typically offered in a 6-7.5 week format, and they're taught asynchronously (no set time to attend class each week). You access course content on your own schedule and complete assignments by preset deadlines.

ASU Sync: The disability studies Sync program (https://provost.asu.edu/sync) is a flexible degree option that allows you to attend classes virtually or in person. Courses in the major (i.e., DST courses) are offered virtually, as either iCourses or live virtual lectures with faculty and peers (Sync classes). Courses required outside the major, such as general studies or electives, are offered in person or virtually as iCourses. You should review Class Search (https://catalog.apps.asu.edu/catalog/classes) to determine course format options offered each semester and ensure that you can attend courses in the modalities available. The Sync program option is open to Arizona residents and nonresidents. Nonresidents should consider time zone differences because most Sync classes are scheduled according to local Arizona time.

Because of immigration requirements, international students on F-1 or J-1 immigration status are not eligible for the Sync program option.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

English, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-disability-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

English, BA (ASENGBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in English, you learn to think critically and reflectively about language, literature and culture. You develop advanced critical thinking abilities; refined skills for clear and effective verbal communication; expertise in constructing well-supported and persuasive arguments; experience performing complex textual analysis; knowledge of historical trends in written discourse; an awareness of the role of literary discourse in broader social and historical contexts; and an ability to engage in big-picture thinking.

You have the opportunity to gain practical publishing experience with the literary magazine Canyon Voices (https://newcollege.asu.edu/canyonvoices).

The English major curriculum helps you strengthen your analytical skills, shape your own ideas, and develop your own interests. English courses are regularly offered in fiction, poetry and creative writing; periods and authors in British, American and global literatures; women's and ethnic literatures; and creative and expository writing.

World-class faculty members have strong reputations in various fields of research and are ready to enhance skill sets, deepen knowledge bases, and help you apply the BA in English to a variety of professions.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze how literary texts shape and are shaped by social, cultural, political and economic contexts.
Conduct research using primary and secondary sources to support a literary analysis essay.
Analyze issues of class, race, gender, and ethnicity in literary works from the 19th and 20th centuries.

Global opportunities

Global experience: Studying abroad enables students in the English program to explore language at a deeper level through an expanded lens of dialects, literature and terminology.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. English (Secondary Education), BA (ASENGSEBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in English with a concentration in secondary education provides rigorous content in literature, composition, linguistics and secondary teaching, extensively preparing you to meet the needs of all student populations. Attention is given to levels of student academic performance and cultural and linguistic diversity.

The demand for teachers in Arizona is high. You complete your teaching internship in school districts in the greater Phoenix area or for one of the 22 Native American nations in Arizona.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze how literary texts reflect, critique and produce culture by employing active reading strategies.
Design a pedagogical intervention that applies contemporary methodologies and theories to address a specific instructional challenge.
Analyze issues of class, race, gender, and ethnicity.

Global opportunities

Global experience: Students who wish to pursue a future in education must understand the diverse set of experiences, backgrounds and cultures that shape the students in their classrooms. Secondary education concentration students can enhance their English degree with a study abroad program, in which they can gain firsthand experience within a wide variety of cultures and communities.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates of the program earn Arizona Department of Education certification for middle and high school English language arts and are prepared for careers as secondary school teachers.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Environmental Science, BS (ASENVBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in environmental science is dedicated helping you find solutions to the challenges posed by climate change.

The study of human impact on Earth's ecosystems and resources has become increasingly important over the past 20 years. This degree program is founded on established environmental basics, ensuring that you are well versed in biological study, including molecular, organismal and ecosystem biology. You gain competency in chemistry, statistics and geographic information systems. Rounding out your preparation, the program focuses on the management and communication skills necessary for various environmentally specific careers.

This program prepares you to find innovative and sustainable solutions to today's critical environmental challenges, including pollution and climate change. Distinguished faculty members conduct research across the globe and engage you in the process of creating new scientific knowledge that will impact a rapidly changing world.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences or MAT 270 Calculus with Analytic Geometry I
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Perform experiments using appropriate environmental science laboratory techniques, as assessed by their laboratory reports and course-based research projects.
- Analyze scientific information to explain the biological and chemical functioning of the Earth system.
- Draw conclusions from real-world data using geographic information systems.

Global opportunities

Global experience: The natural world is complex and diverse, changing quickly from one biome to the next. The physical environment is highly varied across the globe, and so is the human treatment of it. Students who study abroad gain a deeper understanding of the global environment, how culture affects the environment and how to best communicate environmental research to a diverse audience.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the environmental science program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Career opportunities for graduates of this program include employment in federal and state agencies, such as the Bureau of Land Management, the Environmental Protection Agency and the U.S. Forest Service, and in private consulting firms and nongovernmental and nonprofit organizations. Graduates are also well qualified to pursue graduate studies in relevant areas of the natural sciences.

Environmental Science (Environmental Justice), BS (ASENVEJBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in environmental science with a concentration in environmental justice is dedicated to finding equitable solutions to the challenges posed by pollution, limited resources and climate change.

The study of human impact on Earth's ecosystems and resources has become increasingly important. This program is founded on established scientific research in organismal and ecosystem biology, chemistry, hydrology and water resources, and geographic information systems. This concentration applies an interdisciplinary approach to studying environmental issues from the perspective of moral theories, social systems and environmental research. Rounding out your preparation, the program includes a focus on the management, advocacy and communication skills necessary in various environmentally specific careers.

You are prepared to find equitable and innovative solutions to today's critical environmental challenges, including pollution and climate change, from the perspective of marginalized communities that may benefit from having their voices magnified. The program's distinguished faculty conduct research worldwide and engage you in creating new environmental policies and scientific knowledge that'll impact a rapidly changing world.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences or MAT 270 Calculus with Analytic Geometry I
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASENVEJBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: The natural world is complex and diverse, changing quickly from one biome to the next. The physical environment is highly varied across the globe, and so is the human treatment of it. Students who study abroad gain a deeper understanding of the global environment, how culture affects the environment and how to best communicate environmental research to a diverse audience.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the environmental science program are able to tailor their experience to their distinct interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates may apply their science research skills and knowledge to careers in wildlife and land conservation, sustainability, soil science, hydrology and water resources, environmental regulations and permitting, and environmental policy.

Environmental Studies, BA (ASENVBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

This program's name has changed effective Fall 2026. The previous name was Environmental Science.

Program description

The study of human impact on the earth's ecosystems and resources has become increasingly important over recent decades. The Bachelor of Arts program in environmental studies is dedicated to preparing you to become a leader who finds, communicates and advocates for sustainable solutions to the critical environmental challenges posed by habitat loss, pollution and climate change.

This interdisciplinary degree program ensures that you are well versed in the evidentiary study of the earth system, including knowledge across biology, geology, chemistry, statistics and geographic information systems. Rounding out your preparation, the program includes a focus on management, ethics and policy implications, and communication skills necessary in various environmentally focused careers.

The program's distinguished faculty conduct research across the globe, and they'll engage you in the process of catalyzing positive changes that impact a rapidly changing world.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze scientific information to explain the biological and chemical functioning of the Earth system.
Apply their understanding of human decision making in planning for environmental solutions.
Draw conclusions from real-world data using geographic information systems.

Global opportunities

Global experience: The natural world is complex and diverse, changing quickly from one biome to the next. The physical environment across the globe is highly varied, and so is the human treatment of it. Students who study abroad gain a deeper understanding of the global environment, how culture affects the environment and how to best communicate environmental research to a diverse audience.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the environmental studies program are able to tailor their experience to their specific interests and skill sets. Exploratory Health and Life Sciences, (ASHSCIEXPL)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

If you are not ready to choose a specific academic program of study, exploratory programs provide you with the opportunity to discover the options available to you. You are given the time, resources and guidance needed to assess your skills, interests and aptitudes.

Declaring exploratory status permits you to begin meeting general studies requirements that all ASU graduates must fulfill. The exploratory health and life sciences program also enables you to explore a variety of academic courses that may lead to a major interest in these fields.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 170 - Precalculus
or MAT 210 Brief Calculus or MAT 251 Calculus for Life Sciences or MAT 265 Calculus for Engineers I or MAT 270 Calculus w/Analytic Geometry I
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students with fewer than 45 credit hours may declare this exploratory program. Students may not accrue more than 45 hours while an exploratory student.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASHSCIEXPL~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

Forensic Science, BS (ASFOREBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Forensic science is the study and application of scientific methods to matters of law.

