Arizona State University

Academic Catalog Archive

2026-2027

This document provides an archival record of the academic programs offered during the 2026-2027 academic year. It is a printable option of the online catalog for accreditation organizations, agencies and university offices for data collection, evaluation purposes and referencing. The information and links presented in this archive may no longer be accurate. For current catalog information, refer to the online version of the academic catalog.

Corrections or additions to the Academic Catalog Archive 2026-2027 program information and major maps, as of August 2026, may be provided in a future addendum. For inquiries or questions, please contact academic.catalog@asu.edu.

About this Document

To navigate this version of the Academic Catalog 2026-2027, refer to the table of contents and the bookmarks provided. The table of contents provides a hyperlinked listing of resources in the order in which they appear in this document. Keyword searches may be employed as an additional means of locating resources within this document.

This document contains program descriptions and requirements for graduate degrees and certificates, undergraduate degrees, minors and undergraduate certificates. Curriculum checksheets, included for undergraduate degrees, outline each degree's requirements and a recommended sequence of courses.

Our approach: ASU mission and goals

ASU charter

New American University - Toward 2031 and beyond

Download ASU Charter [1]

ASU is a comprehensive public research university, measured not by whom it excludes, but by whom it includes and how they succeed; advancing research and discovery of public value; and assuming fundamental responsibility for the economic, social, cultural and overall health of the communities it serves.

ASU Charter video [2] on Youtube

Mission and goals

Demonstrate leadership in enabling academic excellence and accessibility at scale

Maintain the fundamental principle of accessibility to all students qualified to study at a research university.

Maintain university accessibility to match Arizona's socioeconomic spectrum with undifferentiated outcomes for success.

Ensure that more than 90% of students continue studies beyond their first year.

Enhance university graduation rate to greater than 85% and more than 45,000 graduates annually.
Continuously enhance quality while maintaining affordability.

Overcome geographic and financial barriers to education by enrolling 170,000 online degree-seeking students.

Continuously increase measured student development and learning outcomes.

Engage millions of learners of all socioeconomic, geographic and demographic backgrounds.

Expand ASU's role as the leading global center for interdisciplinary research, discovery and development by 2031

Catalyze Phoenix as a new Mega Science and Technology City.

Become the leading American center for discovery and scholarship in the integrated social sciences, and comprehensive arts and sciences.

Enhance research competitiveness to more than $1.5 billion in annual research expenditures.

Drive regional economic competitiveness through research, discovery and socioeconomically integrated programs.

Serve as a leading American center for innovation, entrepreneurship and sustainability.

Create the leading American center for education and learning technology.

Enhance our local impact and social embeddedness

Leverage ASU as a public enterprise to strengthen Arizona's interactive network of teaching, learning and discovery resources.

Co-develop solutions to the critical social, technical, cultural and environmental issues facing 21st-century Arizona, ensuring sustainability and resilience.

Meet the needs of 21st-century Universal Learners through personalized learning pathways that promote adaptability to emergent social and technological changes.

Design and launch ASU Health as a comprehensive cluster of teaching, learning and discovery health systems for the enhancement of social-scale health outcomes

Design and launch the Arizona Alliance for Health and Innovation as a coalition to improve Arizona health outcomes.

Design and launch the Arizona Health Metrics Scorecard as a foundational Decision Theater for Health model.

Design and launch the transformative learning, workforce, technology and care delivery initiatives, such as Food Is Medicine, ASU Clinics and Virtual Medical School.

Advance the world’s first Global Futures Laboratory

Expand the role of the Julie Ann Wrigley Global Futures Laboratory as a global leader in delivering solutions to planetary-scale challenges.

Build capacity to address urgent planetary challenges with speed, scale and immediate impact.

Design immersive learning spaces rooted in systems-thinking to empower learners to tackle complex, global challenges.

Partner with private-sector leaders to create workforces that align with the demands and opportunities of a sustainable global economy.

Develop regional Global Futures Laboratory hubs to amplify global reach and local impact, ensuring solutions are globally informed and locally actionable.

A New American University

Arizona State University exemplifies a new prototype for the American public research university.

More than a decade ago, ASU set forth a new and ambitious trajectory to become a comprehensive knowledge enterprise dedicated to the simultaneous pursuit of excellence, broad access to quality education, and meaningful societal impact. From that point forward, and founded on a vision for a new "gold standard", all of its energy, creativity and manpower have been brought to bear on the design of a uniquely adaptive and transdisciplinary university committed to producing master learners.

Nine design aspirations guide ASU’s ongoing evolution as a New American University. ASU integrates these institutional objectives in innovative ways to demonstrate excellence, access and impact.

Learn more [3]

Leverage Our Place
ASU embraces its culture, socioeconomic and physical setting.

Transform Society
ASU catalyzes social change by being connected to social needs.

Value Entrepreneurship
ASU uses its knowledge and encourages innovation.

Conduct Use-Inspired Research
ASU research has purpose and impact.

Enable Student Success
ASU is committed to the success of each unique student.

Fuse Intellectual Disciplines
ASU creates knowledge by transcending academic disciplines.

Be Socially Embedded
ASU connects with communities through mutually beneficial partnerships.

Engage Globally
ASU engages with people and issues locally, nationally and internationally.

Practice Principled Innovation
ASU places character and values at the center of decisions and actions.

Ideas and issues

Under President Crow's leadership, ASU pursues a broadly-scoped and ambitious trajectory to create meaningful change in the lives of its students and the communities it serves.

Excellence
ASU demonstrates that comprehensive excellence and broad access can coexist and thrive in one institution.

Learn more [1]

Access
ASU is dedicated to providing all learners with accessible and valuable pathways to knowledge, and preparing universal learners capable of lifelong adaptation.

Learn more [2]

Student success
ASU is advancing a student-centric, adaptive design that is nimble and responsive to the needs of learners and the imaginations of faculty and leadership.

Learn more [3]

University design
ASU embraces a design mindset focused on relevance, perpetual innovation, outcomes, and creative collaboration that promotes effective solutions.

Learn more [4]

Sustainability
Sustainability is a guiding principle at ASU, which drives the development of education, discovery and practices that empower individuals to create a sustainable world.

Learn more [5]

Social embeddedness
ASU listens and advances solutions by fostering meaningful partnerships with individuals and organizations across the community who share our vision.

Learn more [6]

Global engagement
Global engagement is a core design aspiration that inspires ASU's innovative international alliances and expands the scope of our education and discovery programs.

Learn more [7]

Science policy
ASU is committed to the pursuit of use-inspired, world-class research capable of having meaningful social impact.

Learn more [8]

Inclusive Excellence
ASU is committed to inclusion -- ethnic, intellectual, socioeconomic and cultural -- and advancing knowledge that reflects the deepest possible grasp of broad perspectives.

ASU leadership

Internationally acclaimed authorities in their fields, members of the Arizona State University leadership team continue to redefine higher education and the critical role it plays in our global future. Guiding the university’s vision is Michael M.

Crow, who has earned worldwide recognition for his transformative leadership from such news journals as Time magazine, U.S. News & World Report, The New York Times, The Washington Post, The Wall Street Journal, Christian Science Monitor and more.

Arizona Board of Regents

The Arizona Board of Regents [1] is a 12-member board created under the Arizona Constitution as the governing body for the State of Arizona's public university system, which includes Arizona State University [2], Northern Arizona University and the University of Arizona.

History and milestones

On Feb. 8, 1886 — almost 30 years before Arizona was granted statehood — the Territorial Normal School, Arizona's first higher education institution, opened its doors to 33 students in a four-classroom building in Tempe.

From humble beginnings, and through a series of name changes that led to a 1958 vote of the people and a 2-to-1 margin of victory for the advancement of Arizona State College to Arizona State University, ASU's century-plus trajectory has led to its being recognized as the "most innovative" university in the country by U.S. News & World Report — 11 years in a row.

University milestones timeline

The history of Arizona State University is rich, bold and vibrant. The timeline below reflects an honored tradition of excellence and inclusion while also celebrating the growth and development forged to meet – and make – the future.

1885: Territorial Normal School established

ASU's predecessor is created in 1885 by the Thirteenth Territorial Legislature to train teachers and teach agricultural and mechanical arts. Today, Arizona State University offers high-quality, nationally and internationally recognized programs on four metro Phoenix campuses and at learning centers across the state.

1916: ASU launches business career services

The Department of Commerce first appears in the 1916 course catalog. The commercial employment bureau was specifically created by the Department of Commerce, and was the first unit within ASU to offer career services outside of teaching.

1937: First graduate degree offered

Arizona State Teachers College offers its first graduate degree, a master's in education. Today, ASU's nationally ranked Mary Lou Fulton College for Teaching and Learning Innovation is a leader in teacher education, excelling in both teacher preparation and academic research while creating knowledge, mobilizing people and taking action to improve education.

1945: Arizona State Teachers College becomes Arizona State College

ASC earns authorization to grant bachelor's degrees. Today, ASU offers more than 350 undergraduate degrees and 400-plus graduate degrees across 17 colleges and schools and ASU Online.

1958: The people's choice — Arizona State University

A measure placed on the ballot by citizen initiative recognizes the longstanding efforts to advance the fast-growing college. The measure — Prop 200 — is passed by the state voters by a 2-to-2 margin and results in the college's new moniker: Arizona State University

1984: ASU West campus established

ASU West campus is established by Arizona Legislature as the university's second campus. Located on the western edge of Phoenix, bordering the city of Glendale, today the West campus is home to the New College of Interdisciplinary Arts and Sciences, offers more than 50 undergraduate and graduate degrees across six colleges, and is designated a "Phoenix Point of Pride."

1988: America's first residential honors college

University Honors College at ASU is the first of its kind in the U.S. In 2005, Reader's Digest ranks Barrett, The Honors College as No.1 in the U.S. In 2014, The New York Times recognizes it as "the gold standard" among the country's honors programs.

1994: ASU gains Research I status

The Carnegie Foundation for Advancement of Teaching classifies ASU as a Research I institution. Says ASU President Lattie Coor: "No university in the country has come further, faster than ASU." Today, ASU is recognized by the National Science Foundation as the fastest-growing research university in the U.S., ahead of Harvard, Yale, Duke and others.

1996: ASU Polytechnic campus established

Founded as ASU East, the Polytechnic campus today offers degree programs in interdisciplinary sciences, engineering, management, technology and education, and is home to ASU's aviation programs, including a state-of-the-art flight simulator.

2002: New American University launched

Michael M. Crow becomes the university's 16th president and unveils his vision for a "New American University." Since 2002, ASU has established more than a dozen new transdisciplinary schools and launched large-scale research initiatives and innovative programs in the humanities and social sciences. During Crow's tenure, ASU has nearly quadrupled research expenditures and completed an unprecedented infrastructure expansion.

2005: ASU-Phoenix partner on Downtown Phoenix campus

ASU and the City of Phoenix announce a transformative partnership for the development of the ASU Downtown Phoenix campus, which is approved by a 2-to-1 margin by the city's voters. Opened for classes in 2006, today the campus offers degree programs across seven colleges and schools and is home to the Beus Center for Law and Society.

2014: Thunderbird becomes part of ASU Knowledge Enterprise

The internationally recognized Thunderbird School of Global Management becomes ASU's fifth metro Phoenix campus, combining the strength of a global business-education powerhouse with the resources of the country's most innovative university.

2015: ASU partners with Starbucks, edX for unique degree offerings

Groundbreaking ASU partnerships with Starbucks and edX create unique entry points to an undergraduate degree. ASU unites with edX to create the Global Freshman Academy, a collaboration offering first-year college-level courses for academic credit on the edX platform, dramatically increasing access to higher education for students around the world. With Starbucks, the partnership creates the College Achievement Plan, offering 100-percent tuition coverage for every eligible U.S. Starbucks employee, providing access to and opportunity at a world-class, discovery-oriented university.

2016: A top university for graduate employability

ASU earns top-10 recognition as a leading U.S. university for graduate employability, according to Global University Employability Survey 2016. ASU is designated as "top-tier" recruiting university among the country's top 50 corporations, joining peer institutions like MIT, UC Berkeley, Notre Dame, Purdue and others.

2016: ASU tops U.S. News & World Report list of most innovative schools

ASU is named the most innovative university in the U.S. by U.S. News & World Report. "Most innovative" is a new category for a widely touted set of annual rankings by the news magazine which compares more than 1,500 institutions on a variety of metrics. College presidents, provosts, and admissions deans across the nation nominated up to 10 colleges or universities that are making the most innovative improvements to curriculum, faculty, students, campus life, technology and facilities.

2017: adidas-ASU Global Sport Alliance launches

Combining ASU's world-class resources with adidas' global reach, the strategic partnership aims at shaping the future of sport and amplifying athletics' positive impact on society. Bringing together education, athletics, research and innovation, the Global Sport Alliance will explore topics including diversity, race, sustainability and human potential, all through the lens of sports.

2017: ASU opens young scholars academy

The new home for the Gary K. Herberger Young Scholars Academy at ASU's West campus offers a state-of-the-art teaching, learning and discovery environment for highly-gifted students in grads 7-12.

2018: ASU expands impact in nation's capital

The Ambassador Barbara Barrett and Justice Sandra Day O'Connor Washington Center opens, expanding ASU's presence in Washington, D.C. Located in a historic building just two blocks from the White House, the 32,000-square-foot, eight-story center is the new home to various ASU programs such as the Cronkite News Washington Bureau, the McCain Institute for International Leadership, as well as other think tanks and research facilities.

2018: ASU Uber partnership

Advancing inclusivity and accessibility in higher education, ASU and Uber form a partnership enabling drivers to achieve a degree in entrepreneurship and English language learning with 100% tuition coverage.

2019: Helping heath care companies grow

The Mayo Clinic-ASU MedTech accelerator is established to help companies take their business to the next level. The program offers personalized business development plans to collaborate with Mayo Clinic and ASU, as well as accelerate go-to-market and investment opportunities.

2020: ASU at Mesa City Center breaks ground

ASU breaks ground on ASU at Mesa City Center, a state-of-the-art project that will jump-start the revitalization of downtown Mesa and train students in one of the biggest industries in the United States: media production. The three-story academic building, which is scheduled to open in spring 2022, will offer programs in the Herberger Institute for Design and the Arts in digital and sensory technology, experiential design, gaming, media arts, film production, and entrepreneurial development and support.

2020: State Farm, ASU announce new learning initiative

ASU prepares learners of all ages to succeed in a transformed workplace thanks to a $30 million gift from State Farm. The funding will drive the new State Farm Pathways for the Future workforce-development initiative providing new programs and scholarships to high school and community college students as well as adults in the workforce seeking to update their skills.

2020: ASU introduces fully interactive remote learning modality

To create a seamless, socially responsible classroom experience for the fall 2020 semester, the university rolls out ASU Sync, a technology enhanced, fully interactive remote learning modality that provides in-person instruction for some students, while others interact virtually. By reimagining the learning experience, ASU keeps students fully engaged wherever they are amidst the COVID-19 pandemic.

2023: ASU expands footprint in Los Angeles

ASU adds the ASU California Center Grand building, home to ASU FIDM, the university's fashion program. ASU also welcomes a new independent affiliate college, California College of ASU, offering liberal arts degrees in filmmaking, digital media and fashion.

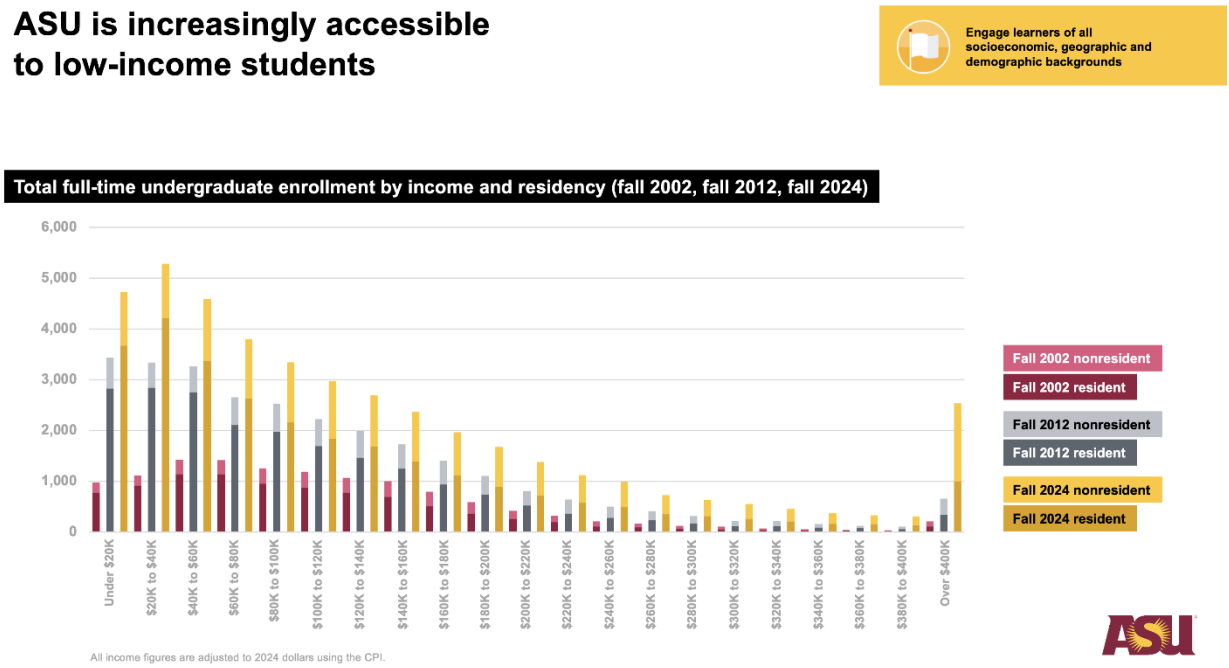
Inclusive excellence

Inclusion at ASU



A promise to whom we include and how they succeed

Embracing our community

Inclusive excellence is a term that reflects Arizona State University's commitment to admitting all students who are qualified to attend the university under the university's admission standards [1] without regard to their race, sex, color, ethnicity or national origin. And, all ASU students and employees are welcome to participate in all ASU programs, groups, and organizations.

The university provides those students with an education at the highest levels of excellence [2] through a faculty of distinguished scholars [3]. Doing so has resulted in the recent invitation for ASU to join the American Association of Universities (AAU) [4] with a student body of more than 80,000 students on ASU's four campuses.

ASU is increasingly accessible to low-income students

A New American University

ASU Charter video on Youtube [5]

A new model [6] for the American research university, creating an institution committed to excellence, access and impact where learning is for everyone [7]. ASU catalyzes human potential, entrepreneurship and research to address society's biggest challenges.

ASU Charter [8]

ASU engages learners of all backgrounds

Hispanic Serving Institution designation

ASU is a proud Hispanic Serving Institution committed to the access, support, and success of Hispanic students and scholars.

Pathways to opportunity [9]

Quick facts

#1 Public University in the U.S. Chosen by International Students [10]
ASU is ranked the top public university in the U.S., and in the top five nationally, chosen by international students, according to the 2022 Institute of International Education Open Doors Report. During the 2021-22 academic year, ASU was home to more than 15,293 international students from more than 158 countries.

Top Producer of Fulbright Awards for 11 Consecutive Years [11]
In 2021, ASU was one of only 10 universities that were top producers of Fulbright awards for both students and faculty, along with New York University, the University of Michigan, The Ohio State University and the University of Pennsylvania.

ASU Named 2022 HSI Leader by Fulbright Program [12]
The State Department Bureau of Educational and Cultural Affairs announced ASU as one of 43 Fulbright Hispanic-Serving Institutions Leaders, from over 400 HSIs nationwide. This honor as a 2022 Fulbright HSI's Institutional Leader recognizes the university's dedication to promoting global engagement and mutual understanding among people and nations.

Indigenous land acknowledgement

Arizona State University acknowledges the twenty-three Native Nations that have inhabited this land for centuries. ASU's four campuses are located in the Salt River Valley on ancestral territories of Indigenous peoples, including the Akimel O'odham (Pima) and Pee Posh (Maricopa) Indian Communities, whose care and keeping of these lands allows us to be here today. ASU acknowledges the sovereignty of these nations and seeks to foster an environment of success and possibility for Native American students and patrons. ASU welcomes members of the Akimel O'odham and Pee Posh, and all Native nations to ASU.

President Crow’s statement to Tribes

Arizona State University is located in Indian Country; there are 22 tribal nations in Arizona. The Tempe campus sits on the ancestral homelands of those American Indian tribes that have inhabited this place for centuries, including the Akimel O’odham (Pima) and Pee Posh (Maricopa) peoples.

In keeping with the design aspirations of the New American University, ASU seeks to embrace our place, connect with tribal communities, and enable the success of each American Indian student. We reaffirm the university’s commitment to these goals and acknowledge that everyone, the entire ASU community, is responsible for their achievement.

ASU continues to develop an impressive cohort of scholars engaged in American Indian cultural, social, educational, legal, and economic issues. We have built world-class programs in American Indian Studies, American Indian Legal Studies, and Indigenous conceptions of justice. Our work, however, is not complete. We must further enhance our capacity to leverage place, transform society, conduct use-inspired research, enable student success, work across disciplines, integrate Indigenous knowledge and engage Indigenous issues globally. We are committed to providing access, retaining and graduating American Indian students in a climate that is welcoming and respectful of their languages and cultures. Foundational to these goals, we commit to creating an environment of success and possibility for American Indian students at ASU.

We are dedicated to supporting tribal nations in achieving futures of their own making. We will partner with tribal nations to: address the ravages of paternalism; improve educational achievement of American Indian children, youth, and adults; create innovative and appropriate use and development of natural resources; conceptualize and implement responses to physical and mental health challenges; and build and strengthen leadership capacities to address challenges for Native nations in the 21st Century and beyond. And we will enhance and foster an environment of success and unlimited possibilities for American Indians at ASU.

This work acknowledges our indisputable recognition of place and reinforces our mission as the New American University.

Michael M. Crow

Academic accreditation

Arizona Board of Regents

The Board’s promise to Arizona

Increase postsecondary access and attainment for Arizona students; to seek solutions to societal challenges; and to do both while increasing quality, affordability and efficiency.

Mission

The Arizona Board of Regents is committed to ensuring access for qualified residents of Arizona to undergraduate and graduate institutions; promoting the discovery, application and dissemination of new knowledge; extending the benefits of university activities to Arizona’s citizens outside the university; and maximizing the benefits derived from the state’s investment in education.

Vision

The Arizona Board of Regents seeks to provide leadership and a unifying voice on key higher education issues and to influence public policy through advocacy and initiatives founded upon evidence based research. Synergies from a unified higher education system will provide access and the highest quality education to Arizona's citizens.

The Arizona public universities provide bachelor's level and higher public education, advance human knowledge through scholarly research and creative expression, and serve key roles as major partners in statewide economic development and community advancement.

History

In 1864, the first Territorial Legislature authorized the establishment of the University of Arizona and provided for the management, direction, governance and control by a Board of Regents. The state colleges, one in Tempe and one in Flagstaff, were governed by a three-member State Board of Education that included the superintendent of public instruction and two members appointed by the governor.

In March of 1945, the governor signed House Bill 136 uniting the governing boards of the university and state colleges of Arizona. The authority of the Board of Regents expanded to include the Arizona State Teachers College at Tempe (since 1958 Arizona State University), and Arizona State Teachers College at Flagstaff (since 1966 Northern Arizona University).

Source URL: https://www.azregents.edu/about/promise-arizona

Regents

The Arizona Board of Regents is the governing board for the state’s public universities: Arizona State University, Northern Arizona University and the University of Arizona. The board provides policy guidance in such areas as: academic and student affairs; financial and human resource programs; student tuition, fees and financial aid programs; university capital development plans; strategic plans; legal affairs; and public and constituent outreach.

The board consists of twelve members, eleven voting and one non-voting. This includes the governor and superintendent of public instruction as ex-officio members, each serving while they hold office, and two student regents.

Except for ex-officio members and student regents, and as noted, the term of a regent is eight years. As regents finish their terms, new regents are appointed by the governor and confirmed by the Senate.

University Program Review and Accreditation Office

Welcome to the University Program Review and Accreditation Office

The University Program Review and Accreditation Office is housed within the Office of the University Provost, and is responsible for ensuring the quality education provided at Arizona State University. We do this through a few branches of work which are outlined below. Please visit our individual web pages to get a more detailed overview of each section.

All Arizona State University academic programs are fully accredited by the Higher Learning Commission.

Verify status here. [1]

Liaison to the Higher Learning Commission

The UPRA Office monitors institutional compliance with Higher Learning Commission [2] policies and assumed practices and coordinates the institutional reviews for continuing accreditation by HLC. UPRA also facilitates HLC approval of program and/or institutional changes when required.

Specialized accreditation oversight

The UPRA Office works closely with academic units and programs that seek new accreditation or seek re-accreditation [3] from external governing bodies. These accreditations ensure our programs adhere to industry and national standards. Our oversight includes coordinating meetings between site visitors and university administrators, reviewing self-studies and briefing papers, collecting site visitor reports and responses to the report, as well as acting as the repository for all accreditation documents.

Academic program review oversight

The Arizona Board of Regents (2-225) requires academic program reviews [4] at least once every seven years. Periodic program reviews provide a mechanism for faculty to evaluate the effectiveness, progress and status of their academic programs on a continuous basis. The UPRA Office is responsible for oversight of program reviews. Our office coordinates

the academic program review process, which covers all program inventory of an academic unit including undergraduate and graduate programs as well as other curricular and co-curricular offerings. The reviews include a review of faculty contributions to the unit, facilities and resources, attention to missions and many other aspects of the unit to ensure continuous quality improvement.

Centers and institutes oversight

ASU is home to various centers and institutes [5] that blend the passions of exceptional teachers and scholars across disciplines. Our centers and institutes address large, complex problems and challenges facing society in hopes of finding solutions and making the world a better place. The UPRA Office provides review oversight for these centers and institutes.

Academic program review

Purpose and guiding principles

The Arizona Board of Regents (2-225 [1]) requires academic program reviews at least once every seven years. Periodic program reviews provide a mechanism for faculty to evaluate the effectiveness, progress and status of their academic programs on a continuous basis. The UPRA Office coordinates the APR process, which is intended to provide a comprehensive assessment of the current status of an academic unit based on its programs, activities and achievements since its last program review, while also providing the unit the opportunity to think strategically regarding its curricular offerings and its future direction. In doing so, the unit:

- Provides comparisons with its peers, identifying strengths and weaknesses in its curricula and pedagogy.
- Assesses student quality and learning outcomes.
- Provides an account of faculty contributions in teaching, research/creative activities and service.
- Assesses resource availability and needs.
- Summarizes special features or services provided by the unit.

An APR enables the unit to build on existing strengths, maximize opportunities for growth and problem solve using innovation.

Those directly responsible for the APR process should familiarize themselves with all parts of the ASU APR Manual [2] and its appendices [3].

Programs with specialized accreditation

Arizona State University programs with specialized accreditation are listed by academic unit.

College of Health Solutions

Accredited programs	Accrediting agencies
BS, Dietetics MS, Nutritional Science with ACEND-Accredited Dietetic Internship	Accreditation Council for Education in Nutrition and Dietetics (ACEND)
MS, Genetic Counseling	Accreditation Council for Genetic Counseling (ACGC)
AuD, Audiology MS, Communication Disorders	Council on Academic Accreditation
BAS, Applied Science	National Accrediting Agency for Clinical Laboratory Sciences

College of Integrative Sciences and Arts

Accredited programs	Accrediting agencies
PhD, Counseling Psychology	American Psychological Association (APA)

Edson College of Nursing and Health Innovation

Accredited programs	Accrediting agencies
BSN, Nursing DNP, Advanced Nursing Practice MS, Nursing	Arizona State Board of Nursing Commission on Collegiate Nursing Education (CCNE) 655 K Street, NW Washington D.C. 20001 Phone: 202-887-6791
MS, Clinical Research Management	Commission on Accreditation of Allied Health Education Programs

Herberger Institute for Design and the Arts

School of Music

Accredited programs	Accrediting agencies
BMUS, Music Therapy MM, Music Therapy	American Music Therapy Association (AMTA)
BA, Music BMUS, Music Learning and Teaching BMUS, Music Therapy BMUS, Performance BMUS, Theory and Composition DMA, Music MA, Music MM, Composition MM, Music Learning and Teaching MM, Music Therapy MM, Performance PhD, Music	National Association of Schools of Music (NASM) accredits Arizona State University for its programs in music.

The Design School

Accredited programs	Accrediting agencies
BSLA, Landscape Architecture MLA, Landscape Architecture	Landscape Architectural Accreditation Board (LAAB)
MArch, Architecture	National Architectural Accrediting Board (NAAB)

BSD, Interior Design MIA, Interior Architecture	Council for Interior Design Accreditation (CIDA)

Ira A. Fulton Schools of Engineering

Accredited programs	Accrediting agencies
BS, Graphic Information Technology	Accrediting Council for Collegiate Graphic Communications, Inc. (ACCGC)
BS, Construction Management & Technology	American Council for Construction Education (ACCE) Applied and Natural Science Accreditation Commission of ABET (ANSAC)
BS, Aeronautical Management Technology	Aviation Accreditation Board International (AABI)
BS, Computer Science BS, Information Technology	Computing Accreditation Commission of ABET
BS, Manufacturing Engineering BS, Software Engineering BSE, Aerospace Engineering BSE, Biomedical Engineering BSE, Construction Engineering BSE, Chemical Engineering BSE, Civil Engineering BSE, Computer Systems Engineering BSE, Electrical Engineering BSE, Engineering BSE, Engineering Management BSE, Environmental Engineering BSE, Industrial Engineering BSE, Materials Science & Engineering BSE, Mechanical Engineering	Engineering Accreditation Commission of ABET

Sandra Day O'Connor College of Law

Accredited programs	Accrediting agencies
JD, Law	American Bar Association (ABA)

The College of Liberal Arts and Sciences

Department of Psychology

Accredited programs	Accrediting agencies
PhD, Psychology (clinical training)	American Psychological Association (APA)
PhD, Psychology (clinical training)	Psychological Clinical Science Accreditation System (PCSAS)

School of Geographical Sciences and Urban Planning

Accredited programs	Accrediting agencies
MUEP, Urban & Environmental Planning	Planning Accreditation Board (PAB)

School of Mathematical and Statistical Sciences

Accredited programs	Accrediting agencies
BS, Actuarial Science	Society of Actuaries

School of Molecular Sciences

Accredited programs	Accrediting agencies
BS, Chemistry	American Chemical Society

Thunderbird School of Global Management

Accredited programs	Accrediting agencies
BGM, Global Management BS, International Trade MA, Global Affairs & Management MALM, Applied Leadership & Management MGM, Global Management	American Association of Colleges and Schools of Business (AACSB) International

Walter Cronkite School of Journalism and Mass Communication

Accredited programs	Accrediting agencies
BA, Journalism BA, Sports Journalism MA, Investigative Journalism MA, Sports Journalism MCC, Mass Communication	Accrediting Council on Education in Journalism and Mass Communications (ACEJMC)

Watts College of Public Service and Community Solutions

Accredited programs	Accrediting agencies
BS, Parks, Recreation & Sport Management BS, Recreational Therapy	Council on Accreditation for, Parks, Recreation, Tourism and Related Professions (COAPRT)
BS, Nonprofit Leadership & Management Master of Nonprofit Leadership & Management	Nonprofit Academic Centers Council (NACC)

School of Public Affairs

Accredited programs	Accrediting agencies
MPA, Public Administration	Network of Schools of Public Policy, Affairs, and Administration (NASPAA)

School of Social Work

Accredited programs	Accrediting agencies
BSW, Social Work MSW, Social Work	Council of Social Work Education (CSWE) Commission on Accreditation (COA)

W. P. Carey School of Business

Accredited programs	Accrediting agencies
BA, Business BS, Accountancy BS, Business Administration BS, Business Data Analytics BS, Business Entrepreneurship BS, Computer Information Systems BS, Economics BS, Finance BS, Management BS, Marketing BS, Supply Chain Management DBA, Global Financial Management MACC, Accountancy MBA, Business Administration MHSM, Health Sector Management MRED, Real Estate Development MS, Business Analytics MS, Economics MS, Finance MS, Global Logistics MS, Information Systems Management MS, Management MS, Supply Chain Management MS, Supply Chain Management & Engineering MSP, Business Administration MTAX, Taxation PhD, Business Administration PhD, Economics	Association to Advance Collegiate Schools of Business (AACSB International)

Student Success Outcomes

Student outcome information, including graduation rates and other measures, is available on the institution's website and the U.S. Department of Education's College Navigator and, for institutions that enroll undergraduate students, College Scorecard.

- Arizona State University Student Achievement Data
- College Scorecard: Arizona State University

- College Navigator: Arizona State University

Note: The College Navigator and College Scorecard links will take you to information about the institution's main campus. Some colleges or universities may report separate information on these websites for certain divisions or branch campuses. Search these sites to find this additional information.

Institutional Characteristics

Please note: All institutions are required to represent themselves accurately and consistently to multiple agencies. Information about the institution that is published by other agencies may appear differently, depending on the timing of the institution's updates to those agencies or those agencies' definitions or standards. For example, an institution's control may be categorized differently by the U.S. Department of Education for other purposes under its standards.

HLC's Notification Program for Additional Locations

Institutions that meet certain eligibility criteria may apply to participate in HLC's Notification Program for Additional Locations. This program allows institutions to open new locations after notifying HLC and receiving confirmation that the location has been added to our records, rather than applying for approval through the standard substantive change process.

Participation Status

The institution participates in the Notification Program for Additional Locations.

About HLC and Accreditation

HLC is an institutional accreditation agency that accredits degree-granting colleges and universities that are based in the United States.

Institutional accreditation validates the quality of an institution as a whole and evaluates multiple aspects of an institution, including its academic offerings, governance and administration, mission, finances, and resources. HLC's accreditation includes all degree levels as well as on-site and online course delivery. Institutions of higher education in the United States may also seek accreditation through specialized or programmatic accreditation agencies, which accredit programs, departments or schools within a college or university.

Evaluation Process

Institutions that HLC accredits are evaluated against its Criteria for Accreditation and other HLC requirements. HLC accreditation assures quality by verifying that an institution (1) meets threshold requirements and (2) is engaged in continuous improvement. In addition, all institutions are required to report data annually in the Institutional Update, undergo annual monitoring of financial and non-financial indicators, and adhere to HLC policies and practices.

The accreditation process is based on a system of peer review. Faculty and staff from institutions of higher education serve as HLC peer reviewers conducting accreditation evaluations for other institutions. They make recommendations to HLC's decision-making bodies, which take final action on institutional evaluations.

Decision Making

HLC's decision-making bodies evaluate and make decisions, called actions, on recommendations from peer reviewers and staff that review institutions for their compliance with HLC's Criteria for Accreditation and other requirements. The decision-making bodies are comprised of institutional representatives and public members. See Decision-Making Bodies and Processes for more information.

Public Information

HLC is committed to providing information to the public regarding accreditation decisions made regarding individual institutions.

Actions that are taken by HLC regarding an institution's accreditation status are disclosed to the public. In cases of reaffirming continued accreditation, placing an institution on or reviewing a sanction, or withdrawing accreditation, the Action Letter issued to the institution is made available on the institution's Statement of Accreditation Status, found by searching the institution's name through HLC's online directory. Public Disclosure Notices (PDNs) are also issued and posted in the directory in cases of sanction, assigning or removing an institutional designation, resignation of accreditation or candidacy, institutional closing or withdrawal of accreditation by HLC. The PDN provides the public with the most applicable information from the posted Action Letter. HLC decision-making outcomes also are summarized on the HLC Accreditation Actions page.

Complaints Against Institutions

HLC has a formal complaint process, consisting of an online complaint form for faculty, students and other parties to submit information regarding a

member institution’s potential non-compliance with HLC requirements. As stated in HLC policy, the complaints process is designed to enable HLC to review, in a timely and fair manner, information that suggests potential substantive non-compliance with an institution's ability to meet HLC requirements.

One university, many places

Arizona State University’s reach supports local and global connections and research engagement.

ASU is committed to delivering high-quality education to the local and global communities it serves.

Arizona State University is "one university in many places" — four distinctive campuses throughout metropolitan Phoenix, as well as locations around the state, country and world. Each provides access to the university's strength and innovation, and all offer attributes and focuses to meet the needs of any learner.

Arizona locations

Phoenix metro-area campuses

Downtown Phoenix campus

State-of-the-art living and learning facilities are found in the heart of Arizona’s capital city.
Woven into the downtown business and professional community, ASU’s Downtown Phoenix campus provides a multitude of academic and professional connections for students preparing for careers in health care, law, government, public service, the arts and sciences, journalism, media, global management and the corporate sector.

U.S. locations

Los Angeles

ASU California Center offers students the opportunity to learn in a global city and gain career experience with employers across Los Angeles.

The ASU California Center, with sites in downtown LA, is home to academic programs in fashion and design, film, nursing, global management, journalism, law, business and executive education. Additionally, cohort-based programs such as ASU Local, [21] provide students earning an online degree with in-person, community-building experiences with peers, professors and mentors. Close proximity and coursework embedded with industry partners across LA enable students learning at the ASU California Center to work alongside professionals in their fields while earning their degree.

ASU in California [22]

ASU Local [23]

Washington, D.C.

ASU's presence in Washington, D.C., is a critical component in a broad institutional effort to create and share knowledge with the power and potential to change the world.

The Barbara Barrett and Sandra Day O'Connor Washington Center expands ASU's presence in the nation's capital, spurring innovative national engagements and partnerships; providing one-of-a-kind learning, teaching and research opportunities; facilitating ASU's participation in high-level idea exchanges; and expanding the impact of groundbreaking research efforts. The center houses ASU Local, ASU academic programs and global initiatives such as the McCain Institute.

ASU in Washington D.C. [24]

ASU Local [25]

Hawai'i

The Center for Global Discovery and Conservation Science leads scientific and technological research focused on climate change.

GDCS-Hawai'i is headquartered in the ASU Pacific Ridge-to-Reef Program, located in a joint facility in Hilo, Hawai'i, that is administered by the U.S. Forest Service. The Hilo facility houses computational and chemical labs, offices, conference rooms, and field operations space. GDCS-Hawai'i is located next to the University of Hawai'i at Hilo, fostering inter-university collaboration across the Hawaiian Islands. GDCS also operates major program elements along the West Hawai'i Island coastline.

ASU Local [27]

International locations

At ASU, we are forging a new role for higher education in the world by engaging with people and issues locally, nationally and internationally. ASU offers opportunities for academic engagement, research and development, and international collaboration in more than 80 countries.

Global at ASU [28]

ASU London

Located in one of the most energetic and eclectic cities in the world, ASU London offers students the opportunity to earn a bachelor's and master's degree in just four years.

ASU London is situated in Islington, central London at the City St. George's Clerkenwell campus, close to some of central London's most iconic landmarks. The area features trendy cafés, live music venues, leafy parks and independent shops. Students here earn a three-year U.K. bachelor's degree in computer science, engineering or business management, then earn their master's degree in the U.S. at ASU.

Locations of record

For the 2026-2027 academic year, Arizona State University offered degree-granting programs at the following locations.

Downtown Phoenix campus
411 N Central Ave
Phoenix, AZ 85004

Polytechnic campus
7001 E Williams Field Rd
Mesa, AZ 85212

Tempe campus
1151 S Forest Ave
Tempe, AZ 85287

West Valley campus
4701 W Thunderbird Rd
Glendale, AZ 85306

ASU at Hainan
Hainan, China

ASU at Los Angeles
1111 S Broadway
Los Angeles, CA 90015

ASU at Mesa City Center
50 N Centennial Way
Mesa, AZ 85201

ASU at Mexico City
Mexico City, Mexico

ASU at The Gila Valley
615 N Stadium Ave
Thatcher, AZ 85552

ASU at Tucson
340 N Commerce Park Loop, Ste 250
Tucson, AZ 85745

ASU at Washington, D. C.
1800 I St NW
Washington, D.C. 20006

ASU at Yuma

Final Exam Schedule [1]
Tuition Deadlines [2]
Financial Aid Calendar [3]
Religious Holidays [4]

ASU regularly offers classes in the fall, spring and summer terms with the following components:

Fall/Spring Session A:
first 7.5-week session
Fall/Spring Session B:
second 7.5-week session
Fall/Spring Session C:
full semester (15 weeks plus final exams)

Summer Session A:
first 6-week session
Summer Session B:
second 6-week session
Summer Session C:
8-week session

If a class is scheduled in a session other than Session A, B or C, the drop/add/withdrawal deadlines are prorated based on the length of the class. Check the calendar icon  next to each class on your schedule in My ASU [5] for the prorated deadline dates.

Fall 2026

Session A: Thursday, 8/20/2026 – Friday, 10/9/2026
Session B: Wednesday,10/14/2026 – Friday, 12/4/2026
Session C: Thursday, 8/20/2026 – Friday, 12/4/2026 (Final Exams 12/7/2026 - 12/12/2026)

Residency

Residency navigator

Use the residency navigator to help determine your eligibility for residency

Residency for tuition purposes

Your residency classification for tuition is determined by Arizona law [1] and ABOR guidelines [2]. Non-residents can request reclassification by submitting a Residency Petition. Use the Residency Navigator and links below to learn more.

Arizona high school graduates who don't qualify as residents may be eligible for a reduced non-resident tuition rate [3].

See also: Arizona Prop. 308. [4]

Requesting residency reclassification

Once you know which petition is best for you, this is what you need to do.

1. Residency Navigator
2. Review requirements
3. Submit your petition

Residency navigator

We've designed this tool to help you determine which residency classification category may apply to you. Using the residency navigator will not have any influence on the outcome of your residency petition. It is not intended to predict whether your petition will be approved or denied.

[Archivist's Note: In-page Residency Navigator tool unable to be captured.]

Residency petitions

There are different paths you can take. Use the info below to determine which is most appropriate for you.

Independent student

Requirements

The independent student petition requires you to:

- Provide proof of domicile and continuous physical presence in Arizona for 12 months
- Provide proof of financial independence
- Overcome the presumption that you are in Arizona primarily to be a student

Read more about this petition. [5]

Request reclassification

Your petition is completed in three steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline. [7]
Step 2: Submit [6] your documents prior to the document deadline [7]
Step 3: Pay [6] the petition fee prior to the document deadline [7]

Deadlines

Don’t miss your deadlines: [7]

- Petition deadline – this is the last day to complete step 1.
- Document deadline – this is the last day to complete step 2 & 3
- Priority deadline – this is the last day to complete steps 1,2, & 3 if you want a decision before classes start.

Dependent student

Requirements

The dependent student petition requires you to:

- Provide proof that you and your parent(s) are domiciled in Arizona and your parent(s) are entitled to claim you as a dependent for tax purposes.

Read more about this petition. [8]

Request reclassification

Your petition is completed in three steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]
Step 3: Pay [6] the petition fee prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2 & 3
- Priority deadline – this is the last day to complete steps 1, 2, & 3 if you want a decision before classes start.

Spouse

Requirements

The spouse petition requires you to:

- Provide proof that you are domiciled in Arizona
- Provide proof that your spouse has maintained domicile in Arizona for 12 continuous months
- Provide proof that your spouse is financially independent
- Provide proof of marriage

Read more about this petition. [10]

Request reclassification

Your petition is completed in three steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]
Step 3: Pay [6] the petition fee prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1.
- Document deadline – this is the last day to complete step 2 & 3
- Priority deadline – this is the last day to complete steps 1,2, & 3 if you want a decision before classes start.

Transferred employee

Requirements

The transferred employee petition requires you to:

- Provide proof that you are domiciled in Arizona
- Provide proof that you were transferred you to Arizona for employment purposes OR provide proof that your spouse was transferred to Arizona for employment purposes
- Provide proof the transfer to Arizona meets the conditions described here.

Read more about this petition. [11]

Request reclassification

Your petition is completed in three steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]
Step 3: Pay [6] the petition fee prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2 &3
- Priority deadline – this is the last day to complete steps 1,2, & 3 if you want a decision before classes start.

Qualifying federal service/military

Requirements

This petition applies if you are member (or the spouse or dependent of a member) of a Qualifying Federal Service who is on active duty for a period of more than 30 days and whose domicile or permanent duty station is in Arizona;
OR
Is a member of the Armed Forces of the United States stationed outside of Arizona pursuant to military orders and claimed Arizona as the service member's legal residence for at least twelve consecutive months;
OR
Is a dependent of a U.S. military member who is using transferred Post-9/11 G.I. Bill (Chapter 33) benefits during a time in which the member of the U.S. uniformed services is serving on active duty of 90 days or more.

Read more about this petition. [12]

Request reclassification

Your petition is completed in two steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

Veteran

Requirements

The veteran petition applies to veterans of the U.S. military and requires you to:

- Provide proof that the veteran was discharged with a character of service of “honorable”, and proof of intent to establish domicile in Arizona.

OR

- Provide proof of active duty of 90 days or more, use of Ch. 30, 31, 33 or 35 educational benefits and proof of intent to establish domicile in Arizona.

The veteran petition applies to dependents and requires the student to:

- Provide proof that the student is using transferred Ch. 30, 31, 33 or 35 benefits and proof of intent to establish domicile in Arizona.

OR

- Provide proof of receiving benefits certified under the Marine Gunnery Sergeant John David Fry Scholarship and proof of intent to establish domicile in Arizona.

Read more about this petition. [13]

Request reclassification

Your petition is completed in two steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

American Indian

Requirements

The American Indian petition applies if you are an enrolled member of an Indian tribe whose reservation land lies wholly or partially in Arizona.

Read more about this petition. [14]

Request reclassification

Your petition is completed in two steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don’t miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline –this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

Teacher

Requirements

The teacher waiver applies if you are currently employed as a full-time teacher or classroom aide in an Arizona public school district, an approved Arizona charter school or an approved Arizona private school.

Teacher waivers are effective only for the semester for which they are submitted. A new teacher waiver petition must be submitted for subsequent semesters.

Read more about the this petition. [15]

Request reclassification

Your petition is completed in two steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don't miss your deadlines: [9]

- Petition deadline –this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

AmeriCorps/VISTA

Requirements

The AmeriCorps/VISTA exception applies if you have served one year in Arizona in either an AmeriCorps or Volunteers in Service to America (VISTA) program.

Read more about this petition. [16]

Request reclassification

Your petition is completed in two steps:
Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don't miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

ROTC/Contracted cadet

Requirements

The ROTC/Contracted Cadet exception applies if you are a contracted cadet participating in a Reserve Officer Training Corp (ROTC) program in Arizona.

Read more about this petition. [17]

Request reclassification

Your petition is completed in two steps:

Step 1: Start [6] and submit your online questionnaire prior to the petition deadline [9]
Step 2: Submit [6] your documents prior to the document deadline [9]

Deadlines

Don't miss your deadlines: [9]

- Petition deadline – this is the last day to complete step 1
- Document deadline – this is the last day to complete step 2
- Priority deadline – this is the last day to complete steps 1 & 2 if you want a decision before classes start.

Questions and answers

Are there any hardship exceptions?
No. Any person requesting classification as a resident for tuition purposes must prove they meet ABOR requirements or that they meet one of the approved exceptions.

Does living in Arizona with a relative other than my parents have any effect on residency status?
No. Your status will be determined based on a review of your situation, but living with family members or friends is not an indicator of intent or domicile and will not influence your status.

How long does it take to review my petition and where can I track its progress?
Average processing time is 4-6 weeks. Petitions submitted closer to the deadline may take longer. If you need a decision prior to the first day of classes, you should submit everything (petition and all required documents) no later than the priority deadline [7]. You can monitor the status of your petition from the residency reclassification application portal [18]. When a decision is made, an email will be sent to your @ASU email address.

I am a continuing student; will my residency automatically change after one year?
No. Your status will remain non-resident and any student wanting to be re-classified must initiate the process by contacting the residency office and submitting a petition by the appropriate deadline. Simply being a student at ASU for one year is not sufficient for residency purposes per ABOR policy, which reads, "No individual has established residency for tuition purposes in Arizona while attending any education institution in Arizona as a full-time student in the absence of objective evidence to the contrary."

I am a dual resident of Arizona; can I be considered a resident for tuition purposes?
No. Any person wishing to be classified as a resident would need to provide objective evidence of intent to be a permanent resident of Arizona and demonstrate that all ties to the former state have been severed.

I am a research assistant, teaching assistant or graduate assistant and have been paying resident tuition. Am I a resident?
No. These positions are funded by waivers submitted by your college or department that pays the out-of-state portion of your tuition and fees; but, your status for residency purposes remains non-resident. To request reclassification, you would need to submit residency petition and appropriate supporting documentation.

I am currently attending a community college in Arizona as a resident; does that make me a resident at ASU?
Not necessarily. Residency for tuition purposes for the three state universities is determined according to guidelines established by the Arizona Board of Regents (ABOR). The community colleges are not governed by ABOR and your classification as a resident at the community college may or may not be in compliance with current ABOR policies.

I attended an Arizona institution using the WUE (Western University Exchange) or WICHE (Western Interstate Commission for Higher Education) program; will I be considered a resident?
The WUE/WICHE program allows residents of a participating state to pay a special, reduced tuition rate at participating institutions in other states. However, the student must maintain residency in the originating state. In other words, by participating as a WUE/WICHE student you are affirming that you are not an Arizona resident. ABOR requirements for physical presence and intent to be an Arizona resident cannot be satisfied as a WUE/WICHE student. Refer to the ASU WUE page for more information.

I indicated that I was an Arizona resident on my admissions application, yet I am classified as a non-resident and was charged the non-resident application fee? How can I fix this?
Your residency classification is determined by a review of all of the information provided on your admissions application in accordance with guidelines provided by the Arizona Board of Regents. Your status as a non-resident is a result of one or more factors used to determine this classification. Please review the Residency Classification [7] web page and contact a residency specialist [19] if you have any questions.

I own property in Arizona; doesn't that make me a resident?
Owning property in Arizona does not automatically qualify you as a resident for tuition purposes. Property ownership is one factor to be considered, but would not be sufficient without other objective evidence of domicile and intent.

I was born and raised in Arizona then left for a short period of time before returning, can I still be classified as an Arizona resident for tuition purposes?
Leaving Arizona will not result in a loss of Arizona residency unless your absence is accompanied by actions that indicate intent to establish a new domicile elsewhere. Former residents of Arizona who established domicile elsewhere would be classified as non-residents upon return and would not be eligible for residency until current ABOR policies are met. Residency classification is re-visited after any break in enrollment or absence from the university.

I'm an ASU employee who is classified as a nonresident for tuition purposes, but am otherwise eligible for the Qualified Tuition Reduction Program. How should I proceed?
Please submit your Qualified Tuition Reduction Form (QTR) [20] to the Student Accounts Office. Once submitted, that office will notify the Residency Office who will adjust your residency status for the term in question.

If I marry an Arizona resident, can I be classified as a resident?
Yes. There is a provision in current ABOR guidelines that would allow you to be re-classified if you marry a resident of Arizona. You would request reclassification by submitting a residency petition and providing appropriate documentation to support that both you and your spouse meet current ABOR guidelines for the spouse exception.

My parent is an ASU alumnus; does it have any effect on my residency classification?
No. Your residency classification is evaluated against current ABOR policy and your parent’s status as an alumnus is not a consideration.

My parents live out-of-state but I attend an Arizona high school; will I be considered a resident if I graduate from an Arizona high school?
No, you would be classified as a non-resident. Per ABOR guidelines, “The domicile of an unemancipated person is that of either parent.” You may, however, qualify for the Non-Resident Tuition Rate for Arizona High School Graduates [3], which is 150% of in-state tuition.

Common residency questions

Still have unanswered questions? Take a look through our frequently asked questions to see if your question is listed there. If not, we're happy to help. [19]

Residency requirements

Student/petition types

There are multiple pathways to establish Arizona residency for tuition purposes. Each pathway has specific requirements outlined below. Selecting the appropriate category is crucial to your application's success, so we strongly recommend reviewing these options thoroughly.

If you can’t decide which is the best fit for you, ask us [1] for help or try using the Residency Navigator [2].

Important update: Following the passage of Arizona Proposition 308 [3], certain non-citizen students may now qualify for in-state tuition rates. Be sure to explore this option if it may apply to you.

How to Petition [4]

Independent student

This petition is best for students who can demonstrate:

- 12+ months of continuous physical presence in Arizona residence with no absences exceeding 30 days.
- Established Arizona domicile through legal and customary ties showing Arizona as your permanent home.
- Financial independence for the past 12 months with supporting documentation.
- Primary purpose for being in Arizona is not education—you moved here to establish residency, not primarily to attend school.

This petition requires objective evidence that Arizona is your home beyond the circumstance of being a student and you are able to support yourself financially.

More information [5]

Dependent student

This petition is best for students who can demonstrate:

- **Arizona domicile** with objective evidence showing Arizona as your permanent home.
- **Parent(s) domiciled in Arizona** with established legal residence in the state and severance of ties to their former domicile.
- **Tax dependency status**—your Arizona-resident parent is entitled to claim you as a dependent on federal and state tax returns (which generally means student is under the age of 24).

This petition for students whose families have established Arizona as their permanent home and who remain financially dependent on their parents.

More information [6]

Spouse

This petition is for students who can demonstrate:

- Married status, but don't qualify as an Independent Student
- Arizona domicile, with objective evidence showing Arizona as your permanent home
- Spouse's established Arizona domicile, for 12+ months with objective evidence showing Arizona as their permanent home.
- Spouse's financial independence, with objective evidence of self-support.

This petition allows married students to qualify for in-state tuition based on their spouse's established Arizona residency and financial independence.

More information [7]

Transferred employee

The petition is for students who can demonstrate:

- Arizona domicile with supporting documentation showing Arizona as your permanent home
- Current employment with a company that transferred you to Arizona for business purposes
- Recent transfer within the last 12 months to Arizona
- Third-party employer—you are not self-employed or working for a family business that didn't previously operate in Arizona
- Employer-directed relocation initiated by and benefiting your employer, not for personal reasons.

This pathway recognizes students whose Arizona residence results from legitimate employment transfers rather than educational purposes.

More information [8]

Qualifying federal service/military

This petition is for students who meet one of the following criteria:

- Active qualifying federal service members on duty 30+ days with Arizona domicile or permanent duty station, plus their spouses and dependent children
- Military members stationed outside Arizona who claimed Arizona as their legal residence for 12+ consecutive months
- Spouses and dependent children of military members stationed outside Arizona where the service member claimed Arizona as their legal residence for 12+ consecutive months
- Military dependents using transferred Post-9/11 G.I. Bill benefits while the service member is on active duty for 90+ days.

This pathway recognizes the unique circumstances of military families and federal service members whose residency may be affected by duty assignments.

More information [9]

Veterans

This petition is for students who can demonstrate:

- Intent to be an Arizona resident with supporting documentation

AND meet one of the following criteria:

- Honorably discharged veteran with discharge papers showing "honorable" character of service

- Veteran using education benefits under Chapters 30, 31, 33, or 35
- Spouse or dependent of a veteran who served 90+ days on active duty and is using Chapters 30, 31, 33, or 35 benefits
- Fry Scholarship recipient receiving benefits under the Marine Gunnery Sergeant John David Fry Scholarship

This pathway honors veterans and their families by recognizing their service and commitment to establishing Arizona residency.

More information [10]

American Indian

This petition is for students who are:

- Enrolled members of a federally recognized tribe whose reservation land is located wholly or partially within Arizona

This pathway recognizes the historical and ongoing connection between Arizona's tribal communities and the state: More information and eligible tribes. [11]

Teacher waiver and AmeriCorps/Vista

This waiver is for students who are:

- Arizona residents with established domicile
- Under contract to work full-time as a teacher or classroom aide in an Arizona public school district, approved charter school, or approved private school

Important details:

- Must reapply each semester—waivers are not automatically renewed
- Allows in-state tuition rates only for teacher certification courses
- Does not change your official residency classification

This waiver supports current Arizona educators pursuing teacher certification while working in the state's schools.

More information [12]

ROTC/Contracted cadet

This petition is for students who are:

- Contracted cadets actively participating in a Reserve Officer Training Corps (ROTC) program at an Arizona institution

This pathway recognizes students committed to military service through their participation in Arizona ROTC program.

More information [13]

AmeriCorps/VISTA

This petition is for students who have:

- **Completed one full year of service** in Arizona through either an AmeriCorps or Volunteers in Service to America (VISTA) program

This pathway recognizes the commitment of volunteers who have dedicated a year of service to Arizona communities.

More information [14]

Freely Associated States

Effective July 1, 2024: Citizens of the Freely Associated States are eligible for in-state tuition rates.

Eligible countries:

- Federated States of Micronesia
- Republic of the Marshall Islands
- Republic of Palau

Contact the Residency Classification Office [1] for additional information about this exception.

Residency guidelines

How residency classification works

Your initial residency classification is determined automatically when you apply for admission, based on multiple factors from your application and guidelines established by the Arizona Board of Regents (ABOR). [15]

Residency petition process

To request reclassification: Submit a residency petition with supporting documentation. You are responsible for providing objective evidence that proves you meet the requirements for in-state tuition rates.

Eligibility: Only current, admitted, term-activated students classified as non-residents can submit petitions through the residency petition dashboard.

Required steps:

1. Complete the online questionnaire [16] before the petition deadline
2. Submit your supporting documents [16] before the document deadline
3. Pay $50 petition fee [16] before the document deadline (when applicable)

Critical information

Deadlines

Missing any deadline [17] forfeits your right to request reclassification for that semester.

Documentation requirements

Required documents are determined by your questionnaire responses. Petitions lacking sufficient objective evidence will be denied. Statements of intent do not constitute adequate proof.

Student presumptions

All petitions are evaluated against four presumptions:

1. Non-resident students are in Arizona primarily for education, not to establish domicile
2. Individuals cannot establish residency while in Arizona primarily for education
3. Full-time students cannot establish residency for tuition purposes while enrolled
4. Residency decisions are typically made after completing education

Burden of proof

Students must provide documentation proving eligibility for in-state classification. Verbal testimony and statements of intent carry limited weight given the financial benefit of reclassification.

Fees

$50 non-refundable petition fee applies to independent, dependent, spouse, and transferred employee petitions. Military, Veteran, ROTC, American Indian, AmeriCorps/VISTA, and Teacher Waiver petitions are fee-exempt.

Processing

Average processing time is 4-6 weeks. Submit your petition before the priority deadline if you need a decision before classes begin.

Petition status tracking

Monitor your petition through the petition dashboard [16]. Status updates include:

- In queue: Ready for review
- Documents needed: Additional documentation required
- Contact residency: Office needs to speak with you
- Pending: Under secondary review
- In review: Decision forthcoming within 7-10 days
- Approved/Denied: Final decision rendered

Important: All correspondence will be sent to your ASU email address. Check your email regularly and respond promptly to any requests.

Important policies

Integrity

Misrepresentation or falsification may result in disciplinary action, including dismissal or forfeiture of reclassification rights.

Financial

You remain responsible for non-resident tuition rates until your reclassification is officially approved. If applicable, refunds will be issued, but late fees and payment plan charges are non-refundable.

Financial aid impact: Residency changes may affect your financial aid eligibility, potentially reducing future awards or requiring repayment of funds already received.

Committee review

If your petition is denied, you may request review by the Residency Review Committee [18] within the specified deadline.

Special circumstances

International students

Students with visas requiring foreign domicile or prohibiting Arizona domicile establishment cannot qualify for resident classification. Please see visa types and residency eligibility list [19] for additional information.

Online students

Use the ASU Tuition Estimator [20] to see how residency classification and enrolled credits affect tuition.

Out-of-state campuses

Students at ASU locations outside Arizona must demonstrate Arizona domicile to qualify for resident status.

Residency documentation

Documentation is essential for your petition's success. Once you submit your online questionnaire, we'll generate a personalized list of required documents based on your specific situation. This tailored list will appear on your residency petition dashboard [1] – we need to understand your unique circumstances first before we can tell you exactly what documentation will support your case.

Quick tips:

- One file per document - Upload your driver's license, voter registration, etc. as separate files
- Multiple files for series - Bank statements should be uploaded individually (e.g., 12 separate monthly statements)
- Add descriptions to clarify what you're submitting; use descriptive file names instead of generic or cryptic names (your evaluator will appreciate this)

Important reminders:

- Missing or incomplete documents increase the likelihood that your petition will be denied and will delay your decision.
- If you can't provide something, explain why but also understand that personal statements carry much less weight than objective evidence.
- You can upload and save documents on the petition dashboard, but nothing is sent until you click the "submit" button. Once submitted, documents cannot be removed.

Accepted file types:

BMP, .CSV, .DOC, .DOCX, .JPEG, .JPG, .PDF, .PNG, .RTF, .TIF, .TIFF, .TXT, .XLS, .XLSX

Need help?

Use our upload guide [2] or contact us.

Petition fee

- Pay your petition fee, if applicable, via the Residency Petition Dashboard. [1]
- Your petition won't be reviewed until payment is complete.
- The Residency Office cannot accept payments in person or by mail.

Petition guides

Document requirements vary by petition type. Use the guides below to see what is typically requested. Your list of required documents will be unique to you and dependent your answers.

$50 fee required

Independent Student [3]
Dependent Student [4]
Spouse of an Arizona Resident [5]
Transferred Employee [6]

No fee

Qualifying Federal Service/Military Exception [7]
Veteran Exception [8]
American Indian Exception [9]
Teacher Waiver [10]
AmeriCorps/VISTA Exception [11]
ROTC/Contracted Cadet [12]

Additional information

Processing & timeline:

- Petitions are reviewed in the order they're completed.
- Petitions submitted at or near the deadline take longer to review.
- Submit as early as possible for faster processing.

Documentation requirements:

- Provide all required documents—if something is unavailable, submit a written explanation
- Documents must be clear and legible; if we can't read it, we can't use it.
- Redact sensitive information (like Social Security numbers) before uploading
- We will verify document authenticity and may conduct additional research

Review process:

- We consider your entire academic record, including your application for admission and financial aid information
- Additional documents or explanations may be requested
- You bear the burden of proof—it's your responsibility to provide supporting evidence

Privacy & retention:

- All documents are retained per university requirements and kept confidential as required by law

Residency deadlines

Deadlines are critical and missing a deadline can have significant consequences. Refer to the information below to ensure your petition is submitted in a timely manner.

Petition deadline

This is the most important deadline. Don't miss this deadline.

Failure to submit your petition by this deadline waives your right to petition for this semester. No exceptions or appeals are granted for missed deadlines.

- Fall 2026: Aug 26, 2026
- Spring 2027: Jan 17, 2027

Document deadline

All supporting documentation and applicable fees must be submitted by this date. Incomplete petitions will be withdrawn.

- Fall 2026: Sep 9, 2026
- Spring 2027: Jan 31, 2027

Petition availability

Petitions are only accepted during this time-frame for each semester

- Fall 2026: Feb 5, 2026 - Aug 26, 2026
- Spring 2027: Sep 10, 2026 - Jan 17, 2027

Only admitted, term-activated non-resident students may submit petitions. The petition is part of the student record and is not available to parents, spouses, or other third parties.

Priority deadline

Complete petitions with all required documents submitted by this date will be reviewed before the tuition payment deadline.

If you need an early decision, submit everything prior to this deadline

- Fall 2026: June 1, 2026
- Spring 2027: Nov 1, 2026

All dates subject to change.

Submission timing

Submit your petition as early as possible but only after meeting all stated requirements. Submitting before requirements are met may result in your petition being denied or your decision being delayed.

Processing time

Average processing time is 4-6 weeks, depending on petition type and quality of submitted documentation. Petitions submitted after the priority deadline often take longer to review and may not be completed before classes begin.

Source URL: https://registrar.asu.edu/residency-deadlines

Residency petition committee review

Overview

If the Residency Office denied your petition, you may request a committee review under ABOR 4-205 [1] to present additional evidence supporting your resident status claim. Committee decisions are final.

Deadline

You must file within 35 days after the last day of registration for the term in question. Missing this deadline waives your review rights, making the Residency Office's decision final. Your decision summary [2] includes the specific deadline date.

Submitting your request

Prerequisites: Your petition must have been denied by the Residency Office. Review your decision summary [2] and current ABOR guidelines [1] to understand why you were denied before submitting.

Required steps:

1. Complete the Residency Petition Committee Review Request [3] form (includes detailed instructions)
2. Follow instructions to upload additional documentation within 7 days to ensure adequate committee review time

Scheduling process

Timeline and logistics

- Hearings are scheduled based on request receipt date (first-come, first-served)
- You'll receive notification at least 7 business days before your hearing
- Hearings occur on weekdays via Zoom, including during semester breaks
- Efforts are made to accommodate your class schedule, but Committee availability is limited and cannot be guaranteed.
- Schedule change requests must be submitted in writing at least 3 business days before your hearing

The review hearing

Format

- Conducted via Zoom with a non-voting university host
- 3-5 voting committee volunteers from the University community
- 30-minute time limit
- All hearings are recorded per ABOR policy

Committee process

Members will review your complete petition file and ask questions specific to your circumstances. They must follow ABOR guidelines and cannot grant exceptions.

Your participation

Attendance is preferred but optional. If you don't attend, the hearing proceeds in absentia based on available documentation—these cannot be rescheduled. You may bring witnesses or legal representation; notify the Residency Office in advance if bringing an attorney.

Decision

Voting and timeline

- Decision requires a majority vote to overturn the denial
- Tie votes uphold the original denial
- Decision made either immediately or within 10 business days
- Written notice sent to your ASU email address

Outcomes

If Approved: Tuition will be adjusted and/or refunded for the applicable term.

If Denied: The decision is final with no further university appeals available. You may seek judicial review in state courts (see ABOR 4-205).

Important reminders

- A scheduled review doesn't exempt you from other deadlines or obligations
- You must still submit new petitions for future semesters if needed
- Review all documentation thoroughly before your hearing—this is your final opportunity to present your case

Tuition and fees

ASU tuition

How do I pay for college?

You can pay for college in a variety of ways, but one of the most important is with financial aid.

Top 10 in the U.S. for Best Colleges for Your Tuition Dollars
ASU ranks No. 8 in the U.S. among public universities in the Best Colleges for Your Tuition (and Tax) Dollars ranking, ahead of UCLA, Wisconsin and Illinois. – Washington Monthly, 2025

More than 45%
More than 45% of ASU students graduate debt-free.

What is tuition?

Tuition is what you pay to attend classes and earn your degree. When you hear someone say, “Tuition is $12,000 dollars,” that usually means it is $12,000 for the entire year (i.e., fall and spring semester — summer sessions tuition is usually additional). Along with tuition costs, students usually have to pay other fees. These can include athletic, lab and technology fees. Your tuition does not include certain things like your books, campus housing and food. Find a personalized tuition estimate based on your information, degree choices and residency by using the tuition estimator.

How much is ASU tuition?

Everyone's tuition differs depending on a number of factors such as what you study, how much financial aid you get, whether you live on campus and more.

Most students at ASU take advantage of financial aid. Using the tuition estimator tool, select the category that fits you best to find an estimate of how much tuition will cost for you at ASU without financial aid and before other cost reductions.

Tuition estimator [4]

Important dates

Aug 25

Fall tuition & fee payment deadline
For registration through August 18.

Aug 26

Fall tuition & fees refund deadline - Session A
Tuition and certain registration fees are subject to a 100% refund through August 26, 2026 for Session A classes. Tuition and fees are non-refundable thereafter and students are required to pay all tuition and fees for drops and withdrawals after this date. Certain registration fees are non-refundable on or after the first day of the semester. For additional information, please see the Tuition Refund Policy. [5]

Sep 2

Tuition & fees refund deadline - Session C
Tuition and certain registration fees are subject to a 100% refund through September 2, 2026 for Session C classes. Tuition and fees are non-refundable thereafter and students are required to pay all tuition and fees for drops and withdrawals after this date. Certain registration fees are non-refundable on or after the first day of the semester. For additional information, please see the Tuition Refund Policy. [5]

Sep 3

Automatic ASU payment plan enrollment - Fall 2026
Students who registered through August 18 and who have unpaid tuition and other eligible payment plan charges will be billed the ASU Payment Plan fee and automatically enrolled in the ASU Payment Plan. [6]

Sep 25

Tuition and fee payment deadline
For registration between August 19 and September 18

Definitions of ASU tuition costs and fees

As an ASU student, you will pay tuition (the cost of taking your classes) and fees (a charge for the use of something like technology or the gym). Your tuition and fees will differ from other students based on a variety of factors.

What are the tuition and fees at ASU?

ASU tuition costs vary on a number of things, the biggest being whether you are a resident or nonresident of Arizona. To determine your tuition and fees, visit our Tuition Estimator. [1]

ASU fees also vary by student type, but there are some fees, such as the athletics fee, that all students are required to pay. (But by paying it you get to attend all ASU Athletics events. Go Devils!) View a complete list of ASU fees. [2]

Types of ASU tuition

Resident tuition

Students who have established that they are Arizona residents for tuition purposes typically attend college at a lower rate than out of state students. Students are asked to prove their residency status by meeting certain criteria. [3]

Nonresident tuition

Students who are not residents of Arizona will pay an out of state tuition rate. Some non-resident students may be eligible for reduced tuition through programs such as the Western Undergraduate Exchange. [4]

International tuition

As an international student, you'll pay ASU for tuition and fees. Housing and food, books, course materials, supplies, and equipment, transportation, and personal expenses will vary. Learn more about tuition as an international student. [5]

Online tuition

Online tuition and fees are closely aligned with campus tuition and fees, and ASU doesn’t have out-of-state tuition for online students. Exact tuition costs will depend on your program, transfer credits and course load. Learn more about ASU Online tuition. [6]

Common ASU fees

Colleges charge students various fees to support certain programs that in turn support students. These fees vary depending on the college. Read on for some examples of ASU student fees. This is not a complete list of ASU student fees, but is intended to give you an idea of what they are and what they're for.

- Recreation fee ($28) to support programs and services at the Sun Devil Fitness Complex.
- Student Service Facility fee ($100) to build and refurbish common student spaces.
- Student Programs fee ($35) for programs that support the student experience.
- Health and Wellness fee ($80) for health and counseling services.
- Student Athletic fee ($100) to support Sun Devil Athletics (and get free tickets in return).
- College and school fees - These fees vary depending on your college. Check with them for more details.
- Surcharge fee - This protects the university's ongoing financial health following the $24 million cut to ASU's budget enacted by the state legislature and governor of Arizona.

See a complete list of fees [2]

How can I find out how much my tuition will be?

1. Identify which ASU degree you want to earn.
2. Determine whether you are an in-state resident, or if you are an out-of-state, or international student.
3. Determine your general costs by using the tuition estimator [7] and list of common fees. [2]
4. Explore your financial aid options.
5. Receive an estimate of how much financial aid you can apply to tuition costs.
6. Existing students will receive monthly eBills on My ASU.

Qualified tuition reduction program

The Qualified Tuition Reduction Program permits eligible employees to take advantage of educational opportunities at the University.

For additional information
Please review SPP 505 [1], Employee-Reduced In-State Tuition, for additional information regarding eligibility and benefits.

Qualified tuition reduction program eligibility

Reduced in-state tuition is available to faculty and staff who are employed at least 50% within the state university system, their spouses and dependent children. You must be employed on the first day of the session to be eligible for employee reduced in-state tuition. At ASU, the Qualified Tuition Reduction Form must be submitted on or before the first day of a session to qualify for reduced tuition.

Institutional merit-based aid provided by the University [1] will not exceed the value of stated resident tuition for each respective academic year when combined with the Qualified Tuition Reduction (QTR, a benefit for faculty and staff) or other tuition reduction programs (or waivers). Students offered multiple awards designated for base tuition, cannot receive more than 100% of base tuition. For questions regarding how your qualified tuition reduction benefit may impact your other financial aid awards, please contact Financial Aid. [2]

Additional information

Qualified tuition reduction form(s)

ASU employees must complete and submit the Qualified Tuition Reduction Form each semester to receive the reduced in-state tuition benefit for classes taken at ASU, University of Arizona and Northern Arizona University. Forms can be signed and submitted electronically utilizing Adobe Sign. Forms can be obtained online [4] and will be routed accordingly to Student Business Services for review and processing upon electronic signature by the employee. Please allow 3-5 business days before your qualified tuition reduction benefit will be reflected on your ASU student account. Forms should be submitted prior to the first day of classes and early to ensure timely processing. The outstanding balance of the ASU tuition will remain on your student account and should be paid by the tuition payment deadline to avoid late fees.

NAU and U of A Classes; ASU retirees

Please note there is a separate qualified tuition reduction form for classes at U of A or NAU and for ASU retirees taking classes at U of A, NAU or ASU. The qualified tuition reduction form for U of A/NAU/Retiree staff must be approved by staff in ASU Human Resources and then will be forwarded accordingly to the tuition payment office at the campus where classes are being taken.

Affiliate organizations

Employees of ASU affiliate organizations are also eligible for the qualified tuition reduction benefit upon verification of their employment with the affiliate organization. A different form is necessary for employees of ASU affiliates. Upon submission of the form, ASU Student Business Services will verify employment with the applicable affiliate contact and, when confirmed, will apply the tuition reduction benefit. Due to the additional verification involved, please allow 7-10 business days for your benefit to be reflected on your ASU student account.

All forms are available on the CFO website [5] along with additional information about the qualified tuition reduction benefit. For questions or for employees preferring to manually sign their qualified tuition reduction form, please contact Student Business Services at tuitionreduction@asu.edu.

Implementation of Arizona Proposition 308

What is Prop. 308?

Arizona Proposition 308 is a legislative referral that was on the November 2022 ballot. Voters passed Prop. 308, and it became effective Dec. 5, 2022, after the election results were certified and proclaimed to be law by Governor Ducey. The Arizona Board of Regents approved Prop. 308 for implementation on Dec. 13, 2022.

With the passage of Arizona Prop. 308, some students who qualify as noncitizens may be eligible for an in-state college tuition rate. Students will be notified via email of any impact to the status of their tuition. Arizona State University is currently reviewing how Prop. 308 will impact ASU financial aid eligibility criteria.

Understanding Proposition 308: frequently asked questions

What does Prop. 308 do?

Prop. 308 made two significant changes to Arizona law.

First, with the passage of Prop. 308, a qualifying non-citizen student, with statutorily defined exceptions [1], is eligible for in-state resident tuition at state universities and community colleges if the student both:

1. Attended an Arizona public or private high school, or homeschool for a minimum of two years; and
2. Graduated from an Arizona public or private high school, or homeschool equivalent, or obtained an Arizona high school equivalency diploma, e.g., a general equivalency diploma (GED).

Second, Prop. 308 repealed A.R.S. § 15-1825, and now non-citizen students are eligible to receive financial aid funded in whole, or in part, with state monies, regardless of immigration status.

In-state tuition and Prop 308

Who qualifies for in-state tuition under Prop. 308?

A qualifying noncitizen student, other than the nonimmigrant aliens described under 8 U.S. Code § 1101(a)(15), are eligible for in-state tuition under Prop. 308, regardless of immigration status, if the student meets both of the following criteria:

1. The student attended any public or private high school or homeschool equivalent while physically present in Arizona for at least two years; and
2. The student graduated from any public or private high school or homeschool equivalent in Arizona or obtained a high school equivalency diploma in Arizona a, i.e., a GED.

Do the two years of physical presence in Arizona while attending high school need to be consecutive?

No. Students do not need to have two years of consecutive presence. However, to be eligible, they still must provide documentation that they both:

1. Attended any public or private high school option or homeschool equivalent while physically present in Arizona for at least two years; and
2. Graduated from a public or private high school option or homeschool equivalent or obtained a high school equivalency diploma in Arizona.

Will students with visas be eligible for in-state tuition?

Nonimmigrant aliens described under 8 U.S. C. § 1101(a)(15) are not eligible for in-state tuition under Prop. 308. This includes, but is not limited to, students who hold F1, F2, J1, H4 or H1 visas. For a complete list, please look at 8 U.S. C. § 1101(a)(15).

Nonimmigrant aliens described under 8 U.S. Code § 1101(a)(15) are not eligible for in-state tuition under Prop. 308.

Do the qualifying noncitizen students eligible for in-state tuition under Prop. 308 also need to prove domicile under A.R.S. § 15-1802?

No. A qualifying noncitizen student will pay in-state tuition if they meet the requirements of A.R.S. § 15-1803(B):

1. The student attended any public or private high school or homeschool equivalent while physically present in Arizona for at least two years; and
2. The student graduated from any public or private high school or homeschool equivalent in Arizona or obtained a high school equivalency diploma in Arizona, i.e., a GED.

When will these qualifying noncitizen students be eligible to receive in-state tuition?

Prop. 308 became effective Dec. 5, 2022, after the election results were certified, and proclaimed to be law by Governor Ducey. ASU will begin to apply it toward the spring 2023 semester.

Are current qualifying noncitizen students eligible for in-state tuition?

Yes. Students who meet the requirements of Prop. 308 are eligible for in-state tuition for any semester that starts after Dec. 13, 2022. Prop. 308 does not have a retroactive effect, so students will not be reclassified for semesters that began prior to Dec. 13, 2022.

What should I do if I have questions about my residency status?

Please contact a team member at residency@asu.edu about your ability to qualify for in-state tuition under Prop. 308.

Financial Aid and Prop 308

How does Prop. 308 impact eligibility for financial aid?

Prop. 308 repealed an Arizona law (A.R.S. § 15-1825) that prohibited students who were not citizens of the United States and who were “without lawful immigration status” from receiving financial assistance subsidized or paid in whole, or in part, with state monies, such as tuition waivers, fee waivers, grants, scholarships, and any other type of financial aid or assistance.

With the passage of Prop. 308, all students – regardless of immigration status – may be eligible to receive financial aid paid in whole or in part with state monies to attend an Arizona public university or an Arizona community college. While Prop. 308 eliminated barriers to eligibility for financial aid based on immigration status, a student must still meet all other requirements of the state financial aid they are seeking.

To be eligible for state financial aid, a student does NOT need to meet the Arizona high school attendance or graduation criteria. That applies only to eligibility for in-state tuition.

Prop. 308 does not impact the eligibility requirements to receive federal financial aid.

When the law takes effect, are students who are eligible for in-state tuition under Prop. 308 also eligible for the Arizona Promise Program?

No. To qualify for the Arizona Promise Program, a student must meet all the eligibility requirements under A.R.S. § 15-1701. One requirement of the Promise Program is that a student must qualify for a Pell Grant, which is federal need-based financial aid. Aliens without legal immigration status, who are not citizens or legal permanent residents, do not qualify for federal financial aid. More information about the Arizona Promise Program, including eligibility requirements, is available at: www.azregents.edu/programs/arizona-promise-program. [2]

Students impacted by Prop. 308 may be eligible for other state or college financial aid , in addition to private scholarships.

What other scholarships are the students impacted by Prop. 308 now eligible to apply for?

ASU offers a number of financial aid opportunities, including merit scholarships and need-based aid. Students who meet the requirements of ASU scholarships and financial aid programs are now eligible to receive them, regardless of

immigration status. For additional information, visit the New American University scholarship page [3] or use the first-year merit scholarship estimator. [4]

Should the students who are impacted by Prop. 308 complete the FAFSA application?

Any student who wants to apply for financial aid and who can complete the FAFSA, should complete the FAFSA. However, a student must have a Social Security number to complete a FAFSA application and some of the students who are impacted by Prop. 308 may not be eligible to complete the FAFSA. Students can visit ssa.gov/pubs/EN-05-10009.pdf [5] for more information on how to obtain an SSN.

CSS Profile: CSS Profile [6] is an online application used by colleges to award nonfederal institutional aid. The tool helps us determine eligibility and understand your specific financial situation. CSS Profile is available to qualifying domestic noncitizens who are unable to complete the FAFSA. ASU's CSS Code is 4007.

Please note: If you are eligible to submit the FAFSA, do not submit a CSS Profile application.

Have questions?

Please contact a team member at residency@asu.edu about your ability to qualify for in-state tuition under Prop. 308.

Tuition and fee descriptions

What are ASU tuition and fee descriptions?

ASU tuition and fees are approved annually by the Arizona Board of Regents.
In addition to resident and nonresident tuition, commonly billed tuition and fees include:

Differential tuition and program tuition

Certain colleges and programs assess additional differential and program tuition as approved by the Arizona Board of Regents. Visit the Tuition and Fees Schedules [1] for college and program specific tuition and fees.

Undergraduate College Fee 1-5

The Undergraduate College Fee is assessed based on a student's program of study. *Effective for fall 25, programs will be categorized in one of five categories. ASU conducted a comprehensive review of all instructional costs for every program. Programs of study with similar costs were grouped together, and those fees were averaged to determine an amount of each category. Please note that some programs of study are categorized differently based on a student's online or immersion status. *Visit the Tuition Estimator [2] to determine your Undergraduate College Fee.

	Online	Immersion
Undergraduate College Fee 1	College of Nursing and Health Innovation BSN Non Degree	Mary Lou Fulton Teachers College Integrative Sciences and Arts: Humanities and Social Sciences New College and Interdisciplinary Arts and Sciences: Humanities and Social Sciences
Undergraduate College Fee 2	Herberger Institute for Design and the Arts The College of Liberal Arts and Sciences: Humanities and Social Sciences Integrative Sciences and Arts: Humanities and Social Sciences New College of Interdisciplinary Arts and Sciences: Humanities and Social Sciences University College: Humanities and Social Sciences	The College of Liberal Arts and Sciences: Humanities and Social Sciences Watts College of Public Service and Community Solutions Integrative Sciences and Arts: Sciences New College of Interdisciplinary Arts and Sciences: Sciences School of Global Futures University College
Undergraduate College Fee 3	Mary Lou Fulton Teachers College The College of Liberal Arts and Sciences: Sciences College of Public Service and Community Solutions Integrative Sciences and Arts: Sciences New College of Interdisciplinary Arts and Sciences: Sciences School of Global Futures University College: Sciences	College of Health Solutions
Undergraduate College Fee 4	Thunderbird School of Global Management College of Health Solutions Walter Cronkite School of Journalism and Mass Communication	Walter Cronkite School of Journalism and Mass Communication Thunderbird School of Global Management Herberger Institute for Design and the Arts The College of Liberal Arts and Sciences: Sciences
Undergraduate College Fee 5	College of Nursing and Health Innovation W.P. Carey School of Business Ira A. Fulton School of Engineering	College of Nursing and Health Innovation W.P. Carey School of Business Ira A. Fulton School of Engineering

*Prior to fall 25, undergraduate college fees were categorized in one of four categories. To determine undergraduate college fee rates prior to fall 25, visit the Tuition Estimator. [3]

Advanced Technology Fee

The Advanced Technology Fee assessed to students provides access to artificial intelligence tools and platforms and other technologies, immersive learning experiences, and personalized digital services to enhance instruction and academic support and prepare students with industry-relevant skills.

Graduate Student Support Fee

The Graduate Student Support Fee helps fund resources and services that support graduate students, including technology resources and services, instructional and laboratory expenses in departments and schools, and graduate student services.

Special Class, Hybrid, oCourse, iCourse fees

Special Class, Hybrid, oCourse and iCourse fees are assessed based on enrollment in specific classes. These fees are published with each class through Class Search. [4]

Late registration fee

All students who register beginning the week before the first day of the semester will be assessed a late registration fee of $50.00, with the exception of students enrolling only in late start sessions. Students enrolling exclusively in late start sessions, will be assessed the late registration fee beginning one week before the session start date. Please see Tuition Deadlines [5] for specific dates. Registration after the published deadline may be permitted under extraordinary circumstances if approved by an authorized College designee. Late fees are not refundable.

**The College of Nursing and Health Innovation post-bac BSN will continue to maintain a separate fee. All other nursing programs will be in Undergraduate College Fee 3

Excess hours tuition

The Arizona Legislature enacted legislation in 2005 (A.R.S. § 15-1626) that establishes credit hour thresholds for undergraduate students who attend a public university in Arizona. Undergraduate students who enroll for credit hours beyond the applicable threshold are required to pay an Excess Hours Tuition Surcharge. Students who have more than 145 credit hours will be assessed the Undergraduate Excess Hours Tuition Surcharge.

See exemptions [6]

Surcharge fee

On Sept. 16, 2024, Arizona State University announced [7] that a tuition surcharge will be implemented in the spring 2025 semester. The surcharge, as well as other related actions taken by ASU, protects the university's ongoing financial health following the $24 million cut to ASU's budget enacted by the state legislature and governor of Arizona.This surcharge for the 2024–2025 academic year will be based on spring 2025 enrollment and added to the spring 2025 semester bills of undergraduate and graduate campus immersion students. It will be posted to My ASU beginning in late November.

- If you are taking fewer than seven credit hours in spring 2025, you will see a charge of $50 per credit hour.
- If you enroll in seven or more credit hours in spring 2025, you will see the maximum charge of $350 per semester.

There will be no surcharge added to summer sessions. ASU will continue to pursue restoration of state funding that would allow for the elimination of this tuition surcharge. Until state leaders act to restore funding, students should plan for assessment of the tuition surcharge, including in the 2025–2026 academic year.

Please note:

- Students in the Obama Scholars, Arizona Promise and College Attainment Grant programs will see the tuition surcharge on their bill, but will receive additional funds to cover the surcharge.
- Students QTR waivers and RA/TAs will see the tuition surcharge, but will receive additional funds to cover or reduce the surcharge amount.

Student Initiated Fee

ASU's student government leaders, on behalf of the students they represent, sought and received ABOR approval for the following Student Initiated Fees. Funding from these fees will be used to enrich the student experience.

Recreation Fee

The Recreation Fee of $28.00 for the fall semester and $27.00 for the spring semester supports programs and services at the Sun Devil Fitness Complexes. Additionally, these funds are used to provide support for programs/services like intramural sports and activities, a broad array of fitness classes, aquatics programs, instructional classes, and health education workshops, events and programs. It also supplements student employment opportunities for over 500 on-campus student positions. There is an advisory board that provides routine feedback on services, hours and programs to

support guidance for overall student well-being. Students interested in serving on a Sun Devil Fitness Advisory Board are encouraged to apply. [8]

Student Service Facility Fee

Students pay $100.00 per semester to a combined fund which is then utilized to build and refurbish student spaces such as Memorial Union, Sun Devil Fitness Complexes, etc. The Student Service Facility Fee allows for the enhancements of existing facilities and the planning and development of new student service facilities to meet the needs of a growing student population. For further information on facilities supported by this fee click here [9]. Students interested in serving on the Facility Fee University Board to participate in discussions on these building projects are encouraged to apply. [8]

Student Programs Fee

The Student Programs Fee funds student programming initiatives. Per semester, undergraduate campus immersion students pay $35, undergraduate digital immersion students pay $17, and graduate digital and campus immersion students pay $35. Managed by the student government at each location, this fee is used to create programming that supports the student experience, student needs and interests. Recipients of the programs fee funding include: include: Programming and Activities Board (PAB) [10], Clubs and Organizations [11], Sports Clubs [12], Council of Coalitions [13], and the Childcare Subsidy [14]. In addition to these, each USG and GPSA also uses this fee to help support professional development, travel funding to support research and attend conferences, and large scale student programs and activities- to apply for these funding opportunities visit your student government website [15]. For detailed information about each student government's budget please visit this website [16]. To provide feedback or ask questions about the fiscal budget please reach out to your respective Student Government President [17].

Health and Wellness Fee

Students pay $80.00 per semester to the Health and Wellness Fee supplement the operation of ASU Health and Counseling Services. Funding supports a portion of the operating budget for medical and psychological services and health education and promotion. The Health Services Advisory Board provides routine feedback to the Director of Health Services on services provided, quality and efficiency of care, new innovations, and student needs. Students interested in serving on the Health Services Advisory Board are encouraged to apply [8].

Student Athletic Fee

Students pay $100.00 per semester for the Student Athletic Fee which supplements and supports the operations of Sun Devil Athletics, in exchange for a reinvestment of university funds into student identified priorities. Through the establishment of this fee, the tuition dollars traditionally allocated to Sun Devil Athletics will be reinvested into the university system in order to grant additional resources and services as identified by the Associated Students of Arizona State University, thereby establishing students as effective stakeholders in both Sun Devil Athletics and the university system, and furthering transparency between the university and the Associated Students of Arizona State University [15] over tuition dollars. These priorities were established by the Athletic Fee Operations Board and over the years have included salary increases for Research and Teaching Assistants to a minimum standard, expanding transportation services to include weekends and holidays, free attendance to all ASU football games, and free graduate test prep programs [18]. Students interested in serving on the Athletic Fee Operations Board are encouraged to apply [8].

***Financial Aid Trust Fee

The Financial Aid Trust Fee [19] assessed to all students as authorized by the Arizona Legislature.***This is a fee that all ABOR students pay, including online students.***

Student Financial Aid Trust grants are assistance provided in partnership between ASU students and the state legislature. All students are assessed this fee to create a Financial Aid Trust Fund, from which Financial Aid Trust Grants are awarded under the usual aid eligibility criteria. Fees collected from students are matched by the State of Arizona. Priority for these limited awards is given to eligible undergraduate students who file their FAFSA by the priority filing date of January 1 and who are Arizona residents or underrepresented students with high financial need

Total resident undergraduate tuition and fees	$1,239	$2,225	$3,211	$4,197	$5,183	$6,169	$7,408

[1] Undergraduate students with total credit hours in excess of the threshold established by the Arizona Legislature are required to pay tuition on these excess hours. For resident students, the excess hours tuition is $174 per credit hour up to a maximum of $1,218 for enrollment in 7 or more credit hours. Students should see Undergraduate Excess Hours [1] for additional information.

[2] Students admitted to Barrett, the Honors College are assessed a $1,100 honors fee each fall and spring semester in addition to the tuition and fees presented above.

[3] All amounts shown in the Tuition and Fees Schedules or in other University publications or webpages represent tuition and fees as currently approved for the 2026-2027 academic year. Arizona State University reserves the right to increase or modify tuition and fees without prior notice, upon approval by the Arizona Board of Regents. Students should note that all tuition amounts and fees are subject to change at any time for correction of errors and may be adjusted at a future date.

[4] ASU's student government leaders, on behalf of the students they represent, have sought and received ABOR approval for the Health and Wellness fee, Student Athletics fee, Student Programs fee, Student Services Facility fee and Recreation fee. Funding from these fees will be used to enrich the student experience. Included with the Student-initiated fee is the Financial Aid Trust fee as authorized by the Arizona Legislature to create a Financial Aid Trust Fund.

[5] The Edson College of Nursing and Health Innovation post-bac BSN, the Ira A. Fulton Schools of Engineering Professional Flight program, and the ASU-Draper University Entrepreneurship Incubator Program will continue to maintain a separate program or class fee.

[6] Effective for Fall 2026, students will be assessed an Advanced Technology Fee to expand student access to industry-leading AI tools and infrastructure, support hands-on learning, create personalized digital experiences, and integrate intelligent systems across academics and campus services.

(1) Undergraduate students with total credit hours in excess of the threshold established by the Arizona Legislature are required to pay tuition on these excess hours. For non-resident students, the excess hours tuition is $298 per credit hour up to a maximum of $3,572 for enrollment in 12 or more credit hours. Students should see Undergraduate Excess Hours [1] for additional information.

(2) Students admitted to Barrett, the Honors College are assessed a $1,100 honors fee each fall and spring semester in addition to the tuition and fees presented above.

(3) All amounts shown in the Tuition and Fees Schedules or in other University publications or webpages represent tuition and fees as currently proposed for the 2026-2027 academic year. Arizona State University reserves the right to increase or modify tuition and fees without prior notice, upon approval by the Arizona Board of Regents. Students should note that all tuition amounts and fees are subject to change at any time for correction of errors and may be adjusted at a future date.

(4) ASU's student government leaders, on behalf of the students they represent, have sought and received ABOR approval for the Health and Wellness fee, Student Athletics fee, Student Programs fee, Student Services Facility fee and Recreation fee. Funding from these fees will be used to enrich the student experience. Included with the Student-initiated fee is the Financial Aid Trust fee as authorized by the Arizona Legislature to create a Financial Aid Trust Fund.

(5) International programs will continue to maintain a separate Student Health Insurance and International Student Fee. Please review our ASU Tuition Estimator [2] for additional details.

(6) The Edson College of Nursing and Health Innovation post-bac BSN, the Ira A. Fulton Schools of Engineering professional flight program, and the ASU-Draper University Entrepreneurship Incubator Program will continue to maintain a separate program or class fee.

(7) Effective for Fall 2026, students will be assessed an Advanced Technology Fee to expand student access to industry-leading AI tools and infrastructure, support hands-on learning, create personalized digital experiences, and integrate intelligent systems across academics and campus services.

For online students, the excess hours tuition is $116 per credit hour up to a maximum of $1,392 for enrollment in 12 or more hours. Students should see Undergraduate Excess hours [1] for additional information.

[4] All amounts shown in the Tuition and Fees Schedules or in other University publications or webpages represent tuition and fees as currently approved for the 2026-2027 academic year. Arizona State University reserves the right to increase or modify tuition and fees without prior notice, upon approval by the Arizona Board of Regents. Students should note that all tuition amounts and fees are subject to change at any time for correction of errors and may be adjusted at a future date.

[5] The College of Nursing and Health Innovation post-bac BSN, the Ira A. Fulton Schools of Engineering Professional Flight program, and the ASU-Draper University Entrepreneurship Incubator Program will continue to maintain a separate program or class fee.

[6] The College of Nursing and Health Innovation RN to BSN program will continue to maintain a separate program fee or base tuition rate. Please review our ASU Tuition Estimator [2] for additional details regarding the program.

[7] ASU's student government leaders, on behalf of the students they represent, have sought and received ABOR approval for the Health and Wellness fee, Student Athletics fee, Student Programs fee, Student Services Facility fee and Recreation fee. Funding from these fees is used to enrich the student experience. Included with the Student-initiated fee is the Financial Aid Trust fee as authorized by the Arizona Legislature to create a Financial Aid Trust Fund.

[8] Effective for Fall 2026, students will be assessed an Advanced Technology Fee to expand student access to industry-leading AI tools and infrastructure, support hands-on learning, create personalized digital experiences, and integrate intelligent systems across academics and campus services.

*Undergraduate Freshmen and Sophomores in the New College of Interdisciplinary Arts and Sciences are eligible to receive a 10% reduction in base tuition. In order to receive this discount, students must take all classes at the campus of their major. The discount is not affected by enrollment in iCourses.

[1] Undergraduate students with total credit hours in excess of the threshold established by the Arizona Legislature are required to pay tuition on these excess hours. For non-resident students, the excess hours tuition is $298 per credit hour up to a maximum of $3,572 for enrollment in 12 or more credit hours. Students should see Undergraduate Excess Hours [1] for additional information.

[2] Students admitted to Barrett, the Honors College are assessed a $1,100 honors fee each fall and spring semester in addition to the tuition and fees presented above.

[3] All amounts shown in the Tuition and Fees Schedules or in other University publications or webpages represent tuition and fees as currently approved for the 2026-2027 academic year. Arizona State University reserves the right to increase or modify tuition and fees without prior notice, upon approval by the Arizona Board of Regents. Students should note that all tuition amounts and fees are subject to change at any time for correction of errors and may be adjusted at a future date.

