Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Mechanical Engineering, BSE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Engineering, BSE
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESMAEMBSE
Minimum credit hours: 120
Upper division minimum credit hours: 46

Requirement	Minimum Grade	Credit Hours
Mechanical Engineering Core		
EEE 202 Circuits I	C	4
FSE 100 Introduction to Engineering	C	2
MAE 201 Mechanics of Particles and Rigid Bodies I: Statics	C	3
MAE 202 Mechanics of Particles and Rigid Bodies II: Dynamics	C	3
MAE 213 Mechanics of Materials	C	3
MAE 214 Computer-Aided Engineering I	C	1
MAE 215 Introduction to Programming in MATLAB	C	1
MAE 241 Introduction to Thermodynamics	C	3
MAE 242 Introduction to Fluid Mechanics	C	3
MAE 301 Applied Experimental Statistics	C	3
MAE 318 System Dynamics and Control I	C	3

Requirement	Minimum Grade	Credit Hours
MAE 384 Advanced Mathematical Methods for Engineers (QTRS)	C	3
MEE 322 Structural Mechanics	C	3
MEE 323 Computer-Aided Engineering II	C	2
MEE 340 Heat Transfer	C	3
MEE 342 Principles of Mechanical Design	C	3
MEE 491 Experimental Mechanical Engineering	C	2
MSE 250 Structure and Properties of Materials	C	3

Mechanical Engineering Major Requirements

MAE 417 System Dynamics and Control II	C	3
MEE 488 Mechanical Engineering Design I	C	3
MEE 489 Mechanical Engineering Design II	C	3
Upper Division Mechanical Engineering Technical Electives	C	9

> *Students who do not meet the enrollment requirements for these courses (excluding MAE and MEE prefixes) may be allowed to enroll with instructor consent. Courses not listed here require a department petition form. To take any 494 class, please check with your advisor first. A max of 3 credits from MAE 484/499 can be applied toward the TE requirements.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

CGF 101 First-Year Student: Introduction to ASU and Your Academic Community	C	1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition** **OR** **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Related Area and Technical Elective options may require prerequisite courses. Students must meet all prerequisite requirements to enroll or select a different option.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Ocean Futures, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Sustainable Food Systems, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Rob Walton College of Global Futures
Plan Code: SUSFOSYSBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Sustainability Quantitative Courses		
SOS 102 Quantitative Reasoning for Sustainability (QTRS)	C	
SOS 211 Calculus and Probability for the Life and Social Sciences (MATH)	C	3
ECN 221 Business Statistics (QTRS) OR SOC 390 Social Statistics I (QTRS) OR STP 226 Elements of Statistics (QTRS) OR STP 231 Statistics for Life Science (QTRS)	C	3
Sustainability Core Courses		
SOS 110 Building a Sustainable World (SUST)	C	3
SOS 220 Systems Thinking	C	3
SOS 310 Equity, Justice and Sustainability (HUAD)	C	3
SOS 311 Future Thinking and Strategies	C	3

Requirement	Minimum Grade	Credit Hours
Sustainable Food Systems Required Science Courses		
CHM 101 Introductory Chemistry (SCIT) OR CHM 113 General Chemistry I (SCIT) OR CHM 114 General Chemistry for Engineers (SCIT)	C	4
SOS 182 Water Planet (SCIT)	C	4
NTR 241 Human Nutrition	C	3
SOS 326 Sustainable Ecosystems	C	3
Sustainable Food Systems Major Courses		
SFS 215 Fundamentals of Sustainable Food Systems (SUST)	C	3
SFS 216 The Sustainable Plate (SUST)	C	3
SOS 327 Sustainable Food and Farms	C	3
Skills Electives	C	6
ACC 382 Accounting and Financial Analysis		
AME 130 Prototyping Dreams (HUAD)		
CIS 105 Computer Applications and Information Technology (QTRS)		
CIS 300 Web Design and Development

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Review the "ThunderGuide" located on your Canvas course page for both ASU and Thunderbird-specific information. See advisor for enrollment details. Visit the Thunderportal for additional student resources.

Meet with your academic advisor to begin planning for the best study abroad options for your major.

Thunderbird Proficiency Requirement

The Thunderbird proficiency requirement may be satisfied through one of the following: completion of a language course at the intermediate level (202 or equivalent); completion of an upper-division course or courses taught in a foreign language, taken in the United States or the relevant country; or, completion of six credit hours of upper-division courses that have the global communities, societies and individuals (GCSI) designation (in addition to the courses used to meet the university general studies requirements). Students must earn a grade of "C" (2.0) or higher in the courses taken to fulfill this requirement. Most students will fulfill this requirement through the completion of TGM 353 and TGM 468. Adjustment to upper-division and elective hours may be required based on the coursework taken (see advisor).

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Degree: Bachelor of Science, BS
College/School: Thunderbird School of Global Management
Plan Code: TBINTRABS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Minimum "C" (2.00) grade is required in all coursework in this major.		

Major Core

CIS 105 Computer Applications and Information Technology (QTRS)	C	3
COM 225 Public Speaking and Presentations (CIVI)	C	3
ECN 211 Macroeconomic Principles (SOBE)	C	3
ECN 212 Microeconomic Principles (SOBE)	C	3
ECN 306 Survey of International Economics (GCSI)	C	3
MAT 210 Brief Calculus (MATH)	C	3
MAT 211 Mathematics for Business Analysis	C	3
STP 226 Elements of Statistics (QTRS)	C	3

Requirement	Minimum Grade	Credit Hours
Upper Division Ethics Course		
LES 305 Business Law and Ethics for Managers PHI 306 Applied Ethics (CIVI) PHI 360 Business and Professional Ethics (HUAD) PHI 406 / IAS 406 Moral Dilemmas	C	3

TGM Core

TGM 101 Principles of Global Management (GCSI)	C	3
TGM 200 Principles of Accounting for Global Organizations	C	3
TGM 204 Principles of Marketing for Global Organizations	C	3
TGM 300 Principles of Finance for Global Organizations	C	3
TGM 310 Supply Chain Operations for Global Organizations	C	3
TGM 312 Big Data in the Global Economy	C	3
TGM 353 Regional Management Environment (GCSI)	C	3
TGM 391 Global Business and Professional Development Skills	C	1
TGM 430 International Trade and Regional Economic Agreements	C	3
TGM 460 Global Risk Assessment and Management	C	3
TGM 468 States and Markets in a Global Economy (GCSI)	C	3

Requirement	Minimum Grade	Credit Hours
TGM 478 Cross-Cultural Communication and Negotiation	C	3
TGM 484 Internship An internship is required. Review the "ThunderGuide" Canvas course module titled "TGM 484 Internship Information." Work with your academic advisor, the T-bird Career Management Center (CMC) and ASU's Career Services to start preparing for this experience.	C	3 - 6
TGM 489 Multinational Organizational Leadership	C	3
TGM 498 Pro-Seminar	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

TGM 191 First-Year Seminar		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition** **OR** **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Review the "ThunderGuide" located on your Canvas course page for both ASU and Thunderbird-specific information. See advisor for enrollment details. Visit the Thunderportal for additional student resources.

Meet with your academic advisor to begin planning for the best study abroad options for your major.

Thunderbird Proficiency Requirement

The Thunderbird proficiency requirement may be satisfied through one of the following: completion of a language course at the intermediate level (202 or equivalent); completion of an upper-division course or courses taught in a foreign language, taken in the United States or the relevant country; or, completion of six credit hours of upper-division courses that

have the global communities, societies and individuals (GCSI) designation (in addition to the courses used to meet the university general studies requirements). Students must earn a grade of "C" (2.00) or higher in the courses taken to fulfill this requirement. Most students will fulfill this requirement through the completion of TGM 353 and TGM 468. Adjustment to upper-division and elective hours may be required based on the coursework taken (see advisor).

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Nutrition and Health, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: NHFNUENBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
HSC 310 Health Communication	C	3
HSC 355 Eating for Lifelong Health (SOBE) OR **NTR 450 Nutrition in the Life Cycle (SOBE)**	C	3
MKT 390 Essentials of Marketing OR **MKT 391 Essentials of Selling** OR **MKT 395 Essentials of Advertising and Marketing Communication**	C	3
NTR 142 Applied Food Principles	C	3
NTR 150 Introduction to the Professions in Nutrition and Dietetics	C	1
NTR 341 Medical Nutrition Therapy I OR **NTR 345 Development of Healthy Cuisines** Students following the Pre-Dietetics Focus Area should take NTR 341. Students following the Community Nutrition Focus Area or Food Service Operations Focus Area should take NTR 345.	C	3

Requirement	Minimum Grade	Credit Hours
NTR 344 Nutrition Management and Leadership	C	3
NTR 348 Cultural Aspects of Food (GCSI)	C	3
NTR 350 Nutrition Counseling	C	3
NTR 402 Preprofessional Prep in Nutrition Careers	C	1
NTR 448 Community Nutrition NTR 448 fulfills the College of Health Solutions Experiential Learning requirement.	C	3
Students should select and follow a Focus Area to complete a total of 18 credit hours, at least nine of which must be upper division.		
ASU Online students pursuing the Pre-Dietetics Focus Area should note that CHM 235 lab requires hands-on experiments, which are conducted at the ASU Tempe campus during a one-week summer session. Lab reports will be completed in the weeks following the in-person session. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.		
Upper Division Focus Area Courses **Community Nutrition Focus Area:**	C	9

Requirement	Minimum Grade	Credit Hours
CHS 340 Health Behavior Theory		
EDS 301 Sustainable Community Design and Practices (SUST)		
EXW 446 Worksite Wellness		
HCD 332 Population Health Policy and Legislation		
HCR 335 Program Development and Management for Community Health		
HEP 348 Methods of Health Education		
HEP 380 Body Image and Wellness		
HEP 444 Epidemiology		
HEP 452 Health Advocacy in Health Education		
PBH 422 Health Disparities and Access to Health		
PBH 435 Environmental and Occupational Health		
Food Service Operations Focus Area:		
AGB 425 Food Supply Networks		
AGB 445 Food Retailing		
AGB 456 Food Product Innovation and Development		
MGT 380 Management and Strategy		
NTR 343 Food Service Purchasing		
NTR 353 The Western Diet		

Requirement	Minimum Grade	Credit Hours
NTR 360 Nutrition Entrepreneurship		
NTR 445 Management of Food Service Systems		
NTR 455 Retail Food Service Operations		
SOS 327 Sustainable Food and Farms		
Pre-Dietetics Focus Area:		
BCH 361 Principles of Biochemistry		
NTR 343 Food Service Purchasing		
NTR 445 Management of Food Service Systems		
Focus Area Courses	C	9
Community Nutrition Focus Area:		
CHS 340 Health Behavior Theory		
EDS 301 Sustainable Community Design and Practices (SUST)		
EXW 446 Worksite Wellness		
HCD 332 Population Health Policy and Legislation		
HCR 231 Fundamentals of Community Health		
HCR 335 Program Development and Management for Community Health		

Requirement	Minimum Grade	Credit Hours
HEP 102 Foundations of Health Education and Health Promotion		
HEP 348 Methods of Health Education		
HEP 380 Body Image and Wellness		
HEP 444 Epidemiology		
HEP 452 Health Advocacy in Health Education		
PBH 422 Health Disparities and Access to Health		
PBH 435 Environmental and Occupational Health		
POP 100 Introduction to Population Health		
Food Service Operations Focus Area:		
AGB 215 / SFS 215 / SOS 215 Fundamentals of Sustainable Food Systems (SUST)		
AGB 425 Food Supply Networks		
AGB 445 Food Retailing		
AGB 456 Food Product Innovation and Development		
CIS 105 Computer Applications and Information Technology (QTRS)		
MGT 380 Management and Strategy		
NTR 343 Food Service Purchasing		
NTR 353 The Western Diet		

Requirement	Minimum Grade	Credit Hours
NTR 360 Nutrition Entrepreneurship		
NTR 445 Management of Food Service Systems		
NTR 455 Retail Food Service Operations		
SOS 327 Sustainable Food and Farms		
Pre-Dietetics Focus Area:		
BCH 361 Principles of Biochemistry		
CHM 231 Elementary Organic Chemistry (SCIT)		
CHM 235 Elementary Organic Chemistry Laboratory (SCIT)		
CHS 260 Health Professions Terminology		
BIO 202 Human Anatomy and Physiology II (SCIT) **or** MIC 205 Microbiology (SCIT) **AND** MIC 206 Microbiology Laboratory (SCIT)		
NTR 343 Food Service Purchasing		
NTR 445 Management of Food Service Systems		

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR CHS 300 An Exploration of Well-Being (SOBE) First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3

College of Health Solutions students must complete three credits of Experiential Learning coursework. This requirement is fulfilled for Applied Nutrition and Health, BS students by the required NTR 448 Community Nutrition course. If interested, students may explore additional experiential learning opportunities.

Foundational Courses

BIO 160 Introduction to Anatomy and Physiology (SCIT) OR **BIO 201 Human Anatomy and Physiology I (SCIT)**	C	4
BIO 202 Human Anatomy and Physiology II (SCIT) OR **MIC 205 Microbiology (SCIT)** **AND** **MIC 206 Microbiology Laboratory (SCIT)**	C	4
CHM 101 Introductory Chemistry (SCIT)	C	4
HCD 300 Biostatistics (QTRS) OR **STP 226 Elements of Statistics (QTRS)**	C	3
HSC 210 Cultural Aspects of Health (GCSI)	C	3
MAT 114 College Mathematics (MATH) OR **MAT 117 College Algebra (MATH)**	C	3
NTR 241 Human Nutrition	C	3
NTR 290 Introduction to Evidence-Based Research in Nutrition	C	3

Students following the Community Nutrition Focus Area should take BIO 201 and BIO 202 toward the Foundation Courses requirements.

Students following the Food Service Operations Focus Area should take BIO 160 and MIC 205 & MIC 206 toward the Foundation Courses requirements.

Students following the Pre-Dietetics Focus Area should take MAT 117, BIO 201 and BIO 202 toward the Foundation Courses requirements.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

CHS 101 The ASU Experience for Health Solutions Students		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students following the Pre-Dietetics Focus Area will be eligible to apply to a graduate program in Dietetics which integrates the required coursework and experiential learning to prepare students for the Registered Dietitian (RD) exam. Upon passing the RD Exam, graduates can work as Registered Dietitian Nutritionists (RDN). For more information about institutions that offer a graduate program in Dietetics, please visit The Academy of Nutrition and Dietetics website and search for *Graduate Programs*, which are available in several states and online.

The Pre-Dietetics Focus Area requires both BIO 202 and MIC 205/206. BIO 202 should be completed before MIC 205/206.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Science (Applied Nutrition and Health), BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: College of Health Solutions
Plan Code: ECNTRBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
HSC 310 Health Communication	C	3
HSC 355 Eating for Lifelong Health (SOBE) OR NTR 450 Nutrition in the Life Cycle (SOBE)	C	3
MGT 380 Management and Strategy	C	3
NTR 100 Introduction to Nutrition Science OR NTR 241 Human Nutrition	C	3
NTR 343 Food Service Purchasing	C	3
NTR 344 Nutrition Management and Leadership	C	3
NTR 348 Cultural Aspects of Food (GCSI)	C	3
NTR 445 Management of Food Service Systems	C	4
NTR 448 Community Nutrition	C	3
Major Electives	C	6

Requirement	Minimum Grade	Credit Hours
BCH 361 Principles of Biochemistry		
BIO 201 Human Anatomy and Physiology I (SCIT)		
BIO 202 Human Anatomy and Physiology II (SCIT)		
CHM 231 Elementary Organic Chemistry (SCIT)		
CHM 235 Elementary Organic Chemistry Laboratory (SCIT)		
CHS 260 Health Professions Terminology		
CIS 300 Web Design and Development		
MIC 205 Microbiology (SCIT)		
MIC 206 Microbiology Laboratory (SCIT)

Curriculum - Biomedical Informatics and Data Science, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: ESBMIBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
BMI 102 Introduction to Population Health Informatics	C	3
BMI 201 Introduction to Clinical Informatics	C	3
BMI 211 Clinical Decision Analysis	C	3
BMI 221 Knowledge Representation for Biomedical Informatics	C	3
BMI 311 Biomedical Artificial Intelligence	C	3
BMI 312 Health Data Mining	C	3
BMI 330 Topics in Translational Bioinformatics	C	3
BMI 404 Clinical Environments This course requires in-person observations within local health clinics. To conduct clinical observations, students must meet additional requirements prior to course enrollment, which typically include proof of vaccination, fingerprint clearance and/or background check, and a drug test.	C	3

Requirement	Minimum Grade	Credit Hours
BMI 410 Database Management in Health Care	C	3
BMI 461 Advanced Topics in Biomedical Informatics I	C	3
BMI 465 Comparative Genomics	C	3
BMI 482 Capstone I OR **CHS 492 Honors Directed Study**	C	3
BMI 483 Capstone II OR **CHS 493 Honors Thesis** BMI 483 and CHS 493 fulfill the College of Health Solutions Experiential Learning requirement.	C	3
Computer Science Courses		
BMI 110 Introduction to Python	C	3
BMI 210 Data Structures and Algorithms in Python	C	3
BMI 310 Health App Development	C	3
BMI 440 Biomedical Software Engineering	C	3
College of Health Solutions Requirements		
CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students must take CHS 100; students who enter with more than 30 credits must take CHS 300 instead.	C	3

College of Health Solutions students must complete three credits of Experiential Learning coursework. This requirement

is fulfilled for Biomedical Informatics, BS students by BMI 483 or CHS 493. If interested, students may explore additional experiential learning opportunities.

Foundational Courses

BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 340 General Genetics	C	4

Major Core Courses		
EXW 215 Resistance Training and Recovery Techniques	C	3
EXW 217 Cardiorespiratory and Flexibility Training	C	3
EXW 330 Kinesiological Foundations of Movement	C	4
EXW 344 Impact of Physical Activity on Health and Disease	C	3
EXW 420 Exercise Testing	C	4
EXW 427 Exercise Prescription for Cardiometabolic Health	C	3
EXW 484 Internship EXW 484 fulfills the College of Health Solutions Experiential Learning requirement.	C	3
KIN 101 Introduction to Kinesiology	C	3
KIN 290 Introduction to Evidence-Based Practice OR **NTR 290 Introduction to Evidence-Based Research in Nutrition**	C	3
KIN 352 Psychosocial Aspects of Physical Activity (SOBE)	C	3

Requirement	Minimum Grade	Credit Hours
KIN 447 ECG Interpretation	C	3
SSP 315 Exercise and Sport Physiology	C	3
SSP 316 Exercise and Sport Physiology Laboratory	C	1
Upper Division Focus Area Courses	C	15

Exercise for Chronic and Neurological Conditions Focus Area:

- CHS 400 Adaptive Exercise Program Practical Experience
- EXW 426 Exercise for Neuromuscular Conditions
- EXW 438 Obesity, Exercise and Health
- HEP 410 Obesity Perspectives and Prescriptions
- KIN 442 Fuel Metabolism
- KIN 443 Exercise Endocrinology
- KIN 444 Metabolic Adaptations to Exercise Training
- PRM 453 Inclusive Community Sport
- RTH 364 Foundations in Recreational Therapy (SOBE)
- RTH 384 Recreational Therapy Practicum

Motor Control Focus Area:

- KIN 345 Motor Behavior

Requirement	Minimum Grade	Credit Hours
KIN 415 Theory of Corrective Exercise		
KIN 421 Human Motor Control		
KIN 422 Motor Control in Special Populations		
KIN 424 Neural Aspects of Movement and Rehabilitation		
Muscular Fitness and Performance Focus Area:		
EXW 425 Exercise Prescription for Health and Wellness		
KIN 416 Low Back Pain: Muscles and Movement		
KIN 460 Theory of Strength Training		
KIN 465 Muscle Physiology		
SSP 454 Sports Medicine		
Nutrition for Health and Performance Focus Area:		
HSC 355 Eating for Lifelong Health (SOBE)		
NTR 345 Development of Healthy Cuisines		
NTR 353 The Western Diet		
NTR 448 Community Nutrition		
NTR 450 Nutrition in the Life Cycle (SOBE)		
NTR 457 Sports Nutrition		

Requirement	Minimum Grade	Credit Hours
Physical Activity Psychology Focus Area:		
EXW 400 Stress Management for Wellness		
HEP 361 Digital Health Communication and Education		
KIN 348 Psychological Skills for Optimal Performance		
KIN 450 Biopsychosocial Perspectives on Physical Activity and Health		
KIN 452 Exercise Psychology (SOBE)		
KIN 454 Motivational Theory in Exercise and Health		

Students may select courses from any combination of the focus area lists to expand their knowledge in different areas. The lists are separated into several categories that span the field of exercise and health optimization.

Students may apply up to six additional credits of EXW 484 Internship toward the Focus Area requirement. Completions beyond nine credit hours will apply toward university electives.

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3

College of Health Solutions students must complete three credits of Experiential Learning coursework. This requirement is fulfilled for Clinical Exercise Science, BS students by the required EXW 484 Internship course. If interested, students may explore additional experiential learning opportunities.

Foundational Courses

BIO 201 Human Anatomy and Physiology I (SCIT)	C	4
BIO 202 Human Anatomy and Physiology II (SCIT)	C	4
CHM 101 Introductory Chemistry (SCIT) OR **CHM 113 General Chemistry I (SCIT)**	C	4
HCD 300 Biostatistics (QTRS) OR **PSY 230 Introduction to Statistics (QTRS)** OR **STP 226 Elements of Statistics (QTRS)** OR **STP 231 Statistics for Life Science (QTRS)**	C	3
MAT 117 College Algebra (MATH) OR **MAT 170 Precalculus (MATH)**	C	3
NTR 241 Human Nutrition	C	3
PSY 101 Introduction to Psychology (SOBE)	C	3

Students interested in Physical Therapy school are recommended to take MAT 170 and CHM 113 toward the Foundation Courses requirements, and to complete CHM 116 as one of their university electives.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.		
CHS 101 The ASU Experience for Health Solutions Students		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship

information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Dietetics, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: NHDIETCSBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
HSC 310 Health Communication	C	3
NTR 142 Applied Food Principles	C	3
NTR 150 Introduction to the Professions in Nutrition and Dietetics	C	1
NTR 341 Medical Nutrition Therapy I	C	3

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

In order to be competitive for a dietetic internship to earn the Registered Dietitian (RD) credential after graduation, it is recommended that students maintain a minimum ASU cumulative GPA of 3.00 or higher.

The Commission on Dietetic Registration (CDR) requires a minimum of a master's degree in any field of study to be eligible to take the credentialing exam to become a registered dietitian nutritionist (RDN). In addition, CDR requires that individuals complete coursework and supervised practice in program(s) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). In most states,

graduates also must obtain licensure or certification to practice.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

Focus Area Courses

Focus Areas provide students an opportunity to focus their studies in a particular area of interest or expand their knowledge in various areas. Students must select at least three courses from a single focus area, and can then select from any combination of the focus areas to complete a total of 15 credit hours, of which at least nine must be upper division.

Upper Division Focus Area Courses	C	9
Community-based Health Outcomes Focus Area		
HCD 420 Population Health Management		
HEP 355 Population Health and Climate Change (SUST)		
HEP 466 Health Promotion Program Management		
MED 350 Health Care and Humanities		
MED 417 Impact of Violence on Health		
PBH 422 Health Disparities and Access to Health		
SPA 318 Advanced Spanish for Health Care Professionals		
SPA 405 Latino Cultural Perspectives for the Professions (HUAD)		
SPA 406 Introduction to Spanish/English Medical Interpretation		
Health Legislation and Regulation Focus Area		

Requirement	Minimum Grade	Credit Hours
HCD 304 Health Care Finance		
HCD 332 Population Health Policy and Legislation		
HCD 402 Health Economics (SOBE)		
HCR 360 Data Security and Privacy in Health Care Compliance		
HCR 361 Risk Management in Health Care Compliance

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree

requirements in four years.

Students interested in the Health and Media focus area are encouraged to take at least two MCO courses offered by the Walter Cronkite School of Journalism and Mass Communication.

Students interested in taking SPA courses to fulfill focus area requirements should plan ahead to complete prerequisites or the appropriate placement exam. For more information on placement, connect with the College of Integrative Sciences and Arts.

Students who use a Focus Area course to fulfill the college Experiential Learning requirement will need to complete an additional three credit upper division elective.

Students may concurrently pursue the Health Sciences, BS program and the Mayo School of Health Sciences Echocardiography program. To pursue both programs, students must complete all prerequisite courses prior to matriculation to the 21 month professional program at Mayo. Students must be accepted into the Mayo program, which has limited slots for admission (learn more about admission criteria and application process). If a student is accepted for the program, completion requires the student to attend ASU to meet our remaining requirements in the summer prior to the beginning of the program. Students must work closely with their ASU academic advisor to make certain all prerequisites have been met. Upon successful completion of the Echocardiography curriculum at Mayo, the student must have the credits transferred back to ASU for acceptance as a block. At that time, the student may apply for graduation from ASU with the BS in Health Sciences.

For student resources, including academic advising appointment scheduling, forms and policies, internship

information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Health Sciences (Healthy Lifestyles and Fitness Science), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS

NTR 241 Human Nutrition	C	3
PSY 101 Introduction to Psychology (SOBE)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

CHS 101 The ASU Experience for Health Solutions Students		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition **OR ENG 105 Advanced First-Year Composition** **OR ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must select and complete at least one track in Fitness Science, Health Education and Promotion, or Health and Wellness Coaching. Students may use electives to complete courses in multiple tracks, if they desire, in order to increase opportunities for certification.

Students who complete the Fitness Science track will be prepared to sit for the American College of Sports Medicine (ACSM) Certified Personal Trainer exam. Visit the ACSM website for up to date certification requirements.

Students who complete the Health Education and Promotion track will be prepared to sit for the National Commission for Health Education Curriculum (NCHEC) Certified Health Education Specialist (CHES) exam. Visit the NCHEC website for up to date certification requirements.

Students who choose the Health and Wellness Coaching track and complete HSC 441 are positioned to sit for the National Board of Health and Wellness Coaching (NBHWC) certification exam with the completion of minimal additional coursework. Visit the NBHWC website for up to date certification requirements. On-campus students interested in this

certification are recommended to consider the Health and Wellness Coach certificate.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - International Public Health, BIPH

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of International Public Health, BIPH
College/School: College of Health Solutions
Plan Code: NHIPHBIPH
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
ASB 301 Global History of Health (HUAD)	C	3

Curriculum - Kinesiology, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: NUKINBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
KIN 101 Introduction to Kinesiology	B-	3
KIN 290 Introduction to Evidence-Based Practice	C	3
KIN 334 Functional Anatomy and Kinesiology	C	3
KIN 335 Biomechanics	C	3
KIN 340 Physiology of Exercise	C	3
KIN 345 Motor Behavior	C	3
KIN 352 Psychosocial Aspects of Physical Activity (SOBE)	C	3
MED 320 Applied Medical/Health Care Ethics (HUAD)	C	3
PSY 366 Psychological Disorders (SOBE)	C	3
Upper Division Major Electives	C	21
CHS 394 Topic: Facilitator Seminar		
CHS 492 Honors Directed Study		

Requirement	Minimum Grade	Credit Hours
CHS 493 Honors Thesis		
CHS 494 Topic: Undergraduate Research		
CHS 494 Topic: Undergraduate Teaching Assistant		
CHS 499 Individualized Instruction		
EXW 426 Exercise for Neuromuscular Conditions		
EXW 427 Exercise Prescription for Cardiometabolic Health		
EXW 438 Obesity, Exercise and Health		
KIN 348 Psychological Skills for Optimal Performance		
KIN 412 Biomechanics of the Skeletal System		
KIN 415 Theory of Corrective Exercise		
KIN 416 Low Back Pain: Muscles and Movement		
KIN 418 Experimental Neuromechanics		
KIN 422 Motor Control in Special Populations		
KIN 424 Neural Aspects of Movement and Rehabilitation		
KIN 440 Exercise Biochemistry		
KIN 441 Physiology of Women in Sport		
KIN 442 Fuel Metabolism		
KIN 443 Exercise Endocrinology		
KIN 444 Metabolic Adaptations to Exercise Training		

Requirement	Minimum Grade	Credit Hours
KIN 447 ECG Interpretation		
KIN 450 Biopsychosocial Perspectives on Physical Activity and Health		
KIN 452 Exercise Psychology (SOBE)		
KIN 454 Motivational Theory in Exercise and Health		
KIN 460 Theory of Strength Training		
KIN 465 Muscle Physiology		
KIN 466 Cardiovascular Exercise Physiology		
KIN 484 Internship		
RTH 364 Foundations in Recreational Therapy (SOBE)		
RTH 384 Recreational Therapy Practicum		
SSP 316 Exercise and Sport Physiology Laboratory		
SSP 454 Sports Medicine		

Students can apply the CHS 394 Facilitator Seminar and CHS 494 Undergraduate Teaching Assistant courses toward the Major Elective requirement for a maximum of six credits total. Additional completions beyond six credits will apply as upper-division electives. Students can apply internship, honors study/thesis and individualized instruction courses toward the Major Electives requirement for a maximum of six credits total. Additional completions beyond six credits will apply as upper-division electives.