The Bachelor of Science program in forensic science is built on a solid foundation in biology and chemistry and

develops your basic and upper-level laboratory skills. You complete holistic, rigorous coursework in the natural and mathematical sciences to prepare to enter a competitive workforce. The interdisciplinary nature of the program is distinctly designed to train you in forensic techniques as varied as crime scene collection, evidence analysis and mock courtroom testimony.

Along with completing coursework and developing the scientific skills needed to succeed in this field, you can gain practical experience in a laboratory setting through research or an internship. You can conduct research under experts of varying forensic fields, including biology, entomology and anthropology. You also may apply for and participate in forensic science internships sponsored by crime labs around the country. Internships are highly competitive.

When seeking a job, internship, or volunteer position within a crime lab, you will be required to undergo an extensive background check that includes a polygraph exam, fingerprinting and drug testing. You can be disqualified for recent or past illicit drug use (including marijuana), felony convictions, drunk driving convictions or other reasons.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Forensic Psychology, MS

Forensic Science, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)

International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/forensic-science-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASFOREBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Summarize the main intellectual trends in biology and chemistry as related to the Forensic Sciences.
Evaluate the appropriateness of tests to examine various types of evidence including biological and physical evidence.
Describe the role and preparation of forensic experts to provide expert testimony in the legal system that is ethical and unbiased.

Global opportunities

Global experience: Studying abroad enables students in the forensic science program to learn about science and law enforcement in other countries.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Scientific and technological advances in the field of forensic science and continually increasing caseloads in law enforcement are projected to increase the number of forensic science technicians needed over the next decade. The U.S. Bureau of Labor Statistics estimates that between 2024 and 2034, employment of forensic science technicians will increase 13% --- an average increase much greater than for most occupations.

Graduates of the forensic science program are prepared to work in crime labs and private forensic science labs at the local, state and federal levels. Graduates also are prepared for graduate programs in forensic science, law school, medical school and related fields.

Forensic Science (Death Investigations), BS (ASFOREDIBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Forensic science is the application of science to the law or legal procedures. The medicolegal death investigation system is responsible for conducting investigations that certify the cause and manner of death in unnatural or unexplained circumstances --- those associated with forensic investigations.

The Bachelor of Science program in forensic science with a concentration in death investigations is built on a solid foundation of anatomy, biology and chemistry, which develops your basic and upper-level laboratory skills. You complete holistic, rigorous coursework in the natural and mathematical sciences to prepare to enter a competitive workforce. The interdisciplinary nature of the program is distinctly positioned to train you in forensic techniques such as advanced mapping, scene photography, biological evidence analysis and mock courtroom testimony.

Along with completing coursework and developing the scientific skills to succeed in this field, you can gain practical experience in a laboratory setting through research or an internship. You can conduct research under experts of varying forensic fields, including anthropology, biology, entomology, investigations and data science. You also may seek to apply for and participate in forensic science internships sponsored by crime labs or medicolegal offices around the country. If you are seeking a volunteer or internship position within a crime lab or medicolegal office (as well as job applicants), you often be required to undergo an extensive background check that includes a polygraph exam, fingerprinting and drug testing. Note you can be disqualified for recent or past illicit drug use (including marijuana), felony convictions, drunk driving convictions or other reasons.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus

or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Forensic Psychology, MS

Forensic Science, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/forensic-science-death-investigations/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASFOREDIBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Proficiently apply scientific techniques in a laboratory setting for the purpose of presentation in the legal system.
Evaluate human remains in a medicolegal context in a laboratory setting.
Provide expert testimony that is professional, conscientious, and ethical, particularly in regard to death investigations.

Global opportunities

Global experience: Studying abroad enables students in the forensic science program to learn about science and law enforcement in other countries.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

The U.S. Bureau of Labor Statistics assigns most categories of death investigators to the "forensic science technician" category. According to the bureau, the median annual salary for these professionals in 2024 was $67,440. The profession is projected to grow 13% by 2034 --- much faster than the annual average. About 2,600 openings for forensic science technicians are projected each year, on average, over the decade.

Competition for positions is strong, and this concentration gives graduates an advantage in applying for these positions. Graduates of the program are distinctly positioned, given their advanced education and training, to be very competitive job candidates and applicants for graduate and medical school in areas such as medicolegal death investigation, biology, predental forensic odontology, wildlife forensics, cultural resource management and preservation, international relief, forensic work, law and psychology, forensic nursing and related fields. Those who go into the job market take on roles such as autopsy technician, pathologist's assistant and coroner.

Gender, Women and Sexuality Studies, BS (ASWSTBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Science program in gender, women and sexuality studies is an interdisciplinary academic offering. You examine the cultural and social construction of gender; explore the history and experiences of women and their contributions to society; and study the influences of gender at a micro and macro level.

This program reflects the university's commitment to community engagement and real-world impact. Through its courses, research and activities, the program deepens your understanding of women and gender while supporting social justice efforts. You gain a solid knowledge base and educational foundation as well as the critical thinking skills necessary for dealing with changing gender roles in society.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

English, MA

Interdisciplinary Studies, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

History, BA (ASHISBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in history, you explore a broad span of history that covers the ancient world through the modern period and extends from Europe to Latin America and the United States.

In addition to learning about the origins and development of various peoples, ideas and institutions of the past, you engage in the practice of history by learning to conduct research, analyze historical evidence and formulate arguments using historiographical perspectives and methodological approaches.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

History (Secondary Education), BA (ASHISSEBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in history with a concentration in secondary education offers flexibility if you are considering a career in education for teaching and certification, while also providing you with the disciplinary knowledge of a traditional history degree. You understand history in all its depth while developing strong critical reading, writing and research skills as well as skills in oral presentation.

The demand for teachers in Arizona is high. You complete your teaching internship in school districts in the greater Phoenix area or for one of the 22 Native American nations in Arizona.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation

- Analyze events, issues, developments, relationships and perspectives in world, national and cultural histories using evidence from primary and secondary sources.
- Use digital technologies and Large Language AI models to complete historical research.

Global opportunities

Global experience: Studying abroad enables students in the history program to visit historical sites around the world and see the marks the past has left behind. Students can hear narratives from locals in different regions of the world and gain new perspectives on the past, which they can incorporate into their own teaching in the future.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive job market. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates possess the strong, practical teaching tools necessary to successfully teach middle or high school students. With the ability to find and evaluate evidence, form arguments and present analysis, graduates are also well suited for careers in a wide variety of industries and fields of work, and they have a solid foundation for graduate study in teaching, law, business and many other fields.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Interdisciplinary Arts and Performance, BA (ASIAPBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Accelerated options for this program are not currently available to ASU Online students.

Program description

The Bachelor of Arts program in interdisciplinary arts and performance is leading the way in interdisciplinary arts nationally, breaking traditional boundaries so that you can take your talents to new heights. Throughout the curriculum, the emphasis on interdisciplinary arts is continually inclusive, expanding, evolving and innovative, enabling you to shape your own creative pathways.

You engage with nationally and internationally known faculty to explore a variety of artistic disciplines in the online and immersion programs. Through these collaborations, you prepare for a complex and changing world using current approaches to aesthetic innovation.

In this major, you engage in practical and theoretical studies of visual, sonic, performance, game and interactive arts to become a versatile artist.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

English, MA

Interdisciplinary Studies, MA

Communication Studies, MA
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASIAPBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program' s learning outcomes include the following:

Illustrate the inter-relationship among the art forms of sound art, visual art, performance and media art.
Apply current levels of technology to original interdisciplinary art production.
Distinguish historical and contemporary differences in artistic practices within cultural contexts .

Global opportunities

Global experience: Performance and art transcend the boundaries of language and culture. Through distinct study abroad experiences, interdisciplinary arts and performance students are able to deepen their understanding of their field and acquire a global lens through which to view the influence of culture on their art.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive job market. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates of the interdisciplinary arts and performance program have received extensive preparation for advanced education or careers as artists, performers and creative professionals. They have a solid foundation from which to pursue their dream in their chosen creative field. With skill sets that prepare them for professional and entrepreneurial opportunities, graduates tap into evolving professions and the expanding field of art practice.

Since 1992, graduates of the program have gone on to a variety of occupations, such as:

art administrator
arts writer, scholar and critic
composer and sound artist
digital designer
film and video editor
recording artist
theatre artist
video and board game designer
videographer
visual artist in multiple mediums

Interdisciplinary Arts and Sciences, BA (ASIASBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in interdisciplinary arts and sciences, you build a flexible, customized degree that is specific to your career goals.

You tailor your program to emphasize interdisciplinary study combined with a specific focus area (e.g., business, communication studies, English, gerontology, history, psychology, preprofessional studies). For example, a focus area that blends business with arts and performance can lead to employment opportunities that aren't as easily accessed with a traditional business degree alone.