[4] ASU's student government leaders, on behalf of the students they represent, have sought and received ABOR approval for the Health and Wellness fee, Student Athletics fee, Student Programs fee, Student Services Facility fee and Recreation fee. Funding from these fees will be used to enrich the student experience. Included with the Student-initiated fee is the Financial Aid Trust fee as authorized by the Arizona Legislature to create a Financial Aid Trust Fund.
[5] International programs will continue to maintain a separate Student Health Insurance and International Student Fee. Please review our ASU Tuition Estimator [2] for additional details.

[6] Effective for Fall 2026, students will be assessed an Advanced Technology Fee to expand student access to industry-leading AI tools and infrastructure, support hands-on learning, create personalized digital experiences, and integrate intelligent systems across academics and campus services.

Tuition payment options

Paying your bill

Students and parents have a variety of options for easily paying their tuition and charges. Our team is here to help you figure out which option is right for you so that you can stay on track and keep your account current. Keep in mind that in order for a parent or guest to make a payment, they need to have guest access in My ASU.

Watch video: How to make a payment. [1]
Watch video: How to grant guest access. [2]
Learn about Gradguard's tuition and fee protection plan. [3]
Watch Video: How to Make an International Payment to ASU with Flywire. [4]

How can I make payments?

You have a choice of convenient options to make your payments. See which option is best for you.

Pay online

To pay online, you can submit your payment on My ASU.

1. Sign in to My ASU. [5]
2. Select the Finances link at the top of the page.
3. Click Pay Bill to be transferred to QuikPAY.

eChecks (electronic check payment)

eChecks are a fast and simple online payment method that can be made from a U.S. checking or savings accounts. You'll need your bank's routing number and your account number, which you'll find on the bottom of your checks or you can get it from your account with your financial institution. eChecks are ASU's preferred payment method and are free. Read the eCheck FAQs [6] for more information.

Credit and debit cards

ASU does not directly accept credit or debit card payments for tuition and student account charges, but has arranged for a third-party processor to accept Visa, MasterCard, Discover and American Express payments online through QuikPAY. The processor charges a non-refundable 2.5% service fee for domestic credit and debit card payments and 4.25% for international credit and debit card payments. Credit and debit card payments are only accepted online and are not accepted by mail, over the phone or in person. Read the credit card FAQs [6] for additional information

International payments - Flywire

International students can make payments safely and securely through Flywire. With Flywire, you can make payments from banks worldwide with favorable exchange rates, typically in your home currency. You also have 24-hour multilingual customer support via email, live chat or phone to assist you with payment-related questions. See additional information about Flywire. [7]

Note: Please be aware that Flywire is the only vendor authorized by ASU to facilitate international payments. For safety and security reasons, you should not attempt to make international payments through other companies or third-party vendors or via direct wire transfers to the university, especially those requesting My ASU login credentials, which should be kept private at all times.

In person

Personal checks, cashier's checks, money orders and cash payments are accepted in person at Cashiering Services locations on all four campuses. [8]

By mail-in check or prepaid college savings plan

ASU accepts personal checks, cashier's checks, money orders, and prepaid or college savings plan (529) payments by mail. Please make the check or money order payable to the order of Arizona State University and include your student ID number on the memo line. Checks should be mailed to the following address:

ASU Cashiering Services
1151 S. Forest Ave., Ste. 244
PO Box 870303
Tempe, AZ 85287-0303

Mail checks at least two weeks prior to your tuition due date to avoid automatic enrollment in the ASU payment plan.

Outside scholarships

Arizona State University uses Backpack to receive outside scholarship payments. Outside scholarships are funded by organizations or individuals other than their parents/guardians. Make payments at the Backpack Submission Portal. [9]

****ASU no longer accepts paper checks and all payments must now be submitted online.

Federal Perkins Loan repayment

ASU is your lender, and you'll repay ASU once your Perkins Loan moves to repayment status (typically nine months after graduation, withdrawl from school or dropping below half-time enrollment). Monthly payments depend on your loan amount and length of your repayment period. Payments can be made online. For complete details on repaying your Federal Perkins Loan, visit tuition.asu.edu/perkins-loan-repayment. [10]

***Please note that effective September 30, 2017, new Perkins loans are no longer available as this program was discontinued.

Tuition payment plan

What is the ASU payment plan?

The ASU payment plan is an option to help you attend ASU if you cannot afford to pay your tuition charges by the tuition due date.

How to make a payment

How to Make a Payment on MyASU Tutorial [1]

How does the ASU payment plan work?

The ASU payment plan offers you the option to budget your payment of certain university charges over several months within the semester. Eligible charges include tuition, housing, food plans, parking permits and health insurance. See chart below that outlines specific ASU payment plan enrollment fee amounts and due dates. [2]

Get enrolled

There are two ways you can enroll in an ASU payment plan.

Automatic enrollment

If you have outstanding charges of $500 or more after the payment deadline, you'll be automatically enrolled in the ASU Payment Plan and be billed an ASU Payment Plan fee. If you wish to withdraw from your classes and avoid being enrolled in the ASU Payment Plan, you must do so before the semester or session starts. ASU does not withdraw students for nonpayment. If you have enough offered and accepted aid to cover your current semester charges by the tuition deadline date, you will not be automatically enrolled in the ASU Payment Plan.

Voluntary enrollment

If you want to enroll in the ASU Payment Plan, log in to My ASU and select the Finances tab. Then click "ASU Payment Plan" in the Financial Success box. Note that you have to re-enroll in the ASU Payment Plan each semester.

ASU payment plan due dates

Fall

ASU payment plan due dates

- August 25
- September 25
- October 25

ASU payment plan enrollment

- $100 Resident Students
- $200 Nonresident Students

Spring

ASU payment plan due dates

- January 25
- February 25
- March 25

ASU payment plan enrollment

- $100 Resident Students
- $200 Nonresident Students

Summer

ASU payment plan due dates

- May 25
- June 25
- July 25

ASU payment plan enrollment

- $50 Resident Students
- $100 Nonresident Students

*The summer sessions enrollment fee is $50 for resident students or $100 for nonresident students for each summer session registered in up to a maximum of two sessions.

Who is the payment plan for?

- Students who know they're not able to pay a full bill by the billing deadline.
- Students who have a past due balance of $500 or more.
- Students who receive financial aid, if aid does not cover all charges.

Payment plan FAQs

How do I avoid enrollment in the ASU payment plan?
Make sure your balance is paid in full by the tuition due date, or is at least under $500 to avoid automatic enrollment in the ASU Payment Plan. Note that if you owe a balance of under $500, you will still be subject to a late fee. Review the ASU Late Charge Policy [3] for more information.

Do I need to re-enroll in the payment plan every session?
Yes. Because your financial circumstances can change from semester to semester, you have the option to enroll each semester.

If I enroll in the ASU payment plan before the semester begins and ends up not having a $500 balance, am I still enrolled in the plan?
Yes. If you voluntarily enroll and charges are paid before the initial designated payment deadline, you will still be assessed the nonrefundable enrollment plan fee.

Can I pay ASU in payments?
Yes. You can enroll in a payment plan each semester, for an additional fee.

Financial aid calendar

Note: Dates subject to change at any time for correction of errors or change of policies.

Access precious semesters calendars here. [6]

Fall 2026

August 2026

Aug 1
2026-2027 Scholarship Appeal Submission Deadline
If you had your scholarship revoked, you can submit an appeal if you experienced significant, extenuating circumstances beyond your control. For more information visit the Scholarship Appeal link. [7]

Aug 12
Fall 2026 Disbursements Begin (sessions A and C)
Financial Aid and Scholarship Services will begin applying your fall 2026 (sessions A and C) financial aid to your fall charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads "Disbursement," you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

Aug 15
Pell recipients begin charging books to their student account for Fall 2026 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in fall 2026 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

Aug 26
Fall 2026 Census Date (session A)
This policy affects your award amounts if only enrolled in Session A. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

September 2026

Sep 2
Fall 2026 Census Date (session C)
For students enrolled in session C (including students enrolled in session A and C): This policy affects your award amounts. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

Sep 23
Deadline for Pell recipients to charge books to their student account Fall 2026 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in fall 2026 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

October 2026

Oct 1
2027-2028 FAFSA Available
The 2027-2028 FAFSA can be submitted starting today. For more information, visit the FAFSA information page. [10]

Oct 4
Fall 2026 Disbursements Begin (sessions B only students)
Financial Aid and Scholarship Services will begin applying your fall 2026 (session B only) financial aid to your fall charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads "Disbursement," you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

Oct 20
Fall Only Students - Deadline to Submit 2026-2027 Student, Parent and Budget Reviews
If you are attending ASU for fall 2026 only, you must submit 2026-2027 Student Budget Reviews, Student Income Reduction Reviews and Parent Reviews along with all required documentation by this date in order for a reevaluation of the FAFSA and awards to occur.

Oct 20
Fall 2026 Consortium Agreement Submission Deadline
An ASU Consortium Agreement allows ASU degree-seeking students to receive certain financial aid awards based on their combined enrolled hours between ASU and another school during the same semester (i.e., enrolled at ASU and a community college during the same term). For more information, please visit the Consortium Agreement for Pell grant and federal loans page. [11]

Oct 20
Fall 2026 SAP Review Submission Deadline
Submit your Satisfactory Academic Progress Review form before this date in order to appeal any SAP violation for the Fall 2026 semester. Appeals submitted after this date will be considered only for regaining eligibility for the next semester. For more information and link to the eform, please visit the Satisfactory Academic Progress page. [12]

Oct 20
Fall 2026 Census Date (session B)
For students enrolled in session B (including students enrolled in sessions A or C as well as B): This policy affects your award amounts. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

November 2026

Nov 12
Pell recipients begin charging books to their student account for Spring 2027 (sessions A and C)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in spring 2027 sessions A & C, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

December 2026

Dec 5
Last Day to Accept Fall 2026 Loans
At 5 p.m. (Arizona time), any loans that are not accepted will not be eligible for disbursement in the fall term. If you are enrolled in the spring term at least half time and have not used all of your annual loan eligibility for the academic year, you may be eligible to receive Federal Direct Loans in the spring term. Remaining loan eligibility for the spring term is determined by your current grade level, dependency status and cost of attendance.

Dec 5
Last Day to Submit 2025-2026 Student Aid Adjustment form for Fall 2026
If you are attending ASU for Fall 2026 only and you would like to make changes or accept your loan, you must submit 2026-2027 Student Aid Adjustment form [13] by this date.

Dec 5
Last Day to Submit 2026-2027 Parent PLUS Loan Action Form for Fall 2026
If you are attending ASU for Fall 2026 only and your parent would like to make changes or accept the Parent PLUS loan, you must submit the 2026-2027 Parent PLUS Loan Action form [14] by this date.

Dec 21
Deadline for Pell recipients to charge books to their student account for Spring 2027 (sessions A and C)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in spring 2027 sessions A & C, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

January 2027

Jan 3
Spring 2027 Disbursements Begin (sessions A and C)
Financial Aid and Scholarship Services will begin applying your spring 2027 (sessions A and C) financial aid to your spring charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads “Disbursement," you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

Jan 14
Pell recipients begin charging books to their student account for Spring 2027 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in spring 2027 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

Jan 15
2027-2028 FAFSA Filing Priority Date
Submit your FAFSA before ASU's priority filing date of January 15 each year to maximize the amount of aid you receive. Eligible students who apply by this date have a greater chance of receiving need-based aid. The priority filing date is not a deadline, so still submit your FAFSA even if the priority filing date has passed. For more information, visit the FAFSA information [10] page.

Jan 17
Spring 2027 (Census Date (session A)
This policy affects your award amounts if only enrolled in Session A.. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

Jan 24
Spring 2027 Census Date (session C)
For students enrolled in session C (including students enrolled in session A and C): This policy affects your award amounts. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

February 2027

Feb 22
Deadline for Pell recipients to charge books to their student account for Spring 2027 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in spring 2027 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU under the finances tab on this date. [8]

March 2027

Mar 7
Spring 2027 Disbursement Begin (sessions B only students)
Financial Aid and Scholarship Services will begin applying your spring 2027 (session B only) financial aid to your spring charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads "Disbursement," you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

Mar 18
Pell recipients begin charging books to their student account for Spring 2027 (sessions A and C)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in summer 2027 sessions A & C, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

Mar 21
Spring 2027 Census Date (session B)
For students enrolled in session B (including students enrolled in sessions A or C as well as B): This policy affects your award amounts. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

Mar 21
Fall/Spring or Spring Only Students - Deadline to Submit 2026-2027 Student, Parent and Budget Reviews
If you are attending ASU for the 2026-2027 academic year or spring 2027 only (i.e., not attending summer 2027), you must submit 2026-2027 Student Budget Reviews, Student Income Reduction Reviews and Parent Reviews along with all required documentation by this date in order for a reevaluation of the FAFSA and awards to occur.

Mar 21
Spring 2027 SAP Review Submission Deadline
Submit your Satisfactory Academic Progress Review form before this date in order to appeal any SAP violation for the Spring 2027 semester. Appeals submitted after this date will be considered only for regaining eligibility for the next semester. Please see the form for requirements and instructions at https://tuition.asu.edu/satisfactory-academic-progress. [12]

April 2027

Apr 26
Deadline for Pell recipients to charge books to their student account for Summer 2027 (sessions A and C)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in summer 2027 sessions A & C, you may obtain your textbooks for the semester online or in person at the Sun

Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

Apr 30
Last Day to Submit 2026-2027 Parent PLUS Loan Action Form for Spring 2027
If you are attending ASU for the 2026-2027 aid year or Spring 2027 only and you would like to make changes or accept your loan, you must submit 2026-2027 Student Aid Adjustment form [13] by this date.

Apr 30
Last Day to Accept Spring 2027 Loans
At 5 p.m. (Arizona time), any loans that are not accepted will not be eligible for disbursement in the spring term. If you are enrolled in the summer term at least half time and have not used all of your annual loan eligibility for the academic year, you may be eligible to receive Federal Direct Loans in the summer term. Remaining loan eligibility for the summer term is determined by your current grade level, dependency status and cost of attendance.

Apr 30
Last Day to Submit 2026-2027 Student Aid Adjustment form for Spring 2027
If you are attending ASU for the 2026-2027 aid year or Spring 2027 only and you would like to make changes or accept your loan, you must submit 2026-2027 Student Aid Adjustment [13] form by this date.

May 2027

May 1
Pell recipients begin charging books to their student account for Summer 2027 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in summer 2027 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [1] under the finances tab on this date.

May 9
Summer 2027 Disbursements Begin (sessions A and C)
Financial Aid and Scholarship Services will begin applying your summer 2027 (sessions A and C) financial aid to your spring charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads "Disbursement," you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

May 21
Summer 2027 Census Date (sessions A & C)
This policy affects your award amounts if enrolled in Sessions A & C. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient [9] page.

June 2027

Jun 9
Deadline for Pell recipients to charge books to their student account for Summer 2027 (session B only students)
If you are a Federal Pell Grant recipient who has all outstanding financial aid verification documents submitted and are enrolled in summer 2027 session B, you may obtain your textbooks for the semester online or in person at the Sun Devil Campus Stores and have your book charges billed to your student account. If you are eligible, you will be sent an ASU email each semester with instructions and a link will be provided on My ASU [8] under the finances tab on this date.

Jun 23
Summer 2027 Disbursements (Session B only)
Financial Aid and Scholarship Services will begin applying your summer 2027 (session B only) financial aid to your spring charges starting this date. Check your disbursement status in the Financial Aid Tracker and if it reads "Disbursement,"

you do not need to take any action. If your status shows anything other than "Disbursement," check Priority Tasks to ensure there is no information needed from you.

Jun 30
Last Day to Submit the 2026-2027 FAFSA
The federal government will not allow students and parents to submit the 2026-2027 FAFSA or make FAFSA corrections after this date. For more information, visit the FAFSA [10] page.

July 2027

Jul 7
Summer 2027 Consortium Agreement Submission Deadline
An ASU Consortium Agreement allows ASU degree-seeking students to receive certain financial aid awards based on their combined enrolled hours between ASU and another school during the same semester (i.e., enrolled at ASU and a community college during the same term). For more information, please visit the Consortium agreement for Pell grant and federal loans page. [11]

Jul 7
Summer 2027 SAP Review Submission Deadline
Submit your Satisfactory Academic Progress Review form before this date in order to appeal any SAP violation for the Summer 2027 semester. Appeals submitted after this date will be considered only for regaining eligibility for the next semester. For more information and link to the eform, please visit the Satisfactory academic progress page. [12]

Jul 7
Summer 2027 Census Date (session B)
For students enrolled in session B (including students enrolled in sessions A or C as well as B): This policy affects your award amounts. Your census date may be different if you are in a dynamically dated course (i.e., a course that is not a session A, B or C course). For more information, visit the Dropping classes as a financial aid recipient page. [9]

Jul 7
Summer Only Students - Deadline to Submit 2026-2027 Student, Parent and Budget Reviews
If you are attending ASU for summer 2027. you must submit 2026-2027 Student Budget Reviews, Student Income Reduction Reviews and Parent Reviews along with all required documentation by this date in order for a reevaluation of the FAFSA and awards to occur.

August 2027

Aug 10
Last Day to Accept Summer 2027 Loans
At 5 p.m. [Arizona time], any loans that are not accepted by the student will not be eligible for disbursement in the summer term.

Aug 10
Last Day to Submit 2026-2027 Student Aid Adjustment and Parent PLUS Loan Action Forms for Summer 2027
If you are attending ASU for Summer 2027 and you would like to make changes or accept your loan, you must submit 2026-2027 Student Aid Adjustment form [13] by this date.

Aug 10
Last Day to Submit 2026-2027 Parent PLUS Loan Action Form for Summer 2027
If you are attending ASU for Summer 2027 and your parent would like to make changes or accept the Parent PLUS loan, you must submit the 2026-2027 Parent PLUS Loan Action [14] form by this date.

Tuition refund policy

Things to know about the ASU tuition refund policy

When you register for classes, you're obligated to pay all the tuition and registration fees. If you drop a class or officially cancel your enrollment during the 100 percent refund period, you'll get all your money back. For specific semester or session deadlines, please refer to Tuition Dates and Deadlines [1]. If you're looking for information about a financial aid refund (financial aid funds left over after your tuition and charges are paid), visit the aid disbursement page [2].

Nonrefundable charges

After the 100 percent refund period passes, tuition and fee payments become nonrefundable.
Beginning Fall 2023, this date is the same as the drop deadline for classes offered in Sessions A, B and C

Amount of refund

If you owe any university charges, they will be deducted from your refund and be subject to payment holding periods.

Withdrawal/cancellation date

Withdrawal or cancellation officially occurs on the calendar date that you request it, whether in person or online.

Refund by semester

Please note that if you cancel your enrollment after the refund period, you will be required to pay the tuition and fees charges.

Fall and spring

For regular semester classes (session C) and sessions that are eight weeks or longer, the 100 percent refund period extends through the first two weeks of the semester.

For sessions that are shorter than eight weeks (sessions A and B) and dynamically dated classes, the 100 percent refund period is one week after the semester begins.

For classes that begin prior to the first day of the regular semester, the applicable 100 percent refund period begins on the class start date, not the semester start date.

Summer

For the summer session classes (sessions A, B and C, and dynamically dated classes), the 100 percent refund period is the first five days of the applicable summer session.

For classes that begin prior to the first day of the regular semester (dynamically dated classes), the applicable 100 percent refund period begins on the class start date, not the semester start date.

If you cancel your enrollment after the refund period, you will be required to pay the tuition and fee charges.

Medical or compassionate withdrawal

The tuition refund policy does not apply to medical and compassionate withdrawals. Partial tuition adjustments or nonrefundable credits may be granted in these cases. Each request will be determined by individual circumstances on a case-by-case basis, and is an option only if approved within two years of the end of the semester. For specific semester or session deadlines, please refer to Tuition Dates and Deadlines [1].

Tuition assistance return policy

ASU recognizes that active duty members may not always be able to complete their classes, due to unforeseen military commitments. Department of Defense (DoD) policy requires a return of TA funds, when a class is withdrawn, prior to completing at least 60% of the course. Returns of tuition assistance are prorated based on the percentage of completed class time, as noted in the schedules below. Students will be responsible for reimbursing ASU for the amount of TA that ASU refunds to the DoD.

For additional questions, please contact sponsorbilling@asu.edu or call 855-278-5080 and ask to be connected to a Sponsored Billing Specialist.

Undergraduate excess hours tuition

The Arizona Legislature enacted legislation in 2005 (A.R.S. § 15-1626) that establishes credit hour thresholds for undergraduate students who attend a public university in Arizona. Undergraduate students who enroll for credit hours beyond the applicable threshold are required to pay an excess hours tuition surcharge. Students who have more than 145 credit hours will be assessed the Undergraduate Excess Hours Tuition Surcharge.

The Undergraduate Excess Hours Tuition Surcharge is billed in addition to tuition, program tuition, mandatory fees and class fees.

Exemptions

The excess hours tuition surcharge must be assessed in accordance with Arizona State Statutes and is not subject to appeal. The Arizona Legislature, however, provided for certain exemptions to the credit hour threshold and surcharge:

1. Undergraduate degree programs that require credit hours above the credit hour threshold.
2. Credits earned in pursuit of up to two baccalaureate degrees: The excess hours tuition surcharge is not assessed if (a) student has previously earned a baccalaureate degree and is currently admitted to one undergraduate degree program or (b) has not previously earned a baccalaureate degree and is admitted to two or more undergraduate degree programs simultaneously. This exemption does not apply to students who have previously earned two or more baccalaureate degrees or students who have earned one baccalaureate degree and are currently admitted to two or more undergraduate degree programs.
3. Credits earned in the pursuit of up to two state regulated licensures or certificates: Student is not required to be enrolled in both programs simultaneously. Examples include accounting, nursing, social work, and certain engineering degrees.

4. Credits earned in the pursuit of a teaching certification.
5. Credits transferred from a private institution of higher learning.
6. Credits transferred from an institution of higher education in another state.
7. Credits earned at another institution of higher education but that are not accepted as transfer credits at ASU.
8. Credits earned by students who enroll at a university under the jurisdiction of the board more than twenty-four months after the end of that student's previous enrollment at a public institution of higher education in this state.

Tuition waivers and scholarships

Employee waivers and tuition scholarships do not apply to the Undergraduate Excess Hours Tuition Surcharge.

Academic year 2026–2027 rates

For resident students the surcharge is $174 per credit hour up to a maximum of $1,218 for enrollment in 7 or more hours. For nonresident students the surcharge is $298 per credit hour up to a maximum of $3,572 for enrollment in 12 or more credit hours. For online students, the excess hours tuition rate is $116 per credit hour up to a maximum of $1,392 for enrollment in 12 or more credit hours.

Financial aid

ASU financial aid

You have lots of ways to pay for college

It's no secret that college is a major investment. But studies show that it's an investment that pays dividends. And the good news is, you have access to many forms of financial aid to help pay for it — you're not alone in this. Learn about the various types of financial aid, how to get them and everything else you need to know to get help paying for college.

Watch video: What type of aid is being offered? [1]
Watch video: Three things to know before classes start. [2]

How do I get financial aid at ASU?

1. **Create an Studentaid.gov account (FSA ID)**
   Whether you're a student or parent, you'll need to create your own account on studentaid.gov [3] to complete federal student aid tasks. You'll use the same FSA ID every year.

2. **Fill out the Free Application for Federal Student Aid**
   You'll need your driver's license, bank statements, parent information and more. The FAFSA is officially open for the 2025–2026 academic year. ASU's Federal School Code is 001081. Complete the FAFSA here. [4]

   CSS Profile: CSS Profile [5] is an online application used by colleges to award nonfederal institutional aid. The tool helps us determine eligibility and understand your specific financial situation. CSS Profile is available to qualifying domestic noncitizens who are unable to complete the FAFSA. ASU's CSS Code is 4007.

   Please note: If you are eligible to submit the FAFSA, do not submit a CSS Profile application.

3. **Review your FAFSA Summary Report**
   This will be emailed to you from the Department of Education 3-4 days after your FAFSA has been processed.

4. **Look out for additional verification documents we need to process your FAFSA in My ASU**
   Return the documents quickly so that we can continue to process your file without delays.

5. **Financial Aid and Scholarship Services will send you your Financial Aid Offer letter**
   Review your offer through the finances tab in My ASU. About five days before classes start, financial aid disbursement begins. Your scholarship and grant money will automatically be applied. You will need to accept loan offers before those funds are available. If you have any financial aid funds left over after paying your tuition and other charges, you'll receive a refund. The quickest way to get your refund is to enroll in direct deposit.

6. **Apply for Scholarships**
   After you submit the FAFSA, you can explore scholarships using ASU's Scholarship Universe [6]. Scholarships are gift aid — money for college that you don't have to repay. And there are tons of scholarships out there for all kinds of students based on region, interests, majors, goals and lots more. Apply for any and all that you qualify for no matter how small they may seem. They add up quickly.

7. **Enroll In direct deposit**
   If you have any financial aid funds left over after paying your tuition and other charges, you'll receive a refund. The quickest (and safest) way to get your refund is to enroll in direct deposit. [7]

8. **Maintain eligibility**
   You'll need to maintain a certain GPA and complete relevant coursework in a certain timeframe. If you are a scholarship recipient, you'll need to meet renewal criteria. [8]

9. **File a FAFSA every year**
   You'll need to submit a new FAFSA every year you're in college to continue receiving federal financial aid.

Frequently asked questions

Who can get financial aid at ASU?
Most ASU students qualify for some form of financial aid. To be eligible for most federal, state and ASU funding, you must:

- Meet eligibility requirements [9] set by the U.S. Department of Education.
- File a FAFSA for the current academic year.
- Be admitted as a degree-seeking student to a qualified undergraduate, post-baccalaureate, graduate or eligible certificate program. (For information about your particular certificate program, contact Financial Aid and Scholarship Services [10]). Some types of aid are restricted to certain degree levels and/or programs.
- Not be in default on any prior student loan.
- Not owe a repayment on any Title IV financial aid.
- Be making Satisfactory Academic Progress. [11]
- Submit all requested documents and those documents must not be found to limit your eligibility.
- Enroll in ASU classes such that it allows for disbursement of your offered financial aid (see ASU's census policy).

How much financial aid can I get?
The amount of financial aid you're eligible to receive depends on lots of variables. Try ASU's Net Price Calculator [12] to get an idea of how much financial aid you might receive and what your total costs could look like.

What kind of aid can I get to pay for college?

Important financial aid, scholarship and disbursement dates

October

Scholarship Universe opens

For admitted students, ASU's Scholarship Universe opens and scholarship opportunities are available for the 2026–2027 academic year. Note that scholarship deadlines vary so start exploring and applying early.

October 1

FAFSA opens

The FAFSA opens for the 2027–2028 academic year. The earlier you submit, the more financial aid you're likely to get. Get started on yours as soon as possible.

January 15

FAFSA priority date

ASU's FAFSA priority date is Jan. 15. Submit your FAFSA by this date to maximize financial aid opportunities.

Note: 10 days before the start of each semester – Financial aid funds begin to disburse and you can start paying your charges. Watch video: How does my financial aid pay for my charges? [17]

Confirmation of participation

Class participation

Students who receive financial aid are expected to earn their aid by participating in all of their classes every session.

Attending and participating in all of the courses a student is enrolled in not only ensures that they are getting the most out of the college experience, but it also helps students remain eligible for financial aid. Students must show participation in their courses by the 21st day after the course start date. If a student's participation is not confirmed by the 21st day of class, their aid may be reduced or canceled, and they may be required to pay for charges without aid.

Watch video: About confirmation of participation [1]

Confirming class participation

How does a student confirm participation?

- Completing a survey in My ASU. This is the simplest way to confirm participation. Survey links will be available seven days after classes begin. You can access the surveys you need to complete next to each course listed in the My Courses box in My ASU. You will also see a task listed in your Priority Tasks box.

How do I know if my participation still needs to be confirmed?

- A Priority task in My ASU will link you to the participation survey(s) you need to complete. You will be notified by ASU email only if your participation has not been confirmed. After the 21st day, if you still have not participated in a course, your aid may be reduced or canceled. You will see this change in the Finances tab in My ASU almost immediately.

Student FAQs

How do I confirm my participation?
Students, follow these steps to complete a quick survey that confirms participation:

- Log in to My ASU. [2]
- Visit My Classes on the left side of your home page.

- Click the $ icon next to each class.
- Complete the survey.

Click Submit.

Why the 21st day?
The Department of Education requires early participation in order to ensure students earn the financial aid eligibility for the class.

Why does ASU confirm participation?
Confirmation of participation helps ASU administer financial aid within the regulations established by the Department of Education. By confirming participation, ASU helps students stay on track to earn financial aid for the semester and keep their financial aid to pay charges.

Do I have to do this every session?
Yes. ASU must confirm participation for each class for each session start.

What happens if I don't participate by the 21st day?
If you are a loan recipient, your loans will be returned if you do not participate in at least one course.

If you are a Pell, Supplemental Education Opportunity Grant (SEOG) or Teacher Education Assistance for College and Higher Education (TEACH) grant recipient, your full grant amount will be canceled if you do not demonstrate participation in every course you are enrolled in.

In either case, the funds may be returned, any funds already disbursed to you will need to be paid back, and you will need to pay your charges without that aid.

What happens if my loans were returned and I don't plan on enrolling for any more courses?
If you do not enroll in more courses, you will be responsible for your bill.

My loans were returned but I am going to register for more courses.
If you enroll in more courses, and participation is confirmed by the 21st day of those courses, you will have aid eligibility reinstated for future sessions you are participating in, as long as you're attending at least half time for the semester (6 credits for undergraduates, 5 credits for graduates).

Will I be dropped from courses?
No. You will remain enrolled in the courses, but your aid will be reduced or canceled and you will be billed for your charges.

When does confirmation of participation start?
This requirement applies to all students receiving financial aid, beginning fall 2022.

I was going to participate, I just haven't yet. Can I get my aid back?
If you haven't participated in a course by the 21st day, and are still enrolled in the course, you can still complete a course survey to have your aid reinstated. Course surveys will remain posted in My ASU through the end of the term, as long as you are still enrolled in the course. Aid will be automatically reinstated once you complete the survey.

How does this affect my other financial aid, ie: private scholarships, etc…?
The confirmation of participation standard applies to all financial aid. Check your course list in My ASU and complete the survey for any course that has the dollar sign icon next to it.

Who can I contact with questions?
You can email participation@asu.edu with questions about this federal financial aid policy.

Faculty FAQs

What is confirmation of participation?
ASU must confirm students are participating in their courses to ensure eligibility for the financial aid they have been awarded for the semester.

What are the consequences for students who don't participate?
Students who are reported as "not participating" in the courses for which financial aid was awarded will have their aid recalculated and revoked as appropriate, and the student will have to pay back the remaining amount.

Where do I direct a student who comes to me with questions?
If a student has questions about their confirmation status, or about the status of their financial aid, direct them to the website [3], or they may email questions to participation@asu.edu.

What is my responsibility to confirm a student's participation?
None. This is for your information only.

What questions are students asked in the participation survey?
Question 1: Describe one interesting thing you have learned in this course so far.
Question 2: How do you hope this course will contribute to your broader academic and career goals?

As the instructor of record, can I have access to how students enrolled in my course(s) answer the participation survey?
Survey responses will be made available to you in My ASU by the 21st day of courses via a faculty dashboard. You will receive a notification in My ASU when this dashboard is ready to view.

Will students enrolled in research hours and/or internships be required to demonstrate participation for financial aid purposes?
Yes. All students who receive financial aid will be required to demonstrate participation.

How do I share this information with my students?
You can include the following information in your syllabus or as an announcement in your Canvas course:

Students who receive financial aid are required by the Department of Education to demonstrate participation in courses by the 21st day of classes to maintain their aid. Students will be prompted to confirm their participation through survey links posted in My ASU after the seventh day of classes. You may review details about this financial aid policy at https://tuition.asu.edu/financial-aid/confirmation-of-participation. [3]

FAFSA

Complete your FAFSA

The FAFSA is officially open for both the 2025-2026 and 2026-2027 academic year!

You need to complete the Free Application for Federal Student Aid (FAFSA) [1] each year you attend ASU. The FAFSA will determine how much federal financial aid you're eligible for.

How do I submit my FAFSA?

To file your FAFSA, go to StudentAid.gov. [2]

Your FAFSA application will ask you things such as your family's income and how many people are in your family. These questions help determine how much aid you're eligible for. You have to submit a FAFSA every year because circumstances can change. But don't worry, it takes only about 30 minutes to fill out the FAFSA application and there are plenty of resources to help you. Start with this FAFSA guide. [1]

You and your contributors will need their Student Aid.gov accounts, or FSA IDs. Watch this video [3] for more information.

The FAFSA will automatically import your tax information. If you did not file taxes or have other income including assets or untaxed income have those documents readily available.

1. Bank statements and records if applicable
2. W-2s and other records of money earned from the prior-prior tax year.
3. Record of untaxed income (if applicable).

Frequently asked questions

What is ASU's FAFSA code?
ASU's Federal School Code is 001081.

Does my family earn too much for me to get financial aid through the FAFSA?
There are no income requirements to be considered for federal student aid. Many factors beyond income are important to determine eligibility, so we recommend that all students complete a FAFSA to be considered for the maximum amount of aid.

Does FAFSA cover aid for graduate school?
Yes, students can file a FAFSA to receive financial aid for graduate school. Graduate students are considered independent and do not have to report parent or guardian earnings to be eligible for federal student aid.

Are international students eligible for funding through the FAFSA?
Most international students are not eligible to receive federal student aid, but there are opportunities to find private aid, such as scholarships. The FAFSA is open to U.S. citizens or eligible noncitizens. [4]

Should students who are impacted by Prop 308 complete the FAFSA application?
Arizona Proposition 308 grants in-state tuition status to eligible students that are not U.S. citizens and are not residing in the United States on a visa. Students must also attend an Arizona high school for at least 2 years and graduate from an Arizona high school.

If you are an eligible noncitizen due to Prop 308, you are not eligible to complete the FAFSA (see FAFSA eligibility requirements [5]). However, you can still be evaluated for aid at ASU by completing the CSS Profile. [6]

CSS Profile: CSS Profile [6] is an online application used by colleges to award nonfederal institutional aid. The tool helps us determine eligibility and understand your specific financial situation. CSS Profile is available to qualifying domestic noncitizens who are unable to complete the FAFSA. ASU's CSS Code is 4007.

Please note: If you are eligible to submit the FAFSA, do not submit a CSS Profile application.

Who are Contributors on the FAFSA?
A Contributor [7] is someone who is required to provide information on a student's FAFSA form. Watch this video to understand Who is a Contributor. [8]

This can include:

1. The student.
2. The student's biological or adopted parents. [9]
3. The student's spouse.
4. The parent's spouse.

Having someone listed as a Contributor on the FAFSA form does not imply financial responsibility for the student's education cost.

What if my parents are divorced? Who is the Contributor for my FAFSA?
The parent that is included on the FAFSA as a Contributor should be the parent that provides the most financial support to the student.

How does the student or other Contributor create an FSA ID?
Go to studentaid.gov/fsa-id/create-account/launch [10] and follow the steps to create an account. The student and the Contributor will each need their Social Security number, a valid email address and a phone number in order to complete the identity verification steps. Watch this video [11] for a step by step explanation.

Do contributors without a Social Security number have to create a FSA ID?
Yes — Contributors that do not have a Social Security number will still need to create a FSA ID. Follow these steps to create an FSA ID without a Social Security number.

1. Go to studentaid.gov/fsa-id/create-account/launch [10] and select Get Started.
2. Complete your personal information, including a valid email address.
3. Select I do not have a Social Security number.

4. A warning will pop up — click Continue without a SSN.
5. Input the required personal information, ensuring you provide a valid email address and phone number.
6. Confirm that all information is correct and set up two-step factor verification for future access.

Please note: Contributors without social security numbers are required to manually input FAFSA information when completing the FAFSA form.

What if I or one of my Contributors do not want to provide consent when completing the FAFSA?
Each Contributor must provide consent on the FAFSA or the FAFSA will be incomplete and you will **not** be eligible for financial aid.

What happens after I submit my FAFSA?

We may need help confirming information on your FAFSA so you get the right financial aid. This is called 'verification,' and it's a common thing. If we need more information, you'll be contacted. We hit pause on processing your financial aid during this time but start up again after you've submitted the documents we need.

Verification FAQs [12]

ASU FAFSA calendar and deadlines

Oct. 1

FAFSA opens

The FAFSA opens for the following year. The earlier you submit, the more financial aid you're likely to get. Get started on yours as soon as possible.

Jan. 15

FAFSA priority date

ASU's FAFSA priority date is Jan. 15 each year. Submit your FAFSA by Jan. 15 to maximize financial aid opportunities.

Financial aid disbursement and refunds

How financial aid payments work

Any financial aid you receive from ASU is automatically applied to your charges before the semester begins. Any funds left over after your tuition and charges are paid can be paid back to you in the form of a financial aid refund. To make sure your aid disburses and you receive your refund, complete the steps below. If you're looking for information about a tuition refund — money you paid out of pocket that you get back when you drop a course or withdraw — visit the tuition refund page. [1]

Watch video: How does my financial aid pay for my charges? [2]
Watch video: Three things to know before the first day of classes. [3]
Watch video: When will I get my refund? [4]
Watch video: How is financial aid split between fall and spring semesters? [5]

Make sure your financial aid file is complete

After you submit the FAFSA, you may need to submit additional documentation to help us confirm your financial eligibility. This is called "verification" and it's quite common. Check your Priority Tasks in My ASU [6] to see what, if any, verification items we may need.

Watch video: How to check Financing Tasks in My ASU. [7]

Enroll in direct deposit

By enrolling in direct deposit, any financial aid funds that remain after your charges have been paid will go directly into your bank account. Enroll in direct deposit by going to the Finances tab in My ASU [6] and clicking "Direct deposit enrollment."

Watch video: How to enroll in Direct Deposit [8]

Know how your enrollment impacts your aid

Changes in your enrollment can affect your financial aid awards, as one of the factors in your cost of attendance is the number of credit hours you take. If you drop a class, your aid will be decreased to match your enrollment hours. Other changes may adjust your cost of attendance and consequently your aid, including campus and residency status. Learn more about aid adjustment. [9]

How to know if your financial aid file is complete

Your financial aid tracker is there to help you understand where you are in the financial aid process. Visit the Finances tab in My ASU to view yours.

Watch video: How to know your financial aid file is complete [10]

When will my aid disburse?

Financial aid typically disburses about a week before the semester starts. Your financial aid tracker will show “in disbursement,” which means your aid is in the process of being applied to your account. Once disbursement is complete, you’ll see your account balance change to reflect that a payment has been made.
If you are offered loans, remember that you need to accept or decline them in My ASU in order for them to be disbursed.

Watch video: How do I accept my loans? [11]
Watch video: How do I change the amount of loans I accepted? [12]

Where is my refund?

The money left over after your charges have been paid is called a refund or a stipend. This may be scholarship money you have left over after your charges have been paid, or money you borrowed to help cover books and living expenses. You will receive these leftover funds in the form of a check or by direct deposit a few days after your charges have been paid.

Watch video: When will I get my refund? [4]

Frequently asked questions

When will my aid disburse?
Financial aid typically disburses about a week before the semester starts. Your financial aid tracker will say “disbursement is ready to begin,” which means your aid is in the process of being applied to your account. Once disbursement is complete, you’ll see your account balance change to reflect that a payment has been made.

How do I manage my financial aid?
It can be tempting to spend unwisely when you have extra money in your pocket after your charges are paid. Remember, loans need to be repaid with interest, and scholarship funds are intended to pay for housing and food, books, course materials, supplies, and equipment and should be used for those things only.

Why is financial wellness an important part of the financial aid process?
Smart borrowing, establishing good credit and creating a realistic budget are skills that you need to be successful. No matter what you’re studying, this is a great time to start building your best money habits.

ASU partners with iGrad to offer students and alumni lifelong financial wellness skills through customized courses, articles and tools to help you make important financial decisions. From how to manage your first credit card to refinancing your home, investing in the stock market and saving for retirement — you’ll learn it all. Get started with iGrad now [13] and begin a healthy, lifelong relationship with money.

What if I only need financial aid for one semester?
If you are a graduating senior and only attending one semester, Financial Aid and Scholarship Services is required to reduce your financial cost of attendance for the academic year to reflect one semester costs. In most cases, a reduction of your cost of attendance will reduce your financial aid eligibility and result in a reduction of some of your awards (even if you have already accepted them). If you plan on attending one semester, please contact us or visit our office [14] to see how your aid will be affected.

Important Notes

- You may not receive all of your fall/spring financial aid in the fall semester.
- You may not be considered a fall-only student if you are not graduating for the fall (i.e., you must apply for graduation [15] with the university).
- Your Federal Direct Subsidized and Unsubsidized Loans will prorate if you are an undergraduate or post-baccalaureate student (see below for details).
- If you were originally offered aid for the fall and spring semesters and do not end up attending the fall semester, your entire aid package may be cancelled mid-fall. If you plan on attending the following spring semester, please make sure to accept your aid on My ASU [16] and enroll for the spring semester.

Federal Direct Subsidized and Unsubsidized Loans
If you are an undergraduate or post-baccalaureate student, your Federal Direct Subsidized and Unsubsidized Loans must be prorated based on the number of credit hours for which you are enrolled. This means that you may not be eligible to receive your maximum annual loan limit. Your aid will be adjusted at the time of disbursement according to your enrolled credit hours.

How will my Financial Aid refund be disbursed if I am also using Chapter 31 or Chapter 33 VA benefits?
Students electing to use VA educational benefits at ASU under Veteran Readiness and Employment (Chapter 31) or the Post-9/11 GI Bill® (Chapter 33) must first establish their benefits eligibility, then verify their intent each semester. In accordance with 38 U.S.C 3679 (e), students who successfully establish their eligibility and elect to use benefits in any given semester are automatically given a tuition deferment that will prevent any late fees or penalties from being incurred during that semester. The deferred tuition due dates are as follows:

- Fall Semesters – December 25
- Spring Semesters – May 25
- Summer Semesters – September 25

Additionally, students who have accepted financial aid may elect to receive a credit for the anticipated amount of their VA benefits. This credit will allow any excess financial aid to disburse in advance of the VA's actual payment. Students should understand that ASU's "anticipated VA payment" is an estimate, and that settling their student account balances can only take place once all VA payments for the semester are received. It will be the student's responsibility to return any money that had been refunded in excess. For more information on the steps required, please contact the Pat Tillman Veterans Center at 480-965-7723 or PTVC@asu.edu. For questions about your individual student account, please contact Student Business Services at 855-278-5080 or SBS@asu.edu.

Financial aid impacts of the One Big Beautiful Bill Act

ASU is committed to providing you clear answers to changes in federal policy

Background

In 2025, the U.S. Department of Education's RISE negotiated rulemaking committee reached consensus on the One Big Beautiful Bill Act [1] student loan provisions, with final regulatory text expected in early 2026.

What that means

New One Big Beautiful Bill Act rules include changes to student loans that are funded by the federal government. These changes are expected to go into effect on July 1, 2026, and thus, impact students who newly enroll at ASU for fall 2026.

The One Big Beautiful Bill Act introduced the following changes to federal student loans.

Students who enrolled before July 1, 2026 and received a loan for that program may be eligible for legacy borrowing rules while enrolled, up to the program's standard full-time completion timeframe.

A student's loan amount is based on the number of credits they take each semester.

Estimate your loan eligibility:
Campus immersion students [2]
Online students [3]

Graduate PLUS loans will be eliminated for new borrowers beginning July 1, 2026.

New annual and lifetime borrowing caps will apply to undergraduate, graduate and Parent PLUS loans as well as aggregate loan limits for programs classified as professional.

Changes with the new One Big Beautiful Bill Act provisions vs. legacy provisions

The updates to federal financial aid rules do not apply to everyone in the same way. Students who already received federal loans before July 1, 2026, may continue some policies under legacy rules, while students borrowing for the first time after that date will follow the new provisions under the One Big Beautiful Bill Act.

[Archivist note: One Big Beautiful Bill Act provisions vs. legacy provisions form unable to be archived]

Frequently Asked Questions

General FAQs

When do the One Big Beautiful Bill Act changes go into effect?
July 1, 2026.

Why are these rules changing?
The changes are the result of the One Big Beautiful Bill Act, which was passed by Congress and is scheduled to take effect on July 1, 2026.

ASU recommends responsible borrowing and always encourages students to speak with us to understand their loan options and the impact that borrowing will have on their lives after graduation.

Regardless of the forthcoming changes, ASU will continue to counsel students looking for ways to finance their education about all the options available to them.

Did the One Big Beautiful Bill Act make changes to Pell Grant eligibility?
The vast majority of Pell eligible students were not included in the One Big Beautiful Bill Act.

What is ASU doing about these changes?
ASU is closely monitoring these rule changes and is committed to keeping current and prospective students informed. These proposed rule changes do not impact our curriculum, nor do they reflect the quality of the degree you earn while attending ASU.

Our faculty and staff are dedicated to expanding access to our degree programs. We are working to help you confidently pursue your degree and will work with you to understand these federal rules and how they may impact borrowing limits and loan types.

Loan FAQs

I am a current student at ASU. Will my federal loans change?
If you are currently enrolled at ASU and received federal student loans, you qualify for legacy provisions for up to three academic years or through expected program completion (based on the school's official program length). This protection allows you to maintain the annual and aggregate loan limits of federal financial aid you are receiving until graduation.

If you are enrolled less than full time, your federal student loan amounts will be prorated based on your enrollment status.

What are the changes to the Federal Loan borrowing limits?

		Annual borrowing limits		Aggregate borrowing limits	
Student by borrowing year	**Student population**	**GradPLUS Loan**	**Unsubsidized Loan**	**GradPLUS Loan**	**Unsubsidized Loan**
Current borrowers*	Graduate and professional	Up to total cost of attendance minus any financial aid	$20,500	No limit	$138,500; the graduate aggregate limit includes all federal loans received for undergraduate study
New borrowers starting July 1, 2026	Graduate	Eliminated	$20,500	Eliminated	$100,000
	Professional	Eliminated	$50,000	Eliminated	$200,000
*Legacy provision: If a borrower has a Direct Loan made before the end of summer 2026, while enrolled in a credential program, the borrower can continue to borrow from the program for 3 academic years or the remainder of their expected time to credential, whichever is less.					

If my parent didn't borrow PLUS before the end of the summer 2026 term, can they still borrow under legacy?
If you have received a federal student direct loan as a borrower before the end of the summer 2026 term, you would fall under legacy provisions for PLUS loan eligibility, even if you parent did not borrow a PLUS loan prior.

Will my current repayment plan (e.g., SAVE) disappear?
You may keep or switch among current income-driven repayment plans until the federal transition window closes (mid to late 2028). After that, older plans are phased out for most borrowers, and future repayment must use Repayment Assistance Plan, Tiered Standard or Income Based Repayment (if eligible).

Graduate student FAQs

Which graduate degrees are impacted? What is a professional student and a professional program?
For new borrowers, all graduate degrees will be impacted by the elimination of the Graduate PLUS loan program, which previously allowed students to borrow up to the cost of attendance. However, students in professional programs are able to borrow more throughout their lifetime. A professional program is currently defined as an advanced degree that typically requires professional licensure to work in the field. These programs:

- Result in a professional degree that reflects both academic achievement and the development of professional skills beyond the bachelor's level;
- Are generally at the doctoral level and require at least six years of postsecondary education, including at least two years of post-baccalaureate coursework;
- Generally require professional licensure to begin practicing in the field; and
- Are classified under specific program CIP codes aligned with recognized professional fields.

Professional programs with a $200,000 loan limit	Programs with a $100,000 loan limit
• Pharmacy (PharmD) • Dentistry (DDS or DMD) • Veterinary Medicine (DVM) • Chiropractic (DC or DCM) • Law (LLB or JD) • Medicine (MD) • Optometry (OD) • Osteopathic Medicine (DO) • Podiatry (DPM, DP or PodD) • Theology (MDiv or MHL)	• All other graduate degrees.

What do these changes mean to me as a current graduate program student?
If you're currently enrolled in a graduate program, these changes will not affect you, so long as you remain in your current program until completion. The rules, as they currently stand, will be implemented on July 1, 2026, and will not be applied retroactively. You'll be able to borrow up to the total cost of your degree program.

These rule changes only impact the definition of a degree and its status under financial aid guidelines and are not a reflection of the quality or rigor of degree programs at ASU.

What do these changes mean to me as a prospective graduate program student?
If you're planning to enroll in a graduate program on or after July 1, 2026, you will be under the new loan rules, unsubsidized loans only and a borrowing cap based on your degree program.

These rule changes only impact the definition of a degree and its status under financial aid guidelines and are not a reflection of the quality or rigor of degree programs at ASU.

Legacy provision FAQs

Who counts as a legacy student?
You may be considered a legacy student if both of the following apply to you:

- You were officially enrolled in your current program by June 30, 2026
- You received at least one Direct Loan disbursement for this program before the end of the Summer 2026 term.

Admission or intent to enroll is not enough — at least one actual financial aid disbursement must occur.

How long does legacy protection last?
Legacy protections last for the shorter of these options:

- Three academic years
- The remaining “expected time to credential” (your program’s normal length at ASU)

Does taking a leave break legacy eligibility?
An approved leave of absence will end your eligibility for legacy status. If you withdraw from all courses or take a leave of absence, you will be subject to the new provisions when you return.

To remain eligible for legacy provisions, you must stay continuously enrolled.

If you are considering taking a leave of absence or leaving ASU, we encourage you to contact Financial Aid and Scholarship Services before making a decision so we can discuss how it may affect your eligibility.

Maintaining your financial aid

How your financial aid can change

The amount of financial aid you receive may increase or decrease depending on many factors, such as your enrolled hours, participation in courses and progress toward your degree. Understanding how these factors affect your aid can help you stay on track.

Scholarship adjustments are updated on My ASU Monday through Friday, except for university-recognized holidays. Any changes you make to your enrollment that cause an adjustment to your aid will be resolved in five to seven business days.

Maintaining enrollment

Your cost of attendance and financial aid depend on factors that include the number of credit hours you are enrolled in and your session enrollment.

Watch video: How many credits do I need to be enrolled in to keep my financial aid? [1]

Note: The amounts shown in the video are examples and may not reflect your actual costs and scholarships.

Course participation

To keep your financial aid, it is important to participate in your classes; if you do not, your aid could be reduced or cancelled, and you will have to pay your tuition without using financial aid. You must show participation in your courses by the 21st day after the start date to avoid a reduction in or cancellation of your financial aid.

Watch video: About confirmation of participation [2]

Learn more [3]

Withdrawing as a financial aid recipient

If you don't finish your classes as scheduled, your financial aid could be recalculated or canceled.

About withdrawing [4]

Dropping classes as a financial aid recipient

Changing your schedule after class starts can change your financial aid amounts. If you drop a class and your aid has already been disbursed, you may still be charged for the class and may not receive financial aid to cover it.

About dropping [5]

Incomplete grades as a financial aid recipient

Receiving an "I" (incomplete) grade in a session A or B course may impact your financial aid amounts.

Incomplete grades [6]

Satisfactory academic progress

To remain eligible for federal financial aid, you must make satisfactory academic progress as a student. This means that you need to complete your classes in a timely manner, and your grades must demonstrate that you are successfully working toward completion of your degree.

Learn more [7]

Overawards

An overaward occurs when your need-based scholarships exceed your financial need, or the total of your scholarships exceeds your cost of attendance. If you have been overawarded, federal regulations require ASU to adjust your scholarships, which may result in a bill to your account.

An overaward occurs when your need-based scholarships exceed your financial need, or the total of your scholarships exceeds your cost of attendance. If you have been overawarded, federal regulations require ASU to adjust your scholarships.

Scholarships

Investing the time for scholarships can really pay off.

New American University Scholarship Estimator

Are you wondering if you qualify for the New American University Scholarship? This scholarship is awarded to incoming first-year students at ASU who demonstrate exceptional academic achievement upon their admission for the fall semester. To find out if you're eligible and what you could receive, use this estimator tool.

Scholarship Estimator [1]

Scholarship Universe

All admitted students can access ASU's Scholarship Universe. There are scholarships for a wide range of talents, personal stories, creativity and more. Scholarship Universe includes both ASU and non-ASU scholarships, so there's something for everyone. Apply early to avoid missing deadlines! For more information, check out our helpful videos [2] and FAQs [3] on using Scholarship Universe.

Scholarship Universe [4]

Financial assistance for AZ residents

ASU is committed to making college affordable for Arizona families. Learn about the programs Arizona residents may be eligible for.

AZ resident programs [5]

New American University Scholarship Renewal

Are you on point to renew your New American University scholarship? Make sure you review your renewal criteria to stay fully funded at ASU.

Scholarship renewal [6]

Commitment Scholarship

ASU is now offering the Commitment Scholarship to eligible out-of-state students applying for fall 2026. This scholarship highlights our ongoing efforts to expand access, support student success, and uphold academic excellence.

About the scholarship [7]

Submit an outside scholarship payment

Arizona State University uses Backpack to receive outside scholarship payments. Outside scholarships are funded by organizations or individuals other than their parents/guardians. ASU no longer accepts paper checks and all payments must now be submitted online.

If your organization has questions, please contact support@backpackpay.com.

Backpack portal [8]

Scholarships for special programs

Military and Veteran financial assistance [9]
Foster Youth financial assistance [10]
American Indian Student Support Services [11]

Scholarship Universe frequently asked questions

What is Scholarship Universe?
Scholarship Universe is a powerful tool that helps you maximize your scholarship opportunities. By creating an academic profile, you can connect with internal and external scholarships that match your criteria.

What's the difference between internal and external scholarships?
Internal scholarships are awarded by ASU, whereas external scholarships come from outside sources. All external scholarships listed in Scholarship Universe are vetted.

Why should I complete "My Profile" in Scholarship Universe?
Completing your profile ensures that you'll be matched with scholarships tailored to your background. ASU departments and external groups will use this platform to post future scholarship opportunities, so your profile will remain useful throughout your academic experience.

Do I need to be an ASU student to access the portal?
Yes, you must be an admitted or current ASU student. Use your ASURITE User ID and password to log in to Scholarship Universe and start exploring scholarships.

How do I use Scholarship Universe?

- Visit Scholarship Universe and log in with your ASURITE User ID and password.
- Complete your student profile to be matched with scholarships.
- Use the "Scholarships" tab to find and apply for opportunities.
- Regularly check for new matches and track your application status.

Can I search for a specific scholarship?
Yes, there are multiple ways to search for scholarships in Scholarship Universe:

- Search function: Use the Search bar at the top-right corner by your name to search by keywords or tags.
- Scholarships tab: Select the Scholarships tab and use the Sort and Filter options in the upper-right corner to search within categories, such as Matches and Pinned, etc.
- Filter option: Narrow your search by organization, academic department or other criteria using the available filters.

Student employment

ASU's commitment to student employment

Student employment at ASU is an integrated working and learning experience, driven by ASU's Charter and designed to impact student success.

Through student employment, ASU integrates practical experience with our core outcomes to positively impact student success.

Increased career readiness through opportunities to develop and practice transferable skills.

Enriched relationships between supervisors and working learners that support mentorship and learning.

Improved confidence of working learners in their ability to articulate transferable skills and connect them to post-completion opportunities.

89.7%
Working learners say their on-campus role helped shape their career goals and support professional growth.

91.7%
Students report positive and supportive interactions with their supervisors.

91.7%
Learners feel confident identifying and connecting their job skills to future career opportunities.

Data collected from our 2025 Annual Student Employment Survey

ASU's State of Student Employment Report

Learn more about student employment at ASU. This report is comprised of data from our annual student employment surveys, general demographics information, and information about initiatives related to student employment.

Benefits of being a student employee at ASU

Search jobs [1]
Join the community [2]

At Arizona State University, student employment is designed as an integrated working and learning experience that supports your academic and professional success. Guided by ASU's Charter and the Work+ framework, your on-campus role helps you build career readiness, strengthen your relationship with your supervisor, and grow confidence in articulating your transferable skills.

Why your role matters

You build real career skills

Every role gives you the opportunity to cultivate career-readiness competencies such as communication, leadership, teamwork, critical thinking, professionalism, technology, and career & self-development. Through meaningful tasks and reflection, you build the capabilities employers value across fields.

You gain experience that connects to your future

Your on-campus job is a stepping stone toward internships, graduate studies, or full-time employment after graduation. Through ASU's Work+ framework, your role is treated as a developmental experience rather than a routine task.

Your supervisor supports your growth

ASU student-employment supervisors participate in dedicated onboarding and training (via the Work+ Supervisor Foundations session) to ensure they are equipped to mentor, provide feedback, and guide you in professional growth.

You grow in confidence

As you take on responsibilities and learn to recognize your own progress, you'll gain confidence in articulating your skills and experiences, preparing you to enter the workforce with both competence and clarity about what you offer.

Practical benefits of working on campus

- Flexible positions that accommodate your class schedule and support your academic progress.
- Opportunities for leadership, reflection, and professional development built into your job experience.
- Supportive supervisors and teams who are invested in your success.
- Access to university-provided tools and resources that enhance your growth.

Student employee rights and responsibilities

You should consider your part-time position as an important job that can impact your future work experience. You are now part of the ASU work force and your department depends on you.

The following are your rights and responsibilities as a student employee at any ASU campus:

Student employee responsibilities

- To complete a new hire packet within 72 hours, if you have not worked for ASU during the last 12 months, and submit it to the Human Resources department located on your campus.
- To maintain enrollment necessary for student employment eligibility.
- To coordinate your work hours with your supervisor according to the department's needs and your own class and study schedule.
- To perform assigned duties promptly and competently.
- To be dependable and always report to work on time-excessive tardiness or absenteeism is grounds for disciplinary action.

- To arrive at the office prepared to work - refrain from studying or conducting personal business (phone/email) on the job.
- To refrain from having family or friends visit during scheduled work times.
- To attend all student staff meetings or training sessions unless you have a scheduled class or exam.
- To not work at your job during times you are scheduled to be in class.
- To observe policies on confidentiality for all University, department and student records, and information.
- To schedule your lunch and rest breaks in advance and get your supervisor's approval.
- To not eat or study during your scheduled shift, unless approved by your supervisor.
- To maintain appropriate dress and personal grooming.
- To notify your supervisor in advance if you will be absent from work - frequent absences are a justifiable cause for dismissal.
- US citizens or eligible non-citizens may not work more than an average of 25 hours a week (or 62.5 percent FTE) over a rolling twelve month period. This maximum applies to the combined total of all jobs, including hours associated with stipends paid for services. Graduate Assistants may work a total of 20 hours per week.
- To not work more than 20 hours per week during the academic semesters if you are an international student on a visa.
- To keep an accurate record of hours worked and submit correct payroll information to your supervisor by the stated deadlines.
- To inform your supervisor of any plans to end employment. The customary notification time period is two weeks.
- To stop your Hourly employment two weeks after your graduation from ASU, unless you are enrolled for the next semester.
- To stop your employment on your graduation day as an undergraduate international student.
- To stop your employment on your defense date, comprehensive exam date or which ever option you have for the completion of your degree program as a graduate international student.
- To stop your FWS employment on the last day of the spring semester or the day before the fall semester starts according to your FWS Notification specifying the term of your employment period.
- To stop your FWS employment on the day of your graduation from ASU.

Student employee rights

The following rights are available to all student employees.

- The right to be treated fairly and respectfully by the University – ASU follows equal employment opportunity and affirmative action principles.
- The right to a safe, clean and professional working environment.
- The right to know your specific job description including your supervisor's standards and expectations.
- The right to adequate training in skills and procedures necessary to perform assigned tasks.
- The right to be informed about your work performance through verbal communication or performance evaluations.
- The right to use your campus job as a reference for future employers.
- The right to a grievance procedure for stating concerns related to the job and/ or supervisor (see USI 304-12 [3]).
- The right to file a grievance with the AA/EO Office if you believe you have been sexually harassed or discriminated on the job (see USI 304-03 [4] and USI 304-04 [5]).

Student grants

What is a grant for college students?

A grant is free money — you don’t have to pay it back. The most common types of student grants come from federal, state and university resources.

Eligibility

Who can get a grant?
Grants for college students are usually need-based — that is, if your family income is under a certain amount, then you may qualify. The purpose of a grant is to help you pay for college when you and your family might not otherwise be able to afford it.

Process

How do I get a grant?
All grants require the student to file a FAFSA each year and are awarded to students who are eligible for need-based aid. Completion of the FAFSA by the priority filing date of Jan. 15 is recommended due to the funding limitations of some programs. Monitor your My ASU account and submit all documents promptly. Your financial aid file must be complete before grant eligibility is considered.

Available grants for college

Federal Pell Grant

Who is it for?
Undergraduate students with high financial need.

Who offers it?
The federal government.

How much is it worth?
Amounts can change yearly. The maximum Federal Pell Grant award is $7,395 for the 2025–26 award year (July 1, 2025, to June 30, 2026).

How do I get it?
File the FAFSA.

Learn more about Pell grants [1]

Federal TEACH Grant

Who is it for?
Students who intend to teach in a public or private K-12 school that serves low-income students.

Who offers it?
The federal government.

How much is it worth?
Up to $4,000 per year.

How do I get it?
File a FAFSA and meet academic requirements. If you don’t automatically qualify through your FAFSA, you can submit a TEACH Grant Request form [2] for further consideration.

Learn more about Federal TEACH Grants [3]

Financial Aid Trust Grant

Who is it for?
Undergraduate students from Arizona or students from underrepresented populations with significant financial need. Limited funding is available and funds are not guaranteed each year.

Who offers it?
This is paid for through student fees and funding from the Arizona Legislature.

How much is it worth?
Up to $4,000 per year.

How do I get it?
File the FAFSA by March 1.

Federal Supplemental Educational Opportunity Grant

Who is it for?
Undergraduate students with significant financial need.

Who offers it?
The federal government.

How much is it worth?
Between $100 and $1,000 a year.

How do I get it?
Complete the FAFSA and receive a Pell grant for consideration.

Student loans

What is a student loan?

A student loan is money that you borrow to pay for college with the condition that it be paid back over a certain period of time with interest. Students often use student loans when family contributions, scholarships and grants do not cover the total cost of attendance.

How much should I take out?

We recommend borrowing only the amount you need. College is an investment in yourself and the responsible use of loans can be an important part of helping you attain a college education.

How do I act on loans I've been offered?

To accept or decline loans, visit the Financial Aid and Scholarships box in My ASU to view your loan offers. You can select the amount you want to borrow, if any, and click accept or decline.

Watch video: How to accept or decline loans I've been offered [1]

Types of loans

There are different types of loans for various situations.

Federal Student loans for undergraduates [2]

Federal Parent PLUS loans [3]

Federal Grad PLUS loans [4]

Private loans [5]

Emergency short-term loans [6]

How to apply for a student loan

Your first step in getting a loan is to fill out the FAFSA [7]. The FAFSA will reveal how much money you are eligible to borrow in federal loans. You may also receive a loan from a private lender such as a bank. More on private loans here [5], but keep in mind that private loans almost always have a higher interest rate than federal loans, meaning you'll likely pay more over the life of the loan.

Borrowing tips

- Consider how much you need before borrowing. Remember, all loans must be repaid with interest. Use a loan payment calculator to find out how much your monthly payment may be if you decide to accept loans.
- If you plan on graduating during the fall semester or plan on attending only one semester, check out ASU's One-Semester Financial Aid policy.
- Monitor your Direct Stafford Federal aggregate and annual loan limits. Once your limit is reached, you will not be eligible to receive any additional Federal Stafford Loans. If you exceed your loan limits, your award could be reduced or canceled after you've received the funds.

Student loan FAQs

How do I change the loan amount I accepted?
If you have accepted a loan and would like to increase or decrease the loan amount you accepted, you can visit the student aid adjustment page to submit an aid adjustment form. [8]

How do I request more aid?
If you would like to increase the loan amount you accepted, you can visit the student aid adjustment page to submit an aid adjustment form [5]. Select the aid type you would like to request more of, then select Increase. Then you can indicate how much you have already accepted, and how much you would like to increase your loan to. If you're not sure how much you've already accepted, you can find that in your Financial Aid and Scholarships box in My ASU. To see how much you're eligible for, view the chart on the student aid adjustment form, or visit the studentaid.gov loans page. [9]

Do I have to repay student loans?
Yes, with interest. It's an investment in your future, and your earning potential will increase with a degree. That said, you only want to borrow what you need. Learn more about loan repayment. [10]

What are the federal loan limits?

		Annual borrowing limits		Aggregate borrowing limits	
Student by borrowing year	**Student population**	**PLUS Loan**	**Unsubsidized Loan**	**PLUS Loan**	**Unsubsidized Loan**
Current borrowers*	Undergraduate	Up to total cost of attendance minus any financial aid	Based on academic level [9]	No limit	$57,500 - combined between subsidized and unsubsidized loans
	Graduate and professional	Up to total cost of attendance minus any financial aid	$20,500	No limit	$138,500; the graduate aggregate limit includes all federal loans received for undergraduate study
New borrowers starting July 1, 2026	Undergraduate	$20,000	Based on academic level [9] no changes	$65,000	$57,500 - combined between subsidized and unsubsidized loans
	Graduate	Eliminated	$20,500	Eliminated	$100,000
	Professional**	Eliminated	$50,000	Eliminated	$200,000

*Legacy provision: If a borrower has a GradPLUS loan made before July 1, 2026, while enrolled in a credential program, the borrower can continue to borrow from the program for 3 academic years or the remainder of their expected time to credential, whichever is less.

**The definition of professional programs is being determined through negotiated rulemaking. Final information to be shared in spring 2026.

*Also applies to dependent undergraduate students whose parent was denied a PLUS loan and post-baccalaureate students.† As of the 2012-2013 academic year, subsidized loans are no longer awarded to Graduate students.
For more information on student loan limits, visit the federal student loan limits page. [9]

How do student loans work?
First, you should submit the FAFSA to learn how much you're eligible for in federal loans. Then decide how much of that you want to borrow. (Don't borrow any more than you need.) The interest rates are fixed as of the date you borrow and federal loan interest rates are typically significantly lower than private student loan interest rates. Once you decide whether you're going to accept or decline your loans, sign into My ASU and click "accept" or "decline" if it's a Federal Direct Subsidized or Unsubsidized loan.

Do I need a parent or guardian to get loans?
If you're a dependent student, you need your parents' information to submit the FAFSA and receive federal student loans. Private student loan requirements vary so check with the lender.

How do I pay back Federal Perkins Loans?
ASU is your lender, and you'll repay ASU once your Perkins Loan moves to repayment status (typically nine months after graduation, withdrawal from school or dropping below half-time enrollment). Monthly payments depend on your loan amount and length of your repayment period. Payments can be made online. For complete details on repaying your Federal Perkins Loan, visit tuition.asu.edu/perkins-loan-repayment.

Can I apply for a Canadian Student Loan?
Canadian citizens or permanent residents of Canada living in any province for over a year are eligible to receive a Canadian Student Loan by the Canadian government through the Canada Student Loan Program. Eligible borrowers may also receive loans through individual provinces either through their own programs or programs integrated with the CSLP. Loan funds are sent directly to the student from the providence it was obtained through. ASU does not receive funds.

Arizona State University processes the Canadian Student Loan applications one term at a time. Students should submit a new loan application each term when charges for that term are posted to their student account. The Canadian Student Loan applications should be submitted to Financial Aid and Scholarship Services via fass@asu.edu.*

*Note: Canadian Student Loan applications through British Columbia are processed directly on their website. An email is sent to ASU each time a new loan application is available for review.

Canadian Confirmation of Enrollment and Confirmation of Distance Education Eligibility forms are also processed one term at a time. Students should submit a new form each term to Financial Aid and Scholarship Services via fass@asu.edu.

Student loan repayment

Manage student loan repayment

If you're a former ASU student and still have student loans, you're not alone — and you don’t have to navigate repayment on your own. Arizona State University is here to ensure you have the information and tools you need to manage your loans effectively and avoid unnecessary stress.

Keep in mind that federal student loans enter repayment six months after you graduate, leave school or drop below half-time enrollment. This six-month grace period gives you time to prepare before payments begin.
To help you stay on track, here are the key steps you can take to manage your student loans successfully:

Step 1: Log in to StudentAid.gov

Begin by visiting the U.S. Department of Education’s official website at StudentAid.gov. This is your central hub for federal student loan information. After logging in with your FSA ID, you’ll be able to:

- View your total loan balance
- See who your loan servicer is
- Review your repayment options and use the loan simulator [1] tool to estimate monthly payments
- Explore deferment or forbearance if you need to temporarily pause payments

Step 2: Contact your loan servicer

Your loan servicer is your primary point of contact for repayment. Once you've identified your servicer on StudentAid.gov, reach out to them directly. They can help you:

- Choose a repayment plan that matches your current financial situation
- Explain how interest and payments are applied to your loan
- Update your contact information to ensure you receive timely updates

If you haven't already connected with your servicer, we encourage you to do so as soon as possible. Staying in touch helps you avoid missed payments and keeps your loan in good standing.

Step 3: Stay proactive about repayment

Managing your student loans doesn't end with setting up a plan — it's an ongoing process. Check in regularly with your servicer, especially if your income or personal situation changes. Make sure your contact information is always current and monitor your account for any updates or notices.

How to prepare [2]

Repaying student loans

Loan repayment resources

Learn more about student loan repayment from our financial wellness partner, iGrad.

Take a 10 minute student loan repayment course [3], learn more about repayment options [4] and use the federal student loan repayment simulator [5] to calculate student loan payments and chose the best repayment option for you.

Information on Parent Plus loans

The student loan repayment pause also applies to parents with Federal Direct Parent Plus loans. Parents should follow the same steps as students to obtain their FSA ID [6], and then contact their loan provider for information on resuming payment. Parent Plus loan repayment follows a different timeline than student loans, and repayment will begin while the student is still in school. Interest will also begin to accumulate as repayment resumes. Please contact your loan provider for more information.

Establishing automatic payments

If you were on an automatic payment plan prior to the student loan repayment pause, you must contact your servicer and opt back in to the automatic payment plan. Not sure who your servicer is [7]? Go to StudentAid.gov, find your account dashboard [8] and scroll down to the "My Loan Servicers" section. You can also call the Federal Student Aid Information Center at 1-800-433-3243.

Preparing for student loan repayment

Watch these informational NASFAA videos to help you understand student loan repayment and the first steps to get started.

Financial aid and tuition help

Am I eligible to be an AZ resident?
For detailed information about being an Arizona resident, visit https://students.asu.edu/residency. Be advised that if you have financial aid, it will be reduced if you have a change in residency or housing status. Check with Financial Aid and Scholarship Services in order to determine how these changes will affect your award(s). In the event of a financial aid adjustment, you will be notified by e-mail to check My ASU for new award information.

I am graduating after the fall semester. Can I receive the full amount of my merit scholarship in the fall semester?
No. If you complete your first undergraduate degree prior to your maximum award terms, you are only eligible to receive the one semester award for the term in which you graduate.

What do I need to do if my circumstances change, for example my parent, spouse or I have had a decrease of income?
This is the kind of extenuating circumstance you would want to notify Financial Aid and Scholarship Services about. You may initiate this process by completing a Student and/or Parent Review form. These forms can be downloaded at our find a form page. [1]

Can I enroll in Direct Deposit if I am a student athlete?
In order to comply with NCAA and Sun Devil Athletics (SDA) regulations regarding posting and disbursing of SDA monies, active and potential athletes will not be included in Direct Deposit. Athletes may enroll in student account Direct Deposit, but refund checks will be produced instead of Direct Deposit transactions while you are an active athlete. If your SDA athlete status becomes inactive you will be included in Direct Deposit.

Can I have my student account refund deposited into a bank account other than my own?
You may specify a bank account other than your own for refunds, for example a parent's bank account. You are responsible for specifying the correct account and maintaining accurate banking information with ASU. Once a Direct Deposit refund is processed, ASU cannot cancel or reverse the transaction.

Can I have my student account refund mailed?
You must deactivate your Direct Deposit Enrollment prior to creation of the refund to have a check mailed. Login to My ASU, select Finances in the Tuition profile box, then select 'Direct Deposit Enrollment'. Click 'Deactivate Direct Deposit' to begin receiving refunds by check via postal mail. Remember to update your address through My ASU (My Profile tab).

Can I pick up my student account refund in person?
No. If not enrolled in Direct Deposit, a check will be mailed. Remember to keep your address current through My ASU (My Profile tab).

Can I use financial aid to buy my books?
Pell Grant recipients are eligible to purchase textbooks at Sun Devil Campus Stores and have the book charges billed to the student account, up to $650. To be eligible students must submit all outstanding documents showing on their My ASU Finances tab. Review the Financial Aid calendar [2] to identify the time periods when you can use your Pell Grant to pay for books and supplies. There are two ways to take advantage of this benefit -- either by purchasing books at the Sun Devil Campus Store on your campus, or on the ASU Bookstore website.

To purchase your books at one of the Sun Devil Campus Stores on campus, please follow these steps: Take your schedule of classes with you to a Sun Devil Campus Store. Find the books for your classes. Take your books to the

cashier. Present your ASU ID and indicate you have a Pell Grant. Ask them to apply your book charges to your ASU account.

To purchase your books via the ASU Bookstore website, please follow these steps: Make sure you are signed into My ASU, then visit the ASU Bookstore and find your course materials. When you're ready to check out, you will be taken to a Payment Methods box. Check the box next to Pell/Scholarship/Third Party Payer. After you click the box next to Pell/Scholarship/Third Party Payer, click Find Accounts. Your account balance will appear. Click Pay with this. Click Place order to complete your transaction.

You may only purchase textbooks, educational supplies and technology equipment with your Pell Grant benefit. Once your financial aid is applied to your ASU charges, any remaining funds will be disbursed to you. View our calendar for disbursement dates of financial aid refunds. Enroll in direct deposit to have your remaining funds deposited into your bank account. Should your financial aid not cover all of your charges, you will be responsible for the remaining balance. View details on receiving your funds and paying ASU charges. This payment option is available during specific times at the start of each semester. See the financial aid calendar for details. If you were not awarded a Pell Grant, the bookstore will accept the following payment methods both online or in the store: American Express Discover Gift Card MasterCard Sun Dollars Visa

How do I accept my awards?
Entering freshman students who have received a Financial Aid Notification (FAN) have until May 1 to reserve any federal and ASU grants. Log in to My ASU and go to the Financial Aid tab. From there you can accept and/or decline your awards. To accept your Federal Direct Parent PLUS Loan, please follow these instructions. https://students.asu.edu/loans/plus#accept

How do I confirm that my bank account information has been accepted and set up for Direct Deposit?
You can view your Direct Deposit information and status online at My ASU by selecting Finances then select 'Direct deposit enrollment' in the Tuition profile section on the right-hand side. If the bank reports a problem with the information you provide we will contact you prior to the enrollment becoming active. If all information is correct, simply exit, do not select Save.

How do I deactivate my Direct Deposit Enrollment?
To deactivate your Direct Deposit Enrollment, login to My ASU, select My Finances in the Quick Links box on the left-hand side, then select Direct Deposit Enrollment in the Helpful Links section on the right-hand side. Click 'Deactivate Direct Deposit' to begin receiving refunds by check via postal mail. Remember to update your address through My ASU (My Profile tab).

How do I enroll in student account Direct Deposit?
Login to My ASU, and select Finances. Select the "Direct deposit enrollment" button in the Tuition profile box and then follow the instructions to set up or review your direct deposit banking information. Remember to select "Save" at the bottom of the screen.

Direct Deposit status will reflect as "Not Active", "Pending" or "Active".

How do I pay for my tuition and housing?
If your financial aid is accepted and you have all financial aid items completed on your My ASU task list, fall aid will automatically disburse to your ASU Student Account charges first and then any excess will be refunded to you. Your ASU Student Account will list all of your tuition, fees, on-campus ASU housing and food plan charges. Your ASU Student Account will also show your pending financial aid. If your charges are greater than your pending financial aid, you will owe a balance to ASU. If your pending financial aid is greater than your charges you can expect a refund after your charges are paid at the time of financial aid disbursement. Refunds are applied to your personal bank account if you enrolled in direct deposit. If you did not enroll in direct deposit, a refund check will be mailed to your local address on file with ASU.

How is financial aid refunded? Will financial aid be Direct Deposited to my bank account if I enroll in student account Direct Deposit?
Financial aid is first used to pay charges on student accounts, with any remaining balance being refunded to the student. If you enroll in student account Direct Deposit, financial aid in excess of university charges will be refunded to you and Direct Deposited to your bank account.

How many accounts can I have my student account refund deposited to?
You may only specify one account at any given time.

How often does the Student Accounts Office process Direct Deposit refunds?
At the beginning of the semester, Direct Deposit refunds are processed as frequently as financial aid becomes available. During the rest of the semester, Direct Deposit refunds are processed on Monday, Wednesday and Friday for deposit to your bank account two to three days later. (The schedule is adjusted for holidays.)

How will I know if I am receiving a student account refund?
You can review the transactions posted to your student account, including refunds, on My ASU by selecting Finances, then clicking the Refunds link in the Charge summary box.

How will I receive a tuition refund if I drop classes?
Tuition credits are processed through Student Accounts. Tuition credits first pay outstanding charges on student accounts and any remaining balance is refunded. If you enroll in Direct Deposit, your tuition refund will be deposited electronically to your bank account.

I just signed up for student account Direct Deposit. When will it become effective?
Your student account Direct Deposit enrollment will be active two weeks after enrolling. If refunds are issued to you in the two weeks following enrollment, payment will be made by check and mailed. Remember to keep your address current through My ASU.

If I am expecting a late disbursement of my financial aid, will those monies be Direct Deposited?
Yes. Refunds are issued throughout the semester and Direct Deposited to your bank account if you are enrolled in student account Direct Deposit.

If I complete Direct Deposit Enrollment through My ASU, do I still need to bring in a copy of a voided check or a savings deposit slip?
No. The Direct Deposit Enrollment function available through My ASU requires you to submit all necessary information. If the bank reports a problem with the information you provide we will contact you prior to the enrollment becoming active.

My bank account was closed but a Direct Deposit was already processed. How do I get my student account refund?
Contact the Student Accounts Office at 855-278-5080 to receive information and instructions.

What charges are billed on my student account?
Tuition, residential life charges, student health charges, library fines, and miscellaneous department charges are billed on student accounts. You may view unpaid student account charges and make payments online through My ASU by clicking on Finances. In the Charge summary box, click the drop down arrow under Current amount. This will provide detailed charge information including term, charge, due date and amount.

What is the deadline for enrolling in student account Direct Deposit to ensure that my financial aid is Direct Deposited to my bank account?
Enroll a month before the semester begins to ensure that financial aid is deposited to your bank account. Refunds issued prior to your Direct Deposit Enrollment becoming active will be made by check and mailed.

What should I do if I still have questions?
Contact the Student Accounts Office located in the Student Services Building room 230 or call 855-278-5080.

What should I do if my banking information changes? How can I change my Direct Deposit Enrollment information?
Maintaining current bank account information is very important. You can change your Direct Deposit information online by logging in to My ASU and select then select the 'Direct deposit enrollment' in the Tuition profile box. Simply update your banking information and click Save.

What type of account can I use for Direct Deposit?
The account must be with a U.S. bank and can be either a U.S. checking or savings account.

When does financial aid disburse?
Financial aid disbursement begins no sooner than a week before the semester starts. If your pending financial aid exceeds your ASU charges due you can expect a refund. Refunds will be issued by check (sent to mailing address on record) or direct deposit. To sign up for Direct Deposit, log in to My ASU, click Finances then and click on 'Direct deposit enrollment' button in the Tuition profile box.

When does spring financial aid disburse?
Aid disburses about seven days before the start of the semester. Check the aid and billing calendar for exact dates.

When will funds be deposited to my account or mailed to me after my financial aid pays my tuition charges?
Your funds will be deposited to your account about 4 days after your aid is applied to your charges. If you do not have direct deposit, you will receive a paper check mailed to the address on file within about 10 days.

Where do I find my bank's Routing Number?
The Routing Number is sometimes referred to as the Transit Number or the ABA (American Banker's Association) Number. The Routing Number is used to identify the particular financial institution that you bank with and it can be found: Checking Accounts - The routing number is found at the bottom of your personal check. Savings and Other Types of "Savings" Accounts - Deposit slips may not include the correct routing number. For accounts other than checking accounts, contact your financial institution to obtain the correct routing number to use.

Why should I enroll in student account Direct Deposit?
Direct Deposit to your bank account is the fast and efficient way to receive student account refunds, including financial aid.

Will my banking information be safe and secure?
Yes, ASU has taken steps to safeguard the banking information stored on its computer systems. It is important that you keep your UserID and password secure so that unauthorized persons cannot log onto My ASU.

Am I eligible for a Federal Pell Grant in the summer?
If you received less than a full academic year of Pell Grant in the fall and spring semester(s), you may be eligible for the remainder of your Pell Grant scheduled award in the summer. You will be automatically considered and awarded any Pell Grant funds for which you are eligible for in the summer.

AM I eligible for Federal Financial Aid?
The only way to know if you're elgibe for federal financial aid is to submit the FAFSA.

Am I eligible for the Obama Scholars Program in the summer?
The Obama Scholars Program does not provide aid for the summer semester. You may be awarded with other forms of financial aid.

Do contributors without a Social Security number have to create a FSA ID?
Yes — Contributors that do not have a Social Security number will still need to create a FSA ID. Go to studentaid.gov/fsa-id/create-account/launch and instead of entering a Social Security number, check the box indicating the Contributors that do not have a Social Security number.

The Contributor will be able to create an account, but there may be additional steps to complete identity verification.

Do I need to submit the FAFSA every year?
Yes, you need to submit the FAFSA for every year that you are in college in order to receive federal financial aid.

How can I apply for Federal Work-Study in the summer semester?
Three scenarios may occur: If you are enrolled in summer classes and have worked under the Federal Work-Study program for the preceding fall or spring semesters, you will automatically receive a summer Federal Work-Study estimate award. Once we receive a summer continuation of your job assignment or new hire form from your employer, we will change it to an actual summer Federal Work-Study award. If you are enrolled in summer classes, and you did not work under the Federal Work-Study program during the preceding fall or spring semesters, you can request for Federal Work-Study eligibility. Once we receive information about your summer job assignment from your employer, we will post an actual summer Federal Work-Study award. If you are not enrolled in the summer semester, but you wish to work under for a summer Federal Work-Study job, you must have the following: A completed FAFSA for the current and upcoming academic years on file with ASU. Be eligible for need-based financial aid for both academic years. The Federal Work-Study earnings during this time of non-enrollment will be considered as a resource for the next enrollment period, which will have an effect on your financial aid eligibility for the next academic year.

How do I accept my summer award(s)?
Accept your awards on My ASU under Finances. Remember, summer financial aid is at the end of the current academic year.

How do I apply for summer financial aid?
There is no separate summer aid application. Students who enroll for the summer and have a FAFSA on file for the aid year preceding the summer semester will be automatically considered.

How do I check the status of my FAFSA?
To check the status of your Free Application for Federal Student Aid (FAFSA®) form, do the following: Log in to fafsa.gov. Your FAFSA status can be found on the “My FAFSA” page, which displays immediately after you log in if you’ve already started or completed a FAFSA form. To check on the status of financial aid being disbursed to you or your account, check with the financial aid office at your college or career school. Note: If you submitted a paper FAFSA form, you can check the status of your application after it has been processed (roughly 7 to 10 days from the date mailed). To check on the status of your FAFSA form, contact the Federal Student Aid Information Center.

How do I correct my FAFSA?
To make corrections to your Free Application for Federal Student Aid (FAFSA®), click the Log In button on the home page and log into FAFSA on the Web, and then click Make FAFSA Corrections. When correcting your FAFSA, you can: Add or remove colleges from your application Change your e-mail or mailing address Correct any field in your FAFSA other than your Social Security Number (SSN).

How do I know if my student is dependent or independent?
To determine if you (or your student) is dependent or independent, visit the studentaid.gov site for a list of questions that will help you determine your status.

How does census affect my summer awards?
All awards, except for loans, will prorate throughout the summer census date according to our Census Policy.

How does the student or other Contributor create an FSA ID?
Go to studentaid.gov/fsa-id/create-account/launch and follow the steps to create an account. The student and the Contributor will each need their Social Security number, a valid email address and a phone number in order to complete the identity verification steps. Watch this video [3] for a step by step explanation.

How is my summer financial aid determined?
Your summer financial aid is determined based on your enrolled credit hours, your remaining aid eligibility and availability of funds.

I can't get my parent's financial information. Can I still apply for aid?
Visit the information page on the FAFSA website to learn your options if you are unable to provide parent information.

Is my financial aid file complete?
Log in to My ASU and go to the Financial Aid tab to check if there are documents that are being requested on your priority task list. Forms may be downloaded at https://students.asu.edu/forms/financialaid. If your financial aid file is complete, and you do not have awards offered, visit any one of the four ASU financial aid office locations or contact our office at 855-278-5080. Please be aware that awarding for each semester does not start until the April before the fall semester begins. If your parent is attempting to accept the Federal Parent PLUS Loan, students must first grant their parents guest access to accept a Parent PLUS Loan. Once you have granted your parent guest access, you will receive a validation code and your parent an email with instructions on how to active their guest access. Your parent will need that validation code in order to complete the activation process. It is very important that all steps are completed in order for the Federal Parent PLUS Loan to process successfully. For a complete list of steps to accepting your Federal Parent PLUS Loan, visit students.asu.edu/loans/plus#steps.

My parents are separated or divorced. Which parent is responsible for filling out the FAFSA?
Visit the information page on the FAFSA website to learn which parent to list ont he FAFSA.

My parents were denied a summer Parent PLUS Loan; are there any other loans I can borrow as a student?
You may request an additional Federal Direct Unsubsidized Stafford Loan by submitting a letter to Financial Aid and Scholarship Services in writing. If there are any remaining eligibility from the fall and spring semesters, the balance may be awarded to you.

My summer financial aid doesn't cover my costs, what are my options?
If you were not offered enough financial aid to cover your summer costs, the following options may be available. Scholarships Opportunities: For links to national scholarship searches and other valuable ASU scholarship information, you may visit our scholarship information, you may visit our scholarship web site at students.asu.edu/scholarships or contact the ASU Scholarship Office at 855-278-5080. You may also visit your college to see if they have any summer scholarships available. Student Employment: There are student employment opportunities right here on campus. The ASU Student Employment Office is always ready to help a student find a job. Please visit the Student Employment web site at students.asu.edu/employment to view part-time, full-time, seasonal, on-campus, off-campus and work-study (if eligible) job listings. Federal Direct Parent PLUS Loans: Parents of dependent students may borrow Parent PLUS Loans. See students.asu.edu/loans/plus for details. Private Education Loans: Private Education Loans are educational loans offered by private lenders, usually banks. Always remember to borrow only what you need.

Should I file for the FAFSA even if I don't think I'll qualify for financial aid?
Yes. We encourage every student to file a FAFSA, even if you think you might not be eligible. Most students are eligible for some kind of aid.

What are the FAFSA deadlines?
To be considered for federal student aid for the 2025–26 award year, you can complete a Free Application for Federal Student Aid (FAFSA) form between Oct. 2024, and 11:59 p.m. Central time (CT) on June 30, 2026. Any FAFSA corrections or updates must be submitted by 11:59 p.m. CT on Sept. 10, 2026. However, many states and colleges have earlier deadlines for applying for state and institutional financial aid. Find your state's deadline. Check with your college or career school about its deadlines.

What do I do if my (or my parents') income changes?
If your financial situation changes, you can request a review of your aid eligibility through a Student or Parent Review form.

What if I forgot my FSA ID?
If you have an FSA ID but do not remember your username, select Forgot Username. Note: If you verified your email address or mobile phone number during account creation, you can enter your email address or mobile phone number instead of your username. If you have an FSA ID but do not remember your password, select Forgot Password.

What if I or one of my Contributors do not want to provide consent when completing the FAFSA?
Each Contributor must provide consent on the FAFSA or the FAFSA will be incomplete and you will not be eligible for financial aid.

What if my financial circumstances have changed since I submitted the FAFSA?
If your financial situation changes, you can request a review of your aid eligibility through a Student or Parent Review form.

What if my parents are divorced? Who is the Contributor for my FAFSA?
The parent that is included on the FAFSA as a Contributor should be the parent that provides the most financial support to the student.

What income and tax information do I need for the FAFSA?
The 2021–22 Free Application for Federal Student Aid (FAFSA®) form asks for 2019 income and tax information. If your 2019 financial situation no longer reflects your current situation, you can complete a review form to request an additional review of your financial aid situation.

What information do I need to provide to help my student with the FAFSA?
You can learn about helping your student to financially prepare for college at studentaid.gov. Here's a list of documents you need to provide to help them complete the FAFSA.

What is the Financial Aid Notification?
A financial aid notification is the letter that students receive informing them how much financial aid a school is willing to offer.

What is the Student Aid Report?
Your Student Aid Report (SAR) is a document that gives you basic information about your eligibility for federal financial aid. It also gives you a chance to review and correct the information listed on your FAFSA, if you need to.

What types of summer scholarships are available?
For links to national scholarship searches and other valuable ASU scholarship information, you may visit our scholarships website at students.asu.edu/scholarships or contact the ASU Scholarship Office at 855-278-5080. You may also visit your college to see if they have any summer scholarships available.

When does summer financial aid disburse?
The amount of financial aid disbursed will be based on actual enrollment. Summer disbursement begins in May for students enrolled in session A or C. Students only enrolled in session B receive summer disbursements beginning early July. Specific dates will be available as we approach the summer semester on the financial aid calendar.

When is the census date for the summer term?
The census dates for all terms are can be found on our Census Policy.

Who are Contributors on the FAFSA?
Starting with the 2024–2025 FAFSA, a new term called “Contributor” has been introduced. A Contributor is someone who is required to provide information on a student’s FAFSA form. This can include:

1. The student.
2. The student’s biological or adopted parents.
3. The student’s spouse.
4. The parent’s spouse.

It’s important to note that a Contributor does not include:

1. A grandparent.
2. Foster parents.
3. Legal guardians.
4. Brother or sister.
5. Aunt or uncle.

Even if individuals from the above list helped provide for or raise the student, they are not considered Contributors for the FAFSA form.

It’s crucial to understand that having someone listed as a Contributor on the FAFSA form does not imply financial responsibility for the student’s education cost.

Will financial aid pay for summer study abroad?
You may use your financial aid towards your costs for study abroad. You can submit a cost sheet to the Financial Aid Office provided to you by the Center of Global Education Services to increase your summer costs of attendance. You will only be considered for any additional Federal Stafford Loans, Parent PLUS Loans and/or Private Education Loans.

Will there be any TEACH Grant funds for the summer semester?
If you have not received your entire TEACH Grant eligibility for the fall/spring semesters ($4,000 per academic year) and based on your enrolled credit hours for the summer semester, you may receive some or all of your remaining TEACH Grant eligibility.

Are there resources for international students to help pay for college?
Although international students do not qualify for federal and state financial aid (unless you are an eligible noncitizen), there are still options to help fund your ASU education. ASU’s New American University merit-based scholarship is awarded to a limited number of qualified international undergraduate students who demonstrate high academic achievement.

What types of aid are available to me as an international student?
Although international students do not qualify for federal and state financial aid (unless you are an eligible noncitizen), there are still options to help fund your ASU education. ASU’s New American University merit-based scholarship is awarded to a limited number of qualified international undergraduate students who demonstrate high academic achievement.

How do I accept my Federal Parent PLUS loan?
There are several steps required to accept a Parent PLUS Loan. First you, the student, must give your parent guest access to accept a Parent PLUS Loan. You will receive a validation code and your parent an email with instructions on how to active their guest access. Your parent will need that validation code in order to complete the activation process. It is very important that all the steps provided are complete in order for the Parent PLUS Loan to process successfully. For a complete list of steps please visit https://students.asu.edu/loans/plus#accept.

How do I complete a Master Promissory Note?
Follow the instructions below for the type of loan you have accepted. Completing a promissory note for the wrong type of loan will result in a delay in the disbursement of your loan funds. Check your "Priority Tasks" list on My ASU for a list of the types of promissory notes currently being requested for you to complete.

How do I complete my Federal Direct Loan Master Promissory Note (MPN), Entrance Counseling, or Exit Counseling?
Log in to your My ASU and check your task list. The specific task will be listed (e.g., 'complete Stafford Loan MPN'). Click on the item and a link will appear in a dialogue box. Follow the links.

How long do I have to accept my loan?
In general, you have until the end of the term you are enrolled in to accept your loans. Click here for more details.

I received an email about paying tuition and taking out a loan referencing ASU. Was this sent by ASU?
You may receive emails or other forms of communication regarding paying your tuition or taking out student loans that will take you to a non-ASU website. Please be aware that these websites are not affiliated with ASU nor the ASU Financial aid and Scholarship Services Office. One example is a site hosted by a company called Simple Tuition, which is completely separate from and has no ties to ASU. The ASU Financial Aid and Scholarship Services Office had no input to the content of this website, and we cannot speak to the accuracy of the data represented. Additionally, Financial Aid and Scholarship Services did not provide ASU email addresses to this company.

As always, we strongly recommend you do your own research into your student loan options and verify all data you find directly with the student loan lenders you are considering. Only the lenders can verify the accuracy of any student loan data that is attributed to them. For more information visit https://tuition.asu.edu/financial-aid/loans.

I want to apply for a Parent PLUS Loan; do I have to submit a FAFSA?
Yes, all students must complete a FAFSA before they can be awarded a Federal Direct Parent PLUS Loan. Verification of a valid FAFSA on file will be part of the credit evaluation process performed by the lender (i.e., the US Department of Education).

My parents were denied the Parent PLUS loan. Are there any additional loans I can borrow as a student?
If your parents would like to appeal their Federal Parent PLUS Loan denial, they need to contact Direct Lending Plus Credit Appeals at 1-800-557-7394. Otherwise, the student may request an additional Federal Direct Unsubsidized Stafford Loan by submitting a Parent PLUS Loan Denial Funds Request form to Financial Aid and Scholarship Services. There are specific limits on the amount of additional unsubsidized loans that may be awarded (i.e., freshmen and sophomores are eligible for an additional $4,000 and juniors and seniors are eligible for an additional $5,000).

What is the difference between a Subsidized and Unsubsidized student loan?
Subsidized loans do not accrue interest while you are in school while unsubsidized loans begin accruing interest from the time the loan is fully disbursed (i.e., if you have a fall/spring loan, the loan is fully disbursed once the spring amount is paid to your student account). Both types of student loans do not begin repayment until six months after graduation, you stop going to school or your enrollment drops below half-time status (i.e., 6 credit hours for undergraduate students and 5 credit hours for graduate students). Undergraduate students also are eligible for an interest rate reduction on subsidized loans.

If an applicant wishes to provide information about an act of sexual harassment, including sexual assault, dating/domestic violence and stalking, without making a disclosure, what are their options?
Applicants can reference a traumatic experience without providing details about the perpetrator or location/context of the harassment if they do not want a mandatory reporter to initiate a report.

What happens if a student includes information in an application/request that requires a mandatory reporter to act?
Mandatory reporters report the disclosed information in order to allow a university representative the opportunity to reach out and provide available resources to the student as well as discuss the availability of available administrative processes related to potential university policy violations.