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3

Experiential Learning Course

CHS 280 Experiential Community Health and Research	C	3
CHS 394 Topic: Facilitator Seminar		
CHS 484 Topic: Applied Health Experience		
CHS 484 Topic: Citizen Science in Health		
CHS 484 Topic: Translational Research		
CHS 493 Honors Thesis		
CHS 494 Topic: Undergraduate Research		
CHS 494 Topic: Undergraduate Teaching Assistant		
KIN 484 Internship		
MED 494 Topic: Introduction to Clinical Healthcare		

The list provided includes courses that are most relevant to the Kinesiology, BS program. Students may explore additional experiential learning opportunities.

CHS 394 Topic: Facilitator Seminar	C	6
CHS 484 Topic: Applied Health Experience		
CHS 484 Topic: Citizen Science in Health		
CHS 484 Topic: Translational Research		
CHS 493 Honors Thesis		
CHS 494 Topic: Undergraduate Research		
CHS 494 Topic: Undergraduate Teaching Assistant		
MED 325 Elements of Hospice and Palliative Care		
MED 375 Alzheimer's and Other Dementias		
MED 475 Palliative Care: Managing Complex Serious Illness		
POP 444 Population Health Field Experience		

Requirement	Minimum Grade	Credit Hours

Tracks

Students must select and follow a single track to complete a total of 18 credit hours, at least six of which must be upper division.

Upper Division Environmental Systems Track Courses	C	6
HEP 355 Population Health and Climate Change (SUST)		
HST 345 Environmental History (SUST)		
PAF 340 Contemporary Policy Challenges		
PBH 435 Environmental and Occupational Health		
PHI 310 Environmental Ethics (SUST)		
PUP 301 Introduction to Urban Planning		
SGS 330 Globalization and the Environment: Problems and Solutions (SUST)		
SOS 494 Topic: Social-ecological Systems & Adaptation		
OR **Upper Division Food Systems Track Courses**		
AGB 414 Food and Agribusiness Policy Issues		
ASB 300 Food and Culture (SOBE)		
MCO 494 Topic: Food and Media		
NTR 348 Cultural Aspects of Food (GCSI)		

Requirement	Minimum Grade	Credit Hours
PAF 340 Contemporary Policy Challenges		
SOS 327 Sustainable Food and Farms		
OR		
Upper Division Health Care Compliance and Regulations Track Courses		
HCR 360 Data Security and Privacy in Health Care Compliance		
HCR 363 Risk Management, Auditing and Monitoring for Health Care Compliance		
HCR 460 Investigations and Disclosures in Health Care Compliance		
HSC 432 Legal Issues in Health Care		
OR **Upper Division Health Education Specialist Track Courses**		
HEP 348 Methods of Health Education		
HEP 452 Health Advocacy in Health Education		
HEP 454 Health Promotion Program Planning and Implementation		
HEP 456 Health Promotion Program Evaluation		
HEP 466 Health Promotion Program Management		
OR **Upper Division Health Informatics Track Courses**		
BMI 311 Biomedical Artificial Intelligence		

Requirement	Minimum Grade	Credit Hours
BMI 312 Health Data Mining		
BMI 410 Database Management in Health Care		
OR		
Upper Division Health Systems Design and Improvement Track Courses		
HCD 304 Health Care Finance		
HCD 330 Health Care Systems in the U.S. (CIVI)		
HCD 403 Process Engineering		
HCD 420 Population Health Management		
HEP 454 Health Promotion Program Planning and Implementation		
HSC 432 Legal Issues in Health Care		
SOC 427 Sociology of Health and Illness (SOBE)		
OR		
Upper Division Mental Health Systems Track Courses		
EXW 400 Stress Management for Wellness		
HCD 420 Population Health Management		
HEP 350 Substance Use and Addictive Behaviors		
HEP 443 Emotional Health and Interpersonal Relationships		
MED 417 Impact of Violence on Health		
PAF 340 Contemporary Policy Challenges		

Requirement	Minimum Grade	Credit Hours
PBH 410 Public Mental Health		
Environmental Systems Track Courses	C	12
HEP 355 Population Health and Climate Change (SUST)		
HST 345 Environmental History (SUST)		
PAF 340 Contemporary Policy Challenges		
PBH 435 Environmental and Occupational Health		
PHI 310 Environmental Ethics (SUST)		
PUP 301 Introduction to Urban Planning		
SGS 330 Globalization and the Environment: Problems and Solutions (SUST)		
SOS 494 Topic: Social-ecological Systems & Adaptation		
OR **Food Systems Track Courses**		
AGB 414 Food and Agribusiness Policy Issues		
ASB 300 Food and Culture (SOBE)		
MCO 494 Topic: Food and Media		
NTR 348 Cultural Aspects of Food (GCSI)		
PAF 340 Contemporary Policy Challenges		
SOS 110 Building a Sustainable World (SUST) **or** SOS 111 Sustainable Cities (SUST)		

Requirement	Minimum Grade	Credit Hours
SOS 327 Sustainable Food and Farms		
OR Health Care Compliance and Regulations Track Courses		
HCR 259 Compliance and the Health Care Industry		
HCR 263 Introduction to Medical Billing and Compliance		
HCR 360 Data Security and Privacy in Health Care Compliance		
HCR 363 Risk Management, Auditing and Monitoring for Health Care Compliance		
HCR 460 Investigations and Disclosures in Health Care Compliance		
HSC 432 Legal Issues in Health Care		
OR Health Education Specialist Track Courses		
HEP 241 Health Education Methods for Injury Prevention and Preparedness or HEP 251 Preventing HIV and Substance Misuse or HEP 303 Human Sexuality for Health Education or HEP 361 Digital Health Communication and Education or HEP 371 Conflict Management and Mediation and Violence Prevention or HEP 380 Body Image and Wellness or HEP 443 Emotional Health and Interpersonal Relationships or HEP 476 Community Health		
HEP 348 Methods of Health Education		

Requirement	Minimum Grade	Credit Hours
HEP 452 Health Advocacy in Health Education		
HEP 454 Health Promotion Program Planning and Implementation		
HEP 456 Health Promotion Program Evaluation		
HEP 466 Health Promotion Program Management		
OR Health Informatics Track Courses		
ASM 201 Epidemics and Outbreaks		
BMI 311 Biomedical Artificial Intelligence		
BMI 312 Health Data Mining		
BMI 410 Database Management in Health Care		
GIS 205 Geographic Information Science I (QTRS)		
GIS 211 Geographic Information Science II (QTRS)		
OR Health Systems Design and Improvement Track Courses		
HCD 304 Health Care Finance		
HCD 330 Health Care Systems in the U.S. (CIVI)		
HCD 403 Process Engineering		
HCD 420 Population Health Management		
HEP 454 Health Promotion Program Planning and Implementation		

Requirement	Minimum Grade	Credit Hours
HSC 432 Legal Issues in Health Care		
SOC 427 Sociology of Health and Illness (SOBE)		
OR **Mental Health Systems Track Courses**		
EXW 400 Stress Management for Wellness		
HCD 420 Population Health Management		
HEP 350 Substance Use and Addictive Behaviors		
HEP 443 Emotional Health and Interpersonal Relationships		
MED 417 Impact of Violence on Health		
PAF 340 Contemporary Policy Challenges		
PBH 410 Public Mental Health		

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3

College of Health Solutions students must complete three credits of Experiential Learning coursework. This requirement is fulfilled for Population Health, BS students by a course within the major. If interested, students may explore additional experiential learning opportunities.

Foundational Courses

BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
MAT 117 College Algebra (MATH)	C	3
SOC 101 Introductory Sociology (SOBE)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

CHS 101 The ASU Experience for Health Solutions Students	C	1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition** **OR** **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Speech and Hearing Science, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: LASHSBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
SHS 205 Exploring Communication Disorders in Children and Adults	C	3
SHS 250 Introduction to Phonetics	C	3
SHS 310 Anatomical and Physiological Bases of Speech	C	3
SHS 311 Hearing Science	C	3
SHS 367 Language Science (SOBE)	C	3
SHS 375 Speech Science	C	3
SHS 401 Principles of Audiology	C	3
SHS 402 Clinical Methods and Treatment of Communication Disorders	C	3
SHS 465 Speech and Language Acquisition (SOBE)	C	3
SHS 470 Developmental Speech and Language Disorders	C	3
SHS 485 Acquired Speech and Language Disorders	C	3

Requirement	Minimum Grade	Credit Hours
SHS 496 Aural Rehabilitation	C	3

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3
Experiential Learning Course **CHS 280 Experiential Community Health and Research** **CHS 394 Topic: Facilitator Seminar** **CHS 484 Topic: Applied Health Experience** **CHS 484 Topic: Citizen Science in Health** **CHS 484 Topic: Translational Research** **CHS 493 Honors Thesis** **CHS 494 Topic: Undergraduate Research** **CHS 494 Topic: Undergraduate Teaching Assistant** **MED 325 Elements of Hospice and Palliative Care** **MED 375 Alzheimer's and Other Dementias** **MED 475 Palliative Care: Managing Complex Serious Illness** **SHS 484 Internship** **SHS 484 Topic: Pre-Audiology Experience**	C	3

SHS 484 Topic: SLPA Certificate

SHS 498 Topic: Advanced Research Experience in Speech/Hearing Sci

The list provided includes courses that are most relevant to the Speech and Hearing Science, BS program. Students may explore additional experiential learning opportunities.

Foundational Courses

BIO 160 Introduction to Anatomy and Physiology (SCIT)	C	4
ENG 301 Writing for the Professions	C	3
HCD 300 Biostatistics (QTRS) OR **PSY 230 Introduction to Statistics (QTRS)** OR **STP 226 Elements of Statistics (QTRS)**	C	3
MAT 117 College Algebra (MATH) OR **MAT 170 Precalculus (MATH)**	C	3
PHY 101 Introduction to Physics (SCIT)	C	4
PSY 101 Introduction to Psychology (SOBE)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

CHS 101 The ASU Experience for Health Solutions Students	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement/research opportunities and more, visit the College of Health Solutions website.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Sports Science and Performance Programming, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Health Solutions
Plan Code: NHSPTSPPBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
KIN 101 Introduction to Kinesiology	C	3
KIN 348 Psychological Skills for Optimal Performance	C	3
SSP 142 Sports Performance Practical Training	C	3
SSP 242 Resistance Training Foundations for Performance	C	3
SSP 275 Fundamentals of Sports Science (QTRS)	C	3
SSP 315 Exercise and Sport Physiology	C	3
SSP 316 Exercise and Sport Physiology Laboratory	C	1
SSP 320 Coaching Leadership, Performance Team and Facility Management	C	3
SSP 325 Applied Anatomy and Biomechanics of Sport and Movement	C	4
SSP 423 Performance Testing and Technology	C	3

Requirement	Minimum Grade	Credit Hours
SSP 434 Plyometrics, Sports Movement and Conditioning	C	3
SSP 460 Resistance Training Application and Theory	C	3

Sports Science and Performance Programming Courses

Upper Division Major Electives	C	9

- CHS 394 Topic: Facilitator Seminar
- CHS 494 Topic: Undergraduate Research
- CHS 494 Topic: Undergraduate Teaching Assistant
- CHS 499 Individualized Instruction
- EXW 330 Kinesiological Foundations of Movement
- EXW 344 Impact of Physical Activity on Health and Disease
- EXW 438 Obesity, Exercise and Health
- KIN 334 Functional Anatomy and Kinesiology
- KIN 345 Motor Behavior
- KIN 352 Psychosocial Aspects of Physical Activity (SOBE)
- KIN 465 Muscle Physiology
- NTR 457 Sports Nutrition
- NTR 494 Topic: Applied Practice in Nutrition
- RTH 364 Foundations in Recreational Therapy (SOBE)

Requirement	Minimum Grade	Credit Hours
RTH 453 Inclusive Community Sport **SSP 454 Sports Medicine** **SSP 461 Performance Programming Components and Periodization** **SSP 484 Internship** **SSP 494 Topic: Strength & Conditioning for the Tactical Performer** Students may apply up to three additional credits of SSP 484 Internship toward the Major Electives requirement. Completions beyond six credit hours will apply toward university electives.		
SSP 484 Internship This course fulfills the College of Health Solutions Experiential Learning requirement. Students are required to attend a pre-internship workshop prior to enrolling in SSP 484.	C	3

College of Health Solutions Requirements

CHS 100 Optimizing Your Health and Performance (SOBE) OR **CHS 300 An Exploration of Well-Being (SOBE)** First-year students should take CHS 100. Students who enter with more than 30 credits should take CHS 300.	C	3
College of Health Solutions students must complete three credits of Experiential Learning coursework. This requirement is fulfilled for Sports Science and Performance Programming, BS students by the required SSP 484 Internship course. If		

interested, students may explore additional experiential learning opportunities.

Foundational Courses

BIO 201 Human Anatomy and Physiology I (SCIT)	C	4
BIO 202 Human Anatomy and Physiology II (SCIT)	C	4
CHM 101 Introductory Chemistry (SCIT) **OR** **CHM 113 General Chemistry I (SCIT)**	C	4
MAT 117 College Algebra (MATH) **OR** **MAT 170 Precalculus (MATH)** Students interested in pursuing graduate school are recommended to take MAT 170 toward the Foundational Courses requirement.	C	3
NTR 241 Human Nutrition	C	3
PSY 101 Introduction to Psychology (SOBE)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

Curriculum - Applied Biological Sciences, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Integrative Sciences and Arts
Plan Code: TSABSABS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Applied Biological Sciences Core		
ABS 390 Professional Identity and Career Foundation	C	
ABS 490 Applied Biological Sciences Seminar	C	1
BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 340 General Genetics	C	4
Applied Biological Sciences Concentration Requirements		
ABS 100 Discovering the Professions	C	1
ABS 311 Molecular and Cellular Biology OR ABS 314 Applied Plant Physiology OR BIO 360 Animal Physiology	C	3
ABS 350 Applied Statistics (QTRS) OR STP 420 Introductory Applied Statistics (QTRS)	C	3

Requirement	Minimum Grade	Credit Hours
ABS 370 Ecology	C	3

Applied Biological Sciences Track

Students select either the General Biology or Health Professionals track and complete 18 total credit hours, including nine hours of upper-division courses within the selected track.

Health Professionals Track	C	9
ABS 302 Ethical and Policy Issues in Biology (HUAD)		
ABS 312 Structure and Function		
ABS 318 Unseen Life on Earth		
ABS 319 Food, Health and Human Biology		
ABS 355 Ecology and Adaptations of Vertebrates		
ABS 394 Topic: Medicine and Culture		
ABS 417 Comparative Immunology		
ABS 419 Microbiota in Health and Disease		
ABS 484 Internship		
ABS 494 Topic: Emerging Infections & Epidemics		
BCH 361 Principles of Biochemistry		
BIO 201 Human Anatomy and Physiology I (SCIT)		
BIO 202 Human Anatomy and Physiology II (SCIT)		

Requirement	Minimum Grade	Credit Hours
BIO 351 Developmental Biology		
MIC 205 Microbiology (SCIT)		
PHY 345 Foundations of Medical Physics		
SPA 118 Basic Spanish for Health Care Professionals		
STS 310 Biomedicine, Technology and Society (HUAD)		
OR **General Biology Track**		
ABS Elective		
BCH Elective		
BIO Elective		
MIC Elective		
Upper Division Health Professionals Track	C	9
ABS 302 Ethical and Policy Issues in Biology (HUAD)		
ABS 312 Structure and Function		
ABS 318 Unseen Life on Earth		
ABS 319 Food, Health and Human Biology		
ABS 355 Ecology and Adaptations of Vertebrates		
ABS 394 Topic: Medicine and Culture		
ABS 417 Comparative Immunology		
ABS 419 Microbiota in Health and Disease		

Requirement	Minimum Grade	Credit Hours
ABS 484 Internship		
ABS 494 Topic: Emerging Infections & Epidemics		
BCH 361 Principles of Biochemistry		
BIO 351 Developmental Biology		
PHY 345 Foundations of Medical Physics		
STS 310 Biomedicine, Technology and Society (HUAD)		

OR **Upper Division General Biology Track**

ABS Elective		
BCH Elective		
BIO Elective		
MIC Elective		

Foundational Courses

CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
CHM 231 Elementary Organic Chemistry (SCIT) **AND** **CHM 235 Elementary Organic Chemistry Laboratory (SCIT)** OR **CHM 233 General Organic Chemistry I** **AND** **CHM 237 General Organic Chemistry Laboratory I**	C	4

Pre-health students can opt to take the organic chemistry sequence (CHM 233/237 and CHM 234/238) instead of CHM

231/235.

MAT 210 Brief Calculus (MATH) OR **MAT 251 Calculus for Life Sciences (MATH)**	C	3
PHY 101 Introduction to Physics (SCIT) OR **PHY 111 General Physics (SCIT)** **AND** **PHY 113 General Physics Laboratory (SCIT)** Students considering graduate school or health professions should complete the PHY 111/113 and PHY 112/114 sequence. All other students will complete PHY 101 and elective hours.	C	4

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must complete a minimum of 12 credit hours of science courses offered by the College of Integrative Sciences and Arts. Select from ABS, BIO, CHM, MIC and PHY subject codes.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Biological Sciences (Natural Resource Ecology), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Integrative Sciences and Arts
Plan Code: LSABSNRBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Applied Biological Sciences Core		
ABS 390 Professional Identity and Career Foundation	C	1
ABS 490 Applied Biological Sciences Seminar	C	1
BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 340 General Genetics	C	4
Natural Resource Concentration Requirements		
ABS 100 Discovering the Professions	C	1
ABS 270 Sustainable Biological Systems (SUST)	C	3
ABS 274 Introduction to Wildlife Management OR ABS 225 Soils AND ABS 226 Soils Laboratory	C	4
ABS 311 Molecular and Cellular Biology OR ABS 314 Applied Plant Physiology	C	3

Requirement	Minimum Grade	Credit Hours
OR BIO 360 Animal Physiology		
ABS 350 Applied Statistics (QTRS)	C	3
ABS 355 Ecology and Adaptations of Vertebrates OR ABS 430 Watershed Management	C	3
ABS 370 Ecology	C	3
ABS 479 Ecosystem Management and Planning	C	3

Natural Resource Ecology Tracks

Students select one of three tracks (General, Habitat Management and Conservation, or Wildlife) and complete 15 hours from within that track.

ABS 207 Applied Plant Taxonomy is recommended as part of the U.S. Office of Personnel Management's (OPM) occupational requirement of nine semester hours in botany or related plant science for the Natural Resource Ecology Track requirement.

General Track	C	3
ABS 207 Applied Plant Taxonomy		
ABS 312 Structure and Function		
ABS 318 Unseen Life on Earth		
ABS 376 Wildlife Ecology		
ABS 377 International Wildlife Conservation		

Requirement	Minimum Grade	Credit Hours
ABS 378 Animal Nutrition		
ABS 380 Restoration and Wildlife Plants

Foundational Courses

CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
CHM 231 Elementary Organic Chemistry (SCIT) **AND** CHM 235 Elementary Organic Chemistry Laboratory (SCIT) **OR** CHM 233 General Organic Chemistry I **AND** CHM 237 General Organic Chemistry Laboratory I Students considering graduate school or health professions should complete the Organic Chemistry sequence of both CHM	C	4

233/237 and CHM 234/238, using CHM 234/238 in place of electives. All other students will complete CHM 231/235.		
MAT 210 Brief Calculus (MATH) **OR** **MAT 251 Calculus for Life Sciences (MATH)**	C	3
PHY 101 Introduction to Physics (SCIT) **OR** **PHY 111 General Physics (SCIT)** **AND** **PHY 113 General Physics Laboratory (SCIT)** Students considering graduate school or health professions complete the PHY 111/113 and PHY 112/114 sequence. All other students will complete PHI 101 and elective hours.	C	4

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition** **OR** **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must complete a minimum of 12 credit hours of science courses offered by the College of Integrative Sciences and Arts. Select from ABS, BIO, CHM, MIC and PHY subject codes.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Biological Sciences (Pre-Dental), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Integrative Sciences and Arts
Plan Code: LSABSPDBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Applied Biological Sciences Core		
ABS 390 Professional Identity and Career Foundation	C	1
ABS 490 Applied Biological Sciences Seminar	C	1
BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 340 General Genetics	C	4
Pre-Dental Professional Concentration Requirements		
ABS 272 Discovering Dentistry	C	3
ABS 311 Molecular and Cellular Biology	C	3
ABS 350 Applied Statistics (QTRS) OR STP 420 Introductory Applied Statistics (QTRS)	C	3
ABS 417 Comparative Immunology	C	3

Requirement	Minimum Grade	Credit Hours
ABS 422 Head and Neck Anatomy	C	3
BCH 361 Principles of Biochemistry	C	3
PSY 101 Introduction to Psychology (SOBE)	C	3
STS 310 Biomedicine, Technology and Society (HUAD)	C	3
Upper Division Pre-Dental Electives	C	15

- ABS 355 Ecology and Adaptations of Vertebrates
- ABS 394 Special Topics

  If enrolling in ABS 394, consult with an academic advisor to choose an appropriate topic.
- ABS 419 Microbiota in Health and Disease
- ABS 484 Internship
- ABS 489 Undergraduate Research
- ABS 494 Topic: Emerging Infections & Epidemics
- ABS 494 Topic: Mammalian Gross Anatomy
- ASM 345 Disease and Human Evolution
- BIO 351 Developmental Biology
- BIO 360 Animal Physiology
- CHS 308 Comparative Health Systems
- MED 320 Applied Medical/Health Care Ethics (HUAD)

Requirement	Minimum Grade	Credit Hours
PHY 345 Foundations of Medical Physics		

Foundational Courses

BIO 201 Human Anatomy and Physiology I (SCIT)	C	4
BIO 202 Human Anatomy and Physiology II (SCIT)	C	4

CHM 237 General Organic Chemistry Laboratory I	C	1
CHM 234 General Organic Chemistry II	C	3
CHM 238 General Organic Chemistry Laboratory II	C	1

ASU Online students will complete all experiments for the Organic Chemistry labs at the ASU Tempe campus during a one-week session in summer. Lab reports will be completed in subsequent weeks during the same summer term.

These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

Upper Division Capstone/Project Course

IDS 401 Integration: Experiential Learning		
IDS 492 / **HON 492 Honors Directed Study**		
IDS 493 / **HON 493 Honors Thesis**		
Students may use Honors Directed Study or Thesis from different subject codes.	C	3
IDS 484 Internship		
Students may use Internship credit from other subject codes.		

STEM Focus Area

Requirement	Minimum Grade	Credit Hours
Students select one STEM focus area. Each focus area offers specialized coursework to enhance your quantitative foundation with domain-specific expertise. The requirements of each focus area align with respective minor or certificate requirements. Students should consult with an academic advisor to finalize selection and ensure optimal alignment with academic and professional goals. Students pursuing focus areas that are minors may not also earn the minor.		
STEM Focus Area	C	15 - 28
Analysis and Management of Insurance Risk		
Applied Biological Sciences		
Applied Business Data Analytics		
Applied Mathematics		
Astronomy		
Astrophysics		

Requirement	Minimum Grade	Credit Hours
Biochemistry		
Biological Sciences		
Biomimicry		
Chemistry		
Computational Life Sciences		
Computational Mathematical Sciences		
Computer Gaming		
Construction Management		
Counseling and Applied Psychological Science		
Data Science		
Energy and Sustainability		

Requirement	Minimum Grade	Credit Hours
Environmental and Resource Management		
Geographic Information Science		
Hazardous Materials and Waste Management		
Human Systems Engineering		
Informatics		
Kinesiology		
Mathematical Concepts of Engineering		
Mathematics		
Physics		
Psychology		
Speech and Hearing Science		

Requirement	Minimum Grade	Credit Hours
Statistics		

Foundational Courses

MAT 170 Precalculus (MATH)	C	3
Scientific Thinking in Natural Sciences Course	C	8

Students select an eight credit hour course pairing/group from the list below.

AST 111 Introduction to Solar Systems Astronomy (SCIT) **AND** **AST 112 Introduction to Stars, Galaxies, and Cosmology (SCIT)**

BIO 181 General Biology I (SCIT) **AND** **BIO 182 General Biology II (SCIT)**

CHM 113 General Chemistry I (SCIT) **AND** **CHM 116 General Chemistry II (SCIT)**

PHY 111 General Physics (SCIT) **AND** **PHY 113 General Physics Laboratory (SCIT)** **AND** **PHY 112 General Physics (SCIT)** **AND** **PHY 114 General Physics Laboratory (SCIT)**

GLG 101 Introduction to Geology I (Physical) (SCIT) **AND** **GLG 103 Introduction to Geology I: Laboratory (SCIT)**

GLG 102 Introduction to Geology II (Historical) (SCIT) **AND** **GLG 104 Introduction to Geology II: Laboratory**

	(SCIT)		
AND	Scientific Thinking in Natural Sciences (SCIT)		

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Science (Animal Biology), BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: College of Integrative Sciences and Arts
Plan Code: LSANBIOBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
BAS Core		
ABS 302 Ethical and Policy Issues in Biology (HUAD)	C	3
ABS 350 Applied Statistics (QTRS)	C	3
ABS 370 Ecology	C	3
BIO 340 General Genetics	C	4
BAS Concentration		
ABS 312 Structure and Function	C	3
ABS 355 Ecology and Adaptations of Vertebrates	C	3
ABS 372 Captive Animal Behavior Management	C	3
ABS 378 Animal Nutrition	C	3
ABS 417 Comparative Immunology	C	3
Upper Division Animal Biology Electives	C	9
ABS 318 Unseen Life on Earth		

Requirement	Minimum Grade	Credit Hours
ABS 371 Small Animal Veterinary Topics		
ABS 375 Equine Science		
ABS 376 Wildlife Ecology		
ABS 377 International Wildlife Conservation		
ABS 379 Animal Anatomy		
ABS 470 Life History of Mammals		
ABS 472 Applied Herpetology		
ABS 473 Applied Ornithology		
ABS 494 Topic: Emerging Infections & Epidemics		
BIO 351 Developmental Biology		
BIO 360 Animal Physiology		

Students who have not met all ASU general studies and first-year composition requirements with their transfer courses must complete them at ASU to earn the BAS degree.

Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.

AAS Transfer Degree Block of Credit Hours

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must have completed BIO 181, BIO 182, AND either CHM 101 or CHM 113, in order to meet upper division course prerequisites.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Science (Applied Leadership), BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: College of Integrative Sciences and Arts
Plan Code: LSALSBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
OGL 200 Introduction to Organizational Leadership (CIVI)	C	3
OGL 220 Behavioral Dynamics in Organizations (SOBE)	C	3
OGL 300 Theory and Practice of Leadership	C	3
OGL 343 Social Processes in Organizations (SOBE)	C	3
OGL 345 Organizational Ethics (HUAD)	C	3
OGL 350 Diversity and Organizations (GCSI)	C	3
OGL 355 Leading Organizational Innovation and Change	C	3
OGL 357 Assessment in Organizations OR **OGL 360 Assessment of Leadership Effectiveness**	C	3
OGL 481 Organizational Leadership Pro-Seminar I	C	3
OGL 482 Organizational Leadership Pro-Seminar II	C	3
Upper Division **OGL Elective**	C	18

Requirement	Minimum Grade	Credit Hours
Students who have not met all ASU general studies and first-year composition requirements with their transfer courses must complete them at ASU to earn the BAS degree.		
Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - History, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: College of Integrative Sciences and Arts
Plan Code: LSHISBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Courses		
HST 345 Environmental History (SUST)	C	3
HST 495 Methods of Historical Inquiry	C	3
HST Elective	C	9
Upper Division **HST Elective**	C	12
History Related Area		
Students must complete a total of 15 credit hours of History Related Area courses (including a minimum of nine upper-division hours).

Interdisciplinary Studies Concentrations

Students take an active role in designing their own major by selecting two subject areas of study.

Students select two concentrations from the options below. Credit hours vary depending on chosen concentrations. Concentrations require a minimum of 15 hours, of which at least nine are upper division. Approved IDS concentration area requirements align with respective minor and certificate requirements. Students pursuing IDS concentrations that are minors may not also earn the minor.