By providing the opportunity to combine disciplines, New College equips you with the specialized education you need

to reach your individual career goals. This program culminates in a capstone experience that provides a practical perspective, skills and connections, preparing you for graduate school or the corporate world.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

Global Management, MGM

English, MA

Interdisciplinary Studies, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASIASBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key problems in applied ethics, philosophy, religious studies or a combination thereof.
- Examine philosophical, and ethical theories.
- Critically appraise philosophical arguments in texts.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the interdisciplinary arts and sciences program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Students who participate in a study abroad program develop cultural competency and strengthen their leadership and critical thinking skills, enhancing their resumes and enabling them to stand out in a competitive job market. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared to make the transition smoothly to graduate school or postbaccalaureate employment in:

- business settings
- community settings
- cultural settings
- educational settings
- social sciences and human service settings

Those who plan to pursue graduate or professional degrees in law, business, helping professions or traditional disciplines benefit from the flexibility of this program, which prepares them for a wide variety of future academic and career pursuits.

Pharmacology and Toxicology, BS (ASPTXBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

In the Bachelor of Science program in pharmacology and toxicology, you learn how foreign materials react with human bodies. To have a thorough understanding of the interactions of chemicals in the biological system, you study both biology and chemistry, becoming familiar with chemical interactions at physiological, molecular and cellular levels.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 251 Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Forensic Science, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/pharmacology-toxicology-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASPTXBS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the pharmacology and toxicology program to expand their knowledge of how science impacts society through a variety of cultures.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Given the program's heavy focus on experiential learning within the laboratory, graduates are well prepared for careers in diverse areas such as government, industry, health care and business. They can pursue a number of career paths (note that some require further education), including:

- environmental risk assessor or consultant
- laboratory researcher
- pharmacist
- physician
- physician assistant
- toxicologist
- veterinarian

Graduates also may work for government agencies such as the Arizona Department of Environmental Quality and the Environmental Protection Agency, city governments or private companies. Possible areas of specialization include:

- clinical trials
- education
- product safety evaluation
- regulatory affairs

Pharmacology and Toxicology (Environmental Studies), BS (ASPTXEJBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

This program's name has changed effective Fall 2026. The previous name was Pharmacology and Toxicology (Environmental Justice).

Program description

While pharmaceuticals serve an important role in improving human (and animal) health, their impact on environmental systems is often harmful. Furthermore, these chemicals can enter environmental systems and cause detrimental effects. The Bachelor of Science program in pharmacology and toxicology with a concentration in environmental studies prepares you to explore answers to a nuanced question: When does a medication become a toxin?

This degree program is based on important underlying concepts in chemistry and biochemistry, anatomy, risk calculation and communication, and justice in community health outcomes. An interdisciplinary approach is used to provide you with the tools needed to examine community health outcomes from the perspective of moral theories, social systems and environmental research. Further, you gain skills in advocating for positive change and advancing sensible policies to protect human and ecosystem health.

Distinguished faculty in this interdisciplinary program guide you in applied research projects that examine the social, economic, health and moral impacts of environmental toxins. You prepare to seek equitable and innovative solutions to today's critical environmental health challenges, especially those related to these environmental toxins, to benefit communities and ecosystems. This combination of skills is ideal if you wish to enter careers in environmental health or health care.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

Political Science, BA (ASPOLBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

Political science is the study of governmental practices, politics and theories. Coursework in the Bachelor of Arts program in political science covers American institutions, international relations, political theory and world affairs.

The program helps you gain a basic understanding of the assumptions underlying political science, conduct meaningful research and formulate arguments. You learn through internships, service-learning and research opportunities, in addition to coursework.

The BA program requires a qualitative methods course, and the Bachelor of Science program requires a quantitative methods course.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Social Justice and Human Rights, MA

Social Data Science, MA

Global Management, MGM

Interdisciplinary Studies, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates of the program have a strong foundation to pursue staff, manager or policy analyst positions in local, state and federal government. This degree is recognized as a qualification for many careers in business (for-profit and nonprofit) and industry. Opportunities may include binational, cross-border positions linking U.S. and Mexican businesses, Arizona-Sonora local government, or local community groups on both sides of the border.

Many students use the degree as a gateway to law school or other professional schools or as a basis for further study in such fields as:

- community development
- political science
- public administration
- public policy
- social sciences
- urban affairs and urban and regional planning

Political Science, BS (ASPOLBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

Political science is the study of governmental practices, politics and theories. Coursework in the political science program covers American institutions, international relations, political theory and world affairs.

In the Bachelor of Science program in political science, you gain a basic understanding of the assumptions underlying political science and develop the research skills necessary to analyze complex sociopolitical issues. In addition to coursework, you learn through internships, service-learning and research opportunities.

The BS program requires a quantitative methods course, and the Bachelor of Arts program requires a qualitative methods course.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Psychology, BS (ASPGSBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Available accelerated bachelor's/master's degree program options may vary by modality (online vs. on-campus). Students should contact their academic advisor for more information.

Program description

Psychology is the scientific study of human behavior. This diverse field includes mental health and counseling as well as child development, neuroscience and brain function, memory and decision-making, behavior analysis, statistics and more. It also crosses over into other disciplines, such as medicine, law, business and economics.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The Bachelor of Science differs from the Bachelor of Arts in that it requires you to take additional lab science coursework and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. The BA program allows for you to gain exposure to a wider breadth of psychological and related topics through additional elective coursework. Both pathways provide a strong foundation for future graduate studies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or a higher level MATH course
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Psychology, MS

Forensic Psychology, MS

Social Justice and Human Rights, MA

Social Data Science, MA

Global Management, MGM

Psychology (Positive Psychology), MS

Psychology (Sport Psychology), MS

Psychology (Data Science), MS

Interdisciplinary Studies, MA

Communication Studies, MA

Psychology (Industrial and Organizational Psychology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the psychology program to be exposed to distinct differences in the human condition worldwide.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for careers in:

- government (sales and marketing specialist, human resources management professional)
- mental health professions (youth counselor, substance abuse counselor)
- social services (high school psychology teacher, occupational analyst)

The program also provides an excellent foundation for graduate study in fields such as public administration, law, family studies, communication and the various graduate program fields in psychology:

- clinical and counseling
- cognitive neuroscience
- developmental
- environmental
- experimental
- physiological
- social

Psychology, BA (ASPGSBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Available accelerated bachelor's/master's degree program options may vary by modality (online vs. on-campus). Students should contact their academic advisor for more information.

Program description

Psychology is the scientific study of human behavior. This diverse field includes mental health and counseling, as well as child development, neuroscience and brain function, memory and decision-making, behavior analysis, statistics and more. It also crosses over into other disciplines, including medicine, law, business and economics.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The Bachelor of Science differs from the Bachelor of Arts in that it requires additional lab science coursework and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. The BA program allows for exposure to a wider breadth of psychological and related topics through additional elective coursework. Both pathways provide a strong foundation for your future graduate studies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or a higher level MATH course
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some

combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Psychology, MS

Forensic Psychology, MS

Social Justice and Human Rights, MA

Social Data Science, MA

Global Management, MGM

Psychology (Positive Psychology), MS

Psychology (Sport Psychology), MS

Psychology (Data Science), MS

Interdisciplinary Studies, MA

Communication Studies, MA

Psychology (Industrial and Organizational Psychology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-psychology/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site

while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASPGSBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the psychology program to be exposed to distinct differences in the human condition worldwide.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in study abroad programs provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

A degree in psychology prepares graduates for a career in:

- government (sales and marketing, human resources management)
- industry
- mental health professions (youth counselor, substance abuse counselor)
- social services (high school psychology teacher, occupational analyst)

The degree also provides an excellent foundation for graduate study in fields such as public administration, law, family studies, communication and the various graduate program fields in psychology:

- clinical and counseling
- cognitive neuroscience
- developmental
- environmental
- experimental
- health
- legal
- physiological
- social

Psychology (Forensic Psychology), BS (ASPGSFPBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Accelerated options for this program are not currently available to ASU Online students.

Program description

Forensic psychology is the application of psychology to the law. The concentration in forensic psychology within the Bachelor of Science program in psychology combines general training in psychology and specialized coursework in criminal law, criminal behavior, the diagnosis and treatment of mental disorders, and legal decision-making.

When courts are faced with cases in which a psychology-related question arises, they may turn to psychologists for help. For example, psychologists might assist the court in understanding a criminal's mental state at the time of a crime or whether a particular jury might have been biased against a defendant based on his or her race. This is the realm of forensic psychology.