Where can I find information about university support and resources?
Information about campus resources including advocacy assistance and confidential counseling and victim-survivor advocacy can be found at https://sexualviolenceprevention.asu.edu/resources.

Will information in this application/request be shared with anyone else at the university?
A student's private information will only be shared with individuals who need to know the information in order to process the request. The only exception to this relates to mandatory reporting of acts of sexual harassment, which includes sexual assault, dating/domestic violence and stalking. ASU takes all reports of such conduct seriously and is committed to taking appropriate action to hold violators accountable and to prevent any recurrence. In order to ensure all members of our community have access to health and safety resources should an incident occur, all ASU employees are mandatory reporters and must report allegations of sexual harassment, which includes sexual assault, dating/domestic violence and stalking.

Am I required to re-enter my bank account information each time I make a payment?
You are required to re-enter eCheck payment information, unless you create a payment profile. Payment profiles may be securely saved on QuikPAY when a payment is made. QuikPAY provides two options for creating payment profiles: When making an eCheck payment on QuikPAY, assign and save a profile name on the page titled "Provide eCheck Information". Or, Select "Payment Profiles" from the menu on the left side of the QuikPAY page to add an eCheck or credit card payment profile. After saving your payment profile, you will be able to choose your profile as a payment type. Select "Pay Bill" from the menu on the left side of the QuikPAY page and your payment profiles will be available for selection in the Payment Method drop down box.

Are other colleges and universities making similar changes?
Colleges and universities across the country have made similar changes to their credit card payment policies. Some are choosing not to accept credit card payments and others to offer credit card payments through an outside vendor, subject to assessment of a service fee.

Can I pay ASU in payments?
Yes. You can enroll in a payment plan each semester, for an additional fee.

Can I pay online without a credit card?
Yes. eChecks are ASU's preferred payment option and are accepted online with no service fee. Similar to a debit card, the eCheck electronically debits a checking or savings account. eChecks are accepted at no cost to the student and are a fast and easy payment option.

Can I pay with Visa?
Yes, Visa recently changed its merchant rules to permit the assessment of a service fee and is now a payment option.

Can I use any type of check as an eCheck?
eCheck payments can only be made from regular U.S. checking and savings accounts in U.S. dollars. Checks issued from money market accounts, credit card companies, mutual funds, brokerage accounts, home equity or other lines of credit cannot be processed as an eCheck. Personal checks are accepted by mail or in person.

Can I use my credit card to make purchases at the ASU Bookstore?
Yes. The ASU Bookstore, Sun Devil Athletics Ticket Office, and other ASU departments that currently accept credit cards will continue to do so. No service fee is assessed for these payments.

Do I need to re-enroll in the payment plan every session?
Yes. Because your financial circumstances can change from semester to semester, you have the option to enroll each semester.

How do I avoid enrollment in the ASU payment plan?
Make sure your balance is paid in full by the tuition due date, or is at least under $500 to avoid automatic enrollment in the ASU Payment Plan. Note that if you owe a balance of under $500, you will still be subject to a late fee. Review the ASU Late Charge Policy [4] for more information.

How do I cancel a Financial Guarantee Letter that has been submitted to ASU Student Accounts?
To cancel your Financial Guarantee Letter, please notify ASU Student Accounts at sponsorbilling@asu.edu. Upon cancellation, the "Third-Party Sponsor Credit" will be removed from your student account, and all unpaid charges will be due immediately.

How do I monitor my Account?
ASU will apply a "Third-Party Sponsor Credit" to your account within 5 business days of receiving the approved Financial Guarantee Letter(s). To verify that your Financial Guarantee Letter has been received and applied, please monitor your student account through My ASU and select the Finances Link at the top of the page. It is the student's responsibility to ensure ASU receives Third Party Sponsor Documents by the due date as indicated on the Tuition and Billing Calendar. If you do not see a "Third-Party Sponsored Credit" applied to the corresponding semester charges on your student account within 5 business days of submitting your Third Party Sponsor Documents, please contact ASU via email at sponsorbilling@asu.edu.

How do I pay with an eCheck?
Make eCheck payments on QuikPAY by logging in to MyASU and selecting the 'Finances' link on the upper left side, then selecting 'Pay Bill.' You can submit payment up to the amount owed on your account. To make an eCheck payment you will need your bank's routing number, sometimes referred to as the Transit Number or the ABA number, and your bank account number. This information is available on the bottom of your check or from your financial institution. An example of where to find this information on a check is also available online when an eCheck payment is made. A paper check is not required.

How do I submit my required sponsorship documentation?
Submit Financial Guarantee Letter(s) [5] to ASU Student Accounts:

Preferred Method:

Email: sponsorbilling@asu.edu
Other Methods to Submit:

Fax: 480.965.9242

In Person: Student Accounts office (Tempe, West, Downtown or Polytechnic Locations)

By Mail: Arizona State University Student Accounts Office
PO Box 870303
Tempe, AZ 85287-0303
Attn: Third-Party Sponsor Billing

How does the ASU Third-Party Billing process work, and what documents are required?
To arrange for ASU to bill your approved governmental/third-party sponsor, please submit a Financial Guarantee Letter to the Student Accounts Office by the deadline on the Tuition and Billing Calendar. ASU will only bill the Third Party Billing fee to the Sponsor if indicated on the Financial Guarantee Letter. Within 5 business days of receipt of the Financial Guarantee Letter, ASU will place a "Third-Party Sponsor Credit" on your student account for the amount indicated on your Financial Guarantee Letter. The "Third-Party Sponsor Credit" on your student account indicates that we have received your sponsorship documentation and that we will be issuing an invoice to your sponsoring agency during the semester. It does not indicate that payment has been received from your sponsoring agency. If the third-party sponsoring agency remits full payment as indicated on the ASU invoice, no further action is required from the student. If full payment is not received from the sponsor, or if further information is needed, ASU will contact the student via their ASU e-mail.

How was the payment processing fee determined?
The service fee was determined by our vendor. The University is not directly accepting credit or debit card payments for Tuition and Student Account payments; they are being accepted by our vendor who is assessing the 2.5% service fee for

processing domestic debit and credit card payments and 4.25% for international debit and credit card payments. The service fee is not paid to ASU and is not refundable, even if the related payment to ASU is refunded.

I am a military student and would like to utilize my benefits for tuition and fees, what information do I need to provide?
All military students wishing to use benefits should first contact ASU Veterans Services to become familiar with the policies and procedures in using military benefits. Veteran Services works closely with Student Business Services to ensure military tuition benefits are applied to students accounts quickly and accurately. All military students wishing to use benefits should first contact ASU Veterans Services to become familiar with the policies and procedures in using military benefits. Veteran Services works closely with Student Business Services to ensure military tuition benefits are applied to students accounts quickly and accurately.

I have been approved for Tuition Assistance (TA,) where do I submit my approved TA form?
Students using TA benefits should submit their TA Authorization Vouchers through the Pat Tillman Veterans Center website by following the below steps:

- Go to the Pat Tillman Veterans Center Forms website. [6]
- Click on the “Tuition Assistance (TA) Voucher Upload” link under “Forms for Active Duty/Guard/Reserves.”
- Select the appropriate term from the drop-down menu and upload your form using the provided link.

I have been approved for Tuition Assistance and am also eligible for the Post 9/11 GI Benefits (Chapter 33.) Can I use both benefits?
Yes, students can you both benefits simultaneously. Veteran Services always encourages students with both benefits to consult with the VA Campus Counselor to ensure they are maximizing their military benefits.

If I am using both Tuition Assistance and my Post 9/11 GI Benefits (Chapter 33,) how will my benefits be applied to my student account?
Any Tuition Assistance received will be applied to a student's account first and Post 9/11 GI Benefits will be applied after. For example, if student with 80% eligibility has tuition and fees totaling $5,500 and receives $1,500 in Tuition Assistance, the Chapter 33 benefit will then pay 80% of the remaining $4,000 balance ($3,200) leaving a balance to be paid by the student of $800.

If I enroll in the ASU payment plan before the semester begins and ends up not having a $500 balance, am I still enrolled in the plan?
Yes. If you voluntarily enroll and charges are paid before the initial designated payment deadline, you will still be assessed the nonrefundable enrollment plan fee.

My eCheck rejected. What do I do?
When ASU is notified by our bank of the rejected eCheck payment, usually seven to ten days after payment was made, a charge will be posted to your account for the full amount of the rejected payment. An electronic notification will be sent, and a $25 returned eCheck fee will be charged to your student account. See Returned Check Policy for additional information. Once the charges appear on your student account, a payment can be made in person at any campus Cashiering Office or online through MyASU. Select the "Finances" on the upper left side, then select "Pay Bill" to make payment online. Please follow up with your financial institution to determine what the error might be regarding the routing or account numbers you provided. A rejected eCheck does not necessarily mean that funds were not sufficient to cover the payment.

What happens if my Sponsor does not pay the agreed ASU charges?
If payment is not received from the sponsoring agency, ASU will notify you (via your ASU e-mail) that payment has not been received from your Sponsor and ask that you contact your sponsoring agency to arrange payment immediately. If payment is not received within two weeks from the due date of the invoice, any unpaid charges will be placed back on your student account, and payment will be due immediately. Students with accounts that become delinquent are subject to monthly late fees and will be blocked from University services, including registration, transcripts, and diplomas. Please see Delinquent Accounts and Late Charges for more information. Note: Students may receive periodic e-mails to their primary ASU e-mail address regarding the status of their account and instructions on how to resolve any specific issues

related to their third-party sponsorship. It is the responsibility of the student to monitor their ASU e-mail account and to respond to official ASU e-mails as indicated.

What if I don’t have adequate funds in my bank account when I make an eCheck payment?
Your bank balance is not accessed at the time an eCheck payment is made. You are responsible for ensuring that adequate funds are available in your checking or savings account. Your eCheck payment will be accepted online and processed to your bank as described in the "When will my bank account be charged" question. If funds are not available for the eCheck payment, or the account is invalid or closed, you will be notified by email one to three days after the original payment was made. When ASU is notified by our bank of the rejected eCheck payment, usually seven to ten days after payment was made, a charge will be posted to your account for the full amount of the rejected payment. An electronic notification will be sent to the address on file with ASU and a $25 returned eCheck fee will be charged on your student account. See Returned Check Policy for additional information.

What if I receive a refund for my tuition?
The 2.5% service fee is nonrefundable. Nelnet assessed the service fee for the processing of the original credit card transaction and therefore it is nonrefundable, even if the related payment to ASU is refunded.

What is an eCheck?
eChecks are ASU's preferred payment method and are accepted with no service fee or additional cost to the student. eCheck is a fast and simple payment method. Similar to a debit or check card, the eCheck electronically debits a checking or savings account.

What is the Third-Party Billing Fee and who pays the fee?
The Third-Party Billing Fee is a non-refundable per semester administrative fee to cover the costs associated with processing the sponsorship paperwork, preparing invoices and billing the third-party agency on behalf of the student. ASU will bill this fee to the sponsor agency only if indicated on the Financial Guarantee Letter. Please remember to include this fee when requesting the Financial Guarantee Letter from your Sponsor. Students will be responsible for paying the Third-Party Billing Fee if not paid by their Sponsor.

What types of charges can be paid with an eCheck?
eChecks are accepted online for payment of tuition, housing, and other student account charges. Login to MyASU and select the Finances tab at the top of the page, then click 'Pay Bill' to be transferred to QuikPAY to pay your ASU charges. In QuikPAY select "Pay Bill" from the menu on the left-hand side to securely process your payment.

When are my required sponsorship documents due?
Visit the Tuition and Billing Calendar for Third Party Sponsor Document submission deadlines to avoid automatic enrollment in the ASU Payment Plan and/or Late Fees.

When will my bank account be charged for the eCheck payment?
Your bank account will be charged overnight for payments made prior to 3:00 PM Arizona time and the next night for payments made after 3:00 PM Arizona time. eCheck payments made on weekends or holidays will be processed on the next business day.

Why do credit card transactions have a service fee?
ASU does not directly accept credit and debit cards for payment of tuition and Student Account charges, but has arranged for a third-party vendor to accept Visa, MasterCard, Discover and American Express when payment is made online. The third-party vendor, Nelnet assesses a 2.5% service fee for processing the transaction. The service fee is not paid to ASU and is not refundable, even if the related payment to ASU is refunded.

Why doesn't ASU directly accept credit and debit card payments?
ASU made the decision several years ago to stop accepting credit card payments for tuition and other student account charges after careful consideration because of the significant and rising cost to the University of credit card processing fees. The cost of accepting credit cards was paid out of tuition and other University revenues, reducing revenue available for campus services to all students, regardless of whether or not they used a credit card to make payments. The savings

realized by ASU because of this change helps fund, for example, library acquisitions, more faculty, classroom upgrades, and other student enhancements. The University has made arrangements for a third-party vendor to accept Visa, MasterCard, Discover and American Express when payment is made online. The third-party vendor, Nelnet assesses a 2.5% service fee for processing the transaction. The service fee is not paid to ASU and is not refundable, even if the related payment to ASU is refunded.

Will a reduction in my credit hours affect my TA eligibility?
Students who may be considering reducing their credit hours are advised to consult with Student Business Services to ensure they fully understand the financial implications of the reduction. Per Federal Regulations, the TA program must follow the same guidelines as Department of Education Title IV funding and therefore based on the student's last day of attendance, TA eligibility and funding may be affected by a reduction in credit hours. Unearned TA funding up to 65% for the period enrolled may reduce the student's military benefit. If reduction in hours is due to a military service obligation, submitting a military activation form may be the course of action to take. It can be found at https://veterans.asu.edu/forms.

Will the service fee appear on my confirmation email?
You will receive two emails after a credit card payment is made. One email confirms the actual amount paid to ASU and applied to your ASU charges. The second email confirms the 2.5% service fee assessed and charged to your credit card by Nelnet.

Are current qualifying noncitizen students eligible for in-state tuition?
Yes. Students who meet the requirements of Prop. 308 are eligible for in-state tuition for any semester that starts after Dec. 13, 2022. Prop. 308 does not have a retroactive effect, so students will not be reclassified for semesters that began prior to Dec. 13, 2022.

Do the qualifying noncitizen students eligible for in-state tuition under Prop. 308 also need to prove domicile under A.R.S. § 15-1802?
No. A qualifying noncitizen student will pay in-state tuition if they meet the requirements of A.R.S. § 15-1803(B):

1. The student attended any public or private high school or homeschool equivalent while physically present in Arizona for at least two years; and
2. The student graduated from any public or private high school or homeschool equivalent in Arizona or obtained a high school equivalency diploma in Arizona, i.e., a GED.

Do the two years of physical presence in Arizona while attending high school need to be consecutive?
No. Students do not need to have two years of consecutive presence. However, to be eligible, they still must provide documentation that they both:

1. Attended any public or private high school option or homeschool equivalent while physically present in Arizona for at least two years; and
2. Graduated from a public or private high school option or homeschool equivalent or obtained a high school equivalency diploma in Arizona.

How does Prop. 308 impact eligibility for financial aid?
Prop. 308 repealed an Arizona law (A.R.S. § 15-1825) that prohibited students who were not citizens of the United States and who were "without lawful immigration status" from receiving financial assistance subsidized or paid in whole, or in part, with state monies, such as tuition waivers, fee waivers, grants, scholarships, and any other type of financial aid or assistance.

With the passage of Prop. 308, all students – regardless of immigration status – may be eligible to receive financial aid paid in whole or in part with state monies to attend an Arizona public university or an Arizona community college. While Prop. 308 eliminated barriers to eligibility for financial aid based on immigration status, a student must still meet all other requirements of the state financial aid they are seeking.

To be eligible for state financial aid, a student does NOT need to meet the Arizona high school attendance or graduation criteria. That applies only to eligibility for in-state tuition.

Prop. 308 does not impact the eligibility requirements to receive federal financial aid.

Should the students who are impacted by Prop. 308 complete the FAFSA application?
Any student who wants to apply for financial aid and who can complete the FAFSA, should complete the FAFSA. However, a student must have a Social Security number to complete a FAFSA application and some of the students who are impacted by Prop. 308 may not be eligible to complete the FAFSA. Students can visit ssa.gov/pubs/EN-05-10009.pdf for more information on how to obtain an SSN.

What does Prop. 308 do?
Prop. 308 made two significant changes to Arizona law.
First, with the passage of Prop. 308, a qualifying non-citizen student, with statutorily defined exceptions [7], is eligible for in-state resident tuition at state universities and community colleges if the student both:

1. Attended an Arizona public or private high school, or homeschool for a minimum of two years; and
2. Graduated from an Arizona public or private high school, or homeschool equivalent, or obtained an Arizona high school equivalency diploma, e.g., a general equivalency diploma (GED).

Second, Prop. 308 repealed A.R.S. § 15-1825, and now non-citizen students are eligible to receive financial aid funded in whole, or in part, with state monies, regardless of immigration status.

What other scholarships are the students impacted by Prop. 308 now eligible to apply for?
ASU offers a number of financial aid opportunities, including merit scholarships and need-based aid. Students who meet the requirements of ASU scholarships and financial aid programs are now eligible to receive them, regardless of immigration status. For additional information, visit the New American University scholarship page [8] or use the first-year merit scholarship estimator. [9]

What should I do if I have questions about my residency status?
Please contact a team member at residency@asu.edu about your ability to qualify for in-state tuition under Prop. 308.

When the law takes effect, are students who are eligible for in-state tuition under Prop. 308 also eligible for the Arizona Promise Program?
No. To qualify for the Arizona Promise Program, a student must meet all the eligibility requirements under A.R.S. § 15-1701. One requirement of the Promise Program is that a student must qualify for a Pell Grant, which is federal need-based financial aid. Aliens without legal immigration status, who are not citizens or legal permanent residents, do not qualify for federal financial aid. More information about the Arizona Promise Program, including eligibility requirements, is available at: azregents.edu/arizona-promise-program.

Students impacted by Prop. 308 may be eligible for other state or college financial aid, in addition to private scholarships.

When will these qualifying noncitizen students be eligible to receive in-state tuition?
Prop. 308 became effective Dec. 5, 2022, after the election results were certified, and proclaimed to be law by Governor Ducey. ASU will begin to apply it toward the spring 2023 semester.

Who qualifies for in-state tuition under Prop. 308?
A qualifying noncitizen student, other than the nonimmigrant aliens described under 8 U.S. Code § 1101(a)(15), are eligible for in-state tuition under Prop. 308, regardless of immigration status, if the student meets both of the following criteria:

1. The student attended any public or private high school or homeschool equivalent while physically present in Arizona for at least two years; and
2. The student graduated from any public or private high school or homeschool equivalent in Arizona or obtained a high school equivalency diploma in Arizona a, i.e., a GED.

Will students with visas be eligible for in-state tuition?
Nonimmigrant aliens described under 8 U.S. C. § 1101(a)(15) are not eligible for in-state tuition under Prop. 308. This includes, but is not limited to, students who hold F1, F2, J1, H4 or H1 visas. For a complete list, please look at 8 U.S. C. § 1101(a)(15).

Nonimmigrant aliens described under 8 U.S. Code § 1101(a)(15) are not eligible for in-state tuition under Prop. 308.

Am I eligible for the Obama Scholars Program?
All Arizona high school graduates who have been admitted to ASU under assured admission, have a completed FAFSA before January 15 (submitted all financial aid items on their My ASU task list) and meet the program criteria will be automatically considered for the program. Selection into the Obama Scholars Program will continue until funds have been exhausted. For program criteria please click here.

Can I defer my merit scholarship?
Click here [10] to view the deferment application and policy. Students may not attend another educational institution while on deferment.

Can I edit an application that I've already submitted?
You can edit an application until the submission deadline listed on the scholarship (most are February 1). Keep in mind that any changes to responses will result in updates to all of your responses to that same question in each of your applications. To edit your application, you must log in to the ASU Scholarship Application Portal ASURITE ID and password at https://scholarships.asu.edu/applications. [11]

Can I teach any subject or grade?
As a condition for receiving a TEACH Grant, you must teach -in a high-need field; -at an elementary school, secondary school, or educational service agency that serves students from low-income families; and -for at least four complete academic years within eight years after completing (or ceasing enrollment in) the course of study for which you received the grant. High need fields include: -bilingual education and English language acquisition, -foreign language, -mathematics, -reading specialist, -science, and -special education, as well as -any other field that has been identified as high-need by the federal government, a state government, or a local education agency, and that is included in the annual Teacher Shortage Area Nationwide Listing (Nationwide List).

Can I upload a resume and/or other documents?
Yes. Certain applications do require a resume, coversheet, and/or the submission of additional documents. For those applications, you will need to review the scholarship criteria and submit all of the requested documents in the ASU Scholarship Application Portal by the published deadline. You will not receive any reminders to complete these steps and incomplete applications will not be reviewed.

Do I have to teach in one of those 'high-need' fields to keep the money as a grant and not have to pay it back as a student loan, or would it count if I was a regular teacher?
Yes, that could happen because the elementary classroom is not considered a "high-need field". However, a special education elementary classroom is considered an area of high need. It will be your responsibility to choose a position that meets the service agreement requirements.

Does part-time teaching or substitute teaching count?
No, you must be a full-time teacher in a high-need field in a public or private elementary or secondary school that serves students from low-income families.

Does pursuing an Elementary Education degree with middle school math or science qualify me for the grant, or must it be secondary math and/or science?
Generally a middle school math or science teacher is considered an area of high need. The U.S. Department of Education guidelines states: 'The TEACH Grant Program provides up to $4,000 a year in grant assistance to a student who agrees to serve for at least four years as a full-time teacher in a high-need field in a public or private elementary or secondary school that serves students from low-income families.' Please note: The TEACH Grant maximum award amount is

impacted by sequestration each academic year. This can result in an increase or decrease in the TEACH Grant amount you will receive due to the scheduled percentage reduction determined by the Budget Control Act of 2011.

How do I accept my scholarship?
For freshmen, paying the enrollment deposit automatically accepts a university merit scholarship. Continuing students need to accept all scholarships and can be done through My ASU.

How do I apply for a university merit scholarship?
When a student applies to the university, their high school academic record is reviewed and based upon G.P.A., test scores, and class ranking he/she may be offered a scholarship.

How do I apply for scholarships on ASU's Scholarship Universe?
An ASUrite user ID and password are required for you to sign into ASU's Scholarship Universe [12]. Once logged in you can begin building your profile to be matched with scholarships.

How do I apply for the TEACH Grant; is it separate from applying for financial aid?
You apply for the TEACH Grant by completing a FAFSA. ASU will select students who are in the appropriate majors and offer them the TEACH Grant. Students will be required to accept the grant and complete entrance counseling as well as an Agreement to Serve.

How do I know if I have successfully submitted my application?
Unless specifically stated otherwise, responses to each question are required for successful submission. Upon submission of your application, you should see one of two messages: If you successfully completed all required responses, you will see a message stating, "Your application was successfully submitted/saved." You will be routed to the ASU Scholarship Application Portal where you can edit your applications or search for additional scholarships. If you did not complete a required response, you will see an error message indicating which responses are missing, and the application will reload to highlight missing fields. Remember that certain scholarships may require the submission of additional materials such as a letter of recommendation or a cover sheet. You must submit the supplemental materials in the portal by no later than the deadline listed on the scholarship (most are February 1 each year) for your application to be considered complete. You will not receive any reminders to complete these steps and incomplete applications will not be reviewed.

How do I upload a letter of recommendation?
If the scholarship that you are applying for requires letters of recommendation, you will be able to enter the names and email addresses of the individuals you would like to submit a letter of recommendation on your behalf. Your reference will receive an email notification directing them to the page to submit their recommendation. You can view the status of your letter of recommendation requests for each academic year’s application by visiting your ASU Scholarship Portal and clicking on the "Recommendation requests" tab. You will have an option to send your recommender a reminder after two weeks.

How is cumulative GPA calculated and when are ASU merit scholarships renewed?
Cumulative ASU GPA represents all of the grades you received while attending ASU. Scholarships are considered for renewal after the spring grades have been posted.

How is the grant amount of the Federal TEACH Grant calculated?
ASU must monitor your eligibility every year. If you are receiving any federal financial aid, all sources of your financial aid (scholarships, grants, waivers, third-party payments, loans, etc.) must be calculated. The total of all sources cannot exceed your estimated cost of attendance (COA).

How many years do I have to teach?
You must teach at least four years as a full-time teacher within an eight year period of time.

I currently have the TEACH grant, but received a GPA below 3.25 in one semester, but raised it above 3.25 the following semester; does my award start as a grant, turn into a loan and then turn back into a grant?
Neither, if you were awarded a TEACH Grant because your GPA is 3.25, you must maintain the 3.25 or increase the GPA in future terms to remain eligible for any additional TEACH Grant awards. If your GPA goes below 3.25, any old awards will remain as grants until you finish the program (or withdraw from school or notify the government that you do not intend to teach). Once graduated or withdrawn, the service requirement begins and the U.S. Dept. of Education will monitor your progress. You must provide them with documents showing that you are fulfilling your agreement to serve on an annual basis.

I want to transfer to ASU from either Northern Arizona University or the University of Arizona. Can I receive the merit scholarship I was awarded from high school to attend ASU? (also called portability)
No, only university eligible students receiving the Regents High Honors Endorsement (RHHE) scholarship may transfer their RHHE award to ASU under certain conditions. The scholarship will be awarded for the amount of tuition when the student would have entered the university. The RHHE transfer request form, which lists additional eligibility criteria, can be found online at http://students.asu.edu/forms/scholarships.

I was offered a better scholarship from another university, will ASU match the offer?
Please contact Undergraduate Admissions at 480-965-3040.

I will not graduate in 8 semesters; can I apply to receive my scholarship for an extra semester or an extra year?
New American University Scholarships are all awarded for up to eight semesters and will not be extended beyond eight semesters. These scholarships are awarded for fall and spring only.

If I do not meet the TEACH grant obligations, when does the interest start accruing?
The interest on your converted grant starts accruing from the original disbursement date of the grant.

If I get below a 3.25 but raise my GPA the following semester, do I still qualify for the grant or is it a one-time opportunity only?
If you raise your GPA to 3.25, submit a Teach Grant Request form to be considered for teach grant eligibility. ASU must consider your cumulative ASU GPA in this case.

Is it required to teach in a high need area for four years and in a specific subject area for two, for a total of six years?
As a condition for receiving a TEACH Grant, you must teach for at least four complete academic years within eight years after completing (or ceasing enrollment in) the course of study for which you received the grant. Additionally, you must also teach at an elementary school, secondary school, or educational service agency that serves students from low-income families; and teach in a high-need field.

Is the TEACH Grant offered year round or only offered at a specific time of the year?
The TEACH Grant can be year round if the student has not used their annual limit in the fall and spring. At ASU, summer sessions are 'trailing semesters', meaning that summer is the end of the academic year.

Is there any way the teaching can be deferred for a year or two?
Yes, you must teach at least four years as a full-time teacher within an eight year period of time.

Is there anything I need to do to document my TEACH Grant?
You must certify your teaching service or your intent to teach annually to FedLoan Servicing servicer for the TEACH Grant for the U.S Department of Education. Verification of the intent to teach is required if you are still enrolled in a TEACH Grant eligible program of study, but have not received additional TEACH Grants. If you do not certify your teaching service, your grant will convert to an unsubsidized loan.

My Special Education degree qualifies me for both Special and Elementary Education certification; if I get hired on as an elementary teacher, and I teach in an elementary classroom, does my grant turn into a student loan?
Yes, that could happen because the elementary classroom is not considered a “high-need field”. However, a special education elementary classroom is considered an area of high need. It will be your responsibility to choose a position that meets the service agreement requirements.

Questions pertaining to the scholarship listing.
If you have questions about a specific scholarship, please refer to the listing for contact information for that specific scholarship.

What are the criteria needed to receive a merit scholarship as an incoming freshman?
ASU merit scholarships are awarded based on excellence in academics. To see if you may be eligible for a scholarship, visit ASU's Scholarship Estimator.

What if I qualified and accepted the grant, then switched majors for a year and come back to education, met the eligibility criteria for the grant, completed the program and taught for four years in an eight year period?
The award would still be a grant because you were within the time to complete the program, unless you stop attending or change your career field out of teaching. The government will be requiring you to send periodic confirmations.

What if my family moves and I have to leave the state; will it count if I teach in a low-income school?
TEACH Grant is a nationwide program; you may perform your service obligation in any state. You must be a full-time teacher in a high-need field in a public or private elementary or secondary school that serves students from low-income families.

What if something happens and I can't teach or I can't find a job in a low-income area?
If you do not meet the requirements of your service obligation, all TEACH Grants you received will be converted to Federal Direct Unsubsidized loans. You must repay these loans in full, with interest charged from the date of each TEACH Grant disbursement. Elementary and secondary schools (public and private) and educational service agencies serving low-income students are listed in the annual Teacher Cancellation Low-Income Directory. In addition, elementary or secondary schools operated by the U.S. Department of the Interior’s Bureau of Indian Education (BIE) or operated on Indian reservations by Indian tribal groups under contract or grant with the BIE qualify as low-income schools. If you have questions about your TEACH Grant converting to a Federal Direct Unsubsidized loan or about meeting TEACH Grant requirements contact the TEACH Grant servicer, FedLoan Servicing, at 1-800-699-2908 from 8 a.m.–9 p.m. Eastern time, Monday through Friday.

What Is the TEACH Grant Agreement to Serve or Repay?
Each year that you receive a TEACH Grant, you must sign an Agreement to Serve or Repay and TEACH Grant Counseling on the U.S Department of Education TEACH Grant website. The TEACH Grant Agreement to Serve or Repay and TEACH Grant Counseling explains the terms and conditions of the service obligation you must agree to fulfill as a condition for receiving a TEACH Grant. By signing the Agreement to Serve or Repay and completing Counseling, you agree to these terms and conditions and acknowledge your understanding that if you do not fulfill the service obligation, the TEACH Grant funds you received will be converted to a loan that you must repay.

What types of scholarships are available?
For links to national scholarship searches and other valuable ASU scholarship information, you may visit our scholarship website at https://students.asu.edu/scholarships.

What will happen if I do not meet the renewal criteria for my scholarship?
If you do not meet or exceed the renewal criteria by the end of each spring semester, you may review the following options to determine your eligibility.

When do scholarship applications become available?
Portal applications open October 1 each year. Please continue to check back throughout the year as new listings are added.

When I return to school after a deferment, how do I get my scholarship reinstated?
When a student is ready to return to school after a deferment, he/she must submit a scholarship reinstatement request notifying the scholarship office that they will be returning to school. Completed requests must be submitted by no later than 30 days prior to the semester you are approved to return. In the case of an internship or mission deferment, the student must also submit proof of completion. If the student is returning from a medical deferment a note from the treating physician is needed. If the student is a National Merit Scholar they must also contact the National Merit Corporation. The reinstatement request and eligibility criteria can be found online at scholarships.asu.edu and is listed with online forms and publications.

When is the deadline for applying for the grant?
The same deadline to apply with the FAFSA and meet eligibility requirements applies to the TEACH Grant. The FAFSA must be received, along with the Agreement to Serve and entrance counseling, before the last day of class of the fall semester (for students not attending the following spring semester), before the last day of class of the spring semester (for students not attending the following summer semester), or before the last day of summer (for students attending summer).

When is the grant going to be disbursed?
For students that are awarded, ASU will disburse the TEACH Grant within five business days after receiving confirmation that the student has completed the following steps: Accept the TEACH Grant on My ASU under Finances and then Financial Aid. Complete the TEACH Grant Entrance Counseling and Agreement to Serve on the TEACH Grant page on StudentLoans.gov.

When will the award decisions be made and when will I be notified?
Many of the scholarship application deadlines are in February and March each year; however, it is important that you review deadlines carefully as they do vary. Scholarship awards are very competitive and if you are selected, you will be notified by the awarding office noted in the scholarship listing. We ask that you please not contact the awarding office regarding the status of the review or to see if you have been selected as a scholarship recipient. Scholarship recipients are typically notified of selection in April and May.

Where should the private donor of my scholarship send the award check?
Arizona State University uses Backpack to receive outside scholarship payments. Outside scholarships are funded by organizations or individuals other than their parents/guardians. 529 checks are not considered outside scholarships. ****ASU no longer accepts paper checks and all payments must now be submitted online.

Backpack Scholarship Submission Portal [13]

If your organization has questions, please contact support@backpackpay.com.

Who do I contact if I have issues?
ASUrite User Id and/or password difficulties: Visit contact.asu.edu or call 1-855-278-5080.

Who should I contact with question regarding my TEACH Grant Obligations or my grant converting to a loan?
As of July 2013, FedLoan Servicing began servicing TEACH Grants for the U.S Department of Education. Customer service representatives are available at 1-800-699-2908 from Monday through Friday 8:00 AM – 9:00 PM (ET). You may also access information about your TEACH grant through the website MyFedLoan.org/TEACH to assist in tracking your service obligation.

Why isn't my scholarship listed with my other financial aid?
Scholarships are posted when the funds are received. Please contact the scholarship donor to establish the date when your scholarship funds will be sent to ASU.

Will I be receiving a President's, Provost's, University or Deans Scholarship?
To check your eligibility for a merit award, please visit ASU’s Scholarship Estimator. Please be aware this is an estimate and may not be an accurate reflection of your actual award.

Would we be eligible for it even though we don’t meet the 'high-need' requirement (special education, etc.)?
To keep the money as a grant, you must meet all the criteria of your service obligations described in your agreement to serve.

Can I work in a non-Federal Work-Study job on campus?
You may work Hourly (non-FWS) during the summer without attending summer classes: If you are in a degree program, was enrolled in the spring semester and did not graduate. If you are an incoming student and are admitted, and enrolled, for the fall semester. If you are in a degree program and took only 1 credit hour in the spring, you must be enrolled in summer or fall. Visiting students only attending the 1st summer session at ASU can only work from the beginning of the summer term until the end of the 1st summer session. Visiting students only attending the 2nd summer session at ASU can only work from the beginning of the 2nd summer session until the end of the summer term. International students with an F-1 visa may work up to 40 hours per week during the summer term if they are enrolled full time for the following fall semester.

Am I eligible for a tax credit?
Information Services for the Tuition and Fees Deduction and the Education Credits ASU cannot provide personal tax advice to students as each student's tax situation depends upon his/her own individual circumstances. Each student and/or their parents must determine eligibility for the tuition and fees deduction or one of the education credits (American Opportunity or lifetime learning credit). For authoritative information, we recommend that you visit the IRS web site at: www.irs.gov/formspubs/ You can contact the IRS for telephone assistance, including requesting forms and publications, at 1-800-829-1040. At the IRS web site you can review: IRS Publication 970 "Tax Benefits for Higher Education", which includes chapters on the Hope credit, the lifetime learning credit, and the tuition and fees deduction. Form 8863 "Education Credits (American Opportunity, Hope and Lifetime Learning Credits)". Instructions for Form 1040 or 1040A. IRS Publication 17 "Tax Guide for Individuals". The tax rules regarding eligibility for, calculation of, and limitations on the tuition and fee deduction and education credits can be complex. For this reason, you may want to consult your tax advisor to determine whether you are qualified to claim the education expense tax credits and deduction.

Can I view a current or prior year’s 1098-T?
You can view your current or prior 1098-T forms online at any time. You can view all 1098-T tax forms by logging in to My ASU,selecting the "Finances" tab at the top of the page and selecting the "IRS 1098 T" option. On the next screen, select the year you would like to view by clicking the links available.

I am not a US Citizen. What does 1098-T mean to me?
Information for Nonresident Aliens The Internal Revenue Service (IRS) does not require ASU to file a Form 1098-T for foreign students who are not US residents for tax purposes. This is because non-resident alien students are not eligible for education tax benefits. However, ASU cannot definitively determine which foreign students are residents for tax purposes. Also, the IRS does require ASU to provide a 1098-T to a non-resident alien student who requests one. For these reasons we provide 1098-T forms to all students, including foreign students who may or may not be eligible for an education tax benefit.

What do all the boxes on my 1098-T mean?
Please reference the Explanation of IRS Form 1098-T and Form 1098-T Supplemental Information for more information.

What is a 1098-T?
The IRS Form 1098-T is an information form filed with the Internal Revenue Service. The IRS Form 1098-T that you received reports amounts paid to you for qualified tuition and related expenses, as well as other related information. You, or the person who may claim you as a dependent, may be able to take either the tuition and fees deduction or claim an education credit on Form 1040 or 1040A for the qualified tuition and related expenses that were actually paid during the calendar year. The Form 1098-T Supplemental Information that ASU is providing over the Internet can assist you and your tax preparer in completing your tax return. Follow the instructions provided on the Form 1098-T Supplemental Information page to view and print paid tuition information. There is no need to attach Form 1098-T to your tax return. All information and assistance that ASU can provide to you is contained in this notice. There is no IRS requirement that you must claim the tuition and fees deduction or an education credit. Claiming education tax benefits is a voluntary decision for those who may qualify.

What is included in my 1098-T?
Box 1 of Form 1098-T reports the qualified tuition and related expenses paid during the calendar year. Qualified tuition and related expenses are sometimes referred to as qualified education expenses, although the terms are not always interchangeable. For purposes of the Form 1098-T provided by Arizona State University, the following categories of charges are included or not included in qualified tuition and related expenses: Qualified Tuition and Related Expenses Included Not Included Resident and Non-resident Tuition Graduate and Undergraduate Program Tuition Graduate and Undergraduate Differential Tuition Resident Surcharge Special Class Fees icourse & ocourse Fees Recreation Fee Financial Aid Trust Fund Fee Associated Students of Arizona Fee Student Programs Fee Technology Fee Health and Wellness Fee Student Service Facility Fee Late Charges Application Fees Processing Fees Health Insurance Premiums ASU Payment Plan Fee Room and Board Charges Course Related Books & Equipment Registration fees paid for non-credit courses Effective Reporting Changes for 2018 Due to tax reporting requirements effective for calendar year 2018, ASU will now report all payments for qualified tuition and related expenses in Box 1. Please note this is different from prior years where only "billed" information for qualified tuition and related expenses was reported in Box 2. ASU will continue to provide students with additional information of their paid information through the Form 1098-T Supplemental Information page of this web site.

Why didn’t I receive my 1098-T?
If you did not receive an IRS Form 1098-T for the current calendar year, possible explanations are: Arizona State University did not have a valid social security number on file for you. Call (480) 965-9834 to verify your social security number. Arizona State University did not identify any information to report. This would include having zero amounts for payments received for qualified tuition and related expenses, scholarship awards, adjustments to scholarship awards and adjustments for a prior year. See Explanation of IRS Form 1098-T Tuition Statement for more information regarding how paid tuition and related fees were determined. ASU did not have a current mailing address for you. Please ensure that your address information is up to date through My ASU. You can view your current or prior 1098-T forms online at any time by logging in to My ASU, selecting the "Finances" tab at the top of the page and selecting the "IRS 1098 T" option. On the next screen, select the year you would like to view by clicking on the link available.

Does Arizona State University participate in the Western Undergraduate Exchange Program (WICHE or WUE)?
The Western Undergraduate Exchange(WUE) is a program coordinated by the Western Interstate Commission for Higher Education (WICHE). Residents of western states (other than Arizona) may enroll in the ASU WUE program at a tuition rate of 150 percent of Arizona resident tuition plus all applicable fees. WUE students may be eligible for an ASU WUE merit-based scholarship, but are not eligible for other ASU non-resident university merit scholarships or grants. Students must apply to and enroll in one of the ASU WUE-eligible majors/programs. These scholarships are awarded by Undergraduate Admissions. Please contact Undergraduate Admissions at 480-965-3040.

My financial aid does not cover my costs, what are my other options?
If your financial aid does not cover your costs, the following options may be available to assist you with college expenses. Scholarship Opportunities: There are a multitude of scholarships available to students who meet donor criteria. Visit https://students.asu.edu/scholarships to view a comprehensive list of available scholarships and application information. You can also use FastWeb, a scholarship search engine, to assist you in finding possible scholarship opportunities. Student Employment: There are student employment opportunities right here on campus. The Student Employment Office is always ready to help a student find a job. We recommend that you visit https://students.asu.edu/employment to view all types of student job listings. Parent PLUS Loans: Parents of dependent students may borrow Parent PLUS Loans. See https://students.asu.edu/loans/plus for details. Private Education Student Loans: These loans are educational loans offered by private lenders – usually banks. Visit http://students.asu.edu/loans/private for more info on private education student loans.

Library resources

About ASU Library

At Arizona State University, we are building a new library for the 21st century – one that is as inspiring as it is welcoming, both an incubator of creativity and a monument to human complexity. As new technologies, disciplines and opportunities for discovery continue to emerge, the learning and research needs of ASU students and faculty demand a library that is both agile and robust, community-centered and service-minded, imaginative and engaged, and equipped to support a growing and dynamic New American University.

Mission and vision [1]
Who we are [2]
Inclusion [3]
Our libraries [4]
By the numbers [5]
Staff directory [6]

The library is your partner

A critical partner in realizing the New American University model and fulfilling ASU's charter.
We support the goals and mission of the university; embody and embolden the knowledge network of ASU; and are truly interdisciplinary, socially embedded, community-driven and use-inspired.

Public servants

Our focus is on service.

Problem-solvers and collaborators

We believe in partnerships and cross-disciplinary approaches.

Cultivators of inclusion

ASU Library is a space of potentiality, out of which many futures can be built and of which none are excluded.

Supporters of student success

We support the needs of learners.

Advocates of open access and discovery

We support open access principles.

Preservationists and futurists

Our services support, maximize and preserve discovery.

Collections

ASU Library provides access to millions of information resources [1] in support of scholarly research, inquiry and education of ASU affiliated learners, researchers and staff. Our collections also support programs that offer pathways to an ASU education, along with K-12 outreach and community partnership initiatives. The library holds resources in many categories, including: scholarly journals and books, databases, microforms, audiovisual materials, rare books, manuscripts, archives, maps and government information. Featured specialized collections include: University archives, Arizona and regional materials, and research collections related to communities and peoples who are closely connected to the region, with special focus on Latinx, Chicano/Chicana, and Indigenous peoples. The library also facilitates access to openly licensed materials, such as those materials licensed to be widely used in accordance with Creative Commons Licensing. [2]

ASU Library employs a personal approach to the design and management of our collections. We engage with our communities in dialogue in order to select and manage information resources that inform, inspire and engage them. These conversations, supplemented with data analysis and other forms of feedback, are used to develop useful and interesting collections for our communities.

Our collections

Black Collections

An archival repository focused on creating a robust community collection dedicated to documenting the lived experiences of Black people living and thriving in Arizona.

Explore our Black Collections [3]

Community-Driven Archives Initiative

A three-year project designed to build and expand community-driven collections to preserve and improve Arizona's archives and to give voice to historically marginalized communities.

In the library

When you visit the ASU California Center Library, you will find people, spaces and gear to help you get things done.

- Printers and computer workstations to use.
- Chargers, calculators and creative tools to check out.
- Expert staff to answer questions at the information desk.

Creative spaces, tools and collections

Media Lounge

The Media Lounge may be reserved for up to six people to watch shows, stream content or connect using Zoom Room technology and media equipment.

Reserve the Media Lounge [11]

Swatch Room

Our Swatch Room offers students a wide selection of materials such as fabric, plastic, wood, marble, vinyl and buckles. Materials are ideal for creating mood boards, dioramas, collages and more.

Draping Area

A space for exploration and experimentation, the draping area encourages hands-on discovery where you can study different forms, manipulate fabrics and transform concepts into wearable creations.

Trend forecasting services

Examine emerging trends across women’s, men’s, children’s, sportswear and streetwear, along with insights on color and textiles. These forecasts predict macro trends 18 to 24 months in advance!

Magazines and print materials

Access the entire run of Vogue (U.S.) and Harper's Bazaar magazines for historical reference, available self-serve in the library. For contemporary fashion, browse the Gap Press Collections — bound books showcasing images from major runway shows, covering the 1990s to 2010s.

Video and audio resources

Discover "Videofashion" vintage runway videos, FIDM Debut student shows from 1980 to 2016 and a selection of popular media (DVD, Blu-ray), including movies, shows and documentaries.

Fashion Future Collection

Created by international designers and manufacturers, this innovative study collections allows you to interact with unique sustainable materials made with Tyvek, mushrooms, audiocassettes, coconut shells and even wine corks.

More special collections

Visionaire

An artist Book Serial featuring unique, one-of-a-kind issues. Each has its own content, format and featured artists or editors. Available by request at the Information Desk.

Pattern collection

20th-century patterns for women's, men's and children's clothing, featuring brands like Butterick, McCall's, Simplicity and rare publishers. Browse the index of pattern covers in the library and request materials at the Information Desk.

American Fabrics

Explore early 20th century back issues, including fabric samples offering valuable insights into costume and fashion history. Available in the library.

Mail order catalogs

A collection of 20th-century mail order catalogs from Montgomery Ward, Sears, Spiegel and more. Ask for catalogs at the Information Desk.

About the Design and the Arts library

The Design and the Arts Library is located on the first floor of the Design North building. This portion of the ASU Library collection focuses strongly on design subjects, including: architecture, landscape architecture, interior design, graphic design, industrial design, and urban planning. The Design and the Arts Library houses approximately 50,000 books, journals, and media items, as well as a special collection of primary source materials and archival drawings.

Locating missing books or journal articles

If a needed item (book or journal) is not on the shelf, please ask at the library's Information & Check Out Desk. If the item is checked out or is missing, and you are an ASU student, faculty, or staff member, you may request a copy through Interlibrary Loan [1]. If material is not checked out, you can initiate a search by requesting the item through Library One Search [2]. When the material becomes available, you will be notified via your ASU email.

About the Downtown Phoenix campus Library

The Downtown Phoenix campus Library, one of seven ASU Library locations, is located in the Information Commons in the lower level of the University Center building (411 N. Central Ave.). The full rich research collection of the entire ASU Library, both in print and online, is provided through the library. Students, faculty, and staff have access to over 275 research databases and almost 50,000 full text electronic journals which are available both on and off campus. Over 25,000 books and other research resources focusing on materials of particular interest to majors in the anchor fields taught at the Downtown Phoenix campus [1] are available onsite, with ready access to the over four million volumes in the ASU Library. In addition, our expert librarians are available to provide personalized research assistance.

Group study [2] rooms equipped with white boards and video projectors are available in the Information Commons and provide a great opportunity to collaborate and interact with other students. A few group study rooms have computers and DVD/VHS players. There are over 65 computers available for student access, including 10 dual boot iMACs and several workstations for students with disabilities.

Please note, building access at our Downtown Phoenix campus Library is limited to current ASU students, staff and faculty with active Sun Cards. Members of the public and Community Borrowers should call 602-496-0300 to arrange a visit.

About Fletcher Library

Information

The Fletcher Library was dedicated in 1988 in honor of the Robert L. Fletcher family whose gift of property resulted in an endowment for the perpetual support of the library. It was the first building completed on campus and soon after received an Honor Award, the top recognition of design excellence from the Southern Arizona Chapter of the American Institute of Architects. A semi-circular reflecting pool graces the library's front lawn.

In addition to a core print and media collection, Fletcher Library regularly features exhibitions and community-connected book displays. The third floor is home to the Labriola National American Indian Data Center's West Valley campus location. There are several group study rooms and ample space for individual study throughout the library. The three-story library is open seven days a week during semester sessions.

The first floor includes the Student Success tutoring center and First Year Success (FYS-West).

Housed in the library's lower level is the American Indian Student Support Services (AISSS-West).

Treat yourself to a pastry and a cup of coffee at the Starbucks located inside the main entrance to the library.

Read the law that created the West Valley campus (PDF). [1]

About Hayden Library

At the heart of ASU's Tempe campus, Hayden Library is a shared space for focus, collaboration and discovery. With seating for more than 2,100 and 37 reservable study rooms, the library offers room to meet, teach, research and recharge throughout the day.

Across five levels, the ASU community will find quiet reading rooms, expansive collections and welcoming study areas that support both individual work and group engagement. Interdisciplinary centers and services such as the Makerspace [1], Naturespace [2], Book Arts Studio, Map and Geospatial Hub [3] and the Unit for Data Science and Analytics [4] bring people together for hands-on work, skill-building and collaboration, with support from expert staff and a community of peers.

In the Wurzburger Reading Room [5], visitors can access archival collections, rare books and manuscripts through ASU's Special Collections.

Whether preparing for class, conducting research, or gathering with colleagues, visit Hayden Library today.

About Noble Library

Noble Library

Noble Library became Arizona State University's second major library facility in 1983. Today, Noble Library is home to a growing open stack print collection and a number of student support services, in addition to group and individual study spaces.

Dr. Daniel E. Noble, the library's namesake, was a technical innovator and inventor. Noble worked at Motorola for more than 30 years holding various research and executive positions, and is credited with designing the first FM mobile communication system.

John Shufeldt School of Medicine and Medical Engineering library

Advancing learning and innovation for the future of medicine

Your library for research, resources and support

The John Shufeldt School of Medicine and Medical Engineering Library empowers physician-engineers to advance discovery, accelerate research and improve health outcomes through expert guidance, clinical resources and innovative learning tools.

Students, faculty and staff can access medical and clinical resources, research and evidence synthesis support, information and AI literacy instruction and guidance on scholarly communication and research workflows.

Research tools and resources

Find more resources

University policies

Academic Integrity

At Arizona State University, we place great value on the research and scholarship of our students and faculty and are committed to a culture of academic integrity and scholarly ethics. We welcome you into our culture of academic excellence and integrity and hope you will help foster and promote ethical and honest behavior in connection with your scholarly work and interactions with your peers.

What is Academic Integrity?
No matter what stage of your educational or professional career pursuits, acting with integrity is a cornerstone of leadership and good citizenship. Integrity is a character-driven commitment to honesty, doing what is right, and guiding others to do what is right. Arizona State University students and faculty are expected to act with integrity in their educational pursuits.

Academic dishonesty falls into five broad areas that include but are not limited to:

1. Cheating on an academic evaluation or assignment.
2. Plagiarizing. [1]
3. Academic deceit, such as fabricating data or information.
4. Aiding academic integrity policy violations and inappropriately collaborating.
5. Falsifying academic records.

It is important that you understand what constitutes a violation of academic integrity. The ASU community is here to help you stay informed and to provide resources to avoid these kinds of violations. Please read ASU's academic integrity policy found here and visit the student resource page found here.

Mostly importantly, if you are not sure if something is really cheating, ask your professors, academic integrity officers, T.A.s or academic advisors.

Source URL: https://provost.asu.edu/academic-integrity

Links:
[1] https://provost.asu.edu/academic-integrity/resources/students#avoiding-plagiarism

ASU Student Honor Code

The ASU student honor code affirms the commitment of ASU students to uphold the values, principles, and ethics of academic integrity.

Honor Code

"We, the students of Arizona State University, adopt this code as an affirmation of our commitment to academic integrity and our participation in ethical education.

We embrace our duty to uphold ASU's Honor Code, and in light of that duty,

We promise to refrain from academic dishonesty.

We pledge to act with integrity and honesty and to promote these values among our peers. We agree to always abide by the Sun Devil Way [1] and uphold the values of the New American University [2]."

Source URL: https://provost.asu.edu/academic-integrity/honor-code

Links:
[1] https://eoss.asu.edu/sundevilway
[2] https://newamericanuniversity.asu.edu/about/asu-charter-mission-and-goals

Why is Academic Integrity Important?

Foundational value

Academic integrity is a fundamental value and is paramount to your success as a student. Protecting the ASU community from violations of academic integrity is everyone's responsibility.

Academic Integrity Violations negatively impact:

You as a student

If you cheat in a course or another academic exercise, you are taking away your opportunity to learn, develop and improve your skills, and obtain an educational degree that reflects your own academic achievements.

The ASU community

ASU is an intellectual community focused on teaching, research and the values of the New American University. The creation, transmission, sharing and applying of knowledge are central activities of the community. Cheating violates fundamental values of the university community.

Future employers, clients or patients

Cheating can hurt the people you will work with in the future. You are preparing for careers where you will provide services to others—legal, journalistic, medical, research, etc. If you do not learn how to do this work, you have cheated your future employers and clients of a knowledgeable professional.

Student policy

Why is academic integrity important? [1] on Youtube

Keon McGuire, Assistant Professor in Mary Lou Fulton College for Teaching and Learning Innovation, shares why academic integrity is important. We want your time spent here at ASU to be enriching, engaging and full of wonderful educational experiences that prepare you for your future.

What is a violation of the academic integrity policy?

Academic dishonesty falls into five broad areas that include but are not limited to:

1. Cheating on an academic evaluation or assignment.
2. Plagiarizing.
3. Academic deceit, such as fabricating data or information.
4. Aiding academic integrity policy violations and inappropriately collaborating.
5. Falsifying academic records.

What are the consequences?

At Arizona State University, academic honesty is expected of all students in all examinations, papers, academic transactions and records. The possible sanctions include, but are not limited to: appropriate grade penalties, loss of registration privileges, disqualification and dismissal. ASU strictly adheres to the academic integrity policy.
This policy sets forth the ASU Student Academic Integrity Policy and appeal procedures.

View full policy [2]

Additional policies to be aware of:

Student Code of Conduct

Violations of the ASU Student Code of Conduct, other than the provision concerning academic dishonesty, are more generally considered inappropriate behavior. The Office of Student Rights and Responsibilities [3] reviews and sanctions these matters. If a student violates both the academic integrity provision and additional provisions of the Student Code of Conduct, both the college and the Office of Student Rights and Responsibilities will review the matter. Each independently makes determinations concerning violations and appropriate sanctions.

Misconduct in Research

For graduate students and undergraduates involved in research, there can be overlapping areas between Academic Integrity Policy violations, responsible conduct of research and research misconduct. The five areas listed above describe the kinds of Academic Integrity Policy violations and are handled under the ASU Student Academic Integrity Policy by faculty members, colleges and the provost.

If a student is working on a federally-funded research project, some of these items may also be considered misconduct in research [4]. Misconduct is defined as:

Fabrication, falsification, plagiarism and other practices that seriously deviate from those that are commonly accepted within the academic community for proposing, conducting or reporting research. Instances of honest error and honest differences in interpretations or judgments of data are not considered misconduct. (From RSP 004: Definitions [5])

A student who violates both ASU's Misconduct in Research Policy and Student Academic Integrity Policy will be reviewed by both the college and the Office of Knowledge Enterprise Development's Office of Research Integrity and Assurance (ORIA) [6]. Each independently makes determinations concerning violations and appropriate sanctions.

In addition, some actions might be considered violations of the norms of responsible conduct of research, but not Academic Integrity Policy violations or misconduct in research. Many of these incidents fall into the general category of "collaborator disputes." For example, if a doctoral graduate of ASU continued a line of research begun at ASU in a new lab external to ASU, and the ASU mentor objected, generally speaking the matter would be addressed as a collaborator dispute, rather than as an Academic Integrity Policy violation or misconduct in research. Many conflicts over appropriate authorship credit on publications also fall into this area.

Student Policy

At Arizona State University academic honesty is expected of all students in all examinations, papers, academic transactions and records. The possible sanctions include, but are not limited to: appropriate grade penalties, loss of registration privileges, disqualification and dismissal. ASU strictly adheres to the academic integrity policy. This policy sets forth the ASU Student Academic Integrity Policy and appeal procedures.

A. Purpose

1. This Policy sets forth the ASU Student Academic Integrity Policy and appeal procedures. These procedures are designed to encourage a fair and appropriate process for student and faculty to resolve allegations of academic dishonesty. They may be modified in individual cases, so long as the student is provided notice and an opportunity to respond to allegations of academic dishonesty.
2. This Policy does not apply to differences of opinion over grades issued by an instructor.

B. Definitions

Academic Deceit Any deceptive or fraudulent act that creates or attempts to create an advantage or disadvantage for any member of the academic community.

Academic Evaluation Any academic assignment, project, paper, performance, quiz, exam, comprehensive exam, candidacy exam, thesis, dissertation, clinical or internship experience, or other evaluation assigned or offered for credit (including extra or optional credit), intended to fulfill an academic requirement, or considered by the University to provide academic or research experience (such as a paid research position).

Academic Integrity Officer The person responsible for managing the academic integrity investigation and adjudication process in a College or School. The Academic Integrity Officer works with both the student and Instructor to ensure that all procedures are followed. The Academic Integrity Officer is responsible for guiding both the student and Instructor through the investigation and adjudication process. The Academic Integrity Officer may pursue the academic dishonesty allegation if, for any reason, the Instructor is unable or unwilling to do so.

Advisor An individual selected by the student to assist him/her during the academic integrity process. The advisor may be a faculty or staff member, student, or other representative of the student.

College/School Board College or School Board is appointed by the academic Dean to review allegations of academic dishonesty. Each College or School Board is a standing committee comprised of faculty members and at least one student.

University Academic Integrity Hearing Board Hearing board appointed by the Provost or designee to review allegations of academic dishonest, typically through student appeals from a College/School Board.

Instructor An academic supervisor or any person holding a faculty appointment as defined in the Arizona State University Academic Affairs Manual and is responsible for or authorized to conduct an academic evaluation. The Academic Integrity Officer may take the place of the Instructor throughout this process.

Day University business day, not including Saturday, Sunday, any officially recognized university employee holiday, or any day the University is closed.

C. Student Obligations

1. All students must act with honesty and integrity. ASU believes that any form of Academic Dishonesty negatively impacts not only the student involved but all ASU students. The ASU student honor code affirms this commitment to integrity and can be found here.
2. Academic Dishonesty includes attempting or engaging in the following:
    a. Academic Deceit;
    b. Using or attempting to use unauthorized materials, sources, technologies, devices, or persons in connection with a course or an Academic Evaluation;
    c. Providing or attempting to provide inappropriate aid to another person in connection with a course or an Academic Evaluation, including signing or attempting to sign an attendance sheet for another student;
    d. Using or attempting to use words, ideas, materials, or work without properly acknowledging and documenting the source, or using or attempting to use one’s own work produced for another purpose;

e. Falsifying, misrepresenting, or attempting to falsify or misrepresent hours or activities regarding an internship, externship, field experience, clinical activity, or similar activity; or
f. Inappropriately attempting to influence or change an Academic Evaluation or academic record.

D. Academic Dishonesty Investigation and Procedures

1. Anyone with a good faith basis for believing that a student has engaged in Academic Dishonesty may report the alleged violation to the Instructor or Academic Integrity Officer for the college or school in which the Academic Dishonesty occurred.
2. If the Instructor or Academic Integrity Officer conclude that there is a sufficient basis to believe the student engaged in Academic Dishonesty, the Academic Integrity Officer will notify the student of the alleged violation and initiate the investigative process.
3. Before concluding the investigation, the Academic Integrity Officer will provide the student a summary of the information gathered. The student will have 5 business days after the notice was sent to respond on his/her own behalf to the allegation.
4. At any point in the process, the student can contact the Academic Integrity Officer to seek consultation or clarification.
5. The student may be accompanied by an Advisor at any point in the process. The Advisor is not permitted to participate directly or speak for the student.
6. Once the investigation is complete, in consultation with the Academic Integrity Officer, the instructor will recommend a sanction. The student will be notified of the result of the investigation and the sanction to be imposed, if any.

E. Sanctions and Appeal

1. The following sanctions may be imposed for Academic Dishonesty:
    a. Reduced or failing grade for the Academic Evaluation;
    b. Reduced or failing grade for the course.
    c. An XE grade as described in section K below;
    d. Withdrawal of credit for a previously accepted course or requirement;
    e. Suspension from the University for a specific period of time;
    f. Expulsion from the University without expectation of readmission; and/or
    g. Other sanctions as consistent with this policy and the Student Code of Conduct: https://eoss.asu.edu/dos/srr/codeofconduct
2. At any time, the student and the Instructor may agree on the sanction and inform the Dean. The Dean may reject the proposed resolution and appoint a designee to pursue the case on behalf of the University.
3. The student will also be notified of their right to appeal to the Dean. The student must file their appeal no later than 10 business days after the date the notification was sent. If the student does not file a timely appeal, the sanction is final.
4. A student's appeal of a recommended sanction must be submitted in writing and include the following:
    a. A description of the alleged academic dishonesty, including a factual narrative of events, the dates and times of occurrences, and any other reason why the sanction should not be imposed;
    b. The names of persons having information about relevant circumstances or events; and
    c. The general nature and description of all evidence.
5. If the student files an appeal, the student must meet with the Academic Integrity Officer to discuss hearing procedures. The Academic Integrity Officer will help the student navigate the process and provide additional information when needed.
6. If the student wishes to dispute any aspect of the allegation or sanction, the student may file an appeal. If the student files a timely appeal, the sanction will not be imposed until the appeal is resolved. If the student files an appeal at the end of a semester, or during the last semester of enrollment, the course grade or degree may be withheld until the matter is resolved. If a grade or degree will be withheld for any period, the Academic Integrity Officer or Dean must notify the Registrar's Office.

F. College/School Board Hearing

1. The Academic Integrity Officer will forward a student's timely appeal to the Instructor.
2. Pre-Hearing Proceedings
    a. The Academic Integrity Officer will send a notice of hearing to the student, Instructor, College/School Board, and the head of the College/School/academic unit where the alleged dishonesty occurred. The notice will include the following information:
        I. Statement of time and place of the hearing before the College/School Board. Unless the parties and Academic Integrity Officer agree otherwise, the hearing will take place during the regular fall or spring semester;
        II. A copy of this Policy or instructions on accessing the Policy electronically;
        III. Requirement that the parties provide to each other and the College/School Board a written list of witnesses and a description of any documents or other evidence they intend to use at the hearing. Unless the Chair provides otherwise, this information must be exchanged at least 5 business days before the hearing.
        IV. The length of time set for the hearing, the time limitation for the presentation of evidence, and any other procedural requirements.
3. Conduct of the Hearing
    a. In order to preserve the confidential nature of the disciplinary process and to protect the privacy of those involved, the hearing will be closed to the public.
    b. The College/School Board Chair will preside at the hearing and will rule upon all procedural matters. The formal rules of evidence will not apply, although objections to the introduction of specific statements or documents may be considered by the Chair. Irrelevant, immaterial, privileged, or unduly repetitious information will be excluded.
    c. The Instructor shall have the burden of showing it is more likely than not that the student engaged in Academic Dishonesty. The Instructor must also explain the reason for the sanction. If the student accepts responsibility for Academic Dishonesty, then the College/School Board may focus the hearing on the appropriate sanction.
    d. Information regarding prior violations or informal resolutions of previous allegations may not be used as proof of a current violation, but may be admitted for other purposes, such as to show that the student had prior experience relevant to the allegations or to show that the student had been informed previously that the conduct was unacceptable. The College/School Board may also consider information regarding prior violations in determining an appropriate sanction.
    e. A student who fails to appear or refuses to participate at the hearing will be deemed to have abandoned his/her appeal, unless the student can demonstrate that extraordinary circumstances prevented his/her appearance or participation.
    f. The student and Instructor may each have an Advisor present, but the Advisors shall not be permitted to address the College/School Board directly, except as the College/School Board Chair deems necessary or appropriate.
    g. The hearing will be recorded and the student may request a copy of the recording. The student may also request a transcript, but will be responsible for its cost.
    h. Except as otherwise permitted by the College/School Board Chair, witnesses will be excluded from the hearing except during their own testimony. The Chair may remove a party, Advisor, or witness from the hearing if that person's conduct is disruptive.
    i. When necessitated by fairness or extraordinary circumstances, the College/School Board may permit the parties to make arrangements for recorded, written, or telephonic testimony from their witness (es) for use in the proceeding.
    j. The Instructor shall proceed first at each stage of the presentation.
        I. Each party may present an opening statement, which summarizes what information is expected to be presented.
        II. Each party will call witness(es) to provide statements under oath.
        III. At the conclusion of each witness's statement, he/she may be questioned by the other party.
        IV. The College/School Board may ask further questions of each witness.
        V. Each party may present a closing statement, which summarizes the information that was presented.

4. If the alleged Academic Dishonesty involves the work of multiple students, the College/School Board may modify these procedures to address the circumstances. The College/School Board should provide prior written notice of any modification of the procedures to all parties. Each student must file his/her own appeal. A student who has not filed an appeal should not expect to benefit from another student's appeal.

G. College/School Board Deliberations and Recommendations

1. Following the presentation of information and closing statements, the College/School Board will discuss the information that has been presented and the reasonable inferences to be drawn from it. Only the Board, its legal advisor, if any, and the Academic Integrity Officer may be present during the deliberations. Neither the student nor the Instructor may be present during the deliberations.
2. Based solely upon the information presented, the College/School Board will formulate a recommendation to the Dean as to whether the student more likely than not engaged in academic dishonesty and the appropriate sanction. Recommendations must be supported by a simple majority of the Board.
3. The College/School Board will prepare and send a written recommendation to the Dean within 5 business days of the hearing. The written recommendation will include findings of fact and a statement of the reasons for the recommendation. It will also be signed by the College/School Board Chair. If the recommendation is not unanimous, dissenting opinions should be reflected in the recommendation.

H. Review and Decision by Dean

1. After reviewing of the College/School Board's Recommendation, the Dean will render a written decision which affirms, denies, or accepts the College/School Board's recommendation with modifications.
2. The Dean may not make new findings adverse to the student or increase the severity of a sanction, unless
    1. The Dean provides the student notice and an opportunity to respond to the new findings or sanction, and
    2. Remands the matter to the College/School Board for further proceedings.
3. The Dean will provide written notice of the decision to the student, the Academic Integrity Officer, the instructor, the College/School Board, and the head of the College/School/academic unit where the alleged dishonesty occurred within 20 business days following receipt of the College/School Board's recommendation. A delay may occur if it becomes necessary to conduct further investigation or to remand the matter to the College/School Board. In those cases, the written decision will be transmitted no later than 20 business days following completion of the investigation or the College/School Board's subsequent recommendation.
4. The Dean's decision is final and may not be further appealed unless the Dean recommends that the Provost suspend or expel the student from the University.
5. If the Dean recommends the suspension or expulsion of an international student, both the student and Academic Integrity Officer should consult with the ASU International Students and Scholars Center.
6. If the Dean recommends that the Provost suspend or expel the student from the University, the letter from the Dean will state that the student may appeal the recommendation by filing a written request for review with the Provost within 10 business days of the date of the letter.
7. If the student does not timely appeal, the Provost or designee will review the Dean's recommendation and issue a final decision on suspensions or expulsions from the University.

I. Review and Decision of a Suspension or Expulsion from the University

1. A student may seek to have a Dean's decision reviewed by the University Academic Integrity Hearing Board only if the Dean recommends that the Provost suspend or expel the student from the University. However, a student who failed to appeal or abandoned his/her appeal at the College/School Board hearing may not appeal to the University Academic Integrity Hearing Board.
2. The appeal must be in writing and must be filed with the Provost within 10 business days of the date of the Dean's decision letter.
3. The Provost or designee will appoint and charge a University Academic Integrity Hearing Board to conduct the hearing. The Hearing Board will be comprised of three members. One member must be a student and one of the other members will act as Hearing Board Chair. The hearing shall follow the procedures set forth in the Student Code of Conduct Procedures, except that the College/School will take the role of the Dean of Students and the

Provost or designee will take the role of the Senior Vice President for Educational Outreach and Student Services.

J. Review and Decision of a Degree or Certificate Revocation

1. Anyone with a good faith basis to believe that an ASU alumnum has engaged in Academic Dishonesty may report the alleged violation to the Office of the University Provost.
2. The Provost's designee will investigate and make an initial determination as to whether there is a sufficient basis to believe that the alumnum engaged in Academic Dishonesty and whether the appropriate sanction includes degree or certificate revocation.
3. If the Provost's designee decides to initiate an Academic Dishonesty complaint, he/she will notify the alumnum of the allegations and provide the alumnum an opportunity to respond.
4. The Dean of the College/School that awarded the degree or certificate may choose to convene an ad hoc committee to review the evidence and make a recommendation as to whether the alumnum engaged in Academic Dishonesty and the appropriate sanction.
5. In cases not involving graduate students, after reviewing the evidence and committee recommendation, if any, the Dean of the College/School that awarded the degree or certificate will render a written decision as to whether the alumnum more likely than not engaged in Academic Dishonesty and the appropriate sanction.
6. In cases involving graduate students, after reviewing the evidence and committee recommendation, if any, the Dean of Graduate College in consultation with the Dean of the College/School that awarded the graduate degree or certificate, will render a written decision as to whether the alumnum more likely than not engaged in Academic Dishonesty and the appropriate sanction.
7. If the Dean recommends that the Provost revoke a degree or certificate, the letter from the Dean will state that the alumnum may appeal the recommendation by filing a written request for review with the Provost within 10 business days after the date the notification was sent.
8. If the alumnum does not timely appeal, the Provost or designee will review the recommendation and issue a final decision.
9. If the alumnum files a timely appeal, the Provost or designee will establish a University Academic Integrity Hearing Board to conduct the hearing. The hearing shall follow the procedures set forth in the Student Disciplinary/Grievance Procedures, except that the College/School will take the role of the Dean of Students and the Provost will take the role of the Senior Vice President for Educational Outreach and Student Services.

K. XE Grade

1. The XE grade will be recorded on the student's official and unofficial transcript with the notation "failure due to academic dishonesty." The XE grade shall be treated in the same way as an E for the purposes of grade point average and determination of academic standing.
2. No student with an XE grade on his/her transcript shall be permitted to represent the University in any extracurricular activity or to run for or hold office in any recognized student organization.
3. Generally, the XE grade will remain on the transcript permanently. For other cases, after at least 12 months have elapsed since the XE grade was imposed, the student may file a written petition to the Dean to have the XE grade removed and replaced with an E grade. The decision to remove the XE grade and replace it with an E grade is within the discretion and judgment of the Dean.
4. Before replacing an XE grade with an E grade, the Dean may confer with other University officials and may require the student to attest that he/she has not been involved in any other act of academic dishonesty or similar disciplinary offense at ASU or another institution. If the student's representation is later discovered to be false, the Dean may reinstate the XE grade and recommend suspension or expulsion.

L. Procedures Following Final Decision

1. If any student work affected by the finding of Academic Dishonesty has been placed in the library or forwarded to a third party in partial fulfillment of degree requirements, that work may be removed from the library or withdrawn from the third party.
2. A student's official and unofficial transcript may reflect that an XE grade, suspension from the university, expulsion from the university, or degree or certificate revocation was the result of Academic Dishonesty.

3. One year after the completion of a suspension for Academic Dishonesty, a student may petition to have the notation of suspension for Academic Dishonesty removed from his or her transcript. The student must submit a written petition to the Provost which summarizes his or her academic and personal history since the suspension which justifies removing the notation. The decision to remove the notation that the student was suspended for Academic Dishonesty is within the sole discretion and judgment of the Provost.
4. A notation of expulsion from the university or degree or certificate revocation resulting from Academic Dishonesty is permanent.
5. A degree may be revoked if its requirements were not adequately fulfilled.
6. If a degree is revoked and a transcript was forwarded to another institution, ASU will notify the institution of the revocation.

M. Other University Policies

The University's Misconduct in Research Policy is independent of the Student Academic Integrity Policy and the Guidelines for Graduate Appeals. Individual conduct may also violate and be subject to review and sanctions under these policies.

Meet Your Academic Integrity Officer

The Academic Integrity Officer for a college/school serves as the lead educator for faculty and students to sustain a culture of academic integrity at ASU and to increase awareness of the university's academic integrity policy.

Both student and faculty can contact the Academic Integrity Officer for your College/School to report an academic integrity violation or to ask questions related to academic integrity policies and procedures.

Meet some of your academic integrity officers in this video. They are here for you. They will help you find an answer that avoids problems with academic integrity. We invite you to meet with you academic integrity officer and know who they are.

Student resources

Over the course of your academic journey here at Arizona State University, you will be challenged to continually build upon your skills and academic abilities. At times, pressure and stress can arise from balancing busy schedules, academic commitments, and personal commitments. In these moments of adversity, it’s important that you make ethical decisions and uphold a high standard of integrity for you and for others.

Behaviors and actions

What does Sun Devil Integrity look like?

To see the behaviors and actions of Sun Devil Integrity, view the infographic below or download the PDF.

Sun Devil Integrity
Engages in learning
Chooses to engage in learning in college courses to fully understand the content so he/she can be a knowledgeable professional when entering the career world.
Takes notes
Diligently takes notes during class and during readings to begin preparing for exams. Studies his/her own notes, making flashcards and study materials, without seeking shortcuts.
Reports cheating
Reports cheating to the department's academic integrity officer.
Avoids cheating
Avoids online or contract cheating websites where offers to complete college coursework, in full or in part, are made.
Studies diligently
Studies for exams and assessments diligently and well in advance of exam day. Collaborates with classmates to study for exams by quizzing each other, but completes the exams entirely by himself/herself.
Cites sources
Cites all sources that are referenced, paraphrased, and/or quoted in full or in part, using appropriate source citation (such as APA or MLA format).
Works in advance
Works in advance of assignment deadlines to plan out projects and papers, and create a checklist and a study plan with a daily or weekly schedule.
Completes tasks
Breaks long papers into parts (bibliography, outline, introduction, body, conclusion, and further sub-parts) to complete the task in stages ahead of deadlines.
Encourages others
Encourages classmates to do their own work and to learn materials so they can be knowledgeable aspiring professionals.
Respects Honor Code
Treats instructors and classmates with respect and upholds the ASU Student Honor Code.
ASU Arizona State University

Academic Integrity at ASU Tutorial

The Academic Integrity at ASU tutorial [2] also will walk you through the importance of academic integrity. Upon completion of the tutorial you will be able to:

- Describe the five types of academic integrity
- Identify the do's and don'ts of academic integrity at ASU
- Recognize the consequences of academic dishonesty

Strategies for how to complete your work with integrity

Be informed: Understand ASU's expectations regarding academic integrity by understanding the Academic Integrity Policy [3] and Student Code of Conduct [4].

Ask questions: If you are not sure if something is really cheating, ask your professors, T.A.s, academic integrity officers, or academic advisors.

Seek tutoring: Ask your professors and others in your department for help in finding academic support. Help is available from the following sources:

- On-campus, in-person writing support [5]
- Online support for citations and style manuals [6]
- Tutoring and academic success resources [7]

Stay healthy: Checkout the Live Well at ASU [8] webpages to obtain information, resources and involvement opportunities found in each element are designed to positively impact you academic performance, personal well-being and assist you in reaching your full potential.

Avoiding plagiarism

Plagiarism may be the most common form of academic dishonesty and is often unintentional. Protect yourself by understanding how to avoid plagiarism at Arizona State University using the following resources.

What is Plagiarism?

Defining plagiarism

Acts of plagiarism can be glaringly obvious or very subtle. Understanding plagiarism, with all of its intricacies and nuances, provides a foundation of knowledge one can use to make sound decisions and avoid getting caught up in a plagiarism scandal—whether intentional or unintentional.

Document sources appropriately

Lapses in one's technique for paraphrasing ideas, quoting information or citing sources can make way for accusations of plagiarism. Make it a point to learn how to integrate the ideas of others and to document the sources of "borrowed" information appropriately. View citation styles. [6]

Avoiding unintentional plagiarism

Keeping track of the deluge of notes and source material can become a mind-boggling undertaking, and mistakes can lead to unintentional plagiarism. Learn about web-based citation management tools at ASU Library's Citation Management Tools library guide. [9]

Self-Plagiarism

Quoting words or borrowing ideas without reference to the author is a problem, even if you happen to be the author.

Same story – different outlets

You cannot:

- submit the same paper for different classes.

- use sections of your previous work for a comp exam answer.
- expand on your master's thesis for your dissertation.
- submit the same research article to different journals.

Learn more about the complicated issue of self-plagiarism. Talk to your Academic Integrity Officer about what this means for you.

Recycling is not always good

Not when it comes to your own words. Many researchers use the same literature, research methods or analyses across studies and find it time consuming to write new versions of these sections. Yet blind journal reviewers or electronic cross-checking may indicate you are plagiarizing. Take the time to rephrase and remember you need to cite yourself.

Avoid salami-slicing

Or publishing multiple studies from the same data set. You may need to reduce a complex set of distinct hypotheses into separate papers. If so, let the readers know you did this. If the slices can be combined to make a whole, then it is better to go with the whole salami. To learn more about the nuances of "salami-slicing" in your discipline just pop this term into Google scholar and it will open your eyes.

Self-plagiarism resources

1. Bretag, T. & Mahmud, S. (2009). Self-Plagiarism or Appropriate Textual Re-use? Journal of Academic Ethics, 7:193–205 http://www.springerlink.com.ezproxy1.lib.asu.edu/content/256280445158v940/
2. Scanlon, P. M. (2007). Song From Myself: An Anatomy of Self-Plagiarism. vol. II. Ann Arbor, MI: Scholarly Publishing Office, University of Michigan Library http://hdl.handle.net/2027/spo.5240451.0002.007 retrieved July 2010

Plagiarism tutorial

Take the Plagiarism Awareness: Don't Stumble Into it Accidentally! tutorial [10]. Upon completion of the tutorial you will be able to:

- Define and recognize plagiarism.
- Explain the importance of citation in the scholarly environment.
- Demonstrated strategies to avoid unintentional plagiarism.
- Recognize and explain the consequences of plagiarism.

Resources for citations

Visit the ASU Library citation styles [11] webpage as a reference for citing resources appropriately using APA, MLA, Chicago, or other citation-style guidelines. The site also offers exercises to help you practice the appropriate use of citations.

Contract cheating

Contract cheating is a type of academic dishonesty where a student asks another person to complete all or part of their work for them. The student may ask someone they know to write a paper for them, as a favor, or they may pay someone to do it. Regardless of whether money changes hands or not, presenting someone else's work as your own is always cheating.

What are some of the ways contract cheating negatively impacts you and the ASU community?

There are numerous ways in which contract cheating negatively impacts you, your fellow students, and the ASU community. Here are a few:

- You do not acquire any of the knowledge that your instructor intended for you to learn when you have someone else do your work. By doing so, you are taking away your opportunity to grow as a student and professional contract cheating is a very serious academic integrity violation which could result in suspension or expulsion permanently from the University.

- Students who complete their work on their own are disadvantaged by students who are cheating.
- When you ask someone to do work for you, you are asking them to cheat on your behalf. Your request for their help will lead to negative consequences for them as well.

What are some things I can do if I am overwhelmed and notice that I am becoming tempted by contract cheating?

Part of the learning process as a college student is to work your way through challenging times in an honest and ethical manner. Spending time prioritizing your assignments and engaging in good time management practices is ideal. However, you may still experience times where you feel overwhelmed by multiple deadlines and projects.

There are resources to support you:

- Communicate and/or meet with your instructor.
- Schedule an appointment to talk to your advisor.
- Meet with the Academic Integrity Officer in your college/school. [12]
- Utilize your college/school tutoring resources.
- Utilize the ASU resources offered from the Dean of students' office. [13]
- Contact the ASU First Year Success Center. [14]
- Contact the International Students and Scholars Center. [15]

Remember, it is better to do poorly on an assignment or even fail an examination than it would be to commit an academic integrity violation. The skills you develop working through challenging situations, enhances your resiliency and makes you an even more effective college graduate.

Accelerated Master's

Student FAQ

Answers to frequently asked questions about the accelerated master's program at ASU.

Can I be in the accelerated master's program?
All current ASU undergraduate students are eligible to apply for a pre-approved Accelerated Master's program. Acceptance to become a candidate differs among programs, but generally requires a minimum GPA of 3.0, among other requirements. An advisor for the program of interest can provide their program-specific criteria.

How many graduate-level courses can I take as an undergraduate student that will count toward both my undergraduate degree and my graduate degree?
Most programs allow up to 15 credit hours of graduate-level courses taken as an undergraduate student [1] to count toward both your undergraduate and graduate degree program requirements. Please contact the advisor of your desired program for more information.

How will participating in the accelerated master's program affect my financial aid?
Students in the undergraduate portion of the accelerated master's program pay undergraduate tuition. Financial aid awards for the undergraduate portion apply while the student is an undergraduate. Once they are admitted to the graduate program, they pay graduate tuition and have to utilize financial aid for graduate students. Students should contact Financial Aid and Scholarship Services [2] to inquire about their specific aid and the requirements to receive it while enrolled in the AM program.

Do accelerated master's students graduate with their bachelor's degree and master's degree at the same time?
No, they graduate with their bachelor's degree prior to finishing their graduate degree.

What happens if I begin taking graduate courses and decide I do not want to continue with the graduate degree?
The graduate-level courses completed to satisfy undergraduate degree requirements will still apply, and your graduation will not be delayed.

How can I register for graduate-level courses?
You will be granted course approval overrides by your advisor once you have been approved to be a program candidate.

Will I be automatically admitted to the graduate program once I am accepted to be an Accelerated Master's candidate and take graduate courses?
Accelerated Master's Program students no longer have to submit a standard graduate application to be admitted to the Master's program. Students should consult with the graduate program advisor regarding the timeline for their admission.

When will I become a graduate student?
You will become a graduate student once you have been admitted to the graduate program and successfully completed your undergraduate degree. This is typically the semester after earning your bachelor's degree.

What if I don't see the program that I am interested in on the list of Accelerated Master's programs?
Programs are added to the list once they are approved. If your program of interest is not on the list, you cannot pursue it as part of the Accelerated Master's program. However, you can reach out to the advisor for that program to request for one to be approved so that you can participate in it (not guaranteed).

Artificial Intelligence

Teaching and learning with generative AI

Generative AI has the potential to address some of the biggest challenges in education today. Nonetheless, as educators and students, we face a new frontier as we navigate a world in which the distinction between content generated by AI and humans is rapidly blurring. To support these conversations, please visit the Provost resource page.

Learn more [1]

AI tools

View the AI tools that have completed the ASU VITRA process and are approved for use at the departmental level. If a department would like to use these tools, their department can submit an assessment request in accordance with their standard process.

Before using any AI tools, please review the AI Digital Trust guidelines to ensure you understand the responsibilities and expectations for data privacy, copyright, and intellectual property protections at ASU.

AI tools [2]

Digital Trust Guidelines for Generative Artificial Intelligence Use

Arizona State University is committed to the practice of Principled Innovation [3], embracing innovation with curiosity and wisdom.

During a Summer Series of Digital Trust in AI conversations, individuals from across the campus were brought together to identify appropriate considerations for the use of Generative Artificial Intelligence (genAI) at ASU. This group assembled guidelines that have been reviewed and approved by Enterprise Technology Digital Trust, Cybersecurity, AI Acceleration, Learning Experience and the Office of General Council.

Review the guidelines [4]

ASU Career Services and Artificial Intelligence (AI)

While it cannot predict every part of your career journey, Generative AI can offer a great starting point when it comes to research. It can help you explore careers relating to your interests and job searching methods, prepare for an interview and even tailor your resume to apply to specific positions. Interested in learning more about how AI can assist professional development? Read more about ASU Career Services' recommendations for AI use by visiting their website today.

Attendance

The instructor has full authority to decide whether class attendance is required.

Source URL: https://catalog.asu.edu/attendance

Concurrent degrees (double majors)

Request to add an additional major that fits your academic and career goals

Step 1: Determine interest

Interested in pursuing an additional degree? Concurrent degrees, sometimes called “double majors,” allow students to earn two distinct degrees and receive two diplomas, while pursuing their unique personal or professional interests.

Step 2: Review the concurrent degree policies

While there are many degree combinations for you to choose from to meet your academic goals, there are some college policies that might affect when you can add another major or which majors can be paired together. View the specific policies of your college, and the college of the major you'd like to add, here.

All requirements for both degrees must be satisfied before either degree can be conferred.

View policies [1]

Step 3: Submit a request

Submit a request to add an additional major to your academic plan or to be contacted with more information. You can track the progress of your request by viewing My Requests from your My ASU [2] Help tab.

Add major [3]

Disclaimer

Both your current major and your requested concurrent major must approve your request. Pursuing multiple degrees could result in additional time to graduate which could affect cost and financial aid.

Only active degree-seeking undergraduate students can request to add a concurrent major. Please be advised that requests may be denied if you have less than 30 completed credit hours.

Want to explore other options?

Change your current major [4]
Looking to change your current major instead? Submit a change of major request.

Explore accelerated degrees [5]
Combine undergraduate degree requirements with graduate coursework, resulting in faster completion of both a bachelors and masters degree.

Add a minor [6]
Consider adding a minor to enhance your current academic program.

Add a certificate [7]
Concurrent degree too much? Explore adding a certificate to your current academic program.

Classification of courses

Course numbering system

Lower-division courses

Lower-division courses, numbered from 100 to 299, are designed primarily for first-year students and sophomores. Certain classes are closed to first-year students who lack the designated prerequisites or whose majors are outside the units offering the courses. This information is available in the course catalog [1] or from the student's academic advisor.

Upper-division courses

Upper-division courses, numbered from 300 to 499, are designed primarily for juniors and seniors. Prerequisites and other restrictions should be noted before registration. Courses at the 400 level apply to graduate degree requirements for some graduate programs when approved by the Graduate College.

Graduate-level courses

Graduate-level courses, numbered from 500 to 799, are designed primarily for graduate students. However, an upper-division undergraduate student may enroll in courses numbered 500–599 with the approval of the student's advisor, course instructor, department chair and dean of the college in which a course is offered. If such a course does not meet an undergraduate graduation requirement, it may be eligible for use in a future graduate program on the same basis as work taken by a nondegree-seeking graduate student. Undergraduate students should review additional information about graduate credits earned by undergraduate students. [2]

Medical school courses

Medical school-level courses, numbered 800 to 899, are designed primarily for students in the John Shufeldt School of Medicine and Medical Engineering.

Omnibus courses

Omnibus numbers are used for courses offered on an experimental or tutorial basis or for courses in which the content is new or periodically changes. The academic unit's subjects are used for omnibus course numbers. The general nature of the work required for a particular omnibus course is consistent from unit to unit, but subject matter varies. Omnibus courses often are offered for a variable number of credit hours.

Within the academic catalog and course catalog, abbreviations are frequently used with a colon to introduce specific omnibus course topics, which are shown in the omnibus course abbreviations chart below (e.g., MGT 494 ST: Cultural Factors in International Business).

Omnibus course abbreviations		
Abbreviation	**Title**	**Number**
AP	Applied Project	593, 693, 793
CW	Conference and Workshop	594
FW	Fieldwork	583, 683, 783
FYS	First-Year Seminar	191
HC	Honors Colloquium	497

Abbreviation	Title	Number
I	Internship	484, 584, 684, 784
P	Practicum	580, 680, 780
PS	Pro-Seminar	498
R	Research	592, 692, 792
RC	Reading and Conference	590, 690, 790
RM	Research Methods	500, 600, 700
S	Seminar	591, 691, 791
ST	Special Topics	194, 294, 394, 494, 598

Omnibus undergraduate courses

191 First-Year Seminar (1-3)

Small course emphasizing student-faculty discussion and interaction.

194, 294, 394, 494 Special Topics (0.25-4)

Covers topics of immediate or special interest to a faculty member and students.

484 Internship (1-12)

Structured practical experience following a contract or plan, supervised by faculty and practitioners.

498 Pro-Seminar (1-7)

Small-group study and research for advanced students within their majors.

499 Individualized Instruction (1-3)

Provides an opportunity for original study or investigation in the major or field of specialization, on an individual and more autonomous basis.

Honors courses

These courses and all with the HON prefix are reserved for students in Barrett, The Honors College.

298 Honors Directed Study (1-6)

Independent study or practicum under the supervision of a faculty member.

492 Honors Directed Study (1-6)

Independent study in which a student, under the supervision of a faculty member, conducts research or creative work that is expected to lead to an undergraduate honors thesis or creative project.

493 Honors Thesis (1-6)

Supervised research or creative activity focused on preparation and completion of an undergraduate honors thesis or creative project.

497 Honors Colloquium (1-6)

A class emphasizing discussion, written and/or oral presentation by students, and active participation.

Omnibus graduate courses

The following courses are described in the Graduate College announcements and are also available from their respective departments. Under special circumstances, at the dean's request and through the approval of the executive vice president and provost of the university, arrangements may be made to increase the standard number of credit hours.

500, 600, 700 Research Methods (1-12)

Course on research methods in a specific discipline.

580, 680, 780 Practicum (1-12)

Structured practical experience in a professional program, supervised by a practitioner or faculty member with whom the student works closely.

583, 683, 783 Fieldwork (1-12)

Structured, supervised field experience in a field science or other discipline requiring experience in field techniques.

584, 684, 784 Internship (1-12)

Structured practical experience following a contract or plan, supervised by faculty and practitioners.

590, 690, 790 Reading and Conference (1-12)

Independent study in which a student meets regularly with a faculty member to discuss assignments. Course may include such assignments as intensive reading in a specialized area, writing a synthesis of literature on a specified topic or writing a literature review of a topic.

591, 691, 791 Seminar (1-12)

A small class emphasizing discussion, presentations by students and written research papers.

592, 692 Research (1-12)

Independent study in which a student, under the supervision of a faculty member, conducts research that is expected to lead to a specific project such as a thesis or dissertation, report, or publication. Assignments might include data collection, experimental work, data analysis or preparation of a manuscript.

593, 693, 793 Applied Project (1-12)

Preparation of a supervised applied project that is a graduation requirement in some professional majors.

594 Conference and Workshop (1-12)

Topical instruction, usually in compressed format, leading to academic credit. Often offered off campus to groups of professionals.

595, 695, 795 Continuing Registration (1)

Used in situations where registration is necessary but where credit is not needed. Replaces arbitrary enrollment in reading and conference, research, thesis, dissertation, etc. Used by students when taking comprehensive examinations, defending theses or dissertations, or fulfilling the continuous enrollment requirement in doctoral programs. Credit is not awarded and no grade is assigned.

598 Special Topics (1-4)

Topical courses not offered in regular course rotation (e.g., new courses not in the catalog, courses by visiting faculty, courses on timely topics and highly specialized courses responding to unique student demand).

599 Thesis (1-12)

Supervised research focused on preparation of a thesis, including literature review, research, data collection and analysis, and writing.

792 Research (1-15)

Independent study in which a student, under the supervision of a faculty member, conducts research that is expected to lead to a specific project such as a dissertation, report or publication. Assignments might include data collection, experimental work, data analysis or preparation of a manuscript.

799 Dissertation (1-15)

Supervised research focused on preparation of a dissertation, including literature review, research, data collection and analysis, and writing.

Other subjects

Visiting student program

The numbers 597, 697 and 797 in the LAW subject are reserved for the visiting student program in the Sandra Day O'Connor College of Law.

Global education programs

Courses with the subject SAO are reserved for participants in programs offered through the Global Education Office. [3] Courses with an SAO subject are used either to provide general university elective credit for specific programs or courses, or as a placeholder course for participation in partnership and exchange programs.

In the case of a placeholder course, the course remains on the student's academic record until the record is updated by the Global Education Office following completion of the student's study abroad program. The SAO-subject course is then dropped from the student's record and replaced with the ASU courses, credits and grades equivalent to the coursework completed abroad. Students must register for at least the number of credit hours equivalent to full-time study at ASU (i.e., 12 credit hours for undergraduate students and nine credit hours for graduate students during the fall and spring semesters, or one to six credit hours during the summer session). Students participating in a GEO partnership program must register for the subtopic SAO: Study Abroad Program, whereas participants in an GEO exchange program must register for the subtopic SAO: Exchange Program. The SAO placeholder course is not an indication of the level of coursework or the total number of credit hours the student may complete abroad.

Courses completed as part of these programs that do not have direct ASU course equivalencies are awarded "department elective" credit, using a respective subject with a course number of 1DE, 2DE, 3DE or 4DE. Lower-division courses at the 100 level are 1DE, and 200 level courses are 2DE; upper-division courses at the 300 level are 3DE, and 4DE indicates 400 level courses.

Distance education-specific policies

University policies

The U.S. Department of Education requires that certain information be disclosed in a clear, prominent, user-friendly and easily understood manner. The intent of the requirement is to enable students to make an informed choice.
Learn about complaint filing and resolution at Arizona State University, as well as out-of-state student policies, international students policies, and credit transfer and refund policies below.

ASU complaint procedure

ASU is committed to the success of each student and strives to resolve issues that may arise. All ASU distance education students should attempt to resolve complaints with the university through the university process first before contacting external agencies.

Available processes and links to policies and contacts are listed below.

University process

ASU greatly values the student experience and expects all students to adhere to the Student Code of Conduct [1]. Please refer to the Student Code of Conduct for student expectations and rights.

When an issue is brought to our attention, ASU takes appropriate action to seek resolution.

Academic issues

For academic concerns, a student is encouraged to first speak with the course instructor. If an issue cannot be resolved at that level, a student may contact the appropriate college or school for guidance on how to proceed. Please refer to our list of colleges and schools for more information. [2]

Non-academic issues

For non-academic concerns, please contact the Dean of Students [3]. The Office of Student Rights and Responsibilities is responsible for reviewing and handling student disciplinary incident reports.

Non-academic issues not resolved by the university process

ASU is an institutional participant of the State Authorization Reciprocity Agreement (SARA). If an issue has not been satisfactorily resolved through the university's internal process, a distance education student may submit a non-academic complaint to the Arizona SARA Council by filing a complaint form. [4]

Instructional complaints, such as grade grievances, are not reviewed by the council and should not be submitted for resolution.

Students located in American Samoa, California and Guam may not submit a complaint to the council. These territories and states do not participate in SARA.

Other agencies

A student may contact higher education regulatory agencies, accrediting agencies or consumer protection agencies for specific issues that are unresolved through the university process.

Arizona Board of Regents

If an issue submitted by a student is unresolved and involves a complaint arising under state law, an Arizona Board of Regents policy or any other matter, the student may contact the Arizona Board of Regents [5] (in accordance with 75 Fed. Reg. 66865-66, October 29, 2010).

Accrediting agencies

ASU is accredited by the Higher Learning Commission (HLC) [6]. If an issue is unable to be resolved through the university process, a student may follow the HLC complaint process. [7]

For specialized accreditation, please see this page. [8]

International students

ASU works to provide global access to its online degree programs. While requirements related to authorization and licensure are carefully tracked, it is the student's responsibility to understand the requirements for whether an online degree will be recognized in the country in which the student intends to work; how the collection of student data may be used in that country; and whether there are any tax implications in addition to the price of tuition.

Several countries will not formally recognize foreign online degrees, which may have implications for students who later seek to enroll in other educational programs, or for those who seek employment in another country's government or employers requiring specific credentials. International students considering an academic program that leads to a professional license should first confirm with the appropriate professional licensing board in the country in which the student intends to work as to whether a degree from ASU is recognized when seeking licensure or certification.

Professional licensure

There are certain careers or fields that require professional license to practice, and licensure requirements vary by state. ASU's professional licensure programs are designed to prepare students for a license in the State of Arizona. Students who wish to practice in a state other than Arizona should check the professional licensure each session for the most up-to-date information.

Professional licensure info [9]

Residency and student location

Course and program availability varies by state. Admission into a program is granted at the time of initial acceptance into the program and is dependent on program availability in the state where the student **is physically located** at the time of admission.

If a student moves to a different state after admission to the program, continuation within the program will depend on the availability of the program within the new state where the student is physically present. Relocating may impact whether a student can remain in the program, meet the state licensure requirements and/or continue to receive financial aid funding. Prior to considering relocation, please contact your program advisor to discuss authorization and licensure eligibility requirements. It is the student's responsibility to notify the institution of a change in physical location.