Requirement	Minimum Grade	Credit Hours

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Liberal Studies, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: College of Integrative Sciences and Arts
Plan Code: LABLSBLS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
LST 370 Dimensions of Liberal Studies (HUAD)	C	3
LST 470 Liberal Studies Seminar	C	3
Upper Division Humanities, Arts and Design (HUAD)	C	12
Upper Division Social and Behavioral Sciences (SOBE) **OR** Upper Division Global Communities, Societies, and Individuals (GCSI) **OR** Upper Division Sustainability (SUST) **OR** Upper Division American Institutions (AMIT) **OR** Upper Division Governance and Civic Engagement (CIVI)	C	12

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must complete a minimum of 12 credit hours of PSY courses offered by the College of Integrative Sciences and Arts.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Psychology, BS

Catalog Year: 2026 - 2027 **General Studies Gold**

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CLS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - User Experience, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: College of Integrative Sciences and Arts
Ira A. Fulton Schools of Engineering
Plan Code: LSUSEXBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
GIT 210 Communication Technology	C	3
GIT 350 Cross-Media Design	C	3
TWC 214 Storytelling with Data	C	3
TWC 311 Principles of Visual Communication	C	3
TWC 445 Content Strategy	C	3
TWC 444 User Experience and Usability Research	C	3
UXP 101 Introduction to User Experience	C	3
UXP 201 The User Experience Toolkit	C	3
UXP 260 Accessibility and Inclusion in Communication and User Experience	C	3
UXP 365 Design Systems	C	3
UXP 403 Fundamentals of User Experience Writing	C	3

Requirement	Minimum Grade	Credit Hours
UXP 405 User Experience Research and Discovery	C	3
UXP 424 Information Architecture	C	3
UXP 430 Digital Accessibility	C	3
UXP 447 User Experience in Medicine and Health	C	3
UXP 490 Capstone in User Experience	C	3

Major Electives

Upper Division User Experience Elective Courses	C	12
GIT 340 Information Design and Usability		
GIT 402 New Media Internet Technologies		
HSE 324 Applied Cognitive Science (SOBE)		
HSE 325 Human-Computer Interaction		
HSE 427 Designing for Learning		
MCO 307 The Digital Audience		
MCO 335 Social Media Foundations		
TWC 314 Data Visualization Tools and Techniques		
TWC 413 Managing and Analyzing Data		
TWC 414 Advanced Data Visualization		
TWC 422 Social Media in the Workplace		
TWC 431 Principles of Technical Editing		

Requirement	Minimum Grade	Credit Hours
TWC 435 Global Issues in Technical Communication (GCSI)		
TWC 436 Project Management in Technical Communication		
TWC 451 Copyright and Intellectual Property in the Electronic Age		
UXP 494 Special Topics		

Foundational Courses

HSE 101 Introduction to Human Systems Engineering (SOBE)	C	3
HSE 230 Statistics for Human Systems Research I (QTRS)	C	3
MAT 117 College Algebra (MATH)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

PLB 310 The Flora of Arizona		

If a 4 credit hour course is applied toward any of the distribution areas, 1 of the credit hours will apply toward the upper division biology electives requirement.

Upper Division Biology Electives

Upper Division BCH Elective	C	9
Upper Division BIO Elective		
Upper Division ENV Elective		
Upper Division FOR Elective		
Upper Division LSC Elective		
Upper Division MIC Elective		
Upper Division PLB Elective		
Upper Division PTX Elective		

Courses must have BIO 182 as a prerequisite in order to count toward the Upper Division Biology Electives requirement. Special topics courses (394/494) may be applicable with prior approval. Up to three credit hours of experiential learning (388, 484, 486, 492, 493, 495, 499) may be applied toward this requirement. Seek academic advising prior to enrollment.

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements; or completion of three credits from an ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.	C	6

Interdisciplinary Requirements

MAT 210 Brief Calculus (MATH) OR **MAT 251 Calculus for Life Sciences (MATH)** or higher level MATH general studies course	C	3
PHY 111 General Physics (SCIT)	C	3
PHY 113 General Physics Laboratory (SCIT)	C	1
PHY 112 General Physics (SCIT)	C	3
PHY 114 General Physics Laboratory (SCIT)	C	1
STP 226 Elements of Statistics (QTRS)	C	3
Interdisciplinary Biology Electives **COM 328 Communicating Science** **COM 494 Topic: Science Public Relations** **DST 101 Introduction to Disability Studies (CIVI)**	C	6

DST 322 Social and Cultural Implications of the Many Forms of Disability (SOBE)

DST 469 / **ENG 469 Science and Literature (HUAD)**

ENV 200 / **IAS 200** / **JHR 200 Introduction to Justice in the Environment (CIVI)**

HRC 200 Introduction to Social and Cultural Analysis (CIVI)

IAS 340 / **PHI 320 Bioethics (HUAD)**

IAS 407 / **PHI 407 Environmental Philosophy and Policy (SUST)**

IAS 409 / **PHI 409 Eco-Community Ethics**

IAS 430 Science and Religion (HUAD)

PHI 450 / **IAS 450** / **REL 450 Philosophical and Spiritual Issues in Death and Dying (HUAD)**

WST 333 Critical Perspectives on Sexuality (SOBE)

WST 444 Gender, Health, and Bodies (SOBE)

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience OR **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.	1 - 3

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Biology (Environmental Justice), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASLSCEJBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Biology Core

BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 320 Fundamentals of Ecology	C	3
BIO 353 Cell Biology	C	3
LSC 347 Fundamentals of Genetics	C	3

Chemistry Core

Requirement	Minimum Grade	Credit Hours
CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
Organic Chemistry CHM 231 Elementary Organic Chemistry (SCIT) **AND** CHM 235 Elementary Organic Chemistry Laboratory (SCIT) **OR** CHM 233 General Organic Chemistry I **AND** CHM 237 General Organic Chemistry Laboratory I	C	4

Students interested in attending graduate, medical, or professional school after graduation may need to complete the full general organic chemistry sequence - CHM 233/237 and CHM 234/238.

Environmental Justice Concentration

ENV 200 Introduction to Justice in the Environment (CIVI) **OR** IAS 200 Introduction to Justice in the Environment (CIVI) **OR** JHR 200 Introduction to Justice in the Environment (CIVI)	C	3
ENV 201 Fundamentals of Environmental Science (SUST) Transfer students or students changing majors to this program may be able to apply a previously completed introductory environmental science course as a substitution. If you have any questions, connect with your academic advisor.	C	3

Requirement	Minimum Grade	Credit Hours
ENV 440 Deconstructing Justice in the Environment: Measurements, Policies and Societal Implications	C	3
IAS 407 Environmental Philosophy and Policy (SUST) OR PHI 407 Environmental Philosophy and Policy (SUST)	C	3
SOC 331 Environmental Sociology (SUST)	C	3

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements; or completion of three credits from an	C	6

ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.

New College Proficiency - Mathematics

Mathematics (MATH) Recommended: **MAT 114** OR **MAT 117**	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience **OR** **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition** **OR** **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is

applied according to the designation the course carries at the time the class is taken.

Curriculum - Communication, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASCOMMBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Disability Studies, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASDISASBA
Minimum credit hours: 120

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience OR **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Environmental Science (Environmental Justice), BS

Catalog Year: 2026 - 2027 **General Studies Gold**

PHI 105 Intro to Ethics (HUAD)

REL 100 Religions of the World (HUAD)

WST 100 Women, Gender, and Society (HUAD)

General Studies Courses

American Institutions (AMIT)	3
Mathematics (MATH) Recommended: **MAT 114** OR **MAT 117**	3
Quantitative Reasoning (QTRS)	3
Scientific Thinking in Natural Sciences (SCIT)	8
Social and Behavioral Sciences (SOBE)	3
Sustainability (SUST)	3

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students in an exploratory program should meet regularly with their academic advisor to discuss major pathways and select courses that align with their plans and goals. Your advising team will help you stay on track toward declaring a major.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Exploratory Math, Physical Sciences, Engineering and Technology ,

Curriculum - Forensic Science, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASFOREBS
Minimum credit hours: 120
Upper division minimum credit hours: 52

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Biology Core

BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
LSC 347 Fundamentals of Genetics	C	3
LSC 348 Fundamentals of Genetics Laboratory	C	1

Chemistry Core

BCH 371 Modern Concepts in Biochemistry	C	3

Requirement	Minimum Grade	Credit Hours
BCH 372 Modern Concepts in Biochemistry Laboratory **or PTX 372 Modern Biochemical Methods**	C	1
CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
CHM 233 General Organic Chemistry I	C	3
CHM 237 General Organic Chemistry Laboratory I	C	1
CHM 234 General Organic Chemistry II	C	3
CHM 238 General Organic Chemistry Laboratory II	C	1

ASU Online students in this degree program may need to complete experiments for the Organic Chemistry labs (CHM 237 and CHM 238) and Biochemistry lab (BCH 372) during an intensive, in-person experience on ASU's campuses in Arizona. Please email NCsummerlabs@asu.edu with any questions.

These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

Gender, Women and Sexuality Studies Capstone

HRC 480 Capstone: Practices and Approaches	C	3

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements; or completion of three credits from an ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.	C	6

New College Proficiency - Mathematics

Mathematics (MATH) Recommended: **MAT 114** OR **MAT 117**	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience	1 - 3
OR **IAS 300 Career Strategies and Personal Resilience**	

NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition			
OR **ENG 105 Advanced First-Year Composition**		C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**			

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more,

visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services. For more information, visit: https://career.asu.edu/

ASU Online students in this degree program may need to complete experiments for the Organic Chemistry labs (CHM 237 and CHM 238) and Biochemistry lab (BCH 372) during an intensive, in-person experience on ASU's campuses in Arizona. Please email NCsummerlabs@asu.edu with any questions. These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general	C	6

studies requirements; or completion of three credits from an ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.

Interdisciplinary Requirements

MAT 210 Brief Calculus (MATH) **OR** **MAT 251 Calculus for Life Sciences (MATH)** or higher level MATH general studies course	C	3
PHY 111 General Physics (SCIT)	C	3
PHY 113 General Physics Laboratory (SCIT)	C	1
PHY 112 General Physics (SCIT)	C	3
PHY 114 General Physics Laboratory (SCIT)	C	1
STP 226 Elements of Statistics (QTRS)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience **OR** **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops

and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Pharmacology and Toxicology (Environmental Studies), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASPTXEJBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Biology Core Requirements

BIO 181 General Biology I (SCIT)	C	4
BIO 182 General Biology II (SCIT)	C	4
BIO 201 Human Anatomy and Physiology I (SCIT)	C	4
BIO 202 Human Anatomy and Physiology II (SCIT)	C	4
BIO 353 Cell Biology	C	3
BIO 354 Cell Biology Laboratory	C	1

Requirement	Minimum Grade	Credit Hours
LSC 347 Fundamentals of Genetics	C	3
LSC 348 Fundamentals of Genetics Laboratory	C	1

Chemistry Core Requirements

CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
CHM 233 General Organic Chemistry I	C	3
CHM 237 General Organic Chemistry Laboratory I	C	1
CHM 234 General Organic Chemistry II	C	3
CHM 238 General Organic Chemistry Laboratory II	C	1

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements; or completion of three credits from an ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.	C	6

New College Proficiency - Mathematics

Mathematics (MATH) Recommended: **MAT 114** OR **MAT 117**	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience **OR** **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Psychology, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASPGSBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

NEW 101 The ASU New College Experience OR **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**	C	6

OR **ENG 105 Advanced First-Year Composition**

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Psychology (Forensic Psychology), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASPGSFPBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Psychology Core

PSY 101 Introduction to Psychology (SOBE)	C	3

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops

and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Social and Behavioral Sciences, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASSBSBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Social and Behavioral Sciences Core

SBS 101 Introduction to Social and Behavioral Sciences (SOBE)	C	3
SBS 302 Qualitative Methods (SOBE)	C	3
SBS 303 Quantitative Methods (QTRS) OR **SBS 304 Social Statistics I (QTRS)**	C	3
SBS 401 Theories of Social and Behavioral Sciences	C	3

Social and Behavioral Sciences Electives

Requirement	Minimum Grade	Credit Hours
Upper Division Social and Behavioral Sciences Electives		
ASB Elective	C	9
COM Elective		
JHR Elective		
POS Elective		
PSY Elective		
SBS Elective		
SOC Elective		
Social and Behavioral Sciences Electives

Social and Cultural Analysis Capstone

HRC 480 Capstone: Practices and Approaches	C	3

New College Proficiency - Global and Civic Engagement

Upper Division Global and Civic Engagement Requirement: satisfied through completion of six credits of upper-division courses with a Global Communities, Societies and Individuals (GCSI) or Governance and Civic Engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements; or completion of three credits from an ASU-approved global education program. Adjustment to upper-division and elective hours is required if a lower-division global education course is used.	C	6

New College Proficiency - Mathematics

Mathematics (MATH) Recommended: **MAT 114** OR **MAT 117**	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

NEW 101 The ASU New College Experience **OR** **IAS 300 Career Strategies and Personal Resilience** NEW 101 (or other ASU college equivalent) is required for all first-year students. IAS 300 is required for all transfer students in New College.		1 - 3

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** **OR** **ENG 105 Advanced First-Year Composition**	C	6

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and

graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Courses taught in English will require all written work in Spanish for major credit.

For student resources, including academic advising appointment scheduling, forms and policies, internship information, involvement or research opportunities, and more, visit New College of Interdisciplinary Arts and Sciences homepage.

Students interested in pursuing health-related professional and graduate programs including Pre-Health 101 Workshops and Pre-Health Advising should explore pre-health resources.

Students interested in pursuing law-related professional and graduate programs should explore pre-law resources.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Statistics, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: New College of Interdisciplinary Arts and Sciences
Plan Code: ASSTABS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

New College Residency Requirement

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from the New College of Interdisciplinary Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Statistics Core

STP 280 Probability and Statistics for Researchers (QTRS)	C	3
STP 281 Statistical Analysis for Researchers	C	3
STP 310 Design and Analysis of Experiments	C	3
STP 311 Regression and Time Series Analyses	C	3

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Science and Society Elective	C	3
Upper Division Science and Society Elective	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines

placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

The object of the degree is to prepare students to sit for exams to gain certification as an actuary. One of the optional certifications that individuals may pursue is completion of the VEE requirements from the Society of Actuaries or the Casualty Actuarial Society. This certification requires additional experience not covered in the maximum credits allowed for the degree. However, students may decide to include these additional courses in their 12 hours of elective credit. ASU courses that meet VEE requirements include: STP 427, ECN 211 (SOBE), ECN 212 and FIN 300.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - African and African American Studies, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience OR **LIA 101 Student Success in The College of Liberal Arts and Sciences**	C	1

Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Anthropology, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA

BCH 463 Biophysical Chemistry	C	3
BCH 467 Analytical Biochemistry Laboratory	C	3
Upper Division **BCH Elective** OR Upper Division **CHM Elective** Upper Division BCH or CHM Electives cannot be met with BCH 361, BCH 367, BCH 371, BCH 372, BCH 373, CHM 341 or CHM 460.	C	3

The School of Molecular Sciences' ASU Online programs may require the purchase of additional scientific materials to complete laboratory courses. ASU Online students are

Requirement	Minimum Grade	Credit Hours
required to travel to the Tempe campus to complete compressed, in-person laboratory courses in CHM 237, CHM 238 and BCH 467. These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list, of which at least one must be upper division. This major includes a course that satisfies one of the courses. Students will select one additional course. The second course may count towards any major, minor, related fields and ASU General Studies requirements.

Science and Society Elective	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience **OR** **LIA 101 Student Success in The College of Liberal Arts and Sciences** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

In order to complete the requirements of this program, some laboratory courses are completed in-person at the Tempe Campus. These laboratory courses are offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and

other individual factors. Learn more about summer financial aid.

The School of Molecular Sciences' ASU Online programs may require the purchase of additional scientific materials to complete laboratory courses. ASU Online students are required to travel to the Tempe campus to complete compressed, in-person laboratory courses in CHM 237, CHM 238 and CHM 326. These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students

Requirement	Minimum Grade	Credit Hours
may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

Upper Division **COM Elective** A maximum of six credits of COM 484 may apply to major electives.	C	6

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Science and Society Elective	C	3
Upper Division Science and Society Elective	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience OR **LIA 101 Student Success in The College of Liberal Arts and Sciences** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.		
Mathematics (MATH) Recommended: **MAT 114**	C	3
Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.		
ASU 101-LA The ASU Experience **OR LIA 101 Student Success in The College of Liberal Arts and Sciences** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition **OR ENG 105 Advanced First-Year Composition** **OR ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree

requirements in four years.

Students are encouraged to explore internship opportunities.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Data Science, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LADATSCIBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

Major Requirements

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Data Science Core Courses

MAT 270 Calculus with Analytic Geometry I (MATH) OR **MAT 265 Calculus for Engineers I (MATH)**	C	3 - 4
MAT 271 Calculus with Analytic Geometry II (MATH) OR **MAT 266 Calculus for Engineers II (MATH)**	C	3 - 4
MAT 343 Applied Linear Algebra	C	3
CSE 110 Principles of Programming	C	3
CSE 205 Object-Oriented Programming and Data Structures	C	3

Requirement	Minimum Grade	Credit Hours
DAT 250 Data Science and Society Data Sciences students take DAT 250 as a part of the major. DAT 250 satisfies a Science and Society requirement.	C	3
DAT 300 Mathematical Tools for Data Science	C	3
DAT 301 Exploring Data in R and Python	C	4
DAT 401 Statistical Modeling and Inference for Data Science	C	3
DAT 402 Machine Learning for Data Science OR **CSE 475 Foundations of Machine Learning**	C	3
DAT 490 Data Science Capstone OR Upper Division Disciplinary Capstone from Selected Track	C	3

Data Science Track Courses

Select one of the tracks below and complete all requirements outlined for that track. Track options are Behavioral Sciences, Biosciences, Business Analytics, Chemistry and Biochemistry, Computer Science, Mathematics, Social Sciences and Spatial Sciences.

Upper Division Behavioral Sciences Track Behavioral Sciences Track: complete six total courses as outlined below. Students must also complete three credit hours in DAT 490 or a 400-level disciplinary capstone course drawn from the CDE, FAS, or PSY subject areas.	C	12 - 13

Requirement	Minimum Grade	Credit Hours
In cooperation with an assigned academic advisor, select four courses from following options:		
SOC 390 Social Statistics I (QTRS)		
FAS 498 Topic: Advanced Statistics for Social Sciences **or** **SOC 469 Multivariate Statistics for Social Sciences** **or** **PSY 330 Statistical Methods (QTRS)**		
In cooperation with an assigned academic advisor, choose two elective courses from the list below:		
CDE 312 Adolescence (SOBE)		
CDE 337 Early Childhood Intervention		
CDE 418 Aging and the Life Course (SOBE)		
CDE 430 Infant and Toddler Development in the Family (SOBE)		
CDE 450 Childhood Disorders and Family Functioning		
FAS 301 Introduction to Parenting		
FAS 331 Modern Family Relationships (SOBE)		
FAS 332 Human Sexuality (SOBE)		
FAS 440 Fundamentals of Marriage and Family Therapy		
LSC 325 / **PSY 325** / **PTX 325 Physiological Psychology**		
PSY 315 Personality Theory and Research (SOBE)		
PSY 320 Learning and Motivation		

Requirement	Minimum Grade	Credit Hours
PSY 324 Memory and Cognition		
PSY 341 Developmental Psychology (SOBE)		
PSY 350 Social Psychology (SOBE)		
OR **Upper Division Biosciences Track**		
Biological Sciences Track: complete BIO 415 and BIO 439, a Bioethics related course, three track electives (minimum of nine credit hours) and three credit hours of DAT 490 Data Science Capstone.		
BIO 415 Statistical Models for Biology (QTRS)		
BIO 439 Computing for Research		
Choose once course from the list below:		
BIO 312 / **PHI 320 Bioethics (HUAD)**		
BIO 316 / **HPS 330 History of Biology: Conflicts and Controversies (HUAD)**		
BIO 317 / **HPS 323 History of Science II (HUAD)**		
BIO 318 / **HPS 331 History of Medicine (HUAD)**		
BIO 416 / **HPS 410 Biomedical Research Ethics (CIVI)**		
Choose three elective courses from list below:		
BIO 355 Introduction to Computational Molecular Biology		
BIO 411 Quantitative Methods in Conservation and Ecology		

Requirement	Minimum Grade	Credit Hours
BIO 440 / MBB 440 Functional Genomics		
BIO 494 Topic: Data Analysis in Neuroscience		
BIO 494 Topic: Microbiome Data Science		
BIO 498 Topic: Genomics Research Experience		
BIO 498 Topic: Programming for biologists		
OR **Upper Division Business Analytics Track**		
Business Analytics Track: complete all six courses listed below. Students also complete three credit hours of DAT 490 Data Science Capstone.		
CIS 407 Business Database Systems Development		
CIS 409 Business Data Warehouses and Dimensional Modeling		
CIS 412 Business Machine Learning		
CIS 415 Big Data and AI in Business		
WPC 300 Problem Solving and Actionable Analytics (QTRS)		
OR **Upper Division Chemistry and Biochemistry Track**		
Chemistry and Biochemistry Track: complete 21 total credits as outlined below. In addition, students need to complete three credit hours in DAT 490 Data Science Capstone.		
CHM 325 Analytical Chemistry		

Requirement	Minimum Grade	Credit Hours
BCH 361 Principles of Biochemistry or CHM 341 Elementary Physical Chemistry		
BCH 392 / CHM 392 Introduction to Research Techniques or DAT 490 Data Science Capstone		
BCH 494 Topic: Modern Approaches to Biochemical Data Analysis or CHM 494 Topic: Data Modeling for the Natural Sciences		
Select three credits from the list below:		
BCH 341 Physical Chemistry with a Biological Focus		
BCH 361 Principles of Biochemistry		
BCH 367 Elementary Biochemistry Laboratory		
BCH 461 General Biochemistry I		
BCH 462 General Biochemistry II		
BCH 463 Biophysical Chemistry		
BCH 467 Analytical Biochemistry Laboratory		
BCH 484 Internship		
BCH 494 Special Topics		
CHM 302 Environmental Chemistry		
CHM 303 Environmental Chemistry Laboratory		
CHM 326 Advanced Analytical Chemistry Laboratory		
CHM 327 Instrumental Analysis		

Requirement	Minimum Grade	Credit Hours
CHM 328 Instrumental Analysis Laboratory		
CHM 341 Elementary Physical Chemistry		
CHM 343 Elementary Physical Chemistry Laboratory		
CHM 345 Physical Chemistry I		
CHM 346 Physical Chemistry II		
CHM 348 Physical Chemistry Laboratory I		
CHM 349 Physical Chemistry Laboratory II		
CHM 385 Oceanography		
CHM 433 Bioorganic Chemistry		
CHM 435 Medicinal Chemistry		
CHM 452 Inorganic Chemistry Laboratory		
CHM 453 Inorganic Chemistry		
CHM 460 Biological Chemistry		
CHM 471 Solid-State Chemistry		
CHM 481 Geochemistry		
CHM 484 Internship		
CHM 489 Field Geochemistry		
CHM 494 Special Topics		

OR **Upper Division Computer Science Track**

Requirement	Minimum Grade	Credit Hours
Computer Science Track: complete six total courses as outlined below. In addition, students must complete three credit hours of DAT 490 Data Science Capstone.		
CSE 310 Data Structures and Algorithms		
CSE 365 Information Assurance		
In consultation with an advisor, choose two elective courses from following five options:		
CSE 450 Design and Analysis of Algorithms		
CSE 467 Data and Information Security		
CSE 471 Introduction to Artificial Intelligence		
CSE 475 Foundations of Machine Learning		
CSE 476 Introduction to Natural Language Processing		
OR **Upper Division Mathematics Track**		
Mathematics Track: complete six total courses as outlined below. In addition, students need to complete three credit hours in DAT 490 Data Science Capstone.		
In cooperation with an academic advisor, choose four elective courses from the list below:		
ACT 301 Risk Management and Insurance (SOBE)		
ACT 302 Fundamentals of Enterprise Risk Management		
ACT 435 Statistics for Risk Modeling		

Requirement	Minimum Grade	Credit Hours
DAT 431 Industry Tools for Data Science		
DAT 435 Exploration and Analysis of Environmental Data		
DAT 484 Internship		
DAT 494 Topic: Bayesian Statistics		
MAT 300 Mathematical Structures		
MAT 353 Mathematics and Cancer		
MAT 419 Introduction to Linear Optimization		
MAT 420 Scientific Computing		
MAT 421 Applied Computational Methods (MATH)		
MAT 423 Numerical Analysis I (MATH)		
MAT 425 Numerical Analysis II		
MAT 429 Optimization		
MAT 451 Mathematical Modeling		
MAT 452 Introduction to Chaos and Nonlinear Dynamics		
STP 310 Design and Analysis of Experiments		
STP 311 Regression and Time Series Analyses		
STP 420 Introductory Applied Statistics (QTRS) **or** STP 427 Mathematical Statistics		
STP 421 Probability		

Requirement	Minimum Grade	Credit Hours
STP 429 Applied Regression (QTRS)		
OR **Upper Division Social Sciences Track**		
Social Sciences Track: complete six courses for a minimum of 18 credit hours as outlined below, at least 12 credit hours of which must be upper division. In addition, students must complete three credit hours in DAT 490 Data Science Capstone or a disciplinary-specific capstone course.		
Select one course from the following options:		
ECN 425 Introduction to Econometrics		
POS 401 / **SGS 401 Political Statistics (QTRS)**		
Choose five elective courses from the list below:		
AML 441 Mathematical Concepts and Tools in Sustainability		
ASB 363 / **BIO 363 From Cells to Society: Understanding Complexity**		
ASM 494 Topic: Models in Social Evolution		
BME 301 Numerical Methods in Biomedical Engineering		
BMI 461 Advanced Topics in Biomedical Informatics I		
BMI 462 Advanced Topics In Biomedical Informatics II		
COM 308 Communication Research Strategies		
COM 407 Qualitative Data Analysis in Communication		

Requirement	Minimum Grade	Credit Hours
CRJ 303 Statistical Analysis (QTRS)		
ECN 416 Game Theory and Economic Behavior		
ECN 441 Public Economics (CIVI)		
ECN 445 Environmental Economics		
ECN 470 Mathematical Economics		
FAS 361 Applied Research Methods (SOBE)		
FAS 498 Topic: Advanced Statistics for Social Sciences		
FIS 335 Designing Knowledge		
FIS 403 Governing Emerging Technologies		
GCU 325 Geography of Europe (GCSI)		
GCU 351 Population Geography (GCSI)		
GCU 357 Social Geography		
GCU 361 Urban Geography		
GCU 364 Energy in the Global Arena		
GCU 426 Geography of Russia and Surroundings		
ISS 415 Knowledge Management		
MKT 352 Marketing Research		
PAF 471 Public Policy Analysis		
POS 331 Public Opinion		
POS 434 Media and Politics		

Requirement	Minimum Grade	Credit Hours
PUP 424 Planning Methods		
PUP 481 Fundamentals of Spatial Optimization		
SBS 302 Qualitative Methods (SOBE)		
SBS 304 Social Statistics I (QTRS)		
SBS 389 Ethnographic Field Lab		
SBS 404 Social Statistics II: Multivariate Analysis		
SGS 305 / **POS 301 Empirical Political Inquiry (SOBE)**		
SOS 424 Dynamic Modeling in Social and Ecological Systems		
SOS 441 / **AML 441 Mathematical Concepts and Tools in Sustainability**		
STP 310 Design and Analysis of Experiments		
STP 311 Regression and Time Series Analyses		
TWC 411 Principles of Visual Communication		
OR **Upper Division Spatial Sciences Track**		
Spatial Sciences Track: complete six total courses as outlined below. In addition, students will complete two credit hours of DAT 490 Data Science Capstone or a 400-level GIS capstone course chosen in consultation with an assigned academic advisor.		
GIS 311 Geographic Information Science III (QTRS)		
GIS 322 Programming Principles in GIS II		

Requirement	Minimum Grade	Credit Hours
Select one of the three courses below:		
GIS 469 Multivariate Statistics for Social Sciences		
GIS 470 Advanced Statistics for Geography and Planning (QTRS)		
GIS 471 Spatial Statistics for Geography and Planning		
Select one of the five courses below:		
GIS 451 Geodesign and Urban Planning		
GIS 494 Topic: GIS and Public Health		
GIS 494 Topic: GIS for Climate Change Science		
GIS 494 Topic: Landscape Analysis Using GIS		
Behavioral Sciences Track	C	6 - 7
Behavioral Sciences Track: complete six total courses as outlined below. Students must also complete three credit hours in DAT 490 or a 400-level disciplinary capstone course drawn from the CDE, FAS, or PSY subject areas.		
In cooperation with an assigned academic advisor, select four courses from following options:		
SOC 390 Social Statistics I (QTRS)		
CDE 232 Human Development (SOBE) **or** **FAS 101 Personal Growth and Relationships (SOBE)** **or** **PSY 101 Introduction to Psychology (SOBE)**		
FAS 498 Topic: Advanced Statistics for Social Sciences **or** **SOC 469 Multivariate Statistics for Social**		