You learn about the various roles of psychologists in the legal system, which helps you to discover which roles you might like to pursue.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The BS degree differs from the Bachelor of Arts degree in that it requires additional coursework in lab science and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. The BA degree provides exposure to a broader range of psychological and related topics through additional elective coursework. Both pathways provide a strong foundation for future graduate studies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or a higher level MAT course
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Appropriately use quantitative analyses to argue for or against a particular hypothesis
- Formulate mock testimony in a fictional case that will set out their knowledge of the history, context, basis, best practices, and training components of the field of forensic psychology
- Conduct psychological research
- Effectively communicate forensic psychology information in writing

Global opportunities

Global experience: When studying abroad in the psychology program, students are exposed to unique differences in the human condition worldwide.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of

Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for careers in the criminal justice and mental health fields. The advanced statistical training further prepares graduates for careers and graduate training that involve psychological research, mental health, clinical research and legal policy research. They often work in the areas of criminal justice, law and human services. Many careers in psychology require graduate training, and this program also is designed to prepare students for master's degree and doctoral programs in legal, clinical and forensic psychology.

Psychology (Industrial and Organizational Psychology), BS (ASPGSIOPBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

The Bachelor of Science program in psychology with a concentration in industrial and organizational psychology prepares you to be well-versed in workplace empowerment strategies and interventions. The ultimate goal of this work is to increase the productivity and well-being of employees and the organizations that employ them.

You gain the foundational knowledge and skills of a traditional psychology program while focusing your studies on topics central to the field of industrial and organizational psychology. These topics include behavior and communication, testing and assessment, emotional intelligence and decision-making in organizations, among others.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The BS differs from the Bachelor of Arts in that it requires additional lab science coursework and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. Career opportunities

Graduates of this program are prepared to apply evidence-based approaches to transform the organizations of which they are a part. People with an educational background in industrial and organizational psychology can pursue career opportunities in government, industry, consulting and academia. Specific roles could include:

assessment development specialist
data scientist
human resources specialist
people science and strategy manager
product manager
psychometric analyst
service and testing supervisor
workforce planning manager

Psychology (Positive Psychology), BA (ASPGSPPBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Positive psychology is the scientific study of strengths and behaviors that enable individuals and communities to thrive. There is a rapidly growing body of research in the field of positive psychology, with many applications to individual well-being, relationships, the workplace and every other life domain.

In the Bachelor of Arts program in psychology with a concentration in positive psychology, you gain the foundational knowledge and skills of a traditional psychology program while focusing your studies on topics central to the field of positive psychology, such as optimism, gratitude, coping mechanisms, resilience and mindfulness.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The Bachelor of Science differs from the BA in that it requires you to take additional lab science coursework and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. The BA program allows for you to gain exposure to a wider breadth of psychological and related topics through additional elective coursework. Both pathways provide a strong foundation for future graduate studies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or a higher level MATH course
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Psychology, MS

Psychology (Positive Psychology), MS

Psychology (Sport Psychology), MS

Psychology (Industrial and Organizational Psychology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/positive-psychology-ba/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASPGSPPBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad in the psychology program exposes students to distinct differences in the human condition worldwide.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Individuals with psychology degrees can go on to secure jobs across a wide variety of fields, including human resources, research, business and economics, law, health and mental health, and education.

Graduates of this program are prepared to apply evidence-based approaches to transform their own lives and the lives of others. They are prepared for careers in:

- consumer relations and research
- employee training
- family support
- individual life coaching
- occupational analysis
- positive coaching in sports or organizations
- prevention education
- public or mental health program coordination
- youth development

The degree also provides an excellent foundation for graduate study in fields such as public administration, law, family studies, communication, social work and the various graduate program fields in psychology:

- clinical and counseling
- cognitive neuroscience
- developmental
- environmental
- experimental
- physiological
- social

Psychology (Positive Psychology), BS (ASPGSPPBS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Positive psychology is the scientific study of strengths and behaviors that enable individuals and communities to thrive. There is a rapidly growing body of research in the field of positive psychology, with many applications to individual well-

being, relationships, the workplace and every other life domain.

In the Bachelor of Science program in psychology with a concentration in positive psychology, you gain the foundational knowledge and skills of a traditional psychology program, while focusing your studies on topics central to the field of positive psychology, such as optimism, gratitude, coping mechanisms, resilience and mindfulness.

All New College psychology programs have a quantitative research focus, equipping you with skills in critical thinking, statistical analysis and academic writing. The BS differs from the Bachelor of Arts in that it requires additional lab science coursework and advanced statistical training, both of which are increasingly important for destinations in research or clinical practice. The BA program allows for exposure to a wider breadth of psychological and related topics through additional elective coursework. Both pathways provide a strong foundation for future graduate studies.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or a higher level MATH course
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Psychology, MS

Psychology (Positive Psychology), MS

Psychology (Sport Psychology), MS

Psychology (Industrial and Organizational Psychology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates with this degree are employable in a variety of settings, including refugee resettlement agencies; agencies and shelters that support survivors of domestic abuse; shelters for migrants, especially for unaccompanied minors; disaster relief agencies; organizations that assist survivors of sex trafficking and human labor trafficking; and agencies that assist veterans. Career opportunities include:

- charitable fundraiser (e.g., Nina Mason Pulliam Charitable Trust staff member)
- grant writer
- human rights lawyer
- humanitarian aid worker (e.g., U.N. High Commissioner for Human Rights aid worker, Oxfam aid worker)
- international governmental organization professional (e.g., U.N. staff member)
- investigative journalist
- lobbyist for human rights and social justice causes
- nongovernmental organization professional (e.g., Amnesty International professional)
- nonprofit agency manager (e.g., Special Olympics Arizona, international manager)
- public policy researcher

Social and Behavioral Sciences, BA (ASSBSBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

In the Bachelor of Arts program in social and behavioral sciences, you gain an understanding of assumptions underlying the social and behavioral sciences, enabling you to develop the research skills necessary to analyze complex social issues. This program can be tailored to your career goals. You are exposed to a variety of outlooks and challenges, and the program offers individual and group experiences working with faculty on concrete intellectual and policy issues.

The core courses provide you with the requisite background that enables you to better understand psychological and social principles related to the behavior of individuals across multiple social contexts and institutions.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the social and behavioral sciences program to develop an understanding of assumptions made about individuals and society. Firsthand experiences inside and outside the classroom help students develop skills to analyze complex social issues that affect them and those around them, domestically and internationally.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication

skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

This interdisciplinary degree program is an excellent option, aligning with individual interests and meeting the educational qualifications sought by many employers. Such a degree is competitive in most situations in which the disciplinary social and behavioral degrees are accepted, and it is advantageous to graduates seeking entry to broad professional programs such as regional planning or urban studies.

Graduates have a solid background in social sciences and methodologies that prepares them for graduate work in community development, counseling, criminal justice, professional schools (e.g., law, public administration, social work), public policy, social science disciplines, and urban studies or planning.

Careers include:

- advocate (e.g., immigration, children's, victim's)
- community developer
- human relations officer
- lawyer
- lobbyist
- mediator
- nonprofit manager
- social services case worker
- statistical analyst
- urban planner

Social and Cultural Analysis (American Studies), BA (ASSCAASBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

In the Bachelor of Arts program in social and cultural analysis with a concentration in American studies, you engage in the transdisciplinary and comparative study of the United States as a cultural and political site of ongoing change and conflict.

You learn diverse methods of analyzing nationalist politics, public and private cultural practices, transnationalism and the nation-making processes of migration. The curriculum also brings attention to identity formations around gender, sexuality, race and ethnicity.

As a transdisciplinary field, American studies unites the social sciences, the humanities and the arts to encourage you to engage in rigorous and adventurous conversations about American culture, politics and history. You explore knowledge beyond disciplinary boundaries by bringing differing perspectives and understandings into dialogue with one another and generating intellectual rigor and excitement.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Because of the emphasis on culture and identity, students develop respect for and sensitivity to diverse populations. Graduates of this program are prepared for graduate study and for careers in government, education, business and the nonprofit sector. Skills and knowledge acquired in the program enable graduates to flourish in areas as varied as:

civil rights organizations
colleges and universities
corporations
government agencies
law firms
libraries
museums
political action groups
public relations firms
social service agencies

Social and Cultural Analysis (Ethnicity, Race and Indigenous Studies), BA (ASSCAERBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in social and cultural analysis with a concentration in ethnicity, race and Indigenous studies combines transdisciplinary topics and methods for critical analysis of relationships among individuals, groups,

institutions, governments, economies and environments.