MILITARY PERSONNEL: The state where military personnel are stationed will determine whether they may enroll or continue in an ASU Online program.

Transfer of credit

ASU does not imply, promise or guarantee that credits earned at the university will transfer to other institutions, since such determinations are made according to the policies of the receiving institution. If a student is considering transferring to another school, prior to such transfer, the student will need to work with that school to determine if ASU's academic credits will be accepted.

Some medical schools and other health science schools may require additional information for alternative classroom experiences, such as online courses. Students may be asked to provide detailed information about the course or courses that transfer credit is being sought for and provide evidence to the requesting institution of the textbook and topics covered that can be found in a complete syllabus.

Learn more about being a transfer student [10]

Enrollment and degree verification

Arizona State University provides official verification of a student's enrollment status or earned degrees. Enrollment status (full-time, part-time, etc.) is based on the number of credits a student is enrolled in during the requested term. Withdrawn courses are not included. Audit classes count toward total enrolled hours.

ASU reports enrollment status to the National Student Clearinghouse multiple times each semester. Status definitions follow federal regulations and university policy and are defined in the financial aid load tables below.

Verification Services

Service	Use it for	Details/Access
Standard Enrollment Verification (EV) [1]	Official proof of enrollment (with university registrar signature and university seal) for insurance, scholarships, loan deferment, employers, and more.	Available in My ASU [2]. Includes enrollment status, academic standing, expected graduation, and degree (if applicable). Widely accepted by third parties. Note: Enable pop-ups to download. Tip: Our standard EV meets most agency and employer requirements. University Registrar Services does not complete third-party forms.
Specialized Enrollment Verification [3]	Special cases such as Canadian/Alaskan forms, transient letters, or when specific details like language of instruction are needed.	Submit a request using the Specialized EV form [3]. Check if the standard EV will meet your needs first.
Enrollment Verification with Disciplinary Records [3]	Common Applications, College Reports, Board of Law Examiners.	Submit a request using the Specialized EV form [3]. These enrollment verifications and associated forms are forwarded to the Dean of Students for disciplinary records. Please allow for additional processing time.
Official Transcript [4]	Graduate school, jobs, licensure, or other official academic verification.	Request through My ASU [2]. Each copy costs $15 and includes your full academic record (courses, grades, GPA, and degrees). This document cannot be modified or customized.
Unofficial Transcript [5]	View your grades and coursework.	Free. Accessible though My ASU. [2]

Service	Use it for	Details/Access
Pending Graduation Letter [6]	Confirming pending graduation or degree conferral if you have applied to graduate.	Submit a request using the Graduation Letter Request form. [6]

Enrollment Status Defined

Undergraduate Students

Academic Load

Term	Full-time	3/4 time	Half time	Less than half time
Fall & Spring	12+ credits	9-11 credits	6-8 credits	1-5 credits
Summer	4+ credits	N/A	2-3 credits	1 credit

Financial Aid Load

Term	Full-time	3/4 time	Half time	Less than half time
Fall & Spring	12+ credits	9-11 credits	6-8 credits	1-5 credits
Summer	12+ credits	9-11 credits	6-8 credits	1-5 credits

Graduate & Law Students

Academic Load

Term	Full-time	3/4 time	Half time	Less than half time
Fall & Spring	9+ credits	7-8 credits	5-6 credits	1-4 credits
Summer	3+ credits	N/A	2 credits	1 credit

Financial Aid Load

Term	Full-time	3/4 time	Half time	Less than half time
Fall & Spring	9+ credits	7-8 credits	5-6 credits	1-4 credits
Summer	9+ credits	7-8 credits	5-6 credits	1-4 credits

Financial Aid Recipients: Full-time and half-time credit requirements may be different for financial aid disbursement purposes. Please review the Award Disbursement Rules [7] to determine the required enrolled hours needed for financial aid disbursement.

If you have questions or need additional information, please contact University Registrar Services, Records & Enrollment Services at registrar@asu.edu.

Glossary of academic terms

Student academic status terms

University Academic Good Standing (Undergraduate) [1]
2.00 cumulative GPA

- College-specific academic good standing rules can be developed; the college name in a policy title differentiates it from university policy. Example: W. P. Carey School of Business academic good standing.

University Academic Warning
An undergraduate student with a cumulative GPA of less than 2.00 at the end of their first semester (fall or spring) is considered to be in the status of university academic warning.

University Academic Probation [2]
An undergraduate student is placed on university academic probation if, at the end of a semester (fall or spring) that is not the student's first semester at ASU, the student has a cumulative GPA of less than 2.00, or the student received an academic warning in the prior term.

- Colleges may establish specific criteria for their own academic probation status; the college name in a policy title differentiates it from university policy. The college academic probation status may take the place of university academic probation but may not replace the university academic warning. Example: Ira A. Fulton Schools of Engineering academic probation.

University Continuing Academic Probation [2]
A student is said to be on university continuing academic probation each semester (fall or spring) that student (previously on university academic probation) earns a semester GPA greater than 2.00, but yet has a cumulative GPA of less than 2.00.

- Colleges may establish individual time limits and specific semester GPA requirements for continuing academic probation; they are defined as "[College Name] continuing academic probation".

Co-enrolled Continuing Probation Program [3]
Select disqualified students may participate in the co-enrolled continuing probation program at the discretion of their college or school. Under this program, the student takes the academic refresher course UNI 220 Mindset Connections plus one ASU course selected by the student’s advisor, and the student co-enrolls at a Maricopa Community College with a schedule selected in consultation with the ASU advisor. If, upon completion of the term, the student has a combined semester cumulative GPA of 2.50, the student may continue regular enrollment at ASU. Parameters regarding the number of co-enrolled hours required are at the discretion of each college or school.

Ineligible
A college designation for a student on university continuing academic probation who is not permitted to continue in the major based on college-specific academic requirements. The student may remain an ASU student, but is required to change their major. College-specific procedures are located on their college policies. [4]

Disqualified [5]
A student on university academic probation who does not earn a semester GPA of 2.00 or greater (fall or spring) will be disqualified. Students who are disqualified are not permitted to enroll at ASU in any subsequent fall or spring semester unless they are readmitted.

Catalog year
A catalog year runs from fall through summer, and a student who enters during the fall or spring semester follows the policies and requirements in effect for that catalog year. For example, catalog year 2024-2025 is the catalog year for students who enter in fall 2024 or spring 2025. Students who enter for the first time during the summer term follow the requirements in effect for the subsequent catalog year.

In most cases, a student's catalog year is the year in which they started at ASU. Students may be in a different catalog year for a variety of reasons, including:

- change of major
- continuous enrollment in an Arizona community college or public university
- student request to move to a newer catalog year
- significant changes to curriculum either due to accreditation or rapid changes to subject matter

More information and conditions of continuous enrollment can be found at Guidelines for Determination of Catalog Year. [6]

General Studies Gold
General studies requirements [7] for undergraduate students beginning with the 2024-25 catalog year.

General Studies Maroon
General studies requirements [7] for undergraduate students up through the 2023-24 catalog year.

Satisfactory Progress [8]
This term is used in different ways for students, such as with regard to financial aid, sponsored international programs, athletics and veterans' benefits. Satisfactory progress is a complex calculation specific to major and situation. This term does not refer to academic standing.

Progression [8]
This term refers to how a student meets milestones and degree requirements in movement toward achieving degree completion. This term does not refer to academic standing.

Quick Re-entry [9]
Quick re-entry is a streamlined process that allows undergraduate degree-seeking students who previously attended ASU to return without submitting a new application or application fee, provided they have not been away from ASU for more than seven consecutive fall or spring semesters. Students who are absent because of military deployment, official church missions, federal foreign aid service or permanent disability should follow leave-of-absence procedures.

See Guidelines for determination of catalog year [6] for more information on catalog year and continuous enrollment.

Reinstatement [10]
A student who has previously been academically disqualified and seeks to return either for a fall or spring semester a) immediately or b) after a period of absence and has met college admission standards.

Readmitted [11]
Students not eligible for quick re-entry (i.e., because they have not been enrolled at ASU for seven or more semesters, completed their academic program or were academically disqualified), must apply for readmission and submit applicable fees. Candidates for readmission who are not in academic good standing are subject to college review. A disqualified student who has not already been absent for a semester may contact the college advisor to see if reinstatement is possible.

eAdvisor terms

eAdvisor [12]
A suite of tools used to monitor student progression towards degree completion, including Degree Search, major maps and the tracking of critical and necessary requirements (eight semester tracking application).

Academic Year
The university year, counted as a fall semester and the following spring semester and can also include the following summer semester. Example: the 2024-25 academic year consists of the Fall 2024 semester, Spring 2025 semester and Summer 2025 semester.

Major Map
A major map is an eight-semester, optimal course plan that outlines a recommended sequence of courses, enabling full-time students to graduate in four years. The major map is posted on a student's My ASU in the My Programs box under Degree Progress.

eAdvisor Tracking
ASU's eAdvisor tracking outlines critical courses, GPA requirements and milestones that predict success in each major and tracks students' progress toward meeting them. Sometimes called critical tracking, eAdvisor tracking evaluates how a student's completed courses meet degree requirements in a specific term, including both critical and necessary courses. Students who have not completed critical course requirements for two consecutive fall or spring semesters may be required to change their major.

Critical Requirement [13]
As identified on the major map, a curricular or noncurricular degree requirement that the faculty have identified as critical predictors of success in a specific major. Critical requirements can be courses, grades, GPAs or noncurricular requirements such as submitting a fingerprint clearance card. Critical requirements appear in terms 1-4.

Necessary Requirement
As identified on the major map, a curricular or noncurricular degree requirement that the faculty have identified as necessary for timely completion of degree requirements. Necessary requirements appear in terms 5-8.

Off Track
This refers to a student who has not met one or more critical requirements as stated in terms 1-4, or one or more necessary requirements in terms 5-8 of their major map in a given fall or spring semester.

Twice Off Track
This refers to a student who has not met one or more critical requirements as stated in terms 1-4 of their major map in two consecutive fall or spring semesters. Students who are twice off track may be required to change their major.

On Track
This refers to a student who has met all critical requirements identified in terms 1-4 or all necessary requirements in terms 5-8 of the major map in the current term and previous terms against which they are being evaluated.

Academic Status Reports
ASRs allow faculty to provide weekly feedback to students regarding class performance. Through My ASU [14], students see an indicator notifying them that they have received an ASR, which can include suggested follow-up items and information about academic resources so that they can get the help they need to be successful.

Academic Support Team
Each student has an academic advising committee that helps them set personal academic goals, understand policies and create strategies for staying on track toward graduation. The committee is listed on the student's My ASU page. Also included is information about how advising services work in the student's department, how to get answers to advising questions, and how to make an appointment with an advisor.

Milestone
This is a curricular or noncurricular requirement that needs to be completed by a specific point in time. Examples: portfolio review or audition.

Progress Reports
Progress reports from eAdvisor allow students to track their progress through audits available on My ASU [14]. The Graduation Audit (DARS) outlines a complete list of degree requirements, including university graduation requirements, general studies and major requirements. The DARS Graduation Audit is the official record used to verify degree completion. A major map is an eight-semester, optimal course plan that outlines a recommended sequence of courses, enabling full-time students to graduate in four years.

In addition to traditional progress reports, eAdvisor students can run a critical requirement audit and view their tracking status in My Major Map at any time during the semester. My Major Map, also available on My ASU, provides students the ability to track how their courses are meeting degree requirements as well as their progress toward completing other critical requirements (GPAs and milestones required to stay on track).

A student's record may change multiple times during the semester because of dropped courses, transferred credit, completed milestones or changed majors. The system accounts for changes to student records and updates eAdvisor status, My Major Map and the DARS Graduation Audit nightly.

Priority Tasks
eAdvisor places important notes and reminders in the Priority Tasks box on students' My ASU page. If students become off track, an advising hold is placed on their record. While they may drop and withdraw from a course, they will not be able to add courses to the current semester. Students with off-track status will not be able to register for future fall and spring semesters until they have contacted their advisor and discussed strategies for getting back on track. The advisor will then remove the hold. Other tasks, from student support areas such as Financial Aid and the Registrar's Office also appear in this box.

Course terms

Crosslisting
The same course offered under more than one subject, may be offered by more than one college or department, and may have different course numbers. Students get credit for only one course in the pair or group of crosslisted courses. Some programs may require students to enroll in a course under a certain subject to properly receive credit.

Examples: CDE 350/SOC 350 and AFR 363/HST 333

Corequisite
A course that must be taken while taking another course at the same time. Example: a lab that is required to be taken with a lecture.

Prerequisite
A requirement to be met before registering for a course, such as completing another particular course.

Omnibus course
A course offered on an experimental or tutorial basis, or in which the content is new or periodically changes is termed an omnibus course. The Classification of Courses Policy [15] contains more information about omnibus courses.

Subject [16]
The three-letter code that denotes the subject of a set of courses; sometimes referred to as a prefix.

Examples: AMS = American Studies; EEE = Electrical Engineering; SSP = Sports Science and Performance Programming

Program and degree terms

Accelerated Master's Program [17]
Accelerated bachelor's plus master's degree programs are designed for high-achieving undergraduate students who want the opportunity to share undergraduate coursework with graduate coursework to accelerate completion of their master's degree. These programs feature the same high-quality curriculum taught by ASU's world-renowned faculty. These programs are preapproved combinations and are internal to ASU.

The terms 4+1 and 3+2 have been phased out, effective Fall 2023.

Concurrent Degree [18]
Internal to the university, two degrees, same level, same time, and may include some shared courses. Concurrent degrees can either be preapproved combinations or unique combinations added by the student through an approval process. Examples: JD/PhD or BS/BSE. Two diplomas are awarded.

Disestablished Program
A disestablished program is a major, minor or certificate which the institution has chosen to discontinue. Upon the effective term and year of disestablishment, ASU may choose to stop admitting new students into the program. This includes current ASU students seeking to change into the disestablished major, to add the disestablished major as a concurrent degree, or to add the disestablished minor or certificate. Active students in a disestablished program have a period of four academic years to complete the program requirements. This includes active, not enrolled students typically eligible for quick re-entry. Students choosing quick re-entry to the institution after a period of nonenrollment cannot re-enroll in a disestablished program if four academic years have passed since the effective term of disestablishment.

Students who have not completed the requirements for a disestablished program four academic years after disestablishment will be changed administratively to a different major, or have the minor or certificate removed from their record.

Dual Degree
This is an offering that is both internal and external to ASU. The student pursues two degrees simultaneously, one with ASU and one with an external institution. Example: ASU and Mayo Clinic.

Exploratory Program
Exploratory programs [19] are non-degree granting programs that allow students to explore their interests in different major areas before they formally declare a major. Students formally declare their major by the time they have accumulated 45 credit hours.

Honors Program
Offered by Barrett, the Honors College [20], an honors program gives academically outstanding undergraduate students opportunities to enhance their degree program with an intellectually rigorous honors curriculum and resources only available to Barrett students. Upon graduation, students who complete the Barrett requirements along with their major requirements are awarded an honors endorsement on their transcript.

Joint Degree
Joint programs, or jointly conferred degrees, are a single program of study offered by more than one college at ASU that provide opportunities for students to take advantage of the academic strengths of two or more academic units. Upon graduation, students are awarded one degree and one diploma conferred by both colleges. Both colleges will appear on the transcript and diploma.

Multiple Concentration
Internal to the university, one degree awarded, same level, same time, some shared courses. For undergraduate degrees with multiple concentrations, students may not share coursework between the core concentration curricula. Multiple concentrations are typically added through an approval process. Example: Business (Global Leadership), BA and Business (Sustainability), BA.

Learning modality terms

ASU Local
ASU Local [21] programs combine the high-quality academics of ASU degrees offered online with in-person coaching and academic support. In addition to online learning, students also participate in two-day, local signature experiences, which are designed to harness the essence of the local community. An ASU Local coach is provided on-site and in-person to assist students with guidance, support and development of success skills.

ASU Sync
ASU Sync [22] programs utilize synchronous online courses, meaning students learn online, but the courses are scheduled at certain dates and times so that all students attend live classes together via Zoom. Classes are designed to foster active collaboration and discussion in real-time with faculty and peers.

Experiential Learning
Experiential learning such as internships and co-ops are integral to the preparation of a ASU graduate.

- An internship is a structured practical experience, which allows students to gain work-based skills with the possibility of earning academic credit. Students follow a contract or a plan and are supervised by faculty or practitioners in the career field. Credit-bearing internships are an approved way to meet elective requirements and can count towards the university 120 credit hour graduation requirement at the bachelor's degree level. The department and individual faculty determine whether or not a specific internship experience meets the requirements of the unit and how many credit hours should be awarded.
- A cooperative education program, commonly known as a co-op, is a structured method of combining classroom-based education with practical work experience. Co-ops allow students to earn academic credit for structured job experience as well as a paycheck to help finance their college education. Co-ops are a joint venture between a college or university, a selected employer, and the student.

Grades and grading policies

Credit enrollment

The semester hour is the unit on which credit is computed. It represents one 50-minute class exercise per week per semester. To obtain credit, a student must be properly registered and must pay fees for the course.

Grading options and definitions

Ordinarily a grade of "A+," "A," "A-," "B+," " B," "B-," "C+," "C," "D," or "E" is given upon completion of a course, unless another grading option such as "audit" or "pass/fail" is indicated at the time of registration. Grading options cannot be changed after the close of the add period.

The instructor of a course has full discretion in selecting which grades to use and report from the available grading options on the grade roster.

Fall 2004 and After - see note 1			
Grade	**Undergraduate Definition**	**Graduate Definition**	**Value**
A+			4.33
A	Excellent	Excellent	4.00
A-			3.67
B+			3.33
B	Good	Good	3.00
B-			2.67
C+			2.33
C	Average	Passing	2.00
D	Passing	No Graduate Credit	1.00
E	Failure	Failure	0.00

EU	Failing Did Not Complete - see note 6	0.00		

5 Effective fall 2016 and later.
6 Effective fall 2019 and later.

For grading scales prior to fall 2009, click here. [1]

Incomplete (I)

A mark of "I" (incomplete) is given by the instructor when you are otherwise doing acceptable work but are unable to complete the course because of illness or other conditions beyond your control. You are required to arrange with the

instructor for the completion of the course requirements. The arrangement is recorded on the Request for Grade of Incomplete form [2]. Do not re-register or pay fees to complete the course. The completion date is determined by the instructor but may not exceed one calendar year from the date the mark of “I” is recorded. When you complete the course, the instructor must submit an online grade change request. If you receive an "I" in an undergraduate course in the fall 1983 or thereafter, your grade will be automatically changed to a failing grade "E" if you do not complete the course within one calendar year. If you receive an "I" in a graduate course (500-level or above) your "I" grade will become a permanent part of your transcript if you do not complete the course within one year, and you will have to reregister and pay fees to repeat the course for credit. Marks of "I" are changed to a grade of "E" (0.00) for purposes of evaluating graduation requirements for undergraduate students.

No Report (NR)

The "NR" grade simply means that a grade has not yet been reported. Once final grade processing takes place for the semester, most classes will have an actual grade posted instead of the "NR". If an "NR" grade appears for a course in a prior semester, you should contact the instructor of the course to find out why a final grade was not recorded.

Pass (P)

The "P" grading option is used to indicate a passing grade in a class when an individual student receives permission from both the class instructor and his/her college or school. For further information about this grading option, contact your advisor. If you earn a "P" grade, you will earn hours, but the grade is not used for computing your GPA.
A "P" grade should only be assigned when an individual student receives permission to take a course as pass/fail. Permission is recorded on the Pass/Fail Enrollment form [3]. If the course only awards pass/fail grades, the "Y" grade should be utilized to indicate successful completion of the course.

Withdrawal (W)

If you withdraw from a class after the first week of school, you will receive a mark of "W" on your transcript. You earn no credit or grade for withdrawn classes.

Audit (X)

A student may choose to audit a course, in which case the student attends regularly scheduled class sessions, but no credit is earned. The student should obtain the instructor's approval before registering and paying the fees for the course. Selected courses may not be audited. Veteran students using education benefits should see Veterans Services.

The mark of "X" is recorded for completion of an audited course unless the instructor determines that the student's participation or attendance has been inadequate, in which case the mark of "W" (withdrawal) may be recorded. This grading option may not be changed after the close of the add period. The "X" is not included in earned hours and is not computed in the GPA.

Satisfactory (Y)

The "Y" grade is generally used as a grade for successfully completed internships, projects, readings and conference, research, seminars, theses, dissertations, and workshops. You earn hours for a "Y" grade, but the grade is not used for computing your GPA.

Course in Progress (Z)

The "Z" grade is typically used for courses where work will not be completed within one semester's time, such as research, thesis, and dissertation. Once coursework is complete, your instructor will submit a grade change to assign an appropriate grade. Some courses, such as continued registration, do not earn credit and the "Z" grade will remain on your transcript.

Failing Never Participated (EN)

The grade of "EN" denotes failure due to the student never participating in a course and is treated the same as an "E" for the purposes of GPA, course repeatability, and academic standing determination. The "EN" grade assists ASU in determining a student's financial aid eligibility. For federal aid purposes, we must determine if a student participated in all courses for which they received federal aid. When a student does not participate, the financial aid office must recalculate the student's eligibility. A grade of "EN" will display on the student's transcript beginning fall 2016. Please review the "Grades and Grade Selection" section of the Grade Posting FAQs [4] page for more information about the "EN" grade.

Failing Did Not Complete (EU)

The grade of "EU" should be used to indicate that a student never officially withdrew from the course, but failed to participate in course activities through the end of the course. The EU grade should be used when, in the opinion of the instructor, the student's completed assignments, course activities or both were insufficient to make normal evaluation of academic performance possible because the student stopped participating in the course. This grade distinction is critical to federal financial aid administration. A grade of "EU" will display on the student's transcript beginning fall 2019. Please review the "Grades and Grade Selection" section of the Grade Posting FAQs [4] page for more information about the "EU" grade.

Academic Dishonesty (XE)

The grade of "XE" denotes failure due to academic dishonesty and is treated the same as an "E" for the purposes of GPA, course repeatability, and academic standing determination. A student may not avoid any penalty for academic dishonesty by withdrawing from a course. A student may be reinstated to a course to receive a penalty of a reduced or failing grade or XE. The grade of XE may only be assigned in accordance with ASU's Student Academic Integrity Policy, and not as part of the normal end of the semester grading process.

Grade Reports

You can obtain your final grades after every semester by using any of the following methods:

- To view or print your grades, sign in to My ASU [5] using your ASURITE UserID and Password.
- Submit a request for an official grade report that will show the grades for the last semester in which grades have been processed. You may submit a request to any registration site. [6]

Grade changes

Ordinarily the instructor of a course has the sole and final responsibility for any grade reported. Once the grade has been reported to the registrar, it may be changed upon the authorization of the faculty member who issued the original grade, a department chair, and the dean of the college concerned. This policy also applies to the grade of "I" (incomplete).

Grade changes are submitted online and receive approval by the department chair (or designee) and the dean of the college (or designee) in which the course is offered. Once approvals are received, the new grade will be reflected on your transcript immediately.

Repeating Courses

An undergraduate course taken by undergraduate students at ASU may be repeated for credit if the grade or mark of "D", "E", (including EU, EN, and XE) "W", "X" is received. To be eligible for the deletion of "D" or "E" grades from calculations of the GPA, the course must be repeated at ASU. Independent Learning courses may not be used to repeat "D" or "E" grades. Students who have graduated are not eligible to delete the grade for a course taken before the award of the ASU bachelor's degree. Undergraduate courses in which grades of "D" or "E" (including EU, EN, and XE) are received may be repeated only once. Generally, students may not repeat an undergraduate course for credit when a grade of "C" or higher is earned.

For additional information on repeating courses please refer to the following policies:
SSM 203-06: Deletion of a "D" or "E" Grade Received by an Undergraduate in an Undergraduate Course [7]

SSM 203-05: Duplication of Credit by an Undergraduate Student [8]

Graduate students see the ASU Graduate Policies and Procedures. [9]

Financial Aid & Repeating Courses

Federal regulations limit the number of times a student may repeat a course and receive federal financial aid for that course.

- A student may receive federal financial aid when repeating a course that was previously failed.
- A student may receive federal financial aid to repeat a previously passed course (with a D or better) one additional time, whether or not a student received federal financial aid for an earlier enrollment of the course.
- Once a student has completed any course twice and earned a passing grade (with a D or better) they are no longer eligible to receive federal financial aid for that course
- If a student retakes a course that is no longer eligible for financial aid, the units are excluded from the total enrollment calculated for financial aid and the student's financial aid will be adjusted to exclude these units.

Grade adjustments will be processed automatically after the grades are reported each term. For additional information on repeating a course or the deletion process, contact Records & Enrollment Services at registrar@asu.edu

Demonstration of mastery

An undergraduate student who receives a "D" in a course in which a "C" or higher is required may use the grade from an equivalent course taken elsewhere to demonstrate mastery at the "C" or higher level. However, the course may neither be transferred to ASU (since credit has already been given for the course) nor computed in the student's GPA.

Grades appeal

ASU has informal and formal processes students may follow to appeal a grade. See the Catalog. [10]

GPA calculation

The following grades and their values are used in computing your semester and cumulative ASU GPA:

Grade*	Grade Point Value
A+	4.33
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
D	1.00
E**	0.00
*Other grades (W, X, Y, etc.) are not included in the GPA calculation.	

Grade*	Grade Point Value
**Grades EN, EU, XE, E1, E2, E3, E4, E5, and E8 are equivalent to an E for GPA calculation purposes.	

To calculate your GPA, follow these steps below, or use the GPA Calculator. [11]

- Multiply the grade point value by the number of semester hours for which the course was taken to determine the honor points.
- Add together all the honor points.
- Add together all the semester hours that received one of the above grades to determine net hours.
- Divide the honor points by the net hours to calculate the GPA.
  Honor Points ÷ Net Hours = GPA
  GPAs are rounded to the nearest 100th of a decimal point.
  Semester GPA is based on semester net hours. Cumulative GPA is based on total net hours.
  Although the plus/minus scale includes a grade of A+ with a value of 4.33, the cumulative GPA is capped at 4.00.

Example:

Course	Semester Hours	Grade	Grade Point Value	Honor Points
ENG 101	3.0	A	4.00	12.00
MAT 117	3.0	B-	2.67	8.01
ECN 111	3.0	E	0.00	0.00
Total:	(net hours) 9.0			20.01

20.01 ÷ 9.0 = 2.22 GPA

Students may receive credit for an ASU course by taking an examination in place of the actual course. Learn more. [12]

Grade appeal policy — student procedures

The steps outlined here, beginning with step A, must be followed by any student seeking to appeal a grade. Student grade appeals must be processed in the regular semester immediately following the issuance of the grade in dispute (by commencement for fall or spring) regardless of whether the student is enrolled at the university. It is university policy that

students filing grievances and those who are witnesses be protected from retaliation. A student who believes they are a victim of retaliation should immediately contact the dean of the college or school in which the course is offered.

Students enrolled in courses taught by another institution through a formal ASU partnership (e.g., the PLuS Alliance) must follow the grade grievance and appeal process of the institution teaching the course.

Informal

Step A

The aggrieved student must first undergo the informal procedure of conferring with the instructor, stating any evidence and reasons for questioning that the grade received was given in good faith. The instructor is obliged to review the matter, explain the grading procedure used and show how the grade in question was determined. If the instructor is a graduate assistant and this interview does not resolve the difficulty, the student may then take the problem to the faculty member in charge of the course (regular faculty member or director of the course sequence).

Step B

If the grading dispute is not resolved in step A, the student may appeal to the department chair or other appropriate chair of the area within the department (if any). The department chair may confer with the instructor to handle the problem. Step B applies only in departmentalized colleges or schools.

Step C

If these discussions are not adequate to settle the matter to the complainant's satisfaction, the student may then confer with the dean of the college or school concerned (or the dean-designate), who reviews the case. If unresolved, the dean or designate may refer the case to the college or school academic grievance hearing committee for formal review. In most instances, however, the grievance procedure does not go beyond this level.

Formal

The following procedure takes place after steps A, B and C (or A and C) have been completed.

Step D

Each college or school has on file in the office of the dean (and in each department of the college or school) the procedures and composition of the undergraduate or graduate academic grievance hearing committee for student grievances. Each college or school committee operates under grievance procedures as stated, which satisfy due process requirements. The committee always meets with the student and the instructor in an attempt to resolve the differences. At the conclusion of the hearing, the committee sends its recommendations to the dean.

Step E

Final action in each case is taken by the dean after full consideration of the committee's recommendation. Any recommended grade changes may be made by the dean. The dean informs the student, instructor, department chairperson (if any), registrar and grievance committee of any action taken.

Policies for students at ASU at Los Angeles

The following policies apply to students pursuing programs at the ASU at Los Angeles location. Students at this location are also responsible for knowing and adhering to all other academic policies of Arizona State University.

BPPE compliance disclosures

Most compliance disclosures [1] mandated by BPPE, including School Performance Fact Sheets, are available on the Admission Services website. Below are additional disclosures related to finances; drop, add and withdrawal; and university and student record policies.

Institution financial status

ASU does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec. 1101 et seq.).

University academic information

Prospective students are encouraged to review the ASU academic catalog [2] and Degree Search [3] prior to signing an enrollment agreement. They are also encouraged to review the School Performance Fact Sheets, which must be provided prior to signing an enrollment agreement.

The ASU academic catalog is published annually. Department, school, division, college and university requirements are upgraded often, and may change. A PDF archive [4] of the academic catalog for the catalog year [5] is published annually, which includes educational programs offered by ASU and their curriculum. ASU also publishes a list yearly of instructional faculty [6]; students can access the latest version of the catalog and requirements through the Academic Catalog website and Degree Search [3].

Class sessions in California are held in two ASU locations:

ASU California Center - Broadway
1111 S Broadway
Los Angeles, CA 90015
(213) 510-6900

ASU California Center - Grand
919 South Grand Avenue
Los Angeles, CA 90015
(213) 510-6960

Notice concerning transferability of credits and credentials earned at this institution

The transferability of credits a student earns at Arizona State University is at the complete discretion of the institution to which they may seek to transfer. Acceptance of the degree or certificate the student earns in the educational program is also at the complete discretion of the institution to which they may seek to transfer.

If the degree or certificate a student earns at this institution is not accepted at the institution to which they seek to transfer, the student may be required to repeat some or all of their coursework at that institution. For this reason, students should make certain that their attendance at this institution will meet their educational goals. This may include contacting an institution to which they may seek to transfer after attending ASU to determine if their degree or certificate will transfer.

Student records

Arizona State University permanently retains student transcripts, graded class rosters, official grade reports, graduation audit reports, combined name and gender change authorizations, degree/certificate issuance records, and theses and dissertations. Records Management [7] retention schedules list other records and the amount of time required to keep them. Many student records, including transcripts, can be accessed through a student's My ASU [8] at any time. Students can contact University Registrar Services [9] or the appropriate department for other record requests.

Student Tuition Recovery Fund

Note: The Student Tuition Recovery Fund payment is included as part of ASU tuition and is not assessed as a separate fee.

The State of California established the Student Tuition Recovery Fund to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution who is or was a California resident while enrolled or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition and suffered an economic loss. Unless relieved of the obligation to do so, a student must pay the state-imposed assessment for the STRF, or it must be paid on their behalf if the student is in an educational program, who is a California resident or is enrolled in a residency program, and prepays all or part of the tuition.

Students are not eligible for protection from the STRF and are not required to pay the STRF assessment if they are not California residents or are not enrolled in a residency program.

It is important that students keep copies of their enrollment agreement, financial aid documents, receipts or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the:

Bureau for Private Postsecondary Education
1747 North Market Blvd., Suite 225
Sacramento, CA 95834
(916) 574-8900 or (888) 370-7589.

To be eligible for STRF, a student must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and the student did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. The student was enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or was enrolled in an educational program within the 120 day period before the program was discontinued.
3. The student was enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. The student has been awarded restitution, a refund or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but has been unable to collect the award from the institution.
7. The student sought legal counsel that resulted in the cancellation of one or more of their student loans and has an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four-year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Drop, withdrawal and refund policy

Per California education code EDC § 94919, students pursuing a degree program at the ASU at Los Angeles location may withdraw from ASU and obtain a prorated refund of money paid for institutional charges if they have completed 60% of the semester or less at the time of withdrawal. The refund excludes disbursed federal financial aid funds.

If you drop a class or officially withdraw during the 100% refund period, you will receive a refund in accordance with the ASU refund policy. The applicable refund periods are:

- For regular semester classes (session C) and sessions that are eight weeks or longer, the 100% refund period extends through the first two weeks of the semester.
- For sessions that are shorter than eight weeks (sessions A and B) and dynamically dated classes, the 100% refund period is one week after the semester begins.
- For classes that begin prior to the first day of the regular semester, the applicable 100% refund period begins on the class start date, not the semester start date.
- For the summer session classes (sessions A, B and C, and dynamically dated classes), the 100% refund period is the first five days of the applicable summer session.

You may withdraw from ASU completely by providing notice through My ASU. To withdraw through My ASU, you must complete the steps below after contacting your advisor to discuss the withdrawal process:

1. Review the Academic Calendar for complete session withdrawal and tuition refund deadlines. ASU at Los Angeles students may withdraw from a course after instruction has started and receive a pro-rata refund for the unused portion of the tuition and other refundable charges if you have completed 60% or less of the instruction for the academic term.
2. Log into My ASU. [8]
3. Under the My Classes section, select Registration and then Drop/Withdrawal.
4. Indicate all classes and/or sessions for the withdrawal, answer the required questions, and select Submit Withdrawal Request.
5. Your request will be reviewed and you will be notified of the status. If approved, your Complete Session Withdrawal request will be sent to University Registrar Services for processing.

Students may also be subject to special types of withdrawal due to disruptive behavior, conduct or lack of attendance.

In addition to requesting withdrawal via My ASU, you must also withdraw from the enrollment agreement by completing the cancellation form.

Refunds will be paid within 45 days of cancellation or withdrawal.

If you received federal student financial aid funds, you are entitled to a refund of monies not paid from federal student financial aid program funds.

If you obtain a loan to pay for the educational program, you will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If you default on a federal or state loan, both of the following may occur:

- The federal or state government or a loan guarantee agency may take action against you, including applying any income tax refund to which you are entitled to reduce the balance owed on the loan.
- You may not be eligible for any other federal student financial aid at another institution or other government financial assistance until the loan is repaid.

Professional licensure and certification

Planning to pursue a career that requires licensure or certification beyond your degree?

Arizona State University's academic programs that are designed to meet educational requirements for a specific professional license or certification are generally designed to prepare students to apply for applicable licensure or certification in Arizona where such licensure or certification exists. Completing an ASU program may not result in meeting the educational requirements for licensure or certification in any other state.

Professional licensure regulations and requirements vary from field to field, and from state to state. ASU recommends that students check with the licensing board where they intend to seek licensure and practice to learn about licensing requirements and possible additional steps such as examinations, experiences, or training that may need to be fulfilled in order to obtain licensure in a particular state.

The information provided below shares the university’s determination of whether a particular program, if successfully completed, would satisfy the educational requirements for specific professional license or certification in each state.

These disclosures do not guarantee that a licensing board will approve or deny an application. Additionally, these disclosures do not account for changes in state law or regulation that may affect an application for licensure that occurs after these disclosures have been made.

Relocating to a different state after admission into a degree program may impact whether a student can remain in the degree program, meet the state licensure requirements, and/or continue to receive financial aid funding. Prior to considering relocating, ASU recommends that students contact their program advisor to discuss authorization and licensure eligibility requirements. It is the student’s responsibility to notify the institution of a change in physical location.

Disclosures

Registration

Registering for classes at ASU

Registering for classes is easy no matter where you are on your academic journey. Start by determining the type of student you are below, and then follow the instructions provided.

Newly admitted students

Undergraduate students

If you have been admitted to ASU, you will register for classes at New Student Orientation. [1]

Graduate students

Connect with your academic department for more information on how to register for courses. You can find the contact information for your academic department in the Academic Support Team box on My ASU. [2]

Continuing students

If you are currently enrolled at ASU, follow the steps below to register for classes.

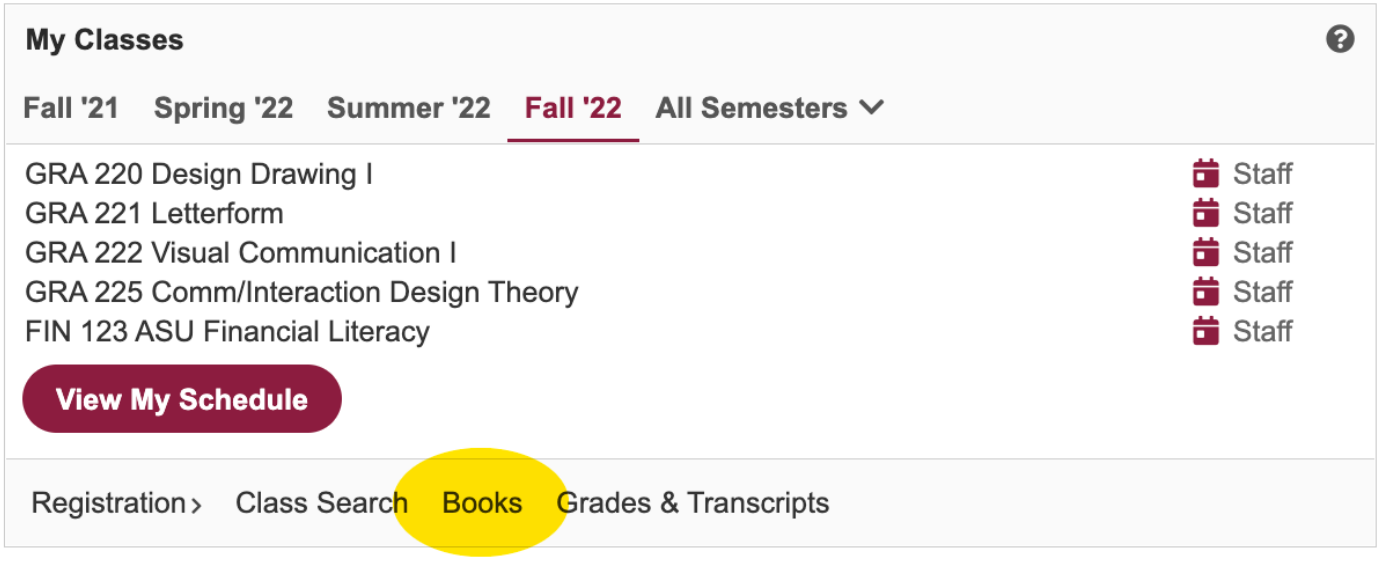
Returning students

If you previously attended ASU as an undergraduate student but have not remained consecutively enrolled at ASU each fall and spring semester, visit the re-entry page [3] for next steps.

Registering for Classes

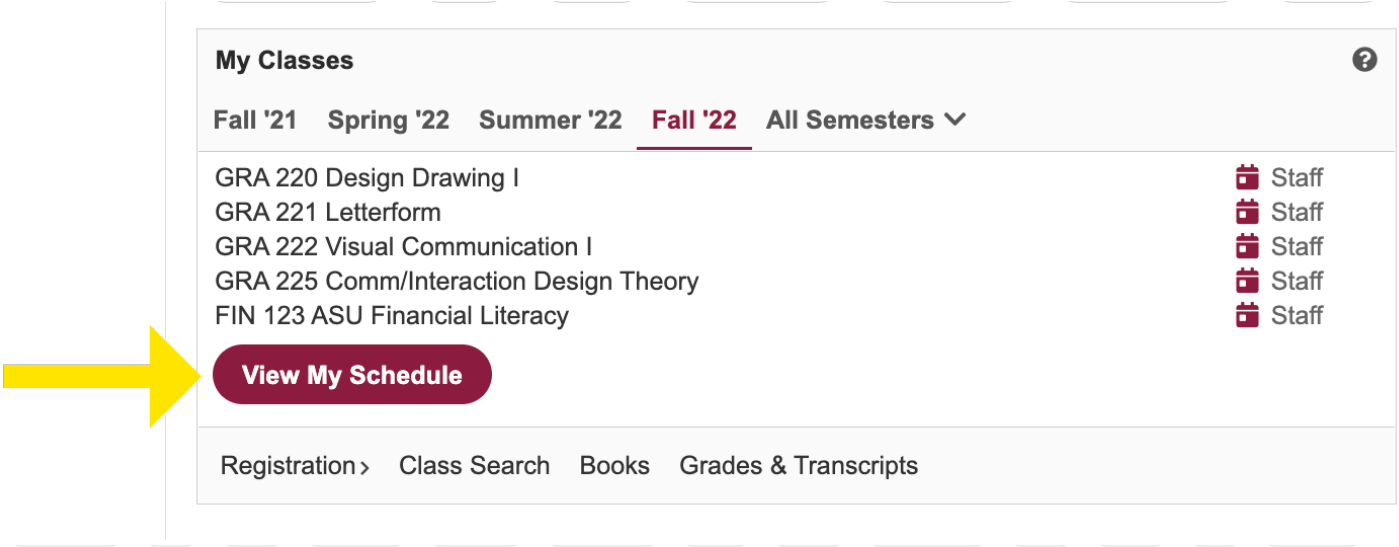
Step 1: Clear any Registration Holds
Sign in to My ASU [2] to determine if you have any holds that will prevent you from registering for classes. Examples of registration holds include missing transcripts, unpaid fees, academic advising requirements and immunizations requirements. Clearing registration holds as quickly as possible avoids delays in registration which can impact your chances of getting the classes and schedule that are best for you.

For more information on a particular hold, select Help on My ASU and enter any questions.

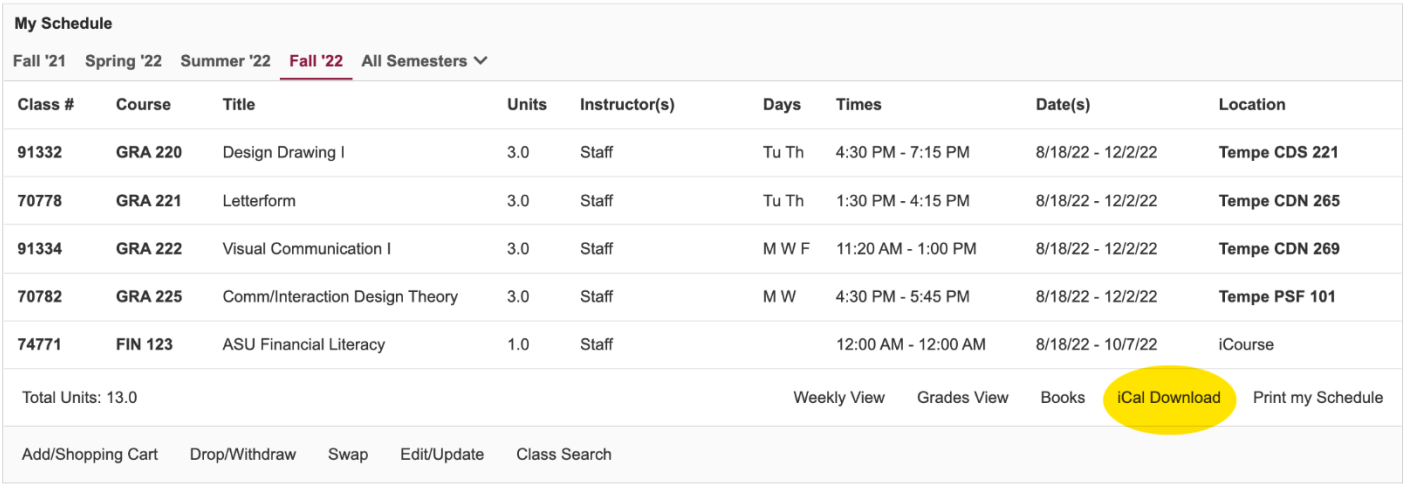


Step 2: Register for Classes
Once you have cleared any registration holds, you are ready to register for classes. You may register for classes online [2] or in person [4]. You can also search for available classes online. [5]

Undergraduate students should check out this article [6] explaining how to use your major map and DARs, or watch this video [7] with step-by-step instructions on how to register.



Graduate students, you should review your plan of study [8] (iPOS) as your program roadmap to help you stay on track for graduation.



Step 3: Pay Tuition and Fees
Once you are registered, sign in to the My ASU Finances tab [9] to view and pay your tuition and fees. More information regarding how tuition and fees are calculated and important deadlines for paying tuition and fees is available via Student Business Services. [10]

Step 4: Purchase Textbooks
Sign in to My ASU [2] to obtain your required book list by selecting Books in the My Classes box and order textbooks through ASU Bookstores. [11]

Step 5: Easily Access Your Class Schedule
Download to iCal
Sign in to My ASU [2] to download your class schedule and add it to your personal calendar. Click on View My Schedule and you'll be taken to a screen where you can download to iCal.

Drop/add and withdrawal

How to drop, add and withdraw

How to add a class

The easiest way to add a class is by signing into My ASU [1], clicking on the Registration link in your My Classes box, and selecting Add. You may add a class to your schedule up until the add deadline for that class.

Adding a class after the add deadline is considered a Late Add [2] and requires instructor, department and college approval.

Policies and procedures for late adds vary by college/school, click here [2] for detailed instructions.

Dropping/withdrawing from a class

Beginning Fall 2023, the drop deadline and add deadline will be distinct. If you drop a class by the drop deadline, you may be eligible for a 100% refund of your tuition for that class.

How to drop/withdraw from a class

You may remove a class from your current schedule by dropping/withdrawing from it up until the appropriate deadline for that class. You can request a drop/withdrawal from a class by signing into My ASU [1], clicking on the Registration link in your My Classes box, and selecting Drop/Withdrawal. Please refer to the Tuition Refund Policy [3] to determine if dropping or withdrawing from classes will generate a tuition refund. The timing of when you make your request determines whether it is a drop or a withdrawal.

Before the drop deadline

A drop/withdrawal request made prior to the drop deadline for your class will be considered a drop. A drop will remove the class from your current schedule with no record of your enrollment in the class on your official transcript. Beginning Fall 2023, dropping a course by the drop deadline may generate a 100% tuition refund for that class.

After the drop deadline

A drop/withdrawal request made after the drop deadline but before the course withdrawal deadline for your class will be considered a withdrawal. A withdrawal will remove the class from your current schedule and will result in a grade of ‘W’ on your official transcript. The grade of ‘W’ has no impact on your GPA.

Swapping classes

How to swap classes

You may simultaneously add a class while dropping another by swapping them. You can swap classes by signing into My ASU [1], clicking on the “Registration” link in your My Classes box, and selecting “Swap.” A swap will not drop you from your original class unless your add request was successful. This is especially helpful when attempting to switch from one section of a class to another section of the same class. A swap must be completed by the appropriate add deadline for that class.

Complete session drop/withdrawal

How to completely withdraw from classes

If you no longer plan on attending or completing your classes in a given session, you can remove all of them from your current schedule by requesting a complete session drop/withdrawal up until the appropriate complete withdrawal deadline. This should be viewed as a last resort as there may be serious academic and financial consequences. Please refer to the Tuition Refund Policy [3] to determine if dropping/withdrawing from classes will generate a tuition refund. The timing of your request determines whether it is a drop or a withdrawal.

Before drop deadline

A complete session drop/withdrawal request made prior to the drop deadline for your classes will be considered a complete session drop. A drop will remove the class(es) from your current schedule with no record of your enrollment in the class(es) on your official transcript.

After the drop deadline

A complete session drop/withdrawal request made after the drop deadline for your classes will be considered a complete session withdrawal. A withdrawal will remove the classes from your current schedule and will result in a grade of 'W' on your official transcript for each class withdrawn. The grade of 'W' has no impact on your GPA.

The process for requesting a complete session drop/withdrawal will depend on whether you are an undergraduate or a graduate student.

Undergraduate students

Requesting a complete session drop/withdrawal is an important decision as it may result in serious academic and financial consequences. If you have questions about withdrawing or the academic or financial consequences of withdrawing contact your college/school [4] to discuss your situation. The timing of your request will determine the impact it will have as well as the steps you will need to take to complete the process.

- Before the start of the fall or spring semesters (or anytime during a summer session) you may request a complete session drop/withdrawal by signing into My ASU [5], clicking on the "Registration" link in your My Classes box, and selecting "Drop/Withdrawal."
- After the start of the fall or spring semesters, contact your college/school [5] for more information.

Graduate students

You may request a complete session drop/withdrawal by signing into My ASU [1], clicking on the "Registration" link in your My Classes box, and selecting "Drop/Withdrawal."

Other types of drops/withdrawals

This section covers special types of drops/withdrawals due to extenuating circumstances (such as a personal mental/physical condition, death or serious illness of a family member or close friend, or military duty/activation), lack of attendance or disruptive behavior.

Medical/compassionate withdrawal

You may be eligible for a medical/compassionate withdrawal if your withdrawal is due to extenuating circumstances such as a serious physical or mental illness (medical withdrawal) or the death/serious illness of a family member (compassionate withdrawal). To request a medical/compassionate withdrawal, you must submit a Request for Documented Medical/Compassionate Withdrawal [5] form along with appropriate documentation to the college of your major. Approved medical/compassionate withdrawals may generate tuition refund if approved within two years of the end of the semester, please see the Tuition Refund Policy [6] for more information.

Military activation withdrawal

A student who is a member (or the spouse of a member) of the National Guard, Reserve, or other U.S. Armed Forces branch and is unable to complete classes because of military activation, may request complete withdrawal or course withdrawals, incompletes, or grades, depending on the timing of the activation and the individual student's needs. Absences resulting from military activation will not adversely affect a student's catalog year.

To receive consideration under the military activation policy, a student should complete a Military Activation Form [7] and return the completed form, along with a copy of the military activation order, to the Pat Tillman Veterans Center. The Pat Tillman Veterans Center staff will coordinate the processing of the form for the student, including verification of orders, counseling on available options, referrals to academic departments, referrals or notification to offices regarding potential refunds, and initiation of processing administrative withdrawals or incomplete grades.

Instructor-initiated drop

Instructors have full authority within departmental or other higher-level policies to decide whether or not class attendance is required. If you are unable to attend class it is your responsibility to notify your instructors and/or follow their attendance policy. If you are absent from class through the second week of classes (for a fall or spring semester) or the

first four days of a summer session, your instructors may exercise the option to drop you from the class (this is often done to create an open seat for another student wishing to add the class).

Please be aware that nonattendance will not automatically result in you being dropped from a class. Instructors have the right to exercise this option at their discretion. If you are unable to attend or complete a class it is your responsibility to drop/withdraw from the class prior to the appropriate deadline.

Instructor-initiated drops for nonattendance must be based upon concrete evidence of nonattendance and be signed by the Dean or Dean's Designee of the college offering the class. The college will notify students that they have been dropped for nonattendance by mail at the students' currently posted mailing address. Nothing in this policy contradicts any other policy regarding attendance, religious holidays or the students' responsibility to notify instructors in case of their absences.

Instructor-initiated withdrawal

Instructor-initiated withdrawals are made when an instructor withdraws a student from a class with a grade of "W" or "E" in cases of disruptive behavior.

Add, drop and withdrawal deadlines

Registration deadlines determine the last day you are able to add, drop or withdraw from classes. Each class has its own set of registration deadlines which are based on the length of the class as well as the session in which the class is held. The individual add, drop and withdrawal deadlines drop/add/withdrawal or add deadlines listed on the Academic Calendar [8] apply to classes scheduled in the regular A/B/C sessions. If your class does not follow the A/B/C session timelines, the individual add, drop and withdrawal deadlines drop/add/withdrawal or add deadlines are prorated. The best way to determine the registration deadlines for a class you are registered for is to sign in to My ASU [1] and click on the calendar icon next to the class in the My Classes box. To determine the registration deadlines for a class you have not yet registered for, use the online Class Search and Course Catalog [9] to search for the class and click on the Dates column in the search results.

Add deadline

This is the last day to add a class. Adding a class after the deadline is considered a Late Add [10] and requires instructor, department, and college approval.

Drop deadline

This is the last day to drop a class without receiving a grade of "W" on your transcript. All withdrawals after this date will result in a grade of "W" on your transcript for each class withdrawn.

Course withdrawal deadline

This is the last day to request a withdrawal from a class while staying enrolled in other classes in the same session. A withdrawal from a class after this date is only available as part of a complete session withdrawal (see below).

Complete session withdrawal deadline

This is the last day to request a complete withdrawal from a session. As part of a complete session withdrawal you must withdraw from all of your classes in the session. Beginning the first day of the fall and spring semesters undergraduate students are required to contact their college/school [4] to facilitate the withdrawal process.

Editing a class

Some classes allow you to select the number of credit hours, grading basis, and instructor for the class. If you are registered for one of these classes you may edit these options by signing into My ASU [1], clicking on the Registration link in the My Classes box, and selecting Edit.

Enrollment Request Forms [10]

Contact University Registrar Services [11]

Source URL: https://registrar.asu.edu/drop-add

Complete session withdrawal

Undergraduate students

Beginning the first day of the fall and spring semesters, you are required to connect with your college/school of your major to facilitate the withdrawal process. Select your college or school below for instructions regarding the complete withdrawal process.

The College of Liberal Arts and Sciences [1]
Edson College of Nursing and Health Innovation [2]
Herberger Institute for Design and the Arts [3]
Ira A. Fulton Schools of Engineering [4]
Mary Lou Fulton College for Teaching and Learning Innovation [5]
New College of Interdisciplinary Arts and Sciences [6]
College of Integrative Sciences and Arts [7]
College of Global Futures [8]
College of Health Solutions [9]
Thunderbird School of Global Management [10]
Walter Cronkite School of Journalism and Mass Communication [11]
Watts College of Public Service and Community Solutions [12]
W. P. Carey School of Business [13]
University College [14]

During the fall or spring semester, submit your withdrawal request by signing in to My ASU [15], click on the Registration link in your My Classes box, and select Drop/Withdrawal. Your request will be electronically routed to your college or department for review and next steps. If the semester has not yet begun, or you wish to withdraw from a summer session, sign in to My ASU [15], click on the Registration link in your My Classes box, and select Drop/Withdrawal and follow the steps to withdraw from your classes.

Graduate students

You may request a complete session drop/withdrawal by signing in to My ASU [15], clicking on the Registration link in your My Classes box, and selecting Drop/Withdrawal, or by submitting the Complete Session Withdrawal [16] form to any University Registrar Services office location [17]. Be sure to review the Graduate College's continuous enrollment policy [18] and discuss your withdrawal with your program advisor, if needed.

Please refer to the Tuition Refund Policy [19] to determine if dropping/withdrawing from classes will generate a tuition refund.

ASU support resources & options

Withdrawing from one or two classes (course withdrawal)

After the drop/add deadline through the course withdrawal deadline for a class, students can withdraw from the class while remaining enrolled in other classes. Students are encouraged to contact their academic advisor to discuss the impact this may have on meeting critical requirements.

Medical/compassionate withdrawal

Medical/Compassionate withdrawals are available for students needing to withdraw from one or more classes due to a personal mental/physical health condition or the death or serious illness of a family member/close friend. More information concerning medical/compassionate withdrawal requests can be found here. [20]

ASU tutoring centers provide a variety of services to help students become better learners and gain the confidence and skills to achieve their academic goals. Services include: writing centers, math tutoring, subject area tutoring, and supplemental instruction. More information about tutoring centers can be found here. [21]

ASU counseling services

Counseling and mental health services are provided at each of the four ASU campuses. ASU students may seek services at any of the campus counseling centers, regardless of their college affiliation. ASU Counseling Services locations and contact information can be found here. [22]

"I" (incomplete) grade

If approved, a mark of "I" (Incomplete) may be given by the instructor when students are otherwise doing acceptable work but are unable to complete the class because of illness or other conditions beyond their control. Students interested in incompletes should discuss this option with their instructors and arrange for the completion of the class requirements.

Possible consequences resulting from a complete session withdrawal:

- Financial Aid: Financial aid recipients who completely withdraw from the university may be responsible for immediate repayment of funds. The effect of a complete withdrawal on financial aid depends on when the withdrawal is dated and the type of financial aid. More information concerning the return of financial aid is available here. [23]
- Tuition and Refunds: The date of a complete withdrawal will determine whether or not a tuition refund will be generated. Please review the Tuition Refund Policy [19] for more information.
- Health Insurance: Students should contact their health insurance company to determine whether or not withdrawing from the university affects their coverage.
- Residential Life: Students who live on campus should contact their residential hall community staff to determine what impact withdrawing will have on their eligibility to live on campus, to complete a License Agreement Release (LAR) form, and to arrange an appointment to officially check out. More information concerning housing cancellations is available here. [24]
- Veteran Benefits & Certifications: Students should contact the appropriate Veteran Benefits & Certifications office to discuss information regarding veterans' educational benefits and/or military activation. Veteran Benefits & Certifications office locations and contact information can be found here. [25]

For more information on Complete Withdrawals, contact University Registrar Services at registrar@asu.edu or 480-965-3124.

Late registration

Registering for any class after the deadline [1] requires approval from the college or school offering the course and is an exception to university policy. There is no guarantee that a late request will be approved.

Courses for which the deadline to register has passed are marked in the schedule of classes by a gray "add" button. When this button is selected, students are directed to a page that prompts them to select the appropriate link for the college offering the course. The link connects the student to a customized page with step-by-step instructions on how to request a late add for that particular course. Policies and procedures vary by college/school. See the list below for detailed information and instructions.

State authorization

How is ASU authorized in my state?

Select your state in the dropdown to see how ASU is authorized to operate in your state and to learn about policies and program exceptions in your state.

The State Authorization Reciprocity Agreements (SARA) is a national initiative that helps expand students' access to educational opportunities while maintaining compliance with state regulations. Institutions participating in SARA may offer distance education opportunities in SARA member states without seeking individual approval in each state. To learn more about SARA, visit https://nc-sara.org/.

The State of Arizona was approved as a SARA member state on November 11, 2014. Arizona State University is approved as a SARA participating institution by the Arizona SARA Council [1] and the National Council for State Authorization Reciprocity Agreements (NC-SARA) [2].

Relocating to a different state after admission into a degree program may impact whether a student can remain in the degree program, meet the state licensure requirements and/or continue to receive financial aid funding. Prior to considering relocating, it is recommended that students contact their program advisor to discuss authorization and licensure eligibility requirements. It is the students responsibility to notify the institution of a change in physical location.

Alabama

As a participating State Authorization Reciprocity Agreement (SARA) institution, Arizona State University is authorized to offer distance education to persons located in Alabama in accordance with NC-SARA established policies and standards; program exceptions are noted below. A program exception is a program unavailable in the state.

Program exceptions

Mary Lou Fulton College for Teaching and Learning Innovation
Special Education (Teacher Certification), MEd [3]
Area: Intensive Support Needs - Moderate/Severe Disabilities

Sandra Day O'Connor College of Law
Juris Doctor, JD [4]

The College of Liberal Arts and Sciences
Clinical Psychology, MS [5]

Notification

College of Health Solutions
Behavioral Health (Clinical), DBH [6]
Applicants to the Doctor of Behavioral Health (DBH) program, clinical concentration, must hold or be eligible for licensure in a recognized clinical field to be considered for admission. Applicants are encouraged to contact their respective state

licensing board to verify their licensure status and to determine whether there are any restrictions on how knowledge gained in the DBH program may be applied within their professional scope of practice.

Professional Licensure and Certification
ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure webpage. [7]

Complaint procedure
Arizona State University will take appropriate action to seek resolution when a student complaint is brought to our attention. Students wishing to file a complaint are encouraged to first utilize the University's internal complaint policies. Additionally, distance education students may seek redress for a non-academic complaint, after first completing the institutional complaint procedure and the Arizona Board of Regent's complaint process, by filing a Complaint Form via the AZ SARA complaint process [8]. The appeal must be brought within two years of the incident about which the complaint is made. Distance education students should see Policies for further information. [9]

Alaska

As a participating State Authorization Reciprocity Agreement (SARA) institution, Arizona State University is authorized to offer distance education to persons located in Alaska in accordance with NC-SARA established policies and standards; program exceptions are noted below. A program exception is a program unavailable in the state.

Program exceptions

Mary Lou Fulton College for Teaching and Learning Innovation
Secondary Education (Teacher Certification), MEd [10]
Area: Dance
Teacher Certification (Graduate Certificate) [11]
Area: Secondary Education – Dance

Notification

College of Health Solutions
Behavioral Health (Clinical), DBH [6]
Applicants to the Doctor of Behavioral Health (DBH) program, clinical concentration, must hold or be eligible for licensure in a recognized clinical field to be considered for admission. Applicants are encouraged to contact their respective state licensing board to verify their licensure status and to determine whether there are any restrictions on how knowledge gained in the DBH program may be applied within their professional scope of practice.

Professional licensure and certification

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure webpage. [7]

Complaint procedure

Arizona State University will take appropriate action to seek resolution when a student complaint is brought to our attention. Students wishing to file a complaint are encouraged to first utilize the University's internal complaint policies. Additionally, distance education students may seek redress for a non-academic complaint, after first completing the institutional complaint procedure and the Arizona Board of Regent's complaint process, by filing a Complaint Form via the AZ SARA complaint process [8]. The appeal must be brought within two years of the incident about which the complaint is made. Distance education students should see Policies for further information. [9]

Nebraska

As a participating State Authorization Reciprocity Agreement (SARA) institution, Arizona State University is authorized to offer distance education to persons located in Nebraska in accordance with NC-SARA established policies and standards; program exceptions are noted below. A program exception is a program unavailable in the state.

Notification

College of Health Solutions
Behavioral Health (Clinical), DBH [6]
Applicants to the Doctor of Behavioral Health (DBH) program, clinical concentration, must hold or be eligible for licensure in a recognized clinical field to be considered for admission. Applicants are encouraged to contact their respective state licensing board to verify their licensure status and to determine whether there are any restrictions on how knowledge gained in the DBH program may be applied within their professional scope of practice.

Professional licensure and certification

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure webpage. [7]

Complaint procedure

Arizona State University will take appropriate action to seek resolution when a student complaint is brought to our attention. Students wishing to file a complaint are encouraged to first utilize the University's internal complaint policies.

Please see Policies [9] for further information. Additionally, distance education students may seek redress with the Republic of the Marshall Islands State Higher Education Agency Scholarship Grant and Loan Board at (692) 625-5770.

Student Privacy: Family Educational Rights and Privacy Act (FERPA)

The federal Family Educational Rights and Privacy Act (also called FERPA or the Buckley Amendment) affords students certain privacy rights regarding their education records. Those rights are summarized below. For more detailed information about FERPA, consult SSM 107-01: Release of Student Information [1] or contact University Registrar Services [2].

Know your rights

The right to inspect

The right to inspect and review the student's education records within 45 days of the day the university receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

Note: Students must provide photo identification in order to access their education records.

The right to amend

The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. Students who believe their record is inaccurate or misleading should write to the university official responsible for the record. Clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing about the request for amendment. Additional information about the hearing procedures will be provided to the student when notified of the right to a hearing.

Note: FERPA does not address grade disputes or grievances, which are pursued through other university and/or college procedures.

The right to consent

The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. School officials are administrators, faculty, professional staff, academic advisors, clerical or support employees, including ASU law enforcement unit personnel and ASU health staff; volunteers; a person or company with whom the university has contracted as its agent, acting with a legitimate educational interest, to provide a service instead of using university employees or officials (such as an attorney, auditor, collection agent, service provider); a person serving on the Board of Regents; staff in the Alumni Association and ASU Foundation offices; or a student serving on an official committee, such as a disciplinary or grievance committee, or

assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the interest in an education record is justified under one or more of the following conditions:

- the information or records requested are relevant and necessary to accomplish some task or determination related to the legitimate educational interest of the student
- the official needs to review an education record in order to fulfill his or her professional responsibilities for the university
- the task or determination is an employment responsibility or a properly assigned subject for the inquirer's determination and/or
- the task or determination is consistent with the purpose for which the records, information, or data are maintained.

Note: A parent of a dependent student may challenge denial of access to the dependent student's record by producing the most current copy of Internal Revenue Form 1040. (Dependency is defined in Section 152 of the Internal Revenue Code.) If that form lists the student in question as a dependent, the parent will be required to sign an Affidavit of Dependency which affirms that the student is his/her tax dependent. The affidavit will be retained by the University Registrar's Office and must be renewed each tax year. Upon receipt of these documents, the dependent student records may be made available to the parent as specified under FERPA.

The right to file a complaint

The right to file a complaint with the U.S. Department of Education concerning alleged failures by Arizona State University to comply with the requirements of FERPA. Students are encouraged to first contact University Registrar Services at (480) 965-7302. A complaint may be filed in writing with the Department of Education at the following address: Family Policy Compliance Office U.S. Department of Education 400 Maryland Avenue, SW Washington, DC, 20202

Definitions

Student — Any individual formally admitted who is or has been in attendance at ASU. The term does not apply to applicants for admission, nor does it apply to persons who have been admitted but who have not registered.

Education Record — Any record(s) directly related to a student and maintained by ASU or by a party acting for the university. Education records include any information or data recorded in any medium, including but not limited to handwriting, print, computer media, video or audio tape, film, microfilm, and microfiche.

Directory Information — Information that may be released to anyone without the consent of the student, unless the student indicates otherwise, except to the extent that FERPA authorizes disclosure without consent:

- Student name
- Addresses (e.g., local, home, mailing and ASU e-mail, including directory number)
- Telephone numbers
- Date of birth
- Degrees, honors and awards received (including Dean's List, National Merit, National Achievement, and National Hispanic Scholars)
- Most recently attended educational institution
- Academic level
- Major
- College
- Dates of attendance
- Enrollment status (e.g., undergraduate or graduate, full-time or part-time)
- Participation in officially recognized activities/sports
- Weight/height of members of athletic teams

Personally Identifiable Information — Includes not only the name of the student and other personal identifiers, but also a list or description of personal characteristics or any other information that, alone or in combination, is linked or linkable to a specific student that would allow a reasonable person in the school community, who does not have personal knowledge of the student and/or relevant circumstances, to identify the student with reasonable certainty. Further,

personally identifiable information includes all information about a student that is not defined as directory information, as well as any information that the student has indicated may not be released, including directory information.

My ASU parent guest access

My ASU Parent Guest Access is an online tool that allows students to share FERPA-protected information with parents and guests. Students have the choice to share some or all of their FERPA-protected information with parents and guests. For more information visit My ASU Parent Guest Access. [3]

Student control of directory Information

Students may control release of directory information by submitting a Withhold Directory Information Request form. [4]

Unless otherwise requested, a student's name, college, major, enrollment status (undergraduate or graduate), and ASU e-mail address will appear in the directory of faculty, staff, and students in ASU's online directory. To avoid the release of directory information on the web or in general, the Withhold Directory Information Request form must be submitted. [4]

ASU has a policy that regulates and permits the sale of enrolled student directory information only through University Registrar Services. If a FERPA directory hold is on the student's record, the directory information will not be included in these requests.

Students accessing education records or receiving university services must provide proof of identification.

For more detailed information on ASU's FERPA policy, please see SSM 107-01: Release of Student Information. [5]

Questions or requests for additional information may be directed to University Registrar Services' Records & Enrollment Services at registrar@asu.edu

Transaction by proxy

Students unable to process transactions in person or via My ASU [6] may designate another person to process transactions on their behalf by proxy. [7]

Student Right-to-Know Act & Higher Learning Commission Data

Updated Summer 2026

Overview
As required by the federal Student Right-to-Know Act, institutions that receive Title IV funding must disclose certain consumer information to current and prospective students, including graduation and completion rates for degree-seeking, full-time students. Similarly, the Higher Learning Commission requires institutions to publish student achievement information, such as completion rates, job placement rates, and other measures that are useful to current and prospective students. In support of these requirements, the following "Facts About ASU" section provides consumer information about the academic success and outcomes of Arizona State University students.

Arizona State University is recognized nationally as a leading public research university and awards more degrees than any other university in Arizona. Students from across the United States and around the world choose ASU for its high-quality academic programs, innovative research opportunities, comprehensive student support services, and the value of an ASU degree.

Academic Environment
ASU offers more than 400 undergraduate majors and more than 450 graduate degree programs. In Fall 2025, including majors with concentrations, students were enrolled in 9 associate degree programs, 473 bachelor's degree programs, 384 master's degree programs, 148 doctoral degree programs, and a law degree program. A complete list of ASU degree programs is available at https://degrees.asu.edu/.

Total ASU Students
In the 2024-25 academic year, Arizona State University (ASU) enrolled over 194,000 students across its various campuses. The student distribution was as follows: Tempe (61,074), Downtown Phoenix (11,312), Polytechnic (6,830), West (5,827), Online (107,950), and Other Locations (1,502). By Fall 2025, ASU's total enrollment was 160,051 students. Of these, 78,510 were enrolled in Campus Immersion programs, while 81,541 were part of Digital Immersion programs. ASU attracted students from all 50 U.S. states and 160 countries in Fall 2025. Additionally, 40% of enrolled students were Arizona residents.

New ASU Students
In Fall 2025, Arizona State University enrolled 17,419 first-year students, including 13,586 full-time students. Among these full-time first-year students, 30.0% graduated in the top 10% of their high school class. The average ACT composite score for full-time first-year students was 23.7, and their average SAT combined score was 1234. Additionally, ASU welcomed 16,070 new transfer students, with 21.5% transferring from community colleges in Arizona.

Undergraduate Enrollment
In Fall 2025, Arizona State University enrolled 124,753 undergraduate students. Seniors made up the largest portion of the undergraduate population, with 46,198 students, followed by juniors (32,891), sophomores (24,760), and freshmen (19,203), while 1,701 students were enrolled as non-degree seekers. Seniors accounted for more than a quarter of the total student body and over a third of the undergraduate enrollment. The undergraduate student profile reflects a diverse and dynamic community, with 46.6% identifying as ethnic minorities, 4.3% as U.S. nonresident students, and 67.1% enrolled full-time. The average undergraduate student age was 24.5 years.

Graduate Enrollment
In Fall 2025, Arizona State University enrolled 35,298 graduate students. This included 28,054 master's students, 4,655 doctoral students, 740 first professional students, and 1,849 non-degree graduate students. The graduate student body was diverse, with 35.0% identifying as ethnic minorities and 19.2% as U.S. nonresident students. Additionally, 49.4% of graduate students were enrolled full-time. The average age of graduate students was 31.0 years.

Degrees Awarded & Graduate Rates
In 2024-25, ASU awarded a total of 38,757 degrees, including 19 associate degrees, 25,268 bachelor's degrees, 12,401 master's degrees, 779 doctoral degrees, and 290 law degrees. The graduation rate for 2019 full-time first-year students

graduating in six years or less was 69.3% and the transfer out rate was 14.7%. The six-year graduation rate as reported to IPEDS for 2019 full-time first-year students receiving Pell grants, receiving subsidized Stafford Loans but no Pell grant, and receiving neither Pell grant nor Stafford loan was 58.3%, 60.5% and 74.0% respectively. The graduation rate for 2020 Campus Immersion full-time lower division transfer students graduating in 5 years or less was 64.6%. The graduation rate for 2021 Campus Immersion full-time upper division transfer students graduating in 4 years or less was 78.5%.

Student Athlete Profile
The Federal Graduation Rate for student-athletes who entered ASU in 2018-19 and received athletics aid was 66%. For comparison, the Federal Graduation Rate for NCAA Division I student-athletes was 68%. For more details on student-athlete graduation rates, visit: https://www.ncaa.org/what-we-do/research/graduation-academic-success-rates/.

Career Outcomes
ASU's Career Services posts career outcomes data at the following address: https://career.asu.edu/. Additional information on ASU student career outcomes can be found through the Arizona Board of Regents Alumni Wages report (https://www.azregents.edu/reports) or the Post-Secondary Employment Outcomes Explorer through the US Census Bureau.

Transcripts

Official and unofficial ASU academic transcripts are available through University Registrar Services.

Sending your transcripts to ASU? Contact Admissions for mailing address information. [1]

Official transcripts

An official transcript is a copy of the student's permanent academic record issued by the University Registrar. It displays all courses taken for credit at ASU and includes all grades received. Unlike unofficial copies, paper and electronic copies of the official transcript display the ASU seal and list a print date. The official paper copies are also signed by the registrar. Effective July 1, 2024, official transcripts are not held for past due financial obligations to the university.

For students that attended the Thunderbird School of Global Management prior to December 31, 2014, information on ordering official transcripts can be found here. [2]

ASU cannot send official transcripts by email or fax.

University Registrar Services has partnered with Parchment, a digital credentials service, to manage the ordering, processing, and secure electronic delivery of your official ASU transcripts.

All students are encouraged to go online to place their transcript order. This is the easiest and most efficient way to place an order for either a traditional paper transcript or electronic transcript delivery.

Electronic delivery of official transcripts

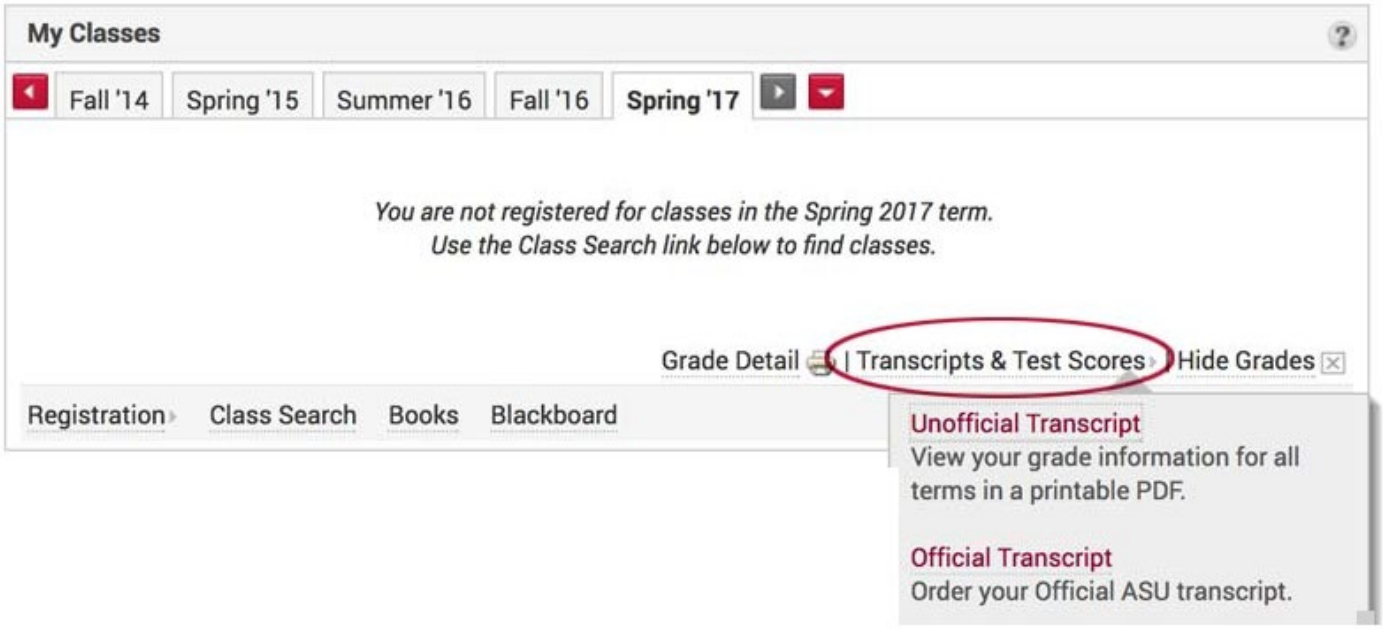
Official electronic transcripts may only be ordered using Parchment's online request system. Students choosing this option will identify their recipients by selecting them from a list within the ordering system or by providing the email address of their intended recipients.

To expedite and ensure accurate delivery, students should:

- Make sure the transcript recipient will accept the electronic transcripts, so they can avoid paying to send a replacement copy.
- Double check that the email address they provided for an institution or individual is correct, so they can avoid paying again to send a replacement electronic or paper copy.

- Provide their email addresses for notification purposes (the student's email address assists with tracking and confirming delivery by notifying the student when the transcript is sent and when it is received by the selected institution or individual).
- Instruct recipients to allow emails from Parchment (noreply@parchment.com) to avoid potential problems with spam filters.

Orders are generally processed immediately, unless you request a hold for degree or grades. (Degrees are posted approximately 6 weeks after the conferral date for the semester.)



The transcript is not delivered by email; the recipient's email address is used for notification and reminder messages regarding delivery of the student's transcript to a secure site where it can be accessed.

Ordering official transcripts

Official transcripts can be ordered online or by mail.

Online

- Students who have an ASURITE ID — Sign in to My ASU [3] and order official transcripts online. In the My Classes box, click Grades & Transcripts and then Transcripts & Test Scores (see sample My ASU navigation screenshot below).
- Students who attended ASU after 1980 and who do not yet have an ASURITE ID [4] or do not know their ASURITE ID and password — Please contact the ASU Help Desk at 855-278-5080 for assistance requesting your ASURITE ID.
- Students who attended ASU prior to 1980 and do not have an ASURITE ID — Request transcripts in person or by mail.

By mail

Students may order transcripts by submitting a Request for Official Transcript Form [5] or signed letter including the following information:

- Name
- Former names (if applicable)
- Arizona State University identification number (or SSN)
- Date of birth
- First and last dates of attendance

- Current return address
- Daytime phone number
- Specific mailing address for each transcript ordered

Pre-payment is required. See costs for official transcripts below. Make check or money order payable to Arizona State University.

Send requests for official transcripts to:

Outgoing Transcripts
University Registrar Services
Arizona State University
P.O. Box 870312
Tempe, AZ 85287-0312

For further assistance, please contact Outgoing Transcripts at 480-965-7276 or academicfiles@asu.edu

In person

Students presenting photo ID may order official transcripts in person at the Cashier's Office at the following locations:

- Downtown Phoenix campus — Mon. - Fri. 8:15 a.m. - 4:30 p.m., University Center Building, Suite 112
- Polytechnic campus — Mon. - Fri. 8:15 a.m. - 4:30 p.m., Administration Building, Room 160
- Tempe campus — Mon. - Fri. 8:15 a.m. - 4:30 p.m., Student Services Building, 244
- West campus — Mon. - Fri. 8:15 a.m. to 4:30 p.m., University Center Building, Room 101

Costs

All charges for official transcripts must be paid at time of request. Official transcripts cost $15.00 per official transcript copy requested.

Starting January 6th, 2025, sales tax will be collected in compliance with federal, state, and local tax laws. This change may affect the total cost of your request based on various factors such as document type, delivery method, and location. Before completing your order online, you will see a breakdown of all charges, including any applicable taxes, to ensure total transparency.

Rush transcripts (same day service): $10.00 in addition to the costs for the total number of transcripts ordered. Available for in-person requests only.

- Special delivery in the U.S. — Special delivery processing, instead of regular mail, is available via FedEx or U.S. Express Mail at $35.00 per recipient, in addition to the costs for the total number of transcripts ordered.
- Special delivery outside the U.S. — Express delivery to addresses outside the U.S. is available through International FedEx Express or International Express Mail at $65.00 per recipient, in addition to the costs for the total number of transcripts ordered.

FedEx requires a street address for delivery. FedEx charges an additional fee for all returned shipments, and the student will be responsible for paying the total amount before the transcript(s) will be mailed.

Transcripts will not be reissued after 90 days from the processed date.

Fees subject to change without notice.

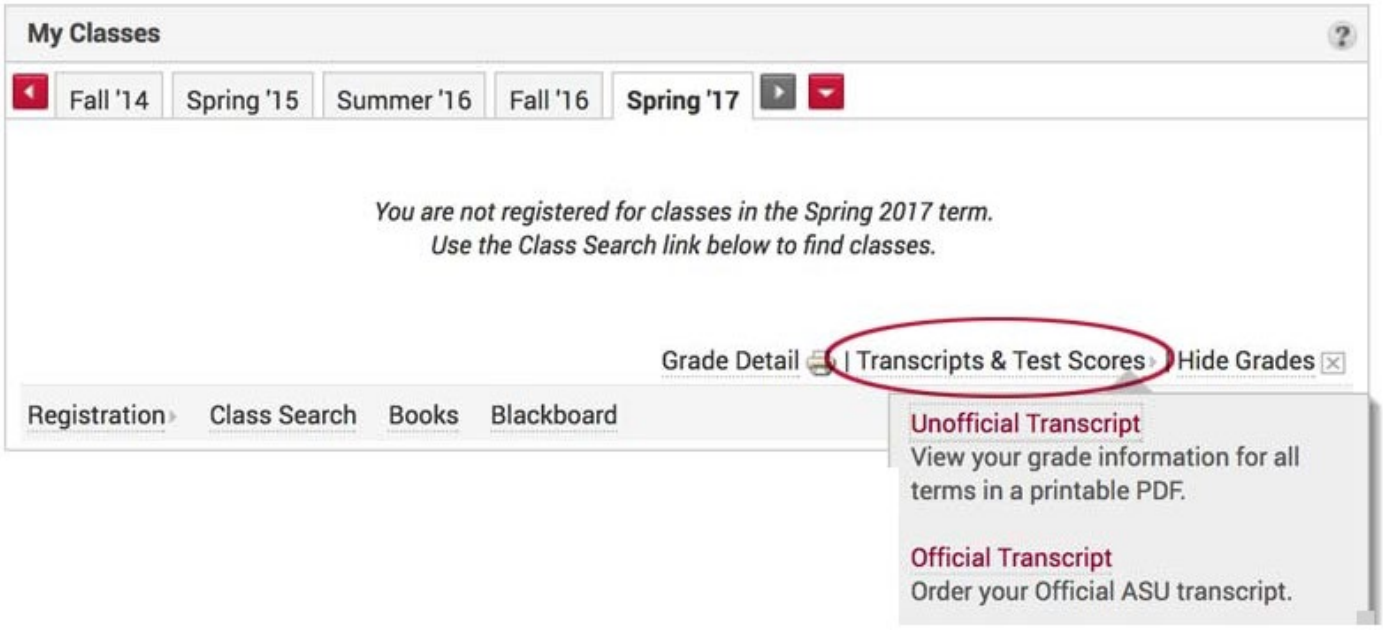
Apostille

For information on requesting an Apostille. [6]

Unofficial transcripts

An unofficial transcript is an uncertified copy of the student's academic record. In addition to courses taken for credit at ASU and grades received, unofficial transcripts also include information such as note records regarding Dean's List achievement, grade changes, semester GPAs and probation/disqualification status.

For students that attended the Thunderbird School of Global Management prior to December 31, 2014, information on ordering unofficial transcripts can be found here. [7]



Accessing and ordering unofficial transcripts

Here's how to view and request unofficial transcripts:

Online

- Students and former students who have an ASURITE ID — Sign in to view and print an unofficial transcript [8]. You may need to temporarily disable pop-up blocker for this site to retrieve your transcript.
- Students who attended after 1980 and who do not have an ASURITE ID or do not know their ASURITE ID and password — Request an ASURITE ID [4] to access unofficial transcripts online by contacting the ASU Help Desk at 855-278-5080.
- Students who attended prior to 1980 — ASU does not offer online transcript services for students who attended prior to 1980. Request the unofficial transcript in person, by mail or by fax.

You should be in your My ASU student view to access your transcripts. If you have both a student and staff view, this will be indicated in the top right of your screen.

By mail or fax

Students may order an unofficial transcript by mailing or faxing a **signed** letter including the following information about the student:

- Name and former names (if applicable)
- Arizona State University identification number (or SSN)
- Date of birth
- First and last dates of attendance
- Current return address
- Daytime phone number

- Return Fax number or specific mailing address

Requests for unofficial transcripts by mail or fax must be signed by the student. No computer generated signatures will be accepted. Please send requests for unofficial transcripts to:

Outgoing Transcripts
University Registrar Services
Arizona State University
P.O. Box 870312
Tempe, AZ 85287-0312

Fax: 602-543-8312

In person

Students presenting photo ID may order unofficial transcripts in person at any campus registration site. [9]

Costs

There is no fee for an unofficial transcript. For assistance, please contact University Registrar Services. [10]

Transcript FAQs

Have questions? Here are the most common FAQs. [10]

If you have an ASURITE ID, want to order online, and are familiar with the applicable transcript policies, you can access your transcripts through My ASU. [3]

Click Grades & Transcripts in the My Classes box, then Transcripts & Test Scores.

Apostille

Some international organizations may ask for the attachment of an apostille to certain documents. An apostille is an additional level of authentication given to a notarized document to certify that the document is a true, i.e., exact, copy of the original.

Arizona State University can provide notarization of official transcripts or your diploma to submit to the Arizona Secretary of State’s Office for apostille purposes. Before requesting notarization, please check with the agency requesting your documents to determine what level of document verification is required.

For more information on how to request notarized official transcripts, please contact Outgoing Transcripts at 480-965-7276 or academicfiles@asu.edu.

For more information on how to request a notarized diploma, please visit this page [1] or contact Graduation at 480-965-3256 or graduation@asu.edu.

You will be responsible for submitting the notarized document(s) to the Arizona Secretary of State's Office to request the apostille. Review the complete instructions for filing an apostille request. [2]

Transcript FAQs

Can a student enroll in school after the drop/add deadline?
Provided that the student has been admitted to the university, college approval is required to register for classes after the Drop/Add deadline. Contact the college offering the desired course and follow the instructions given. For initial registration, contact the college of your major. Consult the academic calendar [1] for important deadlines and view detailed instructions on dropping and adding classes. [2]

Can someone else order/pick up my official transcript for me?
Yes, someone else may order or pick up your official transcript as long as you give written and signed authorization to do so. The request must include all the information requested for ordering an official transcript.

Does my ASU transcript list courses I transferred from other institutions?
No. Credit is awarded for traditional course work successfully completed at institutions of higher learning as indicated by ASU and the Arizona Board of Regents. However, only the name of the institution(s) and degrees awarded are listed on the ASU transcript.

How can I give my parent/guardian or another individual access to my records?
The Consent for Access to Educational Records or Proxy form [3] is available online. Follow the instructions on the form and turn it in to any registration location [4]. Read more about the privacy of your educational records. [5]

How do I find my ID Number?
Your ASU ID or affiliate number can be found on your Sun Card [6] listed as a 10-digit number, or you can login to My ASU [7] and look under ID's on the My Profile tab.

How do I find out what Holds are on my record?
Holds are listed on your My ASU [7] page under the My Tasks section. There are two types of holds: financial aid disbursement holds and registration holds. Click on the title of Hold to find out how to have the hold removed.

How do I find the pre-requisites for a course?
Search for the course in the Schedule of Classes [8]. The pre-requisites are listed in the Enrollment Information section of the Class Detail.

How do I get a course description for courses listed on my ASU transcript?
Course descriptions for catalogs after 1996 can be printed from the web at the catalog web site [9]. For course descriptions prior to 1996, contact University Archives archives@asu.edu or 480-965-4932.

How do I get an override for a class?
Contact the department offering the desired course, and follow the instructions they provide. Overrides are given either online or on paper. Paper forms must be processed in person at any registration location. [4]

How do I order official transcripts?
Official transcripts can be ordered online via My ASU [7], in person or through the mail. Read more detailed information about ordering official transcripts. [10]

How do I register for classes? How do I drop/add/swap a class?
To register for the first time or make any changes to your existing registration you have the following options: Log into My ASU [7] and navigate to the My Classes box. Use the registration link and follow the three easy steps listed there. Registration is available 24 hours per day, excluding scheduled outages. You may also visit any registration location [4] to register in person. See detailed instructions [11] and check the academic calendar [12] for important drop/add/withdrawal deadlines.

How long does it take for my degree to post to my transcript?
The majority of degrees are posted within10-14 days of the degree conferral date. If you need to request an official transcript with your degree posted, you have the option to "hold for degree" which will ensure your official transcript will not be issued until your degree is posted.

How long does it take for my transfer work to appear on my record?
Once the transcript is received, normal processing time is four to six weeks.

I have an immunization hold. What do I need to do?
All students born after January 1, 1957 are required to meet the MMR (Measles, Mumps, Rubella) immunization requirement before class registration. Students have two options for completing this requirement and both are explained here [13]. The MMR vaccine is available for a fee at any of ASU's Health Services locations [14]. Read additional information [15] about ASU’s Immunization Policy FAQ’s [16].

What if I have a delinquent account? Can I still obtain a transcript?
You may obtain an unofficial and official transcripts if you have past due financial obligations to the university. Graduates with a delinquent financial obligation of $25 or more will not receive a diploma until their account is paid. Questions about delinquent accounts can be directed to Collections at 480-965-5220.

What is the procedure to change my name on my ASU transcript?
Currently enrolled, newly admitted/readmitted or former ASU students may submit a Student Change of Legal Name Form electronically through DocuSign, by mail, in person or by scanning and e-mailing. All requests require two different forms of documentation, one of which must be picture identification (state/government issued photo ID or ASU Sun Card) and one of the following: marriage license/certificate, adoption papers, court order, divorce decree, social security card or passport/permanent visa. The link to the DocuSign form and paper form can be found at /forms/name-change [17]. For further assistance email registrar@asu.edu or call 480-965-7276.

Where is the schedule of classes available?
The schedule of classes [18] can be found online. A link is also available in the My Classes box in My ASU [7].

Who can I contact if I’m having problems registering for a class?
Contact any registration site on any campus. View locations and hours. [19]

Why isn’t my class showing up in Canvas?
Once registered for a course, it can take 24 hours for the course to appear. If the course still does not appear, contact the Help Desk at 480-965-6500. Be sure to verify you are registered for the course by checking your class schedule on My ASU. [7]

Will ASU hold my transcript and not send it out until my degree or a specific grade is posted?
On the Request for Official Transcript form or the online ordering system, you may request one of the following holds:

- Hold until degree is posted - Your transcript will not be sent until your degree is posted to your ASU transcript.
- Hold until grades are posted - Your transcript will not be sent until all grades for the term you specified on your order are posted to your ASU transcript.

Undergraduate policies and procedures

Admission

First-year student college admission requirements

What is a first-year college student?

You are a first-year applicant if you are applying to ASU after high school and have not completed college coursework after high school graduation. Students who earned college credit while in high school, including dual enrollment or AP/IB credit, can still apply as first-year students.

Choose the right application path

Use this first-year admission page if you are applying directly from high school or recently completed high school. If you have completed college coursework after high school graduation, review ASU transfer admission requirements. International, online, nondegree and readmission applicants should follow the admission path that matches their student type.

Transfer admission | International first-year admission | ASU Online admission | Readmission

We're here to help make each step toward becoming a Sun Devil a smooth experience. Follow the steps below to apply to become a first-year student at ASU.

Admission requirements

Course competency requirements

To be admitted to ASU, you need the following coursework:

- 4 years math
- 4 years English (non-ESL/ELL courses)
- 3 years lab sciences (1 year each from biology, chemistry, earth science, integrated sciences or physics)
- 2 years social sciences (including 1 year American history)
- 2 years same second language
- 1 year fine arts or 1 year career and technical education

Detailed course requirements [1]

Aptitude requirements

To be admitted to ASU, you will need one of the following:

- top 25% in high school graduating class
- 3.00 unweighted GPA in competency courses (4.00 = "A")
- ACT: 22 (24 nonresidents)
- SAT: 1120 (1180 nonresidents)

These are the general university admission requirements. Students who do not meet these aptitude requirements may be reviewed individually before a final admission decision is made. Some degree programs have higher aptitude requirements. To find the requirements for your specific program, please visit ASU's Degree Search. [2]

Applicants must successfully complete the ASU competency requirements. Admission may be granted with one deficiency in no more than two competency areas. Deficiencies cannot be in both math and laboratory science. Students must earn

a minimum 2.00 in each subject area. Most competencies may also be met by test scores or college courses. See detailed competency requirements for more information. [2]

How to apply to ASU

Step 01: Complete an undergraduate admission application
Apply online with ASU's Application for Admission [4] or Common Application [5]. You need to submit only one application to be considered for admission to ASU.

To expedite the admission decision, self-report your high school grades in the application.

Choose to not self-report → quicker application process, but takes a little longer for an admission decision.

Choose to self-report → application takes longer to complete, but the admission decision comes much faster.

ASU does not have a preference for which application you use to apply, and we do not require an essay or personal statement for either of these options.

Step 02: Submit the nonrefundable application fee
Arizona residents: $55
Domestic nonresidents: $85
ASU Online: $75
International nonresidents: $90

You can pay using a credit card (Visa or Mastercard) or eCheck at the time you submit your application or when you log in to My ASU [6]. Or you can mail a check or money order to Admission Services (payable to Arizona State University) at the address below.

Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe, AZ 85287-1004

If you applied for admission through the Common Application, pay the application fee through that application. [5]

Fee waivers for Arizona residents
There is no form, paper or code to submit for an application fee waiver. If you are an Arizona resident and your financial circumstances qualify you for an application fee waiver, you will answer a series of questions in the application that will automatically qualify you and post to your account.

Step 03: Transcripts
If you do not self-report your high school grades in the application, you must have your high school send an official copy of your transcripts to ASU. [7]

If you have earned college or university credit, request to have your official transcripts sent to ASU from the issuing institution. [7]

Step 04: ACT or SAT scores (optional)
ACT or SAT scores are not required for admission, but may be submitted for ASU course placement or as supplemental information. Have your scores sent to ASU from ACT [8] or College Board [9] when you register for the test. Learn more about sending your test scores to ASU in our FAQ section. [10]

Step 05: Check application status
Once you've completed all these steps, ASU will review your application. To see if you have any missing items and to review your admission status, sign in to My ASU using your ASURITE UserID, which is sent to you after you apply for admission.

Check application status [6]

Step 06: Fill out the FAFSA
The Free Application for Federal Student Aid [11] is used to award grants, loans, Federal Work-Study and certain scholarships. We encourage you to compare financial aid and college costs. ASU's Federal School Code is 001081. Submit your completed FAFSA by ASU's Jan. 15 priority filing date to be considered for the most need-based aid.

Here are important deadlines you need to know for fall 2027

To help you stay on track with the admission and financial aid processes, here are the important deadlines you need to know.

Priority admission date

ASU's fall 2027 application for admission opens in early July.

Complete your application for fall 2027 admission [4] by the Nov. 1 priority admission date to ensure you're considered for the maximum amount of scholarship opportunities.

Regular admission date

ASU's regular admission date is Jan. 15, 2027. Make sure to complete your fall 2027 admission application by this date.

ASU's Scholarship Universe

ASU's Scholarship Universe opens for admitted students Oct. 1, 2026. Students can build their profile, match with and apply for scholarships.

FAFSA priority date

The 2027–2028 Free Application for Federal Student Aid [11] is available beginning Oct. 1, 2026. Submit your completed FAFSA by ASU's Jan. 15 priority filing date to be considered for the most need-based aid.

ASU's Federal School Code is 001081.

Obama Scholars Program priority date

To be considered for the Obama Scholars Program [12], you must submit a completed application for admission, including application fee or waiver, official transcripts, and the FAFSA, by Jan. 15.

Arizona Promise Program priority date

To be considered for the Arizona Promise Program [13], you must submit a completed application for admission, including application fee or waiver, official transcripts, and the FAFSA, by April 1, 2027. The sooner you complete all these items, the sooner you receive your notification.