Requirement	Minimum Grade	Credit Hours
Sciences or PSY 330 Statistical Methods (QTRS)		
PSY 290 Research Methods (SCIT) or FAS 361 Applied Research Methods (SOBE)		
In cooperation with an assigned academic advisor, choose two elective courses from the list below:		
CDE 312 Adolescence (SOBE)		
CDE 337 Early Childhood Intervention		
CDE 418 Aging and the Life Course (SOBE)		
CDE 430 Infant and Toddler Development in the Family (SOBE)		
CDE 450 Childhood Disorders and Family Functioning		
FAS 301 Introduction to Parenting		
FAS 331 Modern Family Relationships (SOBE)		
FAS 332 Human Sexuality (SOBE)		
FAS 440 Fundamentals of Marriage and Family Therapy		
LSC 325 / PSY 325 / PTX 325 Physiological Psychology		
PSY 315 Personality Theory and Research (SOBE)		
PSY 320 Learning and Motivation		
PSY 324 Memory and Cognition		
PSY 341 Developmental Psychology (SOBE)		

Requirement	Minimum Grade	Credit Hours
PSY 350 Social Psychology (SOBE)		
OR **Biosciences Track**		
Biological Sciences Track: complete BIO 415 and BIO 439, a Bioethics related course, three track electives (minimum of nine credit hours) and three credit hours of DAT 490 Data Science Capstone.		
BIO 415 Statistical Models for Biology (QTRS)		
BIO 439 Computing for Research		
Choose once course from the list below:		
BIO 312 / **PHI 320 Bioethics (HUAD)**		
BIO 316 / **HPS 330 History of Biology: Conflicts and Controversies (HUAD)**		
BIO 317 / **HPS 323 History of Science II (HUAD)**		
BIO 318 / **HPS 331 History of Medicine (HUAD)**		
BIO 416 / **HPS 410 Biomedical Research Ethics (CIVI)**		
Choose three elective courses from list below:		
BIO 355 Introduction to Computational Molecular Biology		
BIO 411 Quantitative Methods in Conservation and Ecology		
BIO 440 / **MBB 440 Functional Genomics**		
BIO 494 Topic: Data Analysis in Neuroscience		

Requirement	Minimum Grade	Credit Hours
BIO 494 Topic: Microbiome Data Science		
BIO 498 Topic: Genomics Research Experience		
BIO 498 Topic: Programming for biologists		

OR **Business Analytics Track**

Business Analytics Track: complete all six courses listed below. Students also complete three credit hours of DAT 490 Data Science Capstone.		
CIS 235 Introduction to Information Systems, Analytics and AI in Business		
CIS 407 Business Database Systems Development		
CIS 409 Business Data Warehouses and Dimensional Modeling		
CIS 412 Business Machine Learning		
CIS 415 Big Data and AI in Business		
WPC 300 Problem Solving and Actionable Analytics (QTRS)		

OR **Chemistry and Biochemistry Track**

Chemistry and Biochemistry Track: complete 21 total credits as outlined below. In addition, students need to complete three credit hours in DAT 490 Data Science Capstone.		
CHM 114 General Chemistry for Engineers (SCIT)		

Requirement	Minimum Grade	Credit Hours
CHM 231 Elementary Organic Chemistry (SCIT)		
CHM 325 Analytical Chemistry		
BCH 361 Principles of Biochemistry or CHM 341 Elementary Physical Chemistry		
BCH 392 / CHM 392 Introduction to Research Techniques or DAT 490 Data Science Capstone		
BCH 494 Topic: Modern Approaches to Biochemical Data Analysis or CHM 494 Topic: Data Modeling for the Natural Sciences		
Select three credits from the list below:		
BCH 341 Physical Chemistry with a Biological Focus		
BCH 361 Principles of Biochemistry		
BCH 367 Elementary Biochemistry Laboratory		
BCH 461 General Biochemistry I		
BCH 462 General Biochemistry II		
BCH 463 Biophysical Chemistry		
BCH 467 Analytical Biochemistry Laboratory		
BCH 484 Internship		
BCH 494 Special Topics		
CHM 302 Environmental Chemistry		
CHM 303 Environmental Chemistry Laboratory		

Requirement	Minimum Grade	Credit Hours
CHM 326 Advanced Analytical Chemistry Laboratory		
CHM 327 Instrumental Analysis		
CHM 328 Instrumental Analysis Laboratory		
CHM 341 Elementary Physical Chemistry		
CHM 343 Elementary Physical Chemistry Laboratory		
CHM 345 Physical Chemistry I		
CHM 346 Physical Chemistry II		
CHM 348 Physical Chemistry Laboratory I		
CHM 349 Physical Chemistry Laboratory II		
CHM 385 Oceanography		
CHM 433 Bioorganic Chemistry		
CHM 435 Medicinal Chemistry		
CHM 452 Inorganic Chemistry Laboratory		
CHM 453 Inorganic Chemistry		
CHM 460 Biological Chemistry		
CHM 471 Solid-State Chemistry		
CHM 481 Geochemistry		
CHM 484 Internship		
CHM 489 Field Geochemistry		
CHM 494 Special Topics		

Requirement	Minimum Grade	Credit Hours

OR **Computer Science Track**

Computer Science Track: complete six total courses as outlined below. In addition, students must complete three credit hours of DAT 490 Data Science Capstone.

CSE 220 Programming for Computer Engineering **or** **CSE 240 Introduction to Programming Languages**

CSE 310 Data Structures and Algorithms

CSE 365 Information Assurance

MAT 243 Discrete Mathematical Structures

In consultation with an advisor, choose two elective courses from following five options:

CSE 450 Design and Analysis of Algorithms

CSE 467 Data and Information Security

CSE 471 Introduction to Artificial Intelligence

CSE 475 Foundations of Machine Learning

CSE 476 Introduction to Natural Language Processing

OR **Mathematics Track**

Mathematics Track: complete six total courses as outlined below. In addition, students need to complete three credit hours in DAT 490 Data Science Capstone.

MAT 267 Calculus for Engineers III (MATH) **or** **MAT 272 Calculus with Analytic Geometry III (MATH)**

Requirement	Minimum Grade	Credit Hours
MAT 275 Modern Differential Equations (MATH)		
In cooperation with an academic advisor, choose four elective courses from the list below:		
ACT 301 Risk Management and Insurance (SOBE)		
ACT 302 Fundamentals of Enterprise Risk Management		
ACT 435 Statistics for Risk Modeling		
DAT 431 Industry Tools for Data Science		
DAT 435 Exploration and Analysis of Environmental Data		
DAT 484 Internship		
DAT 494 Topic: Bayesian Statistics		
MAT 300 Mathematical Structures		
MAT 353 Mathematics and Cancer		
MAT 419 Introduction to Linear Optimization		
MAT 420 Scientific Computing		
MAT 421 Applied Computational Methods (MATH)		
MAT 423 Numerical Analysis I (MATH)		
MAT 425 Numerical Analysis II		
MAT 429 Optimization		
MAT 451 Mathematical Modeling		

Requirement	Minimum Grade	Credit Hours
MAT 452 Introduction to Chaos and Nonlinear Dynamics		
STP 310 Design and Analysis of Experiments		
STP 311 Regression and Time Series Analyses		
STP 420 Introductory Applied Statistics (QTRS) **or** **STP 427 Mathematical Statistics**		
STP 421 Probability		
STP 429 Applied Regression (QTRS)		
OR **Social Sciences Track**		
Social Sciences Track: complete six courses for a minimum of 18 credit hours as outlined below, at least 12 credit hours of which must be upper division. In addition, students must complete three credit hours in DAT 490 Data Science Capstone or a disciplinary-specific capstone course.		
Select one course from the following options:		
ECN 425 Introduction to Econometrics		
POS 401 / **SGS 401 Political Statistics (QTRS)**		
Choose five elective courses from the list below:		
ACO 100 All About Data: Design, Query, and Visualization (QTRS)		
ALA 235 Introduction to Computer Modeling		

Requirement	Minimum Grade	Credit Hours
AML 253 Introduction to Mathematical Tools and Modeling for the Life and Social Sciences (MATH)		
AML 441 Mathematical Concepts and Tools in Sustainability		
ASB 230 Beginning Social Research (SOBE)		
ASB 230 Beginning Social Research (SOBE)		
ASB 363 / BIO 363 From Cells to Society: Understanding Complexity		
ASM 201 Epidemics and Outbreaks		
ASM 494 Topic: Models in Social Evolution		
BME 301 Numerical Methods in Biomedical Engineering		
BMI 211 Clinical Decision Analysis		
BMI 461 Advanced Topics in Biomedical Informatics I		
BMI 462 Advanced Topics In Biomedical Informatics II		
COM 308 Communication Research Strategies		
COM 407 Qualitative Data Analysis in Communication		
CRJ 303 Statistical Analysis (QTRS)		
ECN 416 Game Theory and Economic Behavior		
ECN 441 Public Economics (CIVI)		
ECN 445 Environmental Economics		
ECN 470 Mathematical Economics		

Requirement	Minimum Grade	Credit Hours
FAS 361 Applied Research Methods (SOBE)		
FAS 498 Topic: Advanced Statistics for Social Sciences		
FIS 335 Designing Knowledge		
FIS 403 Governing Emerging Technologies		
GCU 325 Geography of Europe (GCSI)		
GCU 351 Population Geography (GCSI)		
GCU 357 Social Geography		
GCU 361 Urban Geography		
GCU 364 Energy in the Global Arena		
GCU 426 Geography of Russia and Surroundings		
ISS 415 Knowledge Management		
MKT 352 Marketing Research		
PAF 471 Public Policy Analysis		
POS 331 Public Opinion		
POS 434 Media and Politics		
PUP 424 Planning Methods		
PUP 481 Fundamentals of Spatial Optimization		
SBS 302 Qualitative Methods (SOBE)		
SBS 304 Social Statistics I (QTRS)		
SBS 389 Ethnographic Field Lab		

Requirement	Minimum Grade	Credit Hours
SBS 404 Social Statistics II: Multivariate Analysis		
SGS 305 / **POS 301 Empirical Political Inquiry (SOBE)**		
SOS 212 Systems, Dynamics and Sustainability (QTRS)		
SOS 424 Dynamic Modeling in Social and Ecological Systems		
SOS 441 / **AML 441 Mathematical Concepts and Tools in Sustainability**		
STP 310 Design and Analysis of Experiments		
STP 311 Regression and Time Series Analyses		
TWC 411 Principles of Visual Communication		
OR **Spatial Sciences Track**		
Spatial Sciences Track: complete six total courses as outlined below. In addition, students will complete two credit hours of DAT 490 Data Science Capstone or a 400-level GIS capstone course chosen in consultation with an assigned academic advisor.		
GIS 205 Geographic Information Science I (QTRS)		
GIS 211 Geographic Information Science II (QTRS)		
GIS 311 Geographic Information Science III (QTRS)		
GIS 322 Programming Principles in GIS II		
Select one of the three courses below:		
GIS 469 Multivariate Statistics for Social Sciences		

Requirement	Minimum Grade	Credit Hours
GIS 470 Advanced Statistics for Geography and Planning (QTRS)		
GIS 471 Spatial Statistics for Geography and Planning		
Select one of the five courses below:		
GIS 202 Drones to Satellites: Observing Earth from Above (QTRS)		
GIS 451 Geodesign and Urban Planning		
GIS 494 Topic: GIS and Public Health		
GIS 494 Topic: GIS for Climate Change Science		
GIS 494 Topic: Landscape Analysis Using GIS		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Upper Division Science and Society Elective	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience OR **LIA 101 Student Success in The College of Liberal Arts and Sciences** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines

placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Some upper-division track courses require prerequisites. It is recommended that students consult with their advisors and use electives to complete appropriate course prerequisites.

Please consult with your academic advisor regarding the number of credits required for your DAT 490 capstone experience. It is a variable credit hour class.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Earth and Environmental Sciences, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAEESBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
GLG 108 Water Planet (SCIT)	C	4
GLG 110 Dangerous World (SCIT)	C	3
GLG 111 Dangerous World Laboratory (SCIT)	C	1
SES 220 Biology of a Changing Earth	C	3
SES 225 Global Biogeochemical Cycles	C	3
GLG 305 Dynamic Earth	C	3
GLG 325 Oceanography	C	3
GLG 327 Earth's Critical Zone	C	3

Requirement	Minimum Grade	Credit Hours
GLG 464 Solving Environmental Problems	C	3
Upper Division Earth and Environmental Sciences Track Electives	C	9

Upper Division Earth and Environmental Sciences Track Electives: Students must take at least 5 upper division elective classes (3 credits each). Students are encouraged to choose a track but they also have the option to choose any combination of courses across multiple tracks. Regardless of the chosen track, at least two of the Earth and Environmental Sciences Track Electives must be 400-level.

CLIMATE/ENVIRONMENTAL CHANGE TRACK

ABS 350 Applied Statistics (QTRS)

ASB 326 Human Impacts on Ancient Environments (SUST)

ASB 375 / **SOS 375 Humans and the Environment: What's the Connection?**

ERM 426 Environmental Issues

ERM 428 International Environmental Management

FIS 444 / **JUS 444 Environment and Justice**

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the	C	16

intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.

Related Area Requirements

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

Campus immersion students are recommended to take SES

191 as a one credit hour elective.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Earth and Environmental Sciences, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LAEESBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
GLG 108 Water Planet (SCIT)	C	4
GLG 110 Dangerous World (SCIT)	C	3

PHY 131 University Physics II: Electricity and Magnetism (SCIT) **AND** **PHY 132 University Physics Laboratory II (SCIT)** OR **PHY 112 General Physics (SCIT)** **AND** **PHY 114 General Physics Laboratory (SCIT)**	C	4
MAT 265 Calculus for Engineers I (MATH) OR **MAT 270 Calculus with Analytic Geometry I (MATH)**	C	3 - 4

MAT 266 Calculus for Engineers II (MATH) OR **MAT 271 Calculus with Analytic Geometry II (MATH)**	C	3 - 4
MAT 267 Calculus for Engineers III (MATH) OR **MAT 272 Calculus with Analytic Geometry III (MATH)** OR **STP 231 Statistics for Life Science (QTRS)**	C	3

Additional prerequisite math courses may be needed.

Students who opt to take STP 231 and PHY 112/114, instead of MAT 267 or MAT 272 and PHY 131/132, will need to request a prerequisite override from the Physics Department to enroll in PHY 112 and 114.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience
OR **LIA 101 Student Success in The College of Liberal Arts and Sciences**

Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Campus immersion students are recommended to take SES 191 as a one credit hour elective.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Earth and Space Exploration (Astrophysics), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LASESABS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
Earth and Space Exploration Core Courses		
SES 123 Earth, Solar System and Universe Laboratory (SCIT)	C	1
SES 121 Earth, Solar System and Universe (SCIT)	C	3
Astrophysics Concentration Courses		
SES 126 Exploration of the Universe	C	3
SES 128 Exploration of the Universe Lab	C	1

Requirement	Minimum Grade	Credit Hours
SES 230 Coding for Exploration (QTRS)	C	3
AST 321 Stellar and Planetary Astrophysics	C	3
AST 322 Introduction to Galactic and Extragalactic Astrophysics	C	3
AST 421 Astrophysics I	C	3
AST 422 Astrophysics II	C	3
AST 498 Topic: Astrophysics Seminar OR AST 394 Topic: Astrophysics Research Seminar	C	1
PHY 314 Quantum Physics I	C	3
SES 410 Senior Exploration Project I	C	3
SES 411 Senior Exploration Project II	C	3
Upper Division Astrophysics Major Elective	C	3
GLG 404 Fundamentals of Planetary Geology		
PHY 302 Mathematical Methods in Physics II		
PHY 310 Classical Particles, Fields, and Matter I		
PHY 311 Classical Particles, Fields, and Matter II		
PHY 312 Mechanics and Electromagnetism		
PHY 315 Quantum Physics II		
PHY 361 Introductory Modern Physics		
PHY 441 Statistical and Thermal Physics		

Requirement	Minimum Grade	Credit Hours
SES 311 Essentials of Astrobiology: Exploration for Life in the Universe		
SES 350 Engineering Systems and Experimental Problem Solving (QTRS)		
SES 421 Foundations of Planetary Science		
Upper Division AST Elective		
Upper Division GLG Elective		
Upper Division MAT Elective		
Upper Division PHY Elective		
Upper Division SES Elective		
Upper Division Note: A minimum of one three-credit lecture or research course is required to fulfill this requirement. Students may not use multiple one-credit seminar/mentoring courses to meet the three credits needed to satisfy this requirement.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least

one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Science and Society Elective	C	3
Upper Division Science and Society Elective	C	3

Related Area Requirements

MAT 270 Calculus with Analytic Geometry I (MATH) **OR MAT 265 Calculus for Engineers I (MATH)**	C	3 - 4
MAT 271 Calculus with Analytic Geometry II (MATH) **OR MAT 266 Calculus for Engineers II (MATH)**	C	3 - 4
MAT 272 Calculus with Analytic Geometry III (MATH) **OR MAT 267 Calculus for Engineers III (MATH)**	C	3 - 4
MAT 275 Modern Differential Equations (MATH) **OR PHY 302 Mathematical Methods in Physics II**	C	3
PHY 150 Physics I (SCIT) **OR PHY 121 University Physics I: Mechanics (SCIT)** **AND PHY 122 University Physics Laboratory I (SCIT)**	C	4
PHY 151 Physics II (SCIT) **OR PHY 131 University Physics II: Electricity and Magnetism (SCIT) AND PHY 132 University Physics Laboratory II (SCIT)**	C	4
PHY 201 Mathematical Methods in Physics I (MATH)	C	3

PHY 252 Physics III (SCIT)	C	4

Additional prerequisite math courses may be needed.

Faculty strongly recommend MAT 270, MAT 271 and MAT 272 as the preferred Calculus sequence for this major. Similarly, PHY 150 and PHY 151 are preferred over PHY 121/122 and PHY 131/132.

ASIA IN A GLOBAL WORLD OPTION		
This category includes all courses on the China, Japan, Korea, South Asia and Southeast Asia Focus Area lists. Students who select Asia in a Global World do not focus on a specific region and may select a broad combination of courses across the geographical region. At least 24 hours must be upper division.		

Requirement	Minimum Grade	Credit Hours
Not all courses on the course lists are available every term. Students should consult Class Search prior to each term to confirm course availability.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.		
Mathematics (MATH) Recommended: **MAT 114**	C	3
Second Language Requirement: satisfied through completion of Arabic, Chinese, French, Hindi, Indonesian, Japanese, Korean, Portuguese, Spanish, Thai or Vietnamese language course at the intermediate level (202 or equivalent). Students who are already proficient in one of these languages, or another language relevant to the study of Asia, such as Dutch, Tagalog or Urdu, may take a proficiency exam. Credit hours for second language courses will vary depending on the language chosen.	C	16 - 20

Students choosing one of the specialized Global Asia categories are strongly encouraged to study a language that is highly relevant to that particular country or region. The following languages are encouraged for each specialized focus area:

- China: Chinese, Portuguese, Japanese, Korean, Dutch (by proficiency exam)
- Japan: Japanese, Chinese, Portuguese, Korean, Dutch (by proficiency exam)

- Korea: Korean, Chinese, Portuguese, Japanese, Indonesian, Thai, Vietnamese
- South Asia: Hindi, Arabic, Portuguese, French, Urdu (by proficiency exam), Dutch (by proficiency exam)
- Southeast Asia: Indonesian, Thai, Vietnamese, French, Spanish, Portuguese, Chinese, Japanese, Dutch (by proficiency exam), Tagalog (by proficiency exam)

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences **OR** **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

Some General Studies requirements can overlap with major courses, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship opportunities related to your major, meet with an academic advisor.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General

Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Global Citizenship, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAGCZBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

All global health majors are required to participate in a study abroad program from a select, pre-approved program list.

For more information about planning for, applying to, and paying for your study abroad program, please visit the Global Education Office website.

It is possible to have a major requirement also fulfill a General Studies requirement. If you are interested in learning more about how that works, please contact the SHESC advising team (shesc.undergrad@asu.edu) or schedule an appointment.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. Students with previous experience in the language are required to take a placement exam.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Global Health, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LASSHBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

All global health majors are required to participate in a study abroad program from a select, pre-approved program list.

For more information about planning for, applying to, and paying for your study abroad program, please visit the Global

Requirement	Minimum Grade	Credit Hours
Education Office website.		

It is possible to have a major requirement also fulfill a General Studies requirement. If you are interested in learning more about how that works, please contact the SHESC advising team (shesc.undergrad@asu.edu) or schedule an appointment.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Curriculum - History, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAHISBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
History Core Courses		
HST 130 The Historian's Craft OR **HST 330 Historical Thinking** Students who have completed 30 credit hours and ENG 102 may take HST 330 in place of HST 130.	C	3
HST 495 Methods of Historical Inquiry	C	3
History Major Courses		
HST Survey Courses **HST 100 Global History to 1500 (HUAD)**	C	6

Requirement	Minimum Grade	Credit Hours
HST 101 Global History Since 1500 (HUAD)		
HST 102 Europe and the Mediterranean: Ancient and Medieval (HUAD)		
HST 103 Early Modern Europe: Renaissance to Enlightenment (GCSI)		
HST 104 Modern Europe: French Revolution to European Union (GCSI)		
HST 109 United States to 1865 (AMIT)		
HST 110 United States Since 1865 (HUAD)		
HST 111 Introduction to Asia (GCSI)		
HST 230 Introduction to Jewish Civilization (GCSI)		
HST 260 Introduction to Islam (GCSI)		
Upper Division Comparative History Course	C	3
For HST 303, HST 304 and HST 305, only the specific topics (course titles) listed below will count for the Comparative History requirement; any other topics of these courses will NOT satisfy the requirement.		
HST 302 Studies in History		
HST 303 Topic: Empires in Asia		
HST 304 Topic: Revolutionary Russia: Communism, War and Dissent		
HST 304 Topic: Stalin to Putin		

Requirement	Minimum Grade	Credit Hours
HST 305 Topic: Empire & Revolution in Cold War Latin America		
HST 309 Exploration and Empire (GCSI)		
HST 326 The Global History of the Trans-Atlantic Slave Trade (GCSI)		
HST 336 Islamic Civilization (HUAD)		
HST 339 Islam in the Modern World (GCSI)		
HST 345 Environmental History (SUST)		
HST 358 Jewish History from Antiquity to 1492 (CIVI)		
HST 359 Jewish History from 1492 to 1948		
HST 360 Crusades and Holy Wars (HUAD)		
HST 396 Islam and Politics (CIVI)		
HST 426 The British Empire		
HST 435 Russian Empire: From Ivan the Terrible to 1917 (GCSI)		
HST 436 Rise & Fall of Soviet Communism		
HST 454 History of Genocide (GCSI)		
HST 456 The Vietnam War (HUAD)		
HST 460 World War II (HUAD)		
Upper Division History in the Wild Course	C	3

Requirement	Minimum Grade	Credit Hours
For HST 302 and HST 306, only the specific topics (course titles) listed below will count for the History in the Wild requirement; any other topics of these courses will NOT satisfy the requirement. **HST 302 Topic: Envisioning Peace** **HST 306 Topic: Historic Preservation in the U.S.** **HST 306 Topic: Monuments and Memory** **HST 306 Topic: U.S. Urban History** **HST 414 Political History and Leadership** **HST 485 History in the Wild**		
HST 303 Studies in Asian History OR **HST 305 Studies in Latin American History** OR **HST 307 Studies in African History** HST 303, 305 and 307 are variable topics courses. Students may take these courses for credit multiple times, so long as the topics are different. Some topics carry a general studies designation. Check Class Search to confirm any general studies designations for the specific course topic.	C	3
HST 304 Studies in European History HST 304 is a variable topics course. Some topics carry a general studies designation. Check Class Search to confirm any general studies designation for the specific course topic.	C	3
HST 306 Studies in United States History	C	3

Requirement	Minimum Grade	Credit Hours
HST 306 is a variable topics course. Some topics carry a general studies designation. Check Class Search to confirm any general studies designations for the specific course topic.		
All students are required to take one course from HST 304 and HST 306, plus one course chosen from HST 303, HST 305 or HST 307. Students may select any topic within these course numbers for this requirement. However, for the Comparative History and History in the Wild requirements, students must choose only from the specific topics shown in the Comparative History and History in the Wild lists. Any topic under HST 302 will count as a Comparative History course. Students must complete 33 total credit hours in history (HST), so any variable topics courses taken for Comparative History and History in the Wild will be in addition to the standard requirement for HST 304, HST 306, and (HST 303, 305 or 307).		
Upper Division **HST Elective**	C	6

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.		
Mathematics (MATH) Recommended: **MAT 114**	C	3
Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the	C	16

intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

If planning on law school, review the Pre-Law website and prepare to take the LSAT in your junior year.

Not all courses in the course lists are available every term or available in both on-campus and online formats. Students should consult Class Search prior to each term to confirm course availability.

Electives: students are encouraged to take HST 394 Topic: Career Readiness with a History Degree.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship opportunities related to your major, meet with an academic advisor.

Many general studies requirements can overlap with major requirements, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - History (Secondary Education), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAHISSEBA
Minimum credit hours: 120
Upper division minimum credit hours: 51

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements (HST courses) must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
History Core		
HST 130 The Historian's Craft OR **HST 330 Historical Thinking** Students who have completed 30 credit hours and ENG 102 may take HST 330 in place of HST 130.	C	3
HST 495 Methods of Historical Inquiry	C	3
History (Secondary Education) Concentration		
HST 100 Global History to 1500 (HUAD)	C	3

Requirement	Minimum Grade	Credit Hours

Requirement	Minimum Grade	Credit Hours
Secondary Education Core		
BLE 220 Foundations of Structured English Immersion (HUAD)	C	3
SPE 222 Orientation to Education of Exceptional Children (CIVI)	C	3
TEL 111 Exploration of Education (HUAD)	C	3
Upper-Division Secondary Education		
Before taking the upper-division Teacher Education (TEL) courses, students must successfully complete first-year composition, math, TEL 111, BLE 220, SPE 222, and the history survey courses (HST 100, HST 101, HST 109 and HST 110). In addition, students must have a cumulative ASU GPA of 2.00 or higher.		
Students must apply for an Identity Verified Print (IVP) DPS fingerprint card, required by state law for participation in internships in 6-12th grade schools, ideally in the sophomore year or at least one semester before planning to start the upper-division Teacher Education (TEL) courses. Students must have a valid IVP fingerprint card in order to participate in the teacher preparation internship and student teaching courses.		
Students must submit an online Placement Request Form for each semester that they will be enrolling in the upper-division Teacher Education internship and student teaching courses (TEL 310, TEL 366, TEL 332 and TEL 488). Meet with your		

Requirement	Minimum Grade	Credit Hours
academic advisor to discuss enrollment in upper-division TEL courses.		
Students must pass the NES Secondary Professional Knowledge Exam to obtain secondary education teacher certification in Arizona. Completing this exam prior to student teaching is highly recommended.		
Check: Minimum 2.00 ASU Cumulative GPA Students must have at least a 2.00 ASU cumulative GPA to take upper-division Teacher Education (TEL) courses.		
TEL 310 Instructional Design and Planning: Instructional Thought and Action While enrolled in TEL 310, students will be paired with a mentor teacher in a 6-12th grade classroom and must complete 45 hours over the semester. Reliable transportation is needed to get to school sites.	C	4
TEL 318 Instructional Thought and Action: Assessment for Learning	C	3
HST 480 Methods of Teaching History: Classroom Resources	C	3
TEL 317 Instructional Thought and Action: Learning Environment and Management	C	3
TEL 366 Professional Experience Internship While enrolled in TEL 366, students will be paired with a mentor teacher in a 6-12th grade classroom and must	C	1

Requirement	Minimum Grade	Credit Hours
complete 45 hours over the semester. Reliable transportation is needed to get to school sites.		
HST 481 Methods of Teaching History: Community Resources	C	3
TEL 332 Disciplinary Literacy Methods While enrolled in TEL 332, students will be paired with a mentor teacher in a 6-12th grade classroom and must complete 60 hours over the semester. Reliable transportation is needed to get to school sites.	C	4
TEL 340 Families, Communities and Cultures: Cultivating Networks of Culturally Responsive Relationships (SOBE)	C	3
TEL 488 Student Teaching Student teaching requires a full-time commitment in a 6-12th grade classroom for the semester. All other degree requirements should be completed prior to student teaching (TEL 488). Only one course may be approved to take concurrently with student teaching.	C	12
Students must either have passed the Constitutions of the United States and Arizona AEPA exam or have completed coursework covering this requirement within one year of initial certification.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.		
Mathematics (MATH)	C	3

Recommended: **MAT 114**		
Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit

hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. Students with previous experience in the language are required to take a placement exam.

Electives: GCU 113 is recommended for an elective course if students have not yet satisfied the AZ Constitution requirement for teacher certification.