The program enriches your study of individual racialized and Indigenous groups by drawing on theories, methods and pedagogies in ethnicity, race and Indigenous studies while engaging complementary fields of literature, history, sociology, oral history, sexuality, queer studies, social justice, and transnational and cultural studies. Coursework grounds you in a deep understanding of the particular historical, social, economic, cultural and political experiences of individual racialized groups and in analysis of the relationships among them.

Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASSCAERBA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Ethnicity and race are at the core of culture, impacting areas as diverse as societal structure and religious norms. Studying abroad enables students to deepen their understanding of global ethnicities through firsthand experience. Students can explore the impact of culture, religion and law in the world's diverse ethnic environments.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Because of the program's emphasis on culture and identity, graduates have respect for and sensitivity to diverse populations, enabling them to flourish in careers in areas as varied as:

civil rights organizations
colleges and universities
government agencies
libraries
museums
nonprofit organizations
Peace Corps
political action groups
research organizations
social service agencies

Graduates are also prepared with the skills and knowledge necessary for graduate work.

Social and Cultural Analysis (Latin American Studies), BA (ASSCALABA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

The Bachelor of Arts program in social and cultural analysis with a concentration in Latin American studies provides a broad and vibrant framework for studying the diverse societies of Latin America, including diasporic communities. The

program provides opportunities for cross-cultural study and takes a robust, transdisciplinary approach to the literature, film, history, politics and culture of both Latin America and Latinas and Latinos living in the United States.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

English, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASSCALABA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the social and cultural analysis program to learn firsthand about the culture, language and food of Latin America. When studying in a Latin American country, students are able to immerse themselves in the culture and gain a greater understanding of that country and its people.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are

able to tailor their experience to their unique interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Because of the program's emphasis on culture and identity, students develop respect for and sensitivity to diverse populations, enabling them as graduates to flourish in areas as varied as:

civil rights organizations
colleges and universities
government agencies
libraries
museums
nonprofit organizations
Peace Corps
political action groups
research organizations
social service agencies

Graduates of this program are prepared with the skills and knowledge necessary for graduate work and for careers in public service, education, business, humanitarian work, law or health care.

Social and Cultural Analysis (Peace Studies), BA (ASSCAPSBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in social and cultural analysis with a concentration in peace studies is a distinct, transdisciplinary offering that fosters a critical investigation of peace. It does so primarily, but not exclusively, through a humanities lens, and it provides an analysis of peace in connection with issues such as gender, ethnicity, race and religion.

Students learn many perspectives on peace and approaches to it, including theories and practices of peace-building, nonviolence, and conflict avoidance and resolution. The program builds on the expertise of faculty in the humanities and social sciences in fields such as history, linguistics, literature, ethics, philosophy, sociology, ethnic studies, and women and gender studies.

competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Social and political institutions are increasingly focused on peace-building. As a consequence, numerous jobs now exist in peace-related sectors. The program's emphasis on the social aspects of peace, diversity and identity provides graduates with an awareness of the needs of diverse populations and the discourses that help create a culture of peace.

Graduates have the skills and knowledge necessary for graduate work and for professional and personal advancement in education, writing, policy, law, cross-cultural communication and ethics. Their knowledge can be applied in careers in government, education, business and nonprofit organizations and in areas as diverse as:

- civil rights organizations
- colleges and universities
- government agencies
- libraries
- museums
- nonprofit organizations
- the Peace Corps
- political action groups
- research organizations
- social service agencies

Social and Cultural Analysis (Queer and Sexuality Studies), BA (ASSCAQSBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in social and cultural analysis with a concentration in queer and sexuality studies combines transdisciplinary topics and methods. You critically analyze the function of ideologies of sexuality, the history and present conditions of sexual identity formation, structural inequalities and queer resistance to those same inequalities, and the diversity of LGBTQ+ communities.

Based on the premise that sex, gender and sexual orientation are both private experiences and profoundly political and public issues with important legal, social and cultural implications, the intellectual core of this program draws from theories, methods and pedagogies in queer theory and sexuality studies while engaging complementary fields of social justice, cultural studies, women's studies, gender studies, literature, history, sociology, psychology and transnational studies. Areas of emphasis include sexuality in culture, transnational queer studies, queer social movements and resistance, sexual fluidity, trans studies and critical heterosexualities.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics

or any math course that meets the MATH designation

Social and Cultural Analysis (Women and Gender Studies), BA (ASSCAWSBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

The Bachelor of Arts program in social and cultural analysis with a concentration in women and gender studies offers you a transdisciplinary curriculum that focuses on the diverse experiences of women in national and international contexts. You also examine the meaning of gender as a socially constructed category that shapes personal identities, beliefs, opportunities and behaviors.

You have access to a wide variety of classes that explore the intersections of gender, race, class and sexuality; the institutional structures that have an impact on women's and men's lives; and the highly varied feminist theories that seek to explain and influence women's status in society. Areas of emphasis include gender and sexuality, critical race feminism, gender and the borderlands, transnational feminism, social activism and social movements, histories of feminism and critical embodiment studies.

Sociology, BA (ASSOCBA)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley

Program description

Sociology is the study of the organization and development of societies and the institutions within them. The sociology program helps you better understand the development, structure, interaction and collective behavior of organized groups.

You explore the theories, practices and policies underlying the issues of social change, inequality and diversity. The Bachelor of Arts program in sociology provides you with training in important research skills used to describe, interpret and evaluate evidence across diverse settings important in the economy.

In this flexible program, you have opportunities to work collaboratively with faculty on intellectual and policy issues, and you develop the research skills necessary for the analysis of complex social issues.

The BA program requires a qualitative methods course, and the Bachelor of Science program requires a quantitative methods course.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for employment in corporate or governmental organizations or to continue their studies in graduate programs in sociology or social science, or in professional schools. They are able to apply the sociological perspective to a wide variety of jobs in:

- business and management
- the criminal justice system
- government
- health professions
- social services

Sociology coursework provides graduates with valuable preparation for careers in:

- journalism
- law
- nonprofit sector
- politics
- public administration
- public relations

These are all fields that involve investigative skills and an ability to work with diverse groups.

Graduates with an advanced degree in sociology may become:

- community activists
- community developers
- criminologists
- demographers
- gerontologists
- organizational advocates
- research analysts
- statisticians
- survey researchers
- urban planners

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASSPABA~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Effectively communicate orally in Spanish at the Intermediate to Advanced level based on the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
Effectively communicate using written Spanish at the Intermediate to Advanced level according to the ACTFL (American Council on the Teaching of Foreign Languages) Proficiency Guidelines.
Conduct research on a topic of their own interest using Spanish resources.

Global opportunities

Global experience: Studying abroad enables students in the Spanish program to enhance their understanding of the diversity of the world and the way in which knowledge of such diversity makes each person a better human being and citizen.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

The Spanish program offers excellent preparation for graduate school, specialized professional training, government careers, and commercial and international careers. Graduates are also prepared for employment as teachers in the elementary or secondary school system, especially in those districts where bilingual programs are integral to the curricula. In addition, graduates find employment as translators and interpreters in:

diplomatic corps
federal and state courts
law enforcement agencies
law firms
social agencies

Opportunities in the business world are also available to those fluent in Spanish. This is especially true in the American Southwest and through outlets opened by multinational trade agreements.

Statistics, BS (ASSTABS)

College/School: New College of Interdisciplinary Arts and Sciences

Campus: West Valley, Online

Program description

Almost every industry in the modern economy relies on the collection and analysis of data. The Bachelor of Science program in statistics prepares you to meet the demands of the ever-growing data analysis field and is a launchpad for a statistics-driven career.

Through innovative research, internships and other hands-on opportunities, you build a solid foundation of mathematics and computing, which helps you gain a thorough understanding of both theoretical and practical statistics.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
OR MAT 265 Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biological Data Science, MS

Biostatistics, MS

Biological Data Science (Biotechnology), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

(https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/statistics-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ASSTABS~null&college=CAS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Conduct statistical investigations to address real-world problems in context.
- Apply computational and mathematical methods to support statistical reasoning.
- Communicate statistical analyses and conclusions effectively to diverse audiences using written, oral, and visual formats.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students in the statistics program are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network. Participation in a study abroad program provides

students with the heightened cultural competency and strengthened leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

In the era of big data, there is great demand for individuals with all levels of statistical training. Graduates of this program have an understanding of the transdisciplinary nature of statistics. They are prepared for graduate study in statistics and related areas or for entry-level positions in a variety of fields, including business, government, the natural and social sciences, engineering and health care.