Barrett, The Honors College

Barrett, The Honors College [14] is a selective honors experience for outstanding students that offers exclusive research, internship and study abroad opportunities. You must apply to Barrett through a separate application to be admitted.

The Barrett application opens early September and the early action deadline is Nov. 1. It is highly recommended that students apply for university admission in advance of the Barrett deadline to ensure they will have ASU credentials that are needed for the honors college application.

Students who apply early will be notified of the Barrett decision prior to the housing portal opening in mid-January. This information will help you to know which residential college or Barrett living

National Scholars and College Board National Recognition Program Awardee

Arizona residents who've been designated as National Scholar or College Board National Recognition Program Awardees [15] must apply to ASU in order to be eligible for their scholarship.

Nation Merit Finalists must select ASU by May 1 to be awarded their scholarship.

Next Generation Service Corps

Students who join the Next Generation Service Corps [16] at ASU are committed to more than academic achievement and career preparation. This program builds a culture of service in future leaders who will go on to tackle some of the world's toughest challenges.

The application opens Oct. 15.

Housing portal opens

ASU's housing portal will open in early January 2027.

New American University Scholarships

New American University Scholarships are awarded in late fall. Students are automatically considered for NAMU awards (there is no additional application). Submitting your test scores is encouraged.

Students will be notified by letter and email if NAMU is awarded.

Enrollment deposit

ASU's enrollment deposit opens in early October.

New Student Orientation Experience

Through ASU's New Student Orientation Experience, accessed online at links.asu.edu/nsoe or in My ASU [6], you will prepare to take classes by completing essential next steps for enrollment.

There are three steps as part of the New Student Orientation Experience:

1. ASU Essentials (opens in October).
2. Academic Orientation Session (select your date now for a session in spring or summer).
3. ASU Ready (opens mid-summer).

Tips for applying to college

Higher admission requirements

If your first-choice major has higher requirements, you will be instructed to select a second major without higher requirements.

Explore degrees [2]

Common Application

ASU accepts the Common Application [5] and our own online application [4] for incoming first-year students. Only one application will be accepted, with no preference between the ASU application and the Common Application. If two applications are submitted, one will be canceled in our system. Application fees are nonrefundable.

Self-report your grades

ASU accepts self-reported high school grades on the undergraduate admission application. Submission of an ACT or SAT score is highly recommended for merit-based scholarship consideration.

Individual review

ASU admission decisions begin the first week of September. Students who do not meet the admission standards will be evaluated through individual review and may experience a longer wait time for an admission decision.

Homeschool or online/virtual high school students

ASU welcomes applications from homeschool students and students who have attended an accredited online/virtual high school. In your admission application, include any information to accurately demonstrate your accomplishments

ASU welcomes applications from homeschool students and students who have attended an accredited online/virtual high school. In your admission application, include any...

GED*

Battery average score:
50 or above for tests taken between 1998 and 2001.
500 or above for tests taken between 2002 and 2013.
170 or above for tests taken after 2013.

HiSet*

Total score of 75.

TASC (Test Assessing Secondary Completion)*

Minimum total score of 2700.

Minimum score of 500 on each of the five content areas.

Score of 2 or above on essay.

California High School Proficiency Examination

The California High School Proficiency Examination and other high school equivalency diplomas are recognized as high school diplomas, but do not satisfy course competency and aptitude requirements needed for admission. Students should submit their diploma to show completion of high school, but will also need to submit additional high school transcripts or SAT or ACT scores to satisfy course competency and aptitude requirements for admission. Alternatively, enrollment and successful completion of 24 semester credits with a 2.75 minimum GPA through Earned Admission [17], or completion of 24 or more college credits from a regionally accredited college or university with a minimum of 2.50 cumulative GPA on a 4.00 scale may be used to satisfy requirements for admission.

College Credit Pathway

Some states, including Arizona, offer a College Credit Pathway as an option for students to obtain a high school equivalency (HSE). If the HSE is obtained, ASU will accept that credential as completion of the high school graduation requirement but the student may still need additional high school coursework and/or SAT/ACT scores to meet course competency requirements and high school aptitude if the student does not have 24 transferable credits taken post high school. *Some higher requirement programs may require ACT/SAT scores or additional coursework in order to satisfy aptitude and/or course competency requirements.

Get a jump-start on your college experience

Now is the perfect time to imagine what your future will look like, and ASU is here to help you get there. See how you can start earning scholarship money, find the perfect degree program and campus, and more — all while you're in high school.

Start now [19]

Frequently asked questions about applying to college

When should I apply to college as a first-year student?
The ASU application opens on or around July 1 each year. You are encouraged to apply to ASU as early as possible. Nov. 1 is ASU's priority admission date, and Jan. 15 is ASU's regular admission date. The earlier you apply, the earlier you'll receive an admission decision and the more likely you'll be to secure the most financial aid possible.

Is it OK to submit applications to several different universities?
Yes, you should apply to all the universities you are interested in possibly attending. Just be aware that universities charge application fees, which can add up. Many universities are part of the Common Application [20], including ASU, which can save you time by using the information you enter once for several applications.

Other than the admission application, what information will I need to provide to complete the application process?
In addition to the application, you will need to submit the nonrefundable application fee, as well as self-report your high school grades or have your high school transcripts sent to ASU. ACT or SAT scores are not required for admission, but may be submitted for ASU course placement or as supplemental information.

What if I have a course deficiency?
ASU may grant admission with one deficiency in no more than two competency areas. Deficiencies cannot be in both math and laboratory science, and students must earn at least a 2.00 in each subject area.

What if I completed a GED or high school equivalency?
ASU recognizes approved high school equivalency credentials, but applicants may still need to meet course competency and aptitude requirements.

How to meet ASU course competency requirements

Competency requirements may be met with high school work, college work or test scores. These requirements must be met regardless of your major or the number of transferable hours you have earned. Students must earn a minimum 2.00 GPA in each competency area.

Admission may be granted with one deficiency in no more than two competency areas. Deficiencies in both math and laboratory science are not acceptable.

For exceptions to the competency requirements, see below. [1]

English competency requirement

Meet one of the following:

- Four years of high school English (composition- or literature-based).
- Minimum test score of 21 on ACT English, or 580 on SAT evidence-based reading and writing.
- One transferable 3-credit college English composition course.

English composition placement

All new students will be placed in First-Year Composition ENG 101. Students whose native language is not English will be enrolled in ENG 107. Enrollment in ENG 105, Advanced First Year composition, is based on placement test scores. [2]

If you have college-level transfer credit or test credit equivalent to ASU's first year composition course(s), that credit will be considered in placement. You can search ASU's equivalency database for transfer credit at tcg.asu.edu. If applicable, be sure to include any of the above when you register for the Academic Orientation Session.

Mathematics competency requirement

Meet one of the following:

- Four years of high school courses: one year each of algebra I, geometry, algebra II and an advanced math class for which algebra II is a prerequisite.
- Minimum test score of 24 on ACT math, or 580 on SAT math.
- One transferable 3-credit college math course for which at least intermediate algebra is a prerequisite.

Laboratory science competency requirement

Students may meet any one or a combination of the following options, provided that three distinct laboratory-based science courses are completed with a 2.00 unweighted GPA or higher.

- Three years of high school laboratory sciences in three different subject areas, preferably biology, chemistry, earth science or physics.
    - A laboratory-based integrated science course may be allowed to substitute for one of the three lab sciences. Each course should be one year in length.
    - Additionally, a laboratory-based advanced science course may be allowed to substitute for one of the three lab sciences. An advanced science class is a lab science that is generally taken in the last two years of high school and is at least one of the following:
        - an advanced placement course
        - a higher-level international baccalaureate course
        - a dual enrollment course
        - other honors course for which the previous lab science course is a prerequisite

- Minimum test scores in three standardized tests from three different subject matters. The following tests may be taken: SAT II subject test score in chemistry-600, biology-590, physics-620 or ACT test score in science-20.
- Three transferable 4-credit college laboratory science courses from the following: biology, chemistry, earth science or physics. An integrated laboratory science or advanced-level laboratory-based science may be substituted for one of these laboratory subjects.

Laboratory science courses (for online high schools only)

ASU requires students to complete three different lab sciences. In order to determine if your lab sciences meet our lab science requirement, we may need additional information from you. If we require additional information once your admission application reaches our evaluation team, you will see a Priority Task displayed on My ASU called Course Description.

You can provide the additional information required through one of the following:

- Have your high school submit your lab sciences to the courseapproval.asu.edu website for ASU to review if it is not already listed on the website.
- Submit a course description form for each lab science taken in an accredited online high school environment if not already approved for your entire high school to ASU's homeschool representative.

Second language competency requirement

Meet one of the following:

- Two years of the same high school second language.
- Attainment of minimum score on a national standardized second language test or placement into a third semester college second language class based on university placement exam results.
- Two transferable 3- or 4-credit, college-level courses in the same second language.

Social science competency requirement

Meet one of the following options from Section A and one from Section B:

Section A

- One year of high school American history.
- Minimum SAT II subject test score of 560 on American history/social studies.
- One transferable 3-credit college American history course.

Section B

- One year of high school social science (e.g., European history, world history, economics, sociology, geography, government, psychology or anthropology).
- Minimum SAT II subject test score of 580 on world history.
- One transferable 3-credit college social science course.

Fine arts or career and technical education competency requirement

Meet one of the following:

- One year (or a combination of two semesters) of high school fine arts or career and technical education.
- One transferable 3-credit college fine arts course.

Exceptions

You do not need to meet competency requirements if one of the following statements is true:

- You have completed an associate or higher-level degree from a regionally accredited postsecondary institution with a minimum 2.00 GPA ("A"=4.00) if you are an Arizona resident, or you have a minimum 2.50 GPA ("A"=4.00) if you are a nonresident.
- You have completed the Arizona General Education Curriculum (AGEC) with a minimum 2.00 GPA ("A"=4.00) if you are an Arizona resident or a 2.50 GPA ("A"=4.00) if you are a nonresident.

Admitted student next steps

Welcome, first-year Sun Devil!

You're now on your way to becoming part of the most innovative and forward-thinking university in the nation.

They say the longest journey begins with a single step. Well, enrolling at ASU isn't really a "long journey," but it does begin with one step, followed by a few more. Start taking your steps and check them off as you complete them so you can get closer to becoming a Sun Devil.

Important deadlines

To help you stay on track with the fall 2027 admission and financial aid processes, check out our important deadlines page.

View deadlines [1]

Need help?

We're here for you.

ASU admission team members can answer your questions and guide you through each step of your enrollment process between now and the time you get started. Connect and get to know your admission team member.

Schedule an appointment [2]

First-year student next steps

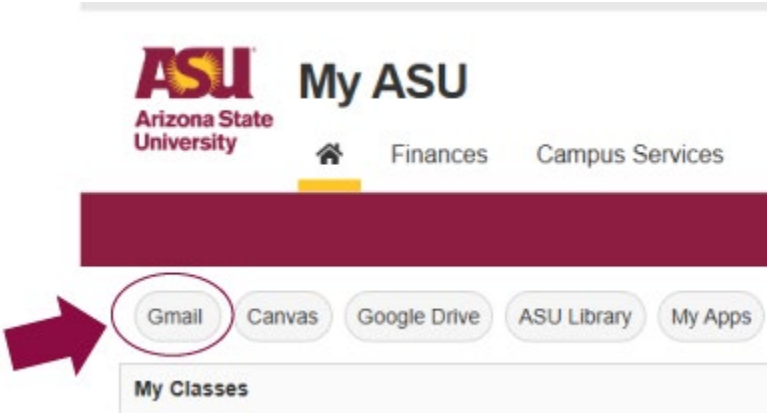
Activate your ASURITE User ID

Your ASURITE User ID is the official login name you'll use to access most ASU systems and services. You'll get your ASURITE User ID and activation instructions shortly after you submit your application. A message from computer.accounts@asu.edu with the subject line "ASU Account Activation" will be sent to the email address you provided in your application.

If you can't remember you ASURITE User ID you can look it up at: asu.edu/lostpassword

Activate ASURITE [3]

You'll log in to My ASU [4] with your ASURITE User ID and password to:



- View your priority tasks and next steps for enrollment
- View your advisor contact information
- View financial aid and billing information
- Connect to campus technology and services

How to log in to My ASU:

1. Navigate to my.asu.edu. [4]
2. Enter your ASURITE User ID.
3. Enter your password. (Forgot your password? Visit asu.edu/lostpassword.)
4. Click the “Sign In” button to access your account.

After you enroll in classes, visit asu.edu/emailsignup to activate your official @asu.edu email address. Once activated, you will access and check your official ASU email through your ASU Gmail account.

Be sure to check both your non-ASU personal email address and your ASU Gmail inbox regularly.

Give your parents access to your records and account

Through My ASU Parent Guest Access, you can share your academic records with your parent or guardian, and even better, give them access to pay your tuition and bills. Go to My ASU [4], select the Profile tab at the top and find “Add a Guest” under My ASU Guest Access Permissions.

Pay your enrollment deposit (on-campus students only)

Beginning Oct. 1, you can confirm your place in the incoming fall 2027 class by submitting your deposit. Then make sure to check My ASU [4] often for any Priority Tasks you need to complete to enroll for fall 2027.

Confirm your spot

Submit your FAFSA and apply for scholarships

The Free Application for Federal Student Aid for the 2027–2028 academic year opens Oct 1, 2026, but you can set up your Studentaid.gov account now to get ready to file the FAFSA. You’ll need to create an Studentaid.gov account to electronically sign and submit your FAFSA. If you are a dependent, your parent (contributor on the FAFSA) will also need to create an Studentaid.gov account.

ASU’s 2027-2028 Scholarship Universe [5] will open for admitted students in October 2026. Students can build their profile, search and apply for scholarships.

Submit your measles, mumps and rubella immunization record (on-campus students only)

All students born after Jan. 1, 1957, are required to meet the following MMR immunization requirement [6] before classes begin:

Option 1: Provide proof of two MMR (Measles, Mumps and Rubella) vaccinations. The first MMR must be given on or after your first birthday; The second MMR must be four weeks from the first, or later.

Option 2: Provide a copy of a Measles IgG or MMR IgG lab test showing positive immunity.

Upload required documentation in My Health Portal. [7]

Questions?

- Read additional information about MMR. [8]
- Read additional information about ASU's immunization policy. [9]

Submit MMR [10]

Confirm your housing and dining

ASU first-year students live in the residential college of their academic major. Barrett, The Honors College students live in the Barrett residential community for their first two years. The housing portal will open in early January 2027 and the priority deadline to apply for housing is May 15. Students who do not meet the deadline will need to seek alternative housing arrangements for the 2027-2028 academic year. Once you've paid your enrollment deposit, you can select your housing and dining preferences.

Please note that it may take one to two business days for your enrollment deposit status to be reflected in the housing portal.

Learn more [11]

ASU's new student orientation

If you are a nonresident or international student, you must confirm your housing plans before registering for an Academic Orientation Session.

Through ASU's New Student Orientation, accessed online in My ASU, you will prepare to take classes in the fall by completing essential next steps for enrollment. There are three steps — view details here [12] and check My ASU for updates. As part of the New Student Orientation Experience, you'll meet with your academic college and finalize your class schedule. All students must complete the New Student Orientation Experience in order to enroll in classes.

Prepare to take your next steps to become a Sun Devil

Check My ASU to stay on top of things like the New Student Orientation Experience module, where you will become prepared to attend classes in the fall by completing essential next steps for enrollment — including academic advising and finalizing your class schedule.

Admission for homeschool students

Homeschool students at ASU

Arizona State University welcomes homeschool students and recognizes the unique academic experiences these students contribute to our rich, scholarly environment. We have a growing community of home-educated students who thrive at ASU.

We understand that your academic background differs from students who attended traditional public, private or charter schools. As a homeschool student, you can fill out the ASU application for admission and then include additional information to accurately demonstrate your accomplishments.

Admission requirements

As a homeschool student, you must meet the general requirements for ASU admission, and include specific documentation [1] with your application to confirm your completion of the requirements.

First-year student requirements [2]
Transfer student requirements [3]

Steps to apply to ASU as a homeschool student

Step 01: Complete an undergraduate admission application
Apply online with ASU's Application for Admission [4] or the Common Application [5]. You need to submit only one application to be considered for admission to ASU.

To expedite the admission decision, self-report your high school grades in the application.

ASU does not have a preference for which application you use to apply, but submit only one. Additionally, ASU does not require an essay or personal statement to accompany either application.

Step 02: Submit the nonrefundable application fee
Arizona residents: $50
Domestic nonresidents: $70
International nonresidents: $85

You can pay the application fee using a credit card (Visa or Mastercard) or eCheck at the time you submit your application or when you log in to My ASU [6]. Or you can mail a check or money order to Admission Services (payable to Arizona State University) at the address below.

Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe AZ 85287-1004

If you applied for admission through the Common Application [5], pay the application fee through that application.

There is no form, paper or code to submit for an application fee waiver. If your financial circumstances qualify you for an application fee waiver, you will be asked to answer a series of questions in the application that will automatically determine if you qualify and post to your account if you do.

Step 03: Transcripts
If you do not self-report your high school grades in the application, you must have your high school send an official copy of your transcripts to ASU. [7]

If you have earned college or university credit, request to have your official transcripts sent to ASU from the issuing institution. [7]

Step 04: laboratory science courses: (For online high schools ONLY)
ASU requires students to complete 3 different lab sciences. In order to determine if your lab sciences meet our lab science requirement, we may need additional information from you. If we require additional information once your admission application reaches our evaluation team, you will see a Priority Task displayed on My ASU titled "Course Description." You can provide the additional information required through one of the following:

1. You can have your high school submit your lab sciences to the courseapproval.asu.edu website for ASU to review if it is not already listed on the website.
2. You can submit a course description form [8] for each lab science taken in an accredited online high school environment if not already approved for your entire high school to ASU's homeschool representative. [9]
3. You can choose to be evaluated without some or all of your lab science requirements met. Note, if you choose this option, you may not be admissible to the university.

Step 05: Send ACT or SAT scores (not required)
ACT or SAT scores are not required for admission, but may be submitted for ASU course placement and to meet aptitude requirements if you have less than a 3.00 GPA in your competency courses. To find the requirements for your specific program, please visit ASU's Degree Search [10]. Have your scores sent to ASU from ACT [11] or College Board [12] when you register for the test. Learn more about sending your test scores to ASU in our FAQ section. [13]

Step 06: Check application status
Once you've completed all these steps, ASU will review your application. To see if you have any missing items and to review your admission status, log in to My ASU [6] using your ASURITE User ID, which is sent to you after you apply for admission.

Step 07: Fill out the FAFSA
The Free Application for Federal Student Aid is used to award grants, loans, Federal Work-Study and certain scholarships. We encourage you to compare financial aid and college costs [14]. You can file the FAFSA now [15]. ASU's Federal School Code is 001081.

Step 08: Submit a secondary school education affidavit or high school transcript (if applicable)
Homeschool applicants may self-report their grades or send a homeschool transcript. A homeschool transcript is a list of courses you have taken and the credit and grade associated with each course. The transcript must include a signature from a parent or guardian who oversaw the education.

If you have completed courses through a traditional high school, you may self-report your grades or have your high school send an official copy of your transcripts to ASU. [7]

If you have coursework from both a traditional high school and from homeschool transcript (see above for requirements), please self-report grades for both or have a transcript sent to ASU.

If you have earned college or university credit, request to have your official transcripts sent directly to ASU from the issuing institution. [7]

Should a home school transcript not be available to submit and you only need proof of your high school graduation, you may complete the Affidavit of Completion of Secondary School Education [16] form in substitution of a home school transcript. The affidavit must be completed by a parent or guardian who oversaw the education.

Admission to Barrett, The Honors College

Homeschool students who want to be considered for admission to Barrett, The Honors College [17] are encouraged to submit a separate application — an early application is strongly suggested. Please contact the Barrett admission staff [18] for help with any questions about the college and application process.

Scholarship opportunities

Homeschool students will be considered for ASU scholarships upon admission. Explore scholarships and additional types of financial aid. [19]

Frequently asked questions about homeschool student admission at ASU

Can I be admitted to ASU as a homeschool student?
Yes, ASU welcomes and values all our homeschool students and the special academic experiences they bring to the university. Homeschool students submit the same ASU admission application as students who went to public or private school.

Are homeschool student admission requirements the same as high school student admission requirements?
Yes, like public and private high school students, homeschool students must meet and demonstrate completion of ASU's general requirements for university admission. [20]

Can homeschool students apply for financial aid?
Yes, homeschool students are eligible to apply for and receive financial aid. You should submit the Free Application for Federal Student Aid [21] to see how much federal aid you may be eligible to receive. By submitting ACT or SAT scores, ASU will automatically consider you upon admission for a merit scholarship.

Homeschool affidavit and lab sciences evaluation

Homeschool applicants can submit their homeschool transcript with a signature from a parent/guardian to meet their proof of high school graduation. Should a homeschool transcript not be available, an Affidavit of Completion of Secondary School Education [1] can be completed in lieu of the homeschool transcript but **note** this affidavit will only meet the proof of high school graduation requirement. The affidavit must be completed/signed by the parent or guardian who oversaw the education.

Homeschool students without a high school transcript who need the high school transcript to meet the first year student requirement [2] may complete one of the following high school equivalency exams with scores mentioned below to fulfill their first year student requirement.

***GED** battery average score of

- 50 or above for tests taken between 1998-2001
- 500 or above for tests taken between 2002-2013
- 170 or above for tests taken after 2013

***HiSet** total score of 75

***TASC** (Test Assessing Secondary Completion):

- Minimum total score of 2700
- Minimum score of 500 on each of the five content areas
- Score 2 or above on essay

Laboratory science for online high schools or non-standard homeschool laboratory science courses

For homeschool and online students only.

ASU requires students to complete three different lab sciences. In order to determine if your lab sciences meet our lab science requirement, we may need additional information from you. If we require additional information once your admission application reaches our evaluation team, you will see a Priority Task displayed on your MyASU page titled "Course Description." You can provide the additional information required through one of the following:

1. You can have your high school submit your lab sciences to the courseapproval.asu.edu website for ASU to review if it is not already listed on the website.
2. You can submit a course description form [3] for each lab science taken in an accredited online high school environment if not already approved for your entire high school to ASU's homeschool representative. [4]
3. You can choose to be evaluated without some or all of your lab science requirements met. Note, if you choose this option, you may not be admissible to the university.

Affidavit of Completion of Secondary School Education [1]
Evaluation of Laboratory Science Courses [3]

Transfer student admission

What is a transfer student?

At Arizona State University, a transfer applicant is a student who has attended one or more colleges or universities and has completed 12 or more transferable semester credits post-high school. Students with fewer than 12 transferable credits are considered incoming first-year students.

What are the transfer competency requirements?

You must have completed one of the following:

- Graduated from high school.
- Earned a GED.

What are the transfer aptitude requirements?

You must meet one of the following:

- Transfer students with 12–23 transferable credits must have a minimum 2.50 cumulative transfer GPA **and** meet first-year student admission requirements. [1]
- Transfer students with 24 or more transferable credits must have a minimum 2.50 cumulative transfer GPA.
- Transfer students who have earned an associate degree or higher from a regionally accredited higher education institution must have a minimum 2.00 cumulative GPA (for Arizona residents) or 2.50 cumulative GPA (for nonresidents).

Download this infographic to help guide you through the transfer requirements. [2]

Some degree programs have higher admission requirements, including programs in business [3], engineering [4], journalism [5], and nursing [6]. To find the requirements for your specific program, please visit ASU's Degree Search [7].

"A" = 4.00; ASU accepts college-level courses in which you have earned a "C-" or better.

What is the ASU transfer student admission process?

Follow these steps to apply to Arizona State University as a transfer student.

Step 01: Complete the undergraduate application for admission
Apply online with ASU's Application for Admission [8]. The application takes about 20 minutes to complete. Application fees are nonrefundable.

Applying to multiple schools? ASU also accepts the Transfer Common Application [9]. ASU does not have a preference for which application you use to apply, and we do not require an essay, self-reported grades or personal statement for either of these options. You need to submit only one application and fee to be considered for admission to ASU. Application fees are nonrefundable, and any duplicate applications for the same term will be cancelled. If you've previously applied to ASU via the Common Application, you must reapply using the ASU application.

Step 02: Activate My ASU and your ASURITE UserID
You will receive your ASURITE UserID and activation code via email within one to three business days of submitting your application. If you have previously applied to ASU, your ASURITE User ID will remain the same. You'll use your ASURITE User ID to log in to My ASU.

Step 03: Submit the nonrefundable transfer application fee
Arizona residents: $50
Domestic nonresidents: $80
ASU Online: $70
International nonresidents: $85

You can pay for the ASU application fee using a credit card (Visa or MasterCard) or eCheck at the time you submit your transfer application or when you log in to My ASU. Or you can mail a check or money order to Admission Services (payable to Arizona State University) at the address below.

Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe, AZ 85287-1004

The application fee is required in order to process your application. If you applied for admission through the Common Application [9], pay the application fee through that application.

Step 04: Request to have your official transcripts sent to ASU

College or university transcripts

ASU requires official transcripts from all previous institutions you've attended in order to process your application. Visit the registrar's website for your college or university and request your official transcripts be sent directly to Admission Services.

- Many colleges and universities use a secure electronic service (such as Parchment or National Student Clearinghouse) to send official transcripts. Select Arizona State University from the vendor's dropdown list to ensure the transcript is routed to the correct place. If an email address is requested, you can route to transcripts@asu.edu.
- Please note that transcripts sent by students to transcripts@asu.edu will not be accepted as official. This address is only for transcripts received from secured and approved transcript services, or directly from an authorized school official at the issuing institution.
- Official transcripts delivered by hand will be accepted only if they are sealed in the original envelope provided by the institution and bear the institutional seal and registrar's signature.
- Upon graduation or completion of your final term at your current school, request a final transcript be sent directly to ASU Admission Services with all grades and/or degrees posted.
- ASU does not accept faxed college transcripts.

How to send transcripts to ASU [10]

Find out more about transferring credits to ASU. [11]

High school transcripts

In addition to college and university transcripts, official high school transcripts are also required if:

- You have fewer than 24 transferable semester hours of college credit after high school.
- You're applying to a program that specifically requires a high school transcript, regardless of your credit hours. This includes programs such as business [3] and engineering [4].
- You've earned an associate degree (or higher) but with fewer than 24 transferable semester credits post-high school.

Make sure that your high school transcripts reflect all four years of coursework and include your graduation date. Transcripts must be sent directly from the high school through a secure electronic service approved by ASU, by mail, or via email directly from a school official. ASU only accepts hand-delivered official high school transcripts if they are in a sealed envelope provided by the school. ASU does not accept faxed high school transcripts.

Completed a GED? Order your official GED transcript [12] online to be sent directly to ASU. ASU requires a battery average score of 170 or higher for tests taken after 2013. ASU also accepts the HiSet, TASC (Test Assessing Secondary Completion), California High School Proficiency Examination, and College Credit Pathway, with some limitations. Learn more here.

Test scores
ACT or SAT scores are not required for admission, but in some cases may be used in place of a high school GPA if necessary. Have your scores sent to ASU directly from ACT [13] or College Board [14]. If you have taken AP, IB or CLEP exams, request your scores be sent directly to ASU.

Second bachelor's degree students
Students seeking a second baccalaureate degree [15] must meet admission criteria for that degree. Official transcripts are required from all previous colleges and universities you've attended. High school transcripts are not required unless you have selected a higher requirement degree program that requires it. If admitted, a minimum of 30 credit hours in resident credit courses at ASU must be successfully completed to earn the second baccalaureate degree and all degree and university requirements of the second degree must be met. After admission, your academic advisor in your college will help you determine if there are enough courses to meet this criteria for your chosen program. For more information on additional degrees, visit the university undergraduate graduation requirements page. [16]

Are you an international transfer student? See international transfer student information. [17]

Step 05: Monitor application status on My ASU
Once all application items, including the application fee and official transcripts, are received and processed, your application will move into review for admission. Please allow at least two to four weeks to receive an admission decision. Be sure to monitor My ASU [18] regularly for updates to your application status, including any additional items that may be requested during your application review.

Frequently asked questions about transferring to ASU

What GPA do you need to transfer to ASU?
Arizona State University generally requires transfer students to have a minimum 2.50 cumulative transfer GPA for admission consideration, although specific requirements [2] vary based on how many credits you have after high school. Some degree programs [22] have higher GPA requirements, but many students can qualify through alternative admission pathways or by strengthening their academic record. We know that GPA isn't the only indicator of success in college, and that past performance isn't always an indicator of future success.

What is the lowest GPA ASU will accept?
The minimum GPA for transfer admission consideration at ASU is typically around 2.50. However, admission requirements can vary based on completed credit hours and intended major. See ASU's Degree Search [22] for any additional requirements for your specific program. Now, does this mean we let just anyone in? Not quite. ASU is all about accessibility and excellence. We know that GPA isn't the only indicator of success in college, and that past performance isn't always an indicator of future success. This approach is one of the reasons ASU is the most innovative university in the U.S. for 11 straight years.

Is it too late to transfer to Arizona State University (ASU)?
It's usually not too late to transfer to Arizona State University. The university offers multiple start terms throughout the year, giving students flexibility to apply when they're ready. ASU uses a rolling admission process without any "hard" deadlines, allowing students to receive an admission decision within two to four weeks of completing their steps to apply. [23]

Transfer to ASU from a college or university

MyPath2ASU®: Your Personalized Path to ASU

MyPath2ASU® is ASU's transfer admission guarantee, designed to simplify your journey towards a bachelor's degree. We're committed to providing exceptional transfer resources and building robust academic pathways specifically for you. MyPath2ASU® creates personalized, course-by-course transfer maps for any regionally accredited community college or four-year institution. Simply enter your chosen major and transfer school, and MyPath2ASU® will identify the courses at your current institution that directly apply to your ASU major. This personalized map helps you save time and money and minimize credit loss as you prepare to transfer to ASU.

Program benefits:

Track degree progress
Submit course evaluations
Plan your coursework and stay on track

MyPath2ASU® signup

Get started with your transfer planning process.

Here's what to expect:

- Step 1: Select your preferred way to study and current institution so we can customize your pathway.
- Step 2: Choose a program you're most interested in.
- Step 3: Fill in your personal information and submit the form. Once submitted, complete your Transfer Guide account and access your MyPath2ASU® transfer map.

[Archivist note: MyPath2ASU® signup cannot be captured]

Your next steps to applying to ASU

As you're completing your community college coursework, if you have questions about the admission process, requirements or transcripts, contact your transfer coordinator and they will be happy to help.

Or if you're ready to apply to ASU, you can begin your application for admission up to a year before you are ready to transfer.

General university admission is guaranteed upon successful completion of the following conditions:

1. Completion of an associate degree from a regionally accredited higher education institution with a minimum 2.00 cumulative GPA (Arizona residents) or 2.50 cumulative GPA (nonresidents) or
2. completion of 24 or more transferable semester credits post-high school with a minimum cumulative transfer GPA of 2.50 (4.00 = "A") and verification of high school graduation or the equivalent.

Important notes:

- Some ASU colleges and schools have additional or higher requirements for admission into their majors. Visit degree search [5] to find the requirements for your major.
- Students will also need to submit an Arizona State University admission application, including an application fee and other required documents, such as official college/university transcripts.
- MyPath2ASU® pathway programs are based on a minimum of 24 transfer credit hours; students with fewer than 24 credit transfer credit hours will need to meet the appropriate admission requirements. [6]
- International students will need to meet international admission requirements.

How and when to apply [6]

Frequently asked questions about transfer pathway programs

How hard is it to transfer to Arizona State University (ASU)?
Arizona State University has created a seamless transfer process. ASU offers direct admission for nearly all majors, which means students are directly admitted as long as they meet applicable admission requirements [13] for both ASU and their major and complete the steps to apply. [6]

Is ASU transfer friendly?
Transferring to Arizona State University is designed to be a straightforward process and resources are available to guide you through each step. Thousands of students successfully transfer each year.

Can I get into ASU with a 2.5 GPA?
Yes, ASU may accept transfer students with a 2.50 GPA, depending on the program you're applying to. See ASU's Degree Search [14] for any additional requirements for your specific program. At ASU, access doesn't come at the cost of excellence. We pride ourselves on having an accessible admission process and being repeatedly ranked No. 1 [15] on 30+ lists.

Maricopa Community Colleges transfer students

Transferring from the Maricopa County Community College District to Arizona State University can be a smooth process when planned. As a Maricopa student, you have a couple of ways to earn your bachelor's degree at ASU. Find what works best for you and we'll help you plan your path.

MyPath2ASU®

MyPath2ASU® helps you plan and complete prescribed coursework designed for a smooth transition to ASU to earn your bachelor's degree.

Sign up for MyPath2ASU® [1]
MyPath2ASU® majors [2]

To view MyPath2ASU® majors from prior years, visit the archive search tool. [3]

Watch this video to learn how to sign up and access MyPath2ASU®

How to Signup for MyPath2ASU (For Maricopa Students) [4] on YouTube

Get started with the MyPath2ASU® transfer experience

Step 1: Sign up for MyPath2ASU® [1]

- Sign in with your Maricopa Enterprise ID and password, and click Login.

Step 2: Update your academic plan

- From the Student Center, select the tile, My Academic Plan
  - Open your academic plan, click Change Plan/MAPP
  - Complete the following components:
    1. Change my plan
    2. Term
    3. Primary reason for attending
    4. Academic plan

Step 3: Complete the MyPath2ASU® sign-up

You'll see a summary of your new plan selection.

- Click OK to confirm your plan and complete your sign-up.
- Success! You're signed up for MyPath2ASU® and will receive your ASURITE User ID in about two weeks.

Explore your visit options

Welcome all transfer students. Explore the many live-hosted sessions [5] with ASU enrollment and academic team members and current students who can answer your questions. Navigate the MyPath2ASU® transfer experience and learn more about ASU's admission and enrollment processes. Explore each of our campuses through live-hosted virtual visit experiences [5], walking tours [6] and on-demand virtual tours [7].

MyPath2ASU Transfer Story – Brooklyn [8] on Vimeo.

MyPath2ASU® benefits

MyPath2ASU® is your suite of customized self-service transfer tools.

Guaranteed general admission

Earn guaranteed general admission to ASU and to your MyPath2ASU® major of choice if all requirements are satisfied. (Some majors have additional or higher admission requirements.)

Self-service transfer tools

Fully connect your academic progress to ASU by gaining direct access to self-service transfer tools that provide information about course applicability and degree progress tracking.

Save

Save time and money by planning your path to degree completion.

Connect

Connect with transfer student ambassadors and ASU transfer coordinators, access pre-enrollment services, and receive invitations to special ASU events.

Customized pathways

Select classes through customized course-by-course pathways to minimize loss of credit.

Personalized communication

Prepare academically with personalized communication for your major of choice.

AAS to BAS: Bachelor of Applied Science

Bachelor of Applied Science degrees are designed specifically for students who have earned an Associate of Applied Science.

- Students who have earned an AAS from a regionally accredited institution may transfer **60 credit hours** toward their BAS.
- Students who have earned an AAS degree from a regionally accredited Arizona community college may be eligible to transfer **up to 75 credits** toward their BAS.

Plan to meet with an academic advisor to ensure your courses will meet degree requirements.

FAQ (for students)

Where can I see current transfer pathways?
Visit MyPath2ASU® [2] to access transfer requirements for 400+ ASU degree programs. Courses are displayed in an easy-to-follow, semester-by-semester sequence.

What do I need to do if I signed up already?
There is no need to sign up again unless it has been more than four years since you signed up, or if you are changing your major or moving to a newer catalog year.

What do I need to do if I want to change my major?
As always, students who signed up for a MAPP and want to change to a different major will need to sign up for the new major through https://redirect.maricopa.edu/student-center. Consult your community college academic advisor first to understand potential consequences of making a program plan change.

Who should I contact if I have questions?
The ASU transfer coordinator [11] assigned to your community college and your community college academic advisor can assist you with MyPath2ASU®.

I'm ready to apply [12]

Transfer Partnership with BYU-I and BYU-Pathway Worldwide

Transfer of academic credit for students wishing to complete a degree at ASU.

The innovative partnership will allow students who begin their education through one of BYU-Idaho's programs access to the wider array of classes, majors and degrees offered by ASU.

BYU Idaho students who wish to transfer to ASU have two transfer options.

MyPath2ASU®

MyPath2ASU® is a set of customized tools to help transfer students from U.S. regionally accredited institutions (including international students transferring from U.S. regionally accredited institutions). MyPath2ASU® creates a seamless transfer experience to ASU after earning credits or an associate's degree from a U.S. community college or university. Plan a path into your major of choice by taking classes that transfer to ASU—shortening your time to degree completion.

Get started with MyPath2ASU® [1]
Search MyPath2ASU® majors [2]

The Associate of Applied Science to Bachelor of Applied Science Program

The AAS to BAS programs is for students who have completed an Associate of Applied Science from BYU-Idaho and want to complete a Bachelor of Applied Science in a complementary discipline at ASU.

The completed Associate of Applied Science must be transcripted on a BYU-Idaho transcript.

Learn more [3]

AAS to BAS for Brigham Young University Idaho

Transfer simplified

If you're pursuing an Associate of Applied Science from BYU-Idaho, then an ASU Bachelor of Applied Science degree might be the perfect fit for you. This program allows you to transfer 60 credit hours from your Associate of Applied Science degree toward a compatible Bachelor of Applied Science at ASU, with guaranteed admission if you have earned at least a 2.5 grade point average from BYU-Idaho. The completed Associate of Applied Science must be transcripted on a BYU-Idaho transcript.

Identify the AAS degree you are currently earning at BYU-Idaho and determine your preference for your BAS.

ASU in Mexico

Opportunity. Partnership. Innovation.

As an institution from a border state, we are actively working to strengthen our connections with Mexico across all academic units at the university. This effort is integral to our responsibility to both our on-campus and off-campus communities. Rooted in the concept of being a socially embedded institution, our approach at ASU is centered on the belief that we must forge deep engagements with Mexican partners to gain perspective on regional challenges and to develop innovative, game-changing solutions to issues of importance to both sides of the border.

That political border can seem like an abstraction when you start to think about our shared future around issues like energy, water, and economic opportunity. Envisioning a thriving future for Arizona is inseparable from envisioning the same for Mexico.

View partners and projects [1]

Our partners

ASU collaborates with prominent research universities in Mexico to create synergies that enhance our capabilities to better serve our communities. We work with the spirit of contributing to the resolution of the most pressing issues affecting North America and the globe.

Alongside our partners, ASU endeavors to find innovative methods of collaboration, aiming to broaden academic opportunities for students on both sides of the border and improve higher education in the region. Through these partnerships, we foster intercultural dialogues and cooperation with Mexico—a key partner for Arizona and the United States.

Transferring credits to ASU

How credits transfer to ASU

When you transfer to ASU from another college or university, the following general standards for transfer credits apply. You can use ASU transfer tools to learn how credits will transfer and begin creating your roadmap to graduation.

Accepted credits

ASU accepts college-level (not remedial) courses in which transfer students have earned a grade of “C-“ (4.00=”A”) or better from regionally accredited colleges and universities. If a course is repeated, the first course in which a minimum of “C-“ grade was earned will be used.

Pass grades may be transferable to ASU if the institution or transcript indicates the "P" grade is comparable to a C- or better. Pass grades are not calculated into your transfer GPA for admission.

Credit hours

A maximum of 64 semester hours of credit will be accepted as lower-division credit when transferred from a regionally accredited community, junior or two-year college, with the exception of some special programs. An unlimited number of credit hours will be accepted from four-year institutions. Upon admission to the university, you will work with an ASU academic advisor to determine how your transferable credits apply toward your selected major.

Credit conversion

Acceptable academic credits earned at other institutions that are based on a different unit of credit than the one prescribed by the Arizona Board of Regents are subject to conversion before being transferred to ASU. All ASU students must meet graduation requirements (university, college, major and general studies requirements) to earn a four-year degree.

Degree requirements

The ASU college of your major determines how transfer courses fulfill the degree requirements of your ASU major. You should review the degree requirements of the program into which you intend to transfer and talk with an academic advisor about your transfer credits and how they will apply to your degree program.

Determining GPA

Grades and honor points that you earned at other colleges and universities are considered for admission, but your ASU cumulative grade point average is based solely on coursework taken at ASU.

Types of transfer credits not accepted by ASU:

- Courses in which you earned below “C-” as your final grade.
- Credit awarded by postsecondary schools in the United States that lack candidate status or are not accredited by a regional accrediting association.
- Credit awarded by postsecondary schools for life experience.
- Credit awarded by postsecondary schools for courses taken at noncollegiate institutions (e.g., governmental agencies, corporations, industrial firms, etc.).
- Credit awarded for continuing education units (CEU), continuing education credit, workshops, seminars, professional development courses and other not-for-credit courses through postsecondary institutions.
- A student who feels they have been unjustly denied credit for transfer may appeal the decision.
    - Prospective students can contact Admission Services [1] or Academic Transfer Credit Solutions [2].
    - Admitted students can contact their academic advisor or academic unit (found on My ASU).

Transfer Guide

ASU’s Transfer Guide is a helpful online tool to assist you in your transfer planning process. Manage your Transfer Pathways, requested course evaluations, saved courses searches, saved exam searches and more.

View the Transfer Guide [3]

Course search

Search how individual credits transfer from your college or university to ASU. [4]

MyPath2ASU

Build a course map showing which credits can transfer to your major, and sign up for ASU’s transfer pathway program. [5]

Exam search

See how your test scores from exams like AP, CLEP, or IB may apply for ASU credit. [6]

ASU equivalency search

Search by an ASU course to determine if your college or university offers an equivalent course. [4]

Military credits

ASU is proud to welcome transfer student veterans of the Army, Navy, Air Force, Marines, Coast Guard and National Guard to our undergraduate student community.

Evaluation of military transcripts

ASU uses the American Council on Education's Guide to the Evaluation of Educational Experiences in the Armed Services [7] to assess how to transfer military credits to ASU. In general, a military course must be similar to an ASU undergraduate course to transfer to ASU.

Military credits that transfer to ASU through educational experiences in the armed services are not applicable toward completing ASU’s general studies requirements [8] for graduation, but do count for total credits toward completion. No transfer credit is awarded for vocational certificate category ACE recommendations.

The JST is reviewed for potential transfer credit in accordance with VA guidelines and Arizona statutes related to awarding credit for military training and education. Credits are evaluated at the time of JST submission to ASU. It is recommended the JST be sent to ASU upon application to ensure timely processing and evaluation.

[Archivist note: Degree Worksheets tool unable to be captured.]

ASU accepts the following military transcripts for transfer credit:

Air Force and Space Force members
Enlisted members
The Community College of the Air Force is a regionally accredited community college. If you received credit for courses taken through the CCAF while in active service, submit this transcript as part of your application.

- CCAF now offers electronic transcript delivery through Parchment, a digital credentialing service. Students are able to create an account on Parchment [9] to send transcripts, or you can request to have your official CCAF sent to ASU from the Community College of the Air Force transcripts page [10].

Officers
Officer transcripts are maintained by Air University. First-time users must create an account by accessing the AU Service Desk [11]. This works better on non-NIPR and Google Chrome. On the homepage under the Quick Links tab, select Official Transcript Request. Complete the required components of the form, add the attachments and submit. The Service Desk can be accessed by any device that has internet access; it is Common Access Card (CAC) enabled, but this is not required. The AU Service Desk is a secure application and certified for submission of Privacy Act information.

Army, Marine Corps, Navy and Coast Guard members

- The Joint Services Transcript has replaced the Coast Guard Institute Transcript, the Army/American Council on Education Registry Transcript System and the Sailor/Marine American Council on Education Registry Transcript.
- All enlisted members, officers and warrant officers, both active and veterans from all Army components, Coast Guard, Marine Corps and Navy, are eligible for a JST. You do not have to be on active duty to access the JST website and your transcript. Active duty, reserve, veterans or National Guard personnel can use JSTs.
- Some students may have concerns about a security warning when accessing the website. This happens when a user logs in to a Department of Defense network from a non-networked computer without a CAC. You can confirm the security exception to proceed to the JST request site. If you do not confirm this exception, you will be unable to place your order.
- Register [12] for a JST account, and direct the DoD to send your transcript to ASU.

Veterans exception

By Arizona statute, no failing grades received by a veteran at an Arizona university or community college before military service may be considered when determining admissibility. This exception may be used only one time and applies only to veterans who:

- Are honorably discharged.
- Have served in the armed forces of the United States for a minimum of two years.
- Have previously enrolled at a university or community college in Arizona.

Military service records must be submitted, including form DD 214.

Credit by exam

You may earn no more than 60 hours of credit by exam for any degree program, including ASU comprehensive and proficiency exams.

ASU's credit by exam policy [13]

Frequently asked questions about transferring college credits

What credits are transferable to Arizona State University (ASU)?
ASU accepts college-level (not remedial) courses in which transfer students have earned a grade of "C-" (4.00="A") or better from regionally accredited colleges and universities.

Are college credits from 20 years ago still valid?

In many cases, older earned college credits can still be evaluated for transfer students depending on the year, subject and program. Some subject areas, especially in fast-changing fields, may have limitations on the applicability of older coursework. ASU reviews coursework to determine what applies toward your degree.

Can you transfer with a 2.7 GPA?
The minimum GPA for transfer admission consideration at ASU is typically around 2.50. However, admission requirements can vary based on completed coursework, credit hours and intended major. See ASU's Degree Search [4] for any additional requirements for your specific program. At ASU, access doesn't come at the cost of excellence. We pride ourselves on having an accessible admission process and being repeatedly ranked No. 1 [15] on 30+ lists.

Admitted transfer student next steps

Welcome to Arizona State University.

You're now on your way to becoming part of the most innovative and forward-thinking university in the nation. And by choosing ASU, you will become a part of a community of master learners and doers who will support you during your journey at ASU.

We've gathered your next steps to help you prepare for your transition to ASU — plus we've added some extras for you to enjoy. You'll be getting a lot of information about ASU in the coming months. This guide highlights the most important things to know so you'll be prepared for your new Sun Devil status.

First day of classes

Enrolling for fall 2026
Classes begin Aug. 20, 2026

Enrolling for spring 2027
Classes begin Jan. 11, 2027

If you've been admitted for spring 2026 but didn't enroll you can still enroll for fall 2026.

View the Academic Calendar [1]

Need help?

ASU admission team members can answer your questions and guide you through each step of the enrollment process between now and the time you get here.

Find my admission team member [2]

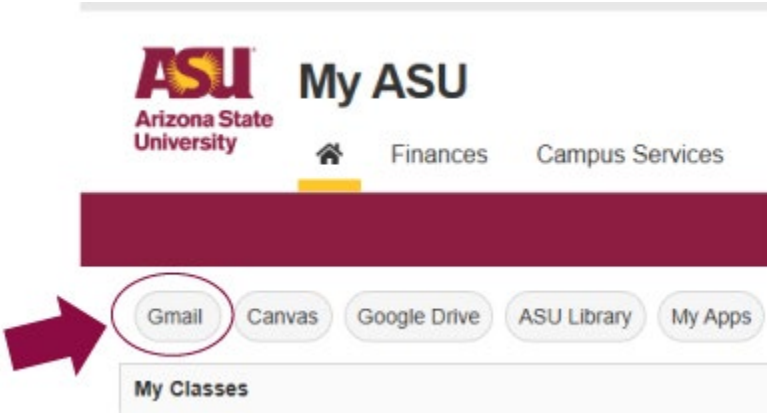
Your next steps as an admitted transfer student

Activate your ASURITE User ID

Your ASURITE User ID is the official login name you'll use to access most ASU systems and services. You'll get your ASURITE User ID and activation instructions shortly after you submit your application. A message from computer.accounts@asu.edu with the subject line "ASU Account Activation" will be sent to the email address you provided in your application.

If you can't remember you ASURITE User ID you can look it up at: asu.edu/lostpassword

You'll log in to My ASU [3] with your ASURITE User ID and password to:



- View your priority tasks and next steps for enrollment
- View your advisor contact information
- View financial aid and billing information
- Connect to campus technology and services

How to log in to My ASU:

1. Navigate to my.asu.edu.
2. Enter your ASURITE User ID.
3. Enter your password. (Forgot your password? Visit asu.edu/lostpassword.)
4. Click the "Sign In" button to access your account.

After you enroll in classes, visit asu.edu/emailsignup to activate your official @asu.edu email address. Once activated, you will access and check your official ASU email through your ASU Gmail account.

Be sure to check both your non-ASU personal email address and your ASU Gmail inbox regularly.

Review your transfer credits

To review your transfer credits, visit the ASU Transfer Guide [4], log in with your ASURITE User ID and password, and click on My Transfer Guide. For questions about applying your transfer credits to your degree program, please connect with your academic advisor using the Academic Support Team box in My ASU [3].

Transfer guide [4]

Pay your enrollment deposit (on-campus students only)

Confirm your place in ASU's incoming class by submitting your enrollment deposit via My ASU. Then, be sure to check My ASU often for any Priority Tasks you need to complete to enroll.

Transfer enrollment deposit [5]

Start the New Transfer Student Orientation Experience

In the New Transfer Student Orientation, you will prepare to take classes by completing essential next steps for enrollment. To access it, log in to My ASU [3] to view details under Priority Tasks, or check out the New Transfer Student Orientation Experience website [6].

Register for classes

You must meet with an academic advisor before you can register for classes. You can find your advisor's contact information in My ASU [3] under the Academic Support Team box. You may want to review the Transfer Guide [7] to view course equivalencies before meeting with your academic advisor.

Submit your FAFSA

The 2026-2027 Free Application for Federal Student Aid is available now. Submit your FAFSA to maximize the amount of aid you receive. ASU's Federal School Code is 001081. [8]

Fall 2026: Complete the 2026-2027 FAFSA
Spring 2027: Complete the 2026-2027 FAFSA

Apply for scholarships

Transfer scholarships are available to help pay for tuition, housing, books and other costs when you transfer to ASU.

Apply [9]

Submit your MMR immunization verification form (on-campus students only)

You must submit your measles (rubeola), mumps and rubella immunization form before classes begin. You can fax, email or mail your records to ASU Health Services. [10]

Immunization form [11]

Explore housing options

There are limited on-campus [12] options for transfer students; however, we strongly encourage you to take advantage of off-campus housing options surrounding each ASU campus. We understand that you may not be familiar with all of the housing options in the Phoenix metropolitan area, so we have developed the Off-Campus Housing Marketplace [13] to help you search for the apartment or house that works for you.

Request final transcripts

As soon as you graduate or complete your current semester or term, request an official final transcript be sent from your college or university to ASU's Admission Services.

Learn more [14]

Review parking and transportation

Cars are not the only way to get to ASU. The bus and light rail are affordable options, and students can walk, bike or skateboard on campus.

Learn more [15]

Visit campus

If you haven't toured campus already, visiting is the best way to get an idea of what life is like as a Sun Devil. Schedule a walking tour [16] with a campus tour guide at all of ASU's campuses. If you can't make it in person, take a virtual tour [17] — or if you'd rather explore campus on your own, take a self-guided audio tour [18] to hear about every major campus attraction.

Visit campus [19]

Attend welcome events

Get to know your campus and meet other transfer students at ASU's free welcome events. Explore the event schedule to discover which ones to attend.

Explore events [20]

Virtual admit packet

Below you'll find the "Transfer students next steps" brochures and your guide to My ASU.

Spring 2026 transfer student next steps

Next steps guide [21]
Guide to My ASU [22]

Fall 2026 transfer student next steps

Next steps guide [23]
Guide to My ASU [24]

Getting around

Across campus

Walk, board or bike [25]. If you're on the Tempe campus, you can use the Flash [26] to get from one side of campus to the other.

Between campuses

Hop on a free intercampus shuttle [27], complete with Wi-Fi so you can get work done on the way.

Across town

Check out Valley Metro [28] light rail and buses, and look into a U-Pass [29]. If you'd prefer to drive yourself, consider renting a car through Enterprise CarShare [30].

Tour the ASU campuses with Amazon Prime

ASU created it's biggest virtual tour ever and it will be streaming live as an episode of Amazon Prime's show, The College Tour [31].

International first-year student admission

Applying to ASU undergraduate programs as an international student

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).
- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

International students who attended four years of high school in the U.S. are required to meet the competency requirements. [1]

English requirements

International students must meet a minimum English requirement in order to attend ASU. Refer to the minimum test scores listed below or review this webpage to see full details on how to meet one of these requirements to begin your ASU experience. [2]

Test score minimum requirements

Review detailed score requirements [2]

College	IELTS	TOEFL (iBT)	Cambridge English Exams	Duolingo	Pearson Test of English (PTE)
Walter Cronkite School of Journalism and Mass Communication	7.0	100 / 5 overall score	185	120	73
Ira. A Fulton Schools of Engineering	6.5	79 / 4 overall score	176	105	58
Bachelor of Science in Nursing	6.5	76 / 4 overall score	176	100	not accepted
All other majors/colleges	6.0	61 / 3.5 overall score	170 (B2 First, C1 Advanced and C2 Proficiency)	95	53

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who:

- Meet the academic (aptitude) and competency requirements, but
- Are not proficient in English.

This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience. [2]

Comparable degree requirements in different countries and territories

Arizona State University recognizes that educational systems are different across the world. To help you determine if your academic credentials are comparable to a U.S. high school degree and to understand the documents that need to be submitted for admission, please review the requirements for the country from which your credential was earned. International students

U.S citizen?

If you are a U.S. citizen and completed all of your coursework in the U.S., visit our domestic first-year admission web page. [3]

Find an international first-year ASU representative [4]

Find your degree program [5]

How to apply to ASU

Step 01: Complete the undergraduate application for admission.
Apply online with ASU's Application for Admission [6] or the Common Application [7]. ASU accepts only one application. We have no preference between the ASU application or the Common Application. If two applications are submitted, one will be canceled in our system. Application fees are nonrefundable.

Step 02: Submit the nonrefundable application fee.
International nonresidents: $85 ($70 for ASU online programs)

You can pay using a credit card (Visa or Mastercard) at the time you submit your application or when you log in to My ASU [8]. Or you can mail a check or money order to Admission Services (payable to Arizona State University) at the address below.

Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe, AZ 85287-1004

If you applied for admission through the Common Application [7], pay the application fee through that application.

Step 03: Have official transcript(s) and examination results sent directly from your school(s) or exam board to Admission Services. Provide English translations of all documents not issued in English.
Official transcripts are certified copies of official documents from each secondary school, college, university or technical school attended. Records must include courses completed, grades or marks earned, and certificates or degrees awarded. Include a certified English translation of all documents not issued in English.

Visit the transcripts page for detailed information on submitting international transcripts and English translations.

Transcripts information [9]

Step 04: Provide evidence of English language proficiency.
Have your TOEFL, IELTS, PTE, Duolingo English test, or Cambridge English exam score, sent directly to ASU, or provide proof of completion from Global Launch.

TOEFL
The official TOEFL score report can be sent directly to ASU from the Educational Testing Service. ASU's TOEFL institutional code is 4007. For information about this test and registration procedures, contact ETS at PO Box 6151, Princeton, NJ 08541-6151, USA or visit www.toefl.org .

Duolingo English test
Learn more about the Duolingo test. [10]

Global Launch
ASU accepts completion of the Global Launch English Language program or English for Undergraduate Admission and Achievement online self-paced course. Learn more about Global Launch. [11]

IELTS
For information about this test and registration procedures, contact the IELTS Office, University of Cambridge Local Examination Syndicate, 1 Hills Road, Cambridge/CB1 2EU, UK, or visit www.ielts.org.

PTE
For information about the Pearson Test of English, visit www.pearsonpte.com.

Cambridge English
ASU accepts the B2 First, C1 Advanced, and C2 Proficiency Exams. For information about Cambridge English Language Assessments, visit https://www.cambridgeenglish.org/exams-and-tests/.

Undergraduate English proficiency [2]

Step 05: Secondary and post-secondary documentation.
All documents must be an original or an attested copy with an original institutional seal and/or signature. Photocopies, notarized copies, faxes or scans are not considered original documents. All documents must be translated into English if the original is not issued in English.

Note: Before mailing or sending any documentation, you must fill out an ASU application. Sending documents before doing so will delay the processing of your application. It is also recommended that you include your ASU EMPLID on the envelope of any documents being mailed to ASU.

Do you have any college credits?

- All college work must be reported at the time of filling out your application.
- We must see all transcripts/academic records from all institutions that you have ever attended (regardless if you have finished the program at that institution or not).
- All documents not issued in English must be accompanied by an English translation.
- Access the transfer credit guide to check your college credits. [12]

Professional third-party evaluations
ASU provides in-house credential evaluations of your secondary and postsecondary academic records at no extra cost. However, if you have already had your academic credentials evaluated, ASU will consider course-by-course evaluations from the four agencies below:

- Educational Credential Evaluators. [13]
- Foreign Credentials Service of America. [14]
- Academic Credentials Evaluation Institute. [15]
- Scholaro. [16]

Note: Official evaluations do not take the place of official academic records. The evaluation is in addition to the official academic record. If the evaluation agency includes academic records they used to complete their evaluation and indicates that the evaluation was based on official or authenticated records, we may accept those documents as official.

Transfer guide [17]

Step 06: Submit your ACT or SAT scores (optional).
ACT or SAT scores are not required for admission, but may be submitted for ASU course placement or as supplemental information. Have your scores sent to ASU from ACT [18] or College Board [19] when you register for the test.

Step 07: Check application status.
Once you've completed all these steps, ASU will review your application. To see if you have any missing items, and to review your admission status and I-20 status, sign in at My ASU using your ASURITE UserID, which is sent to you after you apply for admission.

Activate My ASU and your ASURITE UserID.
You will receive your ASURITE UserID and activation code via email within one to three business days of submitting your application. If you have previously applied to ASU, your ASURITE UserID will remain the same. You'll use your ASURITE UserID to log in to My ASU. If you have previously applied to ASU, your ASURITE UserID will remain the same. If you have not previously activated My ASU, have your activation code sent to you [20] by submitting your ASU ID number and last name. If you have trouble logging in with your ASURITE UserID, contact the ASU Help Desk at 855-278-5080 or contact.asu.edu.

Check application status [8]

Step 08: Submit your student visa application.
All international students planning to attend Arizona State University will need to first apply for an I-20 in order to apply for an F-1 or J-1 student visa.

Student visa info [21]

Application deadlines

You must submit your application for admission to ASU, along with the application fee, by the deadline specified for each semester. To expedite the evaluation of your application, please remember to submit official transcripts, test scores and supporting credentials along with your application.

Fall 2026

Jan. 15, 2026
Application priority deadline

May 1, 2026
Enrollment deposit date
(first-year students only)

Aug. 20, 2026
First day of classes

Spring 2027

Nov. 1, 2026
Application priority deadline

Dec. 1, 2026
Enrollment deposit date
(first-year students only)

Jan. 11, 2027
First day of classes

Note: Applications for summer that are not completed in time for the start of the summer sessions will be reviewed for admission for the fall semester.

Note: International students who have been admitted for the fall semester who would like to begin attending classes during the summer must contact Admission Services [4] by May 1. Otherwise, I-20s will be created for the fall semester.

Make sure to apply as early as possible to allow time for all documentation and processes to be completed.

Frequently asked questions about international first-year admission

How do I apply to an American university as an international student?
To apply to ASU as an international student, you must meet certain academic requirements, as well as demonstrate proof of English proficiency. Review this page for admission and English proficiency requirements, application procedures, and deadlines for undergraduate students.

Do I have to know English to study at ASU?
Yes. ASU requires proof of English proficiency from all international student applicants, or applicants whose native language is not English. ASU accepts TOEFL, PTE, IELTS or DuoLingo English test scores, or completion of ASU's Global Launch English and academic preparation courses as proof of English proficiency.

What is Global Launch?
Global Launch is Arizona State University's English language and academic preparation unit, providing face-to-face and online English and pathways programs for international students seeking admission to the university.

International transfer student admission

How to transfer colleges as an international student

Comparable requirements to a high school diploma

Arizona State University recognizes that educational systems are different across the world. To help you determine if your academic credentials are comparable to a U.S. high school degree and to understand the documents that need to be submitted for admission, please review the requirements for the country from which your credential was earned.

[Archivist's Note: In-page by-country requirements tool unable to be captured.]

How to complete the undergraduate application as an international transfer student

Your info

Apply to ASU step 1: Your info [1] on YouTube.

The first step in completing the ASU undergraduate application is the My Information section. We walk you through each of these fields and address questions you might have about this section of the application.

Academic history

Apply to ASU step 2: Academic history [2] on YouTube.

The second section of the application focuses on your prior academic history, including high school and any colleges or universities you previously attended. Watch as we guide you through these scenarios and explain how to fill out each part based on your situation.

Grades

Apply to ASU step 3: Grades [3] on YouTube.

All students have the option to self-report high school grades in the My Grades section of the application, though self-reporting is not required. In this video, we walk you through this process and explain what courses you should include, how to add these courses to your application and more.

Residency

Apply to ASU step 4: Residency [4] on YouTube.

The information you share in the residency portion of the undergraduate application helps the admission office determine if you are an in-state, out-of-state or international student. In this video, we cover these terms in detail and explain how to accurately fill out this part of your application.

Choose a major

Apply to ASU step 5: Choose a degree [5] on YouTube.

One of the final sections of the undergraduate application is the Choose Major section. If you're unsure about what major is best for you, we offer resources that might help you decide. And, you can always change your major later.

Submit

Apply to ASU step 6: Submit [6] on YouTube.

Now all that's left is to review your application, submit it and pay the application fee. In this video, we review how to pay the application fee and what the next steps are now that you've submitted your application to ASU.

International transfer student admission requirements

Academic requirements

Transfer students are considered anyone with 12 or more transferable credits completed post high school. Transfer students must have a minimum 2.50 cumulative GPA (a "C+" or better where "A"=4.00). Some majors have higher admission requirements. To find the requirements for your specific program, please visit ASU's Degree Search. [7]

Some ASU programs may have higher admission and English proficiency requirements and may consider a minimum ACT or SAT score.

You must have and present a completed high school diploma or certificate.

You must submit official transcripts from every high school, college and university you attended, regardless if a degree was earned.

For more information on the process, additional requirements for students with additional credits and other information, visit transfer apply. [8]

Aptitude requirement

You must meet one of the following:

- Transfer students with 12–23 transferable credits must also have a minimum 2.50 cumulative transfer GPA and meet first-year student admission requirements. [8]
- Transfer students with 24 or more transferable credits must have a minimum 2.50 cumulative transfer GPA.
- Transfer students who have earned an associate degree or higher from a regionally accredited higher education institution must have a minimum 2.00 cumulative GPA (for Arizona residents) or 2.50 cumulative GPA (for nonresidents).

Some majors have higher admission requirements. To find the requirements for your specific program, please visit ASU's Degree Search. [7]

"A" = 4.00; ASU accepts college-level courses in which you have earned a "C-" or better.

Competency requirements

International students who attended four years of high school in the U.S. are required to meet the competency requirements.

- English: four years (composition/literature based).
- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).
- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences, and physics).
- Social science: two years (including one year American history).
- Foreign language: two years (same language).
- Fine arts: one year.

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).
- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

U.S citizen?

If you are a U.S. citizen and completed all of your coursework in the U.S., visit our domestic transfer admission web page. [8]

Important deadlines

You must submit your application for admission to ASU, along with the application fee, by the deadline specified for each semester. To expedite the evaluation of your application, please remember to submit official transcripts, test scores and supporting credentials along with your application.

Fall 2026

Nov. 1, 2026
Application priority deadline

July 21, 2026
Final day to issue I-20/DS-2019 outside the U.S.

Spring 2027

Feb. 1, 2026
Application priority deadline

June 1, 2026*
First day to issue I-20/DS-2019

July 21, 2026–Aug. 20, 2026
Mandatory SEVIS check-in with ISSC

Aug. 20, 2026
Final day to issue I-20/DS-2019 for transfer students within the U.S.

Aug. 20, 2026
First day of classes

Dec. 11, 2026
Final day to issue I-20/DS-2019 outside the U.S.

Dec. 12 2025 – Jan. 11, 2027
Mandatory SEVIS check-in with the International Student and Scholars Center

Jan. 11, 2027
Final day to issue I-20/DS-2019 for transfer students within the U.S.

Jan. 11, 2027
First day of classes and deadline to check in with the International Student and Scholars Center
* = Processing begins for spring 2027. However, fall 2026 I-20s will be given priority through August 20, 2026.

Note: Applications for summer that are not completed in time for the start of the summer sessions will be reviewed for admission for the fall semester.

Note: International students who have been admitted for the fall semester who would like to begin attending classes during the summer must contact Admission Services [9] by May 1. Otherwise, I-20s will be created for the fall semester.

Make sure to apply as early as possible to allow time for all documentation and processes to be completed.

How to apply to ASU

Step 01: Complete the undergraduate application for admission and pay the nonrefundable application fee.
Apply online with ASU's Application for Admission [10] or the Common Application [11]. ASU accepts only one application. We have no preference between the ASU application and the Common Application. If two applications are submitted, one will be canceled in our system. The application fee is $85 (U.S. Dollars) and is nonrefundable.

Step 02: Activate My ASU and your ASURITE User ID.
You will receive your ASURITE User ID and activation code via email within one to three business days of submitting your application. If you have previously applied to ASU, your ASURITE User ID will remain the same. You'll use your ASURITE User ID to log in to My ASU. If you have previously applied to ASU, your ASURITE User ID will remain the same. If you have not previously activated My ASU, have your activation code sent to you [12] by submitting your ASU ID number and last name. If you have trouble logging in with your ASURITE User ID, contact the ASU Help Desk at 855-278-5080 or contact.asu.edu.

Check application status [13]

Step 03: Have official transcript(s) and examination results sent directly from your school(s) or exam board to Admission Services. Provide English translations of all documents not issued in English.
Official transcripts are certified copies of official documents from each secondary school, college, university or technical school attended. Records must include courses completed, grades or marks earned, and certificates or degrees awarded. Include a certified English translation of all documents not issued in English.

For more detailed information on submission of international transcripts and English translations, please visit our transcripts page. [14]

High school transcripts
If you have not completed an associate degree or higher from a U.S. regionally accredited university or college, you must submit one of the following:

- Official high school transcript with a graduation date.
- Official U.S. GED/HiSet transcripts.
- Affidavit of Completion of Secondary School Education.

ASU accepts hand-delivered official high school transcripts in sealed envelopes from applicants. (ASU does not accept faxed high school transcripts.)

NOTE: Transfer applicants with 24 or more transferable semester credit hours from a regionally accredited college or university or recognized international university, including previously completed ASU credits, and who will be 22 or older by the start of the requested semester of admission, will not be required to submit a high school transcript for admission. Once all prior college or university transcripts and outstanding admission items are received and verified, the high school transcript requirement will be waived. Transfer applicants are required to have graduated from an approved high school (or equivalent) prior to the semester of requested admission to ASU, and to include this information on the application for admission.

Step 04: Provide evidence of English language proficiency.
Have your TOEFL, IELTS, PTE, Duolingo English test or Cambridge English exam score sent directly to ASU, or provide proof of completion from Global Launch.

TOEFL
The official TOEFL score report can be sent directly to ASU from the Educational Testing Service. ASU's TOEFL institutional code is 4007. For information about this test and registration procedures, contact ETS at PO Box 6151, Princeton, NJ 08541-6151, USA or visit http://www.ets.org/toefl.

IELTS
For information about this test and registration procedures, contact the IELTS Office, University of Cambridge Local Examination Syndicate, 1 Hills Road, Cambridge/CB1 2EU, UK or visit www.ielts.org.

PTE
For information about the Pearson Test of English, visit www.pearsonpte.com.

Global Launch
ASU accepts completion of the Global Launch English Language program or English for Undergraduate Admission and Achievement online self-paced course. Learn more about Global Launch. [15]

Duolingo English test
Learn more about the Duolingo test. [16]

Cambridge English
ASU accepts the B2 First, C1 Advanced and C2 Proficiency Exams. For information about Cambridge English Language Assessments, visit cambridgeenglish.org/exams-and-tests.

Undergraduate English proficiency [17]

Step 05: American university admission reminders and secondary and post-secondary documentation.
All documents must be an original or an attested copy with an original institutional seal and/or signature. Photocopies, notarized copies, faxes or scans are not considered original documents. All documents must be translated into English if the original is not issued in English.

Note: Before mailing or sending any documentation, you must fill out an ASU application. Sending documents before doing so will delay the processing of your application. It is also recommended that you include your ASU EMPLID on the envelope of any documents being mailed to ASU.

Do you have any college credits?

- All college coursework must be reported at the time of filling out your application.
- We must see all transcripts/academic records from all institutions that you have ever attended (regardless of whether you have finished the program at that institution or not).
- All documents not issued in English must be accompanied by an English translation.
- Access the transfer credit guide to check your college credits. [18]

Professional third-party evaluations

ASU provides in-house credential evaluations of your secondary and postsecondary academic records at no extra cost. However, if you have already had your academic credentials evaluated, ASU will consider course-by-course evaluations from the four agencies below:

- Educational Credential Evaluators. [19]
- Foreign Credentials Service of America. [20]
- Academic Credentials Evaluation Institute. [21]
- Scholaro. [22]

Note: Official evaluations do not take the place of official academic records. The evaluation is in addition to the official academic record. If the evaluation agency includes academic records they used to complete their evaluation and indicates that the evaluation was based on official or authenticated records, we may accept those documents as official.

Step 06: Check application status.

Once you've completed all these steps, ASU will review your application. To see if you have any missing items, and to review your admission status and I-20 status, sign in to My ASU [13] using your ASURITE User ID, which is sent to you after you apply for admission.

Step 07: Submit your student visa application.

All international students planning to attend Arizona State University will need to first apply for an I-20 in order to apply for an F-1 or J-1 student visa.

Frequently asked questions about international transfer admission

How do I apply to ASU as an international transfer student?

To apply to ASU as an international transfer student, you must meet certain academic requirements, as well as demonstrate proof of English proficiency. Review this page [31] for admission and English proficiency requirements, application procedures, and deadlines for undergraduate students.

How do I transfer credits to an American university?
When you transfer to ASU from another college or university, the following general standards for transfer credits apply. Use ASU transfer tools [18] to learn how credits will transfer and begin creating your roadmap to graduation.

How many credits can be transferred to ASU?
You can transfer a maximum of 64 credits from a regionally accredited community, junior or two-year college for courses in which you have earned a “C” (4.00 = “A”) or better.

International undergraduate applicants English proficiency

Pass the TOEFL, IELTS, PTE, Duolingo English test or Cambridge English exam

Test of English as a Foreign Language (TOEFL)
ASU accepts the TOEFL iBT® taken in a testing center. ASU accepts the TOEFL iBT® Home Edition for exams taken January 21, 2026 or after. TOEFL iBT® Paper Edition is not accepted.

ASU's institutional code is 4007. ASU accepts only electronic copies of the TOEFL score report.

TOEFL iBT (internet-based test)
For exams taken before January 21, 2026:

- For the general requirement programs, the minimum score is 61 (iBT).
- Bachelor of Science in Nursing: minimum score of 76.
- Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum score of 79.
- Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum score of 100.

For exams taken on or after January 21, 2026:

- For the general requirement programs, the minimum overall score is 3.5 with minimum section scores of: Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5.
- Bachelor of Science in Nursing: minimum overall score of 4 with minimum section scores of: Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5.
- Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum overall score of 4 with minimum section scores of: Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5.
- Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum overall score of 5 with minimum section scores of: Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5.

Learn more about the TOEFL. [1]

International English Language Testing System (IELTS)

ASU accepts IELTS Academic, IELTS Online, IELTS UKVI and IELTS Indicator exams.

The overall band score requirement for the academic test is at least 6.0. The general training exam is not accepted. No institutional code is needed.

Bachelor of Science in Nursing: minimum score of 6.5.

Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum score of 6.5.

Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum score of 7.0.

Learn more about IELTS. [2]

Pearson Test of English (PTE)

ASU requires a score of at least 53.

This test is not accepted for admission to the Bachelor of Science in Nursing program.

Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum score of 58.

Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum score of 73.

ASU does not accept the PTE Academic Online exam.

Learn more about PTE. [3]

Duolingo English test

General requirement programs: minimum score of 95.

Bachelor of Science in Nursing: minimum score of 100.

Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum score of 105.

Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum score of 120.

Learn more about the Duolingo English test. [4]

The exam may be taken from any computer that has a camera, audio and reliable internet connection. The exam portion of the Duolingo English test contains a series of speaking, reading, writing and listening exercises. Following the exam, there will be an interview portion that will ask you to respond to various prompts in 30 to 90 seconds. The exam will take about 45 minutes to complete and you will need either a passport, driver license, or national or state ID to show the camera. The score results are generally received within a few days of exam completion.

Should you choose to take the Duolingo English test, the access information is below.
Information on preparing for the exam [4] | Take the exam or practice exam [5]

A verification email will be sent to you a few days after completing the exam containing a link to send your score to ASU.

For additional information, please review the frequently asked questions. [6]

Cambridge English exams

ASU accepts the B2 First, C1 Advanced, and C2 Proficiency Cambridge English exams.

General requirement programs overall minimum score requirement: 170.

Bachelor of Science in Nursing: minimum score of 176.

Ira. A Fulton Schools of Engineering (higher admission requirement programs only): minimum score of 176.

Walter Cronkite School of Journalism and Mass Communication (higher admission requirement programs only): minimum score of 185.

Information on sending your Cambridge English Scores to ASU [7]

Validity of test scores and programs

- An IELTS, PTE, TOEFL, Duolingo exam, or Cambridge English exam must have been taken no longer than two years prior to the student's start date at ASU. Applicants who have scores that are more than two years old (or will be more than two years old by the time of their ASU start date) may be requested to submit updated test scores or demonstrate English proficiency through one of the other listed options.
- The completion date of Global Launch English Programs must have been no longer than two years old at the intended start date in an ASU degree program.

Complete Global Launch courses at ASU*

English language program

Complete the highest level of the Campus or Online Immersion English language program with a passing grade of B- (80%) or better.

Online self-paced English course

Complete the English for Undergraduate Admission and Achievement online course with a passing score.

Learn more about Global Launch [8]

Note: The completion date of Global Launch English Programs must have been no longer than two years old at the intended start date in an ASU degree program.

*Individual academic units may have higher requirements for English proficiency. Review your degree program of interest for details. Visit ASU's degree search to find your program.

Other ways to demonstrate English proficiency

1. U.S. citizens or U.S. permanent residents.
2. Citizen of a country/territory on the ASU English speaking country and territory list. [9]
3. Junior and senior year of high school completed in the U.S. AND ACT English score of 23 or higher or SAT EBRW score of 580 or higher, AND two years English.
4. Four years of high school in the U.S. with four years of English.
5. 48 transferable credits from a regionally accredited U.S. college or university with a GPA of 2.50 or higher, of which six credits are in first-year English (comparable to ASU ENG 107 and 108).
6. Undergraduate applicants who have earned a secondary or high school degree or higher from an international institution that is officially recognized by that country, and whose sole medium of instruction for the degree program was in English. If the transcript does not indicate language of instruction, the applicant should email asuinternational@asu.edu to request exemption and include a letter from the institution on letterhead indicating language of instruction or provide information on the institution website to verify language of instruction.

Note: English as a Second Language (ESL) courses are not accepted as proof of English proficiency.

International student visas

I-20 updates

We look forward to your arrival and have been hard at work making plans to welcome our new international students to campus.

What we want you to know

1. It is extremely important that you submit the documents required for the issuance of your I-20 to us. Upload the required documents through My ASU [1]. The upload tool on My ASU only allows the upload of each document type once, so please ensure you have all your documents ready before uploading. If you upload financial documents that do not cover the full funding needed as shown on the financial guarantee, you will be asked to

submit additional documentation to demonstrate the full funding, which will delay the issuance of your I-20. Please ensure your financial documents show sufficient funding before uploading.

2. Once ASU has received all documents required to issue an I-20 and has verified that they are complete, you will receive an email with a link to download your I-20 from the Document Portal in My ASU. Once received, you should print the I-20 and sign the document. You will not receive a physical I-20 via mail.
    a. The email will be sent to your @asu.edu email. As a reminder, your @asu.edu email address is being forwarded to your personal email account, so be sure to check it often, including junk and spam folders, so you do not miss any messages.
3. Once you have received your I-20, be sure to pay your I-901 fee [2]. Once the fee has been paid do not delay in contacting your consulate to obtain a visa appointment. Some consulates may have long wait times, so do not delay on securing an appointment time.
4. If you are unable to submit the documentation needed to receive an I-20 from ASU or are unable to obtain your F1 visa in time to arrive by the start of the semester of your admission, contact ASUinternational@asu.edu and we can advise you on your options.
5. If you have any questions, please contact our International Admission Services team. We will work with you to keep you on track.
6. View the I-20 Frequently Asked Questions webpage [3] for more information.

Helpful reminder

Be sure to check wait times for your local embassy [4] or consulate, as some areas may be experiencing wait times longer than 30 days. You can now apply for your visa up to 365 days before the start date listed on your I-20. Complete these steps as soon as possible so that when your local embassy can take your appointment, you will be ready to proceed with your next steps.

Types of international student visas

As an international student at Arizona State University, you will need to obtain an F-1 or J-1 student visa.

F-1 student visa

The F-1 visa is the most common student visa and is issued to full-time students enrolled in an academic or language program at a U.S. institution. Any student who is funded either by personal or outside funds, or a combination of the two, is eligible for F-1 status. If you are a student applying for an F-1 visa, you must request the SEVIS Form I-20 from the appropriate ASU admission office once admitted to ASU.

J-1 student visa

The J-1 visa is an exchange visitor visa issued to students at all academic levels. Students must have a substantial portion of their funding coming from a source other than their personal finances (e.g., their home institution or government). If you are a student applying for a J-1 visa, you must request Form DS-2019 from the appropriate ASU admission office once admitted to ASU.

F-2 dependent visa (undergraduate)

The F-2 visa is a nonimmigrant visa that allows dependent spouses and children of F-1 student visa holders to enter the U.S. and enroll in an educational institution. As a student with F-2 visa status, you can attend ASU only as a part-time student. For the undergraduate level, this means you may register for up to 11 credit hours for the spring and fall terms.

More F-2 information [5]

F-2 dependent visa (graduate)

The F-2 visa is a nonimmigrant visa that allows dependent spouses and children of F-1 student visa holders to enter the U.S. and enroll in an educational institution. As a student with F-2 visa status, you can attend ASU only as a part-time student. For the graduate level, this means you may register for up to eight credit hours for the spring and fall terms. Some graduate programs do not allow students to attend part time. For additional information, please contact your program of interest.

SEVIS form I-20

An initial I-20 is issued for students with a new SEVIS record. A transfer I-20 is issued for students who have an active SEVIS record at a U.S. high school or higher education institution, and are transferring their records to ASU.

Initial I-20
If you have not been issued an I-20 in the past, or if you have but the SEVIS record affiliated with that I-20 was terminated or completed, you should request an initial I-20.

Once you have uploaded all required documents in My ASU [1] for the I-20, ASU Admission Services will begin the process of creating your initial I-20.

Transfer I-20
If you have an active SEVIS record at another U.S. school (high school or higher education institution) and are requesting an I-20 through ASU, you should follow the Request Transfer SEVIS Form I-20 section below. Once you have uploaded all required documents in My ASU [1] for the I-20, ASU Admission Services will begin the process of creating your transfer I-20.

Transfer Sevis section [7]

Getting an I-20

An I-20 is an important immigration document that F-1 students need in order to obtain their student visa and enter the U.S. ASU guides each student through the process of obtaining their I-20. **Priority Tasks** on My ASU [1] alerts students

to the steps they need to take. The process of obtaining an I-20 can take some time, so it is important not to wait until the last minute to begin gathering the necessary documents and uploading them.

For sponsored students, the steps to obtaining an I-20 are slightly different than for nonsponsored students. Students should use the descriptions below to determine whether or not they are a sponsored student.

Sponsored student
A sponsored student's school and living expenses are paid by a sponsoring agency recognized by ASU.
Some examples of sponsoring agencies are ADNOC, Aramco, Dubai Electricity & Water Authority, Kuwait Cultural Office, Oman Cultural Division, Qatar Airways, Qatar Defense Attaché, Qatar Higher Education Institute, QatarEnergy, RasGas, Saudi Arabian Cultural Mission, Sidra, UAE Cultural Division and the UAE Scholarship Coordination Office.

Most of ASU's sponsored students come from Saudi Arabia, Kuwait, United Arab Emirates, Qatar and Oman.

Note: Students receiving an ASU scholarship or TA/RA position are not considered sponsored students.

Once you have uploaded all required documents in My ASU [1] for the I-20, ASU Admission Services will begin the process of creating your initial I-20.

Nonsponsored student
A nonsponsored student's school and living expenses are paid for through personal or family funds, loans, or other means not associated with an ASU-recognized sponsoring agency.

Students who are unsure if they are a sponsored student should contact ASU Admission Services at ASUinternational@asu.edu or +1 480-965-2437.

How to request an I-20

Step 01: Fill out the Financial Guarantee form
In compliance with the Department of Homeland Security and SEVIS regulations, all international applicants on the F-1 student visa must provide evidence of sufficient funds available for their studies in the U.S. For this purpose, a Financial Guarantee form [8] must be completed and submitted along with bank statements dated within the past 12 months and signed or wet stamped by an authorized bank or representative, or by a recognized sponsoring agency in the U.S. Please submit your Financial Guarantee form along with your bank statements or sponsor letter from an authorized sponsoring agency. ASU will not be able to process your SEVIS Form I -20 without receipt of your Financial Guarantee.

Please refer to the Financial Guarantee form to determine the amount of funds required for your specific program and campus. You can access the form here [8] .

- NOTE: The required proof of funds is based on the published tuition rates/fees at the time your I-20 is issued. If tuition rates/fees increase after your I-20 is issued and a new initial I-20 is required, additional proof of funds may be necessary.

Students with dependents (e.g., spouse, child) who will be joining them in the U.S. during their time on an F-1 or J-1 visa will need to provide proof of the following additional funds:

Additional financial support needed for dependents:
Spouse – $7,000
Each child – $5,000

Step 02: Financial Document Requirements
To meet ASU's financial requirements for your I-20 processing, you must provide Financial Documents that meets the following criteria:

Document Requirements:

- All financial documents must be dated within the last 12 months.
- Please include your 10 digit ASU Affiliate ID # on all pages.

- The total available balance across all documents must meet or exceed the amount listed on the Financial Guarantee form [8] for one academic year (9 months) for tuition and fees and living expenses.
- Ensure that all documents are in English or include a certified translation.
- Incomplete or unclear documentation may delay your I-20 processing so carefully review your documents to ensure they meet all requirements and documents are legible before submission.
- IMPORTANT NOTE: The I-20 tracker on My ASU [1] upload tool only allows the upload of each document type once, so please be sure to have all your financial documents combined together prior to uploading.

Acceptable Types of Financial Documents:

Bank Statements/Bank Certification/Balance Certificate

- Documents should include the following information:
    - Summary of the balance of the account(s) showing liquid assets only (cash, deposits, certificates of deposit, or savings accounts)
    - Account holder name(s)
    - Date of document issue or of balance
    - Currency of the account(s)
    - Type of account(s)
    - Balance Certificates must also show: bank official's printed name, title, and original signature, and be issued on bank letterhead with bank official's signature/stamp.
    - Business account statements must be accompanied by a letter on company letterhead confirming that funds from the account statement are available for student educational purposes. This letter must be signed by a company official with authority over the account.
- Note: the account transaction history is not required and screenshots of bank accounts are not acceptable.

Loan Letters:

- Provide in-principle and sanctioned loan letters that include the terms and conditions of the loan and the agreed loan amount.

Investment Statements:

- Include statements showing liquid assets (accounts that show cash balances only).

Scholarship Letters/Government Funding Letters:

- Letters must be issued by scholarship/Government agency official on letterhead, which includes the following information:
    - Student's full name
    - Award amount
    - Duration of the award
    - Confirmation that the award is valid for study at ASU
    - The degree and major the scholarship/government funding covers

Note: if a scholarship/government fundings does not cover the full amount required on the Financial Guarantee form, include additional financial documents to cover the remaining amount.

Acceptable government sponsorship agencies include ADNOC, Aramco, Dubai Electricity & Water Authority, Kuwait Cultural Office, Oman Cultural Division, Qatar Airways, Qatar Defense Attaché, Qatar Higher Education Institute, QatarEnergy, RasGas, Saudi Arabian Cultural Mission, Sidra, UAE Cultural Division, and the UAE Scholarship Coordination Office. For more details, refer to the sponsored student section.

Provident Fund Statement:

- A Provident account statement may be used when submitted with a written statement from the financial institution, which verifies the withdrawable amount for educational purposes.

Department Assistantship (RA/TA):

- Provide a copy of your RA/TA offer letter issued by the department to which you have been admitted at Arizona State University.
- Admissions will review your offer letter to determine the total funding provided by your offer as it pertains to the I-20 requirements.
- We are not able to list summer funding on the I-20 document.
- The I-20 document is required to show funding for the first 9 months of your program only.
- Note: if the assistantship does not cover the full amount required for I-20 processing purposes, you must submit additional financial documents

Step 03: Upload a copy of your passport

You may take a clear photo or scan of the biographic page of your passport and upload it to the link on My ASU [1]. The bio page is the page that shows your picture and personal details. Your passport must be valid for at least six months after your proposed date of entry into the U.S. If it is not valid, the I-20 will not be processed.

Step 04: Requesting SEVIS Initial or Transfer Form I-20

Document Submission

After being admitted to ASU and submitting your Financial Guarantee form, follow these steps to have your SEVIS Form I-20 created and sent to you:

1. Access My ASU: Log in to My ASU [1] where you will find I-20 tasks listed in your Priority Tasks.
2. Upload Documents: Upload the following items through My ASU:
    - Financial Guarantee Form:
        1. SEVIS Transfer Form I-20: If you are eligible for a SEVIS transfer to ASU, ensure you complete Step 4 with all your SEVIS information.
    - Financial Documents: For example, a bank statement showing sufficient funds.
    - Passport: A clear copy of your passport.

Click on each Priority Task item for additional instructions. Allow at least three business days for intake. Once your documents are on file, we aim to review documents within 7-10 business days to ensure completeness and sufficient funding for one academic year. If any issues are found, you will receive an email and updated priority task requesting additional documentation.

SEVIS Transfer Form I-20 ONLY (if applicable)

If you are currently studying in the U.S. on a F-1 visa and are eligible for a SEVIS transfer, you will need to have your SEVIS record transferred to ASU and complete all fields on Step 4 of your Financial Guarantee form [8] including but not limited to the Transfer Release Date.

Note: A Transfer I-20 will be issued only after your Transfer Release Date. If Step 4 on the Financial Guarantee form [8] is missing any information, we will request an updated form to review for a Transfer I-20.

Important Note for All Students

If you plan to travel outside the U.S. before starting your studies at ASU, you will need to re-enter the U.S. with your ASU SEVIS Form I-20. Present the ASU SEVIS Form I-20 at the U.S. Port of Entry.

Contact Information

If you have any questions, please contact the international student advisor at your transfer out school or reach out to ASU:

Admission Services

Address: 1151 S Forest Avenue, Tempe, AZ 85287-0112
Phone: 480-965-2437
Email for Undergrad: asuinternational@asu.edu
Email for Graduate: gograd@asu.edu

Step 05: Review Your SEVIS Form I-20 or DS-2019
It's crucial to very carefully review your SEVIS document, as each page contains important information that you need to understand. Here's what you need to check:

For SEVIS Form I-20 (F-1 Visa)
Page 1: Program and Biographical Information

- SEVIS Identification Number: Located on the top right corner of the first page. You will need this number for your visa application and to pay the SEVIS fee.
- Entry Date: You can enter the U.S. up to 30 days before the report date listed on your form (Item #5). Entering after this date may cause issues with immigration officials at the Port of Entry.
- Student Certification: By signing the Student Certification (Item #11), you confirm that you have read and understood the terms and conditions of your F-1 status.
- Program Name: The I-20 may list a CIP Code/Name, which groups similar programs, rather than the exact name of your program.

Page 2: Instructions

- This page includes important information for maintaining your F-1 status while studying at ASU. Make sure to read and understand these instructions.

Page 3: Travel Authorization

- This page is for future travel authorization. You do not need a signature on this page for your initial entry into the U.S. with your SEVIS Form I-20.

Note: Dependents accompanying an F-1 student in F-2 status must have their own SEVIS Form I-20 issued in their name.

For SEVIS Form DS-2019 (J-1 Visa)
Page 1: Program and Biographical Information

- SEVIS Identification Number: Located on the top right. This number is needed for your visa application and to pay the SEVIS fee.
- Travel Authorization: Includes spaces for future travel authorization. You do not need a signature on this page for your initial entry into the U.S. with your SEVIS Form DS-2019.
- Program Name: The DS-2019 may list a CIP Code/Name, which groups similar programs, rather than the exact name of your program.

Page 2: Instructions

- This page contains important information for maintaining your J-1 status while studying or conducting research at ASU. Be sure to read and follow these instructions.

Note: Dependents accompanying a J-1 student in J-2 status must have their own SEVIS Form DS-2019 issued in their name.

Important Actions

- Verify Accuracy: Ensure all information (e.g., spelling, dates) on your SEVIS Form I-20 or DS-2019 is correct. If you find any mistakes, contact the admissions office immediately to have them corrected.
- Visa Application: You will need your SEVIS Form I-20 or DS-2019, ASU admission notification, Financial Guarantee form, and passport to obtain your student visa at the U.S. consulate nearest to you.

Step 06: Process SEVIS Form I-901 and payment
Upon receipt of SEVIS Form I-20 or Form DS-2019, you will have the information needed to pay the SEVIS fee and the SEVIS Form I-901 fee [9]. You must pay the SEVIS fee and have a receipt prior to applying for a student visa.

The SEVIS Form I-901 fee [2] is mandated by the U.S. Congress to support the program office and the automated system that keeps track of students and exchange visitors, and ensures that they maintain their status while in the U.S.

I-20 and DS-2019 issuance timeline

The U.S. government has strict regulations on the issuance of I-20 and DS-2019 documents to international students who wish to attend an educational institution in the U.S. The dates below are for issuance of an I-20 or DS-2019, the latest date to report to the appropriate international student office, and the final day to be enrolled full time. Any noncompliance with these dates may preclude you from registering for classes. International students not enrolled full time [10] will have their SEVIS record terminated.

Summer 2026 semester

Nov. 3, 2025*
First day to issue I-20/DS-2019*.
* = Processing begins for fall 2026. However, spring 2026 I-20s will be given priority through Jan. 12, 2026

April 18, 2026
Final day to issue I-20/DS-2019 outside the U.S.

April 18 – May 18, 2026
Mandatory SEVIS check-in with the International Students and Scholars Center.

May 4, 2026
Undergraduate students' last day to request an academic deferral and deferral of the I-20.

May 18, 2026
Final day to issue I-20/DS-2019 for SEVIS transfer students within the U.S.

May 18, 2026
First day of classes and deadline to check in with the International Students and Scholars Center.

May 22, 2026
Graduate students' last day to request an academic deferral and deferral of the I-20.

Fall 2026 semester

Nov. 3, 2025
First day to issue I-20/DS-2019*.
* = Processing begins for fall 2026. However, spring 2026 I-20s will be given priority through Jan. 12, 2026

July 21, 2026
Final day to issue I-20/DS-2019 outside the U.S.

July 21–Aug. 20, 2026
Mandatory SEVIS check-in with the International Students and Scholars Center.

Aug. 6, 2026
Undergraduate students' last day to request an academic deferral and deferral of the I-20.

Aug. 20, 2026
Final day to issue I-20/DS-2019 for SEVIS transfer students within the U.S.

Aug. 20, 2026
First day of classes and deadline to check in with the International Students and Scholars Center.

Sept. 2, 2026
Graduate students' last day to request an academic deferral and deferral of the I-20.

Spring 2027 semester

June 1, 2026*
First day to issue I-20/DS-2019.
* = Processing begins for spring 2027. However, fall 2026 I-20s will be given priority through August 20, 2026.

Dec. 11, 2026
Final day to issue I-20/DS-2019 outside the U.S.

Dec. 12, 2026 –Jan. 11, 2027
Mandatory SEVIS check-in with the International Students and Scholars Center (ISSC).

Dec. 28, 2026
Undergraduate students' last day to request an academic deferral and deferral of the I-20.

Jan. 11, 2027
Final day to issue I-20/DS-2019 for SEVIS transfer students within the U.S.

Jan. 11, 2027
First day of classes and deadline to check in with the International Students and Scholars Center.

Jan. 24, 2027
Graduate students' last day to request an academic deferral and deferral of the I-20.

The student visa application process

Step 00: Plan with your country of residence and visa validity timelines in mind
After you have received your ASU-issued I-20 document and when applying for your visa, you should review the U.S. Department of State's visa reciprocity and civil documents guidance. [11]

This government site explains:

- How long you can expect your student visa to be valid,
- How many entries are permitted, and

- Whether you must pay additional reciprocity fees.

It is important to understand these details so you can plan the timing of your visa appointment and ensure your visa will still be valid when you are eligible to arrive in the U.S. for your program.

Regulations regarding adjudication of nonimmigrant visa applicants in their country of residence
Review the September 6, 2025 guidance from the U.S. Department of State regarding Country of Residence [12] and visa interviews.

Step 01: Apply for nonimmigrant visa, DS-160
As a visa applicant, you must submit a completed DS-160: Online Nonimmigrant Visa Application [13] for all nonimmigrant visa categories. Read complete details about student visas. [14]

While completing the DS-160, you must have all answers available in English, along with your passport, SEVIS number, and related information.

Note: After you have completed the DS-160, you will need to print and keep the DS-160 barcode page.

Step 02: Schedule visa interview
To schedule your interview, locate your local U.S. Embassy or Consulate [15]. Each consulate sets its own timeline for accepting and processing [4] student visa applications. If the consulate says apply “at least” 60 days before your program departure, this means no fewer than 60 days. To avoid problems, submit your visa application at the earliest date the consulate will accept it.

Step 03: Pay visa application fee
Please read information about nonimmigrant visa application fees [16]. Applicants must pay these fees as directed prior to their visa interview, and they must bring the receipt to their interview.

If the visa is issued, please note that a Visa Issuance Reciprocity Fee may be applicable based on your country of citizenship. Please refer to the Visa Reciprocity Table [17] to see if this fee applies to you.

Step 04: Prepare for visa interview
Start gathering the required documents for your student visa application the moment you apply to your program. Read through all information provided online by the U.S. Embassy or Consulate [15] that you will be visiting.

Gather and prepare the following required documents before your visa interview:
- Passport valid for at least six months after your proposed date of entry into the U.S.
- Nonimmigrant Visa Application, Form DS-160 confirmation page.
- Application fee payment receipt, if you are required to pay before your interview.
- Photo. You will upload while completing the online form DS-160. If the photo upload fails, you must bring a 2x2 inch photograph of yourself.
- SEVIS Form I-20 or Form DS-2019 with your SEVIS record number issued by ASU. You must sign Form I-20.