Electives: Students are encouraged to take HST 394 Topic: Career Readiness with a History Degree.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General

Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Integrated Studies, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAISTBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
Students may not be admitted directly to the BA in Integrated Studies. This degree program is only for students who have earned at least 32 graded credit hours at ASU, who have a minimum cumulative GPA of 3.25, and whose study interests are not met by an already-existing major offered by Arizona State University. Students who meet the above qualifications and who have faculty mentors in their areas of interest are invited to meet with the Office of Student and Academic Programs in The College of Liberal Arts and Sciences to discuss the possibility of being allowed to pursue this opportunity. Appointments may be scheduled by calling (480) 965-6506.		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
Approved integrated study courses; determined by advisor	C	15
Upper Division Approved integrated study courses; determined by advisor	C	30

Requirement	Minimum Grade	Credit Hours
Check: Minimum 3.25 ASU Cumulative GPA

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite. It is recommended that students complete this requirement with Greek (GRK) courses.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. Students with previous experience in the language are required to take a placement exam.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - International Letters and Cultures (Classics), BA - Latin

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LASLCCBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Program Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Requirement	Minimum Grade	Credit Hours
Students may choose any combination of courses from the three different track lists.		

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3
Second Language Requirement satisfied through completion of Modern Hebrew, Biblical Hebrew, Arabic, German, Polish, Russian or Spanish at the intermediate level (202 or equivalent). Credit hours for second language courses will vary depending on the language chosen. Students who are already proficient in one of these languages may take a proficiency exam. Biblical Hebrew language courses are worth 3 credit hours each. Students completing Biblical Hebrew will need additional elective credit hours to reach the 120 required for graduation.	C	16

Related Area

Students must complete 15 credit hours of coursework in Related Areas, at least nine of which must be upper division.

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit

hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship opportunities related to your major, meet with an academic advisor.

Many General Studies requirements can overlap with major requirements, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

Not all courses in the course lists are available every term. Students should consult Class Search prior to each term to confirm course availability.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-LA The ASU Experience **OR** **LIA 101 Student Success in The College of Liberal Arts and Sciences** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Latin American Studies, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: ASLASBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Science and Society Requirement: All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Science and Society Elective	C	3
Upper Division Science and Society Elective	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences **OR** **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines

placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Microbiology, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LAMICBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in the class search.		
Microbiology Core Courses		
BIO 181 General Biology I (SCIT)	C	4

PHI 420 Topics in Philosophy PHI 420 is a topical course that can be repeated for credit if the topics are different.	C	3
Upper Division Advanced Philosophy Course **PHI 401 Rationalism** **PHI 402 Empiricism**	C	3

Requirement	Minimum Grade	Credit Hours
PHI 403 Contemporary Analytic Philosophy		
PHI 405 Moral Psychology		
PHI 408 Feminist Ethics (HUAD)		
PHI 413 Advanced Symbolic Logic		
PHI 420 Topics in Philosophy		
PHI 452 Philosophy of Biology and Medicine		

Students may complete one topic of PHI 420 to satisfy the PHI 420 requirement above and a different topic of PHI 420 to satisfy the Advanced Philosophy Course requirement. A single PHI 420 course will not satisfy both requirements. PHI 401, 402 and 403 may satisfy either a History of Philosophy requirement or the Advanced Philosophy Course requirement, but not both.

Philosophy Major

PHI 103 Principles of Sound Reasoning (QTRS)	C	3
Upper Division History of Philosophy	C	6
PHI 304 Existentialism (HUAD)		
PHI 328 History of Ancient Philosophy (GCSI)

Requirement	Minimum Grade	Credit Hours
PHI 403 Contemporary Analytic Philosophy		
Upper Division Epistemology		
PHI 313 Probability, Evidence, and Decision	C	3
PHI 314 Philosophy of Science (HUAD)		
PHI 330 Theory of Knowledge (HUAD)		
Upper Division Values		
PHI 335 History of Ethics	C	3
PHI 336 Social and Political Philosophy (CIVI)		
PHI 337 Ethical Theory (HUAD)		
PHI 338 Metaethics (HUAD)		
Upper Division Metaphysics		
PHI 331 Philosophy of Language (HUAD)	C	3
PHI 332 Metaphysics (HUAD)		
PHI 334 Philosophy of Mind (HUAD)		
Upper Division Logic		
PHI 333 Symbolic Logic	C	3
PHI 413 Advanced Symbolic Logic		
PHI Elective	C	3

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3
Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition**	C	6

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

If planning on law school, review the Pre-Law website and prepare to take the LSAT in your junior year.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship opportunities related to your major, meet with an academic advisor.

Many General Studies requirements can overlap with major requirements, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

Not all courses in the course lists are available every term or available in both on-campus and online formats. Students should consult Class Search prior to each term to confirm course availability.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Philosophy (Morality, Politics and Law), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAPHIMPBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

Major Requirements

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Philosophy Core Courses

PHI 300 Philosophical Argument and Exposition	C	3
PHI 420 Topics in Philosophy PHI 420 is a topical course that can be repeated for credit if the topics are different.	C	3
Upper Division Advanced Philosophy Course **PHI 401 Rationalism** **PHI 402 Empiricism**	C	3

Requirement	Minimum Grade	Credit Hours
PHI 403 Contemporary Analytic Philosophy		
PHI 405 Moral Psychology		
PHI 408 Feminist Ethics (HUAD)		
PHI 413 Advanced Symbolic Logic		
PHI 420 Topics in Philosophy		
PHI 452 Philosophy of Biology and Medicine		

Students may complete one topic of PHI 420 to satisfy the PHI 420 requirement above and a different topic of PHI 420 to satisfy the Advanced Philosophy Course requirement. A single PHI 420 course will not satisfy both requirements. PHI 401, 402 or 403 may satisfy either a History of Philosophy requirement or the Advanced Philosophy Course requirement, but not both.

Morality, Politics and Law Concentration Courses

PHI 101 Introduction to Philosophy (HUAD) OR **PHI 103 Principles of Sound Reasoning (QTRS)** OR **PHI 105 Intro to Ethics (HUAD)** OR **PHI 194 Topic: Trust, Lies, & Pseudoscience** • If planning to take PHI 333 Symbolic Logic in a later semester, take PHI 103, the prerequisite for PHI 333. • PHI 194 is a topical course. Only the topic "Trust, Lies, & Pseudoscience" will fulfill the requirement.	C	3
Upper Division History of Philosophy Course **PHI 304 Existentialism (HUAD)**	C	3

Requirement	Minimum Grade	Credit Hours

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

PHY 191 will count as a lower-division elective credit and is recommended for campus immersion students. Students should speak with an academic advisor about how the credits will fit into their total credit hours before enrollment.

Students can review research opportunities.

ASU Online students can explore the Online Undergraduate Research Scholars program.

Students can review internships.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Political Science, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LAPOSBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.		
POS 110 American Government and Politics (AMIT) POS 310 can substitute for POS 110 and is recommended for transfer students.	C	3
POS 150 Comparative Government (GCSI) OR **POS 160 Global Politics (GCSI)** POS 350 can substitute for POS 150, and POS 360 can substitute for POS 160. These substitutions are recommended for transfer students.	C	3
POS 210 Political Ideologies (CIVI)	C	3
POS 301 Empirical Political Inquiry (SOBE)	C	3

Requirement	Minimum Grade	Credit Hours
Upper Division Political Science Career Requirement		
POS 304 Professional Career Development	C	3
POS 484 Topic: Arizona State Legislative Internship		
POS 484 Topic: ASU World Innovators		
POS 484 Topic: Capital Scholars Undergrad		
POS 484 Internship		
POS 484 Topic: Washington DC Apprenticeship		
POS 495 Jr. Fellows		
Upper Division **POS Elective**	C	9
POS Elective	C	6

Maximum of six credit hours of POS 484 and three credit hours of POS 499 (Individualized Instruction) may be applied toward the major.

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

Mathematics (MATH) Recommended: **MAT 114**	C	3

Second Language Requirement: All students pursuing a BA degree in The College of Liberal Arts and Sciences must demonstrate proficiency in a second language. Proficiency is demonstrated by completion of a language course at the intermediate level (202 or equivalent), or a higher-level course that has 202 (or its equivalent) as a prerequisite.	C	16

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience** Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.		1

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Religious Studies (Religion, Culture and Public Life), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LARELCPBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

Major Requirements

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Religious Studies Core Courses

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences

OR **ASU 101-LA The ASU Experience**

Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. All other students are required to take a placement exam, regardless of prior credit earned.

If planning on law school, review the Pre-Law website and prepare to take the LSAT in your junior year.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship opportunities related to your major, meet with an academic advisor.

Many General Studies requirements can overlap with major requirements, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

Not all courses in the course lists are available every term or available in both on-campus and online formats. Students should consult Class Search prior to each term to confirm course availability.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

LIA 101 Student Success in The College of Liberal Arts and Sciences OR **ASU 101-LA The ASU Experience**		

Campus immersion students enroll in LIA 101. ASU Online students enroll in ASU 101-LA.

First-Year Composition

ENG 101 First-Year Composition AND **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** AND **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. Students with previous experience in the language are required to take a placement exam.

If planning on law school, review the Pre-Law website and prepare to take the LSAT in your junior year.

Consider participating in an Undergraduate Research Experience through the School of Historical, Philosophical and Religious Studies or a research opportunity in the Humanities Lab.

Consider participating in an internship to gain valuable career experience and contacts. For help exploring internship

opportunities related to your major, meet with an academic advisor.

Many General Studies requirements can overlap with major requirements, leaving more room for electives. Consult an academic advisor to select the best courses for your personal plan of study.

Not all courses in the course lists are available every term or available in both on-campus and online formats. Students should consult Class Search prior to each term to confirm course availability.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Russian, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: The College of Liberal Arts and Sciences
Plan Code: LARUSBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

OR **ENG 105 Advanced First-Year Composition**

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

ASU Language Placement: Only true beginners are eligible for 101-level courses. Students with previous experience in the language are required to take a placement exam.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Technological Leadership, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: The College of Liberal Arts and Sciences
Plan Code: LATECLDRBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours

Major Requirements

A minimum of 12 upper-division credit hours used toward the major requirements must be taken from The College of Liberal Arts and Sciences. When selecting courses, the college offering the course can be identified by viewing the course details in Class Search.

Inquiry Courses

IPI 196 Fundamentals of Inquiry	C	3
IPI 296 Interplanetary Inquiry	C	3
IPI 496 Advanced Interplanetary Inquiry	C	3
IPI 496 Advanced Interplanetary Inquiry OR **THF 429 Astrobiological Arts**	C	3

Making Courses

Requirement	Minimum Grade	Credit Hours
IPI 241 Designing and Making (Electronics and Programming)	C	3
IPI 341 Designing and Making (3D Printing and Fabrication)	C	3
IPI 241 and IPI 341 fulfill the Science and Society requirement.		
Making Electives **CSE 205 Object-Oriented Programming and Data Structures** **GIS 494 Topic: GIS Methods for Non-Majors** **HSE 429 Product Design and Evaluation** **IPI 441 Designing and Making: Advanced Projects** **IPI 460 Can NASA Stop Wildfires?** **SES 307 Space Works I: Design, Build, Test** **SES 407 Space Works II: Model, Fabricate, Test** **TWC 446 Technical and Scientific Reports** **WPC 300 Problem Solving and Actionable Analytics (QTRS)**	C	3
Upper Division Making Electives **GIS 494 Topic: GIS Methods for Non-Majors** **HSE 429 Product Design and Evaluation** **IPI 441 Designing and Making: Advanced Projects** **IPI 460 Can NASA Stop Wildfires?**	C	3

Requirement	Minimum Grade	Credit Hours
SES 307 Space Works I: Design, Build, Test		
SES 407 Space Works II: Model, Fabricate, Test		
TWC 446 Technical and Scientific Reports		
WPC 300 Problem Solving and Actionable Analytics (QTRS)		

Making Electives may not be offered for all campuses and may require prerequisites. Review Class Search thoroughly to understand course offering options or speak with your advisor.

Leadership Courses

PSY 302 The Psychology of Positive Leadership	C	3
Upper Division Leadership Electives	C	6
ACC 382 Accounting and Financial Analysis		
CEL 350 Philosophy, Politics and Economics (SOBE)		
COM 453 Communication Training and Development		
FIS 308 Politics, Markets and Innovation (CIVI)		
FIS 334 Science, Technology and Inequality (GCSI)		
FIS 432 Problem Solving Through Strategic Thinking		
HDA 494 Topic: Generative Critique:The Critical Response Process		
HSE 428 Judgment and Decision Making		

Requirement	Minimum Grade	Credit Hours
MGT 380 Management and Strategy		
NLM 410 Social Entrepreneurship		
OGL 300 Theory and Practice of Leadership		
OGL 345 Organizational Ethics (HUAD)		
OGL 350 Diversity and Organizations (GCSI)		
PMG 320 Project Approaches		
SES 494 Topic: Space Business & Entrepreneurs		
SOC 334 Technology and Society (SOBE)		
TEM 400 Technology Entrepreneurship		
TWC 443 Grant & Proposal Writing		

Leadership Electives may not be offered for all campuses and may require prerequisites. Review Cass Search thoroughly to understand course offering options or speak with your advisor.

Career/Internships

IPI 400 Fundamentals of Career Success	C	2
IPI 402 Technological Leadership Career Exploration	C	1
IPI 484 Internship Internship experiences can come from a variety of opportunities and may be done as one or two immersive experiences to meet the required 6 credits. Work with your advisor to complete this portion of the program.	Y	6

The College Requirements

Mathematics Proficiency Requirement: All students are required to obtain a grade of "C" or higher in any course that satisfies the ASU General Studies MATH requirement.

All students pursuing a BS or BSP degree in The College of Liberal Arts and Sciences must complete two courses from the Science and Society list. At least one of the two courses must be upper division and students must earn a "C" or better in the courses. Both Science and Society courses (i.e., all six credits) may count towards any major, minor, related fields and ASU General Studies requirements.

Students who have not met all ASU general studies and first-year composition requirements with their transfer courses

must complete them at ASU to earn the BAS degree.

Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.

AAS Transfer Degree Block of Credit Hours

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

> General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Community Health, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Edson College of Nursing and Health Innovation
Plan Code: NUCHLTBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Community Health Major Requirements		
HCR 231 Fundamentals of Community Health	C	3
HCR 303 Assessing Needs, Assets and Capacity for Health Education	C	3
HCR 331 Communication within Communities	C	3
HCR 335 Program Development and Management for Community Health	C	3
HCR 336 Environmental Community Health	C	3
HCR 430 Foundation to Health Care Systems	C	3
HCR 435 Leaders in Community Health	C	3
HCR 439 Community Health Capstone Students should enroll in their capstone course during their final semester at ASU (excluding summer). HCR 439 is offered only in the fall and spring semesters.	C	3

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

The BS in integrative health degree provides opportunities for students to pursue two separate pathways.

The pre health grad school track provides an opportunity for students interested in pursuing graduate study in the health professions. This track includes the core required courses for most graduate programs. Students pursuing a graduate program in health should consult with an advisor to review the complete curriculum for graduate school preparation in the health professions.

The nursing and general health track includes the prerequisites for the nursing program at Arizona State University. This track also provides options for students interested in health care.

ASU Online students will complete all experiments for the organic chemistry labs at the ASU Tempe campus during a one-week session in summer. Lab reports will be completed in subsequent weeks during the same summer term.

This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.		
ASU 101-NU The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

The BS in integrative health degree provides opportunities for students to pursue two separate pathways.

The pre health grad school track provides an opportunity for students interested in pursuing graduate study in the health professions. This track includes the core required courses for most graduate programs. Students pursuing a graduate program in health should consult with an advisor to review the complete curriculum for graduate school preparation in the health professions.

The nursing and general health track includes the prerequisites for the nursing program at Arizona State University. This track also provides options for students interested in health care.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Nursing, BSN - RN to BSN Path conf by OTP

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Nursing, BSN
College/School: Edson College of Nursing and Health Innovation
Plan Code: NUNURDBSN
Minimum credit hours: 120
Upper division minimum credit hours: 42

Requirement	Minimum Grade	Credit Hours
Major Courses		
NUR 318 Nursing Research and Evidence Translation (SOBE)	C	4
NUR 391 Professional Nursing Theory	C	4
NUR 392 Health Promotion Across the Life Span	C	4
NUR 440 Community and Public Health Nursing in the United States	C	4

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Licensure / Certification Direct Disclosure Statement

The Edson College of Nursing and Health Innovation prepares graduates for excellence upon entering the workplace. Certification and licensure requirements vary by profession and from state-to-state, students should review professional licensure information at ASU Professional Licensure to determine if a program meets educational requirements for licensure or certification in a specific state. State licensing contact information is available on the website: https://admission.asu.edu/academics/licensure.

Advancement to the Prelicensure Clinical Nursing Program

Priority consideration is given to students with a completed bachelor's degree in another area.

Prospective students should consult with the Edson College of Nursing and Health Innovation student academic services for the advancement requirements, including prerequisites, TEAS requirement, and immunization/background requirements.

Students should view the Accelerated BSN Prelicensure Clinical Nursing Program Information Session.

Advancement into the prelicensure clinical nursing programs at Arizona State University requires an application. Application deadlines are September 1 for spring and February 1 for summer and fall.

Students must meet all health and safety requirements at the time of advancement and must maintain compliance on all health and safety requirements throughout their enrollment in the program.

An Arizona IVP Fingerprint Clearance Card is required for advancement.

A valid American Heart Association Basic Life Support (BLS) for Healthcare Providers certificate is required for advancement.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CPP The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR ENG 105 Advanced First-Year Composition	C	6
OR ENG 107 First-Year Composition AND ENG 108 First-Year Composition		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Criminology and Criminal Justice, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Watts College of Public Service & Community Solut
Plan Code: PPCRIMJBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Core Requirements		
CRJ 100 Introduction to Criminal Justice (SOBE)	C

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Science (Early Childhood Studies), BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: Mary Lou Fulton College for Teaching & Learning In
Plan Code: TEAPSECBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
Students must secure an approved work or volunteer placement for upper-division coursework. The college's Career and Professional Experiences (CAPES) team can assist students in finding a placement at a site that teaches young children and meets the requirements of the degree. Email MLFC-PES@asu.edu.		
CDE 430 Infant and Toddler Development in the Family (SOBE)	C	3
ECD 310 Applied Early Child Development	C	3
ECD 322 Cognition and General Knowledge: Science, Math, Logic and Reasoning	C	3
ECD 325 Supporting Dual Language Learners	C	3
ECD 327 Becoming a Teacher Leader	C	3
ECD 330 Nurturing Social-Emotional Connections in Early	C	3

Requirement	Minimum Grade	Credit Hours
Childhood		
ECD 476 Intentional Teaching	C	3
ECS 312 Social and Emotional Development of the Young Child (SOBE)	C	3
ECS 315 Classroom Organization and Child Guidance	C	3
ECS 321 Communication, Language Development, and Emergent Literacy	C	3
ECS 427 Highly Individualized Teaching and Learning	C	3
ECS 430 Systems, Policy, and Advocacy in Early Childhood/Special Education	C	3
FAS 370 Family Ethnic and Cultural Diversity (CIVI)	C	3

Students who have not met all ASU general studies and first-year composition requirements with their transfer courses must complete them at ASU to earn the BAS degree.		
Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.		
AAS Transfer Degree Block of Credit Hours		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit

hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students are encouraged to meet with their academic advisor to discuss options for elective courses, such as certificates, minors or personalized interest areas.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Behavior Analysis, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Mary Lou Fulton College for Teaching & Learning In
Plan Code: TEBEHANBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Courses		
SPE 305 Introduction to Behavior Analysis	C	
SPE 365 Foundations of Behavior Analysis (SOBE)	C	3
SPE 366 Measurement and Experimental Analysis of Behavior	C	3
SPE 448 Assessing and Improving Challenging Behavior in Schools and Clinics	C	3
SPE 449 Assessment and Program Planning for Diverse Learning Needs	C	3
SPE 450 Professional and Ethical Practice in Behavior Analysis	C	3
SPE 460 Organizational Behavior Management	C	3
Upper Division Behavior Analysis Electives	C	15
SPE 394 Special Topics		
SPE 494 Topic: Introduction to Autism Spectrum Disorders		

Requirement	Minimum Grade	Credit Hours
SPE 494 Topic: B.F. Skinner's Analysis of Verbal Behavior		
SPE 494 Topic: Artificial Intelligence in Behavior Analysis		
SPE 494 Topic: Fundamentals Behavior Analysis: Applied Animal Beh		
SPE 494 Topic: Experiential Learning in Behavior Analysis		

Students work with their academic advisor to select appropriate behavior analysis electives.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

TEL 101 Professional Educator Series: The Student Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

An Arizona DPS IVP fingerprint clearance card is required for any courses that include professional classroom experiences.

Students are encouraged to meet with their academic advisor to discuss options for elective courses, such as certificates, minors or personalized interest areas.

Students seeking teacher certification must pass required educator exams. More information can be found on the college's Certification and Compliance website.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Secondary Education (English), BAE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts in Education, BAE
College/School: Mary Lou Fulton College for Teaching & Learning In
Plan Code: TEENGBAE
Minimum credit hours: 120
Upper division minimum credit hours: 51

Requirement	Minimum Grade	Credit Hours

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students interested in pursuing certification to become a registered sanitarian should select environmental health related courses from the Major Electives and will need to complete 30 credits of natural science courses (inclusion of CHM 101 is recommended). Learn more on how to become a registered sanitarian.

Students interested in pursuing health-related professional and graduate programs should explore pre-health resources, including Pre-Health 101 Workshops and Pre-Health Advising.

Career preparation resources are available through Career Services.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Dual-objective programs

Undergraduate-level combinations

Shared coursework policy

Credit sharing between undergraduate degrees and certificates is permitted. The college of the major has discretionary authority to determine if certificate courses also may apply toward major credit.

CERT/CERT Applied Business Data Analytics and Geographic Information Science (BABDACERT and LAGISCERT)

Program description
If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

The certificate program in geographic information science combines geospatial tools, spatial reasoning and practical analysis to solve real-world problems. You work in multiple GIS platforms as you build a strong foundation in spatial analysis, geovisualization, remote sensing, cartography and spatial modeling. The curriculum balances technical training with conceptual insight, helping you understand not just how to work with geographic data, but how to analyze, interpret it and communicate your findings to others.

This program prepares you to apply GIS tools and spatial reasoning to pressing challenges such as climate change, population dynamics, public health, and sustainable urban development. Through applied coursework and class projects, you learn how to collect, manage, analyze, and interpret spatial data, turning raw information into actionable insights.

College/school: W. P. Carey School of Business
Location: Tempe or Online

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe or Online

Career opportunities
With this specialization as a complement to their major program of study, graduates are more attractive to potential employers and have expanded career options.

Graduates with this certificate often pursue employment in management, business analysis or marketing. Advanced degrees or certifications may be required for academic or clinical positions.

Geographic information science is one of the fastest-growing segments of the economy, and employment possibilities can be found across the private sector and in many government agencies at the local, state and national levels.

Graduates who have paired this geographic information science certificate with their degree program have added knowledge, skills and abilities in these highly desirable areas:

- analysis

- computer programming
- problem-solving
- statistics

Designed to complement any undergraduate major, the certificate program supports graduates pursuing work fields such as:

- business
- computer science
- environmental science
- health care
- nonprofit organizations
- real estate
- retail
- transportation
- urban planning
- utilities
- visual arts

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Asian Languages (Japanese) and Korean Studies (LAJPNBA and LAKORCERT)

Program description
In the Bachelor of Arts program in Asian languages with a concentration in Japanese, you study the language, literature and culture of Japan. You gain a respectable measure of competence in reading and writing Japanese, and you acquire oral and aural skills in the language. You also gain linguistic and cultural competence through the required study of classical Japanese.

In addition, ASU offers summer or yearlong programs to study abroad (https://goglobal.asu.edu/) in Japan.

In the certificate program in Korean studies, you gain in-depth and practical knowledge of dynamic Korea in the modern and contemporary world, with a particular focus on Korea's economic, cultural and technological innovation.

The program consists of two major components: Korean language skills in the areas of speaking, listening, reading and writing; and instruction in the areas of Korean society, culture, history, literature and religion.

Certificate coursework enriches your critical thinking skills and your ability to investigate and address issues surrounding Korea and independent sociocultural, geopolitical and environmental challenges in the world.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe

Career opportunities
Knowledge of multiple languages and intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive professions include:

- foreign correspondent
- foreign media professional
- foreign service officer
- intelligence officer
- international banking and finance professional
- language, literature or culture teacher
- law and immigration professional
- multilingual administrative professional

- translator or interpreter
- travel professional

Relevant career fields and occupations include:
- advertising, marketing or communications
- airline industry
- film, television or multimedia
- hospitality industry
- intelligence
- international education and study abroad administration
- international law
- lifestyle management
- public relations
- technology industries

Graduates who have combined a certificate in Korean studies with their major program of study are more marketable to employers than ever. Benefiting from their practical knowledge and enriched perspective of Korea in addition to training received in their majors, graduates have a competitive advantage in various professions, including academia, government, politics, tourism and hospitality, marketing, military and various other types of work that involve culture and language translation. Graduates often pursue employment in education and with Korean companies such as Samsung, LG and Hyundai.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Asian Languages (Japanese) and Teaching English to Speakers of Other Languages (TESOL) (LAJPNBA and LATESLCERT)

Program description
In the Bachelor of Arts program in Asian languages with a concentration in Japanese, you study the language, literature and culture of Japan. You gain a respectable measure of competence in reading and writing Japanese, and you acquire oral and aural skills in the language. You also gain linguistic and cultural competence through the required study of classical Japanese.

In addition, ASU offers summer or yearlong programs to study abroad (https://goglobal.asu.edu/) in Japan.

The teaching English to speakers of other languages certificate program consists of key courses that provide you with the practical skills and confidence necessary to teach English as a second or other language anywhere in the world. This certificate can be added to any degree program and includes a supervised internship to gain valuable hands-on experience before graduation.

This certificate does not certify you to teach in Arizona public schools (K-12).

BA/CERT Business (Law) and U.S. National Security & Intelligence Studies (BABUSLBA and LANSISCERT)

Program description

The Bachelor of Arts program in business with a concentration in law is an innovative, transdisciplinary offering prepares you for positions in a variety of professions in which business and law play an important role in ensuring success.

The law concentration, with its strong business background, gives you a systematic framework for analyzing actual legal regulation and corresponding business risks and liabilities. You complete rigorous courses within the law concentration, in addition to the skill and core courses required of all W. P. Carey School of Business majors.

The undergraduate certificate program in U.S. national security and intelligence studies emphasizes critical thinking; analytical writing; and the interpretation of human intelligence, signals intelligence, geospatial intelligence, and open-source intelligence, commonly termed HUMINT, SIGINT and GEOINT. You explore topics such as cybersecurity threats, critical languages, and cross-cultural analysis, equipping you to address complex global security challenges. You develop the ability to create an intelligence collection plan to collect key forms of intelligence in support of national security objectives. You demonstrate your mastery of core intelligence concepts through the stages of the intelligence process: planning and direction, collection, processing, analysis and production, and dissemination with both oral and technical reports.

You learn to synthesize knowledge about the U.S. intelligence community and national security objectives by analyzing the missions, roles and structures of the 18 organizations within the U.S. intelligence community. You develop a comprehensive understanding of the national security enterprise through the application of research, data analysis and structured analytical techniques used in the production of finished intelligence products. You develop strong analytical writing and oral communication skills, essential for conveying complex information effectively to diverse audiences.

This interdisciplinary program integrates high-impact experiential learning with classroom instruction and internship opportunities that connect you to professionals across the federal government, private sector and nonprofit organizations. With strong local engagement in the Phoenix area; a network presence in Washington, D.C.; and a global outlook; the program prepares you to thrive in the dynamic and evolving field of intelligence and national security.

Math intensity: Moderate

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe

Career opportunities
Graduates of the law concentration pursue careers in the business world, and exposure to aspects of law and legal issues assists them in attaining their career goals. Graduates are prepared to use their skills in a variety of industries and in areas as diverse as new business ventures and corporate or agency compliance.

Graduates are prepared for work in the areas of cybersecurity; inspection, investigation and compliance; intelligence analysis; intelligence collection; law and legal services; and security.

The program enhances workforce readiness and provide increased opportunities for graduates to find meaningful, impactful careers within the U.S. national security and intelligence community sectors in:

- acquisitions and contracting
- business and mission support
- computer science
- data science
- education and training
- foreign languages
- geography
- infrastructure and logistics
- information technology
- medical and occupational health
- science, technology, engineering and mathematics

The certificate provides an excellent foundation for students pursuing careers in the public or private sectors, as well as those seeking to continue their education at the graduate level in national security, global security or intelligence studies.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Chemistry and Applied Business Data Analytics (LACHMBA and BABDACERT)

Program description
The Bachelor of Arts program in chemistry offers a flexible and well-rounded path if you want to explore how chemistry shapes the world. You study how atoms and molecules work and how chemistry connects to areas such as energy, sustainability, medicine, the environment, forensics, cosmetics, and even patent law and marketing.