Statisticians are in high demand in many areas of industry, government and academia. Some areas with particularly high demand include:

- finance
- government policy
- manufacturing
- marketing
- media
- medical
- pharmaceutical
- research

Journalism and Mass Communication, Walter Cronkite School of

Content Creation, BA (CSCCBA)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Downtown Phoenix, Online

Program description

The Bachelor of Arts program in content creation prepares you to become a strategic storyteller who can create= compelling content and navigate the opportunities and challenges of the rapidly evolving creator economy. Program= coursework emphasizes content planning and development across platforms, mass communication models, how to= understand and grow digital audiences, and how to make informed decisions about ethics, copyright and monetization.

Content creation is more than just viral videos: You'll learn to apply professional tools, technologies and techniques to= different platforms (video, podcast and writing) and learn multimedia production skills, including video, audio, graphic= design and editing.

In addition to the storytelling tools and technologies, you'll learn how to develop a brand voice and visual identity, as= well as how to align content with audience engagement, and community building techniques. You'll use analytics tools= to uncover audience insights and measure performance, empowering you to guide content decisions and apply= research methods to develop relevant, meaningful content.

The business of content creation requires creators to learn to critically evaluate platform choices and monetization= strategies, identify and address ethical challenges in engagement, and influence and make strategic decisions about= content direction and partnerships.

You develop skills in multimedia production, social media strategy, audience analytics and integrated communication,= combining creativity with data-driven insight; and you gain real-world know-how through experiences such as the Los= Angeles Content Studio, brand content projects, media internships and content creation trips abroad. Upon= graduation, you'll be equipped for entrepreneurial and professional roles in content strategy, digital influence, brand= development, social media management and audience engagement across industries.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education= benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students in this program are required to complete a second course with the Global Communities, Societies and Individuals designation in addition to the one GCSI course required by ASU general studies requirements. To help meet this requirement, students are encouraged to pursue study abroad programs, including the more than 350 programs delivered by ASU's Global Education Office (https://goglobal.asu.edu/) and just-for-Cronkite-students programs that encourage content creation opportunities (including international photography projects, brand content creation opportunities at the Olympics, and more). Students may also pursue international internships for program credit.

Career opportunities

Graduates are prepared for careers in content strategy, podcasting, brand partnership and media creation, thanks to the hands-on training they received in courses and content labs. Popular career areas include:

- brand storytelling
- content creation
- digital marketing
- podcasting
- social media
- streaming production
- videography and photography

Digital Strategy and Audience Engagement, BS (CSDIGABS)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Downtown Phoenix, Online

This program's name has changed effective Fall 2026. The previous name was Digital Audiences.

Program description

Digital Strategy and Audience Engagement description
Virtually all companies and organizations seek professionals who know how to grow and engage audiences online.

The Bachelor of Science program in digital strategy and audience engagement prepares you to reach audiences strategically with digital content and demonstrate measurable growth.

The program features high-value, hands-on courses in which you develop strategies and tactics to grow audiences through audience analysis, search engine marketing, paid and organic social media campaigns, and digital content creation. Through elective courses, you develop additional expertise in areas such as management, audience data and intellectual property. You may also pursue internships for credit through Cronkite's media-focused career services team, and study audiences across the globe with international learning opportunities.

You graduate from the program ready to drive audience growth, execute digital marketing and advance businesses across industries.
Why study Digital Strategy and Audience Engagement at ASU?
At ASU's Walter Cronkite School of Journalism and Mass Communication, you gain real client experience as you learn from faculty with deep industry experience, including award-winning creators, marketers and agency professionals. You work with actual brands and real budgets using professional tools such as Google Analytics, Meta Ads and SEO software. You also earn industry-recognized certifications from Google, HubSpot and other leading platforms.

As you navigate this program, you build a portfolio that showcases your strategic, creative and analytical skills to employers, with the option to pursue for-credit internships and international learning experiences. You could create content at the Olympics, study strategic media with Real Madrid executives in Spain and explore digital culture in Japan.

The Cronkite School's #CronkiteNation alumni network is among the strongest in media, connecting you with mentors and job opportunities worldwide. A dedicated career team helps you secure internships and projects in digital marketing, advertising and brand strategy.

This degree goes beyond trends. You study consumer psychology, media ethics and long-term brand strategy. Plus, you gain a deep understanding of how to build lasting audience relationships in a rapidly changing digital landscape.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply the values, principles, ethics and legal standards of digital strategy and audience engagement in media work.
- Create digital strategy and audience engagement content and campaigns using professional tools, technology, and techniques.
- Critically evaluate information, content, and research in professional contexts.

Global opportunities

Global experience: As the world grows more connected, an understanding of other cultures and places is imperative. Studying abroad (https://goglobal.asu.edu/) helps students grasp how different cultures and media actors interact and influence audiences. Practical experience in programs that empower students to analyze and create media in international settings prepares students for careers that require knowledge of multicultural communication styles.

Career opportunities

Careers this Digital Strategy and Audience Engagement degree prepares you for

Graduates of the digital audiences program pursue careers as digital marketers, content marketers, social media managers, SEO strategists, digital advertising specialists, audience engagement specialists, influencers and brand managers. You'll develop the skills to analyze data, craft strategy and engage audiences across industries, or apply what you learn to grow your own business.

Journalism, BA (CSJMCBA)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Downtown Phoenix

This program's name has changed effective Fall 2026. The previous name was Journalism and Mass Communication.

Program description

Journalism description
This Bachelor of Arts in journalism at the nation's premier media school delivers hands-on learning that prepares you for careers in reporting, producing and audience engagement.

You report, produce, publish and analyze stories for real audiences, building the portfolio and professional confidence employers expect.

You develop in-demand skills across media, including techniques in investigation and interviewing; TV reporting and producing; video, audio and photo; audience engagement and multiplatform writing. Along the way, you learn to work with emerging approaches --- including AI-driven reporting and extended reality content --- so you are prepared not just

for today's jobs, but for the news roles still taking shape.

The immersive learning experiences are more than simulations. With opportunities to produce live evening newscasts that reach more than 1 million households, and leading impactful investigations and managing multiplatform coverage, you graduate with the practical experience, clips and industry connections that accelerate modern journalism. The school's "teaching hospital" model places you in professional newsrooms where you work with advanced technology and build a strong portfolio of published work. You also benefit from mentoring by award-winning reporters, producers and editors who bring real-world experience into the classroom.

You may apply to the school's accelerated master's degree program (https://cronkite.asu.edu/accelerated-masters-degrees/), which allows for the completion of both a bachelor's and master's degree in as little as four years. You can also become part of ASU's Barrett, The Honors College (https://barretthonors.asu.edu/).
Why study Journalism at ASU?
The Walter Cronkite School of Journalism and Mass Communication is repeatedly ranked among the world's leading journalism schools. Its reputation and alumni network open doors to media careers across the globe.

At the Cronkite School, you learn by doing. You have reported from the White House, produced photo essays in Rwanda, spent semesters at CNN International in Dublin and interned in newsrooms around the world. The Cronkite career team and alumni network --- known as #CronkiteNation --- connect you to internships, jobs and mentorship opportunities that help launch your career.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any MAT course that satisfies the math requirement
Math intensity: General

Concurrent program options

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=CSMCMSTBA~null&college=CCS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply the values, principles, ethics and legal standards of media in research.
- Critically evaluate information, content, and research in professional contexts.
- Produce clear, accurate, and engaging written content that meets professional standards.

Global opportunities

Global experience: As the world grows more connected, an understanding of other cultures and places is imperative. Studying abroad (https://goglobal.asu.edu/) helps students grasp how different cultures and media actors interact and influence audiences. Practical experience in programs that observe and analyze international media, news culture and journalism prepares students for careers that require the ability to articulate well and use knowledge of multicultural communication styles.

Career opportunities

A sophisticated understanding of media and mass communication is a critical asset for careers in business and government, and in the community and nonprofit sectors. Graduates have varied career opportunities, such as with:

- communications firms
- education institutions
- government entities
- political parties
- professional organizations
- publishing companies

Graduates also are prepared to pursue graduate studies in fields such as law, medicine, the arts, education and journalism.

Media Literacy, BA (CSDMLBA)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Online

This program's name has changed effective Fall 2026. The previous name was Digital Media Literacy.

Program description

Organizations of all sizes, public and private, are learning to cope with unprecedented changes in how people interact with and use information. The Bachelor of Arts program in media literacy prepares you to be at the forefront of the important strategic and ethical issues related to digital media, including automation, verification, security and privacy.