Additional documentation may be required
A consular officer will interview you to determine your qualifications for a student visa, and may request additional documents. You should be prepared to provide evidence such as:
- A receipt of your SEVIS Form I-901 fee.
- Transcripts, diplomas, degrees or certificates from schools you attended.
- Standardized test scores required by your U.S. school.
- Your intent to depart the U.S. upon completion of the course of study.
- How you will pay all educational, living and travel costs, including financial evidence showing you, your parents or sponsor have sufficient funds to cover your tuition and living expenses during your study.

Tips on preparing for your interview [18]
In addition to visiting the U.S. State Department link above, here are some additional tips on preparing for your interview.

- A consular officer will interview you in English to determine whether you qualify for a student visa. Do not ask them to conduct the interview in another language.
- On average, visa interviews are about three minutes long. Students must be proactive at their visa interview to succeed. Be prepared if they ask you (1) why you want to study in the U.S., (2) why you chose your major and why you chose to study at ASU, (3) what you are excited about, and (4) what you plan to do in the future and/or what ties you have to your home country.
- If asked for proof of funding, some officers look favorably upon students who can show more than the required amount on their I-20 as a way to show they can afford their education and time in the U.S. If funds from extended family members are submitted, be prepared to answer questions about how close you are to your relatives, if you are planning to pay them back, if they are funding your entire education, how much that person is providing you, etc.

For more information, please visit the U.S. Department of State website. [18]

Step 05: Prepare documents for travel
As you get ready to arrive in Arizona, be sure to prepare your documents for travel. Here are some items you should carry with you. It is advisable to keep a copy in your checked luggage and one with your family at home. Make sure you have these original documents available at all times while traveling to and within the U.S.:

- SEVIS Form I-20 or Form DS-2019.
- Valid passport.
- Current visa.
- Copy of immunization records.
- Original supporting financial documents.
- Dependents' I-20 or DS-2019 and passports if your spouse and children will be traveling with you.
- International travel coverage documents, if you purchased this coverage.

Frequently asked questions about student visas

How do I get a student visa?
To get a student visa, you must first apply and be admitted to ASU. Once admitted, you must apply for an I-20 through ASU by uploading the required documentation. Once you receive your SEVIS number from the I-20 created by ASU, you'll apply for your student visa through your country's embassy. The visa process includes some paperwork and an in-person interview with an immigration officer at your local embassy. The embassy then creates the student visa with your passport and will indicate the dates you can arrive in the U.S. for your studies.

What is SEVIS?
SEVIS stands for Student and Exchange Visitor Information System. You must complete a SEVIS form I-20 to get an F-1 student visa or a SEVIS form DS-2019 to get a J-1 student visa.

Can I get a job while in the U.S. as a student?
Yes, you may work as a student, though ASU recommends you work no more than 20 hours per week. Many international students work for ASU, as the university employs more than 10,000 students. You may also work off campus, but if you do, it's important that your employer understands that you are an ASU student and that your education is one of your top priorities.

International first-year student next steps

Congratulations on your admission to ASU

It is our pleasure to welcome you.

We are excited that you have chosen to pursue your degree at Arizona State University.

This is your guide through the important steps you need to take to enroll in classes and prepare for the beginning of your academic year. Here you will find information about the visa application process, preparing for travel, arriving at ASU, registering for classes and much more.

Be sure to check My ASU [1] regularly and complete any pending items under your Priority Tasks. We look forward to seeing you in Arizona soon.

International student tips

Important deadlines

To help you stay on track with the admission and financial aid processes, check out our important deadlines page. [2]

Need help?

ASU admission team members can answer your questions and guide you through each step of the enrollment process between now and the time you get started.

Schedule an appointment [3]

Travel and arrival

ASU is committed to the safe and seamless transition from your home country to the U.S. [4]

International first-year student next steps

Activate your ASURITE User ID

Your ASURITE User ID is the official login name you'll use to access most ASU systems and services. You'll get your ASURITE User ID and activation instructions shortly after you submit your application. A message from computer.accounts@asu.edu with the subject line "ASU Account Activation" will be sent to the email address you provided in your application.

If you can't remember you ASURITE User ID you can look it up at: asu.edu/lostpassword

You'll log in to My ASU [1] with your ASURITE User ID and password to:

- View your priority tasks and next steps for enrollment
- View your advisor contact information
- View financial aid and billing information
- Connect to campus technology and services

How to log in to My ASU:

1. Navigate to my.asu.edu. [1]
2. Enter your ASURITE User ID.
3. Enter your password. (Forgot your password? Visit asu.edu/lostpassword.)
4. Click the "Sign In" button to access your account.

After you enroll in classes, visit asu.edu/emailsignup to activate your official @asu.edu email address. Once activated, you will access and check your official ASU email through your ASU Gmail account.
Be sure to check both your non-ASU personal email address and your ASU Gmail inbox regularly.

Remember to save your admit letter, which is posted to My ASU, so you have it for travel. [1]

Request your I-20 and apply for your visa

International students who wish to pursue their studies at ASU must obtain an F-1 or J-1 visa. To obtain a visa, students must first receive a SEVIS number and I-20 document from ASU.

ASU guides each student through the process of obtaining their I-20 using the I-20 Tracker in My ASU.

More about I-20 [5]

Give your parents or family access to your records and account

Through My ASU Parent Guest Access, you can share your academic records with your parent or guardian and give them access to pay your tuition and bills. Go to My ASU, select the Profile tab at the top and find "Add a Guest" under My ASU Guest Access Permissions.

Visit My ASU [1]

Pay your enrollment deposit (on-campus students only)

Pay your enrollment deposit [6] through My ASU [1] to confirm you will attend. For fall 2026 admits, the enrollment deposit will be available beginning Oct. 1, 2025.

Complete the math placement test

All first-year students are required to take the math placement test at least seven calendar days before their Academic Orientation Session. You will see the item "Take Math Placement Test" under Priority Tasks in My ASU [1], and you will also see this task in ASU's New Student Orientation Experience step 2, Academic Orientation.

Submit your measles, mumps and rubella immunization record (on-campus students only)

All students born after Jan. 1, 1957, are required to meet the following MMR immunization requirement [7] before classes begin. You can upload required documentation in your ASU My Health Portal. [8]

The MMR vaccine is available for a fee at any of ASU's Health Services locations. [9]

Confirm housing and dining options

All ASU first-year students live in the residential college of their academic major. Barrett students live in the Barrett residential community for their first two years. The housing portal for fall 2026 admits opened in early January 2026.

Once the housing portal opens and you've paid your enrollment deposit, you can select your housing and dining preferences. The priority housing deadline is May 15. We cannot guarantee your housing preference if you apply after the priority deadline. Visit ASU's housing portal. [10]

Select housing [11]

Learn about housing options. [12]

If you are a nonresident or international student, your housing plans must be confirmed before you can register for an Academic Orientation Session.

ASU's New Student Orientation Experience

Through ASU's New Student Experience, accessed online in My ASU, you will prepare to take classes in the fall by completing essential next steps for enrollment.

1. Log in to My ASU [1] to view details.
2. Register and complete an **Academic Orientation Session**, where you'll meet with your academic college and finalize your class schedule.

All students must complete the New Student Orientation Experience in order to enroll in classes.

New Student Experience [13]

Health insurance

Health insurance is mandatory for all registered international students and a condition of enrollment, and requires that international students have adequate medical and accident insurance coverage. Mandatory student health insurance is automatically charged for all international students.

Insurance info [14]

Learn about tuition and fees

Tuition charges will be billed to your student account and may be viewed online through My ASU. By registering for classes, you agree to pay all applicable tuition and registration fees. If you decide not to attend, you must completely withdraw from all classes before the semester begins.

If tuition is not paid by the applicable due date, you will automatically be enrolled in the tuition installment plan and charged a nonrefundable enrollment fee.

ASU has partnered with Flywire [15] to offer a streamlined and cost-effective payment method for you to send international payments. Flywire offers favorable exchange rates and a secure portal for processing your payment to ASU. Create a Flywire login to make payments and review your payment activity and history.

Visit the Tuition and Billing [16] website for more information.

Transcripts

Request transcripts from ASU

If you're an ASU student or graduate requesting your transcripts so you can send them to another institution, please see registrar.asu.edu/transcripts.

Sending transcripts to ASU

Request that your official transcript(s) be sent to Admission Services.

Your official transcripts are certified copies from each high school, college, university or technical school you attended that show the courses you took, grades you earned, and certificates or degrees you were awarded. Arizona State University requires you to send transcripts from every institution you attended.

Upon graduation or the completion of the semester, request that your school or schools send a final transcript directly to ASU to determine final university admission status. Official transcripts must be sent directly to Admission Services at ASU from the issuing institution's records office either by mail or electronically through a secured transcript service approved by ASU.

1. Transcripts may not be faxed.
2. Transcripts sent via email may be accepted if sent directly from an authorized school official at the issuing institution to ASU at transcripts@asu.edu. If ASU is unable to verify the sender is from the issuing institution, the emailed transcript will not be accepted as official.
3. Official transcripts delivered by hand will be accepted only if they are sealed in the original envelope provided by the community college or university and bear the university seal and the signature of the registrar of the issuing institution.
4. When possible, please include the student's full name and student number or application number in transcript submissions.
5. Any transcripts submitted by students directly via email are considered unofficial and will not satisfy our official transcript priority task requirement.

Emails sent to transcripts@asu.edu or gradtranscripts@asu.edu must not exceed 25MB total and individual attachments must not exceed 5 MB. Any attachments must be in one of these approved file types.

Microsoft Word (.doc or .docx)
Microsoft Excel (.xls or .xlsx)
Image (.jpg .jpeg .gif .png
Adobe PDF (.pdf)
Text (.txt)

If the file size is exceeded and/or the document type is not supported, the email will be rejected.

Documents not accepted through the transcripts inboxes

NOTE: The transcript inboxes are only for transcripts/mark sheets sent to ASU directly from the sending institution or transcript vendor, English translations of transcripts, degree/graduation certificates, and transcript supporting documentation such as school profiles and degree program curriculum sheets. Please do NOT send the following documents to our transcript email addresses (transcripts@asu.edu or gradtranscripts@asu.edu) as they will not be added to the student record.

1. I-20 documents such as bank statements, financial guarantees or passports.
2. English proficiency scores not sent by the testing service itself.
3. Letters of recommendation.
4. Resumes.

For more information on submitting English proficiency test scores, I-20 or Letters of Recommendation documents, please see the following webpages:

I-20 information:

Student visa information [1]

English proficiency information:

Undergraduate admission:
English proficiency [2]

Graduate admission:
English proficiency [3]

Letters of Recommendation information:

Graduate admission:
Graduate Letters of recommendation [4]

Undergraduate admission:
Not needed unless we specifically ask you for this information.

Resume information:

Graduate admission:
Should be uploaded at the time of application, if required for the program of application. More information [5]

Undergraduate admission:
Not needed as part of the application process.

We will accept transcripts received from the following secured transcript services*:

- Accellion
- Acclaim / Credly
- Advanced Secure Technologies
- Arizona HSE State Tracking and Report System
- Barracuda
- Bluewhale
- Box
- BridgeU
- Cambridge International

- ZIX

* Note: List is subject to change.

For transcripts sent through a secured transcript service, please select Arizona State University from the vendor's dropdown list to ensure the transcript is routed to the correct place. If an email address is requested you can route to transcripts@asu.edu, or for graduate applicants to gradtranscripts@asu.edu. Please note that transcripts sent by students to transcripts@asu.edu or gradtranscripts@asu.edu will not be accepted as official. These addresses are only for transcripts received from secured and approved transcript services.

International transcript/degree certificate

NOTE: The transcript inboxes are only for transcripts/mark sheets sent to ASU directly from the sending institution or transcript vendor, English translations of transcripts, degree/graduation certificates, and transcript supporting documentation such as school profiles and degree program curriculum sheets. Please do NOT send the following documents to our transcript email addresses (transcripts@asu.edu or gradtranscripts@asu.edu) as they will not be added to the student record.

If you are required to submit a degree certificate along with your transcripts, a scan may be made of the front and back of your certificate and emailed to transcripts@asu.edu for undergraduate applicants or gradtranscripts@asu.edu for graduate applicants. Please make sure that ASU is in possession of your official, final degree posted transcript prior to submission of your degree certificate. The original certificate does not need to be mailed.

For more information on country specific comparable degree requirements and transcript/degree certificate information per country, please refer to comparable requirements section on:

- International First-Year Apply webpage [6]
- International Transfer Apply webpage [7]
- International Graduate Apply webpage [8]

Important: If you email a copy of your degree certificate, please email only the degree certificate. Do not include copies of transcripts. Transcripts will not be accepted as official if sent by you and will delay processing of your degree certificate.

The mailto:transcripts@asu.edu and gradtranscripts@asu.edu email addresses are for receipt of transcripts from vendors and institutions and copies of degree certificates from students. This inbox does not respond to general questions. Questions should be routed to your admission representative. [9]

High school transcripts from the United States

Official transcripts must be sent directly to Admission Services at ASU from the issuing institution's records office either by mail or electronically. Domestic high school transcripts delivered by hand will be accepted only if they are sealed in the original envelope provided by the high school. High school transcripts must show courses, grades, GPA and date of graduation. Sealed official high school transcripts can be sent in the mail or dropped off at the Admission Services customer service counter on the first floor in the Student Services Building [10], Suite 150, Window #5, on the Tempe campus.

Community college or university transcripts from the United States

An official college transcript must be in a sealed envelope sent directly from the issuing institution's records office either by mail or electronically. Transcripts delivered by hand will be accepted only if they are sealed in the original envelope provided by the community college or university.

International transcripts and exam results

Graduate applicants: Official, original or authenticated transcripts from every college or university from which you earned a comparable credential to a U.S. bachelor's degree or higher must be sent to ASU in the original language and accompanied by an English translation (if the original document was not issued in English).

Undergraduate applicants: Official, original or authenticated transcripts and exam results from every secondary or higher-secondary school (grades 9-12) and transcripts from any college or university attended must be sent to ASU in the original language and accompanied by an English translation (if the original document was not issued in English).

Request transcripts from each international educational institution you attended and exam boards from which you have official results. Official transcripts must be mailed or sent directly from the issuing institution's records office electronically, and must include a certified English translation of all documents not issued in English. ASU will accept transcripts sent as email attachments if the email can be verified as coming from an authorized school official at the sending institution.

If your school(s) cannot send them directly to ASU, you may send them yourself, making sure they meet one of the following requirements:

- Original academic credentials issued by the registrar of the institution attended, bearing the original raised or colored seal of the institution and the signature of the institution's registrar, academic official or recognized international organization.
- Photocopies of academic credentials that have been verified as true copies of the original by a responsible official of the institution attended or by an education representative of the country's government or embassy. Each page must bear the verifying official's signature and stamp.
- Photocopies of academic credentials that have been certified by a recognized international educational organization, such as EducationUSA, the U.S. Educational Foundation, AMIDEAST or the Institute for International Education.
- Photocopies of an international high school academic credential that has been verified as official by a recognized U.S. high school.

ASU recommends that you have your international transcripts sent to ASU directly from the issuing institution, utilize a secured transcript service (where available) or obtain an attested copy of the transcript (where possible). Sending your only original copy to ASU should be the last option.

- We recommend students sending documents from abroad use FedEx or DHL in order to obtain a tracking number. If possible, include your ASU student ID number and name written on each page of the transcript(s) you send.
- Any document ASU receives becomes property of ASU and will not be returned to you, unless it is a situation where another copy cannot be obtained.
- Photocopies certified by a notary public are not official and will not be accepted. Scanned copies are also not accepted in lieu of original official academic documents.

Where to send transcripts

Regular Mail
Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe AZ 85287-1004

FedEx, DHL (any sender who will not send to a P.O. Box)
Arizona State University
Admission Services Applicant Processing
1150 East University Drive Building C, Room 226
Tempe, AZ 85281

International documentation and translation

Transcripts and degree certificates not issued in English require submission of an English translation in addition to the original language documents.

Translations must be literal, complete versions of the originals and must be translated by one of the following:

- Issuing university or college.
- Official translation services. Need assistance locating a translation service? Visit American Translators Association [11] to search for a translator for your target language.
- Ministry of Education, consulate or embassy.
- Education USA (EdUSA) [12], AMIDEAST [13], or U.S. Indian Education Foundation (USIEF) [14].

The translation does not take the place of submitting official academic records in the original language. The translation is in addition to the official academic record. Translations may not be completed by the student. Translations certified by a notary public are not acceptable.

You may not complete your own translation. Please have the translation service mail the official translation to ASU. Translations may also be emailed to transcripts@asu.edu by the translation service.

Note: Some third party evaluation agencies are also members of American Translators Association and provide both translation and credential evaluation services. If using a third party evaluation agency for translation services, be sure you are requesting a literal translation. A literal translation is an exact translation of the document (including notation of seals, signatures, etc). Credential Evaluation reports will have grade and credit conversions and interpretation of the document and are not literal translations.

Instructions for requesting original international transcript return (only in cases where another copy is unobtainable)

To request a return of your original documents (only in cases where another copy is unobtainable) use the eShipGlobal service to have your document(s) express mailed to you through FedEx, DHL or UPS at your own expense. To do so, visit https://study.eshipglobal.com (do not visit FedEx, DHL or UPS websites directly). You will be required to create a user name and password to set up an eShipGlobal account. To request shipment, you will need your ASU ID number, mailing address, email address, phone number and payment information.

After creating your eShipGlobal account, follow the steps below to create your shipping label.

1. Get started: Click on the “Get started” link on the homepage and select “Receive documents from university.”
2. Choose university: Proceed to the university selection and choose Arizona State University-All Locations. You will see two options. One for International Students and Scholars Center and one for Admission Services. Be sure to select Admission Services or your request will not be fulfilled.
3. Confirm address: The next page asks you to enter your shipping details. There will be a drop down on this page for type of document. Select “Documents/transcripts.”
4. Select carrier: You will see a list of carriers that deliver to your area and the cost for delivery. Select the carrier and option you prefer.
5. Confirm payment: You will see a page requesting your payment information. The payment options for your country will be listed. Options may include one or more of the following: credit/debit, wire transfer or PayPal.

If you have questions about how to use this service, review the Help section of the eShipGlobal website or email support@eshipglobal.com.

Once you have requested the shipment, please allow up to one month for return of your documents. Admission Services will review your request and if the request can be fulfilled you will receive an email from eShipGlobal to track your return.

If a request for return is not made within 60 days of receipt of your documents, we cannot guarantee that we will still have the documents to return. We regularly purge all physical documents after scanning. Email transcriptreturn@asu.edu with questions.

Applicants with credentials from India

If you have secondary or postsecondary study from India, you should have your credentials verified through Truecopy and Truecopy will send to ASU electronically through Parchment.

You can begin your order at https://www.electronictranscripts.com/about-us.php#etquery

Applicants with credentials from China — required documents

Secondary education（中学在校生或毕业生)

Junior secondary (初中生)

1. Official transcript for grade 9 (初三成绩单) sent directly to ASU from issuing institution.

General senior secondary (普通高中生)

1. Official transcript (高中成绩单) sent directly to ASU from issuing institution.
2. Official verification report (认证报告) from CHSI* (学信网) for:
3. Secondary school graduation certificate (高中毕业证书)

   You can begin your order at https://www.chsi.com.cn/en/help/howtoapply_p_en.jsp. Your order will be sent electronically to ASU through Parchment.
4. Graduation certificate (高中毕业证书) (photddocopy or scan sent to transcripts@asu.edu). Vocational secondary (中职/中专生)
5. Official transcript (高中成绩单) sent directly to ASU from issuing institution.
6. Graduation certificate (毕业证书) (photocopy or scan sent to transcripts@asu.edu).

*CHSI: China Higher Education Student Information website is maintained by the Center for Student Services and Development (CSSD), Ministry of Education, P.R. China, CHSI is the only MOE-designed website for qualification verifications.

Post-secondary (university) programs (大学生或研究生) — complete and incomplete

Zhuanke (专科) required document

1. Official verification report
2. CHSI* verification for zhuanke graduation certificate (学信网：学历在线验证报告或学历认证报告)
3. CHSI* verification for zhuanke official transcript (学信网：成绩验证报告)

Frequently asked questions

How do I submit my transcripts to ASU?
You must request official transcripts from each educational institution attended. Official transcripts must be mailed or sent electronically directly to Online Applications by the records office of the issuing institution(s). ASU does not accept transcripts transmitted by fax.

Please have your transcripts sent to:

Regular Mail (USPS)
Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe AZ 85287-1004

FedEx, DHL, etc.
Arizona State University
Admission Services Applicant Processing
1150 East University Drive Building C, Room 226
Tempe, AZ 85281

Why do I need to turn in my high school transcript?
We need your high school transcript in order to verify your credits fulfill ASU's competency requirements for admission.

Will my transfer credits be accepted?
In general, transfer credit is awarded for courses meeting all of the following requirements: Grade earned is a “C” or better (on a scale of 4.00). Completed at a regionally accredited postsecondary institution in the United States. Course is considered to be college-level (not remedial) and is not highly technical/vocational. A maximum of 64 community college credits may be transferred to ASU.

Do you have international credits? https://students.asu.edu/international/future/undergrad

There isn’t an expiration date for transfer credits that meet the eligibility requirements, although some courses (e.g., Computers and Economics) may need to be retaken depending on their relevancy to today’s courses.

Certain types of credit cannot be transferred to ASU, including credit awarded by postsecondary institutions for life experience, workshops and seminars. Also, military SMART transcripts and experiences are not transferable.

Your enrollment counselor will tell you exactly how your transfer credits fit into your degree program.

When will I receive an admissions decision?
Once your application file is complete, we will process it with the highest priority, and you should expect an admission decision within a few weeks. To see if you have any missing items and to view your admission status, sign in to My ASU using your ASURITE UserID, which is sent to you after you apply for admission.

How do I complete my application?
An admission application file is complete once ASU receives all of your required transcripts. If you haven't completed an Associate of Arts degree, have your official high school transcript sent as well. Please have your transcripts sent to:

Regular Mail (USPS)
Admission Services Applicant Processing
Arizona State University
PO Box 871004
Tempe AZ 85287-1004

FedEx, DHL, etc.
Arizona State University
Admission Services Applicant Processing
1150 East University Drive Building C, Room 226
Tempe, AZ 85281

Military and veterans at ASU

Why so many veteran and military students choose ASU

ASU and the Pat Tillman Veterans Center [1] welcome you to your next adventure — accomplishing your education and career goals. Student veterans and active-duty service members are a valuable part of the ASU community and our academic environment. Whether you're planning to earn your degree online or on campus, you can:

- Continue serving as a leader by getting involved.
- Take advantage of job and career opportunities.
- Attend virtual or in-person career fairs.
- Earn your service honor stole to wear at graduation.

You've already proven you can succeed in one world-class organization. We believe in you and know you can succeed here as well. ASU's Pat Tillman Veterans Center team is here to help you every step of the way. It's why ASU is consistently included among the best schools for veterans and military students.

Benefits

You've earned your military benefits, but navigating the paperwork can be tricky. We're here to help.

Check out these steps for getting your benefits started. [2]

For additional assistance, contact ASU's veteran and military admission specialist.

Contact us [3]

Pat Tillman Veterans Center

ASU's Pat Tillman Veterans Center is one of the reasons ASU is a top university for veteran, military and dependent students. The center's mission is to empower and engage our ASU military and veteran community with their academic and personal success at ASU and beyond.

Pat Tillman Veterans Center [1]

Campuses and ASU Online

ASU lets you choose the best learning environment for you. We offer four metro Phoenix area campuses. You can also study remotely with ASU Online, which offers the same degrees and professors as our on-campus programs.

Find your fit [4]

Not sure if you're ready for higher education?

Take our "Is College Right For Me?" survey. The veterans center has partnered with PreVeteran to create a survey our community can use to navigate common thoughts experienced when considering higher education after the military.

Start survey [5]

Are you looking for a veteran application to ASU?

We make it easy — there's no separate application for veteran and military applicants. Just submit the application for your student level.

First-year [6]
Transfer [7]
Graduate [8]

Connect with a veteran and military admission specialist in the Pat Tillman Veterans Center if you have any questions about applying to ASU. [9]

LIA 294: Student Success for Veterans

Have you registered for ASU's veteran-specific introductory course? Designed for the student veteran, LIA 294: Student Success for Veterans provides you with support systems, academic resources and transitional aid. Meet other student veterans and learn about how ASU, the state of Arizona and the VA can assist you throughout your college experience. There are only 19 seats per class on each campus, so secure your spot today.

> "If you are a veteran in need of an orientation class, then you have no business taking the regular ASU orientation course. Do yourself a favor and take LIA 294; it will put you at a running start for successful and expedient graduation."
>
> Kenny Chiaghana, Marine Corps, philosophy major

At ASU, you'll join

15,315
ASU military and veteran students (enrolled in person and online)

19,335
in bachelor's degree programs

4,209
in graduate degree programs

8,229
military spouses and dependents enrolled

(Source: ASU enrollment report, April 2026)

No. 2

ASU is the 2nd highest public university enrollment for students using the GI Bill®

(Source: Integrated Postsecondary Education Data System, https://www.va.gov/education/gi-bill-comparison-tool/)

Graduate applicants:
Graduate Admission Services
Arizona State University
PO Box 871004
Tempe, AZ 85287-1004

ASU accepts the following military transcripts for transfer credit:

Air Force and Space Force members

Enlisted members
The Community College of the Air Force is a regionally accredited community college. If you received credit for courses taken through the CCAF while in active service, submit this transcript as part of your application. You can request to have your official CCAF transcript sent to ASU from the Community College of the Air Force transcripts page [10]. CCAF now offers electronic transcript delivery through Parchment, a digital credentialing service. Students can create an account on Parchment to send transcripts [11].

Officers
Officer transcripts are maintained by Air University. First-time users must create an account by accessing the AU Service Desk [12]. This works better on non-NIPR and Google Chrome. On the homepage under the Quick Links tab, select Official Transcript Request. Complete the required components of the form, add the attachments and submit. The Service Desk can be accessed by any device that has internet access; it is Common Access Card (CAC) enabled, but this is not required. The AU Service Desk is a secure application and certified for submission of Privacy Act information.

Army, Marine Corps, Navy and Coast Guard members

- The Joint Services Transcript has replaced the Coast Guard Institute Transcript, the Army/American Council on Education Registry Transcript System, and the Sailor/Marine American Council on Education Registry Transcript.
- All enlisted members, officers and warrant officers, both active and veterans from all Army components, Coast Guard, Marine Corps and Navy, are eligible for a JST. You do not have to be on active duty to access the JST website and your transcript. Active duty, reserve, veterans or National Guard personnel can use JSTs.
- Some students may have concerns about a security warning when accessing the website. This happens when a user logs in to a Department of Defense network from a non-networked computer without a CAC. You can confirm

the security exception to proceed to the JST request site. If you do not confirm this exception, you will be unable to place your order.

- Register [13] for a JST account, and direct the DoD to send your transcript to ASU.

"ASU is measured not by whom it excludes, but by whom it includes and how they succeed."
- Excerpt from ASU's Charter

Honoring our veteran community

Arizona State University is proud of our veteran and active-duty student population, and thankful for all they have done for our country.

Celebrating military veterans and their service to our country: Arizona State University (ASU) [14] on Youtube.

Pat Tillman's life and legacy live on at ASU

Pat Tillman was an ASU student scholar and star football player who graduated in 3½ years and went on to play professionally with the Arizona Cardinals. In 2002, Pat walked away from a $3.6 million contract with the Cardinals to enlist in the U.S. Army. He died while serving in Afghanistan in 2004.

As a scholar, athlete and soldier, Pat Tillman performed at his best. ASU continues to honor Pat with the annual Pat's Run, the Pat Tillman Veterans Center, Tillman Tunnel and in countless other ways. His passion for life and expectations of excellence reverberate through everything we do.

Pat Tillman: the ASU student behind the legacy [14] on Youtube.

Frequently asked questions about being a veteran at ASU

What's it like to be a veteran or military student at ASU?
There are more than 20,000 veterans and military students on campus and online. You'll receive support from the Pat Tillman Veterans Center, the VA VetSuccess on Campus counselor, and ASU's faculty and staff to succeed in your goals — from applying to ASU, getting your benefits set up, making sure you are using your benefits to your best advantage, and getting connected to events and opportunities for veterans and military students.

Is ASU a military friendly school?
ASU is consistently recognized as one of the best schools in the country, both on campus and online, for veterans and the military community. We want veteran and military students and their families to succeed, achieve their goals and move on to the next chapter in their lives, and we're here to help you get there.

What are the steps to getting admitted as a student veteran?
We understand the admission process can be complicated, so we've created a checklist to help guide you through it. Start your application [15] and refer to this checklist [16] throughout the admission process for helpful tips about applying and succeeding as an active duty, veteran or military-affiliated student at ASU.

Are there any degree programs just for veterans or military students?
ASU does not offer exclusive degree programs for veteran or military students. However, we encourage you to take advantage of two courses specifically designed to connect you with other veteran and military students on campus and online, and introduce you to various resources available through the university, the state of Arizona and the Department of Veteran Affairs.

Connect with a PTVC team member to receive additional assistance. [1]

Admission and enrollment guidance for benefit users

The Pat Tillman Veterans Center is here to assist you in checking off your to-do list prior to attending Arizona State University. Your next steps are provided below to help you prepare for your enrollment, but we acknowledge that each students' experience and requirements differ. If you have any questions as you review these tasks, PTVC is here to help.

Steps to ASU enrollment

Prior to admission

Step 01: Apply or update my VA benefits
It takes approximately one to two months for benefits to be approved. Start the process early to ensure a smooth transition to the university.

Start VA benefit forms [2]

If you need to update the location of your VA benefits
Please complete the appropriate VA Request for Change of Program or Place of Training form. Submit this form to the VA as indicated in the form directions.

Submit to the Pat Tillman Veterans Center your VA Certificate of Eligibility or most recent letter from the VA that details your remaining benefits. You will receive your COE via mail from the VA or you can obtain a copy through VA/DoD eBenefits. Once received, please submit to the Pat Tillman Veterans Center via the options below:

- Scan and email the form to PTVCforms@asu.edu.
- Fax the form to the Pat Tillman Veterans Center at 480-522-3058.
- Take the form to any Pat Tillman Veterans Center location. [3]

After admission to ASU

Step 04: Receive academic advising and register for classes
Incoming students are required to meet with an academic advisor to enroll in classes. [4]

Classes to consider
ASU offers a veteran-specific introductory course to support veterans' transition to academic life. Both first-year and transfer student veterans from any major are welcome to register.

Learn more [5]
What is full time status? [6]

Step 05: Complete ASU’s documents for VA benefits processing
Processing times vary. See PTVC/VA Benefits Flowchart. [7]

PTVC documents
VA Benefits Responsibility form
This form contains important information regarding the use of VA benefits throughout your school enrollment. Complete the online form — it will submit directly to the Pat Tillman Veterans Center. You will receive a confirmation email indicating you have submitted the form. If you will be using VA benefits, please allow two days for processing. Look for next steps via your MyASU page once you are enrolled in classes.

VA Benefits Responsibility form [8]

Prior to your first semester at ASU, fill out this form if you intend to use VA education benefits. The form provides important information about your particular benefit program. Your completed form will submit directly to the Pat Tillman Veterans Center, and you’ll receive an email confirmation.

VA Enrollment Activity form
This form notifies the Pat Tillman Veterans Center of your intent to use (or not use) your VA education benefits for the semester’s enrollment. Submit this form each semester after finalizing your schedule. Additionally, you can revise your EAF to tell us about classes you or your college may have added since your original submission. Once completed, the form will submit directly to PTVC, and a confirmation will be sent to your ASU email address.

Enrollment activity form [9]

Prior Credit Evaluation form
Submit this form following your acceptance to ASU to ensure that all your prior course credit and/or previous experience is evaluated for potential transfer credit. Follow the directions on the form and work with your academic advisor to complete and submit it to the Pat Tillman Veterans Center.

Prior Credit Evaluation form [10]

Step 05: Register for LIA 294 or another first year success course
LIA 294: Student Success for Veterans is designed for the student veteran, and provides you with support systems, academic resources and transitional aid. Meet other student veterans and learn about how ASU, the state of Arizona, and the VA can assist you throughout your college experience. Speak with your academic advisor to see if this class or another first year success course would benefit you. Find their contact information in MyASU. [11]

Step 06: Register for a Veterans and Dependents Welcome event
The Veterans and dependents Welcome event is a seminar-style orientation. It is expected that all incoming graduate and undergraduate student veterans and dependents attend the welcome event prior to their first semester at ASU. Hosted by ASU and the Pat Tillman Veterans Center, the Veterans and Dependents Welcome event introduces you to valuable benefits information and procedures that will apply each semester that you use your benefits. Spouses and dependent students do not need to attend this event.

If you are a new student, you will receive notifications by mail and email prior to the event so you can RSVP and plan to attend. Events are scheduled before both fall and spring semesters. Refreshments are provided and space is limited, so we request that you don’t bring guests. We look forward to seeing you there.

Register for welcome event [12]

Step 07: Complete your next steps for enrollment to the university
Select your student status to review your enrollment steps.

First-year [13]
Transfer [14]
Graduate [15]
Online [16]

Admitted veteran student next steps

Welcome to Arizona State University

You've already learned how to succeed in a world-class organization, and you're moving on to another one: ASU. We're glad you're joining us.

Student veterans and military-connected family members are a valuable part of the ASU community and our academic environment. We encourage you to continue serving as a leader and stay connected through student clubs and organizations, virtual career fairs, research positions, and other internship and career opportunities, whether you're an online or on-campus student.

First day of classes

On-campus students enrolling for fall 2026
Classes begin Aug. 20, 2026

Academic calendar [1]

A veteran admissions representative is here to help
Connect with a veteran admissions representative to receive additional assistance with veteran-specific items.

asuveterans@asu.edu | 480-965-5078

Schedule an appointment [2]

On-campus student next steps

Research and request your benefits

If you will be using VA benefits, such as the GI Bill®, this is the time to ensure that you have applied to use those benefits at ASU. If you will be using Tuition Assistance, make sure to reach out to your Education Service Officer to get the necessary paperwork completed.

Get started [3]

Pay your enrollment deposit

An enrollment deposit is a payment that secures your spot at the university and lets us know you plan to attend. Once your deposit is submitted, you can continue with important enrollment steps such as confirming your housing and attending an Academic Orientation Session where you'll register for classes.

Pay deposit [4]

First-year and transfer students, attend your Academic Orientation Session — this is where you'll enroll classes.

Complete your orientation in three easy steps. Start with Sun Devil Ready, ASU's online orientation experience, then attend your Virtual Academic Orientation Session to meet your academic college and register for classes. Finally, join ASU Welcome events to connect with other students, explore campus resources and kick off your Sun Devil experience.

New student orientation [5]

If you're a graduate student, connect with your academic advisor and register for classes

Schedule an appointment with your academic advisor before registering for your courses. They will help ensure you take courses that fit into your degree plan and keep you on track toward graduation.

Connect to MyASU [6]

If using VA benefits, complete ASU's documentation for processing.

Necessary forms will populate as tasks on My ASU. Be sure to first complete the VA Benefits Responsibility Form to start the initial benefits process. You can submit other necessary forms to ptvcforms@asu.edu.

Check your residency status

Most veterans and military members are eligible for in-state residency for tuition purposes. You can check our Residency Navigator for more information. [7]

Learn more [8]

Connect with the Pat Tillman Veterans Center

All ASU students can connect with the PTVC for advocacy support, to find student resources and for any questions you might have regarding your education.

Visit the PTVS site [9]

Online student next steps

Research and request your benefits

If you will be using VA benefits, such as the GI Bill®, this is the time to ensure that you have applied to use those benefits at ASU. If you will be using Tuition Assistance, make sure to reach out to your Education Service Officer to get the necessary paperwork completed.

Nondegree and visiting student admission

Nondegree student requirements

Some individuals may be interested in studying in a nondegree status, either through precollege summer programs or for their own personal learning experience. A nondegree student is one who has not attended ASU as a degree-seeking student, has not earned a bachelor's degree, is not attending full time and is not currently applying to a degree program.

If you are a visiting university student interested in taking classes, see this information on how to apply and enroll in classes. [1]

- Once admitted to a degree program, a student is not permitted to register in a nondegree status.
- Nondegree students can enroll in eight credit hours for each fall, spring, and summer semester, with a maximum limit of 24 credit hours over the course of the academic year.
- Nondegree students may apply up to 15 hours taken in nondegree status to a degree program if they choose to pursue an undergraduate degree in the future.
- Nondegree students are not eligible for financial aid.
- Nondegree students may not be eligible for academic advising.
- VA education benefits are often not applicable to nondegree-seeking students.

Exceptions to these guidelines may be made for specific programs or partners with approval from the provost’s office.

Nondegree requirements

To be eligible to take classes at ASU as a nondegree student, you must either be a high school graduate or currently enrolled in high school.

If you are currently enrolled in high school or are under the age of 18, you may be eligible to take classes as a nondegree student. Before enrolling, ensure you are academically prepared for any college-level course, as these courses and grades will become part of your permanent academic record. It may be advisable to speak with your high school counselor prior to enrollment.

Apply now [2]

Application procedures

1. Complete an undergraduate admission application.
2. Submit the nonrefundable application fee.
   Arizona residents – $50
   Nonresidents – $80
   ASU Online – $70
   International – $85
3. If needed, have your transcripts sent directly to ASU.

   ASU will review your application for admission once all materials are on file. To see if your file is complete, sign in to My ASU using your ASURITE User ID provided to you after you submit your application.

   You may need to submit a transcript if you are trying to enroll in a course that has prerequisites.

   Sending transcripts to ASU [3]

   See undergraduate admission contact information and office locations. [4]

Frequently asked questions about nondegree student requirements

Can I apply to ASU as a nondegree-seeking student?
Yes, ASU accepts nondegree-seeking students. To be eligible to take classes as a nondegree-seeking student [5] you must meet certain requirements and follow certain guidelines. See if you qualify to be a nondegree-seeking student.

Can I get financial aid as a nondegree-seeking student?
Nondegree-seeking students are not eligible for financial aid.

Visiting university students

Arizona State University welcomes visiting university students and is proud to provide students enrolled in other colleges and universities with opportunities to stay on track academically and advance toward your goals.

Apply as a visiting student [1]

If you are a current high school student, you can earn university credit.

We're embedding the university experience in high school [2] to give students an accelerated path toward university admission and careers of the future. Our concurrent courses offer the opportunity to earn both high school and university credit toward a major.

Courses for visiting university students

As a national leader in online and remote learning, ASU's robust catalog of classes is available wherever you are. ASU has the class you need to get back on track or get ahead on progress toward your degree.

Humanities courses [3] Literature, history, film studies, Shakespeare and more offered online (self-paced) or through live, digital classes.	**Science courses [4]** Geography, marine biology, software engineering and more offered online (self-paced) or through live, digital classes.	**Art and design courses [5]** Architecture, art history, animation, dance and more offered online (self-paced) or through live, digital classes.
Social sciences courses [6] Criminal justice, forensic anthropology, counseling and more offered online (self-paced) or through live, digital classes.	**Health courses [7]** Biostatistics, health care management, psychopharmacology and more offered online (self-paced) or through live, digital classes.	**Business courses [8]** Accounting, data analytics, information systems and more offered online (self-paced) or through live, digital classes.

Engineering courses [9]

Aviation, civil engineering, computer science, digital design and more offered online (self-paced) or through live, digital classes.

Search for courses [10]

Browse the Class Search tool for classes available for visiting university students, including courses offered in person and via ASU Sync, as well as fully online iCourses and classes offered through ASU Online.

Steps to become a visiting university student at ASU

Step 01: Find a course you want to take. [10]
Search the entire catalog of ASU classes — find those available to help you catch up, stay on track or accelerate your degree.

Step 02: Submit your application. [1]
Our Visiting University Student application is streamlined, taking only 10 to 15 minutes to complete. Decisions are made within 24 to 48 hours.

Step 03: Submit the nonrefundable application fee.
Arizona residents: $50
Domestic nonresidents: $80
ASU Online: $70
International nonresidents: $85

You can pay for the ASU application fee using a credit card (Visa or MasterCard) or eCheck at the time you submit your transfer application or when you log in to My ASU. [11]

Step 04: Activate your account [12]
Check your non-ASU personal email for ASURITE User ID credentials to activate My ASU.

If you previously applied to ASU, use your existing ASURITE user ID and password to access My ASU. [11]

Step 05: Register [13] for classes and pay your bill [14]**.**
Though financial aid is not available for visiting university students, affordable tuition rates have been set to support students interested in advancing their degree through ASU credits.

We recommend checking the course number and name with your home institution advisor before you register to make sure it transfers back to your home institution.

Tuition for visiting university students is set at ASU Online tuition rates [15] regardless of course modality.

Use the ASU Online cost calculator [15], select your residence, and select Undergraduate (Nondegree) as your student status to see your tuition and fee breakdown.

Step 06: Take the class.
Your admission to ASU with nondegree-seeking status permits you to register for up to eight credit hours per semester. You may apply a maximum of 15 credit hours toward a degree at ASU. Nondegree-seeking students are not eligible for financial aid. For more information, visit this page. [16]

Step 07: Order your ASU transcript. [17]
Use this official document to submit to your home institution and apply toward your degree.

Visiting university student frequently asked questions

Are all classes taught online?
Visiting University students may apply to enroll at any ASU campus and in any course modality.

What is an ASU Online class?
ASU Online courses are part of our industry-leading online education platform and most are delivered asynchronously, meaning they do not have specific dates and times that the class meets. These classes are listed in ASU's course search as "ASU Online Classes".

What is an iCourse?
iCourses are online classes and may be offered asynchronously or they may be taught in live, digital sessions, or other synchronous methods. If an iCourse has a day and time listed, you will meet remotely during that time. If there is no specific time listed, this means that the class is asynchronous, meaning they do not have specific dates and times that the class meets. These classes are listed in ASU's course search as "In-Person & iCourses".

What is ASU Sync?
ASU Sync allows any student to attend a live-taught, on-campus class via Zoom during it's regularly scheduled day and time. These classes include a live lecture or class presentation by a faculty member alongside other virtual learners in Zoom and students in the classroom.

How much does a class cost?
Tuition for visiting university students is based on the campus and modality in which they enroll. Tuition and fees vary depending on your program location and course format.

To estimate your costs, use the ASU tuition estimator and select the location, residency status and student type that best match your enrollment plans. [18]

When do classes start?
ASU classes begin six times a year. ASU regularly offers classes in the fall, spring and summer terms. Follow this link to review the start dates for upcoming terms: https://students.asu.edu/academic-calendar

Is there a credit limit that visiting university students can take?
Nondegree students can enroll in eight credit hours for each fall, spring, and summer semester, with a maximum limit of 24 credit hours over the course of the academic year.

Can students who already have a bachelor's degree take undergraduate or graduate classes as a visiting university student?
While we do not have a visiting university student application for those with a bachelor's degree already completed, students who already have a bachelor's degree and are looking to enroll in courses at the undergraduate or graduate level are welcome to apply as a graduate nondegree-seeking applicant. [19]

Who is eligible to be a visiting university student?
If you are an undergraduate student in good academic standing at any community college, college or university, you are eligible to take courses for credit with ASU as a visiting university student.

How long does it take to apply and get accepted?
We have worked to make the application process as simple as possible. The application takes 10-15 minutes to complete. You'll have an answer on your application within 48 hours.

Do all classes transfer back to my home college or university?
Most of ASU's courses do transfer and count toward your degree at your home institution. However, we strongly encourage you to speak with your advisor at your home institution to ensure that the ASU class or classes you are taking will transfer back to your home institution. Ultimately, it is up to your home school to determine if ASU classes count toward your degree.

Undergraduate readmission

Quick re-entry

If you are an undergraduate degree-seeking student who previously attended ASU but who has not been enrolled at ASU for up to seven consecutive fall or spring semesters, you may be eligible to return through Quick Re-entry.* You do not need to submit a new application or application fee. You may sign in to My ASU and register for classes. You may have a hold or Priority Task that you need to complete before you are able to register for classes. Your catalog year upon re-entry will be determined via current policy.

International students are still responsible for all SEVIS requirements and should check with the International Students and Scholars Center at ASU.

If your absence is due to military deployment, service on an official church mission or with a foreign aid service of the federal government, or a permanent disability, you should submit a Leave of Absence. [1]

You must submit official transcript(s) from all institutions you attended during your absence from ASU. Official transcripts must be mailed or sent electronically directly to Admission Services by the records office of the issuing institutions. Please

check the contact page for the mailing address [2]. ASU does not accept transcripts sent or carried by hand by applicants themselves or transmitted by fax.

International students (F1/J1 visa) eligible for quick re-entry should contact ASU's International Students and Scholars Center at ISSC@asu.edu to submit documentation for issuance of an I-20 for visa purposes. Visit issc.asu.edu.

*If you have completed an ASU bachelor's degree program and are seeking to pursue another program or were academically disqualified, you are not eligible for quick re-entry.

Readmission requirements

If you are not eligible for Quick Re-entry you must apply for readmission and submit applicable fees. An applicant for readmission must have an ASU GPA of 2.00 or higher, depending on the ASU school or college and must have left on good academic standing. Students who do not meet this GPA and academic standing requirement may appeal. In these cases, the completed application for readmission may be subject to a due date that is earlier than the application deadline.

If a readmission appeal is required, please note that the decisions may take 4-6 weeks.

Note: You must submit official transcripts from all institutions you attended during your absence from ASU. Official transcripts must be mailed or sent electronically directly to Admission Services by the records office of the issuing institutions. ASU does not accept transcripts sent or carried by hand by applicants themselves or transmitted by fax. Please visit our contact page for the mailing address. [2]

Priority readmission application deadlines

Fall semester

The priority readmission application deadline for fall semester is June 1. Readmission applications received after June 1 will be considered on a space-available basis. Space is limited in some programs and admission to these programs is more competitive.

Spring semester

The priority readmission application deadline for spring semester is Dec. 1. Readmission applications received after Dec. 1 will be considered on a space-available basis. Space is limited in some programs and admission to these programs is more competitive.

Summer sessions

The priority readmission application deadline is May 1.

What needs to be submitted by the deadline?
You must submit the application for undergraduate admission, along with the application fee, by the deadline specified for each semester. In order to expedite the evaluation of your application, also submit official transcripts, test scores and supporting credentials immediately.

I was previously admitted to ASU but did not attend. Am I a readmission student?
If you have previously been admitted to ASU but did not attend, you will be considered a first-year student or a transfer student.

Steps to apply for readmission

Step 01: Complete the undergraduate admission application.
ASU accepts online applications only.

Apply now [3]

Step 02: Submit the nonrefundable application fee.
Arizona residents: $50
Nonresidents: $80
International: $85

If you're applying to an ASU Online degree program, a nonrefundable application fee of $70 will be charged regardless of residency classification.

Step 03: Request that your official transcripts be sent directly from your school(s) to Admission Services.
Upon completion of the semester, request that a final transcript be sent directly to ASU to determine final admission status. If you do not meet readmission requirements for your selected major, you must submit complete transcripts before an admission decision is made. Submit transcripts only from institutions other than ASU.

Note: Receipt of your final transcript impacts financial aid disbursement and eligibility to register for future classes.

Find out more about transferring credits to ASU. [4]

Veterans exception

By Arizona statute, no failing grades received by a veteran at an Arizona university or community college before military service may be considered when determining admissibility. This exception applies only to veterans who fulfill these three criteria:

- Are honorably discharged.
- Have served in the armed forces of the United States for a minimum of two years.
- Have previously enrolled at a university or community college in Arizona.

Military service records must be submitted, including form DD 214.

Disqualification

If you have been academically disqualified from ASU, you will need to wait for at least one fall or spring semester to pass immediately following your disqualification before applying for readmission. Some ASU colleges or schools may require you to wait for a longer period. Contact the college or school of your desired major for more information. [5]

Academic renewal

Academic renewal guidelines

Academic renewal is a university policy administered to recalculate the cumulative ASU GPA of an undergraduate student who:

- Is pursuing his/her first undergraduate degree and has not previously received an academic renewal; and
- Has a cumulative ASU GPA below 2.0; and
- Is readmitted to a degree program after an absence of at least five consecutive years.

ASU Courses completed before the five-year absence with a grade "C" or better are accepted in the same manner as transfer credit. This will apply to the maximum number of community college transfer credits allowed by the program, as specified by SSM 401-01. [6]

Graduation requirements for resident credit hours and GPA must be fulfilled after the academic renewal. Graduation requirements for academic recognition (resident credit hours and GPA) must also be fulfilled after the academic renewal.

Courses completed before and after the academic renewal remain on the transcript and may be considered when students apply for undergraduate professional or graduate programs.

Procedure:

The student must:

- Print the Application for Academic Renewal form [7] from the web, or request it from the college of the student's major; and
- Submit the form to the dean’s office in the college offering the student’s major before the last day of the third semester after readmission.

The dean's office of the college of the student's major:

- Specifies a minimum of 12 semester hours the student is required to earn with a minimum cumulative GPA of 2.5 and no grade lower than a "C," to be completed within three semesters after reentry.

Upon completion of the requirements by the student, the dean's office:

- Forwards the approved Application for Academic Renewal to the Course Catalog and Curriculum Maintenance section of University Registrar Services.

Course Catalog and Curriculum Maintenance section of University Registrar Services:

- Processes the academic renewal and adjusts the student's credit hours and GPA; and
- Sends an unofficial transcript showing the processed academic renewal to the student.

Undergraduate readmission contact information and office locations

Frequently asked questions about readmission

Am I eligible for Quick Re-entry?
If you’re an undergraduate degree-seeking student who has attended ASU before but have not been enrolled for up to seven consecutive fall or spring semesters, you are eligible for Quick Re-entry. If you haven’t been enrolled at ASU for eight or more semesters, you are not eligible for Quick Re-entry and must apply for readmission.

How do I know if I have to reapply for admission?
If you have not been enrolled at ASU for eight or more semesters, you have to apply for readmission and submit all applicable fees. If you have not been enrolled at ASU for one or two fall or spring semesters, you are eligible to return through Quick Re-entry.

Are readmission requirements different than when I was first admitted?
They may be, depending on when you were first admitted. ASU admission requirements change from time to time, so the admission standards you met previously may be different than they are currently.

Arizona general education curriculum (AGEC)

The Arizona public community colleges and universities have agreed upon a common structure for a general education core. This curriculum provides students attending any Arizona public community college with the opportunity to build a general education program that is transferable to any other state institution without loss of credit. This common agreement is called the Arizona General Education Curriculum, or AGEC.

The AGEC is composed of 35 to 37 credit hours of lower-division general education coursework in which a student may prepare for transfer.

The AGEC has three forms: AGEC-A, AGEC-B and AGEC-S. A detailed description of each AGEC is available at https://www.aztransfer.com/about/agec.html.

Community colleges are responsible for certifying the date of completion of the AGEC on the official institutional transcripts.

Completion of the appropriate AGEC fulfills ASU lower-division general studies requirements of the baccalaureate degree with which the AGEC articulates. Students completing the AGEC are still required to fulfill lower-division program requirements and prerequisites within their college and major and minor areas of study. To complete a degree program most efficiently, students should select courses that concurrently satisfy AGEC and major requirements.

Completion of any AGEC from an Arizona community college guarantees admission to the university, provided that a cumulative GPA of 2.50 or higher has been achieved. AGEC completion, however, does not guarantee admission to any specific university program. Many majors (e.g., architecture, engineering, business, the fine and creative arts, and health professions) have significant prerequisites or program requirements that must be completed before a student may be admitted to upper-division coursework. Community college students who are undecided about which of the universities they plan to attend or what program of study they intend to pursue are advised to explore educational options while they complete the AGEC. In all cases, students have the responsibility for selecting general education coursework that is relevant to the requirements of their intended major and degree.

Students who complete both the AGEC and an approved associate degree are assigned junior class standing by the state universities. Junior class standing is based on the number of credit hours a student has earned and does not necessarily indicate the remaining number of credit hours needed to complete degree requirements. Course prerequisites, major requirements and upper-division requirements continue to be specified by each university. Appropriate sequencing of courses and timely completion of course prerequisites are essential to ensure efficient progress toward a baccalaureate degree. Students who have identified the university they plan to attend or a major area of study are advised to fulfill requirements and prerequisites identified by these programs through ASU's MyPath2ASU®. The AGEC does not replace articulation agreements developed to enhance the transfer process between specific institutions, nor does the AGEC eliminate the possibility that students who have identified the university they plan to attend and a major area of study will follow transfer guides provided by the state universities.

[1] https://admission.asu.edu/transfer/pathway-programs

Course load and concurrent enrollment

Course load

A minimum full-time course load for an undergraduate student is 12 credit hours.

The maximum course load for which a degree-seeking student may register in a fall or spring semester across all three sessions (A, B and C) is 18 credit hours, with a maximum of nine credit hours in each A or B session. The limit is 19 credit hours for students enrolled in the Ira A. Fulton Schools of Engineering. A student wishing to register for more than the maximum must petition the standards committee of the college in which the student is enrolled and must obtain an approved overload before registration.

Summer session credit hour load

The summer session credit hour load limit is seven credit hours for each six-week session and nine credit hours for the eight-week session, and the load limit is 14 credit hours for any combination of sessions.

Graduate credits earned by undergraduate students

ASU undergraduate students who have achieved senior status (they cannot be postbaccalaureate) with a cumulative GPA of 3.00 or higher may count up to 15 credit hours of graduate-level coursework toward their graduate degree at ASU

(termed preadmission credit hours). Only graduate courses with a grade of "B" (3.00) or higher may be included on a graduate plan of study. Preadmission graduate courses cannot be used to meet any baccalaureate graduation requirements. Before registering for these courses, students are advised to check with their academic advisor to ensure the correct internal academic unit or college process is followed. Permission to take a preadmission graduate course does not guarantee admission to a graduate degree program or that the course may be used toward graduate degree requirements.

Use of graduate course credit by undergraduates

Graduate course credit earned by an undergraduate student that is used to fulfill requirements for an undergraduate degree program cannot also be used in a graduate degree program unless the student is enrolled in an approved accelerated master's degree program. Students must contact their advisor before enrolling in a graduate course they wish to use toward a future graduate program at ASU.

Concurrent enrollment

A student may enroll in classes at other institutions or in independent learning courses while enrolled at ASU, provided that the student adheres to the other institution's regulations concerning enrollment, graduation requirements and transfer of credits. However, the student is urged to seek advising before concurrent enrollment to ensure orderly progress toward a degree. If the total credit hours exceed the maximum course load, prior permission must be granted by the college standards committee.

Changes in enrollment can affect financial aid awards. Students should contact Financial Aid and Scholarship Services for more information. [1]

Enrollment verification guidelines

The registrar is responsible for verifying enrollment, according to general guidelines; students should review the enrollment verification page. [2]

Source URL: https://catalog.asu.edu/course_load

Links:
[1] https://tuition.asu.edu/contact
[2] https://registrar.asu.edu/enrollment-verification

Credit by examination

Students may receive credit for an ASU course by taking an examination in place of the actual course. Some exams may be taken before to admission to ASU. Information is provided below on each type of exam, equivalent courses and other conditions that may apply to credit being awarded.

- A student pursuing a bachelor’s degree may earn no more than 60 hours of credit by examination, including ASU comprehensive and proficiency exams, for any or all programs.
- A student pursuing an associate degree may earn no more than 30 hours of credit by examination, including ASU comprehensive and proficiency exams, for any or all programs.
- Credit is not awarded for any course in which the student has been given credit from any educational institution.
- Credit is not granted for a course taken at an educational institution after credit by examination has been awarded.
  Exception: There may be instances in which a student wishes to remove exam credit earned through Advanced Placement, College-Level Examination Program, DANTES Subject Standardized Test, Cambridge International exam or International Baccalaureate exams. If the student elects to remove exam credit, the cumulative university hours are adjusted, and the student can complete the corresponding ASU course. When a student decides to complete the ASU course, the earned credit and grades always apply. Students should see below for additional details on each exam and its equivalent scores.

- Credit may not be received for a lower-level or prerequisite course when credit has already been received in a higher-level course within the same field.
- Only credit earned by comprehensive examination counts toward the resident credit requirement for graduation.
- Credit by exam is awarded based on the date the exam was taken. Students who take the exam during the current catalog year (August 2026–July 2027) earn credit based on the credit equivalency found in the current catalog. If the test was taken in a prior academic year, the student should refer to the catalog of that year or search the Transfer Guide [1] for more information.

Types of examinations

CLEP: College-Level Examination Program can be taken before or during enrollment at ASU.
AP: Advanced Placement is taken during secondary school or before enrollment at ASU.
DANTES or DSST (Defense Activity for Nontraditional Education Support Subject Standardized Test) is taken by military or approved government personnel before or during enrollment at ASU.
IB: International Baccalaureate exam credit is earned by students of an International Baccalaureate®-approved school before enrollment at ASU.
Cambridge International exam is taken by students who have completed a Cambridge course in their secondary school.
Comprehensive examinations can be taken by current ASU students.
Proficiency examinations can be taken by current ASU students.

For information about placement testing for mathematics and English classes before orientation, students should refer to the placement and testing requirements [2] in the ASU academic catalog.

CLEP: College-Level Examination Program

Students who have taken a College-Level Examination of the College Entrance Examination Board may receive university credit. The table of CLEP credit applies to all students enrolled in the university for in August 1975 or later. CLEP examination credit is not given if it duplicates credit previously earned by the student at the university or accepted by the university for work done elsewhere. All examinations are given monthly by University Testing. [3]

CLEP examination credit does not satisfy the General Studies Maroon requirements for Natural Sciences (SQ and SG) or Literacy and Critical Inquiry (L), or the General Studies Gold requirement for Scientific Thinking in the Natural Sciences (SCIT). There is no limit to the number of CLEP credits that can be used to fulfill the other parts of the general studies requirements within either system. A student who has received ASU credit for a course as a result of special programs credit may not duplicate the credit by enrolling in the same class for credit at ASU or transferring it to another institution.

Subject examinations

To obtain credit or placement for all subject exams except English, History, French, German, and Spanish, a student must receive a score of 50 (computer-based testing scale) or higher. To obtain credit for College Composition, a student must receive a standard score of 610 (1978 scale), 500 (1986 scale), or 50 (computer-based testing scale). Test scores for French, German, History and Spanish are shown below in the CLEP credit table.

All equivalency is subject to future review and possible catalog change. Students should refer to the Transfer Guide for equivalencies of exams taken outside of the current catalog year. For more information on registering for CLEP testing [3], students should contact University Testing [4] at 480-965-7146 or uts@asu.edu.

*Credit awarded as a department elective displays as DEC. A DEC course is not directly equivalent to a current ASU course but could be used to fulfill graduation requirements. Students should see their advisor to determine how these courses may apply to their major.

Advanced Placement (AP)

Students who have taken an Advanced Placement course of the College Entrance Examination Board in their secondary school and who have taken an AP examination of the CEEB may receive university credit. No credit is given for any examination with a score of 2 or 1. There is no limit to the number of AP credits that can be used to meet the general studies requirement, including the requirements for Natural Sciences (SQ and SG) and Literacy and Critical Inquiry (L) within General Studies Maroon, and those for Scientific Thinking in the Natural Sciences (SCIT) within General Studies Gold.

When scores are received by the university directly from the CEEB, credit is awarded as shown in the Advanced Placement credit table below.

DANTES/DSST

Students who have taken a Defense Activity for Nontraditional Education Support Subject Standardized Test, known as DSST, may receive university credit. Credit is awarded for score results equal to or above the American Council on Education's recommended score if the subject examination is applicable to a program of study at ASU, or credit may be assigned as elective. To receive credit, a transcript showing the DSST results must be received by ASU directly from the Educational Testing Service.

Students should refer to the Transfer Guide for equivalencies of exams taken outside of the current catalog year.
To register for the exam [5] or for more information about exam fees, students should contact University Testing [4] at 480-965-7146 or uts@asu.edu.

*Credit awarded as a department elective displays as DEC. A DEC course is not directly equivalent to a current ASU course but could be used to fulfill graduation requirements. Students should see their advisor to determine how these courses may apply to their major.

International Baccalaureate (IB) exam

Students who have taken an International Baccalaureate exam may qualify for university credit, depending on the level of the examination and the grade received. Arizona State University grants credit for higher-level courses and some standard-level courses. A high level grade of 5 qualifies the student to receive credit for up to two introductory courses, while a grade of 4 qualifies a student to receive credit for one introductory course. No credit is awarded for English as a second language (English B). Credit is awarded according to the IB credit table below.

*Credit awarded as a department elective displays as DEC. A DEC course is not directly equivalent to a current ASU course but could be used to satisfy graduation requirements. Students should see their advisor to determine how these courses may apply to their major.

Thinking Skills A-Level	E or higher	1–5	6	Elective credit
Travel and Tourism AS-Level	E or higher	1–5	3	TDM 205
Travel and Tourism A-Level	E or higher	1–5	6	TDM 205 and TDM DEC*

*Credit awarded as a department elective displays as DEC. A DEC course is not directly equivalent to a current ASU course but could be used to satisfy graduation requirements. Students should see their advisor to determine how these courses may apply to their major.
**Credit awarded depends on the content of the course completed; students should see an advisor once admitted.

Comprehensive examinations

A comprehensive examination is intended to permit a student to establish academic credit in a field in which the student has gained experience or competence equivalent to an established university course. Applications are given only for courses listed in the current catalog and only for courses in which a comprehensive examination can serve as a satisfactory measure of accomplishment.

A number of restrictions apply. To be eligible to apply to take a comprehensive examination to establish undergraduate course equivalence, a student must:

1. have earned not more than 60 credit hours through comprehensive, CLEP, IB and AP examinations
2. have earned no credit for a duplicate course
3. have earned no credit for a course for which this course is a prerequisite

The decision on the suitability of course material for a comprehensive examination, the development of a comprehensive examination, and the administration of an examination are strictly departmental functions. An application is for one course only. The student should complete an application form with the number, title and number of credit hours for the course. When completed, the application must be approved by the student's advisor and the chairperson of the department responsible for offering the course.

The student must then pay the stated fee for such examinations at cashiering services. The receipt must be taken to the departmental office.

The examination is prepared by the instructor who normally conducts the course, and it is comprehensive in nature and scope. The instructor and other experts designated by the chairperson grade the examination using letter grades "A+", "A", "A-", "B+", "B", "B-", "C+", "C", "D" or "E". If the grade is "C" or higher, a mark of "Y" is entered on the student's permanent record; otherwise, no entry is made. Credit by examination is indicated as such on the record. The student is notified by mail of the result of the examination. In cases of failure ("D" or "E"), the student is not given an opportunity to repeat the examination.

A student pursuing a second baccalaureate degree may not receive credit by comprehensive examination, but with prior approval of the college, the student may use the examination to waive a course requirement if a grade of "C" or higher is earned.

Proficiency examinations

Proficiency examinations and auditions are given:

1. to waive a course requirement
2. to validate certain transfer credits in professional programs
3. to determine a student's ability in a field in which competence is an important consideration

Detailed information may be obtained from the dean's office of the college in which the student is registered.

Leave of absence (undergraduate)

The Undergraduate Leave of Absence (LOA) policy assists and encourages undergraduate degree-seeking students to return and graduate after an absence due to military deployment, service on an official church mission or with a foreign aid service of the Federal government, or a permanent disability. If your absence is for any other reason, you may be eligible to return to ASU through Quick Re-entry [1], which permits undergraduate students to enroll without submitting a new application or application fee if they previously attended ASU but have not enrolled at ASU for up to seven consecutive fall or spring semesters.

Eligibility requirements

To be eligible for an Undergraduate LOA, students must be eligible to register for classes and meet the following criteria:

1. Be a degree-seeking undergraduate student.
2. Be registered during the semester immediately prior to the beginning of the LOA.
    - Students who were admitted as new first semester freshmen or transfer students but did not attend will not be eligible for an LOA. Instead, they should contact the Undergraduate Admissions office.

    - Students who were readmitted but did not attend will not be eligible for an LOA. Instead, they should contact the Undergraduate Admissions office.
    - Students who are participating in an ASU-sponsored study abroad program need not apply for an LOA.
3. Be in academic good standing, warning, probation, or continuing probation with their college.
4. Have no hold (e.g., disciplinary, financial, testing, etc.) which would restrict registration. Note: Students with financial holds may be given consideration for an LOA if authorized by the Collections Office [2].
5. Have submitted any outstanding high school and/or transfer transcripts, if prior admission/readmission and continued enrollment was contingent upon receipt of those transcripts.

Download the Undergraduate Leave of Absence Request form [3]

Leave of absence FAQ's

Information for students returning from a Leave of Absence.

Am I able to view my unofficial transcripts?
Yes. Student can view their unofficial transcripts through their My ASU page. [4]

Can I attend another institution while on an LOA?
Yes. Once all coursework is complete and graded, please request official transcripts to be sent directly from the transfer institution to ASU at the following address:

Arizona State University
PO Box 870112
Tempe, AZ 85287-0112

Can I come back earlier than what my original LOA was processed for?
Yes. If you wish to return to ASU prior to the end of your scheduled leave you will need to contact University Registrar Services at 480-965-3124 so that your return may be updated immediately to maximize enrollment opportunities and meet any college, financial aid, etc. deadlines.

Can I request an extension of my LOA?
Yes. If you are unable to return to ASU by the term you initially identified, then you may request an extension through the college of your major. To extend your LOA, please complete the LOA form [3] and submit to your college for approval.

How will the university inform me regarding upcoming enrollment, deadlines and holds that may occur while on I'm on an LOA?
We recommend checking your My ASU [4] page often during your LOA so that you may stay informed about registration dates, financial aid and tuition deadlines and advising holds that may occur prior to the end of your leave.

If I qualify for an LOA, does this defer my scholarship?
No. In order to request a deferment of your scholarship, you will need to complete the Scholarship Deferment Application [5] found on the Scholarship website. To have your scholarship reinstated after the deferment period, you will need to complete the Scholarship Reinstatement Request form [6].

My LOA is about to expire; what do I do now?
View your registration date as well as any current registration holds and "To Do" list items on My ASU [4]. Schedule an appointment with your advisor to discuss course selection. Submit transcripts for coursework you completed during your LOA.

Will my loans be deferred while on an LOA?
No. In order to defer loans, students must be currently enrolled. While the LOA keeps student records up to date, it does not allow for deferment. Please contact your lender for more information.

Minors and undergraduate certificates

Minors and certificates are available to currently enrolled students pursuing a bachelor's degree in a variety of academic disciplines. Students pursuing an associate degree may pursue only certificates simultaneously. Students can explore Degree Search [1] for more information on and enrollment requirements for available minors and certificates, as well as request to add one to their program of study.

Minors

A minor is an approved, coherent concentration of academic study in a single discipline, involving substantially fewer hours of credit than a corresponding major. Most ASU colleges offer undergraduate minors in addition to majors. Current ASU students seeking a bachelor's degree may pursue a minor and have it recognized on their ASU transcript at graduation. Minor requirements appear on the degree audit once the minor is added. Minors require students to complete a minimum of 15 credit hours, of which, at least nine must be from upper-division courses.

Certain major and minor combinations may be deemed inappropriate by the college or department of either the major or the minor program. Courses taken for the minor may not count toward both the major and the minor.

A student pursuing a second baccalaureate degree in the same discipline as a minor previously conferred by ASU will have that minor removed from the original academic record upon completion of the second degree.

Undergraduate certificates

With the exception of special programs, undergraduate certificates are not awarded prior to the award of an undergraduate degree. A student already holding a baccalaureate degree may pursue an undergraduate certificate as a nondegree-seeking graduate student.

Undergraduate certificates require students to complete a minimum of 15 credit hours, of which, at least 12 must be from upper-division courses, and a minimum grade of "C" (2.00) or higher is required for all upper-division certificate courses.

The Pathways for the Future [2] program offers upskilling options through select ASU certificate programs for professionals without a bachelor’s degree.

Placement and testing requirements

English placement

All students must meet the university first-year composition requirement through completion of both ENG 101 and ENG 102 or ENG 105 with a grade of "C" (2.00) or higher. Students whose native language is not English should complete ENG 107 and ENG 108 to satisfy this requirement.

Math placement

Before attending orientation and enrolling in classes, incoming first-year students must complete the ASU mathematics placement assessment [1]. ASU uses the placement assessment score and major math requirements [2] to identify the appropriate math course for students' math skills and academic goals.

Retention and academic standards

Class standing

A student’s class standing is determined by the number of credit hours earned, as shown in the table below.

Student	Credit hours earned
Freshman	24 or fewer credit hours earned
Sophomore	25 to 55 credit hours earned
Junior	56 to 86 credit hours earned
Senior	87 or more credit hours earned
Graduate	bachelor's degree from accredited institution

Academic good standing

For the purpose of retention, university academic good standing [1] for degree-seeking students is defined as maintaining a minimum cumulative GPA of 2.00. This standard is in effect for all students regardless of catalog year.

Academic success requirement

Some first-time first-year students may be required to complete UNI 120: Problem Solving for Success as part of their transition to ASU. In this course, students develop creative problem-solving skills that support success in academic, professional and personal contexts. Through the exploration of real-world challenges, students learn to generate, prototype, evaluate and refine solutions while building mindsets and practices that strengthen adaptability, resilience and effective decision-making. If identified for this requirement, UNI 120 becomes a university graduation requirement for the individual student.

Dean’s list

Undergraduate students are eligible for the dean’s list if they earn 12 or more graded credit hours (“A+”, “A”, “A-”, “B+”, “B”, “B-”, “C+”, “C”, “D” or “E”) during a semester in residence at ASU with a GPA of 3.50 or higher. A notation regarding dean’s list achievement appears on the unofficial transcript. The dean's list is generated at the completion of the fall and spring semesters.

Satisfactory academic progress

The university is required to publish and enforce standards of satisfactory academic progress for certain students (e.g., student-athletes, students receiving financial aid, students receiving veterans benefits).

Certification of satisfactory progress for student-athletes is verified by the academic advisor and the dean’s designee for certifying satisfactory progress. Certification of satisfactory progress [2] for students receiving financial aid or veterans benefits is verified by Financial Aid and Scholarship Services or the Pat Tillman Veterans Center, respectively. Students should contact their advisors or the appropriate office for additional information on satisfactory progress requirements.

Academic warning

An ASU student who does not achieve the minimum GPA standard at the completion of the first term of study receives an academic warning [3]. If, after one term with an academic warning, a student still does not achieve the minimum GPA standard, they are placed on probation for at least one additional term. If a student's minimum GPA first falls below the standard in a term that is not their first at ASU, they are placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

A student with an academic warning or on academic probation is considered in conditional good standing and is permitted to enroll.

A student who has received an academic warning or is on probation must meet with an academic success advisor to discuss academic success strategies for the subsequent semester and develop a success plan for returning to university academic good standing. That plan may require successful completion of the academic refresher course UNI 220 Mindset Connections.

Probation

A student’s college assumes responsibility for enforcing academic standards and may place on university academic probation [4] any student who has failed to maintain good standing as previously defined. For purposes of probation and retention, an individual college may set higher GPA standards. A student on academic probation is required to observe any rules or limitations the college may impose as a condition for retention, including college-established policies regarding continuing probation.

Co-enrolled continuing probation program

Select disqualified students may participate in the co-enrolled continuing probation program at the discretion of their college or school. Under this program, the student takes UNI 220 Mindset Connections plus one ASU course selected by the student’s advisor. The student co-enrolls at a Maricopa County Community College with a schedule selected in consultation with the ASU advisor. Upon completion of the term, students with a combined semester cumulative GPA of 2.50 may continue regular enrollment at ASU. Parameters regarding the number of co-enrolled hours required are at the discretion of each college or school.

Disqualification

A student who is placed on probation at the end of a semester is subject to disqualification [5] by the college or school at the end of the following semester if the conditions imposed for retention are not met.

Disqualification is exercised at the discretion of the college or school. A student is notified of disqualification by the dean of the college and is not allowed to register in a fall or spring semester at the university. If the student has already

registered for a future fall or spring semester, the registration is canceled. A disqualified student who has not already been absent for a semester may contact the college advisor to see if reinstatement is possible. A disqualified student may not attend as a nondegree-seeking student. If a disqualified student elects to attend another university or two-year college, any credits earned there will not affect the ASU cumulative GPA. A course repeated elsewhere will not result in a replacement of a grade earned at ASU. Disqualified students must consult with an academic advisor to determine eligibility to attend ASU in the summer session in order to raise their ASU cumulative GPA.

Select disqualified students may participate in the co-enrolled continuing probation program. Information about this is available in the Glossary of Academic Terms, at probation. [6]

Readmission

Students not eligible for quick re-entry [7] (i.e., because they have not been enrolled at ASU for more than seven semesters, completed their academic program, or were academically disqualified) must apply for readmission [8] and submit applicable fees.

Candidates for readmission who are not in academic good standing are subject to college review.

A disqualified student who has not already been absent for a semester may contact the college advisor to see if reinstatement is possible.

Academic integrity

All students should be familiar with ASU's academic integrity policy. [9]

University undergraduate General Studies requirement

In addition to preparing students for careers and advanced study, a baccalaureate education should prepare students for satisfying personal, social and civic lives. Students should both acquire a depth of knowledge in a particular academic or professional discipline and be broadly educated, with knowledge of interdisciplinary and transdisciplinary approaches to address an array of questions. They should develop the general intellectual skills required to continue learning throughout their lives. The ASU general studies requirements complement the undergraduate major by developing critical learning skills, investigating the traditional branches of knowledge, and introducing students to approaches applicable to addressing contemporary challenges.

Students in a 2024–2025 catalog year and beyond - General Studies Gold

Effective fall 2024, ASU undergraduate students are required to complete the General Studies Gold requirements. Students who began their degree at ASU before fall 2024 and are in a catalog year preceding 2024–2025, are required to complete the General Studies Maroon requirements. More information about what these changes mean and answers to some frequently asked questions are available on the Provost general studies page. [1]

The degree requirements for a student's catalog year are displayed on their major map or curriculum checksheet. For more information on the determination of catalog year, students should reference the undergraduate graduation requirements. [2]

General Studies Gold includes courses in nine required categories. Courses that fulfill each category are noted in the course catalog [3]. General studies courses are regularly reviewed and are occasionally changed. A student receives the general studies credit that a course carries during the semester in which the course is taken. Students should consult the course catalog [3] each semester to determine which courses meet general studies requirements.

General Studies Gold requirements

Humanities, Arts and Design (six credit hours - two courses)

The humanities explore questions of human existence and meaning, the nature of thinking and knowing, and moral and aesthetic experience. Humanities reflect on values of all kinds and seek to make the human mind more analytical, contemplative and expansive. They are often concerned with the study of textual and artistic practices of cultures, such as traditions in literature, philosophy, religion, ethics, history and aesthetics; the humanities also explore human thought and action and their application to human environments. They deepen awareness of the breadth of human heritages, traditions and histories; build literacy and critical thinking skills in evidence analysis and argumentation; and implicitly or explicitly promote the application of this knowledge to contemporary societies.

The study of arts and design deepens awareness of human societies and cultures. The arts have as a primary purpose the creation and study of objects, installations, performances and other means of expressing or conveying aesthetic concepts and ideas. Design study concerns itself with material objects, images and spaces; their historical development; and their significance in society and culture. Disciplines in the arts and design often employ nonverbal modes of thought and communication, and courses in these areas tend to focus on sounds, objects, images and structures, or on the practical techniques and historical development of, and innovation in, artistic and design traditions.

Learning outcomes

Upon completion of a course in Humanities, Arts and Design, students will be able to complete all outcomes in one of the two following groups.

Group 1:

1. analyze cultural creations or practices in historical or contemporary context
2. interpret the formal, aesthetic and creative elements in literary, visual or cultural texts
3. articulate relationships among tradition, innovation, individual creativity and communal expression in cultural creations or practices
4. communicate narratives, ideas or arguments using such elements as evidence, creativity and critical thinking

Group 2:

1. analyze cultural, political or social practices, texts or discourses in historical or contemporary context
2. communicate coherent arguments or narratives using evidence drawn from qualitative or quantitative sources
3. identify perspectives or values as manifested in a given philosophical or religious framework or a given historical or cultural context

Social and Behavioral Sciences (three credit hours)

Courses in social sciences and behavioral sciences expose students to the systematic investigation of human institutions, relationships, social structures, behavior, emotions, communication and health. Students learn about evidence, methods and approaches that social and behavioral scientists use to analyze, understand and describe human activities, experiences and systems. They learn how social scientists and behavioral scientists conduct research, how they disseminate their findings, and how the findings from social and behavioral science can be used in the pursuit of individual, societal and policy goals.

Learning outcomes

Upon completion of a course in Social and Behavioral Sciences, students will be able to do the following:

1. utilize behavioral or social science approaches, qualitative or quantitative, to examine aspects of human experiences or explain social or behavioral phenomena
2. describe the strengths and limitations of behavioral or social science methods in predicting or understanding human behavior
3. communicate coherent arguments using evidence drawn from qualitative or quantitative sources

Scientific Thinking in Natural Sciences (eight credit hours - two courses)

Courses in scientific thinking in natural sciences promote public scientific literacy, which is critical for making sound decisions about scientifically infused issues such as climate change. Scientific thinking in natural sciences includes understanding basic science concepts, such as the fundamental behavior of matter and energy, as well as understanding

that science is not an encyclopedic collection of facts. Science is a process of exploration that embraces curiosity, inquiry, testing and communication to reduce uncertainty about nature. In Scientific Thinking in the Natural Sciences courses, students engage in the scientific process through lab experiences.

Learning outcomes

Upon completion of a course in Scientific Thinking in the Natural Sciences, students will be able to do the following:

1. obtain and interpret qualitative or quantitative data and communicate the findings
2. employ evidence to construct and test scientific hypotheses
3. assess the validity of scientific claims using evidence from biological or physical science
4. create models to explain observable phenomena and understand biological or physical processes in the natural world
5. communicate coherent arguments using evidence drawn from qualitative or quantitative sources

Quantitative Reasoning (three credit hours)

Quantitative and computational reasoning skills are essential for success in modern careers, for critically evaluating information in the age of "big data," for assessing the quality of arguments conveyed through digital media, for informed participation in community and social life, and for contributing to the formulation of effective solutions for achieving a sustainable and just future. Quantitative reasoning enables students to apply relevant mathematical, statistical, computational and visualization methods in academic, social and personal settings.

In a Quantitative Reasoning course, students learn about data, data management, data summaries, data visualization, and the use of computational tools with data. Data can take many forms, including numerical data, textual data and images. Students also learn about how quantitative reasoning can be used to make arguments clear, precise and verifiable. Finally, they learn to build quantitative models, make predictions, and communicate their findings based on available data. This may include some combination of mathematical, statistical, computational or network models, or visualizations.

Learning outcomes

Upon completion of a course in Quantitative Reasoning, students will be able to do the following:

1. understand variables, measurement and data, including how they can be used to pose and answer questions about society and nature, and to manipulate, organize, classify and visualize quantitative data
2. evaluate arguments from everyday life or academic fields of study that are represented mathematically, statistically or computationally, or in visualizations
3. formulate hypotheses, mathematical models or narratives that are consistent with quantitative data
4. communicate how quantitative data, interpretations or models are connected to outcomes, predictions, decisions, explanations or future states
5. effectively employ one or more digital tools to demonstrate quantitative reasoning, interpretations of calculations, or the creation and evaluation of visualizations

Mathematics (three credit hours)

The Mathematics studies requirement is intended to ensure that students have skill in basic mathematics and can use mathematical analysis in their chosen field of study. The mathematics requirement requires the student to complete a course in college mathematics, college algebra or precalculus, or demonstrate a higher level of skill by completing a mathematics course for which a course in the above three categories is a prerequisite. A course in mathematics includes the application of mathematical skills in the solution of real-life problems and introduces or makes significant use of fundamental mathematical skills and concepts.

Learning outcomes

Upon completion of a course in Mathematics, students will be able to do the following:

1. demonstrate an understanding of mathematical relationships from multiple perspectives, such as functions from graphical, numerical and analytic points of view
2. apply mathematical skills in the solution of real-life problems

All students are expected to fulfill the MATH requirement by the time they accumulate 30 credit hours in residence at ASU. Any student who has more than 30 hours of resident ASU credit and has not fulfilled the MATH requirement must enroll in a MAT subject course or an appropriate prerequisite and continue to do so every semester until the mathematics requirement is met.

American Institutions (three credit hours)

In each American Institutions course, students discuss people, ideas, institutions, movements and structural forces that have created and transformed the United States. Students analyze struggles over the meaning of America's constitutional democracy. Throughout the course, students analyze a wide variety of sources drawn from both past and present, and contemplate American history, ideals and institutions in global as well as national contexts. In doing so, students refine their ability to make and evaluate reasoned arguments, engage in civil debate, and participate constructively in civic life.

Learning outcomes

Upon completion of a course in American Institutions, students will be able to do the following:

1. demonstrate how ideas and groups have historically shaped the creation of and change in U.S. institutions.
2. identify key institutions in U.S. politics and their impacts on social, economic or political outcomes. This includes differential impacts on disparate communities.
3. describe the impact of key ideas, people, events, institutions or movements on the nature, history and boundaries of American citizenship and the various forms of civic participation in a self-governing society.
4. communicate coherent arguments using evidence drawn from qualitative or quantitative sources.

To achieve these goals, students must be exposed to the following knowledge or sources:

- principles of American constitutional democracy and how they are applied under a republican form of government
- the U.S. Constitution and major American constitutional debates
- founding documents that have shaped American institutions
- landmark policy achievements and Supreme Court cases
- economic knowledge necessary to assess policy options affecting both the public and private sectors
- international context of American institutions and the evolution of America's role in international affairs

Governance and Civic Engagement (three credit hours)

Courses in the Governance and Civic Engagement category explore ways in which humans confront the dilemmas and opportunities of community life and develop skills of civic communication.

Governance and Civic Engagement courses analyze principles and practices of decision-making in historical and contemporary contexts, and explore ways in which people have defined and pursued justice and the common good. Courses in the Governance and Civic Engagement category broaden students' understanding of how collective decisions are made, how they impact communities positively or negatively, and how various groups are included in, or excluded from, the decision-making process. Students have the opportunity to explore dynamics between governance and civic engagement, which can include perceived inequality or marginalization related to a variety of factors including race, class, citizenship, gender and disability. This category also develops students' skills in civic communication, including listening, deliberation, negotiation, consensus building and productive use of conflict, which are essential to participating more fully in their communities. Courses in this category may be entirely focused on developing skills in civic communication.

Learning outcomes

Upon completion of a course in Governance and Civic Engagement, students will be able to complete all outcomes in one of the two following groups.

Group 1:

1. analyze the context and consequences of one or more collective decision-making theories or practices
2. define an element of the common good and propose a way to pursue it within a specific contemporary context
3. communicate coherent arguments using evidence drawn from qualitative or quantitative sources

Group 2:

1. articulate diverse perspectives on the common or collective good
2. demonstrate the ability to collaborate effectively in the presence of dissenting opinions and experiences
3. communicate arguments, narratives or information using qualitative or quantitative evidence

Global Communities, Societies and Individuals (three credit hours)

Courses in the Global Communities, Societies and Individuals knowledge area explore the world from multiple vantage points. They consider historical, ongoing or transforming global issues across multiple scales and types of human experiences. Students analyze ways that geographical and historical contexts influence communities, societies and individuals. In addition to courses focused entirely on non-U.S. American issues, courses structured to include comparative or transnational connections between the United States and other countries (i.e., courses that consider a global issue in multiple locations one of which is the United States) fall into this knowledge area. Courses focused mostly or only on U.S. American issues or populations, however, even across diverse communities, are not included in this knowledge area. This knowledge area develops students' skills in global awareness and in the analysis of social, political, economic or cultural systems, skills essential to participating more fully in communities.

Learning outcomes

Upon completion of a course in Global Communities, Societies and Individuals, students will be able to do the following:

1. describe historical, contemporary or transforming global issues through the perspective of specific individuals, communities or societies
2. analyze the interactions among social, political, economic or cultural systems across local, regional and global scales or spaces
3. articulate ways in which dimensions of difference such as race, gender, socioeconomic status, religion, language or citizenship, separately and together, affect individuals and communities
4. communicate coherent arguments using evidence drawn from qualitative or quantitative sources

Sustainability (three credit hours)

The Sustainability requirement provides students with an interdisciplinary understanding of socio-ecological systems in relation to global challenges and opportunities. The learning objectives emphasize systems thinking, where human and non-human systems are understood as intimately connected, with human actions affecting all life on a planet with limits and boundaries. Students should also become familiar with how cultural, political, economic, social and ethical beliefs, practices and systems are related to and impact planetary systems. Students use course concepts and systems and futures thinking to address contemporary questions or challenges.

Learning outcomes

Upon completion of a course in Sustainability, students will be able to do the following:

1. demonstrate an understanding of the Earth and its ecosphere, including the measures that indicate their capacities and limits
2. trace historical impacts of a range of socioeconomic, political or cultural choices on integrated human-environmental well-being
3. envision pathways toward futures characterized by integrated human-environmental well-being
4. articulate an approach to addressing contemporary questions or challenges that employs concepts or practices of sustainability

Meeting the general studies requirement

All students enrolled in a baccalaureate or associate degree program must successfully complete a minimum of 35 credit hours of approved general studies courses.

There is no limit to the number of Advanced Placement [4] credits that can be used to meet the general studies requirement. Credits earned through College-Level Examination Program [5] may be applied to General Studies Gold requirements, with the exception of Scientific Thinking in Natural Sciences. A student pursuing a bachelor's degree may earn no more than 60 hours of credit by examination, including ASU comprehensive and proficiency exams, for any or all

programs. A student pursuing an associate degree may earn no more than 30 hours of credit by examination, including ASU comprehensive and proficiency exams, for any or all programs.

Transfer credit

Completion of general studies and composition requirements, as documented on an official transcript from regionally accredited institutions of higher education within the United States fulfills ASU's General Studies Gold and first-year composition requirements. Certification of completed general studies includes completion of a general education package recognized by ASU, an Associate of Arts degree, a bachelor's degree or comparable. General studies packages and recognized degrees do not waive program requirements and prerequisites within major and minor areas of study.

Transfer students without completed and documented general education packages or degrees receive credit for general studies based on course-by-course equivalency. Students transferring from Arizona community colleges should see the Arizona General Education Curriculum page for more information. [6]

University requirements — first year composition

In addition to the 35 credit hours of General Studies coursework, students must complete, per university graduation requirements [2], ENG 101 and ENG 102, or ENG 105 with a grade of "C" (2.00) or higher to graduate from ASU in any baccalaureate or associate degree program. Students whose native language is not English may meet the first-year composition requirement by completing ENG 107 and 108 with a grade of "C" (2.00) or higher.

Students who are required to take first year composition must enroll in their first required composition course within the first year and continue to enroll in required composition courses every term until composition requirements are met.

College or school and major requirements

In addition to fulfilling the general studies requirement, students must also complete college or school and major requirements. Students are encouraged to work with their academic advisors to develop a program of study that efficiently meets all graduation requirements. A well-planned program should enable a student to concurrently satisfy requirements at the university, college or school levels, and within their major.

Students in catalog years before Fall 2024 — General Studies Maroon

In effect for students who began their degree program at ASU before fall 2024 and are in a catalog year before 2024-2025, the General Studies Maroon requirements include courses in five core areas and three awareness areas. Relevant courses are noted in the course catalog [3]. Effective fall 2024, new General Studies Maroon courses are no longer being added to the course catalog. General Studies Maroon courses retain their general studies designations to ensure that students can complete their degree requirements. A student receives the general studies credit that a course carries during the semester in which the course is taken. Students should consult the course catalog [3] each semester to determine which courses meet general studies requirements.

Five core areas (General Studies Maroon)

L: Literacy and Critical Inquiry (three credit hours)

Literacy is competence in written and oral discourse. Critical inquiry is the gathering, interpretation and evaluation of evidence. The Literacy and Critical Inquiry requirement helps students sustain and extend their ability to reason critically and communicate clearly through language.

Students must complete three credit hours from courses designated as L. Students must have completed ENG 101, ENG 105 or ENG 107 to take an L course.

The three credit hours required to meet the general studies L requirement are in addition to the upper-division L university graduation requirement. Students should review the university baccalaureate graduation requirements for more information. [2]

MA and CS: Mathematical Studies (combined six credit hours)

This core area has two categories. Mathematics (MA) is the acquisition of essential skills in basic mathematics. Computer/statistics/quantitative applications (CS) involves applying mathematical reasoning and requires students to complete a course in either the use of statistics and quantitative analysis or the use of a computer to assist in serious analytical math work.

The Mathematical Studies requirement has two parts: At least three credit hours must be selected from courses designated MA, and at least three credit hours must be selected from courses designated CS. All students are expected to fulfill the MA requirement by the time they accumulate 30 credit hours in residence at ASU. Any student who has more than 30 hours of resident ASU credit and has not fulfilled the MA requirement must enroll in an MA course or an appropriate prerequisite and continue to do so every semester until the mathematics requirement is met. College officers may grant waivers to the immediate and continual enrollment requirement only when there are scheduling conflicts detrimental to the student's academic progress.

HU: Humanities, Arts and Design and SB: Social-behavioral Sciences (combined 12 credit hours)

The study of the humanities and the disciplines of art and design deepen awareness of the complexities of the human condition and its diverse histories and cultures. Courses in the humanities are devoted to the productions of human thought and imagination, particularly in philosophical, historical, religious and artistic traditions. Courses with an emphasis in arts and design comprise the study of aesthetic experiences and the processes of artistic creation. They also may feature a design emphasis in which material culture is studied as a product of human thought and imagination.

The social-behavioral sciences provide scientific methods of inquiry and empirical knowledge about human behavior, within society and individually. The forms of study may be cultural, economic, geographic, historical, linguistic, political, psychological or social. The courses in this area address the challenge of understanding the diverse natures of individuals and cultural groups who live together in a world of diminishing economic, linguistic, military, political and social distance.

Twelve credit hours must be completed in two core areas: Humanities, Arts and Design (HU) and Social-behavioral Sciences (SB). At least six credit hours must be taken in each of these two core areas.

The 12 credit hours required to meet the general studies HU/SB requirement are in addition to the upper-division HU/SB university graduation requirement. Students should review the university baccalaureate graduation requirements for more information. [2]

SQ and SG: Natural Sciences (combined eight credit hours)

The natural sciences help students appreciate the scope and limitations of science and its contributions to society. Natural Sciences areas of study include anthropology, astronomy, biology, biochemistry, chemistry, experimental psychology, geology, microbiology, physical geography, physics and plant biology. Knowledge of the methods of scientific inquiry and mastery of basic scientific principles and concepts are stressed, specifically those that relate to matter and energy in living and nonliving systems. Firsthand exposure to scientific phenomena in the laboratory is important for developing an understanding of the concepts, principles and vocabulary of science.

General studies courses that satisfy the Natural Sciences requirement are given one of two classifications: quantitative (SQ) and general (SG).

- quantitative (SQ): These laboratory courses include a substantial introduction to the fundamental behavior of matter and energy in physical and biological systems.
- general (SG): These laboratory courses cover aspects of scientific inquiry that lend themselves to more qualitative or descriptive discussions of science.

Students must select eight credit hours of courses designated SQ or SG. Of these, at least four credit hours must be in the SQ category.

Three awareness areas (general studies)

Students must complete courses that satisfy three awareness areas. Courses that are listed for a core area and one or more awareness areas may satisfy requirements concurrently, up to a maximum of two of the awareness areas listed for that course. These awareness areas promote appreciation of cultural diversity within the contemporary U.S., the development of an international perspective and an understanding of current human events through study of the past.

1. Cultural Diversity in the United States (C)

The objective of the Cultural Diversity in the United States (C) requirement is to promote awareness and appreciation of cultural diversity within the contemporary U.S. This is accomplished through the study of the cultural, social or scientific contributions of women and minority groups, examination of their experiences in the U.S., or exploration of successful or unsuccessful interactions between and among cultural groups. Awareness of cultural diversity and its multiple sources can illuminate the collective past, present and future and also help students achieve greater mutual understanding and respect.

2. Global Awareness (G)

The objective of the Global Awareness (G) requirement is to help students recognize the need for an understanding of the values, elements and social processes of cultures other than those of the U.S. This area consists of courses that recognize other contemporary cultures and the relationship of the American cultural system to generic human goals and welfare.

3. Historical Awareness (H)

The objective of the Historical Awareness (H) requirement is to help students develop knowledge of the past, which can be useful in shaping the present and future. History is present in languages, art, music, literature, philosophy, religion and the natural sciences, as well as in the social science traditionally called history.

Meeting the general studies requirement

All students enrolled in a baccalaureate or associate degree program must successfully complete a minimum of 29 credit hours of approved general studies courses. Many general studies courses are approved as satisfying more than one requirement. The following conditions govern the application of courses toward the general studies requirements:

- A single course may be used to satisfy one core area and a maximum of two awareness area requirements.
- A single course may be used to satisfy a maximum of two awareness area requirements.
- A single course cannot be used to satisfy two core area requirements, even if it is approved for more than one core area.

There is no limit to the number of Advanced Placement [4] or College-Level Examination Program [5] credits that can be used to meet the general studies requirement. However, CLEP credits do not satisfy the Natural Sciences (SQ and SG) or Literacy and Critical Inquiry (L) portions of the General Studies Maroon requirements.

Transfer credit

Completion of general studies and composition requirements as documented on an official transcript from regionally accredited institutions of higher education within the United States fulfills ASU's lower-division General Studies Maroon and first-year composition requirements. Certification of completed general studies includes completion of a general education package recognized by ASU, an Associate of Arts degree, a bachelor's degree or comparable. General studies packages and recognized degrees do not waive lower-division program requirements and prerequisites within major and minor areas of study. Additionally, students still must take six upper-division credit hours (three for L and three for SB or HU) to complete the ASU university-level graduation requirements.

Transfer students without completed and documented general education packages or degrees receive credit for general studies based on course-by-course equivalency. Students transferring from Arizona community colleges should see the Arizona General Education Curriculum page for more information. [6]

University requirements

In addition to completing the 29 credit hours of lower-division general education coursework, per university baccalaureate graduation requirements [7], students must take six additional upper-division credit hours. Three hours with a Literacy and Critical Inquiry (L) designation must be chosen from approved upper-division courses, preferably in the major. Three hours with either a Humanities, Arts and Design (HU) or Social-behavioral Sciences (SB) designation should also be chosen from approved upper-division courses, preferably in the major. Additionally, students must complete the first-year composition [8] requirement.

College or school and major requirements

In addition to the general studies requirement, students must complete college or school and major requirements. Students are encouraged to work with their academic advisors to develop a program of study that efficiently meets all graduation requirements. A well-planned program should enable a student to concurrently satisfy requirements at the university, college or school levels, and within their major.

University associate degree graduation requirements

All students enrolled in an associate degree program must fulfill the following university requirements to graduate.

Credit requirements

A minimum of 60 credit hours is required to graduate with an associate degree. Students should check the program's graduation audit and major map or curriculum checksheet for graduation requirements.

Grade point requirement

A minimum cumulative GPA of 2.00 for all courses taken at ASU is required to graduate. Some programs may require a cumulative GPA higher than 2.00; students should refer to the specific program's graduation audit and major map or curriculum checksheet for graduation requirements.