Through a combination of lectures and hands-on lab courses, you learn to think critically and solve real-world problems using chemistry. This program combines science with liberal arts, helping you build strong communication and analytical skills that apply to many careers.

While research isn't the main focus, you have opportunities to join lab projects or explore topics that match your interests. The program's flexibility makes it a great choice if you want to combine science with other fields, including policy, law, business and public service.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's

website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

Location: Tempe or Online

Career opportunities
A degree in chemistry provides graduates with the background for careers in chemical and electronics industries and in national research labs, environmental labs and forensic labs.

Chemistry can be combined with law for patent work, with economics for sales and marketing careers, and with computer science for careers in information technology. Graduates with a strong liberal arts background are also prepared for careers in marketing and scientific sales.

Graduates are competitive applicants for admission to medical, dental or pharmacy school.

With this specialization as a complement to their major program of study, graduates are more attractive to potential employers and have expanded career options.

Graduates with this certificate often pursue employment in management, business analysis or marketing. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT International Relations and US National Security and Intelligence Studies (LAINRBA and LANSISCERT)

Program description
In a globalized world with increasing political, economic, demographic and climatic challenges, studies in international relations are all the more prized by the public and private sectors.

In the Bachelor of Arts program in international relations, you develop analytic skill sets and mastery of forward-thinking content areas through rigorous curriculum, distinct internships and research opportunities. You learn about national security, cybersecurity, AI and governance, intelligence, conflict processes, diplomacy, international trade, and both international organizations and countries across the globe.

The undergraduate certificate program in U.S. national security and intelligence studies emphasizes critical thinking; analytical writing; and the interpretation of human intelligence, signals intelligence, geospatial intelligence, and open-source intelligence, commonly termed HUMINT, SIGINT and GEOINT. You explore topics such as cybersecurity threats, critical languages, and cross-cultural analysis, equipping you to address complex global security challenges. You develop the ability to create an intelligence collection plan to collect key forms of intelligence in support of national security objectives. You demonstrate your mastery of core intelligence concepts through the stages of the intelligence process: planning and direction, collection, processing, analysis and production, and dissemination with both oral and technical reports.

You learn to synthesize knowledge about the U.S. intelligence community and national security objectives by analyzing the missions, roles and structures of the 18 organizations within the U.S. intelligence community. Career opportunities
International relations graduates leverage their critical thinking and communication skills, cross-cultural competencies and valuable practical knowledge to pursue careers as foreign service officers, security analysts and policy analysts, and in other data-driven roles. Specifically, their sector-spanning analytic skills are useful for successful careers in many areas, including:

- foreign service
- journalism
- judicial administration
- law
- political analysis
- political consulting
- politics
- public relations

Program graduates are prepared for positions in the following types of settings:

- the courts
- foreign service organizations
- international agencies and organizations
- legislative staff organizations
- lobbying and advocacy groups
- local, national and global nonprofit organizations
- local and national media organizations
- multinational corporations
- national, state and local government agencies
- research institutions

In addition, graduates are well positioned to attend top-tier graduate, law and professional schools in public policy, diplomacy and leadership, political science, data analytics and global trade.

Graduates are prepared for work in the areas of cybersecurity; inspection, investigation and compliance; intelligence analysis; intelligence collection; law and legal services; and security.

The program enhances workforce readiness and provide increased opportunities for graduates to find meaningful, impactful careers within the U.S. national security and intelligence community sectors in:

- acquisitions and contracting
- business and mission support
- computer science
- data science
- education and training
- foreign languages

- infrastructure and logistics
- information technology
- medical and occupational health
- science, technology, engineering and mathematics

The certificate provides an excellent foundation for students pursuing careers in the public or private sectors, as well as those seeking to continue their education at the graduate level in national security, global security or intelligence studies.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Liberal Studies and Domestic Violence and Evidence-based Practice (LABLSBLS and PPDVEPCERT)

Program description
The Bachelor of Arts program in liberal studies provides a humanities-based education, wide freedom to choose from multidisciplinary courses, and specialized seminars that build critical thinking and communication skills that employers value.

Liberal studies are the oldest form of higher education in the Western tradition, with roots in ancient Greece. A liberal education differs from political liberalism in the modern sense; people from all political perspectives have made significant contributions to and drawn on this knowledge and these skills.

The program offers you a course of study that emphasizes the humanities and social sciences and gives you great flexibility in constructing your own educational path. You are prepared to meet the challenges of a complex world.

The certificate program in domestic violence intervention and victim advocacy provides you with the experience and knowledge you need to intervene safely and effectively on behalf of the survivors of gender-based violence, a vulnerable group that helping professionals are likely to encounter in all areas of practice. Professionals who are knowledgeable about the dynamics of intimate partner violence are better equipped to assist those suffering its negative physical and mental health consequences.

Evidence-based care is crucial in domestic violence settings. You engage in service-based and classroom learning to understand the role of evidence-based interventions in promoting survivor safety and client empowerment.

When you complete the program, you'll be a verified advocate for victims of domestic violence in the state of Arizona.

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions
Location: Downtown Phoenix or Online

Career opportunities
Graduates are prepared to advance in their current careers, pursue new job opportunities, change fields or continue on to graduate or professional study. Possible careers and positions include:

- creative writer
- grant writer
- higher education professional

- public relations personnel
- research analyst
- training specialist

Graduates have the practical knowledge needed to support survivors of domestic and gender-based violence in a variety of community, nonprofit and human service settings. Their foundational advocacy and collaboration skills enable them to pursue entry-level or paraprofessional roles focused on safety, prevention and empowerment.

Career examples include:

- case management aide
- community outreach worker
- domestic violence or legal advocate
- domestic violence support group facilitator
- residential or crisis hotline advocate
- shelter case manager
- victim services assistant
- youth program assistant in a family violence prevention organization

BA/CERT Sports Journalism and Applied Business Data Analytics (CSSPJBA and BABDACERT)

Program description

Sports Journalism description

Sports media is one of the media industry's fastest-growing sectors, with continued growth across multimedia outlets; social media; podcasting; and team, league and conference media platforms.

This Bachelor of Arts program in sports journalism provides unparalleled preparation for careers in sports media through coursework in sports writing, sports photography, TV sports reporting, live sports production, play-by-play coverage, documentary production and more.

You complete multiple professional experiences that advance your skills and portfolio. A dedicated career team connects you to internship opportunities with professional sports teams such as the Diamondbacks and the Suns, and sports media outlets such as ESPN and Fox Sports. You also participate in the school's semester-long immersive learning experiences reporting from award-winning sports bureaus where you have the opportunity to cover teams and events in the NFL, MLB, NBA, WNBA, NHL, NASCAR, PGA, LPGA and Division I athletics.

Through this program, you have the opportunity to apply to the school's accelerated bachelor's degree and master's degree program (https://cronkite.asu.edu/accelerated-masters-degrees), which allows for the completion of both degrees in as few as four years. You can also qualify for ASU's Barrett, The Honors College (https://barretthonors.asu.edu/).

Why study Sports Journalism at ASU?

As part of the Walter Cronkite School of Journalism and Mass Communication, you gain real-world experience through immersive learning in real newsroom and sports environments. You produce professional-quality work and develop a strong portfolio with work employers want.

The Cronkite School is a premier sports journalism program located in a city with five professional teams, offering you opportunities to cover high school, collegiate and professional events, including Major League Baseball's annual Spring Training. You also pursue global reporting experiences, such as covering the Olympics, NCAA championships or international sports in places like Cuba, Rwanda and Spain.

You learn from award-winning journalists and industry leaders while connecting with the #CronkiteNation network, a community of alumni who work across sports media and mentor current students. A dedicated career services team helps connect you to internships, freelance projects and full-time roles in sports media and beyond.

You emerge from the program ready to inform communities, produce compelling content and contribute to meaningful conversations in sports and society.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

BA/CERT Sports Journalism and Sports, Cultures & Ethics (CSSPJBA and LASPCECERT)

Program description
Sports Journalism description
Sports media is one of the media industry's fastest-growing sectors, with continued growth across multimedia outlets; social media; podcasting; and team, league and conference media platforms.

This Bachelor of Arts program in sports journalism provides unparalleled preparation for careers in sports media through coursework in sports writing, sports photography, TV sports reporting, live sports production, play-by-play coverage, documentary production and more.

You complete multiple professional experiences that advance your skills and portfolio. A dedicated career team connects you to internship opportunities with professional sports teams such as the Diamondbacks and the Suns, and sports media outlets such as ESPN and Fox Sports. You also participate in the school's semester-long immersive learning experiences reporting from award-winning sports bureaus where you have the opportunity to cover teams and events in the NFL, MLB, NBA, WNBA, NHL, NASCAR, PGA, LPGA and Division I athletics.

Through this program, you have the opportunity to apply to the school's accelerated bachelor's degree and master's degree program (https://cronkite.asu.edu/accelerated-masters-degrees), which allows for the completion of both degrees in as few as four years. You can also qualify for ASU's Barrett, The Honors College (https://barretthonors.asu.edu/).

Why study Sports Journalism at ASU?
As part of the Walter Cronkite School of Journalism and Mass Communication, you gain real-world experience through immersive learning in real newsroom and sports environments. You produce professional-quality work and develop a strong portfolio with work employers want.

The Cronkite School is a premier sports journalism program located in a city with five professional teams, offering you opportunities to cover high school, collegiate and professional events, including Major League Baseball's annual Spring

Training. You also pursue global reporting experiences, such as covering the Olympics, NCAA championships or international sports in places like Cuba, Rwanda and Spain.

You learn from award-winning journalists and industry leaders while connecting with the #CronkiteNation network, a community of alumni who work across sports media and mentor current students. A dedicated career services team helps connect you to internships, freelance projects and full-time roles in sports media and beyond.

You emerge from the program ready to inform communities, produce compelling content and contribute to meaningful conversations in sports and society.

The certificate program in sports, cultures and ethics is a cross-disciplinary inquiry into the social, ethical and cultural influence of sports in society. You explore the significance of sports in modern history, including relationships between sports and identity, community, politics, media, business and education. You analyze the ethical and philosophical issues of participating in and watching sports. Courses also cover how playing fields become places of connection and conflict, expanding opportunities or reinforcing inequalities based on race, gender, sexuality, religion and socioeconomic class. When you complete the program, you have knowledge and understanding of the multifaceted nature of sports and their wide-ranging impact on cultures and lives.

BA/CERT Theater (Design and Production) and Secondary Education (certificate) (FADSNPRBA and TESEDCERT)

Program description
This Bachelor of Arts program in theatre with a concentration in design and production provides you with opportunities to hone your craft while creating exciting work on stage in areas including dance, opera, theatre and more. The concentration provides you with the distinct opportunity to explore your own creative process, while enhancing your ability to collaborate with others.

The program offers specialty coursework in the following areas:

- costume construction, design and technology
- digital fabrication
- lighting design and stage electrics
- media design and technology
- properties construction
- scenic design, art and construction
- sound design and technology
- sound and media systems design

- stage management
- technical direction

In addition to building knowledge and skills, you are mentored by professional designers and technicians to successfully transition from college to your future career in entertainment design and production, or to graduate programs for additional training.

The secondary education certificate program prepares you to teach students enrolled in grades 6-12. While you develop a strong content background through your major coursework, the secondary education certificate program focuses on gaining the requisite knowledge and abilities for successfully teaching middle or high school students. To integrate teacher preparation with the academic specialization, Mary Lou Fulton College for Teaching and Learning Innovation collaborates and communicates with academic
departments throughout the university. A series of internships followed by a semester-long, full-time student teaching experience are required components of this program.

If you complete this program, you are issued an institutional recommendation for a secondary certification in Arizona. If you desire to teach in a public school, you must also pass the Arizona Educator Professional Knowledge exam (either the National Evaluation Series or the Arizona Educator Proficiency Assessments) to be certified to teach in the state of Arizona.

The secondary education undergraduate certificate is also available if you've earned a bachelor's degree; this is considered a nondegree graduate pathway.

Format option
This program is also offered via ASU Sync (https://provost.asu.edu/sync/students). Through ASU Sync, you attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. As an ASU Sync student, you must reside in Arizona throughout the duration of the program. If you have F-1or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

If you're seeking to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations.

BA/CERT/CERT Applied Business and Technology Solutions, Applied Business Data Analytics, and Project Management Essentials (BAAPBTSBA, BABDACERT, and LSPMGECERT)

Program description
The Bachelor of Arts program in applied business and technology solutions is designed to meet your needs as a workforce learner who wishes to complete an undergraduate degree in business.

In this program, you can quickly access accounting, business analytics, computer information systems, economics, finance, management, marketing, process management and business ethics courses, and directly connect what's taught in the classroom to your working environment. The program's applied internship courses enable you to put what you're learning into practice, and emphasis areas allow you to further customize the degree.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

In the stackable undergraduate certificate program in project management essentials, you develop the skills to lead successful projects. This program covers key areas of project management, including project leadership, strategy, sustainability and organizational behavior. If you are looking to enhance your project management expertise and drive positive change in any industry, the program is an ideal fit.

This program can be completed as a standalone certificate or alongside a degree program, or it can stack into a future bachelor's degree.

BAE/CERT Elementary Education and Early Childhood Education (TEEEDBAE and TEECDCERT)

Program description
The Bachelor of Arts in Education program in elementary education prepares you to work with children in grades K-8 classrooms. This program leads to a K-8 elementary education credential in the state of Arizona.

You receive a firm grounding in academic content with current research and best practices from nationally recognized faculty in their fields of expertise, accompanied by professional experiences. You also gain experience in integrating technology into teaching practices.

The teacher certification program is clinically embedded during sophomore, junior and senior years. The school has developed a team-based approach to teacher preparation, allowing you to participate in professional experiences (internships and student teaching) with a team of peers while receiving guidance and support from faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply knowledge learned in coursework to practice in the classroom.

You complete a series of internships before a semester-long full-time teaching experience. With the support of a certified mentor teacher and ASU faculty, you apply what you learn in coursework in a learning environment.

Upon graduation, you are recommended for grades K-8 elementary teacher certification. If you wish to teach in a public school, you must pass the appropriate Arizona educator exams (National Evaluation Series or Arizona Educator Proficiency Assessments) to be credentialed to teach in Arizona.

Format options

ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. You may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-artseducation-educational-studies/) for program descriptions and to request more information.

You must reside in the United States throughout the duration of the program.

ASU Sync
This program is also offered via ASU Sync. (https://provost.asu.edu/sync/students) ASU Sync enables you to attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. As an ASU Sync student, you must reside in Arizona throughout the duration of the program. If you are on F1 or J-1 immigration status, you should should speak with an advisor about other options to complete this program. The certificate program in early childhood education prepares you to support the cognitive and social-emotional development of young children from birth to age 8.

When you complete this certificate program, you're eligible for dual teaching certificates upon completion of an undergraduate degree or to meet requirements for an Early Childhood endorsement. This certificate can be added only to the Bachelor of Arts in Education program in special education.

You develop skills in understanding and applying evidence-based practices in early childhood education. The innovative coursework is centered on child development theory, development of young children, assessment practices and instructional pedagogy. You explore techniques and approaches to engage family members in the growth and development of their young children.

When added to the special education bachelor's degree program, you earn an institutional recommendation for teacher certification in Early Childhood Education, Birth-Grade 3, or an endorsement in Early Childhood Education, Birth-Grade 3,

through the Arizona Department of Education. If you wish to teach in public schools, you must also pass the appropriate Arizona educator exams (National Evaluation Series or Arizona Educator Proficiency Assessments) to be certified to teach in the state of Arizona.

Career opportunities
There is a demand for highly qualified elementary teachers in Arizona. A high percentage of students from this program receive job offers during their residencies. Many graduates with a degree in elementary education work in:

- charter schools
- nontraditional settings
- private school settings
- public elementary schools

There is a strong demand for early childhood educators in Arizona and nationwide. Graduates are prepared to work in a variety of settings, such as preschools, with childcare providers and in after-school care. Many graduates with early childhood education credentials hold leadership positions in Head Start, private nonprofit and private for-profit center-based programs, and public school early childhood environments.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BAS/BSP/CERT Applied Science (Project Management), Urban Planning and Geographic Information Science (LSAPSPMBAS, ARPUPBSP and LAGISCERT)

Program description
The Bachelor of Applied Science program in project management offers a skills-driven curriculum that prepares you to be an excellent project manager.

You acquire the skills you need to ensure the progress and successful completion of complex projects: project leadership, project quality management, project risk management, project schedule management, project cost management and project resource management.

You also explore the skills and knowledge that leaders employ when they organize diverse teams, evaluate ethical situations, innovate, solve problems, communicate effectively, assess leadership and organizational effectiveness, manage resources and use emerging technologies.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-

students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Urban planners guide communities in making wise decisions about their use of land and resources. The urban planning program introduces you to issues faced by urban areas and the tools necessary to address them.

In the Bachelor of Science in Planning program, you gain expertise in the analysis and synthesis of the physical, social, political and economic issues that shape urban and regional development. Courses cover comprehensive planning, computer and analytical methods, public policy formulation and administration, socioeconomic and environmental analyses, urban design and many other fields that urban planning encompasses, such as:

- environmental planning
- geographic information systems
- housing
- landscape architecture
- planning and zoning law
- transportation
- urban and development economics
- urban resilience

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

The certificate program in geographic information science combines geospatial tools, spatial reasoning and practical analysis to solve real-world problems. You work in multiple GIS platforms as you build a strong foundation in spatial analysis, geovisualization, remote sensing, cartography and spatial modeling. The curriculum balances technical training with conceptual insight, helping you understand not just how to work with geographic data, but how to analyze, interpret it and communicate your findings to others.

This program prepares you to apply GIS tools and spatial reasoning to pressing challenges such as climate change, population dynamics, public health, and sustainable urban development. Through applied coursework and class projects, you learn how to collect, manage, analyze, and interpret spatial data, turning raw information into actionable insights.

Career opportunities
Graduates have the skills and knowledge needed for project management and leadership positions in a wide variety of organizations, including businesses, government agencies and offices, and nonprofit agencies, as well as in the service industry. Project managers can be housed within many specific industries, such as health care, information technology and construction management.

Graduates of the urban planning program pursue career opportunities with private planning firms and governmental planning agencies, mainly at the city level, but also with county, state and federal entities. Some planners elect to pursue graduate degrees to develop specialty skills and enhance their opportunities for career advancement.

The urban planning degree, especially when combined with a focus on geographic information science, gives graduates an advantage in careers that combine urban planning with GIS and in other jobs that involve urban issues, including:

- comprehensive and long-range planning
- economic development planning
- housing issues
- planning law
- public participation in the planning process
- socioeconomic and environmental analyses
- sustainable planning
- transportation

Geographic information science is one of the fastest-growing segments of the economy, and employment possibilities can be found across the private sector and in many government agencies at the local, state and national levels.

Graduates who have paired this geographic information science certificate with their degree program have added knowledge, skills and abilities in these highly desirable areas:

- analysis
- computer programming
- problem-solving
- statistics

Designed to complement any undergraduate major, the certificate program supports graduates pursuing work fields such as:

- business
- computer science
- environmental science
- health care
- nonprofit organizations
- real estate
- retail
- transportation
- urban planning
- utilities
- visual arts

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BGM/CERT Global Management and Cross-Sector Leadership (TBTGMBGM and PPCSLDCERT)

Program description
The Bachelor of Global Management program offers you two tracks: the international business, language and culture track, for which two years of foreign language is required, and the international business and culture track, with no foreign language requirement and greater emphasis on management-related courses. If you select the foreign language track, you may complete coursework in a variety of languages. The international business, language and culture track is offered to only if you are an on-campus student. If you are an online student, you may pursue only the international business and culture track.

You have the opportunity to explore the politics, cultures and economics of different countries around the world while putting the skills you've learned into practice in practical settings through a required international internship. Although you are strongly encouraged to pursue internships outside your home country, you may satisfy this requirement by doing a local internship with an international component.

You may choose to apply your electives toward a minor or certificate (https://degrees.apps.asu.edu/minors) offered by another department, enabling you to specialize in a second area of interest that complements your major. Electives may

include areas such as communications, cybersecurity, data analytics, digital media, languages, nonprofit leadership, political science, psychology, public relations, risk management, sales and marketing, and sustainability.

You also complete a senior capstone project that draws on the skills you've developed throughout the program. In the capstone project, you work together in consulting teams to provide recommendations for a global organization on a challenge it faces internationally. The internship and the capstone project enable you to demonstrate your skills and work experience for potential employers as part of your professional development plan.

The BGM program is also offered in a flexible online format. You should visit the ASU Online website (https://asuonline.asu.edu/online-degree-programs/undergraduate/global-management-bgm/) for more information.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their careers in leadership and management within the global and digital landscape of today's interconnected world. After completing this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

The certificate program in cross-sector leadership provides a comprehensive overview of leading solutions to complex social challenges by integrating the public, private, nonprofit and military sectors.

You engage in a systems-thinking approach to challenges faced by local and global communities, explore the diverse characteristics and motives of each sector in engaging in cross-sector collaborations, and master processes to formalize such partnerships. You study values-based leadership and how individual, organizational and sector values can drive a leader's ability to act. You gain leadership skills, such as leading change within and between organizations across multiple sectors; and you learn to use human-centered design, social entrepreneurship and other approaches when tackling community challenges.

You end the program with a thesis or applied project that integrates the theories, procedures and concepts learned in the certificate courses with experiences from your internships in each sector.

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions
Location: Downtown Phoenix

Career opportunities
The global economy continues to face volatility and disruption as it expands, contracts and interconnects. Partly because of this, demand for specialists with a global mindset is rapidly increasing.

The BGM program prepares students to take on leadership roles in multinational corporations, government agencies or nongovernmental organizations. Students gain experience and develop skills that international companies, governments and nonprofit entities highly value in employees.

Graduates can thrive in leadership roles in the following fields:
- consulting
- entrepreneurship
- foreign service
- global marketing
- human resources

Career opportunities include:
- chief sustainability officer
- compliance manager
- country manager
- foreign service officer
- general manager

- global entrepreneur
- international marketing manager
- international sales manager
- manager of a nonprofit organization
- regulatory affairs manager

Students can advance their career options with an undergraduate certificate.

Graduates of the certificate in cross-sector leadership have acquired a beneficial knowledge of cross-sector collaboration, advanced leadership skills, and an understanding of how to use these. These transferrable skills complement students' major program of study and may make them more marketable to employers.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Applied Biological Sciences and Wildlife Management (TSABSABS and LSWLMCERT)

Program description
In the Bachelor of Science program in applied biological sciences with a concentration in preveterinary medicine, you prepare to pursue an advanced degree in veterinary medicine.

The program emphasizes a solid grounding in biology, chemistry, physics, animal science and mathematics while offering specialized courses in veterinary medicine and opportunities for internships in the field.

You contextualize knowledge through experience-based learning activities, including:
- case studies
- faculty-guided research and service learning projects
- field trips
- internships
- laboratory activities

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

BS/CERT Applied Computing (Cybersecurity) and Risk Communication (ASACOCBS and ASRCMCERT)

Program description
The innovative cybersecurity concentration builds on the Bachelor of Science degree program in applied computing.

You acquire the technical knowledge of how to secure networks and applications, an understanding of cybersecurity governance models and risk management fundamentals, methods of communicating complex risk issues, and solutions for the challenges of implementing cybersecurity controls within various organizational models. Leadership, critical thinking and effective communication are also emphasized.

You gain experience with authentic cybersecurity organizations, protecting digital assets against compromise or theft.

The cybersecurity concentration prepares you for a continuing and progressive career in cybersecurity.

The rising importance of the field of risk communication stems from the need to name, understand and manage physical and social risks as society is faced with increasingly challenging decisions concerning stressed social and environmental infrastructures.

Your proficiency in risk communication requires understanding the complex interfaces of physical, biological, psychological and social systems. In response, the certificate program in risk communication trains you in risk communication by combining the strengths of the four schools within the New College of Interdisciplinary Arts and Sciences: the School of Social and Behavioral Sciences; the School of Mathematical and Natural Sciences; the School of Interdisciplinary Forensics; and the School of Humanities, Arts and Cultural Studies.

BS At a Glance

Career opportunities
This is an ideal degree for students interested in careers in cybersecurity. Opportunities are available both in the private sector and within governmental agencies (e.g., the FBI, U.S. Department of Homeland Security, the National Security Agency and the Department of Defense).

Graduates of the applied computing program with a concentration in cybersecurity are well prepared for graduate study as well as entry-level employment with businesses, nonprofits, government agencies and academic institutions. Cybersecurity-focused positions include:

- chief information security officer
- cyber risk analyst
- information security engineer
- network security engineer

- security operations center analyst

Graduates are prepared for a variety of careers in risk management, crisis communications and environmental public affairs. Specifically, graduates are suited to work as risk management specialists and environmental advocates, and they are prepared to translate complex scientific ideas and analyses into information that can be evaluated meaningfully by all members of society.

Graduates work in local government agencies and public relations organizations, and in law enforcement, advertising, marketing and insurance.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Biological Sciences (Biomedical Sciences) and Cross-Sector Leadership (LABSCMBS and PPCSLDCERT)

Program description
The Bachelor of Science program in biological sciences with a concentration in biomedical sciences provides you with a strong foundation in the biological sciences with a focus on human health and disease. You study physiology, genetics, developmental biology, cell biology and neurobiology to understand the biological complexities of medical science. The curriculum supports preparation for the MCAT and other professional school entrance requirements.

You develop the knowledge, critical thinking, and laboratory skills necessary for success in medical, biomedical research, and health-related fields. Through coursework, laboratory experience, and independent research or internships, you engage in biomedical inquiry and gain hands-on experience in experimental design and data analysis.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. Students interested in concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences should review The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional details and requirements.

McKenna Life Sciences, Business and Entrepreneurship Program This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (https://mlsbe.asu.edu/), which prepares academically outstanding students to solve health care challenges as leaders in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in finance and another in a natural science discipline of choice. You also complete a certificate in entrepreneurship and innovation, all in the same amount of time as a typical four-year degree program.

A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they've submitted their application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

The certificate program in cross-sector leadership provides a comprehensive overview of leading solutions to complex social challenges by integrating the public, private, nonprofit and military sectors.

You engage in a systems-thinking approach to challenges faced by local and global communities, explore the diverse characteristics and motives of each sector in engaging in cross-sector collaborations, and master processes to formalize such partnerships. You study values-based leadership and how individual, organizational and sector values can drive a leader's ability to act. You gain leadership skills, such as leading change within and between organizations across multiple sectors; and you learn to use human-centered design, social entrepreneurship and other approaches when tackling community challenges.

You end the program with a thesis or applied project that integrates the theories, procedures and concepts learned in the certificate courses with experiences from your internships in each sector.

BS At a Glance
Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions
Location: Downtown Phoenix

Career opportunities
Graduates are prepared for professional or graduate programs in medicine, dentistry, optometry, pharmacy and related health professions. The degree also prepares students for positions in biotechnology, genetics, immunology, genomics, and physiology, or for advanced study leading to careers in biomedical science, health care and medical technology.

Students can advance their career options with an undergraduate certificate.

Graduates of the certificate in cross-sector leadership have acquired a beneficial knowledge of cross-sector collaboration, advanced leadership skills, and an understanding of how to use these. These transferrable skills complement students' major program of study and may make them more marketable to employers.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Biological Sciences (Biomedical Sciences) and Evolutionary Medicine (LABSCMBS and LAEVMDCERT)

Program description
The Bachelor of Science program in biological sciences with a concentration in biomedical sciences provides you with a strong foundation in the biological sciences with a focus on human health and disease. You study physiology, genetics, developmental biology, cell biology and neurobiology to understand the biological complexities of medical science. A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they've submitted their application to ASU.

In the evolutionary medicine certificate program, you discover a burgeoning new field that is improving human health and transforming understanding of disease by merging the fields of evolutionary biology, genetics, medicine, global health and public health.

You integrate perspectives from across these fields to investigate questions about health and disease in the context of human history. Using your mastery of these new approaches within the biological and social sciences, you address emerging and anticipated public health issues, such as reemerging infectious diseases, vaccination challenges, the increase in chronic diseases, and other growing health crises.

Graduates are prepared for professional or graduate programs in medicine, dentistry, optometry, pharmacy and related health professions. The degree also prepares students for positions in biotechnology, genetics, immunology, genomics, and physiology, or for advanced study leading to careers in biomedical science, health care and medical technology.

Graduates who have complemented their major program of study with this certificate are well prepared for roles in a variety of fields, including biology, medicine, law and ethics. They have integrated, individualized skills that are in high demand to address the growing need for innovation in medicine and public health.

Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Biological Sciences (Conservation Biology & Ecology) and Geographic Information Science (LABSCCBS and LAGISCERT)

Program description
The Bachelor of Science program in biological sciences with a concentration in conservation biology and ecology focuses on understanding and conserving Earth's biological diversity while restoring damaged ecosystems. You study how organisms interact with each other and their environments, integrating ecological theory with practical conservation strategies.