You learn to use advanced tools and tactics to analyze the context of the media that people consume. You verify and interpret information to make decisions that improve your own life and benefit the larger society.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/digital-media-literacy/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=CSDMLBA~null&college=CCS) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply the values, principles, ethics and legal standards of media literacy in media work.
- Critically evaluate information, content, and research in professional contexts.
- Actively and responsibly engage in media networks to promote critical engagement, media accountability, and informed civic participation.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, media literacy students are able to tailor their experience to their specific interests and skill sets. Whether in a

foreign country, in the U.S., or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

p>Graduates pursue a variety of professional and educational opportunities. The program's liberal arts foundation --- including critical thinking, communication, research and problem-solving --- gives students the intellectual agility to thrive in many fields. Specialization in the technical, ethical, legal, social and economic aspects of digital media is especially valuable, as employers of all sizes try to leverage digital media in serving consumers.

As organizations try to keep up with digital transformation and plan for the future, having a deep understanding of how digital ecosystems work is critical. Demand for graduates of media literacy in fields such as health care communication, public service and sustainability is anticipated to rise, and the U.S. Department of Labor categorizes many jobs in these areas as having a bright outlook in the job market.

Given increasing emphasis on teaching media literacy at every age level, graduates can expect to find employment opportunities in a variety of educational settings. Some may pursue graduate school in disciplines such as education, library science, law, public policy, business, public relations, digital strategy and journalism.

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Strategic Communication (Health), MA

Media Research and Technology, MS

Science Communication, MA

Sports Journalism, MA

Digital Strategy and Audience Engagement, MS

Sports Strategic Communication, MA

Journalism, MA

Investigative Journalism, MA

Strategic Communication, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
English proficiency requirements (https://admission.asu.edu/apply/international/undergrad/english-proficiency) for international student admission:

• TOEFL iBT®: score of at least 5 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5), or a TOEFL iBT® score of 100 if taken before January 21, 2026 in a testing center or
• IELTS: minimum score of 7.0 or
• Pearson Test of English: minimum score of 73 or
• Duolingo English test: minimum score of 120 or
• Cambridge English exam: minimum score of 185

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students in this program are required to complete a second course with the Global Communities, Societies and Individuals general studies designation, in addition to the one GCSI course required by ASU general studies requirements. To meet this, students are encouraged to pursue study abroad programs, including the more than 350 programs delivered by ASU's Global Education Office (https://goglobal.asu.edu) and just-for-Cronkite-students programs, that encourage multimedia creation and science communication opportunities. Students may also pursue international internships for program credit.

Career opportunities

Graduates are prepared for careers in science media, public relations for research and health organizations, science marketing, corporate communication in technology and biotech, educational and government outreach, and science storytelling thanks to the hands-on training they received through coursework and hands-on learning environments. Popular career areas include:

- digital media production
- media relations
- official public information
- public relations
- science, health or environmental communications
- science marketing
- science writing
- strategic communications

Sports Journalism, BA (CSSPJBA)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Downtown Phoenix

Program description

Sports Journalism description
Sports media is one of the media industry's fastest-growing sectors, with continued growth across multimedia outlets; social media; podcasting; and team, league and conference media platforms.

This Bachelor of Arts program in sports journalism provides unparalleled preparation for careers in sports media through coursework in sports writing, sports photography, TV sports reporting, live sports production, play-by-play coverage, documentary production and more.

You complete multiple professional experiences that advance your skills and portfolio. A dedicated career team connects you to internship opportunities with professional sports teams such as the Diamondbacks and the Suns, and

sports media outlets such as ESPN and Fox Sports. You also participate in the school's semester-long immersive learning experiences reporting from award-winning sports bureaus where you have the opportunity to cover teams and events in the NFL, MLB, NBA, WNBA, NHL, NASCAR, PGA, LPGA and Division I athletics.

Through this program, you have the opportunity to apply to the school's accelerated bachelor's degree and master's degree program (https://cronkite.asu.edu/accelerated-masters-degrees), which allows for the completion of both degrees in as few as four years. You can also qualify for ASU's Barrett, The Honors College (https://barretthonors.asu.edu/).
Why study Sports Journalism at ASU?
As part of the Walter Cronkite School of Journalism and Mass Communication, you gain real-world experience through immersive learning in real newsroom and sports environments. You produce professional-quality work and develop a strong portfolio with work employers want.

The Cronkite School is a premier sports journalism program located in a city with five professional teams, offering you opportunities to cover high school, collegiate and professional events, including Major League Baseball's annual Spring Training. You also pursue global reporting experiences, such as covering the Olympics, NCAA championships or international sports in places like Cuba, Rwanda and Spain.

You learn from award-winning journalists and industry leaders while connecting with the #CronkiteNation network, a community of alumni who work across sports media and mentor current students. A dedicated career services team helps connect you to internships, freelance projects and full-time roles in sports media and beyond.

You emerge from the program ready to inform communities, produce compelling content and contribute to meaningful conversations in sports and society.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Any MAT course that satisfies the math requirement
Math intensity: General

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply the values, principles, ethics and legal standards of sports journalism in media work.
- Create sports journalism for mass audiences using professional tools, technology, and techniques.
- Critically evaluate information, content, and research in professional contexts.
- Produce clear, accurate, and engaging written content that meets professional standards.

Global opportunities

Global experience: Sports and sports fans create one of the most globalized industries that unite cultures through passion for a favorite team, athlete or game. Study abroad programs (https://goglobal.asu.edu/) shed light on how

amazing stories of sport, triumph and defeat connect us all. Students apply practical skills and learn about international sports firsthand by covering regional teams or large-scale sporting events such as the Olympics.

Career opportunities

Careers this Sports Journalism degree prepares you for

Graduates pursue careers as sports reporters, producers, editors, commentators, sideline analysts, podcast hosts and social media producers. This degree also prepares you for graduate studies or law school, equipping you with versatile skills in writing, critical thinking, interviewing and storytelling that apply across media and communication fields.

Strategic Communication, BA (CSSTRCOMBA)

College/School: Walter Cronkite School of Journalism and Mass Comm

Campus: Downtown Phoenix

Program description

The Bachelor of Arts program in strategic communication prepares students to design and deliver persuasive messaging that drives engagement, builds brands and shapes public perception. Through the Cronkite School's renowned "teaching hospital" model, students gain hands-on experience in multimedia storytelling, campaign development, media relations and audience analytics. Coursework emphasizes research-driven strategy, ethical decision-making, project management and digital content creation. The program culminates with a professional experience in the award-winning Cronkite Agency, where students produce PR, digital marketing and content campaigns for real clients. With a record of national and local award-winning campaigns and alumni working for leading companies such as Disney, MGM, MTV and Meta, the program blends creativity with strategy to prepare students for success in a dynamic communication landscape.

Liberal Arts and Sciences, The College of

Actuarial Science, BS (LAACTBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Science program in actuarial science, you combine tools from mathematics, statistics and finance for risk analysis and management, resulting in improved forecasting and decision-making.

The program's core classes prepare you for the required professional actuarial credentialing exams offered by the Society of Actuaries and the Casualty Actuarial Society. The school also offers reimbursements upon completion for the cost of taking these exams. The actuarial science program has a strong partnership with the local insurance industry, leading to many internship and scholarship opportunities for you.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students who wish to change their major to actuarial science should have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A"), have completed at least MAT 265 Calculus for Engineers I or MAT 270 Calculus with Analytic Geometry I and CIS 105 Computer Applications and Information Technology (or CSE 100 or CSE 110), and have earned a grade of "B" or higher in all critical classes they have already completed.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAACTBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify the proper mathematical and statistical theories that may be applied to analyze actuarial data and draw analytical conclusions in a professional environment.
- Use mathematical theories to demonstrate mastery of analytical decision making based on both qualitative and quantitative data.
- Use statistical theories to demonstrate mastery of analytical decision making based on both qualitative and quantitative data.

Global opportunities

Global experience: Study abroad students are able to enhance their resumes with the heightened cultural competence, and leadership and critical thinking skills they acquire through this valuable experience.

Each of the more than 300 Global Education program options (https://goglobal.asu.edu/), whether in a foreign country, in the U.S. or online, provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences around the world, and enhance their ability to work with diverse groups of people.

Career opportunities

Actuary is consistently ranked as one of the best jobs in America. It offers a high income in a low-stress environment, with excellent job security, growth opportunities and work-life balance.

Risk is a part of daily life, and wherever there is risk, there are opportunities for actuarial approaches. Many actuaries work with insurance companies to calculate premiums, determine reserves needed to protect an organization's financial health, and ensure that organizations conform to stringent, complex legal mandates. Others help companies to establish retirement plans or are employed as consultants.

Graduates with a BS in actuarial science have skills that are transferable to any industry and any organization that requires risk modeling and management, including:

- colleges and universities
- consulting firms
- energy and environmental companies
- financial services
- government agencies
- insurance companies
- retirement and pension companies
- transportation companies

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure= (https://admission.asu.edu/academics/licensure) webpage.