General studies requirement

All students enrolled in an associate degree program must satisfy the university-required minimum number of approved lower-division general studies courses. Students should refer to the general studies policy for more information. [1]

Completion of general studies and composition requirements at a domestic institution accredited by an organization recognized by ASU as certified on the official transcript fulfills ASU’s lower-division general studies and composition requirements. Certification of completed general studies curriculum may include students' completion of a general education package (e.g., AGEC, CSUGE, IGETC), an Associate of Arts degree, a bachelor’s degree or comparable, as documented on an official transcript. If students transfer from an Arizona community college without completing the AGEC or from another accredited postsecondary institution, they receive credit for general studies based on course-by-course equivalency. Students should review the Arizona General Education Curriculum page. [2]

Mathematics requirement

All associate degree-seeking students are expected to fulfill the university's mathematics requirement by the time they have accumulated 30 credit hours in residence at ASU. Any student who has more than 30 credit hours and has not fulfilled the mathematics requirement must enroll in a mathematics course or an appropriate prerequisite course and continue to do so every semester until they meet the mathematics requirement. A waiver may be granted for continuous enrollment if there are scheduling conflicts detrimental to the student's academic progress.

First-year composition requirement

All students must meet the university first-year composition requirement through completion of both ENG 101 and ENG 102, or ENG 105 with a grade of "C" (2.00) or higher. Students whose native language is not English should complete ENG 107 and 108 with a grade of "C" (2.00) or higher to satisfy this requirement. All incoming students are placed [3] in ENG 101 or an appropriate first-year composition course based on submission of test scores, exam scores or transfer credit.

Transfer credit

Composition courses transferred from other postsecondary institutions may require evaluation. After consultation with an advisor, if evaluation is necessary, the student should submit a request for evaluation through the ASU Transfer Guide [4]. The process should be completed upon transfer of coursework to ASU so the student can enroll in additional courses if required to do so. Students who are required to take first-year composition must enroll in their first required composition course within the first year and continue to enroll in required composition courses every term until they meet composition requirements.

Credit by exam

A student pursuing an associate degree may earn no more than 30 hours of credit by examination, including ASU comprehensive and proficiency exams, for any or all programs.

Resident credit requirement

Resident credit refers to a course completed at ASU in a regular semester or summer session. Credit earned through ASU comprehensive examinations also is included when calculating ASU resident hours. Credit earned through independent learning, Advanced Placement testing, the College-Level Examination Program or an International Baccalaureate exam are excluded when calculating ASU resident hours.

Every candidate for an associate degree is required to earn a minimum of 15 credit hours in resident credit courses at ASU.

Definition of a catalog year

The ASU academic catalog is published annually. A catalog year runs from fall through summer, and a student who enters during the fall or spring semester follows the policies and requirements in effect for that catalog year. For example, catalog year 2026–2027 applies to students who enter in fall 2026 or spring 2027. Students who enter for the first time during the summer term follow the requirements in effect for the subsequent catalog year.
In most cases, a student’s catalog year is the year in which they started at ASU. Students may be in a different catalog year for a variety of reasons, including:

- change of major
- continuous enrollment in an Arizona community college or public university
- student request to move to a newer catalog year
- significant changes to curriculum due to either accreditation or rapid changes to subject matter

More information and conditions of continuous enrollment can be found in the guidelines for determination of catalog year. [5]

Transfer credit

Students can review the general transfer credit requirements. [6]

Application for graduation

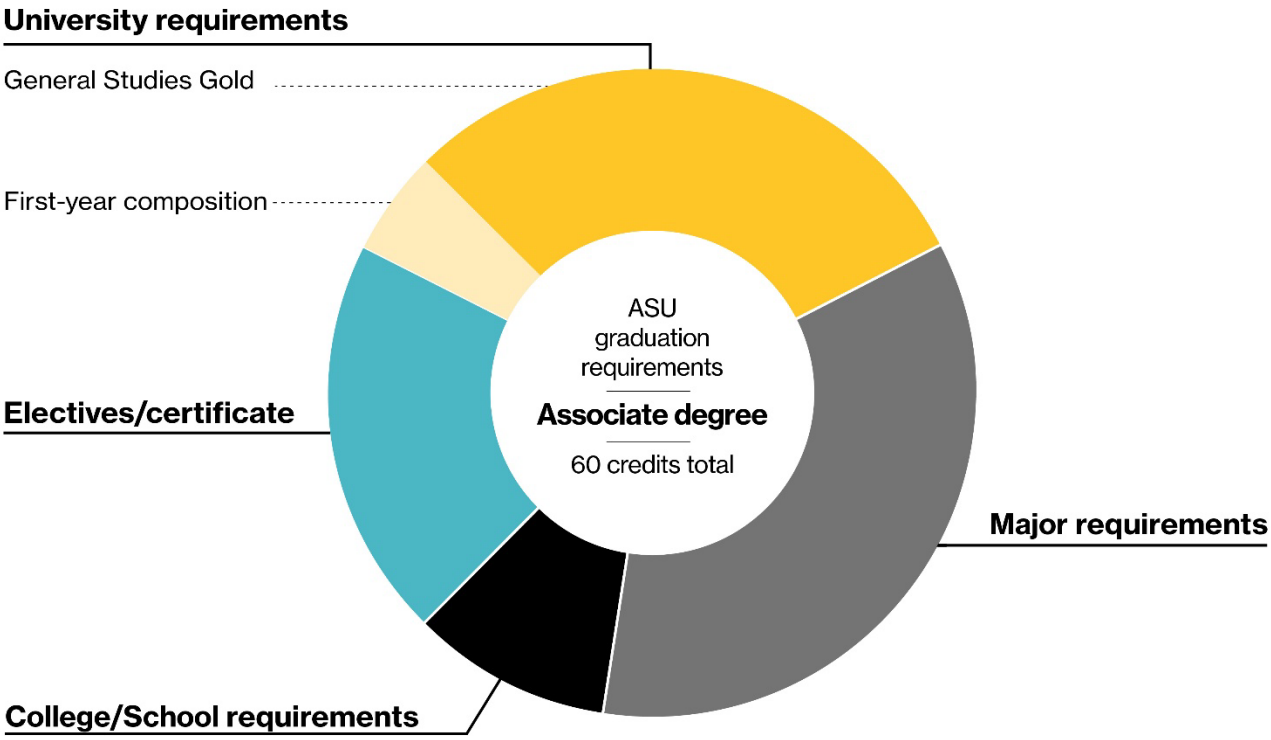
Students can review the ASU graduation [7] website for information on how to apply for graduation, and associated fees and deadline dates.

Petition for variance from degree

Any student wishing to have a college or university degree requirement variance must petition the standards committee of the college in which the student is enrolled. All petitions must originate with the student's advisor.

The University Undergraduate Standards Committee advises the Office of the University Provost regarding undergraduate student petitions that concern university-level academic requirements. These include requirements on the amount of transfer credit, graduation requirements, and limits on credit by examination. To petition for a variance from such university requirements, the University Undergraduate Standards Committee petition [8] is used. Most petitions heard by the University Undergraduate Standards Committee start at the college level and are forwarded for final review and decision to the university-level committee.

Overview of graduation requirements



Students in the following degrees should refer to the credit requirements for U.S. Naval Community College programs: [9]

- Computer Science and Artificial Intelligence, AS
- Emergency Management, AA
- Logistics (Maritime), AS
- Military Studies, AA
- Organizational Leadership, AA

The associate degrees comprise four parts: university requirements, college/school requirements, major requirements and electives.

University requirements include general studies and first-year composition requirements. Some colleges and schools at ASU have college-specific requirements applicable across all degrees offered within that academic unit. Major requirements represent the majority of the disciplinary content of the degree. Some degrees may also have room for electives, allowing students to complete credit hours toward the minimum number of credits required for graduation while they explore areas of personal and professional interest. Some students choose to declare a certificate, which typically adds 15–25 hours of coursework; this can also be used for elective credit. Students are encouraged to consult with their academic advisor in planning a program to ensure it meets all requirements.

Associate degrees consist of 60 credit hours. Some courses may fulfill two or more types of requirements, but other courses fulfill only one requirement. As such, the size of the circle segment attributed to each requirement category in the graphic below does not necessarily correspond to the exact number of credits required for each.

Changing majors

Some majors have specific requirements that a student must meet to be eligible for acceptance to the new major. A degree-seeking undergraduate student may view the requirements for changing majors on Degree Search [10] and visit the Changing your major site [11] for more information and resources on major exploration.

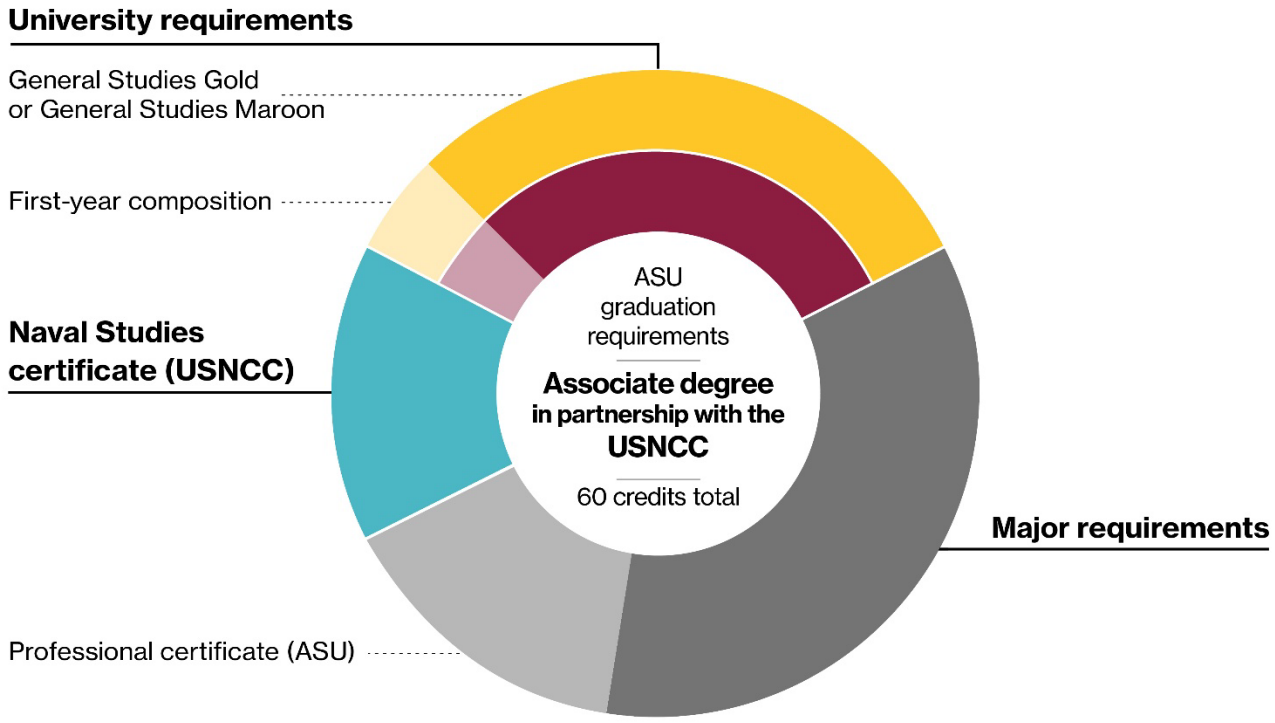
Changing from an associate degree to a bachelor's degree program may impact financial aid.

Graduation with academic recognition

Graduation with academic recognition is applicable only to bachelor's degree programs.

Concurrent degrees

If prior approval is given by the colleges or schools offering the degrees, more than one associate degree may be pursued concurrently. Students may receive concurrent degrees if they meet the minimum requirements for both degrees. Specific combinations of degrees may be deemed inappropriate because of high curricular overlap. Pursuing concurrent degrees may impact financial aid disbursement.



Associate degree programs offered in partnership with the U.S. Naval Community College

Associate degrees offered in partnership with the U.S. Naval Community College have been jointly designed with ASU specifically for enlisted personnel in the Navy, Marines and Coast Guard.

Overview of graduation requirements specific to U.S. Naval Community College programs

The associate degrees developed in partnership with USNCC comprise four parts: the Naval Studies certificate courses, the professional certificate courses, other major requirements and university requirements. As illustrated in the graduation

requirements diagram below, some courses may fulfill two or more types of requirements, but other courses fulfill only one requirement. The total credit hours needed to graduate are represented by the largest circle. The university minimum is 60 credit hours for an associate degree.

Minors and certificates

Students enrolled in an associate degree program offered in partnership with the U.S. Naval Community College are not permitted to add a minor or additional certificates.

Changing majors

Students enrolled in associate degree programs offered in partnership with the U.S. Naval Community College may only change to another USNCC associate degree program. Changes must be made in coordination with approval by USNCC.

Disestablished programs

A disestablished program is a major, minor or certificate that the institution has chosen to discontinue. Upon the effective term and year of disestablishment, ASU may choose to stop admitting new students to the program. This includes current ASU students seeking to change to the disestablished major, to add the disestablished major as a concurrent degree, or to add the disestablished minor or certificate. Active students in a disestablished program have a period of four academic years to complete the program requirements. This includes active, not enrolled students typically eligible for quick re-entry. Students who choose quick re-entry to the institution after a period of nonenrollment cannot re-enroll in a disestablished program if four academic years have passed since the effective term of disestablishment.

Students who have not completed the requirements for a disestablished program four academic years after disestablishment are changed administratively to a different major, or have the minor or certificate removed from their record.

Nondegree credit

Some individuals may be interested in studying in a nondegree status, either through pre-college summer programs or for their own personal learning experience. An undergraduate nondegree-seeking student is one who has not attended ASU as a degree-seeking student, has not earned an associate or bachelor's degree, is not attending full time, and is not currently applying to a degree program.

- Once admitted to a degree program, a student is not permitted to register in a nondegree status.
- Nondegree-seeking students may enroll in eight credit hours each fall or spring semester, seven credit hours for each six-week summer session, and nine credit hours for the eight-week summer session with a maximum limit of 24 credit hours over the course of the academic year.
- Nondegree-seeking students may apply up to 15 credit hours taken in nondegree status to a degree program if they choose to pursue an undergraduate degree in the future.
- Nondegree-seeking students are not eligible for financial aid.
- Students in a nondegree status may not be eligible for academic advising.

Exceptions to these guidelines may be made for specific programs or partners with approval from the Office of the University Provost. Students enrolled in ASU Prep may apply 30 credit hours earned at ASU while in a nondegree status toward a degree program.

Additional policies

Students enrolled in these degree programs are held to all other ASU and appropriate college policies [12], including:

- Academic good standing and probation [13]
- Grades and grading policies [14]
- Repeating courses [15]

University baccalaureate undergraduate graduation requirements

All students enrolled in a baccalaureate degree program must fulfill the following university requirements to graduate.

Credit requirements

Students must have completed a minimum of 120 credit hours to graduate with a baccalaureate degree; at least 45 credit hours must be in upper-division courses. Students should check the program's graduation audit and major map or curriculum checksheet for graduation requirements.

No more than 60 credit hours earned in independent learning courses or earned by comprehensive examination (including Advanced Placement, College-Level Examination Program, DANTES Subject Standardized Test, Cambridge International exam and International Baccalaureate exams) are accepted for credit toward the baccalaureate degree. Credit is not granted for courses taken at an educational institution after credit by examination has been awarded.

There may be instances in which students wish to remove exam credit earned through Advanced Placement, College-Level Examination Program, DANTES Subject Standardized Test, Cambridge International exam and International Baccalaureate exams. If the student elects to remove exam credit, the cumulative university hours are adjusted, and the student can complete the corresponding ASU course. When the student decides to complete the ASU course, the earned credit and grade always apply.

Grade point requirement

A minimum cumulative grade point average of 2.00 for all courses taken at ASU is required to graduate with an undergraduate degree. Some programs may require a cumulative GPA higher than 2.00; students should refer to the specific program's graduation audit and major map or curriculum checksheet for graduation requirements.

General studies requirement

All students enrolled in an undergraduate degree program must satisfy the university requirement for a minimum number of approved credit hours of general studies coursework. Effective fall 2024, ASU has approved a revised general studies curriculum. Students beginning in the 2024–2025 catalog year complete the requirements in the General Studies Gold curriculum [1]. Students who attended ASU before fall 2024 and are in a catalog year before 2024–2025 complete the requirements defined by the General Studies Maroon curriculum [2]. The requirements applicable for a student's catalog year are displayed on their major map or curriculum checksheet and graduation audit. Students should refer to the general studies policy [1] for more information on their specific general studies requirements.

Completion of general studies and composition requirements, as documented on an official transcript from regionally accredited institutions of higher education within the United States, fulfills ASU's lower-division general studies requirements within the Gold and Maroon systems as well as first-year composition requirements. Certification of completed general studies includes completion of a general education package recognized by ASU, an Associate of Arts degree, a bachelor's degree or comparable. General studies packages and recognized degrees do not waive program requirements and prerequisites within major and minor areas of study.

Transfer students without completed and documented general education packages or degrees receive credit for general studies based on course-by-course equivalency. Students transferring from Arizona community colleges should see the Arizona General Education Curriculum page for more information. [3]

Mathematics requirement

All undergraduate degree-seeking students are expected to fulfill the university's mathematics requirement by the time they have accumulated 30 credit hours in residence at ASU. Any student who has more than 30 credit hours and has not fulfilled the mathematics requirement must enroll in a mathematics course or an appropriate prerequisite course and continue to do so every semester until the mathematics requirement is met. A waiver may be granted for continuous enrollment if there are scheduling conflicts detrimental to the student's academic progress. Students should also see the math-intensive programs: required course policy. [4]

First-year composition requirement

Completion of ENG 101 and ENG 102, or ENG 105 with a grade of "C" (2.00) or higher is required for graduation from ASU in any baccalaureate or associate program. Students whose native language is not English may meet the first-year composition requirement by completing ENG 107 and 108 with a grade of "C" (2.00) or higher. Students who are required to take first-year composition must enroll in their first required composition course within the first year and continue to enroll in required composition courses every term until composition requirements are met.

Transfer credit

Composition courses transferred from other postsecondary institutions may require evaluation. If, after consultation with an advisor, it is determined that an evaluation is necessary, the student should submit a request for evaluation through the ASU Transfer Guide [5]. The process should be completed upon transfer of coursework to ASU so the student is able to enroll in additional courses, if required. Students who are required to take first-year composition must enroll in their first required composition course within the first year and continue to enroll in required composition courses every term until composition requirements are met.

Resident credit requirement

Resident credit refers to a course that is offered in a regular semester or summer session. Credit earned through comprehensive examinations also is included when calculating ASU resident hours. Credit earned through independent learning, Advanced Placement testing, the College-Level Examination Program or an International Baccalaureate exam is excluded when calculating ASU resident hours.

Every candidate for an undergraduate degree is required to earn a minimum of 30 credit hours in resident credit courses at ASU.

Definition of a catalog year

The ASU academic catalog is published annually, and curriculum changes take effect each fall semester.

Students who begin in the fall or spring semester follow the policies and requirements for that catalog year. For example, catalog year 2026–2027 applies to students who begin in fall 2026 or spring 2027.

Students who begin during the summer term are assigned to the subsequent catalog year. For example, students who begin in summer 2026 follow the 2026–2027 catalog year.

A catalog year is established when a student is admitted to a degree-seeking program. Enrollment as a non-degree-seeking student does not establish or begin a catalog year.

In most cases, a student's catalog year is the year in which they started at ASU. Students may be in a different catalog year for a variety of reasons, including:

- change of major
- continuous enrollment in an Arizona community college or public university
- student request to move to a newer catalog year
- significant changes to curriculum that are due to either accreditation or rapid changes to subject matter

Guidelines for determination of catalog year

The ASU Academic Catalog is published annually, and academic requirements may change from one catalog year to the next. To satisfy graduation requirements, undergraduate students must follow the requirements of a single catalog year for each credential. Students may choose any catalog year that was in effect during their enrollment, provided they meet the eligibility criteria outlined below.

Eligibility for catalog year use

Students may not use a catalog that was in effect before their high school graduation or completion of a GED.
Students who maintain continuous enrollment at an Arizona community college or public university may graduate under either:

- the catalog in effect when they initially enrolled after high school graduation or GED completion, or
- any single catalog in effect during their continuous enrollment

Continuous enrollment may be maintained while attending a single institution or while transferring among Arizona public institutions. Students who transfer must meet all requirements of the degree-granting institution, including admission, residency and academic requirements.

ASU students who return through the Quick Re-entry process may be eligible to continue under their previous catalog year, subject to academic advisor review and currency-of-coursework requirements.

Continuous enrollment

A semester counts toward continuous enrollment only if the student earns course credit. The following do **not** count toward continuous enrollment:

- noncredit courses
- audited courses
- failed courses
- courses from which the student withdraws

Students are not required to enroll during summer terms to maintain continuous enrollment. However, enrollment in a summer term in which course credit is earned may be used to maintain continuous enrollment.

Students who do not meet the minimum enrollment standard for three consecutive semesters (fall/spring/fall or spring/fall/spring), including the intervening summer term, are no longer considered continuously enrolled. They may be required to follow the catalog in effect at the time of readmission or any subsequent catalog during renewed continuous enrollment.

Students admitted or readmitted during a summer term must follow the catalog in effect for the following fall semester.

Review of coursework older than eight years

In some fields, subject matter changes rapidly, and earlier coursework may become outdated. Coursework more than eight years old may be applied toward a degree only at the discretion of the student's academic department. The department may accept, reject or require revalidation of such coursework.

The eight-year limit applies unless program accreditation requires a shorter timeframe. Departments may also require students to meet current major requirements when earlier requirements are no longer feasible or academically appropriate.

Transfer and institutional authority

Enrollment in nontransferable courses at an Arizona community college counts toward continuous enrollment.
ASU ultimately determines how coursework applies to its own degree requirements. Exceptions granted by previous institutions may not apply at ASU. For example, another institution may accept coursework more than eight years old, while ASU may require reevaluation of that same coursework.

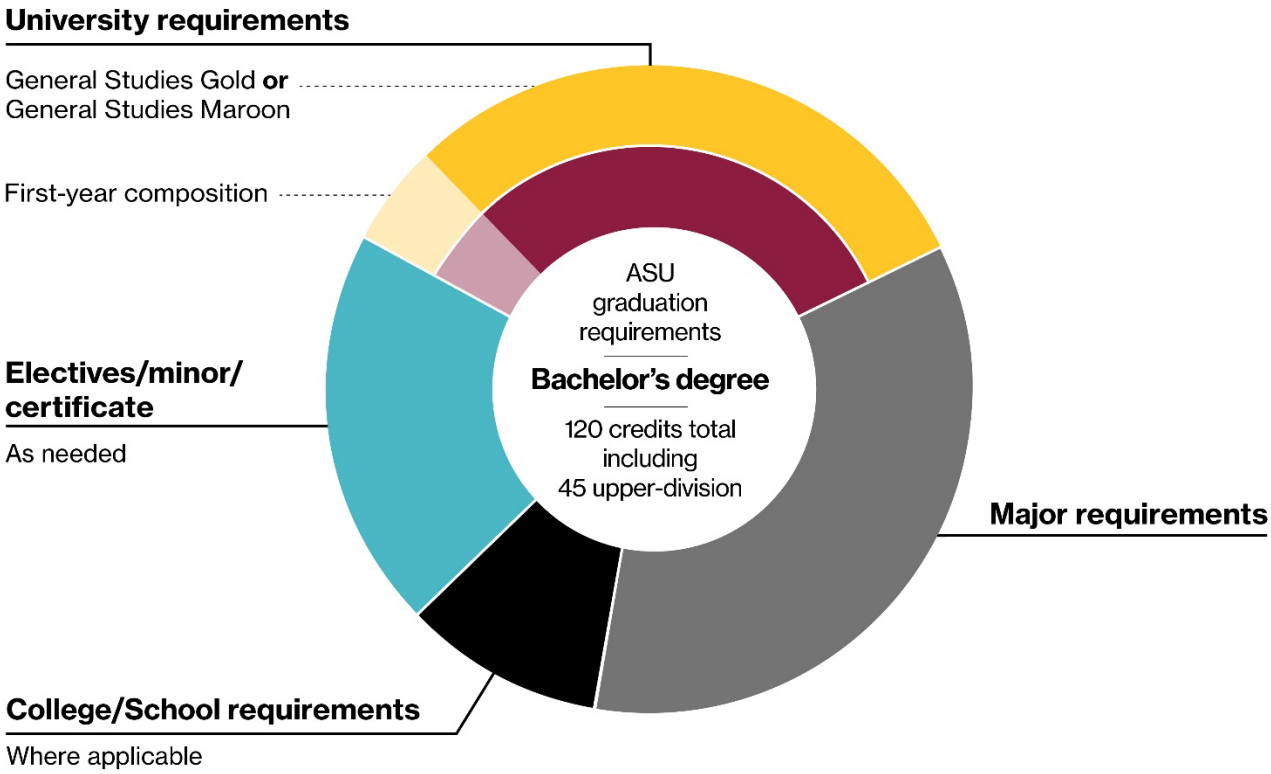
Application for graduation

Students should visit the ASU graduation website [6] for information on how to apply for graduation, associated fees and deadline dates.

Petition for variance from degree

Any student wishing to have a college or university degree requirement variance must petition the standards committee of the college in which the student is enrolled. All petitions must originate with the student's advisor.

The University Undergraduate Standards Committee advises the Office of the University Provost regarding undergraduate student petitions that concern university-level academic requirements. These include requirements on the amount of



transfer credit, graduation requirements, limits on credit by examination and requirements for a second baccalaureate degree. To petition for a variance from such university requirements, the University Undergraduate Standards Committee petition [7] is used. Most petitions heard by the University Undergraduate Standards Committee start at the college level and are forwarded for final review and decision to the university-level committee.

Overview of graduation requirements

At ASU, students take classes that fulfill four types of requirements: university requirements, college/school requirements, major requirements and electives.

University requirements include general studies and first-year composition requirements. Some colleges and schools at ASU have college-specific requirements applicable across all degrees offered within that academic unit. Major requirements represent the majority of the disciplinary content of the degree. Many degrees also have room for electives, allowing students to complete credit hours toward the minimum number of credits required for graduation while exploring areas of personal and professional interest. Some students choose to declare a minor or certificate; this typically adds 15–25 credit hours of coursework, which can also be used for elective credit. Students are encouraged to consult with their academic advisor in planning a program to ensure it meets all requirements for their specific combination of credentials.

Bachelor's degrees consist of 120 credit hours, 45 of which must be upper-division. Some courses may fulfill two or more types of requirements, but other courses fulfill only one requirement. For that reason, the size of the circle segment attributed to each requirement category in the graphic below does not necessarily correspond to the exact number of credits required for each

Change of major

Some majors may have specific requirements that a student must meet to be eligible for acceptance to the new major. A degree-seeking undergraduate student may view the requirements for changing majors on Degree Search [8] and visit the Changing your major site [9] for more information and resources on major exploration.

Changing from a bachelor’s degree to an associate degree program may impact financial aid.

Additionally, sponsored students, those who receive tuition benefits from a non-ASU entity, or those who accept certain federal funds, including military-affiliated benefit funding, should understand that changing their major may impact college costs. It is recommended that these impacts be fully explored and understood before changes are fully executed.

Graduation with academic recognition

Undergraduate students may qualify for graduation with academic recognition for a baccalaureate degree. The ASU cumulative GPA determines the designation, as shown in the academic recognition table below.

Academic recognition	
ASU cumulative GPA	**Designation**
3.40–3.59	cum laude
3.60–3.79	magna cum laude
3.80–4.00	summa cum laude

The cumulative GPA for these designations is based on ASU resident coursework only. All designations of graduation with academic recognition are indicated on the diploma and the ASU transcript. Graduation with academic recognition applies only to undergraduate bachelor's degrees.

A student who has a baccalaureate degree from ASU and is pursuing a second baccalaureate degree at ASU (with a minimum of 30 additional hours of resident credit) is granted academic recognition on the second degree based on the credit hours earned after the posting of the first degree.

Inquiries about graduation with academic recognition may be directed to University Registrar Services. [6]

Additional degrees

Second baccalaureate degree

Students seeking a second baccalaureate degree must meet admission criteria for that degree. After conferral of the first degree, students must successfully complete a minimum of 30 additional credit hours in resident credit courses at ASU to earn the second baccalaureate degree. The student must meet all degree and university requirements of the second degree.

Admission to a specific second baccalaureate degree program may be deemed inappropriate based on the discipline or degree type of the original baccalaureate degree, regardless of whether that degree was earned at ASU or another institution (e.g., admission to a BS program in psychology after earning a BA in psychology).

A student pursuing a second baccalaureate degree in the same discipline as a minor previously conferred by ASU will have the minor removed from the original academic record upon completion of the second degree.

Students who wish to use courses taken while in graduate nondegree status toward a second bachelor’s degree may have up to 15 credit hours applied toward this degree.

Concurrent degrees

If prior approval is given by the colleges or schools offering the degrees, more than one baccalaureate degree may be pursued concurrently. Students may receive concurrent degrees if they meet the minimum requirements for both degrees. Specific combinations of degrees may be deemed inappropriate because of high curricular overlap.

For additional information, students can review the glossary description. [10]

eAdvisor and critical requirements

eAdvisor [11] ensures that students get off to a good start and stay on track toward graduation by helping them find a major that fits their talents and career goals, and then monitoring progress. Students use eAdvisor to do the following:

1. Learn more about graduation requirements for their major.
2. Discern the critical courses and grades that are required to stay on track to successfully complete their degree.
3. Plan for and schedule appropriate courses in the correct sequence to maximize success.
4. Monitor progress toward their degree.
5. Find out how courses may fit into other majors if they decide to change majors.

Through eAdvisor, students follow a major map that outlines the critical requirements and optimal eight-semester plan. If a student does not meet the critical requirements, an advising hold may be placed on their record, and an advising session is required before future registration activities can take place. When students do not meet the critical requirements for two consecutive semesters, they are considered off track and may be advised to change majors.

Critical requirements are identified by the faculty and academic units as predictors of success in a major. To ensure that students are able to enroll in critical courses, ASU academic units coordinate to offer sufficient seats to meet demand. Specific class schedules (days and times) are not guaranteed.

Math-intensive programs: required course policy

ASU undergraduate degree programs are categorized in the area of math intensity [12] as either general, moderate or substantial based on the number and type of required math courses. Students enrolled in a degree program that is categorized as substantial in math intensity who receive a failing grade of “E” twice in the same required math course may be required to change their major to one categorized as general or moderate. This policy is applicable even if the required math course is not marked as critical through the eAdvisor tracking tool.

Disestablished programs

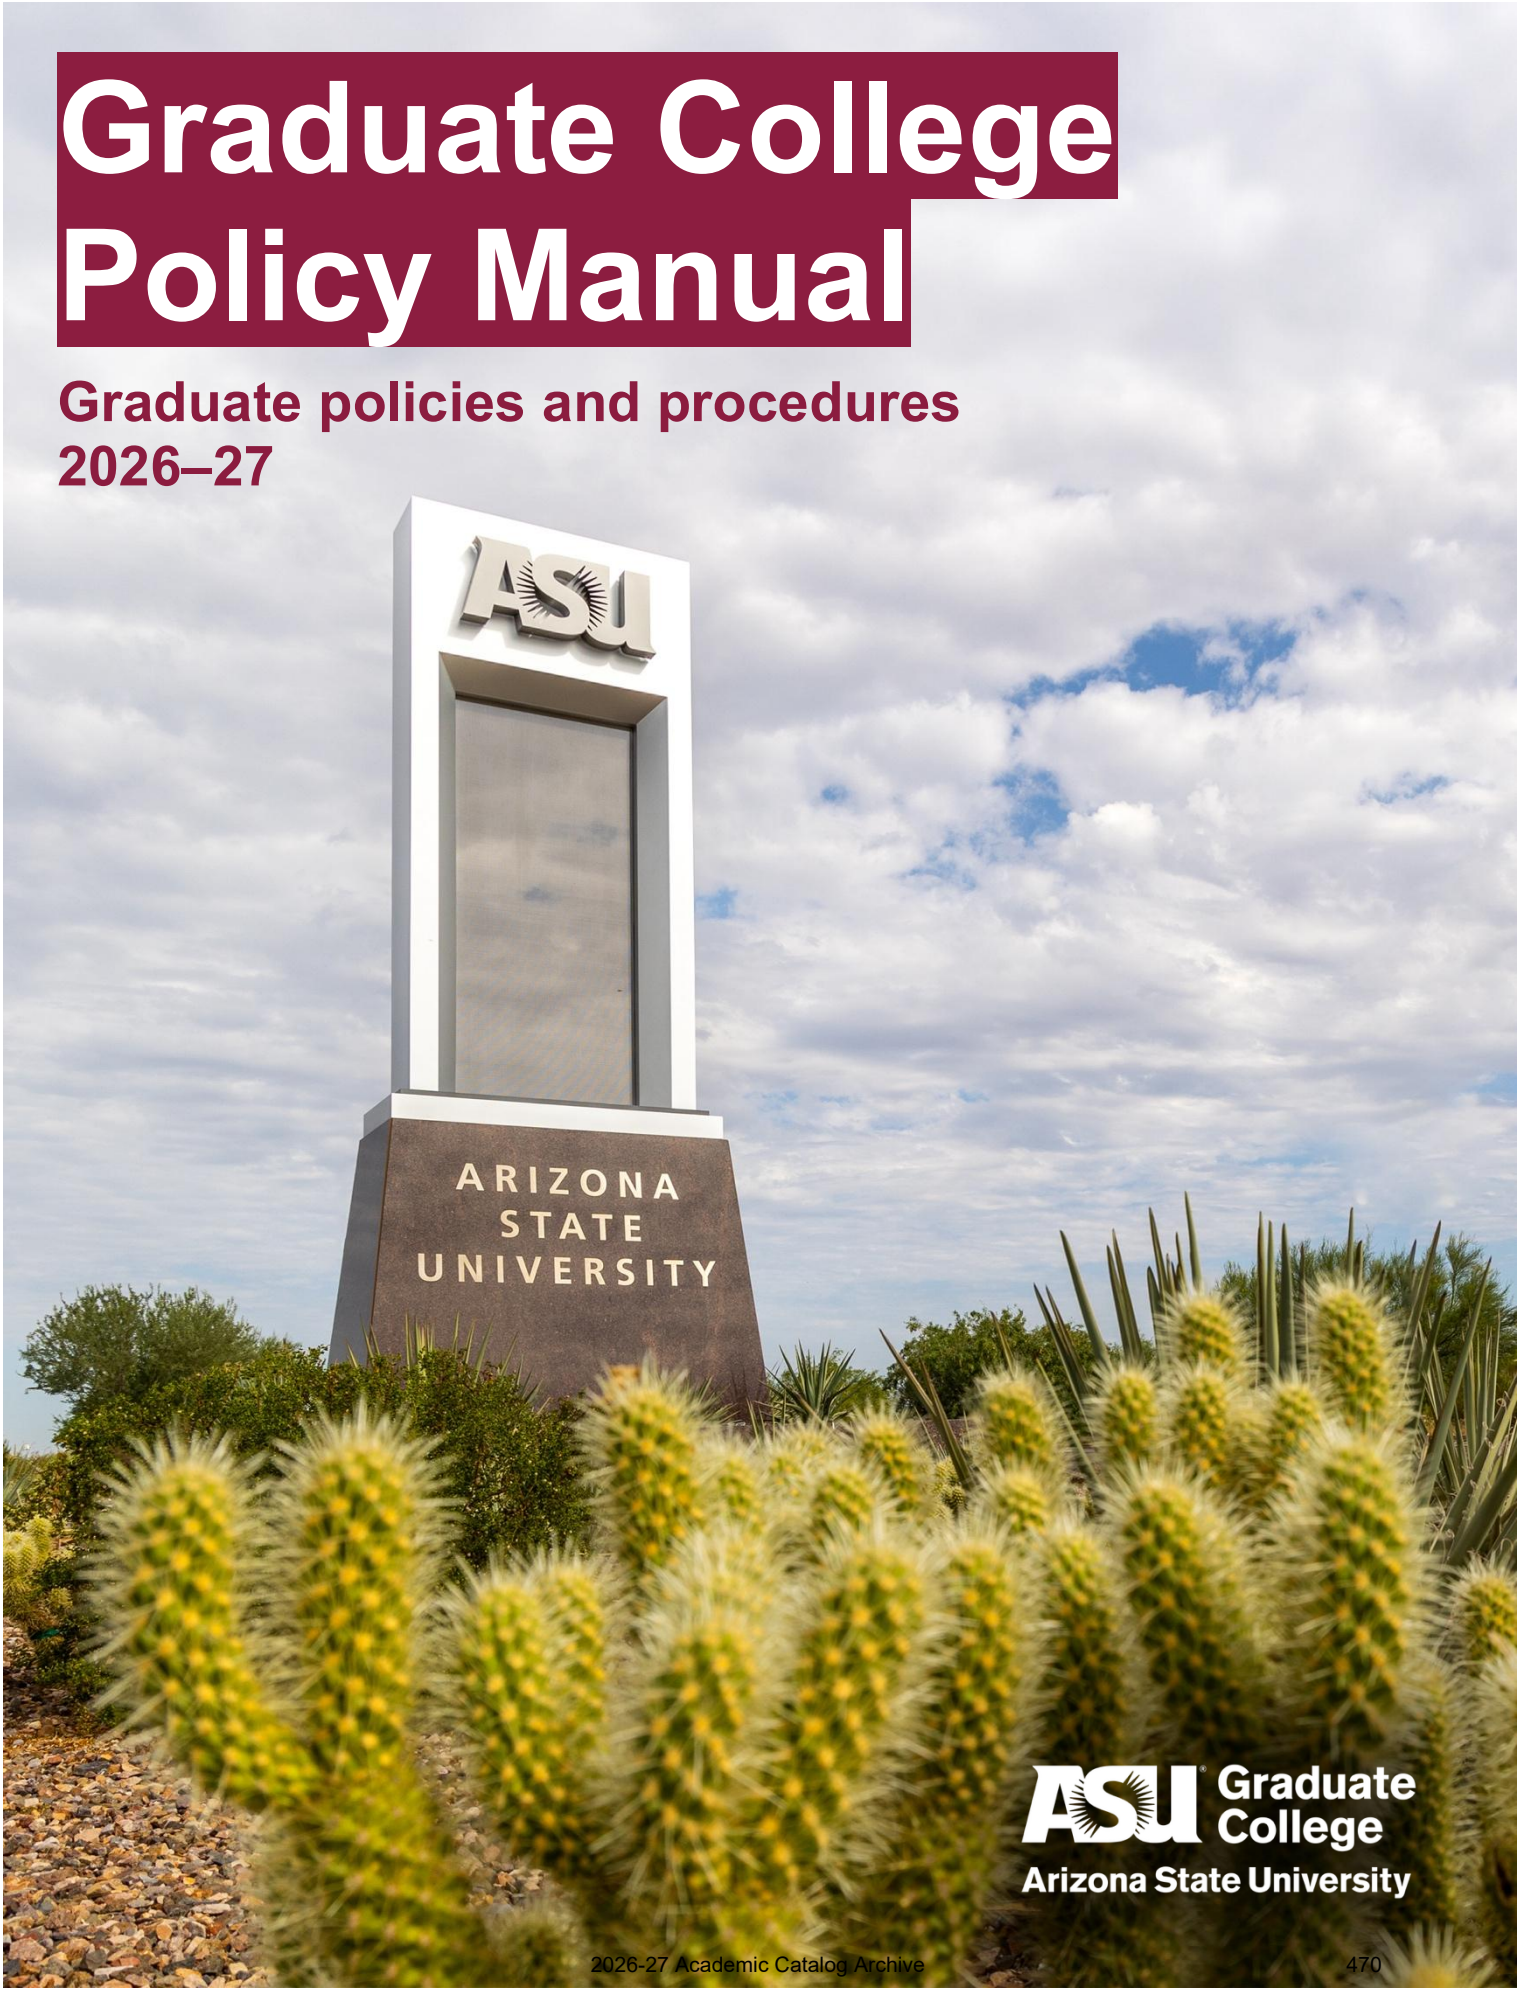
A disestablished program is a major, minor or certificate offering that the institution has chosen to discontinue. Upon the effective term and year of disestablishment, ASU may choose to stop admitting new students into the program. This includes current ASU students seeking to change to the disestablished major, to add the disestablished major as a concurrent degree, or to add the disestablished minor or certificate. Active students in a disestablished program have a period of four academic years to complete the program requirements. This includes active, not enrolled students typically eligible for quick re-entry. Students who choose quick re-entry to the institution after a period of nonenrollment cannot re-enroll in a disestablished program if four academic years have passed since the effective term of disestablishment.

Students who have not completed the requirements for a disestablished program four academic years after disestablishment are changed administratively to a different major or have the minor or certificate removed from their record.

Nondegree credit

Some individuals may be interested in studying in a nondegree status, either through precollege summer programs or for their own personal learning experience. An undergraduate nondegree-seeking student is one who has not attended ASU as a degree-seeking student, has not earned an associate or bachelor's degree, is not attending full time, and is not currently applying to a degree program.

- Once admitted to a degree program, a student is not permitted to register in a nondegree status.
- Nondegree-seeking students may enroll in eight credit hours each fall or spring semester, seven credit hours for each six-week summer session, and nine credit hours for the eight-week summer session, with a maximum limit of 24 credit hours over the course of the academic year.
- Nondegree-seeking students may apply up to 15 credit hours taken in nondegree status to a degree program if they choose to pursue an undergraduate degree in the future.
- Nondegree-seeking students are not eligible for financial aid.
- Students in a nondegree status may not be eligible for academic advising.



Exceptions to these guidelines may be made for specific programs or partners with approval from the Office of the University Provost. Students enrolled in ASU Prep may apply 30 credit hours earned at ASU while in a nondegree status toward a degree program.

Introduction

The Graduate College admits students into programs leading to both professional and research-oriented advanced degrees and certificates beyond the bachelor's degree. Master's and doctoral degrees are awarded to students who complete programs that culminate in research and creative endeavors. The doctoral degree is the highest university award, conferred on candidates who have proven their ability as scholars and original researchers.

Students are therefore admitted both to their academic programs and to the Graduate College of Arizona State University. This Policy Manual outlines policies and procedures that apply to all graduate students who matriculate at Arizona State University, from application to graduation. Graduate College policies supersede all academic program policies, although units may impose stricter policies. The Vice Provost and Dean of the Graduate College, hereafter referred to as "Dean," has final authority in matters of Graduate College policy and procedure.

Academic Integrity

The highest standards of academic integrity and compliance with the university's Student Code of Conduct are expected of all graduate students in academic coursework and research activities. The failure of any graduate student to uphold these standards may result in serious consequences, including suspension or expulsion from the university and/or other sanctions as specified in the academic integrity policies of individual colleges and the university.

Violations of academic integrity include, but are not limited to cheating, fabrication of data, tampering, plagiarism, or aiding and/or facilitating such activities. At the graduate level, it is expected that students are familiar with these issues and assume personal responsibility in their work. Toward this end, the Graduate College provides an online Academic Integrity Tutorial, which all newly admitted graduate students are expected to complete within their first semester of coursework. This Tutorial appears under "Priority Tasks" in their My ASU screen.

Additionally, graduate students pursuing research that is funded by external sponsors are responsible for understanding and completing the necessary training to ensure the responsible conduct of such research. It is very important that students check with their thesis/dissertation advisor well in advance of data collection to ensure compliance with university regulations, and may seek further assistance from the university's Office for Research Compliance. Please see the section of this guide titled "Research Involving Human and Animal Subjects."

Notice of Non-Discrimination

ASU prohibits all forms of discrimination, harassment and retaliation.

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in its education programs or activities, including admission and employment. Inquiries concerning the application of Title IX may be referred to the Title IX coordinator or to the U.S. Department of Education, assistant secretary, or both.

Contact titleixcoordinator@asu.edu or 480-965-0696 for more information. Information on how to make a report can be found online.

Inclusive Excellence

As part of the ASU community, the Graduate College upholds, values, and enacts the ASU Charter on behalf of its graduate students and postdoctoral scholars. Our commitment to just and equitable treatment starts with our policies, continues with our processes, and imbues our practices in all we do, from admissions to alumni relations. That means treating every graduate student and postdoctoral fellow fairly and justly, demonstrating our commitment to inclusive excellence and our promise to those we include and how they succeed.

Graduate Student Responsibilities

Graduate students are responsible for familiarizing themselves with all university and graduate policies and procedures. Students should also communicate directly with their academic unit to be clear on expectations for degree completion.

Communications with the Graduate College

Important information from the Graduate College is provided to students via their My ASU portal, Interactive Plan of Study (iPOS) and ASU email account. Students should frequently check their My ASU account, iPOS and ASU email account for the most up-to-date information regarding their status, holds, items to attend to and other important information. All email communication to the Graduate College must come from the secure ASU email account.

Expressing Concerns and Resolving Conflicts

Occasionally, a student may run into difficulties with a peer, faculty member, or even advisor or supervisor that seem to defy resolution. While every situation is different, we encourage the following resources and processes.

For matters related to sexual harassment, discrimination, and/or retaliation, follow the reporting procedures.

For matters that appear to be outside the scope of formal reporting to the Title IX Office or Office of University Rights and Responsibilities, but are nevertheless difficult to resolve and interfere with the student's effective academic progress, we recommend the following:

1) If possible, students should report program-specific issues to the program area head or area coordinator.
2) If this report does not resolve the issue or the student is uncomfortable speaking to the program area head or area coordinator, the student may approach the appropriate graduate administrator in their school (e.g., Director of Graduate Studies).
3) If a student feels that their concern has not been adequately heard or resolved, they may schedule a meeting with the Director of their school.
4) If a student feels that their concern has not been adequately heard or addressed after meeting with individuals in the school, they may report to the appropriate representative in the academic college Dean's Office.
5) If a student is uncomfortable working through the school procedure for any reason, they may go directly to the academic college Dean's Office representative.

Graduate Student Government

Graduate Student Government (GSG) is the graduate student government for Arizona State University. They advocate for students, not only on the university level, but in all levels of government and provide services and resources that facilitate and empower student success in all aspects of academic and professional life. From travel grants to research grants and professional development initiatives, they enhance the graduate student experience. Join them in championing graduate student concerns on all levels. Visit the GSG webpage for more information and join them on social media to stay informed of real-time events and resources.

Ombudspersons

Designated as impartial factfinders who can facilitate problem-solving, ombudspersons at the university can help students who are unsure how to resolve their complaints or unsure where to go next. Refer to the list of designated ombudspersons at ASU.

Application

Submission of an Application

General admission information and procedures are available online. Applications for all graduate degrees, microcertificates, certificates and non-degree seeking students must be submitted via the graduate application portal. Select initiatives provide exceptions to this process.

Prior to applying to the Graduate College, applicants should review the specific graduate program and academic unit application requirements and deadlines.

Note: Students who are returning to school after an approved Leave of Absence are not required to reapply, so long as the following applies: they must have a Graduate College-approved Leave of Absence or enrollment exception on file with the Graduate College and be re-entering the same graduate program for the semester immediately following the approved request.

Application Deadlines

Application deadlines are set by the graduate programs. Consult the program website or the Graduate Degrees and Certificates search tool for specific application deadlines.

International students wishing to attend an in-person program must apply to Sessions A or C only (Applications for Session B are not available to international students due to visa requirements).

Application Fee

Each application to an ASU graduate program must be accompanied by a non-refundable application fee, payable by credit or debit card at the time of submission. The application fee covers Graduate Admission Services' administrative costs of processing all applications and is not refundable under any circumstance.

Applicants receive an email acknowledgment once the application has been successfully submitted. The acknowledgment includes an ASURITE ID and activation code so students can track the progress of their application in My ASU. Applicants should review My ASU to monitor their application status, "To Do" items and "Holds".

Application Requirements

Applicants must submit official transcripts from their bachelor's-granting postsecondary institution. Additional transcripts may be required:

1. To verify that international credentials are comparable to a U.S. bachelor's degree.
2. If significant coursework used towards the bachelor's degree was completed at another institution.
3. If the applicant intends to transfer prior graduate-level coursework into an ASU graduate program. Information about specific program requirements and general requirements is available online.

Academic units may have additional admission requirements. Some graduate programs require scores from a national admissions test such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT) or the Miller Analogies Test (MAT). Some programs require a portfolio, letters of recommendation, a statement of goals and/or a resume.

Applicants should consult the academic unit regarding program admission requirements prior to submitting an online application. Programs submit a recommendation to the Dean of the Graduate College regarding their willingness to admit an applicant.

All documents received by Graduate Admission Services in connection with an application become the property of ASU and will not be returned.

Academic Credentials

Applicants must have earned a bachelor's degree or higher from a regionally accredited institution in the U.S. or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country. Effective spring 2025, international three-year bachelor's degree programs may be reviewed for admission. Applicants are required to have completed their bachelor's degree prior to the start of their graduate program, and provide the final, official documents to ASU showing completion and attainment of a bachelor's or graduate degree prior to registration in the second semester of graduate studies at ASU.

If original credentials are issued in a language other than English, applicants must provide the original-language transcripts as well as an official literal translation. Photocopied documents certified by a notary public are not official. Professional third-party credential evaluation reports may not be used in place of official transcripts or in place of literal English translations.

Competitive applicants have a "B" (3.00 on a 4.00 scale) grade point average in the last 60 semester hours or 90 quarter hours of undergraduate coursework. Applicants who do not meet the minimum GPA requirements may still be considered by the program. Students may be admitted with additional requirements identified by the program.

Because ASU receives applications from many highly qualified students, some applicants may be denied admission for reasons not related to their academic performance. Examples include, but are not limited to program capacity, mentor availability and program match.

ASU may make an exception to the U.S. equivalent bachelor's requirement for admission to certain preapproved programs. This exception may require specific documentation, including, but not limited to postsecondary education, significant work experience in the discipline and a non-U.S. equivalent degree that the college leadership and the ASU Graduate College Dean deem equivalent to the learned skills of a bachelor's degree in that discipline. For specific program requirements, visit ASU Degree Search.

Special Admission Programs

Students who meet the eligibility criteria for ASU Personalized Graduate Admissions (ASUPGA) or Graduate Earned Admission (GEA) receive an admission offer for one or more ASU graduate programs. Students who accept an offer are admitted to one selected ASU graduate degree program without submitting a graduate admission application or supplemental materials.

Students participating in an Accelerated Master's Program are also eligible for admission to their intended ASU master's degree program without submitting a graduate admission application or supplemental materials. They become eligible for admission via the Accelerated Applicant Tracking Tool upon applying for graduation from their undergraduate degree. Candidates for an Accelerated Master's Program are ineligible to receive ASU Personalize Graduate Admissions offers.

Additional International Requirements

International Applicants

Please consult the Graduate Admission Services and international student visas websites for complete information. Applicants who will hold an F-1 or J-1 visa must:

1) Meet the regulations of the U.S. Immigration and Customs Enforcement (ICE) agency.
2) Obtain insurance coverage against illness and accidents before being permitted to register for classes. Insurance must be maintained throughout the students' enrollment at the university.
3) Submit proof of English proficiency.
4) Submit additional materials as outlined on the International Graduate Admission Services website.
5) Verify that they have the financial resources to cover their expenses during graduate study at ASU by submitting the Financial Guarantee form. In addition to the Financial Guarantee form, if ASU is providing an assistantship, an official offer letter must be sent to Graduate Admission Services or the International Students and Scholars Center. Similarly, if a governmental entity is funding the student, an official letter from the government must also be submitted to Graduate Admission Services.

The I-20 or the DS-2019 (documents needed to obtain a student visa) is issued only after the completed and properly verified Financial Guarantee form, acceptable proof of funding, proof of English proficiency and supporting documents have been received by Graduate Admission Services. International students may enroll at ASU only if they have been admitted to a degree program or the certificate program for teacher certification.

International students must be enrolled in a graduate degree program to enroll in an in-person certificate program.

English Language Requirement

English proficiency is required for all students who wish to enter an ASU graduate program. English proficiency is only valid for two years and must be taken within two years from the beginning of the semester for which the student applied. There are several ways to meet the English proficiency requirement:

- TOEFL iBT® score of at least 80 if taken before January 21, 2026 or at least 4 if taken on or after January 21, 2026. The TOEFL is administered by TOEFL/ETS. ASU accepts the TOEFL iBT® taken in a testing center. ASU accepts the TOEFL iBT® Home Edition for exams taken January 21, 2026 or after. TOEFL iBT® Paper Edition is not accepted. ASU's institutional code is 4007. ASU accepts only electronic copies of the TOEFL score report.
- IELTS overall band score of at least 6.5. The IELTS is administered by the University of Cambridge. No institutional code is needed.
- Pearson Test of English (PTE) score of at least 60. The PTE is administered by Pearson.

- Duolingo English Test score of at least 105.

Alternatively, Global Launch provides options to satisfy the ASU English Proficiency requirement by completing Advanced Level 2. It is recommended that students check with their department first before enrolling to ensure the college in which their program resides will accept one of these options.

Graduate options:
- English for Graduate Admissions and Achievement Online Course.
- Completion of online course with a passing score.
- English Language Program – In-person or Online.
- Complete Advanced Level 2 with passing score.

Individual academic units may have higher requirements for English proficiency. Consult the academic unit's website.

Some applicants are exempt from the English proficiency requirement. The following exceptions must be met exactly to be considered for an exemption:
- Applicants who are U.S. Citizens or U.S. Permanent Residents.
- Applicants who have earned a bachelor's degree or higher from a regionally accredited college/university in the United States.
- Applicants who have earned the equivalent of a U.S. bachelor's degree or higher from an international institution that is officially recognized by that country, and the country is on the ASU English Speaking Country and Territory List (official transcript required).
- Applicants who have earned the equivalent of a U.S. bachelor's degree or higher from an international institution that is officially recognized by that country, and the sole medium of instruction for the program was in English (official transcript required). Students requesting an exemption must submit a letter from the institution on letterhead indicating the language of instruction or provide information on the institution's website to verify the language of instruction using the English Proficiency Exemption Form Medium of Instruction.
- Applicants who have completed at least 9 semester hours of graduate coursework with a cumulative GPA of 3.0 (on a 4.0 scale) or higher at a regionally accredited college/university in the United States or from an international institution that is officially recognized in that country and is on the ASU English Speaking Country and Territory List (official transcript required).
- Applicants who have completed at least 90 semester hours of undergraduate coursework with a cumulative GPA of 3.0 (on a 4.0 scale) or higher in residence at a regionally accredited college/university in the United States (official transcript required).
- Applicants who have completed ASU Global Launch's English for Graduate Admissions and Achievement online course with a passing score.
- Applicants who have completed Advanced Level 2 of ASU Global Launch's English Language Program – either in-person or online with passing scores.
- Applicants who have a U.S. High School Diploma (official transcript required).
- Applicants who are citizens from a country or territory listed on the ASU English Speaking Country and Territory List.
- Applicants who have listed a future conferral date from an ASU bachelor's degree program on their application for admission and will complete their ASU undergraduate degree before starting their graduate program.

All international applicants from countries where English is not the native language must pass an examination that certifies their skill in speaking English before applying for teaching assistantships. English proficiency for admission may not fulfill the English proficiency requirements for teaching assistantships. Visit the International Teaching Assistant website for information on fulfilling this requirement. Departmental requirements may differ, so it is recommended that applicants contact their departments for specific details.

Non-Degree Seeking Applicants

Applicants who do not immediately intend to pursue a graduate degree may apply as non-degree seeking students. The application process does not require the submission of academic credentials or test scores.

Non-degree applicants must have earned a bachelor's degree or higher from a U.S. regionally accredited institution or the equivalent of a U.S. bachelor's or graduate degree from an international institution that is officially recognized by that country.

There is no limit to the total cumulative credit hours students can take as non-degree students. However, to apply the credit hours toward an ASU master's or doctoral degree, students are limited to 15 credit hours taken per pre-admission policy.

Non-degree students may not be eligible to enroll in some classes. Students should check the enrollment requirements before registering and contact the academic unit offering the courses with questions regarding qualification for registration. See "Non-Degree Students" in the section "Registration and Enrollment" for more information.

Financial aid is not available to non-degree students.

In-person non-degree study is typically not available to international students on F-1 or J-1 visas. For exceptions, prior to applying, students must contact their Designated School Official (DSO) at the school managing their SEVIS record to inform them that they have applied to take non-degree classes at ASU.

After Applying

Applicants receive an email acknowledgment once the application has been successfully submitted. The acknowledgment includes an ASURITE ID and activation code so that students may follow the progress of their application through My ASU. Applicants should review My ASU to monitor their application status, "To Do" items and "Holds".

Admissions

Competitive applicants have a "B" (3.00 on a 4.00 scale) grade point average in the last 60 semester hours or 90 quarter hours of undergraduate coursework. If students do not meet the minimum GPA requirements, their application may still be considered by the department.
Academic units submit recommendations regarding admission decisions to Graduate Admission Services, but only the Dean of the Graduate College can make formal offers of admission.

Applicants monitor the status of their application through My ASU. If admitted, the formal letter of admission can be downloaded from My ASU. If denied admission, letters are sent via email to the address on record.

Campus Modality

Students may apply to both campus-based immersion programs and online-based digital immersion programs. However, students must choose one modality to attend if admitted to both.

Progression Requirements

Applicants may be admitted with additional requirements and a deadline to complete the additional requirements, as determined by the program of admission. These requirements may include successful completion of specific coursework or minimum grades and/or GPA. Additional requirements are outlined in the student admission letter and appear on the iPOS.

Admission Deferrals

Students may, with the recommendation of the degree program, defer their initial start semester and year of admission. Requests for deferrals must be submitted by the last day to drop a class for session C for campus immersion students and the last day to drop a class for session B for ASU Online students. Students who miss the deferral deadlines have the option to submit a petition for an enrollment exception for the original admit term.

International Student Admission

International students planning to attend ASU on an F-1 student visa or a J-1 exchange visitor visa must provide documentation required by the United States Citizenship and Immigration Services. Certificates of Eligibility are issued only to international students enrolled in a degree program or the post baccalaureate teacher education program. There are strict regulations regarding when an I-20 or DS-2019 can be issued.

Academic Renewal

Academic renewal is a university policy that resets the graduate cumulative ASU GPA of a returning ASU graduate student. To request an academic renewal, applicants must have:

- Not previously received an academic renewal; and
- A cumulative ASU GPA below 3.0; and
- Been admitted to a graduate degree program after an absence from ASU of at least five calendar years; and
- Not been previously dismissed from ASU due to Academic Integrity or Student Conduct violations.

Students approved for academic renewal cannot apply any previously completed coursework or credit hours to their degree program and must complete all degree requirements after admission. All courses completed before and after the academic renewal remain on the transcript and may be considered when students apply for other graduate programs. To pursue an academic renewal, students should seek advising from the intended program of admission.

Registration and Enrollment

Graduate students register through My ASU according to their enrollment appointment. Details regarding registration and course drop/add procedures are provided in the Registration and Tuition Payment Guide.

My ASU is an important tool to use during your ASU experience. Among other helpful information, students can access next steps and to-do items for enrollment and registration holds that need attention.

Enrollment Deposit

All master's students admitted to campus immersion programs must submit a graduate enrollment deposit before registration.

Immunizations

All students admitted to campus immersion programs are required to have proof of measles immunizations on file with Student Health prior to registration.

Enrollment Verification Guidelines

The University's Registrar's Office will verify student enrollment each semester in accordance with the general guidelines that follow.

Enrollment Guidelines for Graduate Students

Term	Full-time	3/4 time	Half time	Less than half-time
Fall & Spring	9+ credits	7-8 credits	5-6 credits	1-4 credits
Summer	3+ credits	N/A	2 credits	1 credit

*Audited courses do not count toward full-time enrollment

International F-1 and J-1 students are required to maintain full-time enrollment status. Any exception to full-time enrollment must be approved in advance by the International Students and Scholars Center (ISSC).

Registration for Students Holding Graduate Appointments

Students with Graduate Research or Teaching appointments (RA/TA) must maintain enrollment in a minimum of 6 non-audit credit hours during each fall and spring semester appointments, and a minimum of one non-audit credit hour for summer semester appointments. Academic units may have specific requirements regarding RA/TA appointments; students should consult with their degree program unit. Failure to maintain enrollment in the minimum required hours will result in the termination of their appointment. Students with RA/TA appointments should refer to the Graduate Assistant Handbook for more information.

Full-time equivalent (FTE) is a unit of measurement used to determine the number of hours students are involved in appointment activities. An FTE of 1.0 (100%) is equivalent to 40 hours per week. An FTE of 0.50 (50%) represents an appointment of 20 hours per week and is the maximum graduate appointment allowed by ASU.

RAs and TAs appointed for 50% FTE (20 hours per week) receive a tuition award (reflected as RA/TA Remission on their student account) for 100% of ASU graduate tuition. This appointment also provides premium coverage for ASU individual health insurance if the student elects for health insurance coverage. Please note that if health insurance is needed, students must select that option when registering for classes on My ASU; if they decline, they will be without coverage from the university. The university does not cover premiums for any other insurance plan.

RAs and TAs appointed for 25% FTE (10 hours per week) receive a partial tuition award (reflected as RA/TA Remission on their student account). Students are responsible for 50% of the Arizona base resident tuition costs. This appointment does not provide premium coverage for ASU individual health insurance.

RA and TA appointments do not cover university mandatory fees, program tuition or fees for the academic year or summer sessions; these are the responsibility of the student.

Due to federal regulations, international students may be appointed a maximum of 20 hours per week during fall and spring semesters.

International students may be allowed to work 40 hours per week during summer sessions. International students are typically not allowed to seek employment outside the university and should consult with the International Students and Scholars Center (ISSC) to confirm eligibility.

Maximum Course Load

The Graduate College does not have a maximum credit hour enrollment policy for degree-seeking students. It is expected that academic units will set course loads for their students that facilitate academic success.

Continuous Enrollment

Once admitted to a graduate certificate or degree program, students must be registered for a minimum of one graduate-level credit hour during all phases of their graduate education, including the terms in which they were admitted and graduate. This includes periods when students are engaged in research, conducting a doctoral prospectus, working on or defending theses or dissertations, taking comprehensive examinations, taking Graduate Foreign Language Examinations or in any other way utilizing university resources, facilities or faculty time.

Registration for every fall and spring semester is required. Summer registration is required for students taking examinations, completing culminating experiences, conducting a doctoral prospectus defense, defending theses or dissertations or graduating from the degree program. Summer registration is also required for students whose first matriculation term is summer and for those graduating in summer.

To maintain continuous enrollment, the credit hour(s) must satisfy one or more of the following:

- 500, 600, or 700-level graduate course
- 400-level undergraduate course that is a degree requirement on an approved iPOS
- Undergraduate course that is a progression requirement

Grades of “W” and/or “X” are not considered valid registration for continuous enrollment purposes. “W” grades are received when students officially withdraw from a course after the drop/add period.

“X” grades are received for audit courses. All other grades, including “E,” “EU” and/or “EN” are considered valid registration for continuous enrollment purposes despite receiving no credit. “E” is a failing grade, “EU” is for failing and did not complete the course, and “EN” is for failing and never participated in the course. Undergraduate courses not included on the iPOS do not satisfy the Graduate College continuous enrollment policy.

Additionally, students completing work for a course in which they received an incomplete grade of “I” must maintain continuous enrollment as defined previously. Graduate students have one year to complete work for an incomplete grade; if the work is not completed and the grade is not changed within one year, the “I” grade becomes permanent and remains on the students’ transcripts.

Leaves of Absence

Graduate students who do not plan to register for one or more semesters must submit a Leave of Absence request via their Interactive Plan of Study (iPOS). Students may request a maximum of two semesters of leave during their entire program. Having an approved Leave of Absence by the Graduate College enables students to re-enter their program without re-applying to the university.

Students who do not register for a fall or spring semester without an approved Leave of Absence or enrollment exception are discontinued from the university. Students removed for this reason may reapply for admission to resume their degree program; the application will be considered along with all other new applications to the degree program.

Students with a Graduate College-approved Leave of Absence are not required to pay tuition and/or fees, but in turn are not permitted to place any demands on university faculty or use any university resources. These resources include university libraries, laboratories, recreation facilities or faculty and staff time.

Voluntary Withdrawal from ASU

Students who wish to withdraw from their graduate certificate or degree program and the university must complete and submit a Voluntary Withdrawal form. If withdrawing from the university, students must also

withdraw from all courses. International students should contact the International Students and Scholars Center (ISSC) before submitting a Voluntary Withdrawal form, as this will most likely affect their visa status.

Voluntary Withdrawal for Choosing a New Program

Students who wish to discontinue a graduate program should complete and submit a Voluntary Withdrawal form. Students should not take this action until they have been admitted to the other graduate degree program.

Medical/Compassionate Withdrawal

There are appropriate circumstances in which students may need to withdraw from the university (i.e., medical withdrawal, compassionate leave). The policies for such withdrawals are the same for both undergraduate and graduate students. An approved Medical/Compassionate Complete Withdrawal is valid towards meeting the continuous enrollment policy.

Non-Degree Students

Because non-degree graduate students are not admitted to a certificate or degree program, continuous enrollment is not required. Students should review the enrollment requirements for each course before registering and contact the academic unit offering the course with any registration-related questions. With the approval of the academic program, non-degree seeking students who decide to apply to a degree program may apply up to 15 applicable credit hours taken within seven years of admission to the degree program. Students should seek advising from the intended program for applicable course options.

Academic Progress

Satisfactory Academic Progress

All graduate students are expected to make systematic progress toward the timely completion of their graduate program. This progress includes satisfying the conditions listed below and achieving the benchmarks and requirements set by the individual graduate programs and the Graduate College. If a student fails to satisfy the requirements of their program and/or the benchmarks outlined below, the student may be dismissed from their program based on the academic unit's recommendation to the Graduate College, at which time the Dean of the Graduate College makes the final determination.

Satisfactory academic progress includes:

1) Maintain a minimum 3.00 for all GPAs (see definitions below).
2) Satisfy all requirements of the graduate program.
3) Satisfy the maximum time limit for graduation for the student's graduate program, see "Time Limit" sections.
4) Successfully pass comprehensive exams, qualifying exams, foreign language exams, and the oral defense of the proposal/prospectus for the thesis or dissertation.
5) Successfully complete the culminating experience, if required.
6) **Remain continuously enrolled** in their graduate program. Failing to do so without a Graduate College-approved Leave of Absence will result in being discontinued from the program and university. See full Leave of Absence rules above.

Grade Point Averages

Graduate students must maintain a minimum 3.00 (scale is 4.00 = "A") grade point average (GPA) to maintain satisfactory academic progress and to graduate. The minimum 3.00 GPA must be maintained on all GPAs (iPOS GPA, Overall Graduate GPA and Cumulative GPA).

1) The iPOS GPA is calculated on all courses that appear on the student's approved iPOS.
2) The Cumulative GPA represents all courses completed at ASU during the graduate career.
3) The Overall Graduate GPA is based on all courses numbered 500 or higher that appear on the transcript after admission to a graduate program (or graduate non-degree). This includes shared 500-level coursework taken as part of an approved accelerated bachelor's/master's program.

Transfer credits and some courses taken in the Sandra Day O'Connor College of Law and John Shufeldt School of Medicine and Medical Engineering are not calculated in the iPOS GPA or the Graduate GPA.

Courses lower than a "C" cannot fulfill program requirements on the iPOS, but are included in the calculation of the cumulative and graduate GPAs. Courses with a permanent "I" grade cannot appear on the iPOS. All grades, original and repeated, are part of the students' permanent academic record, remain on their official transcript and are included in all GPA calculations.

Academic Dismissal by the Graduate College

Students who do not comply with Graduate College policies for continuous enrollment or satisfactory academic progress may be dismissed from their graduate program after review by the Dean of the Graduate College.

In addition, academic units may recommend dismissal of students from graduate programs for noncompliance with published departmental policies or unsatisfactory academic progress. All such recommendations must be submitted to the Graduate College with appropriate documentation (e.g., nature of the issue, communications with the student). Students may appeal such recommendations at the level of their program, department, and/or college level. Dismissal recommendations to the Graduate College are reviewed for procedural due diligence only. If the Dean of the Graduate College (or the Dean's designee) concurs with the recommendation, the student receives the official notification of dismissal from the Graduate College. Only the Dean of the Graduate College may dismiss students from a graduate program for failure to meet satisfactory academic progress policies.

Students who have been dismissed from a graduate program for noncompliance with published departmental or Graduate College policies or lack of satisfactory academic progress are immediately eligible to apply for admission as a non-degree student or to another graduate program. Students may reapply to the same program only after one year has passed from the term of dismissal.

It is important to note that program dismissal is not an option for students who have been found in serious violation of ASU's Academic Integrity Policy; they must be recommended for suspension (for a specified period of time) or expulsion (with no expectation of readmission) to the Provost's office, which has the ultimate authority in matters of suspension and expulsion. Students are afforded one final appeal at the university level in such cases.

Graduate Program Requirements

Determination of Academic Requirements

The requirements and policies that students must follow are based on the academic catalog, policy manual and program handbook for the semester and year of their admission to a graduate program. Students who do not maintain continuous enrollment and are re-admitted to the graduate program must follow the requirements and policies in effect at the time of the new admission. All graduate programs are required to maintain a program handbook that specifies all program requirements and make it available to students in their iPOS at the beginning of their degree programs.

Academic Certificate Programs

Academic certificates are a programmatic series of linked courses. A graduate microcertificate requires 9 credit hours of graduate-level coursework at ASU. A graduate certificate requires a minimum of 15 credit hours of graduate-level coursework, although individual programs may require more.

Master's Degree Programs

A minimum of 30 credit hours of graduate-level coursework is required for a master's degree, although individual programs may have higher requirements.

For programs that include a culminating experience, this requirement may be a written comprehensive examination, a capstone course, an applied project, a written portfolio, a thesis or equivalent. Students who have a capstone or applied project course requirement must earn a grade of "B" or better. Students who do not earn a final grade of "B" or better must retake the course and earn a "B" or better to fulfill program requirements.

Doctoral Degree Programs

A minimum of 60 credit hours of graduate-level coursework is required for a professional doctorate degree. A minimum of 84 credit hours of graduate-level coursework and a written comprehensive examination are required for a PhD degree, although individual programs may have higher requirements. Additionally, the Foreign Language Examination, oral comprehensive examination and/or dissertation or equivalent may be required. A written comprehensive examination and prospectus (research proposal) are required for all programs that require a dissertation.

Interactive Plan of Study (iPOS)

The Interactive Plan of Study (iPOS) functions as an agreement between the student, the academic unit and the Graduate College. The iPOS contains program requirements such as coursework, a committee and a culminating experience, which must be specified before the final plan of study can be approved. The academic unit's graduate support staff should be the primary contact for questions regarding iPOS, degree and certificate requirements. The iPOS must be approved by the student's committee, the head of the academic unit, and the Dean of the Graduate College.

The iPOS must be submitted and approved by the end of a student's first enrolled semester. This requirement is monitored by the student's academic unit and is considered critical to satisfactory academic progress.

Coursework

Graduate-level courses are those numbered 500 or higher. All core courses required by a graduate program must be at least 500-level. A maximum of six credit hours of 400-level undergraduate coursework may be included on an iPOS if permitted by the curriculum and approved by the program. Undergraduate 400-level courses taken prior to admission and 400-level courses graded as "Pass/Fail" are not acceptable. Courses with grades of "D", "E", or "W" and audited courses (graded as "X") cannot be included on an iPOS. **Courses applied to a previously awarded degree cannot be included on an iPOS unless the student is enrolled in an approved course-sharing degree program or approved coursework from an awarded master's degree is applied toward a doctoral program.**

Any course with an incomplete grade ("I") must be completed within one calendar year of the end of the scheduled course. If a regular grade is not assigned within the calendar year, the "I" becomes permanent. The student must re-register for the course to receive credit.

Graduate students may register to audit one or more courses with the approval of the supervisory committee chair and the instructor's consent. An audited course does not count toward the minimum

number of credits required for international students with visa restrictions, students employed as TA/RAs or students receiving financial assistance. Courses taken for audit do not satisfy the Graduate College continuous enrollment policy.

Undergraduate courses do not satisfy the Graduate College continuous enrollment policy unless they are noted on the admission letter as an additional requirement or approved by the academic unit to be listed on the iPOS.

Master's degree students whose culminating experience is a thesis must include 6 (and only 6) credit hours of 599 Thesis on the iPOS. Doctoral students whose culminating experience is a dissertation must include 12 (and only 12) credit hours of 799 Dissertation on the iPOS. Thesis and Dissertation credit hours may only receive grades of "Z" (research is in progress) or "Y" (research is satisfactorily complete). PhD students may apply up to 30 credit hours, sometimes referred to as a blanket 30, of appropriate coursework from a previously awarded master's degree toward one ASU PhD plan of study, with approval of their academic unit and the Graduate College. Professional doctorates may apply either up to 15 or up to 30 credit hours of appropriate coursework from a previously awarded master's degree toward their doctoral plan of study, with approval of their academic unit and the Graduate College. Students should consult their program handbook for specific rules regarding their professional doctorate.

Petitions

A formal request for an exception to any Graduate College policy requires that the student complete and submit a petition through the iPOS, which must be approved by the committee chair and the head of the academic unit. The Graduate College reviews the petition and makes a final determination. The Graduate College Dean has final authority in all matters of Graduate College policy.

Pre-Admission Credits

Credit hours completed at ASU or at another regionally accredited U.S. institution or international institution officially recognized by that country, before the semester and year of admission to an ASU graduate program, are considered pre-admission credits. With approval of the academic unit and the Graduate College, students may include a maximum of 15 graduate-level credit hours with grades of "B" or better that were not used towards a previous degree. Coursework taken while completing another degree awarded at another institution cannot apply to an ASU graduate degree, except for the blanket credit hours of appropriate coursework from a previously awarded master's degree that can be used towards one doctoral degree, or unless enrolled in an approved course-sharing degree program. Pre-admission credits completed at another institution must also meet the "Transfer Credits" criteria outlined below.

Pre-admission credits must have been taken within seven years of admission to the ASU graduate program to be accepted. If special approval is granted for coursework older than seven years from the admission term to apply towards the program, the maximum time limit may be updated based on the start date of the pre-admission coursework.

Note: ASU credits used to earn a graduate microcertificate or graduate certificate may also be used towards a graduate degree if a course is evaluated to fulfill a degree requirement and meets preadmission and sharing policies. The graduate microcertificate or graduate certificate must have been completed within seven years of admission to the degree program, and applicable courses must have been completed with grades of "B" or better.

With program and Graduate College approval, former ASU graduate students who are admitted and re-enroll in a program in which they were previously enrolled may have additional flexibility in the pre-admission time limits and credit hour limit for applying previously completed ASU coursework to their program. Returning ASU graduate students may have additional flexibility in the pre-admission time limit

and credit hour limit. The maximum time limit may be updated based on the start date of the pre-admission coursework.

Graduate Credits Earned by ASU Undergraduate Students

An undergraduate degree and a graduate degree may not be awarded during the same term of enrollment. Students must be admitted and registered as graduate students to earn a graduate microcertificate, graduate certificate, master's degree or doctoral degree at ASU.

Accelerated Master's

ASU students enrolled in an approved Accelerated Master's degree program (formerly referred to as 4+1), may share a maximum of 15 pre-admission credit hours (6 of which may be 400-level) between a bachelor's and master's program. Courses must have grades of "B" or better and have been completed within seven years of enrollment in the graduate program. Students must contact their ASU undergraduate advisor and graduate support staff to ensure proper credit hour sharing. See "Accelerated Master's Programs" under "Master's Degree" for more information. If an accelerated master's candidate enrolls directly into a doctoral program, the 15 pre-admission credit hours completed as an undergraduate student may be shared with a doctoral program with approval by the unit and the Graduate College.

Reserved Credit

Upon approval by the unit and the Graduate College, undergraduate ASU seniors with at least a 3.0 cumulative GPA may reserve up to 15 graduate-level credit hours (6 of which may be 400-level) for possible use toward a future ASU graduate program. Reserved courses must have grades of "B" or better and have been completed within seven years of enrollment in the graduate program. Courses must be officially reserved in the Degree Audit System (DARS) for eligibility and may not be used towards any baccalaureate graduation requirement. Students may not exceed the 15-credit-hour pre-admission policy.

Transfer Credits

Transfer credits include any graduate-level credits earned at another institution, either pre-admission or while active in an ASU graduate program, that are used to fulfill ASU graduate program requirements. To apply credits earned at another institution toward an ASU graduate program, official transcripts from the regionally accredited U.S. institution or officially recognized international institution must be sent to Graduate Admission Services from the records office of the institution where the credits were earned. Graduate credit transferred from another institution may be applied toward only one ASU degree program.

Certain types of graduate credits cannot be applied, including credits awarded in the following situations:

- By postsecondary institutions that lack candidate status or accreditation by a regional accrediting association, or an equivalent international institution.
- Life experience.
- Courses taken at non-collegiate institutions (e.g., government agencies, corporations, and industrial firms).
- Courses, workshops and seminars offered by other postsecondary institutions as part of continuing education programs.
- Extension courses on a case-by-case basis.

Academic credits earned at institutions other than ASU that use a different credit scale from ASU's are subject to conversion before inclusion on the iPOS. In all cases, the inclusion of transfer courses on the iPOS is subject to approval by the academic unit and the Dean of the Graduate College.

Sandra Day O'Connor College of Law Credit

The Graduate College accepts a numerical grade of 70 or higher for courses taken in the ASU Sandra Day O'Connor College of Law as part of an approved plan of study. These grades are not used in the two GPAs

calculated for graduation unless the Graduate College determines they are needed. The Sandra Day O'Connor College of Law also uses a letter grade system for coursework; letter grades are submitted as part of an approved plan of study and are calculated in the GPAs.

John Shufeldt School of Medicine and Medical Engineering

The Graduate College accepts grades of pass or high pass for courses taken in the ASU John Shufeldt School of Medicine and Medical Engineering as part of an approved plan of study. These grades are not used to calculate GPAs for graduation.

Repeating ASU Courses

Graduate students (degree or non-degree) may retake some courses at ASU. Students cannot register for a course that is not designated as repeatable for credit in the catalog if they are currently enrolled in it or previously completed it with a grade of "C" or better. If a student earned a "C" or better but did not meet the required grade for their degree program, the student must obtain approval from the academic unit offering the course. All grades, original and repeated, are part of the students' permanent academic record, remain on their official transcript and are included in all GPA calculations.

Graduate Foreign Language Examination (FLE)

Graduate programs may require at least a reading level proficiency in a foreign language relevant to the area of study as an academic requirement. Students who are required to demonstrate proficiency in a foreign language must pass the Graduate Foreign Language Examination specific to their graduate program. Students must be enrolled in at least one credit hour during the term in which they take the examination.

Students must successfully complete the Foreign Language Examination before taking any required comprehensive examinations or scheduling the final oral defense of the thesis or dissertation. Students may submit a petition to the Graduate College for a re-examination, but must pass the examination in no more than three attempts.

Completing Programs Concurrently

Students may pursue degrees in different academic areas at the same time, with prior written approval from the head of the academic unit for each degree program and the Graduate College. Approval is not required to pursue a simultaneous certificate and degree program. A separate online application is required for each program, except for pre-approved concurrent programs.

Students must maintain continuous enrollment as previously defined. Please see each academic unit for specific satisfactory academic progress and program rules, including registration requirements. If a leave of absence is needed, students must submit a separate request for each program. Students may not be registered for coursework for either program while on a leave of absence.

The maximum time limit for completing program requirements and graduation applies to each active program individually.

Pre-approved Concurrent Degree Programs

ASU offers formally approved and coordinated concurrent degree programs that students can pursue by submitting one graduate application. These programs have a specific set of shared hours approved in their proposals. Units should refer to these to review the proper shared credit hours and other applicable policies.

Shared Coursework

Coursework common to two or more programs must constitute a well-planned and meaningful part of each program. In all cases, the guidelines below must be followed:

- Coursework from graduate microcertificates or graduate certificates may be shared with a degree program if the microcertificate or certificate was completed within seven years of admission to the degree program.
- Culminating experiences and comprehensive examinations cannot be shared between degree programs but may be shared between a graduate certificate and a master's degree, when appropriate.

If all other criteria are met, the table below outlines the **maximum number of credits** that can be shared between different credentials with appropriate approvals:

Credentials	**Microcertificate**	**Certificate**	**Master's**	**Doctorate**
Microcertificate	None	All	All	All
Certificate	All	20% of total credits with one semester of program overlap	All	All
Master's	All	All	20% of total credits with one semester of program overlap	12 credits if completing programs simultaneously*
Doctorate	All	All	12 credits if completing simultaneously*	12 credits

*In addition to 15-30 blanket credits from a previously awarded master's degree when appropriate

The total number of credit hours common to two degree programs may vary from this maximum only when the Graduate College has formally approved a coordinated concurrent degree program.

Master's Degree

Master's Degree Interactive Plan of Study (iPOS)

The iPOS must be submitted and approved by the end of a student's first enrolled semester. This requirement is monitored by their academic unit and is considered critical to satisfactory academic progress. Students are not eligible to schedule a comprehensive examination or defense without an approved iPOS.

Master's Degree Minimum Credit Hours

A minimum of 30 credit hours of graduate work is required for a master's degree at ASU. No more than 50% of coursework applied toward a master's degree may be awarded "Y" grades.

If a thesis is required, six (and only six) of the minimum required credit hours on an iPOS must be 599 Thesis credits. Interactive Plans of Study submitted for master's degrees that do not have a thesis requirement cannot include 599 Thesis credits. If an applied project or capstone is required, the applied project course (XXX 593) or a permanent numbered capstone course (500 or 600 level) must be included on the iPOS and requires a grade of "B" or better.

Master's Degree Maximum Time Limit

Students admitted for fall 2026 or after must complete all work toward a master's degree within four consecutive years. Master's degree programs requiring 50 or more credit hours must be completed within six consecutive years. The maximum time allowance begins with the semester and year of admission to the program. Graduate courses taken prior to admission that are included on the iPOS must have been completed within seven years of the semester and year of admission to the program. If coursework completed over seven years ago is applied toward a degree program as pre-admission coursework, the maximum time limit may be updated based on the start date of the pre-admission coursework. Programs may specify a shorter time limit for degree completion in the program handbook.

Any exception to the time limit policy must be approved by the supervisory committee and the head of the academic unit. Exceptions of two or more years beyond the maximum time allowance require review and approval by the Dean of the Graduate College. The Graduate College may withdraw students who are unable to complete all degree requirements and graduate within the allowed maximum time limits.

Master's Degree Supervisory Committee

A master's supervisory committee must be appointed before the student may apply for the comprehensive examination or register for 599 Thesis credits (if applicable). The committee is appointed by the Dean of the Graduate College upon the recommendation of the head of the academic unit. For programs requiring a thesis, the supervisory committee comprises a minimum of three members, including a chair or two co-chairs. At a minimum, the chair or co-chair of the committee is required to be active ASU faculty or an approved faculty affiliate.

Master's faculty have expertise in the student's area of study, or in a specific element of a student's thesis or applied project. These faculty may include tenure-track faculty, career-track faculty, and clinical or research professors. Master's faculty endorsed to chair must have a terminal degree. Professionals external to ASU can be added to the master's faculty with either a terminal degree or with significant experience in the area. The chair of the committee is typically from the student's degree program and should be carefully selected by the student to guide their work.

Master's Thesis/Thesis Defense

Students must be in good academic standing regarding GPA requirements (see previous section titled "Satisfactory Academic Progress") prior to scheduling a defense. See the "Supervisory Committee" section and the "Thesis/Dissertation" section below for more information.

Non-thesis Master's Culminating Experiences

Master's degrees that require a non-thesis culminating experience must include a written comprehensive examination, capstone course, applied project or written portfolio. The Graduate College office requires a written component to the comprehensive examination; academic units may also require an oral component. Students must have an approved iPOS prior to scheduling their comprehensive examination and/or registering for their applied project or capstone course. An applied project requires registration in the Applied Projects course (XXX 593) and requires a grade of "B" or better. A capstone course must have a permanent number (500 or 600 level) and requires a grade of "B" or better.

Students must be in good academic standing regarding GPA requirements (see previous section titled "Satisfactory Academic Progress") in the semester of the culminating experience.

Students are required to register for at least one credit hour of appropriate graduate-level credit during the fall, spring or summer session in which they complete their culminating experience.

Master's Comprehensive Examination

Students must be in good academic standing regarding GPA requirements (see previous section titled "Satisfactory Academic Progress") before taking master's comprehensive examinations. Foreign language requirements, if applicable, must be fulfilled before taking comprehensive examinations.

Students are required to register for at least one credit hour of appropriate graduate-level credit during the fall, spring or summer session in which they take their comprehensive examinations. If the defense date falls between semesters, the student is required to register for the next semester.

The master's comprehensive examination must include a written component; however, individual master's degree programs may require an additional oral component of the comprehensive exam for all students based on the academic progress policy of the program.

Students must schedule the comprehensive examination with their academic unit. All comprehensive examination results must be reported to the Graduate College office via the students' iPOS immediately upon completion.

Failing the comprehensive examination(s) is considered final unless the supervisory committee and the head of the academic unit recommend, and the Dean of the Graduate College approves, a re-examination. **Only one re-examination is permitted.** A petition with substantial justification for re-examination, endorsed by the members of the students' supervisory committee and the head of the academic unit, must be approved by the Dean of the Graduate College before students can take the examination a second time.

Re-examination may be administered on a timeline recommended by the committee chair in consultation with the committee and should be no later than 12 months from the date of the original examination. The Graduate College office may dismiss a student from the degree program if the student's petition for re-examination is not approved, or if the student fails the retake of the comprehensive examination(s).

Students choosing to appeal the results of their comprehensive examinations must follow the grade appeals process outlined by their academic unit.

Students who have received a final result of failure in the comprehensive examination will be recommended for dismissal by the academic unit.

Course-Based Master's Degrees

Some master's degrees are course-based and do not require a culminating experience. Students must maintain a minimum 3.00 for all GPAs and satisfy all course requirements of the graduate program.

MAS in Advanced Studies

The Master of Advanced Study (MAS) in Advanced Studies allows students to combine two 15+ credit-hour graduate certificates to earn a master's degree.

Accelerated Master's Programs

ASU allows for the simultaneous pursuit of an undergraduate and graduate degree in certain pre-approved programs. In such cases, the program must be approved by the Dean of the Graduate College. Undergraduate students must meet the unit's criteria for approval to pursue their accelerated program and be granted consent to complete up to 15 credits of graduate coursework.

Students must contact their ASU undergraduate advisor and graduate support staff to ensure proper credit hour sharing. Students may not share any credit hours taken as an undergraduate student unless they are

participating in an approved Accelerated Master's program. Credit hours taken as an undergraduate student may only apply to the master's degree if an Accelerated Master's student enrolls in the master's degree within seven years of completing their bachelor's degree. Students must meet minimum admissions standards to be admitted to the master's degree program.

Doctor of Philosophy Degree

Doctor of Philosophy (PhD) Degree Interactive Plan of Study (iPOS)

The iPOS must be submitted and approved by the end of a student's first enrolled semester. This requirement is monitored by their academic unit and is considered critical to satisfactory academic progress.

Students are not eligible to apply for the Foreign Language Examination (if applicable), comprehensive examinations, dissertation proposal/prospectus or dissertation defense (if applicable) without an approved iPOS.

PhD Degree Minimum Credit Hours

A minimum of 84 credit hours of graduate work is required for a PhD degree at ASU. If a dissertation is required, 12 (and only 12) of the minimum required credit hours on the iPOS must be 799 Dissertation credits. Students may apply up to 30 credit hours from a previously awarded master's degree toward one PhD iPOS with approval of the program, supervisory committee and the Dean of the Graduate College. The credit hours must be from a regionally accredited or internationally recognized institution.

PhD Degree Maximum Time Limit

PhD students admitted for fall 2026 or after must complete all program requirements within an eight-year period. The maximum time allowance begins with the semester and year of admission to the PhD program. Graduate courses taken before admission that are included on the iPOS must have been completed within seven years of the semester and year of admission to the program (previously awarded master's degrees used on the iPOS are exempt). If coursework completed over seven years ago is applied toward a degree program as pre-admission coursework, the maximum time limit may be updated based on the start date of the pre-admission coursework. Programs may specify a shorter time limit for degree completion in the program handbook.

Any exception to the time limit policy must be approved by the supervisory committee and the head of the academic unit. Exceptions of two or more years beyond the maximum time allowance require review and approval by the Dean of the Graduate College. The Graduate College may withdraw students who are unable to complete all degree requirements and graduate within the allowed maximum time limits.

Supervisory Committee

All PhD programs have a Graduate Faculty who must be an active ASU tenured/tenure-track faculty member with a PhD or equivalent in their discipline, interdiscipline, or related discipline with demonstrated equivalent education and experience. In addition, individuals who hold appropriate related ASU appointments (teaching and research professors) or positions at ASU affiliates (Mayo, tGen, BNI, Banner) may also be appointed members of the Ph.D. faculty. It is expected that Ph.D. faculty have an ongoing record of professional engagement. Each PhD program maintains a list of faculty members approved by the Graduate College to chair or co-chair PhD dissertations. Additional information can be found in the Graduate Faculty Guidelines.

Students are guided by faculty mentors who advise them through their degree program. Students should identify their advisors early in their graduate career and look to them for guidance in their graduate work.

Once students have selected a supervisory committee, the head of the academic unit recommends the supervisory committee to the Dean of the Graduate College, who reviews and appoints the committee. Graduate supervisory committees must consist of at least three individuals, including a chair or two co-chairs.

PhD programs may have additional requirements for committee composition. This committee serves as the intellectual guide for students and must approve the research/scholarly focus and substance of the dissertation. The members of the dissertation committee have the necessary knowledge and skills to advise the student in formulating the research topic and completing the research and the dissertation.

Dissertation chairs and co-chairs must be approved by the Dean of the Graduate College and each degree program maintains a list of faculty members approved by the office for the Graduate College. Most resident faculty at ASU may serve on dissertation committees, provided that they have appropriate expertise in the discipline. At a minimum, the chair or co-chair of the committee is required to be ASU or approved ASU-affiliate faculty.

Doctoral students are urged to communicate with their academic unit to confirm the eligibility of faculty to chair doctoral committees early in the planning of their dissertation projects.

Academic programs provide guidance to students for securing the supervisory committee. The final committee membership must be appointed by the Dean of the Graduate College before the student may apply for comprehensive examinations, defend the dissertation prospectus, and register for 799 Dissertation course credits (if applicable).

Supervisory Committee Roles and Responsibilities

The chair or supervisor is principally responsible for directing student work and facilitating the committee's work. Typically, this involves working with the student to develop the overall approach to and plan of work for the project, including its timeframe and budget; providing initial review and guidance for the proposal and chapter drafts; reviewing and approving all subsequent drafts; helping to reconcile the comments of committee members on those drafts; ensuring the document meets ASU format and publication standards; and facilitating the defense and final revisions, as necessary.

The other members of the committee are responsible for providing additional research guidance based on their expertise; providing detailed feedback on prospectus and thesis/dissertation drafts; working with the student and the chair to reconcile differing comments; attending the defense; and reviewing any final revisions required.

The student is responsible for coordinating prospectus and thesis/dissertation defense meeting times and places; for providing all materials requested/approved by the chair for distribution to committee members; and for communicating with committee members about review timeframes to meet all Graduate College deadlines.

In the event that committee members must be replaced, students may do so with the approval of their chairs via an iPOS petition to the Graduate College. Committee changes cannot be made after the defense is conducted. In instances where the chair must be replaced or a complete committee reconstitution must occur, students are advised to consult with the director of the graduate program and/or school leadership for assistance. The academic college dean would need to appoint a qualified designee to serve as a replacement for the chair.

PhD Comprehensive Examination

Students must be in good academic standing regarding GPA requirements (see previous section titled "Satisfactory Academic Progress") before taking PhD comprehensive examinations.

When students have essentially completed the coursework on an approved iPOS, they must request permission to take the PhD comprehensive examination. The PhD comprehensive examination must include a written component; however, individual PhD programs may require an additional subsequent oral component of the comprehensive exam for all students based on the academic progress policy of the program. These examination(s) are designed to assess students' mastery of the field of specialization.

PhD comprehensive examination(s) are administered by a committee consisting of a minimum of three members.

Foreign language requirements, if applicable, must be satisfied before taking the comprehensive examination(s).

Students are required to register for at least one credit hour of appropriate graduate-level credit during the fall, spring or summer session in which they take their comprehensive examinations. If the defense date falls between semesters, the student must register for the next semester.

Students must schedule the comprehensive examination with their academic unit. All comprehensive examination results must be reported to the Graduate College office via the students' iPOS immediately upon completion.

Failing the comprehensive examination(s) is considered final unless the supervisory committee and the head of the academic unit recommend, and the Dean of the Graduate College approves, a re-examination. **Only one re-examination is permitted.** A petition with substantial justification for re-examination, endorsed by the members of the students' supervisory committee and the head of the academic unit, must be approved by the Dean of the Graduate College before students can take the examination a second time.

Re-examination may be administered on a timeline recommended by the committee chair, in consultation with the committee, and should be no later than 12 months from the date of the original examination. The Graduate College may dismiss a student from the degree program if the student's petition for re-examination is not approved or if the student fails the retake of the comprehensive examination(s).

Students choosing to appeal the results of their comprehensive examinations must follow the grade appeals process outlined by their academic unit.

Students who have received a final result of failure in the comprehensive examination will be recommended for dismissal by the academic unit.

PhD Prospectus Defense

All students in programs that require a dissertation must conduct a dissertation proposal/prospectus defense, which is scheduled and overseen by the academic unit. Defense results are submitted via the student's iPOS. Failure of the proposal/prospectus oral defense is considered final unless the supervisory committee and the head of the academic unit recommend, and the Dean of the Graduate College approves, a second proposal defense. If a second defense is approved, students must successfully defend the new prospectus by the end of six months (beginning from the date that the first PhD dissertation proposal defense was held). If the academic unit does not grant the student permission to retake the proposal defense, or if the student fails the retake of the proposal defense, the Graduate College may dismiss the student from the degree program.

Students are required to register for at least one credit hour of appropriate graduate-level credit during the fall, spring or summer session in which they conduct their PhD prospectus.

PhD Candidacy

PhD students (with specific degree program exceptions approved by the Dean of the Graduate College) achieve candidacy status upon the successful completion of the comprehensive examination(s), the Foreign Language Examination (if applicable), and successfully defending the dissertation prospectus (if applicable). PhD students who have advanced to candidacy are required to maintain continuous enrollment until all degree requirements have been completed and they have graduated.

PhD Dissertation/Dissertation Defense

Students must be in good academic standing regarding GPA requirements (see previous section titled "Satisfactory Academic Progress") before scheduling the defense. Also see "Thesis/Dissertation Consideration" section for more information.

Master's in Passing (MIP)

Doctoral students who complete the requirements of an approved Master's in Passing (MIP) may be awarded the related master's degree while continuing toward completion of the doctoral degree. Students should consult with their doctoral program to determine whether an approved MIP is available for their degree program.