Through research, laboratory work, and field experiences, you examine the effects of human activity on ecosystems and biodiversity. You explore methods to protect species, restore ecological balance, and promote ecosystem resilience. Coursework includes ecology, conservation biology, environmental policy, and quantitative analysis, providing a foundation for applied and theoretical work in biological and environmental sciences.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you are pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for requirements and additional information.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

The certificate program in geographic information science combines geospatial tools, spatial reasoning and practical analysis to solve real-world problems. You work in multiple GIS platforms as you build a strong foundation in spatial analysis, geovisualization, remote sensing, cartography and spatial modeling. The curriculum balances technical training with conceptual insight, helping you understand not just how to work with geographic data, but how to analyze, interpret it and communicate your findings to others.

This program prepares you to apply GIS tools and spatial reasoning to pressing challenges such as climate change, population dynamics, public health, and sustainable urban development. Through applied coursework and class projects, you learn how to collect, manage, analyze, and interpret spatial data, turning raw information into actionable insights.

BS At a Glance
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe or Online

Career opportunities
Graduates are prepared for careers in conservation, ecology, environmental consulting, wildlife management, education and sustainability planning. The program also provides a foundation for graduate study in ecology, environmental law and policy, and conservation biology. Students gain skills for restoring ecosystems and protecting biodiversity in an evolving global environment.

Geographic information science is one of the fastest-growing segments of the economy, and employment possibilities can be found across the private sector and in many government agencies at the local, state and national levels.

Graduates who have paired this geographic information science certificate with their degree program have added knowledge, skills and abilities in these highly desirable areas:

- analysis
- computer programming
- problem-solving
- statistics

Designed to complement any undergraduate major, the certificate program supports graduates pursuing work fields such as:

- business
- computer science
- environmental science
- health care
- nonprofit organizations
- real estate
- retail
- transportation
- urban planning
- utilities
- visual arts

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Communication and Entrepreneurship and Innovation (LACOMBS and BAKEICERT)

Program description
This Bachelor of Science program in communication combines the power of human connection with the precision of data-based research. With a strong foundation in social science and quantitative research methods, you learn how to understand human behavior, collect and interpret data, and back up your ideas with evidence.

Alongside developing critical research skills, you build expertise in speaking and writing effectively. You learn how to communicate complex information in engaging ways, which is essential for leading teams, managing client relationships, and creating a positive work climate that promotes productivity.

In addition to reviewing the guidelines in the Concurrent Program Options selection below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

The certificate program in entrepreneurship and innovation engages you, challenging you to discover new ways of thinking while approaching business in a new way. You benefit from an entrepreneurship curriculum focused on principles that involve the startup of a new organization and its management into a fully established firm.

Beyond those related specifically to entrepreneurial business practices, courses in the certificate in entrepreneurship and innovation include such topics as social entrepreneurship, arts entrepreneurship, idea generation and storytelling as additional perspectives for you as an entrepreneur.

CERT At a Glance
College/school: W. P. Carey School of Business
Location: Tempe

Career opportunities
Graduates are prepared for a wide variety of career paths --- including business, tech, government and beyond. Graduates often attend leading graduate schools in communication, law or business, or find gainful employment in the areas of:

- business consulting
- data analysis
- event planning
- fundraising
- human resource management
- marketing
- public relations
- sales
- social media
- training and development

Students advance their career options through this undergraduate certificate program, developing additional competencies that complement the marketable knowledge and skills they acquire in their majors. Those who complete this program often decide to pursue employment in management, sales and marketing.

Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Criminology and Criminal Justice and Homeland Security (PPCRIMJBS and PPHSLCERT)

Program description
The Bachelor of Science program in criminology and criminal justice teaches you how to understand the causes of crime, the role of criminal justice agencies in the control of crime, and the consequences of crime. This program also provides a solid foundation if you are interested in pursuing a prelaw track.

You learn sociological, psychological, biological and economic explanations for individual crime as well as differences in crime across neighborhoods, states, countries and over time. You also learn about the history, legal issues and current practices of crime control via police agencies, the court system, prisons, probation and parole.

These topics are delivered by top-ranking research faculty who offer you hands-on research opportunities and by experienced criminal justice professionals with intimate knowledge of the daily realities of crime and those who engage in crime. You are encouraged to take advantage of internship opportunities in more than 200 agencies, study abroad programs and flexible course scheduling offered in-person, online and across multiple campuses.

In the homeland security certificate program, you gain a focused, practical understanding of today's most pressing security challenges in the homeland security certificate program. The program covers international, domestic and cyber terrorism, along with an advanced elective related to your professional interests. You develop skills in threat analysis, risk assessment, policy evaluation and cyber defense awareness while examining the causes, methods and prevention of threats.

Career opportunities
Graduates of the criminology and criminal justice program find a strong job market in the public and private sectors. Employment opportunities exist in:
corrections

- courts
- federal agencies
- security
- enforcement
- offices
- offices
- security
- offices
- advocate agencies

In addition, graduates are able to work in combating bank fraud and domestic terrorism. They also may pursue advanced degrees in law, criminology and criminal justice, and other social science disciplines.

Graduates find a strong job market in the public and private sectors. Employment opportunities include supervisory and management positions in criminal justice agencies (federal, state and local), such as the Department of Homeland Security, U.S. Customs and Border Protection, and local- and state-level law enforcement departments. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Data Science and International Relations (LADATSCIBS and LAINSCERT)

Program description
Data science professionals use sophisticated statistical, computational and mathematical tools to extract patterns from large, complex and often unordered data sets. In the Bachelor of Science program in data science, you are prepared to be a critical analyst in a variety of areas, such as business, research and government.

With a mathematical core consisting of linear algebra, statistical inference and classification, data mining, machine learning and associated computer methods, the program gives you a strong background in data-related skills that are useful in understanding and solving practical issues.

This transdisciplinary program enables you to choose a focus area in:

- behavioral sciences
- biosciences
- business analytics
- chemistry and biochemistry
- computer science
- mathematics
- social sciences
- spatial sciences

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

In the international relations certificate program, you develop a sophisticated understanding of how the world is deeply interconnected and why events happening in one part of the globe may have huge impacts on other regions. You learn about U.S. political institutions or global politics before progressing to advanced coursework on public policy, political leadership and political change. You examine core issues in international relations, including America's role in the world, violent conflict, diplomacy and trade, and how local identities interact with global trends to shape world affairs. You develop analytical and communication skills, and pursue hands-on research, including internships.

Career opportunities
U.S. News & World Report ranks data scientist at No. 8 on its list of best jobs. The U.S. Bureau of Labor Statistics projects overall employment of data science occupations to grow 36% through 2033.

Graduates of the data science program have skills related to data analysis, data prediction models and ethical uses of research data, helping them to meet the expressed needs of society. Graduates work in a variety of fields, including governmental research, education, health services, consumer behavior and business.

Graduates who have combined the certificate in international relations with their major program of study become more attractive to employers.

Graduates can identify global trends and address issues facing humanity. They have developed a deeper understanding of international policy while leveraging their critical thinking and communication skills, as well as their cross-cultural competencies. Their sector-spanning analytic skills are useful for careers in government, international organizations, nongovernmental organizations, academia and journalism. Graduates pursue careers as foreign service officers, security analysts and policy analysts, and in other data-driven positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Economics and Applied Business Data Analytics (BAECNBS and BABDACERT)

Program description
In this Bachelor of Science program in economics, you choose from a variety of electives offered by the Department of Economics and many other ASU departments. You're encouraged to develop a program of study tailored to your individual needs and interests.

You acquire the critical thinking and communication skills needed to succeed in business or graduate school. The program of study can also be tailored to prepare you for graduate programs in economics, business or law. If you're interested in pursuing a doctorate in economics, you're strongly encouraged to minor or major in mathematics as well.

The department's mission is to provide the highest quality instruction to students, conduct advanced research in economics, and provide leadership and service to professional communities.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

Career opportunities
A major in economics provides students with the analytical and quantitative skills needed in careers in business, government and public policy.

Some graduates have taken positions as:

- consultants who serve as advisors to state and federal governments and private corporations
- corporate economists who collect data and make forecasts relevant to the firm's business
- employees in banking and financial services firms

Each year, many graduates pursue further studies at other prestigious universities.

With this specialization as a complement to their major program of study, graduates are more attractive to potential employers and have expanded career options.

Graduates with this certificate often pursue employment in management, business analysis or marketing. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Finance and Artificial Intelligence & Digital Media (BAFINBS and HIAIDMCERT)

Program description
The Department of Finance has a rich tradition of educating leaders who excel in all aspects of the discipline of finance. Whether you aspire to ascend to the top ranks of the venture capital industry, execute multimillion-dollar real estate deals, or become a successful entrepreneur with your own ideas and drive, the Bachelor of Science program in finance equips you to succeed.

In particular, the Investment Banking Industry Scholars program mentors you if you're interested in working on Wall Street. The student investment management fund provides you the opportunity to manage an actual investment portfolio worth hundreds of thousands of dollars.

Finance department faculty members are considered among the top researchers in the world because of their scholarly publications. The professional advisory board, comprising leading professionals from the financial services, manufacturing, energy, investment banking and real estate sectors, provides a sounding board for new ideas and is a job resource for top graduates.

In the artificial intelligence and digital media certificate program, you focus on the creative exploration of how new media, built on advances in AI and machine learning, influences the way people live, learn, create and communicate.

You enhance your program of study with integrated, transdisciplinary training in the use of AI in new media and its sociocultural implications. You learn how to design and create new media and analyze existing media products from a transdisciplinary perspective.

The Games, Arts, Media and Engineering School educates the next generation of learners, empowering you with technofluency --- its development, application and implications. The GAME School prepares you to be a socially aware, critically thinking global citizen who strive to bring about positive change in a society that is increasingly shaped by new technologies.

BS At a Glance
STEM-OPT extension eligible: No

Math intensity: Moderate

CERT At a Glance
College/school: Herberger Institute for Design and the Arts
Location: Tempe

Career opportunities
Graduates are prepared for careers in:

- consulting
- corporate financial management
- depository institutions
- financial services
- investment banking
- investment management
- portfolio analysis

Several companies are hiring in the augmented and virtual reality, image and video multimedia space, including Adobe, Dreamscape, NVIDIA, Disney and Intel.

According to the U.S. Bureau of Labor Statistics, overall employment in media and communication occupations is projected to grow more slowly than the average for all occupations from 2024 to 2034. Despite limited employment growth, about 104,800 openings are projected each year, on average, largely because of the need to replace workers who leave the occupations permanently. The median annual wage for media and communication workers (such as public relations specialists, news analysts, and writers and authors) was $70,300 in May 2024, which was higher than the median annual wage for all occupations of $49,500. Media and communication equipment workers (such as broadcast technicians, film and video editors, and photographers) had a median annual wage of $56,480 in May 2024, which was higher than the median annual wage for all occupations.

Employment in computer and information technology occupations is projected to grow much faster than the average for all occupations from 2024 to 2034. About 317,700 openings are projected each year, on average, because of employment growth and the need to replace workers who leave the occupations permanently. All these numbers show a promising future for graduates who develop the skills taught in this certificate program.

Example careers include:

- augmented and virtual reality software developer
- computer animator
- data scientist
- graphics software developer
- machine learning engineer
- media and communications designer
- user experience and user interface designer

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Forensic Science and Cross-Sector Leadership (ASFOREBS and PPCSLDCERT)

Program description
Forensic science is the study and application of scientific methods to matters of law.

The Bachelor of Science program in forensic science is built on a solid foundation in biology and chemistry and develops your basic and upper-level laboratory skills. You complete holistic, rigorous coursework in the natural and mathematical sciences to prepare to enter a competitive workforce. The interdisciplinary nature of the program is distinctly designed to train you in forensic techniques as varied as crime scene collection, evidence analysis and mock courtroom testimony.

Along with completing coursework and developing the scientific skills needed to succeed in this field, you can gain practical experience in a laboratory setting through research or an internship. You can conduct research under experts of varying forensic fields, including biology, entomology and anthropology. You also may apply for and participate in forensic science internships sponsored by crime labs around the country. Internships are highly competitive.

When seeking a job, internship, or volunteer position within a crime lab, you will be required to undergo an extensive background check that includes a polygraph exam, fingerprinting and drug testing. You can be disqualified for recent or past illicit drug use (including marijuana), felony convictions, drunk driving convictions or other reasons.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

The certificate program in cross-sector leadership provides a comprehensive overview of leading solutions to complex social challenges by integrating the public, private, nonprofit and military sectors.

You engage in a systems-thinking approach to challenges faced by local and global communities, explore the diverse characteristics and motives of each sector in engaging in cross-sector collaborations, and master processes to formalize such partnerships. You study values-based leadership and how individual, organizational and sector values can drive a leader's ability to act. You gain leadership skills, such as leading change within and between organizations across multiple sectors; and you learn to use human-centered design, social entrepreneurship and other approaches when tackling community challenges.

You end the program with a thesis or applied project that integrates the theories, procedures and concepts learned in the certificate courses with experiences from your internships in each sector.

Career opportunities
Scientific and technological advances in the field of forensic science and continually increasing caseloads in law enforcement are projected to increase the number of forensic science technicians needed over the next decade. The U.S. Bureau of Labor Statistics estimates that between 2024 and 2034, employment of forensic science technicians will increase 13% --- an average increase much greater than for most occupations.

Graduates of the forensic science program are prepared to work in crime labs and private forensic science labs at the local, state and federal levels. Graduates also are prepared for graduate programs in forensic science, law school, medical school and related fields.

Students can advance their career options with an undergraduate certificate.

Graduates of the certificate in cross-sector leadership have acquired a beneficial knowledge of cross-sector collaboration, advanced leadership skills, and an understanding of how to use these. These transferrable skills complement students' major program of study and may make them more marketable to employers.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Information Technology (Cybersecurity) and Foundations of Computer Science and Artificial Intelligence (ESIFTCSBS and ESCSEACERT)

Program description
In the Bachelor of Science program in information technology with a concentration in cybersecurity, you acquire both the academic and technical background for a career in information technology security. The concentration is designed to incorporate emerging technologies that are used in current business models, and courses provide you with a comprehensive understanding of system orchestration, network forensics, configuration management, security analysis, security risk assessment, cloud security and mobile security. You gain knowledge and skills through coursework designed by industry experts, hands-on experience with a virtual cybersecurity lab, and preparation for industry careers.

Accredited by the Computing Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Information Technology Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

The foundations of computer science and artificial intelligence certificate program equips you with foundational knowledge and interdisciplinary skills to pursue careers in technology-driven fields.

You explore core principles of computer science, including programming, data structures and algorithms, while gaining specialized exposure to AI topics. The curriculum emphasizes practical problem-solving, ethical considerations in AI, and the application of computational thinking to real-world challenges.

This program was developed in partnership with the U.S. Naval Community College, and was tailored to support the educational and professional advancement of enlisted personnel in the Navy, Marine Corps and Coast Guard.

This program is also available if you are a continuing ASU on-campus student interested in advancing your skills in computer science and AI. The online option is for USNCC students.

CERT At a Glance
College/school: Ira A. Fulton Schools of Engineering
Location: Polytechnic, Tempe, West Valley or Online

Career opportunities
Demand for information security professionals is increasing because of the need to create innovative solutions to prevent hackers from stealing, changing or destroying information and technology infrastructures. According to the U.S. Department of Labor, employment of information security professionals is projected to grow 29% from 2024 to 2034; the median annual wage for an information security analyst in 2024 was $124,910 ($60.05 an hour). There is a significant shortage of cybersecurity professionals around the globe, and ISC2 research states that about 500,000 of the three million positions are located in North America.

Graduates can pursue careers in cybersecurity analysis, cloud security engineering, security architecture, and red or blue team ethical hacking.

Graduates are prepared to apply their knowledge and skills across a wide range of professional settings, supporting innovation and problem-solving in diverse industries. They are equipped to pursue careers in the private sector, government, military and nonprofit organizations, as well as to adapt to emerging fields. Graduates are also well prepared for continued academic study and lifelong learning.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Information Technology (Cybersecurity) and Military Studies (ESIFTCSBS and LSMILSCERT)

Program description
In the Bachelor of Science program in information technology with a concentration in cybersecurity, you acquire both the academic and technical background for a career in information technology security. The concentration is designed to incorporate emerging technologies that are used in current business models, and courses provide you with a comprehensive understanding of system orchestration, network forensics, configuration management, security analysis, security risk assessment, cloud security and mobile security. Career opportunities
Demand for information security professionals is increasing because of the need to create innovative solutions to prevent hackers from stealing, changing or destroying information and technology infrastructures. According to the U.S. Department of Labor, employment of information security professionals is projected to grow 29% from 2024 to 2034; the median annual wage for an information security analyst in 2024 was $124,910 ($60.05 an hour). There is a significant shortage of cybersecurity professionals around the globe, and ISC2 research states that about 500,000 of the three million positions are located in North America.

Graduates can pursue careers in cybersecurity analysis, cloud security engineering, security architecture, and red or blue team ethical hacking.

Graduates of this program are prepared to further advance in careers in military service or in undergraduate study.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Health Sciences (Healthy Lifestyles and Fitness Science) and Recreational Therapy (NUHSCHLCBS and PPRECTCERT)

Program description
The Bachelor of Science in health sciences with a concentration in healthy lifestyles and fitness science blends multidisciplinary coursework with practical training, providing you with a strong foundation in promoting healthy lifestyles. You gain expertise in nutrition, fitness, stress management, substance abuse prevention, behavior change, health coaching and health promotion program management.

You are equipped to make a meaningful impact on individual and community health, addressing challenges related to social determinants of health.

The program offers three academic tracks that prepare you for nationally accredited certifications:
Fitness science: You learn to assess clients and create personalized exercise programs to optimize health. Courses cover physical activity planning, exercise prescription, body image, wellness and injury risk assessment. This track prepares you for a personal training certification exam through the American College of Sports Medicine (https://www.acsm.org).

Health education and health promotion: You develop, lead and evaluate health education and health promotion programs, addressing topics such as diabetes prevention, sexual health, emergency preparedness, digital health communication and stress management. This track prepares you for the Certified Health Education Specialist exam administered by the National Commission for Health Education Credentialing (https://www.nchec.org).

Health and wellness coaching: You learn behavior change strategies and motivational interviewing techniques to support clients in developing healthy lifestyle plans. This track prepares you for the National Board Certified Health and Wellness Coach exam through the National Board for Health and Wellness Coaching (https://nbhwc.org).

In the recreational therapy certificate program, you learn to design and lead recreation activities that improve health, well-being and quality of life. Coursework introduces assessment, program planning and evaluation, and you explore creative and active forms of therapy, such as adapted exercise, aquatic therapy and community recreation.

The certificate complements degrees in health, education and community service fields and can also serve as a step toward becoming a Certified Therapeutic Recreation Specialist through the National Council for Therapeutic Recreation Certification. https://nctrc.org/ctrs-the-qualified-provider/

STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics or MAT 117 College Algebra
Math intensity: General

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions
Location: Downtown Phoenix or Online

Career opportunities
According to the U.S. Bureau of Labor Statistics, employment for health coaches and health educators is projected to grow a steady 4% between 2024 and 2034.

Health, wellness and fitness coaches work in a multitude of professional environments. Specialty areas may include bariatric weight loss clinics, healthy lifestyle behavior counseling and management, and corporate fitness and worksite wellness.

Health educators work in a variety of professional environments. Specialized placement may include working for government agencies such as the Arizona Department of Health Services, national organizations such as the American Diabetes Association, and public and private education sectors such as university health and wellness centers.

The globally recognized credentials available through this program open doors to careers in health education, promotion and coaching worldwide and create a long-term pathway to becoming a certified diabetes care and education specialist (https://www.cbdce.org) or a lifestyle medicine professional (https://lifestylemedicine.org/certification).

Career options include positions such as:

- community health educator
- community nutrition aide for the Women, Infants, and Children program, known as WIC
- community outreach coordinator
- corporate wellness coordinator
- fitness center director
- health education specialist (program developer)
- health and patient educator
- personal trainer
- prevention specialist
- school health and nutrition program specialist
- worksite wellness coach or coordinator

Graduates are also well prepared for admission to graduate programs in health promotion, population health, lifestyle management, integrative health, health administration, psychology and medicine.

Recreational therapists practice in settings such as inpatient and outpatient physical rehabilitation, inpatient and outpatient mental health, and skilled nursing facilities. Assisted living and adult day programs, parks and recreation and adapted

sports programs, acute care hospitals, pediatric hospitals and programs, and school systems also employ these professionals.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Management and Risk Management (BAMGTBS and BARMGTCERT)

Program description
The Bachelor of Science program in management prepares you to become an effective manager and team leader. You gain theoretical and conceptual knowledge and build critical skills such as:

- analytical research and problem-solving
- communication
- critical thinking
- global awareness
- leadership
- personal ethics and integrity
- teamwork

The curriculum includes the fundamentals of the global economy, the world of e-business, ethics, human resources, strategic management and collaborative team skills. Throughout the program, theories and concepts of management and ethical leadership are enhanced by experiencing and testing them in skill-based exercises, case discussions and practical, team-based project work.

The management major prepares you to face:

- corporate accountability
- cross-functional management
- demands for continuous process improvements to enhance the value chain
- ethical decision-making
- the fast pace of e-business
- growing technological sophistication
- the need for skills in communicating and working with people, directing projects and managing change
- racial, cultural and gender diversity in the workforce

In the certificate program in risk management, you acquire a solid foundation in the theory and practice of modern risk management.

The concept of enterprise risk management is highlighted at the onset of the curriculum, emphasizing that risks and risk management strategies must be considered holistically at the firm level, not in isolation. Emphasis is placed on identifying, measuring, communicating and managing a variety of risks.

Upon completion of the program, you'll be able to identify and measure a variety of business and financial risks, and design and articulate strategies for managing and communicating those risks.

BS At a Glance
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Math intensity: Moderate

CERT At a Glance
College/school: W. P. Carey School of Business
Location: Polytechnic

Career opportunities
Graduates are likely to be recruited by:

- for-profit and nonprofit organizations
- high-tech firms
- large and small organizations
- management consulting firms
- service and manufacturing firms

Graduates can advance their career options with an undergraduate certificate in risk management, with competencies that complement the marketable knowledge and skills acquired in their majors.

Many graduates pursue roles in compliance and management. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Neuroscience and Computational Life Sciences (LABMENBS and LACLSICERT)

Program description
The Bachelor of Science program in neuroscience explores how the brain and nervous system operate to control bodily function, behavior and mental states. You receive interdisciplinary training at the intersection of biology, chemistry and psychology, gaining hands-on research experience in a collaborative, close-knit community within ASU's Department of Psychology.

This program offers direct access to award-winning faculty and research labs. Coursework spans four key domains of neuroscience:

- Behavioral neuroscience: How does the brain work to control behavior?
- Cellular and molecular neuroscience: How do the cells of the nervous system work?
- Cognitive neuroscience: How does brain activity underlie our thoughts and emotions?
- Systems and computational neuroscience: How do the billions of neurons work together?

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

McKenna Life Sciences, Business and Entrepreneurship Program This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (mlsbe.asu.edu), which prepares academically outstanding students to solve health care challenges as leaders in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in finance and another in a natural science discipline of choice. You also complete a certificate in entrepreneurship and innovation, all in the same amount of time as a typical four-year degree program.

A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they've submitted their application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

In the computational life sciences certificate program, you discover a burgeoning new field where huge improvements in processing technologies have opened the door to exciting new research techniques and interdisciplinary collaborations.

You engage with a suite of tools and approaches that enable you to uncover correlations, gain new understanding and help solve scientific problems.

Using your mastery of these new techniques, you examine data generated from a variety of fields, including ecology, botany, evolutionary biology, neuroscience, molecular and cellular biology, and animal behavior. You investigate topics such as DNA, RNA, protein, imaging, conservation and historical data; and you explore the ethical implications of collecting, storing, analyzing and sharing the results of computational life science data.

BS At a Glance

Career opportunities
The BS in neuroscience opens pathways to careers focused on the human brain, spanning numerous areas of the health sciences and related fields. Graduates pursue opportunities in academic research, bioengineering, biotechnology, data science, law, medicine, psychology, pharmaceutical development, and physical or speech rehabilitation.

The program's interdisciplinary curriculum builds analytical, experimental and communication skills applicable across health and human sciences. Graduates are well prepared for advanced study or professional programs in biomedical fields such as medicine, nursing, clinical practice, technology and veterinary medicine.

Graduates of the computational life sciences certificate program have gained data interpretation skills and experience using new computational approaches and programs. Graduates who have combined this program with their major program of study are in high demand for roles that involve identifying and interpreting data in a variety of fields, including ecology, medicine, botany, evolutionary biology and animal behavior.

Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT/CERT Software Engineering; Stress Management, Mindfulness and Resilience; and Project Management Essentials (TSSERBS, PPSMMRCERT and LSPMGECERT)

Program description
The Bachelor of Science program in software engineering blends engineering, computing, project leadership and software construction.

You learn how to create innovative software solutions to today's problems. Software systems are complex, often including millions of lines of code. You develop the knowledge and skills required to take a defined engineering approach to complex systems analysis, planning, design and construction.

The program's distinct, project-driven curriculum is establishing a new model for software engineering education. The program is built around the concepts of engaged learning, discovery-based education, and learning by doing. You learn by solving engaging projects, commonly as a member of a development team. In each semester of the program, you complete projects that emphasize communication, teamwork, critical thinking and professionalism. You have flexibility in designing your course of study and select technical electives from a pool of courses in different software engineering application areas, including web and mobile applications, embedded systems and other interdisciplinary areas.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org/), under the General Criteria and the Software Engineering Program Criteria.

The certificate program in stress management, mindfulness and resilience provides you with applied training in integrative health approaches to understanding and managing stress. Coursework emphasizes evidence-based practice and experiential learning that foster mindfulness, self-regulation and resilience. You gain skills that promote well-being and can be directly applied in health, education and workplace settings.

In the stackable undergraduate certificate program in project management essentials, you develop the skills to lead successful projects. This program covers key areas of project management, including project leadership, strategy, sustainability and organizational behavior. If you are looking to enhance your project management expertise and drive positive change in any industry, the program is an ideal fit.

This program can be completed as a standalone certificate or alongside a degree program, or it can stack into a future bachelor's degree.

Career opportunities
Software engineers solve a broad set of transdisciplinary problems and apply new technologies to improve quality of life.

Graduates are prepared most commonly for a career as an application software engineer. They design and engineer innovative systems that may include mechanical and electrical components that interact with software.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in the number of employment opportunities. Software engineering jobs may focus on:

- creating applications for mobile devices
- creating web applications
- designing, creating and validating software for avionics, robotics and similar systems

Job titles may include:

- application support analyst
- back-end developer
- front-end developer
- full-stack developer
- mobile app developer
- QA engineer (quality assurance)
- software developer
- software engineer
- web developer

Graduates are prepared to work in wellness-focused roles. This program enhances skills in managing workplace stress, promoting well-being and improving employee engagement, making graduates a valuable asset in wellness-focused organizations.

Career examples include:

- corporate trainer
- human resources associate
- mental health support worker
- mindfulness educator
- wellness coach

This certificate opens doors to a wide variety of entry-level career opportunities. Graduates can pursue roles such as project coordinator, project assistant, junior project manager and project scheduler. These positions offer the chance to support senior project managers, manage project schedules, assist with administrative tasks, and help ensure the smooth execution of projects.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT/CERT Mathematics, U.S. National Security and Intelligence Studies, and Cryptology (LAMATBS, LANSISCERT and LACRYCERT)

Program description

In the Bachelor of Science program in mathematics, you acquire a deep grounding in both theoretical and applied mathematical concepts. Courses cover a broad spectrum of advanced mathematical topics, including differential equations, modeling, numerical analysis, number theory, topology, cryptography and real analysis. This degree focuses on the highest levels of math offered in undergraduate courses and is recommended if you are considering a graduate degree in mathematics.

This degree pairs well with several other areas of study in a variety of fields, including computer science, physics, astrophysics and engineering, as well as economics, business, music and art.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

The undergraduate certificate program in U.S. national security and intelligence studies emphasizes critical thinking; analytical writing; and the interpretation of human intelligence, signals intelligence, geospatial intelligence, and open-source intelligence, commonly termed HUMINT, SIGINT and GEOINT. You explore topics such as cybersecurity threats, critical languages, and cross-cultural analysis, equipping you to address complex global security challenges. You develop the ability to create an intelligence collection plan to collect key forms of intelligence in support of national security objectives. You demonstrate your mastery of core intelligence concepts through the stages of the intelligence process: planning and direction, collection, processing, analysis and production, and dissemination with both oral and technical reports.