African and African American Studies, BA (LAAFRBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in African and African American studies, you take an interdisciplinary approach to= learning about the history, culture, experiences and global contributions of people of African descent. You are exposed= to a variety of investigative methods, including historical analysis, literary analysis, archival research methods, and= rhetorical analysis advance skills in critical thinking, communication and research.

Through exploration of the art, history, literature, politics, cultural practices and communication styles of African-descended peoples, you develop a global understanding of how systems of inequality impact Black life and the role= social categories such race, gender, class, nationality and ethnicity play in ongoing configurations of the present social= world and its future.

Developing depth of knowledge about the legacy of African-descended peoples advances social awareness and fosters= indispensable analytic and critical thinking skills that equip you to bring change on a local, national and global scale.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Science and Technology Policy, MSTP

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/african-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAAFRBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Conduct independent research exploring critical issues in and to the African diaspora.
- Apply digital literacy skills to present their research in the field.
- Analyze the ways in which race intersects with other social locations in shaping ideology, as well as social, political and cultural institutions.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) enable students to experience a very different cultural environment. Learning to adapt can be challenging at first, but rewarding by the end of the adventure. Students learn to grow outside of their comfort zone as they learn more about the world, and they may even change the way they think about and perceive others.

The College of Liberal Arts and Sciences recommends specific study abroad programs (https://goglobal.asu.edu/students/major/sst/african-african-american-studies) for students majoring in African and African American studies.

Career opportunities

Through its emphasis on various social aspects and groups, the African and African American studies program provides graduates with practical applications useful for various workplaces. Through the program, graduates develop cultural sensitivity and are prepared for careers in:

- administration
- advertising
- business
- counseling
- education
- health care
- human resources
- international relations
- journalism
- justice
- law

Graduates are prepared for work in many arenas, including:

- business --- corporations, hotel chains, public relations firms, sales departments, the insurance industry, travel agencies
- civic --- civil rights organizations, nonprofit organizations, social service agencies, the Peace Corps
- education --- colleges and universities, museums, research organizations
- government --- law firms, political action groups

American Indian Studies, BS (LAAISBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in American Indian studies offers you an interdisciplinary, community-engaged study of Indigenous governance, culture and leadership. You examine sovereignty, law, education, health, environmental stewardship, communication and literature while exploring Indigenous histories, philosophies and cultural expression that connect the past to present challenges and future possibilities.

Grounded in Indigenous knowledge systems and ethical engagement, the program emphasizes research that responds to community priorities and supports Indigenous futures. You build critical thinking, communication and leadership skills through coursework that links policy, culture and sustainability to real-world applications. Flexible options enable you to customize your studies with electives in areas such as entrepreneurship, research methods, cultural preservation and data sovereignty.

Faculty bring wide-ranging expertise and strong partnerships with Indigenous communities, creating opportunities for hands-on learning and collaboration. You prepare to address complex issues in governance, health and education --- advancing Indigenous leadership, communication and community well-being.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

American Indian Studies (Indigenous Rights and Social Justice), MS

American Indian Studies (Tribal Leadership and Governance), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAAISBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Critically analyze a historical and contemporary issue related to American Indian nations & American Indian populations.
- Evaluate how sovereign powers are exerted through policy, law, and action by American Indian nations.
- Conduct research in the histories, cultures, political issues, or contemporary experiences of Indigenous peoples, utilizing interdisciplinary approaches from fields like anthropology, history, sociology, political science, and literature.

Global opportunities

Global experience: Through study abroad, students can connect with Indigenous cultures around the world and expand the lens through which they view North American Indigenous populations. They can learn alongside peers from other countries and develop professional skills that include teamwork and cross-cultural communication. Students can stay on track academically by completing courses while they are in one of more than 300 Global Education programs (https://goglobal.asu.edu/).

Career opportunities

Graduates are prepared for diverse careers that advance Indigenous leadership, community well-being, and self-determination. They have the analytical, communication and problem-solving skills valued in tribal governance, education, public policy, health and environmental management.

Graduates have the cultural understanding and practical experience to work effectively with Native nations, Indigenous organizations, and public or nonprofit institutions. Many pursue roles in policy analysis, research, advocacy and community engagement or continue to graduate school or professional study in law, education or public health. Graduates are equipped to collaborate across sectors and lead initiatives that promote equity, sustainability and Indigenous futures.

American Studies, BA (LAAMRSTBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts in American studies bridges multiple disciplinary approaches to explore the diverse cultures, global impact, social systems, gendered experiences, socioeconomic realities and political thought of the United States. The field of American studies centers an understanding of diversity in U.S. society; understanding of how the U.S. national community represents and imagines itself; understanding of how this resonates globally; and understanding the role of social movements seeking to achieve political, legal and economic change.

The program trains you in the history and trajectory of the field of American studies; explorations of racial literacy, gender, sexuality and socioeconomic experiences grounded in historical contexts that help in understanding contemporary U.S. populations; critical methodologies, including how alternative voices are key in research, politics and policy, and social justice work; applied research methods, particularly those that involve community involvement and engagement; and the use of storytelling and narratives to represent diverse communities and facilitate broader understanding across groups.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze key theories and concepts in American Studies and the role of U.S. diversity-related social movements in the field.
- Apply the theory and interdisciplinary research skills that define the field of American Studies.
- Effectively explain the important role that diversity plays in the field of American Studies.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to=
them, American studies students are able to tailor their experience to their specific interests and skill sets. Whether in a=
foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are=
exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for careers in policy, education and teaching, urban planning, sustainability, sociopolitical=
movements, environmental impacts, advocacy, nonprofit organizations, government, journalism, law and justice, public=
safety and health. This degree program is also well suited for pairing with other professional degrees that prepare=
students for these careers.

Anthropology, BA (LAASBBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Anthropology is the study of what it means to be human, in the broadest possible terms.

The Bachelor of Arts program in anthropology helps you recognize and solve problems facing the contemporary world=
through a broad understanding of humanity. Working alongside leading faculty members, you gain experience as an=
apprentice on research projects. You also have opportunities for hands-on learning through study abroad programs=
and field schools.

This interdisciplinary program offers you training in the main areas of anthropology, including archaeology,=
bioarchaeology, sociocultural anthropology and evolutionary anthropology.

If you are enrolled in this program, you may not pursue a concurrent Bachelor of Science in anthropology or BA in

global health, but you may add a minor in global health to complement the core curriculum. The BA in anthropology is best suited for you if your interests lie in society, culture and archaeology, while the BS is more suitable if you are interested in science and mathematics-based courses.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Health, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.

Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAASBBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze anthropological data practices using core anthropological methods.
- Apply the concept of cultural relativism to interpret cultural practices or behaviors.
- Analyze human biological variation using the principles of evolutionary theory.

Global opportunities

Global experience: Study abroad can be crucial in helping students gain a clearer view of the world, its peoples and the complex challenges that exist for all. There are numerous faculty-directed study abroad programs designed to connect students with issues that impact local communities yet transect boarders. Whether studying environmental health issues in Australia or investigating ancient cultures in France, students can see the world and gain hands-on experience to prepare for a future-focused career through Global Education programs (https://goglobal.asu.edu/). The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/anthropology) for students majoring in anthropology.

Career opportunities

Graduates have the knowledge and skills they need to find jobs in fields where understanding complex human behavior is important.

The demand in the job market for people with an anthropology background is stimulated by a growing need for researchers and analysts with keen thinking skills who can manage, evaluate and interpret complex problems and work effectively across cultures and languages. As the many spheres of human interaction expand globally, people trained in anthropology are increasingly sought for their broad, holistic knowledge and perspectives, the hallmarks of anthropology.

Career opportunities include:

- acting as legal advocates for displaced communities like refugees in international cases
- analyzing and proposing policies
- conducting postgraduate academic research or teaching
- consulting for private and public organizations
- curating cultural resources
- health system administration or health care professionals
- directing nonprofit organizations
- directing programs in the private or public sector
- managing culture or heritage resources in private or public sectors
- planning pandemic and other disaster response

Asia Studies (East Asia), BA (LAHSTEABA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

ASU is no longer accepting new students to this program. Interested students should apply to the Global Asia Studies BA program.

Program description

The Bachelor of Arts program in Asia studies offers you the opportunity for in-depth study of East Asia, South Asia or Southeast Asia through a coherent concentration of academic study across a number of disciplines. The transdisciplinary approach provides you with a variety of intellectual tools that enable you to address contemporary political, social and cultural issues in Asia and apply your knowledge in various academic and practical settings.

The Asia studies degree program with a concentration in East Asia includes coursework on China, Japan, Korea and Taiwan.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.