You learn to synthesize knowledge about the U.S. intelligence community and national security objectives by analyzing the missions, roles and structures of the 18 organizations within the U.S. intelligence community. You develop a comprehensive understanding of the national security enterprise through the application of research, data analysis and structured analytical techniques used in the production of finished intelligence products. You develop strong analytical writing and oral communication skills, essential for conveying complex information effectively to diverse audiences.

This interdisciplinary program integrates high-impact experiential learning with classroom instruction and internship opportunities that connect you to professionals across the federal government, private sector and nonprofit organizations. With strong local engagement in the Phoenix area; a network presence in Washington, D.C.; and a global outlook; the program prepares you to thrive in the dynamic and evolving field of intelligence and national security.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/.

Cryptology is the art and science of making and breaking codes and ciphers. The certificate program in cryptology provides you with a strong foundation in the mathematical topics that are most applicable to modern cryptosystems. You also gain specialized knowledge required for understanding and working in the field of mathematical cryptology.

BS At a Glance
Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe

CERT At a Glance

College/school: The College of Liberal Arts and Sciences
Location: Tempe

Career opportunities
Graduates with a BS degree in mathematics go on to careers in areas such as research, computer science, cybersecurity, law, finance, biotechnology, government, engineering, health care and education. Additionally, graduates have a strong foundation to pursue further mathematical studies.

Graduates are prepared for work in the areas of cybersecurity; inspection, investigation and compliance; intelligence analysis; intelligence collection; law and legal services; and security.

The program enhances workforce readiness and provide increased opportunities for graduates to find meaningful, impactful careers within the U.S. national security and intelligence community sectors in:

- acquisitions and contracting
- business and mission support
- computer science
- data science
- education and training
- foreign languages
- geography
- infrastructure and logistics
- information technology
- medical and occupational health
- science, technology, engineering and mathematics

The certificate provides an excellent foundation for students pursuing careers in the public or private sectors, as well as those seeking to continue their education at the graduate level in national security, global security or intelligence studies.

A certificate in cryptology offers graduates a wide variety of career possibilities. Some pursuing this certificate are interested in working in government, business, financial and medical settings and in educational industries. These areas require professionals with the skills to secure data --- and program graduates have these skills.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BSE/CERT Biomedical Engineering and Pre-Health (ESBMEBSE and NHPRHECERT)

Program description
In the Bachelor of Science in Engineering program, you gain the in-depth knowledge needed to translate an idea for a health solution into a viable prototype of a biomedical device.

With knowledge you gain from engineering and life sciences courses, you are able to apply your skills in an ethical and sustainable manner to make contributions that address societal and individual needs.

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/ (https://www.abet.org/), under the General Criteria and the Bioengineering and Biomedical Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

The postbaccalaureate certificate program in pre-health prepares you with the academic foundation and professional skills needed to pursue advanced study in health professions.

Through a flexible and customizable online format, you deepen your understanding of scientific concepts, critical thinking and ethical decision-making in health care. Coursework emphasizes biology, chemistry, physics, mathematics and health-related humanities and social sciences, allowing you to explore the complex interplay of science, culture and policy in health systems. The required core course introduces you to clinical health care environments and professional expectations, while supplemental offerings support career exploration and entrance exam readiness.

You also develop competencies in clinical reasoning, professional communication and reflective practice through interactive learning experiences and exposure to real-world case studies. Guided by expert faculty and pre-health advisors, you build the knowledge, confidence and clarity to take the next step toward a career in health care.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/.

BSE At a Glance
Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

CERT At a Glance
College/school: College of Health Solutions

Career opportunities
Biomedical engineers are primarily employed in:

- governmental regulatory agencies
- hospital and research facilities
- medical and educational institutions
- medical device, biotechnology and pharmaceutical industries

In industry, they may work in all aspects of product development, including:

- business development
- manufacturing
- marketing
- quality
- regulatory compliance
- research and design
- sales

Because of their background in both engineering and medical fields, biomedical engineers often serve a coordinating or interfacing function and have a key role in transdisciplinary teams. Government positions may involve evaluating new technologies, testing product quality and safety, and setting standards.

In the hospital, biomedical engineers serving in a clinical engineering function may provide advice on the selection and use of medical equipment, and supervise performance testing and maintenance. Biomedical engineers may also build customized devices for special health care, rehabilitation or research needs.

Graduates are well prepared to pursue postgraduate health degrees, studying medicine, dentistry, pharmacy, optometry or related health fields. Further study can result in a career as a:

- chiropractor
- dentist
- medical doctor
- naturopathic doctor
- optometrist
- pharmacist
- physician associate
- podiatrist

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BSE/CERT Mechanical Engineering and Geographic Information Science (ESMAEMBSE and LAGISCERT)

Program description
Mechanical engineering is a creative, diverse discipline. Mechanical engineers design, build and control the devices, machines, processes and systems that are the mainstay of modern industrialized society.

In the Bachelor of Science in Engineering program in mechanical engineering, you prepare for a career through a curriculum that includes the study of the principles that govern energy transfer, mechanical design, sensors and control devices, and the application of these principles to the creative solutions of practical modern problems.

As a mechanical engineering student, you are expected to be able to:

- acquire and apply new knowledge as needed, using appropriate learning strategies
- apply engineering design to produce solutions that meet specified needs, with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- communicate effectively with a variety of audiences
- develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
- recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

Accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org (https://www.abet.org), under the General Criteria and the Mechanical Engineering Program Criteria.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

The certificate program in geographic information science combines geospatial tools, spatial reasoning and practical analysis to solve real-world problems. You work in multiple GIS platforms as you build a strong foundation in spatial analysis, geovisualization, remote sensing, cartography and spatial modeling. The curriculum balances technical training with conceptual insight, helping you understand not just how to work with geographic data, but how to analyze, interpret it and communicate your findings to others.

This program prepares you to apply GIS tools and spatial reasoning to pressing challenges such as climate change, population dynamics, public health, and sustainable urban development. Through applied coursework and class projects, you learn how to collect, manage, analyze, and interpret spatial data, turning raw information into actionable insights.

Career opportunities

Mechanical engineers are employed in virtually every kind of industry. They are involved in seeking new knowledge through research; in generating creative design and development; and in the production, control, management and sales of the devices and systems needed by society. Therefore, a major strength of a mechanical engineering education is the flexibility it provides for its graduates regarding future employment opportunities.

The BSE program in mechanical engineering has the following program educational objectives:

Through activities such as volunteering, entrepreneurial endeavors, community service, and their employment, graduates demonstrate commitment to the Sun Devil ideals of global engagement, social embeddedness, social transformation and sustainability.

Graduates should attain one or more of the following objectives within a few years of earning their degree:

- admission to a graduate degree program in mechanical engineering or other technical fields
- admission to a professional degree program, such as law, business or medicine, in accordance with the graduate's interests and abilities
- employment in engineering or other fields in a position that capitalizes on the skills and abilities gained through the degree program in mechanical engineering (holding positions of increasing responsibility and leadership within their organizations)

Geographic information science is one of the fastest-growing segments of the economy, and employment possibilities can be found across the private sector and in many government agencies at the local, state and national levels.

Graduates who have paired this geographic information science certificate with their degree program have added knowledge, skills and abilities in these highly desirable areas:

- analysis
- computer programming
- problem-solving
- statistics

Designed to complement any undergraduate major, the certificate program supports graduates pursuing work fields such as:

- business
- computer science
- environmental science
- health care
- nonprofit organizations
- real estate
- retail
- transportation
- urban planning
- utilities
- visual arts

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Applied Business Technology Solutions and Applied Business Data Analytics (BAAPBTSBA and BABDACERT)

Program description
The Bachelor of Arts program in applied business and technology solutions is designed to meet your needs as a workforce learner who wishes to complete an undergraduate degree in business.

In this program, you can quickly access accounting, business analytics, computer information systems, economics, finance, management, marketing, process management and business ethics courses, and directly connect what's taught in the classroom to your working environment. The program's applied internship courses enable you to put what you're learning into practice, and emphasis areas allow you to further customize the degree.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

Career opportunities
Graduates have a strong academic foundation in core business functions, and the program's flexibility enables them to apply their knowledge in a variety of fields and settings.

With this specialization as a complement to their major program of study, graduates are more attractive to potential employers and have expanded career options.

Graduates with this certificate often pursue employment in management, business analysis or marketing. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT Business (Language and Culture) and International Business Studies ([degree plan code] and BAIBSCERT)

Program description
The Bachelor of Arts program in business with a concentration in language and culture is an innovative, transdisciplinary offering that prepares you for positions in a variety of professions in which business and communication play an important role in ensuring success.

You complete rigorous language courses in Chinese, French, Italian or Spanish --- in addition to the skill and core courses required of all W. P. Carey School of Business students --- enabling you to become a business professional who can function well culturally and linguistically in business environments in the U.S. and internationally.

In the certificate program in international business studies, you develop competency in a foreign language and a sensitivity to foreign cultures in the certificate program in international business studies. You gain an awareness of global social processes and an understanding of international business environments, principles and operations.

The W. P. Carey School of Business has partnerships with universities all over the world, so you can experience new cultures, visit new places and build intercultural and language skills. International internships also are offered in conjunction with ASU's Global Education Office.

Career opportunities
Graduates are equipped to play key roles in companies and organizations that are seeking new markets or dealing with international interests domestically. The demand for multilingual business professionals is strong in the hotel and tourism industry and in consulting, banking and finance, international trade, sports management and media companies.

Students can advance their career options with an undergraduate certificate. The certificate program in international business enables students to develop additional competencies that complement the marketable knowledge and skills they acquire in their majors.

Graduates who have completed this program often decide to pursue employment in management, sales, marketing and communication. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BA/CERT General Studies and Applied Business Data Analytics (LSGNSBGS and BABDACERT)

Program description
The Bachelor of Arts program in general studies offers you a purpose-built, transfer-friendly degree, designed to serve the more than 39 million adults in the United States who have college credit but no degree. This program expands your access to degree completion by maximizing previously earned credits and offering a flexible curriculum. The program fosters critical thinking, communication, adaptability and problem-solving skills, and the ability to work across disciplines to prepare you for graduate study or to meet employer expectations in a variety of careers.

You can align your degree program with your experience or career aspirations while building toward graduate education in areas such as public administration, health innovation or applied leadership.

If you are interested in practical uses for computer-based tool suites that are capable of managing vast amounts of data, the certificate program in applied business data analytics is for you. You learn sophisticated but easy-to-use means of managing and analyzing such data. You leverage the tools for making good decisions about projects, process designs and fundamental tasks.

You are exposed to predictive analytics and modeling, big data techniques, and visualization, giving you significant insight into the advanced uses of computer-based tools. Critical thinking is an important skill and mindset; it's needed to establish and evaluate evidence-based benchmarks in order to make good data decisions that lead to high-quality outcomes.

Career opportunities
Graduates with a degree in general studies have a broad educational foundation and the flexibility to explore multiple

career paths. The program's versatility allows graduates to prepare for opportunities in business, social services, organizational management, government and beyond.

Graduates may pursue careers including:

- administrative services manager
- business operations or project coordinator
- curator (with additional training or relevant experience)
- general and operations manager
- health education or program specialist
- human resources specialist
- military or veterans services coordinator
- purchasing manager
- social and community service manager
- sustainability specialist

With this specialization as a complement to their major program of study, graduates are more attractive to potential employers and have expanded career options.

Graduates with this certificate often pursue employment in management, business analysis or marketing. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BAE/CERT Secondary Education and Elementary Education (TESEDBAE and TEEEDCERT)

Program description
The Bachelor of Arts in Education program in secondary education prepares you to educate learners in grades 6-12 in the content area of your choice.

You develop strong content knowledge, instructional competency and professional skills needed to lead successful classrooms in middle and high schools. You gain extensive experience integrating educational technology, and the program has a strong focus on teaching and learning practices that foster equitable access and outcomes for diverse secondary populations. You select one content area as your subject emphasis and complete at least 24 credit hours in that area. Content areas may vary depending on location and include biology, business, chemistry, earth and space sciences, economics, English, general science, geography, health, history, mathematics, physics, physical education, political science and American government, and some foreign languages.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher preparation, enabling you to participate in professional experiences --- internships and student teaching --- with a team of peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with mutually supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply knowledge learned in coursework to practice in the classroom.

You complete a series of internships before a semester-long, full-time student teaching experience with the support of a certified mentor teacher and ASU faculty.

You earn a bachelor's degree in secondary education and receive an institutional recommendation for teacher certification in Secondary Education, 6-12, as well as a structured English Immersion, P-12, endorsement through the Arizona Department of Education. To be eligible for secondary certification in Arizona, you must also earn a passing score on the professional knowledge exam offered through the National Evaluation Series or Arizona Educator Proficiency Assessments.

Format option
This program is also offered via ASU Sync (https://provost.asu.edu/sync/students). As a ASU Sync student, you attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. ASU Sync students must reside in Arizona throughout the duration of the program. If you have F-1 or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

The BAE program in secondary education via ASU Sync is available for transfer students who reside in Arizona.

You have the opportunity to speak to an advisor about the content areas and modalities offered at ASU campuses in and outside Maricopa County.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center regarding certain limitations. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

In the certificate program in elementary education, you prepare to work with children in grades K-8 in an educational setting.

This certificate program can be added only to the following majors, granting you eligibility for dual teaching certificates when you complete your Bachelor of Arts in Education program:

- BAE in secondary education
- BAE in special education

You engage in innovative coursework grounded in theory-based strategies and evidence-based practices for teaching. Coursework is designed to support the development of instructional competencies, professional skills, content knowledge and pedagogical content knowledge in mathematics, science, English language arts and social studies.

This program has a strong focus on teaching and learning practices that foster equitable access and outcomes for culturally and linguistically diverse students, and learners with special needs and exceptionalities.

When you add this certificate to a bachelor's degree listed above, you're eligible to earn an institutional recommendation from ASU for Arizona teacher certification in Elementary Education, K-8, as recognized by the Arizona Department of Education. To teach in an Arizona public school, you must pass the appropriate Arizona educator exams: National Evaluation Series or Arizona Educator Proficiency Assessments.

Format option
This program is also offered via ASU Sync (https://provost.asu.edu/sync/students). ASU Sync enables you to attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. As an ASU Sync student, you must reside in Arizona throughout the duration of the program. If you have F-1 or J-1 immigration status, you're not permitted to complete courses via Sync and should speak with an advisor about other options to complete this program.

If you're seeking to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations.

CERT At a Glance
College/school: Mary Lou Fulton College for Teaching and Learning Innovation
Location: Tempe, West Valley

Career opportunities
Graduates are recommended for certification in an approved area for grades 6-12. The demand for well-prepared secondary teachers is strong, particularly in math and science. Job opportunities in a fast-growing state such as Arizona are numerous. Graduates with a degree in secondary education work in:

- charter schools
- online schools
- private school settings
- public schools

Graduates are highly sought-after teachers in public, charter and private education institutions. Many graduates with degrees in elementary education also work at community organizations that serve children and youth.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Astronomical and Planetary Sciences and Environmental Education (LAASTPLSBS and TEEVEDCERT)

Program description
The online Bachelor of Science program in astronomical and planetary sciences provides you with broad training in the scientific foundations required to understand and communicate the fundamentals of space exploration and ongoing advances in the field.

The degree program includes groundwork in mathematics and physical sciences, topical courses focused on diverse fields within astronomy and planetary science, and exposure to the engineering and computational tools and techniques used to carry out research.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

The certificate program in environmental education is for you --- whatever major you are in, or if you are a nontraditional educator. The program is designed to establish standards for professional excellence in environmental education, as outlined by the North American Association for Environmental Education.

Environmental education is taught in traditional classrooms and in community-serving organizations such as nature centers, museums, parks and zoos. The program's required coursework increases the environmental literacy of future educators, fosters community leadership strategies, and provides you with opportunities to practice environmental education teaching methods.

If you complete the certificate program, you're eligible to apply for the state-level environmental education certification recognized by the North American Association for Environmental Education.

BS At a Glance
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus or higher
Math intensity: Moderate

CERT At a Glance
College/school: Mary Lou Fulton College for Teaching and Learning Innovation
Location: Tempe, West Valley, Online

Career opportunities
Graduates pursue careers in fields that value the quantitative and technical skills taught as part of an astronomy education. These include K-12 STEM teaching positions, science and technology journalism and writing careers, technical careers involving statistical data analysis or computer programming, and technical positions supporting space and research industry and policy.

Career opportunities include:

- analytical lab technician
- astronomer
- data analyst
- instrumentation specialist
- museum director
- planetary scientist
- research scientist
- science teacher
- science writer
- telescope operator

Career settings include:

- aerospace industry organizations
- educational institutions
- federal, state and local government agencies
- manufacturing centers
- museums and planetariums
- NASA facilities
- national laboratories
- National Science Foundation facilities
- observatories
- space industry organizations

For more information, students can visit the career opportunities page on the School of Earth and Space Exploration website (https://sese.asu.edu/student-life/career-opportunities).

Graduates who combine the certificate in environmental education with their major program of study may become more marketable to employers. They often decide to pursue employment in educational settings such as nonprofit organizations, nature centers, museums, parks and zoos.

The environmental education certificate does not lead to teacher certification.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Finance and International Business Studies (BAFINBS and BAIBSCERT)

Program description
The Department of Finance has a rich tradition of educating leaders who excel in all aspects of the discipline of finance. Whether you aspire to ascend to the top ranks of the venture capital industry, execute multimillion-dollar real estate deals, or become a successful entrepreneur with your own ideas and drive, the Bachelor of Science program in finance equips you to succeed.

In particular, the Investment Banking Industry Scholars program mentors you if you're interested in working on Wall Street. The student investment management fund provides you the opportunity to manage an actual investment portfolio worth hundreds of thousands of dollars.

Finance department faculty members are considered among the top researchers in the world because of their scholarly publications. The professional advisory board, comprising leading professionals from the financial services, manufacturing, energy, investment banking and real estate sectors, provides a sounding board for new ideas and is a job resource for top graduates.

In the certificate program in international business studies, you develop competency in a foreign language and a sensitivity to foreign cultures in the certificate program in international business studies. You gain an awareness of global social processes and an understanding of international business environments, principles and operations.

The W. P. Carey School of Business has partnerships with universities all over the world, so you can experience new cultures, visit new places and build intercultural and language skills. International internships also are offered in conjunction with ASU's Global Education Office.

- portfolio analysis

Students can advance their career options with an undergraduate certificate. The certificate program in international business enables students to develop additional competencies that complement the marketable knowledge and skills they acquire in their majors.

Graduates who have completed this program often decide to pursue employment in management, sales, marketing and communication. Advanced degrees or certifications may be required for academic or clinical positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Geography and Geographic Information Science (LAGCUBS and LAGISCERT)

Program description
Geographers have a distinct spatial perspective in understanding the world, from global to local, through the twin lenses of space and place.

In the Bachelor of Science program in geography, you learn about natural features of the world, including landforms, plants, water and weather, as well as the impact humans have on the world. This degree program also emphasizes social science or environmental science dynamics involving economic patterns, human populations and transportation.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

The certificate program in geographic information science combines geospatial tools, spatial reasoning and practical analysis to solve real-world problems. You work in multiple GIS platforms as you build a strong foundation in spatial analysis, geovisualization, remote sensing, cartography and spatial modeling. The curriculum balances technical training with conceptual insight, helping you understand not just how to work with geographic data, but how to analyze, interpret it and communicate your findings to others.

This program prepares you to apply GIS tools and spatial reasoning to pressing challenges such as climate change, population dynamics, public health, and sustainable urban development. Through applied coursework and class projects, you learn how to collect, manage, analyze, and interpret spatial data, turning raw information into actionable insights.

BS At a Glance
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe, Online

Career opportunities
Having gained skills in geospatial techniques, geographers with a BS degree in geography go on to careers such as:
- computer cartographer
- environmental impact assessment analyst
- geographic information science specialist or analyst
- geomorphologist
- hydrology and water resource specialist

- location analyst for businesses
- photogrammetry specialist
- remote sensing analyst

Graduates also are presented with a host of other geospatial career options in the burgeoning fields of geographic information science, mapping and navigation systems.

Geographic information science is one of the fastest-growing segments of the economy, and employment possibilities can be found across the private sector and in many government agencies at the local, state and national levels.

Graduates who have paired this geographic information science certificate with their degree program have added knowledge, skills and abilities in these highly desirable areas:

- analysis
- computer programming
- problem-solving
- statistics

Designed to complement any undergraduate major, the certificate program supports graduates pursuing work fields such as:

- business
- computer science
- environmental science
- health care
- nonprofit organizations
- real estate
- retail
- transportation
- urban planning
- utilities
- visual arts

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Nonprofit Leadership and Management and Nonprofit Professional (PPNLMBS and PPNPYCERT)

Program description
The Bachelor of Science program in nonprofit leadership and management prepares you to lead mission-driven organizations and address complex community and social challenges. You learn leadership, program development, fundraising and financial management skills while exploring how nonprofits create positive change in society.

Coursework integrates classroom learning with applied field experiences, including an internship that builds professional skills in organizational strategy, volunteer coordination and ethical leadership.

In the nonprofit professional certificate program, you prepare for leadership and management roles in the nonprofit sector while earning eligibility for the Certified Nonprofit Professional credential. The CNP is awarded through the Nonprofit Leadership Alliance, a national consortium that develops leaders for careers in community and social organizations. https://nla1.org/

The curriculum follows a competency-based, experiential model that integrates coursework in fundraising, volunteer management and organizational leadership with applied field experience. You build skills in program planning, resource management and team leadership while connecting classroom learning to community-based practice.

BS At a Glance
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions

Location: Downtown Phoenix

Career opportunities
Graduates are prepared for leadership and management roles across the growing nonprofit sector, which employs millions of professionals in organizations of all sizes and missions. They work in community-based nonprofits, foundations and national organizations that address issues in health, education, human services, the arts and the environment.

Prominent employers include the American Red Cross, America's Second Harvest, the Humane Society of the United States, March of Dimes, National Urban League and United Way, as well as youth-serving organizations such as Big Brothers Big Sisters, Boys and Girls Clubs, Girl Scouts of the USA, and YMCA of the USA.

Typical positions include:
- field executive
- fund development director
- program director
- program officer for a grantmaking organization
- volunteer program manager

Graduates have expanded career opportunities across the nonprofit and community sectors. They are well prepared to apply their leadership and management skills to advance the missions of organizations focused on areas such as arts and culture, environmental sustainability, health and human services, and youth development.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Public Service and Public Policy (Law and Policy) and Cross-Sector Leadership (PPPAFLPBS and PPCSLDCERT)

Program description
The School of Public Affairs offers a concentration in law and policy as part of the Bachelor of Science in public service and public policy.

Through this concentration, you gain foundational knowledge about the law and its relationship to society. You also acquire the skills necessary for positively impacting communities via the law, public organizations and the policy process.

The certificate program in cross-sector leadership provides a comprehensive overview of leading solutions to complex social challenges by integrating the public, private, nonprofit and military sectors.

You engage in a systems-thinking approach to challenges faced by local and global communities, explore the diverse characteristics and motives of each sector in engaging in cross-sector collaborations, and master processes to formalize such partnerships. You study values-based leadership and how individual, organizational and sector values can drive a leader's ability to act. You gain leadership skills, such as leading change within and between organizations across multiple sectors; and you learn to use human-centered design, social entrepreneurship and other approaches when tackling community challenges.

You end the program with a thesis or applied project that integrates the theories, procedures and concepts learned in the certificate courses with experiences from your internships in each sector.

BS At a Glance
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

CERT At a Glance
College/school: Watts College of Public Service & Community Solutions
Location: Downtown Phoenix

Career opportunities
The program is primarily designed for individuals who work in the public sector or are interested in doing so. The skills and knowledge students acquire allow them to successfully function in many other types of organizations; however the primary focus is on public organizations.

This program prepares students for entry- and midlevel supervisory and managerial positions in city, county, state and federal agencies; for work in nonprofit organizations; and for work in the private sector at the interface of public affairs and private enterprise. For those who already have work experience, the degree provides further opportunity for promotion. In addition, the program prepares students for future graduate study in law, public policy and public administration, and for pursuits focused on public affairs and the common good.

Students can advance their career options with an undergraduate certificate.

Graduates of the certificate in cross-sector leadership have acquired a beneficial knowledge of cross-sector collaboration, advanced leadership skills, and an understanding of how to use these. These transferrable skills complement students' major program of study and may make them more marketable to employers.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BS/CERT Robotics and Autonomous Systems and International Relations (ESRASBS and LAINSCERT)

Program description
Robotics and autonomous systems are transforming the way people live and work, driving advances in transportation, manufacturing, health care, aerospace and beyond. Autonomous systems --- such as driverless vehicles, mobile robots, industrial robots and intelligent machines --- operate with minimal human intervention, requiring a deep integration of engineering disciplines to achieve reliable, safe and efficient performance.

You receive a comprehensive engineering education in robotics, controls, automation and intelligent systems in the Bachelor of Science program in robotics and autonomous systems. The program emphasizes both theoretical foundations and practical applications, with particular focus on systems integration, sensing and perception, data fusion, and modeling and simulation. You gain the ability to analyze, design, implement and optimize robotic and autonomous technologies across diverse domains, preparing you to contribute to innovations that define the future of engineered systems.

In the international relations certificate program, you develop a sophisticated understanding of how the world is deeply interconnected and why events happening in one part of the globe may have huge impacts on other regions. You learn about U.S. political institutions or global politics before progressing to advanced coursework on public policy, political leadership and political change. You examine core issues in international relations, including America's role in the world, violent conflict, diplomacy and trade, and how local identities interact with global trends to shape world affairs. You develop analytical and communication skills, and pursue hands-on research, including internships.

BS At a Glance
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

CERT At a Glance
College/school: The College of Liberal Arts and Sciences
Location: Tempe

Career opportunities
Professionals with a degree in robotics and autonomous systems have substantial opportunities at all levels in manufacturing engineering and in research and development at companies, research institutes and national laboratories (e.g., Department of Defense, Department of Energy, NASA). Relevant careers and related titles include:

- engineer
- manufacturing engineer
- mechanical engineer
- mechatronics engineer
- researcher and scientist

Graduates who have combined the certificate in international relations with their major program of study become more attractive to employers.

Graduates can identify global trends and address issues facing humanity. They have developed a deeper understanding of international policy while leveraging their critical thinking and communication skills, as well as their cross-cultural competencies. Their sector-spanning analytic skills are useful for careers in government, international organizations, nongovernmental organizations, academia and journalism. Graduates pursue careers as foreign service officers, security analysts and policy analysts, and in other data-driven positions.

Please reference the Undergraduate degree requirements (curriculum checksheets) and full certificate description page for curriculum.

BSD/CERT Architectural Studies and Geographic Information Science (ARSTDBSD and LAGISCERT)

Program description
The preprofessional Bachelor of Science in Design program in architectural studies offered by The Design School helps you understand architecture as both a cultural expression and technical achievement, and it offers an interdisciplinary approach to architecture.

You are prepared for alternative practices with architecture firms and in related fields such as landscape architecture, engineering, art, construction, urban planning, urban design and historic preservation, or for graduate studies in the professional Master of Architecture program, in business fields or in law.

This program offers two possible paths: cross-disciplinary focus and professional focus. For the first three years, you take two project-topic courses yearly, together with other classes, to develop your skills. In the third year, if you intend to pursue professional licensure as a registered architect, you must declare to your advisor your interest in pursuing the professional focus.

Geographic information scientists do more than create maps; they uncover patterns, relationships and insights that help us better understand the world and how people interact within it. By combining elements of computer science, statistics and geography, you are equipped to answer complex questions about what is happening, where it's occurring, why it matters, and how to respond.

BSP/CERT Urban Planning and Geographic Information Science (ARPUPBSP and LAGISCERT)

Program description
Urban planners guide communities in making wise decisions about their use of land and resources. The urban planning program introduces you to issues faced by urban areas and the tools necessary to address them.

In the Bachelor of Science in Planning program, you gain expertise in the analysis and synthesis of the physical, social, political and economic issues that shape urban and regional development. Courses cover comprehensive planning, computer and analytical methods, public policy formulation and administration, socioeconomic and environmental analyses, urban design and many other fields that urban planning encompasses, such as:

- environmental planning
- geographic information systems
- housing
- landscape architecture
- planning and zoning law
- transportation
- urban and development economics
- urban resilience

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Prelaw (LALAWPRE)

Campus: Downtown Phoenix, Polytechnic, Tempe, West Valley

Program Description:

The prelaw program at Arizona State University is not a degree program. There is no single major that prepares students for becoming a lawyer and there are no specific courses required for law school. Rather, students are encouraged to take a variety of courses --- classes that challenge students intellectually through heavy amounts of reading, writing, critical thinking and analysis. It is also recommended that students engage with more practical experiences in fields related to law (e.g., through internships, job shadowing and so forth).

Challenging courses and real-world experiences, in conjunction with the requirements for a student's major, constitute a prelaw program that prepares students for the next steps in pursuing a career in the legal field.