Students who already hold a previously awarded master's degree in the same discipline as the doctoral degree are not eligible to earn a MIP. Additionally, students who have earned a master's degree cannot apply those 30 hours to the doctoral degree and obtain a Master's in Passing. Students who are discontinuing a doctoral degree can obtain a Master's in Passing if they fulfilled the requirements and are no longer pursuing the doctorate.

Professional Doctorate Degree

Professional Doctorate Degree Interactive Plan of Study (iPOS)

The iPOS must be submitted and approved by the end of a student's first enrolled semester. This requirement is monitored by their academic unit and is considered critical to satisfactory academic progress.

Students are not eligible to apply for the following, if applicable, without an approved iPOS: Foreign Language Examination, comprehensive examinations, dissertation proposal/prospectus or dissertation defense, applied project or capstone.

Professional Doctorate Degree Minimum Credit Hours

A minimum of 60 credit hours of graduate work is required for a professional doctorate degree at ASU. If a dissertation is required, 12 (and only 12) of the minimum required credit hours on the iPOS must be 799 Dissertation credits. Interactive Plans of Study submitted for professional doctorate degrees that do not have a dissertation requirement cannot include 799 Dissertation credits. With approval from the program, supervisory committee and Dean of the Graduate College, students may apply up to 15 credit hours from a previously awarded master's degree toward the iPOS for professional doctorate programs requiring less than 84 credits. Students may apply up to 30 credit hours from a previously awarded master's degree towards the iPOS for professional doctorate programs requiring 84 credits. The credit hours must be from a regionally accredited or internationally recognized institution.

Professional Doctorate Degree Maximum Time Limit

Professional doctorate students admitted for fall 2026 or after must complete all program requirements within an eight-year period. The eight-year period begins with the semester and year of admission to the professional doctorate program. Graduate courses taken before admission that are included on the iPOS must have been completed within seven years of the semester and year of admission to the program (previously awarded master's degrees used on the iPOS are exempt). If coursework completed over seven years ago is applied toward a degree program as pre-admission coursework, the maximum time limit may be updated based on the start date of the pre-admission coursework. Programs may specify a shorter time limit for degree completion in the program handbook.

Any exception to the time limit policy must be approved by the supervisory committee and the head of the academic unit. Exceptions of two or more years beyond the maximum time allowance require review and approval by the Dean of the Graduate College. The Graduate College may withdraw students who are unable to complete all degree requirements and graduate within the allowed maximum time limits.

Supervisory Committee

All professional doctorate programs have a Graduate Faculty who must have expertise in the student's area of study or a specific element of the student's dissertation or applied project. These faculty can include tenure-track/tenured faculty, career-track faculty, and clinical or research professors. Faculty endorsed to chair must have a terminal degree and an ongoing record of research, scholarly or creative productivity in the program discipline, interdiscipline, or related discipline. Additional information can be found in the Graduate Faculty Guidelines.

Students are guided by faculty mentors who advise them through their degree program. Students should identify their advisors early in their graduate career and look to them for guidance in their graduate work. Once students have selected a supervisory committee, the head of the academic unit recommends it to the Dean of the Graduate College, who reviews and appoints the committee.

ASU offers professional doctorate degrees that require a dissertation and some that do not. Professional doctorate programs that require a dissertation must follow the same committee guidelines as PhD programs. Professional doctorate programs that do not require a dissertation may have different requirements for committee composition, including the minimum number of committee members. All professional doctorate programs require an approved faculty committee.

Like PhD programs, all chairs and co-chairs must be approved by the Dean of the Graduate College, and each degree program must maintain a list of faculty members approved by the office for the Graduate College. Most resident faculty at ASU may serve on committees, provided they have appropriate expertise in the discipline. At a minimum, the chair or co-chair of the committee is required to be ASU or approved ASU-affiliate faculty.

All doctoral-level students (including PhD, AuD, DBA, DBH, DCJ, DEng, DIT, DMA, DNP, DPP and EdD) are urged to communicate with their academic unit to confirm eligibility of faculty to chair their committees early in the planning of their culminating experience.

The final committee membership must be appointed by the Dean of the Graduate College before the student may apply for, if applicable, comprehensive examinations, dissertation proposal/prospectus or dissertation defense, or register for culminating event course credits. Standard supervisory committee roles and responsibilities apply to professional doctorate committees.

Professional Doctorate Degree Culminating Experience

Professional doctorate degrees that require a dissertation follow all standard policies regarding comprehensive exams, prospectus, defense and dissertation. Some professional doctorate degree programs may require a written or oral comprehensive exam. For professional doctorate programs that require comprehensive exams, students must follow the same standards as PhD students.

Instead of a dissertation, some professional doctorate programs may require an independent applied project (XXX 793) or a permanent number capstone course as a culminating experience, which requires a written component and a final grade of "B" or better. Specific academic programs may also require an oral presentation or a poster session as a component of the culminating experience. The written component, oral presentation, and poster session do not follow the same requirements as outlined by the Graduate College for the PhD defense and format process.

All students must register for at least one credit hour of graduate-level credit during the fall, spring or summer session in which they conduct their culminating experience.

Graduate Microcertificates and Graduate Certificates

Graduate microcertificates and graduate certificates are a programmatic series of linked courses. Graduate microcertificates and graduate certificates facilitate professional growth for people who already hold a baccalaureate degree. For more information on current graduate microcertificates and graduate certificates see the Graduate Degree and Certificate search.

Microcertificate and Graduate Certificate Interactive Plan of Study (iPOS)

The iPOS must be submitted and approved by the end of a student's first enrolled semester. This requirement is monitored by their academic unit and is considered critical to satisfactory academic progress.

Microcertificate and Graduate Certificate Admission

All applications for graduate microcertificate and graduate certificate programs must be submitted through the graduate application portal.

Microcertificate Requirements

A graduate microcertificate requires nine credit hours of permanent numbered 500-level coursework. All microcertificate coursework must be completed at ASU. No more than 50% of coursework applied toward a graduate microcertificate may be awarded "Y" grades.

Graduate Certificate Requirements

A graduate certificate requires a minimum of 15 credit hours. No more than 50% of coursework applied toward a graduate certificate may be awarded "Y" grades. No more than 20% of the minimum required credit hours for a graduate certificate may be transferred from another university. All transfer and pre-admission coursework must meet the Graduate College policies. A maximum of six credit hours of 400-level undergraduate coursework can be included on a graduate certificate (not a microcertificate) iPOS if permitted by the curriculum and approved by the program

Sharing Credits with Microcertificates and Graduate Certificates

Credit hours earned in a graduate microcertificate or graduate certificate program can be applied towards a degree program, and credit hours earned in a degree program can be applied towards a graduate microcertificate or graduate certificate if:

- pre-admission policies are followed
- admission to the graduate microcertificate or graduate certificate occurred prior to the completion of all courses required for that credential
- the credits are not being shared as part of the MAS in advanced studies degree

If a student completes two graduate certificates, they may share no more than 20% of the total minimum required credit hours between the two certificates. Students may use all credits earned in a graduate microcertificate toward the requirements of a graduate certificate, master's or doctoral degree. Credits cannot be shared between multiple microcertificates. See the "Shared Coursework" section for more information.

Satisfactory Academic Progress

All graduate students are expected to make systematic progress toward completion of their graduate microcertificate or graduate certificate program. Graduate students pursuing an undergraduate certificate program are held to graduate satisfactory academic progress requirements.

Microcertificate and Certificate Maximum Time Limit

Students admitted to a graduate microcertificate or certificate program for fall 2026 or after must complete all program requirements within two consecutive years. Graduate certificate programs requiring 25 or more credit hours must be completed within three consecutive years. The maximum time allowance begins with the semester and year of admission to the program. Graduate courses taken before admission that are included on the iPOS must have been completed within seven years of the semester and year of admission to the program. If coursework completed over seven years ago is applied toward a graduate microcertificate or graduate certificate program as pre-admission coursework, the maximum time limit may be updated based on the start date of the pre-admission coursework. Programs may specify a shorter time limit for completion in the program handbook.

Any exception to the time limit policy must be approved by the supervisory committee and the head of the academic unit. Exceptions of two or more years beyond the maximum time allowance require review and approval by and the Dean of the Graduate College. The Graduate College may withdraw students who are unable to complete all certificate requirements and graduate within the allowed maximum time limits.

Awarding of a Graduate Microcertificate or Graduate Certificate

Students are eligible for the official posting of the graduate microcertificate or graduate certificate to their transcripts when all applicable coursework has been successfully completed and Graduate College requirements have been met (including a 3.0 minimum iPOS, Graduate and Cumulative GPA). Students must submit an approved iPOS and apply for graduation to complete the graduate microcertificate or graduate certificate program. Upon conferral, graduate certificates and microcertificates are noted as awarded Graduate Certificates on the transcript.

Thesis/Dissertation

Format Resources

Students must use the Format Manual to prepare their thesis/dissertation. The Format Manual is a comprehensive guide to formatting a thesis, dissertation or equivalent document, and it always overrides a style guide if the two conflict.

Use of the Graduate College's Format Wizard is required for all students going through the format process. The Format Wizard generates a template into which students can insert their document's text. It is designed to help students meet basic format requirements, such as margins and spacing, and greatly improves the format review process for students.

Questions regarding format requirements should be directed to gradformat@asu.edu.

Thesis/Dissertation Research

The master's thesis and doctoral dissertation (or equivalent) must be based on original and independent research/creative activity conducted by students under the guidance of the graduate supervisory committee. The thesis is an introduction to scholarly writing and is intended to create an understanding of theory and methods applicable to one's field. The dissertation should demonstrate the candidates' mastery of research and scholarly methodologies, theory and tools of the discipline. Both the thesis and dissertation should demonstrate the candidates' ability to address a major intellectual problem, to propose meaningful questions and hypotheses, to utilize the methods to study the proposed research question(s) and related hypotheses, and draw justifiable conclusions based on the research conducted.

The written doctoral dissertation is based on original and substantial scholarly work that constitutes a significant contribution to knowledge in the student's discipline. Dissertation research must be conducted during the time of the student's doctoral studies at ASU, under the guidance of ASU Graduate Faculty and in accordance with Graduate College policies and procedures. The composition of the dissertation is defined by the degree program with the approval of the Dean of the Graduate College.

Research Involving Human and Animal Subjects

Theses or dissertations that make use of research involving human or animal subjects must include an official statement indicating that the research has been approved by the appropriate university body.

Research involving human subjects conducted under the auspices of Arizona State University is reviewed by the University Human Subjects Institutional Review Board (IRB) in compliance with federal regulations. Documents containing any data collection involving human subjects require that applications be submitted to the ASU Office of Research Compliance for approval **before** data collection or recruitment of subjects is initiated.

Research involving animals conducted under the auspices of Arizona State University is reviewed by the Institutional Animal Care and Use Committee (IACUC) in compliance with federal regulations. Documents containing any data collection from animal research require that applications be submitted to the ASU Office of Research Compliance for approval.

It is very important that students check with their supervisory committee or chair well in advance of data collection to ensure compliance with university regulations regarding the collection of research data. Students who are required to submit their document through Graduate College format review must attach the corresponding IRB or IACUC approval as an appendix to their document.

Generative Artificial Intelligence (AI) in Culminating Experience

Generative artificial intelligence (AI) is rapidly evolving, and the Graduate College upholds standards for academic integrity and rigor. This section provides guidance on the use of generative AI within the context of the graduate culminating experience, including written and oral examinations, portfolios, applied projects, capstone courses, master's theses, and doctoral dissertations. Updated guidance and policies may be issued in the future to adapt to changing technology, legal frameworks and ethical standards.

The graduate student's committee is responsible for determining permissible amounts and types of generative AI–if any–to use as a support tool for the student's culminating experience. It is the student's responsibility to consult with their committee to understand appropriate and allowable uses of generative AI for their culminating experience. If the committee permits the use of generative AI, the student must be transparent about their use and correctly attribute all uses in their document(s).

If a committee finds that a student used an unauthorized generative AI tool or produced a significant portion of their culminating work using generative AI, they should report the violation according to the ASU Student Academic Integrity Policy. When in doubt, refer to the ASU Student Academic Integrity Policy.

Refer to the ASU Artificial Intelligence site, Office of the University Provost site and ASU Library Guide on generative AI for frequently asked questions (FAQs) and more information about citing AI models, permanent links to AI results, and uses of AI in research.

Thesis/Dissertation Defense

Thesis and dissertation defenses are open to all members of the university community and the general public. The oral defense engages the supervisory committee and the candidate in a critical and analytical discussion of the research and findings, as well as a review of the contribution of the research topic to advancing knowledge in that discipline. The presentation of a thesis or dissertation defense in an open forum fosters a broader awareness of the state of graduate research at ASU, promotes a wider scholarly dialogue among disciplines, and recognizes the scholarly contributions of master's or doctoral candidates publicly. Defense information is published on the Graduate College Master's/Doctoral Defense Calendar.

Scheduling and Holding the Defense

Students with a thesis or dissertation as a culminating experience are required to present and defend it in a public oral examination, to the satisfaction of the supervisory committee. Students must schedule the defense in the iPOS at least 10 business days before the planned defense and have it approved by the program. See Graduation Deadlines.

Students work with their supervisory committee and the academic unit's graduate support staff to identify a suitable date and reserve a room (for in-person defenses). Defenses that are held without being scheduled and approved by the Graduate College via the iPOS are considered invalid.

Students must be registered for at least one credit hour of appropriate graduate-level credit.

Students must be physically present at the oral defense of their thesis, dissertation or equivalent document unless the student is in an online program that requires a thesis/dissertation and a virtual defense was approved by the committee and the Graduate College. It is expected that oral defenses are held on an ASU campus (for in-person defenses) and during regular business hours (8 a.m. to 5 p.m. Arizona Mountain Standard Time) to facilitate student, faculty, and public accessibility. A student can include a virtual link to encourage virtual audience attendance. When there are sound educational reasons for holding a defense under different circumstances, contact the Graduate College for approval before scheduling the defense.

All members of a student's supervisory committee must attend the final oral defense of a thesis or dissertation. However, there are situations (e.g. faculty travel, faculty emergencies and/or faculty leave) that may necessitate holding a defense with one or more committee members absent. The committee chair must be in attendance, and 50% of the entire committee must attend in person. If a committee member cannot attend, a qualified substitute must be appointed to attend in their place. The substitute should be a regular faculty member within the academic unit. In these circumstances, the Graduate College must be notified of the name of the member who will be absent, the faculty member who will attend as a substitute, and the student's name and ID number. This information must be submitted before the defense.

Once a defense has been scheduled and approved in the iPOS, students must submit a complete draft of the thesis/dissertation to be defended by uploading it to the "Format" tab of their iPOS at least 10 days before the defense.

Passing the Defense

At the completion of the defense, the committee determines if the student has passed or failed the defense and if the submitted document requires revisions. Defense results are considered final. Failure will result in dismissal from the program. Therefore, it is important that the faculty committee review a student's readiness to defend prior to scheduling the defense. The initial defense results must be submitted by all committee members via the iPOS defense results tab within 10 days after the defense. If the committee requires revisions, they must be completed and approved by the committee before a full "Pass" can be designated in the iPOS. If the committee's requested revisions are not completed by the graduation deadlines for the semester of the defense, the student must maintain continuous enrollment until they are completed. If they are not successfully completed within one year of the defense, resubmission of the document and a re-defense of the thesis or dissertation may be required to ensure the currency of the research.

Format Review

Students who are required to complete a thesis or dissertation as part of their graduate program must submit their document to the Graduate College for format review. Format revisions are typical and must be completed in a timely manner. If students are unable to complete format revisions and submit to UMI/ProQuest by the deadline for the semester in which the defense is held, they must complete the revisions, remain continuously enrolled and present the final document to UMI/ProQuest within one year of the defense. In rare cases, the Graduate College may grant exceptions to the one-year revision time limit. If an exception is approved, the document must be resubmitted for format review and may require a re-defense of the thesis or dissertation to ensure the currency of the research.

If supported by the supervising faculty chair and committee (if applicable), students may request an alternative format for their culminating experience by emailing gradformat@asu.edu. All exceptions are reviewed by the Dean of the Graduate College.

All students who have a culminating event document that requires format review must also complete the "Design Aspirations" tab within the iPOS. In addition, all PhD students are required to complete the Survey of Earned Doctorates (SED) as part of the format process.

Accessibility

ASU is committed to fostering an inclusive, equitable and accessible digital environment that advances the mission as a New American University. Students are expected to ensure that their culminating document meets ASU Digital Accessibility standards.

ProQuest ETD Submission

ProQuest ETD requires all students to submit a PDF version of their final culminating experience document by the Graduate College deadline for their graduating semester. Students are required to create a new user account for submitting their document and must use their ASU email address. The Graduate College requires that the PDF document adhere to the formatting standards presented in the Format Manual. Students receive final format approval only after the submitted PDF document has successfully passed a format review. Students can order bound copies of their document through ProQuest ETD. The final document also appears archived in the ASU Digital Repository.

Graduate-level Disestablished Programs

A disestablished graduate program is a graduate certificate, master's, or doctoral program that the institution has chosen to discontinue. Upon the effective term and year of disestablishment, ASU may choose to stop admitting new students into the program. This includes students seeking to change into the disestablished program or pursue it concurrently with another program. Active students in a disestablished program have the option to continue to pursue the program, provided continuous enrollment and satisfactory academic progress policies are followed, including maximum time limits. Students who are discontinued from a disestablished program for any reason are not eligible to re-enroll in the program. Students who return and are in good academic standing will be required to choose a new program that is accepting applications. Students may have the option to choose a new program under the guidance of leadership from their discontinued graduate program.

Degree Conferral

Graduation

All students in graduate certificate and degree programs must apply for graduation through My ASU in accordance with the University Registrar policies to have their degree or certificate conferred. See Application for Graduation. Students must meet all University and Graduate College degree requirements before the conferral date, including achieving a 3.0 GPA in the graduate GPA, iPOS GPA, and cumulative GPA. Students must remain registered until all degree requirements have been met.

The graduation deadlines and procedures are set by the Graduate College and are available online. Deadline dates vary slightly depending on the calendar year, so students should check them carefully in advance of the semester they plan to defend their thesis/dissertation. It is very important that students become familiar with these deadlines so that graduation can occur during the expected term.

With Distinction

Master's students with a ASU 4.0 cumulative GPA in the graduate career qualify for "With Distinction" recognition on diplomas and transcripts. Note: This recognition began in fall 2022 and applies only to coursework completed at ASU since admission to the graduate career.

College Policies

W. P. Carey School of Business policies

The W. P. Carey School of Business [1] is one of the largest and highest-ranked business schools in the country, repeatedly lauded by publications such as The Wall Street Journal, Financial Times, the Princeton Review, and U.S. News & World Report. The school is internationally regarded for its leadership in business education, research productivity and distinguished faculty, which includes a Nobel Prize winner. Students come from all over the world, and among them are dozens of National Merit Scholars.

The school's academic offerings are as diverse as they are abundant. Undergraduates can earn a degree in one of more than 30 degree programs, including 100% online business degrees, noncalculus-based degrees and flexible programs for working professionals. Its programs of study reflect and respond to the demands of business and industry today and beyond, and the school has dedicated career placement services. The school is located in the heart of the fast-growing Phoenix metropolitan area, which provides opportunities for internships, employment and networking. Classes are offered on ASU's Tempe, Polytechnic and West Valley campuses, as well as online.

Academic integrity

Academic dishonesty

The faculty of the W. P. Carey School of Business follow the guidelines on academic dishonesty in the ASU student academic integrity policy. [2]

The W. P. Carey School of Business honor code [3] may be found online. Additional resources and information may be found at the W. P. Carey academic integrity website [4].

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [5]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [6]

Undergraduate policies

W. P. Carey School of Business academic good standing

Academic warning

A new student is placed on academic warning when their ASU cumulative GPA falls below 2.00 at the end of their first fall or spring semester after grades are posted. Students on academic warning must meet with an academic advisor to discuss a plan for getting back into good standing, and complete the following tasks:

1. Download and read through the academic warning information packet. [7]
2. Complete the Canvas course WPC Rising Scholars. Advising holds are not removed until this course is completed.
3. Schedule an advising appointment through Advising SOS. [8]

4. Complete the optional survey [7] if there is anything the advisor should know about the previous semester.

Probation

All business students, first year through senior, must maintain a minimum GPA of 2.00 for all courses completed at ASU to remain in academic good standing. If this standard is not maintained, the student is placed on university academic probation.

Students on university academic probation must see an advisor before further registration and must do one of the following:

- raise their ASU cumulative GPA to 2.00 or higher to return to academic good standing
- obtain a semester GPA of 2.50 with no grade lower than "C" to be granted one additional semester on continued college probation and, at the end of the continued college probation period, return to academic good standing with a minimum cumulative ASU GPA of 2.00 to avoid disqualification

W. P. Carey School of Business continued probation: If a student's ASU cumulative GPA is still lower than 2.00 at the end of the probationary semester but the student has earned a semester GPA of 2.50 or higher with no grade lower than "C," the student is placed on continued probation in the subsequent semester. The student then has only one more semester to raise the ASU cumulative GPA to 2.00 or higher.

ASU continued probation: If a student's ASU cumulative GPA is still lower than 2.00 at the end of the probationary semester, but the student has earned a semester GPA of 2.00 or higher with no grade lower than "C," the student is placed on continued probation with ASU but is ineligible to remain in the W. P. Carey School of Business as a business student. The student must change to a major that is not offered through the business school.

Disqualification

A student who does not meet college probation requirements is academically disqualified and is not allowed to register in a fall or spring semester at the university. If the student has already enrolled in a future fall or spring semester, the student is dropped from those courses, and the registration is cancelled. A disqualified student may attend ASU during the summer session only immediately following the semester in which the student was disqualified.

A disqualified student must wait one year to apply for readmission to ASU. A student can not be readmitted to the W. P. Carey School of Business unless they also meet the following requirements:

Bachelor of Science programs

- A grade of "C" or higher in all required skills classes (ACC 231, ACC 241, CIS 105, ECN 211, ECN 212, ECN 221, MAT 210 and MAT 211)
- The student meets direct admission [9] or is readmitted via Admissions Portfolio [10]

Bachelor of Arts in business programs

- A grade of "C" or higher in all required skills classes (ACC 231, ACC 241, CIS 105, ECN 211, ECN 212, ECN 221 and MAT 210)
- The student meets direct admission [9] or is readmitted via Admissions Portfolio [10]

BA in entrepreneurial leadership or applied business and technology solutions programs

- There are no additional requirements for students to be readmitted to these majors, though the college can still exercise discretion when reviewing a student's readmission appeal.

Disqualified students should contact their academic advisor immediately to determine what is needed to earn readmission to the university in the future.

Professionalism policy

The W. P. Carey School of Business is committed to promoting the highest levels of honesty, integrity and professionalism so as not to impede the personal, academic and social development of all students. Professionalism,

broadly speaking, includes ethical decision-making, consideration of others and demonstration of personal accountability. Exhibiting professional behavior is integral to a positive learning environment within the university and promotes innovation, openness to diversity, integrity, and mutual respect for students, faculty and staff.

The behaviors that are practiced today become habits in the future. To that end, business students are expected to treat others as they wish to be treated. Students are to be considerate of classmates, professors, staff and recruiters in all aspects and commit to acting in a professional manner in all school settings, including classes, sponsored events and interviews. Students should be aware that they are representing the W. P. Carey School of Business and Arizona State University.

More information is available at the W. P. Carey professionalism policy. [11]

Advising

W. P. Carey School of Business offers undergraduate program academic advising at the Polytechnic, Tempe and West Valley campuses and through ASU Online. Students can find personalized advising information and schedule appointments in advance through Advising SOS. [8]

Students are encouraged to schedule appointments each semester to ensure they are making progress toward their degrees. Advising is required for:

- newly admitted students, before enrollment for the first semester (at orientation)
- first-year students, before enrollment for the second semester
- seniors, upon completion of 87 or more credit hours
- any student who is off track with regard to eAdvisor tracking requirements
- any student who is on university academic probation
- disqualified students interested in attending ASU in the future

Additional information regarding academic advising is available online [12] or through the W. P. Carey School of Business undergraduate programs office by calling 480-965-4227.

Credit and registration

Pass/fail

Business majors may not enroll on a pass/fail basis in any course required for graduation. Pass/fail credits taken at another institution may be petitioned for use, but only if the student can demonstrate proof that the pass grade was equivalent to a "C" (2.00) or higher.

Transfer credit

Credit from other institutions is accepted, subject to the following guidelines:

Students who plan to take their first two years of coursework at a community college or another four-year college should plan to take business and economics courses that are offered as freshman- or sophomore-level courses for transfer equivalency, as supported through the Transfer Guide [13]. Frequently, these lower-division courses are numbered 100 through 299, but this may vary by transferring institution.

Business courses completed at a two-year college may not be used for upper-division transfer credit in the business core or major. Such courses may be acceptable for general university credit but may not be applicable toward the degree requirements of the major. Courses taught in the upper-division business core must be completed at an accredited four-year institution. Upper-division business course transfer credits are considered for upper-division business credit in the ASU major only if the course was taken at an AACSB International-accredited school. https://www.aacsb.edu/

Credit is granted for transferred courses deemed equivalent by the W. P. Carey School of Business to corresponding courses in the selected program of study and is subject to grade and ASU resident credit requirements. No grade lower

than "C" (2.00 on a 4.00 scale) transfers to ASU. To be accepted for credit as part of a degree program in business, all courses transferred from other institutions must carry prerequisites similar to those of the courses they are replacing at ASU.

Degree requirements

Associate degree

Students in the Associate of Science program should refer to their major map or curriculum checksheet and the university associate degree graduation requirements policy [14] for minimum credit hour, GPA and other degree requirements.

Critical requirements

All business students must meet the critical requirements for their majors. Students who are required to follow eAdvisor tracking requirements yet do not comply with the critical requirements are considered off track, and a hold is placed on their records. These students must work with an advisor to have the hold removed.

Undergraduates in the W. P. Carey School of Business are expected to be strong academically, especially with regard to grades earned in business courses. Careful course planning in consultation with an academic advisor assists students in maintaining satisfactory academic performance and progress.

Concurrent degrees

ASU students not enrolled in a W. P. Carey School of Business degree program who wish to pursue a concurrent degree with the business school:

- must be in good academic standing
- must have completed 30 credit hours of college coursework
- must meet direct admission criteria [9] for the degree program they wish to pursue

If direct admission requirements have been met, students should file a concurrent degree request form. Students who do not meet direct admission requirements for business degree programs must complete the Admissions Portfolio [10] and be admitted before filling out the concurrent degree request form. Students are allowed a maximum of two concurrent degree request attempts.

Students currently enrolled in the W. P. Carey School of Business who wish to pursue concurrent degrees within the business school:

- must be in good academic standing
- must have completed 30 credit hours of college coursework with a grade of "C" (2.00) or higher
- must have completed at least six business skill courses or their equivalents AND must have completed or be enrolled in the remaining two business skills courses (MAT 211 not required if submitting for BA degrees):
    - CIS 105 (or equivalent) — Computer Applications and Information Technology
    - MAT 210 (or equivalent) — Brief Calculus
    - MAT 211 (or equivalent) — Math for Business Analysis
    - ECN 211 (or equivalent) — Macroeconomic Principles
    - ECN 212 (or equivalent) — Microeconomic Principles
    - ACC 231 (or equivalent) — Uses of Accounting Information I
    - ACC 241 (or equivalent) — Uses of Accounting Information II
    - ECN 221 (or equivalent) — Business Statistics

Business students who meet the criteria shown above should submit a concurrent degree request [15] through the university approval process. Review and submission times are on the website. Business students are unable to change their major status after they are admitted to a concurrent degree program unless they submit a new concurrent degree request. The direct admission criteria only apply to a single major within the W. P. Carey School of Business; students cannot freely change majors within their concurrent degree or dual concentration combinations. Students are allowed two concurrent degree request attempts.

Current business students who wish to pursue a concurrent degree outside the W. P. Carey School of Business should submit a concurrent degree request form and receive approval from both colleges (e.g., finance and psychology).

Major proficiency requirements

Students must receive a grade of "C" (2.00) or higher in upper-division courses for the major. If a student receives a grade lower than "C" in any course in the major, the course must be repeated. If a second grade lower than "C" is received in either an upper-division course in the major already taken or a different upper-division course in the major, the student is no longer eligible to take additional upper-division courses in that major.

Reinstatement/readmission

Students seeking readmission after an absence from the university should follow university undergraduate readmission procedures. [16]

Other special requirements

Student appeal procedure on grades

W. P. Carey School of Business students follow the university policy for the student appeal procedure on grades. [17]

Graduate policies

All graduate students in the W. P. Carey School of Business are required to maintain minimum cumulative, graduate and iPOS GPAs of 3.00 (grade of "B"). Students should see individual graduate degree programs for additional requirements on satisfactory academic progress, probation and disqualification. In addition, they should review the graduate conduct and professionalism policy. [18]

Advising

Advising of graduate students is normally handled by a graduate program's operations team members. Students must prepare a plan of study during the first semester of their degree program. Students are encouraged to begin discussions with their program coordinators or managers early in their studies so that coursework can be geared toward supporting their academic progress. All students, whether in a thesis or nonthesis option, must file a POS.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College and the W. P. Carey School of Business.

Herberger Institute for Design and the Arts policies

The Herberger Institute for Design and the Arts [1] comprises ASU FIDM [2] and ASU FIDM Museum [3]; the School of Art [4]; The Design School [5]; The Sidney Poitier New American Film School [6]; The GAME School [7]; the School of Music, Dance and Theatre [8]; and the ASU Art Museum [9].

The institute is dedicated to the following design principles:

- Creativity is a core 21st-century competency. Students in the institute develop the ability to be generative and enterprising, work collaboratively within and across artistic fields, and generate nonroutine solutions to complex problems. With this broad exposure to creative thinking and problem-solving, graduates are well-prepared to lead in every arena of the economy, society and culture.
- Design and the arts are critical resources for transforming society. Designers and artists must be embedded in their communities and dedicate their creative energy and talent to building, reimagining and sustaining the world. Design and the arts are socially relevant and should never viewed as extras or as grace notes. The institute is committed to placing designers, artists and arts-trained graduates at the center of public life.
- The institute is committed to enterprise and entrepreneurship. For most college graduates today, the future of work is unpredictable, nonlinear and constantly evolving. A recent study found that 47% of current occupations likely will not exist in the next few decades. Design and the Arts faculty, students and graduates are inventing the jobs and the businesses of the future; reimagining how design, art and culture get made and distributed; and coming up with new platforms and technology for the exchange of culture and the enrichment of the human experience. Legendary author and expert on city life Jane Jacobs talks about the abundance of "squelchers" — parents, educators, managers and leaders who tend to say no to new ideas. At the institute, there are no squelchers. All embrace the cardinal rule of improvisation: Always say, "Yes, and…"
- Every person, regardless of social background, deserves an equal chance to help tell the stories of this nation and the world. Creative expression defines everyone, what each aspires to, and how all hope to live together. The institute is committed to projecting all voices — to providing an affordable education to every student who has the talent and the desire to boldly add their creative voice to the world's evolving story.
- Effectiveness requires excellence. The ability to solve problems, build enterprises, and create compelling and socially relevant design and art requires high levels of mastery. By each being the best in their chosen fields, all can stretch themselves and their talents to make a difference in the world.

Students with questions about Herberger Institute for Design and the Arts policies or procedures may review the Herberger Institute Office of Student Success website [10], contact the office at 480-965-4495 to speak with advising staff, or contact the institute's dean's office at 480-965-0050.

Academic integrity

The Herberger Institute for Design and the Arts strictly adheres to the ASU student academic integrity policy [11]. Academic honesty is expected of all students in all examinations, papers, academic transactions and records. Possible sanctions include appropriate grade penalties, loss of registration privileges, disqualification and dismissal. Information about academic integrity also can be found on the institute's academic integrity page [12].

Professionalism

Professionalism entails a set of skills critical for workplace and creative successes, and professional behavior creates an atmosphere that promotes safe and high-quality spaces for constructive learning as well as individual and community well-being. The institute expects students to show professional behavior with clients, members of the community and others in the university environment (e.g., classrooms, clinics, labs, studios), including members of the faculty and administration, other students and staff. Students are expected to conduct themselves in a professional manner, including arriving on time with an open attitude to learning, engaging in ethical behavior, resolving conflicts in an appropriate manner at all times, holding partnership information confidential, and using prudence in written and verbal communications. Professionalism includes:

- attendance and punctuality
- following all university and studio safety protocols and behavioral expectations

- honesty and integrity
- respectful communication
- self-control

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation [13].

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696 for more information, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website [14].

Undergraduate policies

Academic standing

University academic warning

A new, incoming first-year or transfer student with a cumulative GPA that has dropped below 2.00 at the end of the first semester (fall or spring) at ASU is placed on academic warning. All students who are placed on academic warning are encouraged to complete academic success modules online through Canvas. Students are also encouraged to meet with their academic advisor to discuss any challenges they may have experienced in order to develop a plan to improve their standing.

If a student does not earn a cumulative GPA of a 2.00 or higher in their second semester, they are placed on probation.

On-campus students are required to enroll in UNI 220 Mindset Connections during their academic warning semester; this becomes a graduation requirement once a student’s cumulative GPA falls below 2.00. If a student is not successful in this course, they must enroll in the course until they successfully complete it.

Herberger Institute for Design and the Arts academic probation

Students in any of the institute's degree programs are placed on probation when they fail to maintain a minimum cumulative GPA of 2.00. Students on probation must observe rules or limitations imposed by the institute as a condition of retention. All students who are placed on probation are required to complete academic success modules online through Canvas. Students also are required to attend mandatory advising appointments in an effort to improve their academic standing.

On-campus students are required to enroll in UNI 220 Mindset Connections in the semester of their probation; this becomes a graduation requirement once a student’s cumulative GPA falls below 2.00. If a student is not successful in this course, they must enroll in the course until they successfully complete it.

Continuing probation

A student who is already on probation and earns a GPA of 2.00 or higher for the term but is not successful in raising their cumulative GPA above 2.00 is placed on continuing probation. Continuing probation is meant to acknowledge the student’s academic progress while still providing academic support to help them reach the required 2.00 GPA. Students on continuing probation must continue to attend mandatory advising appointments until they earn a cumulative GPA of 2.00 or higher.

Disqualification

If the student's ASU cumulative GPA is not 2.00 or higher and the conditions of probation have not been met after one semester on probation, the student is disqualified for a minimum of two full academic semesters. Disqualification is exercised at the discretion of the institute and becomes effective on the first day of the fall or spring semester following institute action. A disqualified student is notified by the dean’s office of the institute and is not allowed to register for a fall or spring semester at the university until reinstated. Students should consult with their academic advisor to discuss this academic standing and their options for returning to ASU.

Reinstatement

A student who has been academically disqualified and seeks to return to ASU for either a fall or spring semester, at any time, and has met college admission standards is required to seek readmission to the university and reinstatement to the Herberger Institute. Applications for readmission to ASU [15] must be made to ASU Admission Services; the application for readmission automatically generates a letter of appeal for reinstatement to the Herberger Institute for consideration.

Any disqualified student interested in returning to a Herberger Institute major in a fall or spring semester should contact a Herberger Institute advisor to discuss their options and share their plan to return. To return in a fall or spring semester, the student would need to meet one of these two criteria:

1. Attend ASU summer session and repeat courses in which they received a grade of "D" or "E" to raise their cumulative ASU GPA to at least a 2.00. They should review the ASU course repeat policy [16] for more information about how this may impact their cumulative GPA. Disqualified students are permitted to attend summer session without being reinstated by the university, but they may need to submit an application for readmission to enroll in summer courses.
2. Attend a college of their choice and enroll in at least 12 credit hours in a single semester while away from ASU. Before enrolling, it may benefit the student to have their ASU academic advisor review the 12 credit hours they intend to take at the community college. Their course load may include any combination of general studies, major courses and electives. The student is expected to earn a cumulative grade point average of at least 2.50.

The likelihood of successful reinstatement is increased when students follow recommendations and meet established standards for summer coursework or coursework completed at other institutions.

Also available in the Office of Student Success is information on the college policies and procedures for student grievances with respect to grades [12], and various petitions regarding standards and graduation requirements.

Advising

Undergraduate academic advising is handled as a centralized activity within the institute. Students are encouraged to make appointments through the Herberger Institute Office of Student Success [17]. Appointments are recommended and should be scheduled with the lead academic advisor.

There are multiple ways to schedule an advising appointment:

- online through My ASU [18]
- phone: 480-965-4495
- email: HerbergerAdvising@asu.edu
- in-person:
  Los Angeles: California Center Grand (CCG) - 2nd floor
  Southeast corner of Grand and 9th Street

  Downtown Phoenix: Fusion on First (FOF) - Suite 320
  Southwest corner of Fillmore and First Avenue

  Tempe: Design South (CDS) - Suite 101
  Southwest corner of Forest and University

While the institute provides academic advising, it is ultimately each student's responsibility to fulfill academic and program requirements. Administration of program requirements is the responsibility of the head of the academic unit and the dean.

Credit and registration

Course load

First-semester freshmen and entering transfer students are not permitted to register for more than 18 credit hours in session C, or nine credit hours in session A and nine credit hours in session B. Continuing students who wish to register for more than 18 credit hours must meet the academic criteria for an overload petition and work with their academic advisor in the Herberger Office of Student Success. No student should assume that the petition for overload will be granted.

For summer sessions, the maximum course load is 14 credit hours, seven per six-week summer session. Overloads are rarely granted for these sessions, and requests must be petitioned to the Herberger Office of Student Success.

Audit grade option

Students may choose to audit certain courses; this option allows them to attend regularly scheduled class sessions, but they do not earn credit. Students should obtain instructor approval before registering for these courses. The option to audit is not available for all courses.

This grade option may not be changed after the add period.

Pass/fail or credit/no credit

The only courses accepted toward graduation with a grade of pass/fail or credit/no credit are those designated by the academic unit as such, or internships and field studies.

Transfer credits

While the university accepts credits transferred from other accredited institutions, transfer coursework must be equivalent in content and level of offering. Arts or design transfer credits are not applied to specific degree programs until they are reviewed and accepted by the appropriate academic units. To evaluate certain transfer studio credits, The Design School and the School of Art require work samples in portfolio format from those classes.

Incompletes

Students are responsible for contacting their course instructors regarding the process of requesting and fulfilling requests for an incomplete. The grade of "I" (incomplete) can only be given by an instructor (and it is subject to unit director approval) when a student who is doing otherwise acceptable work is unable to complete a course (e.g., final exam or term paper) because of illness or other conditions beyond the student's control. The student must submit a request to the instructor to be considered for a grade of "I." A completed request must have the incomplete grade request form [19] and include a justification, a listing of requirements that have not been fulfilled, and a proposed schedule of completion. The instructor reviews the request and determines whether to accept or deny the request. The instructor may propose modifications when submitting a copy of the accepted request to the appropriate office.

A grade of "I" in any course that is a prerequisite for sequential courses automatically denies the student enrollment in subsequent courses and could result in the student being administratively dropped from a subsequent course in which they are enrolled.

The student has a maximum of one calendar year from the date the grade of "I" is recorded to complete the course, but faculty can place lesser time limitations at their discretion. A student does not re-register or pay fees for a course for which an "I" has been received in order to complete the course. A grade of "I" for undergraduate coursework that has been on a student's record for more than one calendar year automatically changes to "E."

Withdrawals

University withdrawal regulations apply to all courses. In certain Herberger Institute degree programs, curricula are modular and sequential; because space in these programs is limited, a student is expected to progress through the curriculum with the class. To fully understand all potential repercussions of withdrawal from any courses, the student should discuss their plans with their academic advisor.

Degree requirements

Associate degrees

Students in the Associate of Arts programs should refer to their major map or curriculum checksheet and the university associate degree graduation requirements policy [20] for minimum credit hour, GPA and other degree requirements.

Critical requirements

All Design and the Arts students must meet the program and critical requirements for their majors. Students who do not comply with the critical requirements are considered off track, and their records are placed on hold; students are required to meet with an institute academic advisor to have a hold removed. For more information about critical requirements, students should refer to the corresponding major map or curriculum checksheet.

Concurrent degrees

Students who wish to pursue concurrent degrees must have the approval of the colleges and institutes housing both majors. Students are approved for concurrent degrees if they meet the following requirements:

- They are in academic good standing (minimum 2.00 cumulative ASU GPA).
- They have completed at least six semester credit hours of major related course requirements for each degree (12 semester credits total).
    - For the Design and the Arts degree, the six credit hours must be completed from the discipline's prefix (e.g., GRA for graphic design; AME for media arts and sciences; ARS for art history).
    - For a non-Design and the Arts degree, six credit hours must be major specific or major related.
    - Music degrees require passing an audition; successful completion of the audition replaces the six credit hour requirement of music coursework.

Students who meet these criteria may request to pursue both degree programs by submitting a concurrent degree request form [21] as part of the university approval process.

Change of major

Architecture studies, graphic design, industrial design, interior design, and landscape architecture majors:

An ASU student who would like to change majors and would be new to these programs must have a minimum cumulative GPA of 2.75. They should understand that their GPA must be brought up to a 3.00 or higher within one semester to remain in good standing. An ASU student who is returning to this major (having previously studied this major in a prior semester) must have a minimum cumulative GPA of 3.00.

Film and media production, theatre (acting), theatre (design and production) majors:

An ASU student who would like to change majors and would be new to these programs must have a minimum cumulative GPA of 2.25. They should understand that their GPA must be brought up to a 2.50 or higher within one semester to remain in good standing. An ASU student who is returning to this major (having previously studied this major in a prior semester) must have a minimum cumulative GPA of 2.50.

Dance, costume design and technology for the creative industries, environmental design, fashion, film (filmmaking practices), game design, all media arts and sciences majors, performance and movement, all School of Art majors, and theatre (no concentration) majors:

A current ASU student has no additional requirements for changing majors.

Music, theory and composition, and performance majors:

An ASU student who would like to change majors to these programs should reference the audition requirements listed in the admission requirements in Degree Search [22].

Reinstatement/readmission

Undergraduate degree-seeking students who previously attended ASU in the Herberger Institute for Design and the Arts but have not been enrolled at ASU for up to seven consecutive fall or spring semesters may be eligible to return through quick re-entry [23]. Students do not need to submit a new application or application fee, but they must contact an academic advisor in their program for registration.

Undergraduates who have been away from the university for eight or more semesters and want to return to ASU in a Herberger Institute for Design and the Arts program are required to apply for readmission [15] through the ASU Admission Services office.

- Readmission is only considered after a student has remained out of the institute for a minimum of eight semesters.
- A student is required to supply proof that they are now capable of successfully completing courses in the discipline by the completion of at least 12 credit hours of appropriate coursework with a GPA of 2.50 or higher.
- If the readmission request requires a change of major, then admission decisions are made by the college that offers the intended major.
- If a student seeks readmission to their previous Design and the Arts major and that major requires a creative review, a new review may be required.
- If readmission is approved within the institute, the student returns with a probationary status in the appropriate degree program.

Once readmitted, returning students are required to meet with an institute advisor before enrolling in courses at ASU.

Other special requirements

Creative reviews

A creative review (audition, interview, milestone, portfolio submission) may be required for entrance into some majors in the Herberger Institute for Design and the Arts. Students should visit the school's admission page [24] for details.

Graduate policies

Advising is handled as a decentralized activity within the institute. To offer personalized attention, each academic unit establishes its own graduate advising procedures. Students are encouraged to make appointments through the central office of their major discipline. Students should consult their academic unit's website for general information about the programs, admission and advising procedures:

- School of Art [4]: 480-965-6303
- School of Music, Dance and Theatre [8]: 480-965-3371
- The Design School [25]: 480-965-3536
- The GAME School [7]: 480-965-9438
- The Sidney Poitier New American Film School [6]: 602-496-5555

Students must fulfill all requirements of their graduate program to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College [26] and the Herberger Institute for Design and the Arts.

Ira A. Fulton Schools of Engineering policies

The Ira A. Fulton Schools of Engineering [1] educates undergraduate and graduate students, providing them with the knowledge, skills and attitudes they need for success in technically oriented careers. The schools offer students a variety of educational opportunities through which they may achieve excellence in the major branches of engineering, computer science, informatics, construction management, aviation, technology, human systems engineering, environmental resource management, and technological entrepreneurship and management.

The Fulton Schools takes pride in its diversity, its economic and cultural heritages, and the quality of its graduates. The schools strive to be integral to the communities they serve and a lifelong presence in the lives of those within their compass. The schools' educational and research programs are built around the principles of entrepreneurship, use-inspired research and scholarship, a focus on the individual, the intellectual fusion of unique and distinct disciplines, social embeddedness in communities (local, national and international), and global engagement.

Ira A. Fulton Schools of Engineering aspirations
Graduates from any of the schools' programs have a solid technological background. Additionally, the Fulton Schools aspires to develop leaders who are well-read, well-spoken and knowledgeable about current business practices. Experiential education is recognized as a complementary praxis and integral to the overall academic experience. To this end, the schools offer enhanced curricula, special courses and extracurricular activities to enrich the student's stay and to offer every student an opportunity to achieve the schools' aspirations.

Professionalism
All the programs within the schools are professional programs, and professionalism is an important component of all the curricula. The schools strive to help students understand and value the various aspects of professionalism, including ethical behavior, a desire for lifelong learning, the ability to communicate with others, and an awareness of how the profession fits into society and impacts it. As the first step in ethics, all students are expected to embrace the student professionalism expectation [2] and follow the student code of conduct and rules of academic integrity [3] as defined by the university.

Academic integrity

Students enrolled in the Ira A. Fulton Schools of Engineering must adhere to ASU's academic integrity policy [4]. Students are responsible for reviewing this policy and understanding each of the areas in which academic dishonesty can occur. In addition, all engineering students are expected to adhere to the ASU student honor code [5]. When a violation is reported to the Academic Integrity Office, students have the opportunity to provide feedback before a final decision is made. Fulton Schools keeps a record of all confirmed academic integrity violations; multiple violations may result in increasingly significant sanctions.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [6]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [7]

Undergraduate policies

Academic standing

Student responsibilities

Students need to make many decisions as they complete their degree programs. While the schools and the university have a number of resources available to help with decision-making (e.g., faculty, courses, advisors and tutors), students are expected to take responsibility for their decisions.

Ira A. Fulton Schools of Engineering good standing

Students are expected to select and successfully complete courses that lead to the timely completion of their degree programs. Students are said to be in good standing if they fulfill all the following requirements:

1. maintain acceptable GPAs
2. enroll in and complete critical tracking requirements
3. complete courses each semester that are applicable to their degrees

University academic warning

An undergraduate student with a cumulative GPA lower than 2.00 at the end of their first semester (fall or spring) is considered to be in the status of university academic warning. If, after one semester with an academic warning, a student still does not achieve the minimum GPA standard of 2.00, they are placed on probation for at least one additional semester. If a student's minimum GPA first falls below the standard in a semester that is not their first at ASU, they are placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

A student with an academic warning is considered to be in conditional good standing and is permitted to enroll.

Regardless of whether a student's status is an academic warning or probation, they must self-enroll [8] in the Canvas-based course Fulton Academic Success Strategies to prepare for the upcoming semester and develop a success plan for returning to university academic good standing. The student also meets with their academic advisor to finalize coursework for the upcoming term. At the discretion of the student's college or school, that plan may require successful completion of UNI 220 Mindset Connections.

Ira A. Fulton Schools of Engineering academic probation

Students may not make satisfactory progress for many reasons. These students are placed on Ira A. Fulton Schools of Engineering academic probation to ensure that they receive the extra attention and resources they need to get back in good standing. Working with an academic advisor to plan a strategy for success is crucial. Students may be required to reduce their course loads (13 credit hours maximum), retake courses or even take courses outside their programs.

To return to academic good standing in the Fulton Schools, students on probation must earn a minimum semester GPA of 2.25 and earn a minimum cumulative ASU GPA of 2.00 at the end of the probation semester. If a student is enrolled in only one course, a grade of "C+" (2.33) or higher and a minimum cumulative ASU GPA of 2.00 are required to obtain academic good standing. Students who meet either the semester GPA requirement or the cumulative ASU GPA requirement at the end of their first probationary semester may be continued on probation. Courses completed during summer sessions are not used to reevaluate a student's probationary status.

Conditions for Ira A. Fulton Schools of Engineering probation

A student is placed on college or university probation when specific academic expectations are not met. Some conditions trigger an automatic placement on probation, whereas others trigger an automatic review of the student's case to determine whether probation is warranted. When a probation review is triggered, the final decision and any conditions of probation are determined at the program level.

Automatic probation is triggered by either of the following:

- two successive semesters with a GPA lower than 2.00
- an ASU cumulative GPA lower than 2.00

Automatic review (borderline) is triggered by either of the following:

- a semester with a GPA of 2.00 or lower
- a cumulative GPA in the major lower than 2.00

Ira A. Fulton Schools of Engineering continuing probation

A student on probation or continuing probation at the university level is placed on college-level continuing probation status when specific academic expectations are not met. When a continuing probation review is triggered, the final decision and any conditions of continuing probation are determined at the college level.

To return to academic good standing in the Fulton Schools, students on continuing probation must earn a minimum semester GPA of 2.25 and earn a minimum cumulative ASU GPA of 2.00 at the end of the probation semester. If a student is enrolled in only one course, a grade of "C+" (2.33) or higher and a minimum cumulative ASU GPA of 2.00 are required to obtain academic good standing.

Automatic continuing probation is triggered by either of the following:

- a student on probation does not attain a semester GPA of 2.25 or higher and has a cumulative GPA of at least 2.00 at the end of the probation semester
- a student on probation or continuing probation attains a semester GPA of 2.25 or higher and has a cumulative GPA lower than 2.00

Ira A. Fulton Schools of Engineering ineligibility

Students who are on continuing probation and fail to meet the schools' retention standards become ineligible to continue working toward a degree within the Fulton Schools.

Ineligibility occurs if the continuing probationary student does any of the following:

- does not attain a semester GPA of 2.25 or higher and has a cumulative GPA of at least 2.00 at the end of the probationary semester
- has already been on probation for two consecutive semesters
- fails to complete any courses appropriate for the degree during each semester

Ineligible students are subject to the following limitations:

- Students who change colleges may not register for courses in the Fulton Schools unless the courses are required by their new majors.
- Students who register for courses in the Fulton Schools may be withdrawn from these courses any time during the semester in which they are registered.

Ineligible students are encouraged to consider these options:

- Students may be eligible to change their majors to programs in other colleges if they are in university academic good standing and have acceptable cumulative GPAs; the acceptable GPA level depends on the number of credit hours of completed coursework. Students should contact their advisor to determine if this is an option for them.
- Students may take nonengineering courses during summer sessions.
- An ineligible student may apply for readmission to the college after one calendar year.
- Students may request a status review by contacting the Office of Academic and Student Affairs.

Ira A. Fulton Schools of Engineering disqualification

Students who are on probation or continuing probation and fail to meet the schools' retention standards become disqualified from continuing to work toward a degree within the Fulton Schools.

Disqualification occurs if the student on probation or continuing probation does not attain a semester GPA of 2.25 or higher and has a cumulative GPA lower than 2.00 at the end of the probation semester.

Disqualified students are subject to the following limitations:

- A disqualified student is not allowed to register in a fall or spring semester at the university. If the student has already registered for a future fall or spring semester, the registration is canceled.
- A student who has been disqualified may apply for readmission to the college after one calendar year.
- A disqualified student may not attend as a nondegree student.
- If a disqualified student elects to attend another university or two-year college, any credits earned there will not affect the ASU cumulative GPA. A course repeated elsewhere will not result in a replacement of a grade earned at ASU.

Ira A. Fulton Schools of Engineering student disqualification and ineligibility appeals

A student disqualified or deemed ineligible because of lack of satisfactory progress is afforded the opportunity to appeal the decision to the school or program. All timely student appeals are reviewed by the school or program for consideration. Any student appeal that is denied by the school or program is automatically forwarded to the Ira A. Fulton Schools of Engineering Academic Standards Committee for review. Appeal decisions made by the Academic Standards Committee are final.

Advising

Successful completion of a program in the Ira A. Fulton Schools of Engineering requires careful planning. While final responsibility for becoming familiar with and understanding academic degree requirements lies with each student, each program employs professional academic advisors who work with students to help them set academic and career goals, understand school and university policies and procedures, meet degree requirements, and become familiar with sources of academic support within the university. Students also may work with faculty advisors familiar with the chosen fields of specialization. Students should consult their advisors before registering each semester. A list of advising contacts [9] can be viewed online.

Staff in the Office of Academic and Student Affairs in the Fulton Schools is available to assist individual students with many different types of advising issues. Staff members work with students to answer general questions about policies and procedures; help with registration transactions; administer the probation, disqualification and readmission processes; oversee disciplinary actions; hear grade grievances; and assist with other administrative matters.

First-year students, student-athletes, and students who are found to be having academic difficulty are required to receive advisement before they can register for any classes, including during summer sessions. Students should consult their academic advisor or review the My Tasks list in My ASU to determine whether advising is required.

Credit and registration

Students are required to register for courses using one of the university-provided processes. As part of the registration process, the school enforces the following registration restrictions.

Maximum hours

Students enrolled in undergraduate degree programs in the Ira A. Fulton Schools of Engineering may register for a maximum of 19 credit hours per semester. Any student who wants to register for more than the maximum must submit a college standards petition [10] and have an approval on file before registering for the overload.

Ira A. Fulton Schools of Engineering probationary status

Students who have been placed on academic probation within the Fulton Schools must complete the Canvas-based course Fulton Academic Success Strategies (Canvas self-enroll) [8] and then schedule an appointment with their academic advisor to discuss success strategies and develop a plan to return to academic good standing. Students on academic probation within the Fulton Schools may enroll in a maximum of 13 credit hours per semester.

Degree requirements

Undergraduate nondegree status

Students who are enrolled in an undergraduate nondegree status in the schools must obtain advising and approval from the Office of Academic and Student Affairs before registering each semester.

Course prerequisites

Students should consult class search and the course catalog [11] for course prerequisites. Students who register for courses without the designated prerequisites may be withdrawn without their consent at any time before the final examination. Such withdrawals may be initiated by the course instructor, the program chair of the program offering the course, or the dean of the college. In such cases, students do not receive monetary reimbursement.

Pass/fail grades

Students requesting credit for pass/fail courses taken at another institution must file an Ira A. Fulton Schools of Engineering standards petition [10]. Each request is judged on its particular merits.

Non-Ira A. Fulton Schools of Engineering students

Students who are not admissible to programs in the Ira A. Fulton Schools of Engineering and who enroll in another college at ASU may not register for any 300- or 400-level courses in the schools unless the courses are required in their degree programs, and the students have the proper course prerequisites.

First-year composition requirement

Completion of the first-year composition requirement [12] is required for graduation. Any student whose written or spoken English is unsatisfactory in any course may be required by the appropriate school director or program chair to take additional coursework.

Concurrent degrees

Students interested in pursuing concurrent degrees should consider several aspects:

- The degree conferral date occurs when all degree requirements are satisfied for each undergraduate degree program — that is, students receive both degrees at the same time regardless of whether coursework for one degree is completed before coursework for the other.
- Admission criteria, policy for double-counting credits, and other requirements and rules are defined by the school or college offering the degree program.
- Financial aid and scholarship limits apply and may not cover all semesters; therefore, students may need to invest more time, and hence more funds, to complete concurrent degrees.

Once a decision is made to pursue concurrent degrees, the process must be set in motion:

- A student pursuing concurrent degrees must meet with both program advisors to learn about degree and graduation requirements for both degree programs and the eligibility requirements before starting the approval process. Both advisors should review the graduation plan that outlines courses the student will take each semester.
- The student must complete the concurrent degree process with each school or college offering the desired degree programs to request permission to pursue concurrent degrees.
- Concurrent degree approvals result in the posting of concurrent degrees in PeopleSoft. If the student later decides to drop one of the programs, they should inform University Registrar Services graduation office [13] that they are no longer pursuing concurrent degrees.

Change of major

Students interested in switching majors to one of the programs within the Ira A. Fulton Schools of Engineering must meet the schools' admission requirements for transfer students [14]. This requirement applies to students admitted to ASU as first-year or transfer students. A change of major is not guaranteed, and students interested in changing majors are

encouraged to make an appointment with an advisor in the program of interest to discuss the probability of success and to develop a plan of action to ensure successful advancement to upper-division courses.

Students admitted as first-year students to the Fulton Schools who have maintained continuous enrollment in any Fulton Schools major — with the exception of students admitted to The Polytechnic School [15], the School of Manufacturing Systems and Networks [16], the School of Integrated Engineering [17] and the School of Computing and Augmented Intelligence [18] at the West Valley campus — may change to any other major within the Fulton Schools, provided they are in good academic standing [19]. Students admitted to the four schools listed above must meet the higher transfer admission requirements to change to a Fulton Schools major outside their current schools.

Evaluation of previous coursework

Transferring from one institution to another or between programs can result in a net loss of credits that count toward the degree. Thus, it is important for students who are considering transferring to the Fulton Schools from other institutions, whether community colleges or four-year institutions, to carefully study the requirements of their degree programs to get a sense of which courses may transfer.

Credit is granted for transferred courses deemed equivalent to corresponding courses in the selected program of study, subject to grade and ASU resident credit requirements. No grades lower than "C" (2.00) are accepted as transfer credit to meet the graduation requirements of the schools. Credits transferred from a community college or two-year institution are applied only as lower-division credits. For a listing of the acceptable courses transferable to the various degree programs, prospective transfer students should consult their advisors and refer to the Transfer Guide [20].

Some courses taken at ASU or other universities may be acceptable for general university credit but may not be applicable toward the schools' degree requirements. Determination of those particular courses applicable to a specific degree program is made within the appropriate academic unit with approval of the dean.

Currency of coursework

Courses taken more than five years before admission to degree programs in the Fulton Schools are not typically accepted for credit for engineering majors; the program to which the applicant is applying has discretion. However, students still may earn university elective credit or general studies credit for these courses. Courses completed within the five years preceding admission are judged for their applicability to the student's curriculum.

General education development

Students admitted to the university after successful completion of a GED examination are directly admitted to the Ira A. Fulton Schools of Engineering Bachelor of Science or Bachelor of Science in Engineering program within their majors, provided they meet the minimum ACT or SAT score required for first-year admission to the Fulton Schools.

Graduation requirements

To qualify for graduation, a Fulton Schools student must have a minimum cumulative ASU GPA of 2.00 and a GPA of at least 2.00 for major courses.

University graduation requirements

Students must meet program and Fulton Schools requirements, as well as all university graduation requirements [21]. A well-planned program of study enables students to meet all requirements in a timely fashion. Students are encouraged to consult with an academic advisor when planning their program to ensure compliance with all requirements.

Associate degrees

Students in the Associate of Science program should refer to their major map or curriculum checksheet and the university associate degree graduation requirements policy [22] for minimum credit hour, GPA and other degree requirements.

Reinstatement/readmission

Undergraduate degree-seeking students who previously attended ASU in the Ira A. Fulton Schools of Engineering but have not been enrolled at ASU for up to seven consecutive semesters are eligible to return through quick re-entry [23]. Students do not need to submit a new application or application fee, but they must contact an academic advisor in their program for registration.

Undergraduates who have been away from the university for more than seven semesters and want to return to ASU in a Fulton Schools program are required to apply for readmission [24] through ASU Admission Services. Readmission requests are processed as follows:

1. Engineering students seeking readmission to the same program they left and who left ASU with either academic good standing or probation status are readmitted to that degree program with the same academic standing they had when they left ASU (i.e., good academic standing or probation).
2. Students seeking readmission to a Fulton Schools program other than the program they left and who have an ASU GPA of 3.00 or higher are readmitted to the new degree program with the same academic standing they had when they left ASU (i.e., good academic standing or probation).
3. Students seeking readmission to a Fulton Schools program other than the program they left with either academic good standing or probation status and who have an ASU GPA lower than 3.00 are subject to the process of admission by change of major. These requests for readmission are reviewed on an individual basis. If the request for readmission is approved, the student is readmitted to the new degree program with the same academic standing they had when they left ASU (i.e., good academic standing or on probation).
4. Students seeking readmission to a Fulton Schools program who left ASU with either ineligible or disqualified status are subject to review by the Office of Academic and Student Affairs and the program. Readmission is only considered after a student has remained out of the Fulton Schools for a minimum of 12 months. A student is required to supply proof of now being capable of successfully completing courses in the discipline by the completion of at least 15 credit hours of appropriate coursework with a GPA of 3.00 or higher and a cumulative GPA (ASU plus transfer) of at least 2.50. If the readmission request requires a change of major, the student must complete the review process for admission by change of major. If readmission is approved, the student returns with continuing probation status in the appropriate degree program.

Once readmitted, returning students are required to meet with a program advisor before enrolling in courses at ASU.

Other special requirements

Advancing to upper-division courses

Ira A. Fulton Schools of Engineering faculty have identified a set of critical requirements for the first four semesters of each program. Meeting these requirements is key to progressing in the student's chosen major. These requirements, which include a set of courses and required performance levels, are outlined on the student's major map or curriculum checksheet.

Graduate policies

Maintaining satisfactory academic progress

A student who has been admitted to a graduate degree program in the Ira A. Fulton Schools of Engineering with either regular or provisional admission status must maintain a GPA of 3.00 or higher in all the following:

1. all work taken for graduate credit (courses numbered 500 or higher)
2. coursework in the student's approved plan of study
3. all postbaccalaureate coursework taken at ASU (overall GPA)

A student is placed on academic probation if at least one of their GPAs listed above is lower than 3.00. Students are notified by mail when placed on academic probation.

A student earns good academic standing by obtaining GPAs of 3.00 or higher in coursework listed above within the next nine credit hours or one academic year, whichever comes first. Coursework such as research and dissertation and any course graded with a "Z" (in progress) or "Y" (satisfactory) cannot be included in these nine hours.

A student may be recommended for dismissal from a graduate program if they fail to increase all the GPAs listed above to 3.00 or higher within the specified time frame defined in the previous paragraph.

A student may appeal actions concerning dismissal by petitioning the program in which they are enrolled.

Student dismissal appeal

A student may appeal actions concerning a satisfactory academic progress dismissal by submitting a timely appeal to the school or program in which they are enrolled. Any dismissal appeal submitted to the school that is denied is automatically forwarded to the Ira A. Fulton Schools of Engineering Academic Standards Committee for additional review. Any appeal denied by the Academic Standards Committee is forwarded to the Graduate College for final review and execution.

Dismissal appeal opportunities are typically not provided in the following situations: dismissal for failure to satisfy provisional or probationary admission requirements within the specified time, failure to complete regular admission deficiencies within the prescribed time frame, student appeal resulting in a school-issued probation extension, or failure to maintain continuous enrollment.

Academic units in the Fulton Schools can expand this policy statement to include additional policies governing the satisfactory academic progress of the students in their graduate programs.

Additional graduate policies

Full details of policies related to graduate students in the Fulton Schools can be found on each program's webpage. For a list of programs, students should visit the Fulton Schools website [14]. University policies related to graduate students can be found on the Graduate College webpages [25].

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College and the Ira A. Fulton Schools of Engineering.

Rob Walton College of Global Futures policies

The Rob Walton College of Global Futures [1] prepares next-generation leaders with the knowledge, skills and mindsets they need to tackle complex global challenges. Home to the School for the Future of Innovation in Society [2], School of Sustainability [3], School of Complex Adaptive Systems [4], School of Ocean Futures [5] and Rob Walton School of Conservation Futures [6], the college fosters new interactions between students, staff, faculty and partners that elevate the ability to understand complex, integrated social, environmental and technical systems; drive principled innovation; and lead to evidence-based, ethical interventions that ensure a just, healthy and fulfilling future for everyone. Students learn how to develop enduring solutions that benefit people everywhere and support a healthy, thriving planet.

Student responsibilities
Students need to make many decisions as they complete their degrees. While the college and the university have a number of resources available (e.g., faculty, courses, advisors and tutors) to help in the decision-making process, students are expected to take responsibility for their decisions.

Academic integrity

The Rob Walton College of Global Futures academic integrity policies and procedures [7] adhere to ASU's academic integrity policies and procedures [8]. Students are part of an academic community dedicated to learning and inquiry, grounded in the pursuit of truth and a commitment to honesty and integrity. It is expected that student conduct reflect this responsibility, in line with the ASU student honor code [9]. Students' coursework, research and projects must be their own original work and reflect individual effort and integrity. When in doubt about appropriate conduct, students should consult a faculty mentor, advisor or the college's academic integrity officer [10] for clarification.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [11]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [12]

Undergraduate policies

Academic standing

Good standing

Students with a cumulative ASU GPA of 2.00 or higher are considered in good standing.

Academic warning and academic probation

An undergraduate student with a cumulative GPA lower than 2.00 at the end of their first semester (fall or spring) at the university is considered to be on academic warning during their second term. If a student on academic warning does not achieve the minimum GPA standard of 2.00 at the end of the warning period in the second term, they are placed on probation for the following term.

Students who are no longer in their first semester at ASU and do not maintain a cumulative GPA of 2.00 or higher in all courses taken at ASU are placed on academic probation.

A student with an academic warning or probation status must meet with an academic advisor to discuss academic success strategies for the subsequent semester and develop a success plan for returning to academic good standing.

The student and advisor discuss campus academic resources, plan current and future-semester goals, and discuss strategies to attain academic success. Students on academic warning or probation may be limited in the number of credit hours in which they may enroll; they also must enroll in the one credit hour academic refresher course UNI 220 Mindset Connections [13], which helps students develop skills and strategies to be their strongest academic selves. Students also must do one of the following:

- Students must raise their cumulative ASU GPA to 2.00 or higher by the end of the next semester to return to good academic standing.
- If a cumulative GPA of 2.00 can't be reached in one semester, students must obtain a semester GPA of 2.00 or higher with no grade lower than a "C" to be granted one additional semester on continuing probation; this gives students two semesters to return to good academic standing and avoid disqualification.

Disqualification

Students who do not meet probation requirements may be disqualified from ASU and are not permitted to register for fall or spring sessions. However, students can attend summer sessions to bring their GPA to good standing. If disqualified students choose to register for courses in the summer, they first should meet with an advisor to better understand grade replacement policies and determine which courses would be beneficial to complete. Students who already registered for future fall or spring semesters have their registrations canceled.

Academic advising

The Rob Walton College of Global Futures Student Services Center [14] supports students' achievement of their personal, educational, cultural and career goals, while enabling them to become self-directed, lifelong learners. The college encourages students to meet with an advisor at least once a semester and requires that students meet with an advisor at certain points during their academic career:

- before the first semester: all newly admitted students
- first semester: during the first semester to plan for the second semester
- fifth semester: when students are starting to focus their studies and think about steps leading to graduation
- seventh semester: to prepare for any capstone experiences required and plan for postgraduation

Office hours are Monday through Friday, 9 a.m.–4 p.m., excluding university holidays. Students should schedule their advising appointments in advance through My ASU [15] or the undergraduate advising page [16] so advisors can set aside the appropriate time to answer all their questions.

Registration and credit

Students who enroll in courses offered by the Rob Walton College of Global Futures are expected to follow the rules and deadlines specified in this catalog and the ASU academic calendar [17]. Students are encouraged to meet with their academic advisor before registration.

Maximum hours and course load

Students enrolled in undergraduate degree programs in Global Futures may register for a maximum of 18 credit hours per semester (fall and spring), with a maximum of nine credit hours per session A or session B. Students may register for a maximum of 14 credit hours per summer term, with a maximum of seven credit hours per session A or session B.

Students who want to register for more than the maximum must submit a credit hour overload request [18] and meet the stated criteria. Students generally are not permitted to exceed the maximum credit limit in their first semester at ASU or in the hybrid year of an accelerated bachelor's plus master's degree program; however, each request is reviewed on an individual basis.

More details on credit hour limits are available on the university course load and concurrent enrollment policy. [19]

Late enrollment transactions

Global Futures adheres to all posted university deadlines for course enrollment, including add, drop and withdrawal. Late drops from Global Futures courses are not approved; however, students can withdraw from courses following the regular course withdrawal process [20]. If students wish to add a Global Futures course after the official add deadline, they may request special permission to do so. Instructor approval is required; however, instructor approval does not guarantee college-level approval. Add and drop deadlines are posted on the academic calendar [17].

Repeat and replacement policy

Students who wish to repeat courses and possibly replace prior course grades must follow ASU's repeating courses policy [21] regarding the number of credit hours that are allowed to be repeated and the types of courses that are eligible for a grade replacement.

Generally, students may not repeat an undergraduate course for credit when a grade of "C" or higher is earned, unless the higher grade is required for the course as part of the major.

Students who wish to repeat a course for a third time must submit a petition. Students should contact the advising office for information. [16]

Pass/fail grade options

Some instructors may offer courses on a grading basis of "Y" (satisfactory) and "E" (failing). With a "Y" grade, students earn credit hours, but the grade is not factored into the GPA. The "P" (pass) grade works similarly but is only used when an individual student receives permission from both the class instructor and the college or school before the add deadline for the session. Permission is recorded on the application for pass/fail enrollment form [22]. A grade of "E" is factored into the GPA. Students should see ASU grading options and definitions for more information [23].

Degree requirements

All undergraduate students in the Rob Walton College of Global Futures must complete the university's general studies requirements [24] and all requirements for their majors.

Minors

Students Global Futures may not use courses in their majors to fulfill the requirements of their minors except where specifically indicated. Similarly, they may not use courses in their minors to fulfill their major requirements, with the exception of the related discipline requirement for the BA or BS in sustainability.

Concurrent degrees

To declare a concurrent degree, current Global Futures students must meet the following requirements and any eligibility requirements of the additional degree program:

- have completed at least 30 graded credit hours
- have a minimum cumulative ASU GPA of 2.75

Students must follow the university process [25] for requesting concurrent degree approval.

As a part of seeking college approval, students are asked to submit online responses to a short set of questions. If the student does not submit a response within one week, the concurrent degree request is canceled. The student may resubmit their request when ready to respond to the questions. Within two weeks of concurrent degree approval, students should schedule an appointment [26] with a Global Futures advisor to review the degree requirements.

Degree combinations with too great an overlap between the required courses for each major are not approved. For example, students may not pursue a Bachelor of Arts or Bachelor of Science in sustainability and a BS in sustainable food systems, a BA in business with a concentration in sustainability, or a BA in interdisciplinary studies with a concentration in sustainability.

Readmission

Students seeking reinstatement after disqualification or readmission after an absence from the university should contact the Rob Walton College of Global Futures Student Services Center regarding procedures and guidance for returning to good standing. When reinstatement includes readmission, an application must be made through the ASU readmission process [27]. Readmission applications are reviewed by the college on a case-by-case basis, and considerations may include the length of absence from higher education, academic standing and GPA at the time of leaving ASU, number of credit hours completed after leaving ASU, grades earned and overall transfer GPA.

Other special requirements

Grade appeals

The Rob Walton College of Global Futures follows the university policy for student appeal procedures on grades [28] and has outlined more information about the process within the college on the Global Futures website [29].

Graduate policies

The college's graduate policies are guided by the Graduate College policies for graduate studies [30]. Graduate advising and student services are currently offered directly through each of the schools within the Rob Walton College of Global Futures: School for the Future of Innovation in Society [2], School of Sustainability [3], School of Complex Adaptive Systems [4], School of Ocean Futures [5] and Rob Walton School of Conservation Futures [6].

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those outlined by the Graduate College and the Rob Walton College of Global Futures. Additional information about program requirements and what is required to maintain good academic standing can be found in program handbooks.

Thunderbird School of Global Management policies

For 80 years, Thunderbird School of Global Management has been the vanguard for global leadership and management education. Since 1946, Thunderbird has helped guide exceptional individuals to shape meaningful and impactful careers all over the world — as entrepreneurs and innovators; as leaders of multinational corporations and family businesses; and as individuals in government agencies, international organizations and the nonprofit sector.

Today, people live in an era of profound global transformation. The digital age is reshaping lives and unlocking vast opportunities, as well as posing distinct challenges and changes to the ways people live and work.

More than ever, the world needs Thunderbird graduates, those who have contextual global mindsets and unparalleled fluencies that enable them to work across countries, sectors and cultures. Graduates do not just thrive in this new, digital and global economy — they redefine it, creating the industries, ecosystems and future they want for themselves and generations to come.

Academic integrity

Academic honesty is expected of all students in all examinations, papers, laboratory work, academic transactions and records. The ASU student academic integrity policy [1] is strictly enforced for students found in violation of this policy. Possible sanctions include appropriate grade penalties, loss of registration privileges, disqualification and dismissal.

For more information on graduate-specific policies, students should review the Graduate College academic integrity page. [2]

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment, and Retaliation. [3]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [4]

Undergraduate policies

Academic standing

To remain in university academic good standing [5], all students at Thunderbird must:

- maintain a minimum GPA of 2.00 each semester
- maintain a minimum cumulative GPA of 2.00

University academic warning

An undergraduate student with a cumulative GPA lower than 2.00 at the end of their first semester (fall or spring) is considered to be in the status of university academic warning.

Academic probation

An undergraduate student is placed on university academic probation if, at the end of a semester (fall or spring) that is not the student's first semester at ASU, they have a cumulative GPA lower than 2.00, or they received an academic warning in the prior term.

Continuing probation

A student is placed on university continuing academic probation for each fall or spring semester in which they earn a semester GPA higher than 2.00 but have a cumulative GPA lower than 2.00, following an earlier placement on university academic probation.

eAdvisor tracking

In addition to being in good academic standing with the university, all students at Thunderbird must adhere to ASU critical tracking requirements, per the pertinent major map or curriculum checksheet. Students are considered off track if they fail to meet ASU critical tracking requirements.

Students who remain in off-track status for two or more consecutive semesters may be required to change majors.

Remediation

Students are required to meet with an academic advisor if they are placed on academic warning, probation, continuing probation or off-track status, or if they are at risk for disqualification, at which point an appropriate remediation plan is discussed.

Disqualification

Students are disqualified from ASU if their cumulative GPA remains lower than 2.00 for more than two consecutive semesters. Students who are disqualified are not allowed to enroll in the following fall or spring semester. They may take courses during the summer to raise their GPA; however, this does not guarantee reinstatement for the following fall semester. Disqualified students must follow the procedures for readmission, and requests are reviewed by the college on a case-by-case basis.

Advising

Thunderbird is committed to the personal, social and academic experiences of students by providing high-quality, student-centered academic advising, ensuring the accuracy and accessibility of information and resources, and partnering with students to help them reach their career goals.
Academic advising is required for the following students:

- All first-year and new transfer students are required to meet with an academic advisor before course registration. First-year students are required to meet with an academic advisor before their first and second semesters.
- Students not in good academic standing status (e.g., on academic warning, probation, continuing probation, off-track status, disqualification) are required to meet with an academic advisor to discuss a remediation plan.

Faculty and staff use academic status reports [6] to provide students feedback over the course of the academic semester and year. Academic status reports may be used to identify students who are struggling academically or professionally or to recognize students who are exceeding in coursework. Academic advisors and faculty mentors may access ASRs to provide students with valuable insight into performance improvement.

Credit and registration

Course load

Students are allowed to register for a maximum of 18 credit hours per semester. To register for more than the maximum allowable, students may petition their Thunderbird School of Global Management academic advisor. No student should assume that a petition for overload will be granted. For more information, students should review the course load and concurrent enrollment policy. [7]

Transfer work

Transfer credits from other institutions may be accepted and applied based on the student's major. Credit is granted for transferred courses deemed equivalent to corresponding courses in the selected program of study, subject to grade and ASU resident credit requirements. No grades lower than "C" (2.00) transfer to ASU. Credits transferred from a community

college or two-year institution are applied as lower-division credits. Thunderbird School of Global Management recommends that students work closely with their academic advisor to determine the process for applying pertinent transfer credit hours to their program of study. For more information on the transfer process and a list of the courses transferable to the various degree programs, students should consult their advisor and refer to the ASU transfer tools.

Course prerequisites

Course prerequisites are established to ensure student success in a course. Students must complete all course prerequisites before enrolling in the desired course. Prerequisite overrides may be granted under the following conditions:

- A transfer course has been accepted by an advisor to fulfill a course prerequisite.
- A prerequisite override has been granted by an advisor, instructor or other authority.

Grade of incomplete

A grade of "I" (incomplete) [8] for a course may be granted by permission of the instructor under the following conditions:

- The student has completed a substantial portion of the required coursework.
- The student has experienced extenuating circumstances before the end of the semester, preventing completion of the course.

If qualified, students have one calendar year to complete course requirements. If requirements are not met per the standards agreed upon with the course instructor after one calendar year, the incomplete is adjusted to reflect a course failure.

Pass/fail grade option

A grade of "P" (pass) contributes to a student's earned credit hours but does not affect the GPA. A grade of "E" (failing) is calculated into the GPA.

The pass/fail grade option may be used under the following conditions:

- Approval has been granted by the instructor and college offering the course.
- The pass/fail option was chosen during initial registration for the course, if available.

Thunderbird students may not enroll under the pass/fail option in the following courses:

- those taken to satisfy first-year composition requirements
- those taken from the student's major, minor or certificate program
- those taken for honors credit hours
- those counted toward satisfying ASU general studies requirements
- those counted toward satisfying Thunderbird language and culture proficiency requirements

Pass/fail credit taken at another institution may be petitioned for use, but only if the student can demonstrate proof that the pass grade was equivalent to a "C" (2.00) or higher.

Withdrawal

Complete session withdrawal information

Because a complete session withdrawal from the university can be a difficult decision and could result in serious academic and financial consequences, undergraduate students are required to contact the college or school of their major to facilitate the withdrawal process.

During the fall or spring semester, students may submit a withdrawal request by signing in to My ASU [9], clicking the Registration link in the My Classes box, and selecting Drop/Withdrawal. The request will be electronically routed to the student's college or department for review and next steps. If the semester has not begun, or the student wishes to withdraw from a summer session, they can sign in to My ASU [9], click the Registration link in the My Classes box, select Drop/Withdrawal and follow the steps to withdraw from classes.

ASU has many resources in place to help students. Students may want to consider one or more of the following:

- Withdraw from just one or two classes (course withdrawal). Students may withdraw from a class while remaining enrolled in other classes as long as the withdrawal is completed between the drop deadline and the course withdrawal deadline. Students are encouraged to contact their academic advisor to discuss the impact this may have on their ability to meet critical requirements. Students also are encouraged to contact a financial aid representative to consider any impact that withdrawing will have on scholarships, grants and loan packages.
- Request a medical or compassionate withdrawal. Medical or compassionate withdrawals are available for students withdrawing from one or more classes because of extraordinary personal mental or physical health conditions or the death or serious illness of a family member or close friend. Students are allowed one approved medical or compassionate withdrawal during their academic career with Thunderbird. For information concerning medical or compassionate withdrawal requests, students should see the medical and compassionate withdrawal policy [10], and they may obtain the form online [11] (PDF).
- Seek tutoring or academic support services. The Academic Support Network [12] provides a variety of services to help students become better learners and gain the confidence and skills they need to achieve their academic goals. Services include writing centers, math tutoring, subject area tutoring and supplemental instruction.
- Make an appointment with ASU Counseling Services. Counseling and mental health services are provided at each of the four ASU campuses and via telehealth appointments. ASU students may seek services at any of the campus counseling centers [13], regardless of their college affiliation.
- Explore the possibility of an "I" (incomplete) grade.

The following are possible consequences of a complete session withdrawal:

- financial aid — Financial aid recipients who completely withdraw from the university may be responsible for immediate repayment of funds. The effect of a complete withdrawal of financial aid depends on when the withdrawal is dated and the type of financial aid. More information is available at ASU Financial Aid and Scholarship Services. [14]
- tuition and refunds — The date of a complete withdrawal determines whether a tuition refund is generated. Students should review the tuition refund policy for more information. [15]
- health insurance — Students should contact their health insurance company to determine whether withdrawing from the university affects their coverage.
- housing — Students who live on campus should contact their residence hall community staff to determine what impact withdrawing would have on their eligibility to live on campus; to complete a license agreement release form [16]; and to arrange an appointment to officially check out. More information is available at the University Housing website. [17]
- veteran benefits and certifications — Students should contact the appropriate veteran benefits and certifications office to discuss information regarding veterans' educational benefits and military activation. For more information, students should email ptvc@asu.edu or visit the Pat Tillman Veterans Center website. [18]

For general university withdrawal procedures, students should review the university add, drop and withdrawal policies. [19]

Degree requirements

All candidates for graduation in the Bachelor of Global Management or Bachelor of Science in international trade curricula are required to present at least 120 credit hours, of which at least 45 must consist of upper-division coursework. A minimum cumulative GPA of 2.00 is required for graduation.

It is the student's responsibility to be aware of the degree program requirements and to select courses accordingly.

To graduate, a student must satisfy the following requirements:

1. ASU 101 or equivalent (first-year students)
2. college proficiency requirements
3. university first-year composition [20] and general studies [21] requirements

4. six credit hours of coursework at the upper-division level — three credit hours of literacy (L), and three hours of humanities, arts and design (HU) or social-behavioral sciences (SB) — in addition to the university-required 29 credit hours of general studies coursework (General Studies Maroon only)
5. major requirements that involve concentrated coursework in one program
6. successful completion of critical-tracking courses as required on the student's major map or curriculum checksheet

For more information regarding eAdvisor tools, students should visit the eAdvisor website. [22]

Thunderbird proficiency requirement

The Thunderbird proficiency requirement may be satisfied through one of the following:

- completion of a language course at the intermediate level (202 or equivalent)
- completion of an upper-division course or courses taught in a foreign language, taken in the United States or the relevant country
- completion of six credit hours of upper-division courses that have the global communities, societies and individuals (GCSI) designation (General Studies Gold), or six credit hours of upper-division courses that have the global awareness (G) designation or cultural diversity in the U.S. (C) designation (General Studies Maroon), in addition to the courses used to meet the university general studies requirements

Students must earn a grade of “C” (2.00) or higher in the courses taken to fulfill this requirement. Most students will fulfill this requirement through the completion of TGM 353 and TGM 468.

Concurrent degrees

Thunderbird allows students to request approval to pursue a concurrent degree through the university approval process [23]. A minimum of 30 distinct credit hours must be taken for each degree program, and degree combinations with significant curricular overlap might not be approved.

Interested students should consult with their academic success advisor about the feasibility of a concurrent degree and must meet the following criteria:

1. have attained sophomore standing or higher
2. have a minimum cumulative GPA of 3.00
3. have completed a minimum of 12 credit hours of coursework in the first major
4. follow approval criteria procedures for both colleges

Incompatible concurrent degrees

BGM in global management/BS in international trade

For more information on degree requirements, students should reference Degree Search. [24]

Minors

Thunderbird students may pursue minors [25] in other colleges at ASU. Courses taken for the minor may not be used for the student's major program.

Readmission

Undergraduate degree-seeking students are eligible to return through quick re-entry [26] if they previously attended ASU but have not enrolled at ASU for up to seven consecutive semesters. These students are not required to submit a new application or application fee, but they must contact a Thunderbird academic advisor to enroll.

Undergraduates who have been away from the university for eight or more semesters and want to return to ASU in a Thunderbird program are required to apply for readmission [27] through ASU Admission Services.

Disqualified students must follow the procedures for readmission; requests are reviewed by the college on a case-by-case basis.

Other special requirements

Grievance policy

Undergraduate students with grievances pertaining to an enrolled course should first address issues with the course instructor. If an identified grievance is not resolved with the course instructor, the student should next seek resolution through the academic advisor, and then from Thunderbird's senior associate dean of undergraduate programs. Finally, if no resolution has been achieved, the student should contact the deputy dean of the Thunderbird academic enterprise.

Graduate policies

Academic progression

Each graduate program at Thunderbird adheres to specific academic requirements. Students are strongly encouraged to become familiar with the expectations listed for their respective graduate program and review ASU Graduate College policies [28] and the Thunderbird Graduate Student Handbook (PDF) [29]. Each student should also communicate directly with their program coordinator or academic advisor to ensure a clear understanding of all degree requirements and program expectations. Students must fulfill all requirements of their individual graduate programs to remain in good academic standing and must abide by all university policies, including those of the Graduate College and the Thunderbird School of Global Management.

All Thunderbird graduate programs require a minimum cumulative, graduate and iPOS GPA of 3.00. Students should see the individual graduate degree programs for additional requirements on satisfactory academic progress, probation and disqualification.

Credit and registration

Because of the intensity of the Thunderbird graduate programs, the number of credit hours that students take each semester may be limited. Students should see the Thunderbird Graduate Student Handbook (PDF) for more information. [29]

Students may petition the deputy dean to register for more than the maximum allowable number of credit hours. No student should assume that a petition for overload will be granted.

College of Health Solutions policies

The College of Health Solutions translates health research and discovery into practice and prepares students to address the challenges facing people who wish to stay healthy, improve their health and manage chronic disease. Programs are offered in a wide variety of disciplines, such as biomedical informatics and biomedical diagnostics, kinesiology, sports and exercise science, health sciences, health care administration and policy, nutrition, population health, and speech and hearing science. Students, faculty and staff at Health Solutions work together toward a common goal of improving health outcomes by optimizing health and human performance across the life span and addressing systems of health care and health needs of populations. Graduates of the college are distinctly prepared to make an impact in the health workforce and shift the focus of health from sickness to wellness.

Inclusive excellence and health equity
Health Solutions has a mission to improve the mental and physical health of its larger and immediate communities by better understanding the challenges that individuals and populations face, while striving to be part of the solution. The college is committed to the idea that every member of society should have the opportunity for good health and wellness throughout their lifespan. In an effort to actualize this ideal, the college embraces and supports inclusive excellence in everything it does, including teaching, research, service and clinical practice.

Students can learn more about Health Solutions' commitments to justice, equity, diversity and inclusion. [1]

Academic integrity

Academic honesty is expected of all students in all examinations, papers, laboratory work, academic transactions and records. The ASU academic integrity policy [2] is strictly enforced, and for students found in violation of this policy, possible sanctions include appropriate grade penalties, loss of registration privileges, disqualification and expulsion.

For more information, undergraduate students should refer to the college's undergraduate student forms and policies site [3], and graduate students should review the Graduate College's policies and resources for academic integrity [4].

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment, and Retaliation (PDF). [5]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [6]

Undergraduate policies

Academic standing

The standards for GPA and the terms of academic warning, academic probation or continuing probation, disqualification and reinstatement are identical to those of the university, as set forth under the retention and academic standards policy. [7]

Academic good standing

For the purpose of retention, university academic good standing [8] for degree-seeking students is defined as maintaining a minimum cumulative GPA of 2.00. This standard is in effect for all students, regardless of catalog year.

Academic warning and probation

An ASU student who does not achieve the minimum GPA standard at the completion of the first term of study receives an academic warning [9]. If, after one term with an academic warning, a student still does not achieve the minimum GPA standard, they are placed on probation [10] for at least one additional term. If their minimum GPA first falls below the standard in a term that is not their first term at ASU, they are placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

If a student is placed on academic warning or probation, they receive communication from the college indicating next steps and requirements.

Students on academic probation receive an advising hold and are required to complete the academic refresher course UNI 220: Mindset Connections. UNI 220 appears on the student's DARS as a graduation requirement.

Continuing probation

Students are placed on continuing probation [10] when their cumulative GPA is below 2.00 for two consecutive semesters but they have shown academic progress and have not earned lower than a "C" (2.00) in any course in their most recent semester.

Disqualification

Students are disqualified from the College of Health Solutions and ASU if their cumulative GPA remains lower than 2.00 for two consecutive semesters after they have been placed on probation. Students who are disqualified cannot enroll in classes at ASU for a minimum of two semesters (fall and spring). Disqualified students may take courses during the summer to raise their GPA; however, this does not guarantee reinstatement for the following fall semester. Disqualified students must apply for readmission or reinstatement for the semester in which they wish to return to the university. The college does not reinstate students into any major that prepares students for professional school or professional credentialing, nor does the college reinstate students into majors in which they have twice failed to complete a required course at ASU.

eAdvisor tracking

In addition to being in university good academic standing, Health Solutions students must adhere to critically tracked requirements. For more information on critically tracked courses, students should review the My Major Map progress for their degree program, which is accessible through My ASU. Students are off track if they fail to meet one or more critical requirements, as stated in terms 1-4 of their major map, in a given fall or spring semester. All off-track students receive a hold that requires them to meet with their academic advisor and set a plan for getting back on track with their degree program.

Students who remain off track for two or more consecutive semesters may be required to change majors.

Advising

The Student Success Hub in the College of Health Solutions is dedicated to enhancing the academic, social and personal experiences of undergraduate students through high-quality, student-centered academic advising.

Academic advisors [11] are knowledgeable about degree requirements and can assist students with developing a course plan that follows an appropriate sequence and meets their graduation goals. Advisors also help connect students with university resources and opportunities to support their academic and career goals in health and health care.

Students are encouraged to contact their advisor with questions about academic planning or university processes. Advisors are available to meet with students in each undergraduate program in various modalities.

Students can monitor their academic progress in their degree through tools available on My ASU, including their graduation audit (DARS), My Major Map Progress and the curriculum checksheet. Additional guidance is available through the DARS Explainer Experience. [12]

Some students receive an academic advising hold and must meet with their advisor before registering for classes:

- all new first-year and transfer students
- students who have been recently readmitted to the university
- students who are not in satisfactory academic standing status (e.g., probation, continuing probation, off-track status)

Pre-health advising

Pre-health advising at ASU [13] supports students interested in pursuing a wide variety of health-related careers, including medicine, dentistry, optometry, pharmacy, veterinary medicine, chiropractic medicine, occupational therapy, physical therapy, and physician assistant studies.

All students, no matter the major, can be a pre-health student and take advantage of expert advising services. ASU's pre-health advising provides comprehensive support throughout students' pre-health journey, including:

- advising and course planning
- application timeline and preparation guidance
- personal statement reviews and mock interviews, including Multiple Mini Interview preparation
- prerequisite charts, workshops, mentoring programs, and connections to pre-health events and student organizations
- professional development opportunities

Before scheduling their first appointment with a pre-health advisor, students must attend a Pre-Health 101 Workshop [14], which introduces key resources and information for getting started. If a student has previously met with a pre-health advisor, attending Pre-Health 101 is not required.

Students can access pre-health advising in various locations and formats, with advising available across the Downtown Phoenix, Tempe, and West Valley campuses, as well as through virtual appointments. This flexibility ensures that all students can receive personalized guidance and support in pursuing their health care career goals.

Credit and registration

Course load limit

For fall or spring semesters, a minimum full-time course load for an undergraduate student is 12 credit hours. The maximum course load is 18 credit hours during a fall or spring semester, with a maximum of nine credit hours in session A or B; the load limit is a total of 18 credit hours for any combination of sessions. The summer session load limit is seven credit hours for each six-week session and nine credit hours for the eight-week session; the load limit is a total of 14 credit hours for any combination of sessions.

A student who wishes to register for more than the maximum credit limit per term must petition to obtain an approved overload before registration. Additional instructions and criteria to petition can be found on the college's undergraduate student forms and policies site. [3]

Graduate credits earned by undergraduate students

Undergraduate students interested in earning graduate-level credits while enrolled in a bachelor's degree program must adhere to the university policy for graduate credits earned by undergraduate students [15]. To request permission to register for a graduate-level course, undergraduate students must submit a petition [3] to the College of Health Solutions Academic Standards and Grievances Committee through their academic advisor.

Accelerated bachelor's plus master's degree programs may use a maximum of 12-15 preadmission credits (determined by program), which may include up to a maximum of 12-15 credit hours shared between the programs. Students in accelerated programs should contact their advisors to ensure proper sharing of credit hours. Students who have been accepted to an accelerated degree program do not have to petition the standards committee to take the shared courses.

Late registration

Students who request to enroll in a course after the university's add deadline [16] should note that approval is not guaranteed because this is an exception to university policy. Late registration policies [17] may vary by college, and students are expected to follow the specific policy of the college that offers the course.

To register for a course offered by Health Solutions after the add deadline, students need to obtain authorization from the instructor and the college. The course must have open seats, and the student must meet the prerequisites. Students who wish to request late registration for a Health Solutions course must follow the steps below in order:

1. Fill out an enrollment change request form. [18]
2. Obtain the instructor's signature by having them sign the form, or have the instructor send an email confirming their approval to add the course late.
    - Late add requests are only considered with instructor approval during the following time frames:
        - First week of A and B session courses (end of the fifth business day from the first day of the session)
        - Second week of C session courses (end of the 10th business day from the first day of the session)
        - Any late add requests beyond these time frames are not considered.
    - Many classes and labs have attendance policies. Confirm with the instructor whether adding the class late means that the missed days count toward total absences.
    - Students should ask the instructor if they are allowed to make up any work they missed by adding the class late.
3. Obtain authorization from Health Solutions:
    - Send the signed form and approval, including all pertinent attachments, to the advising office via email:
        - Campus students should email CHS@asu.edu.
        - Online students should email CHSOnline@asu.edu.

Degree requirements

Experiential learning

Bachelor's degree programs in the College of Health Solutions require students to complete three credit hours of experiential learning. While most programs offer multiple ways to fulfill the experiential learning requirement, students should connect with their academic advisor to confirm the experiential learning course options [19] for their degree. Students can also take additional experiential learning courses for elective credit, including through research [20], internships [21], study abroad [22], service learning and teaching assistantships.

Concurrent degrees

Students at ASU are permitted to pursue concurrent degrees [23] as long as they meet the requirements for both programs and receive permission in advance from the college or colleges offering their chosen majors. Health Solutions students are required to meet specific criteria before starting the university approval process [24]. Students interested in applying for a concurrent degree should consult with their academic advisor about the feasibility of pursuing a concurrent degree as it relates to their overall graduation plan.

If a student is adding a concurrent major outside the college, the university approval process must be completed for both Health Solutions and the college of the other major.

Students earn a separate diploma for each degree. Degrees may not be too closely related and are reviewed by an academic advisor during the approval process. For a student to add a concurrent degree, there must be a minimum of 30 distinct credit hours of coursework in each degree program.

The Health Solutions minimum requirements to add a concurrent degree are:

1. sophomore standing or higher
2. minimum ASU cumulative GPA of 3.00
3. minimum of 12 credit hours of coursework completed in the first major
4. minimum of nine credit hours of coursework completed in the second major

Readmission/reinstatement

Undergraduate degree-seeking students who previously attended ASU and have not been enrolled for up to seven consecutive fall or spring semesters may be eligible to return through quick re-entry [25]. Students do not need to submit a new application or pay an application fee; however, they must contact an academic advisor in their program to initiate the registration process. Certain exceptions may apply, including students on an approved leave of absence [26] and those who have served in the military.

Students who have been disqualified from ASU and wish to return to a major in the College of Health Solutions are encouraged to schedule an appointment with an assistant director of academic services to discuss eligibility, requirements and recommendations for readmission. Disqualified students must follow ASU's established readmission procedures.

Please note that the college does not reinstate students into any major designed to prepare students for professional school or professional credentialing, nor into majors in which the student has twice failed to successfully complete a required course at ASU.

Graduate policies

Academic standing

Each graduate program in the College of Health Solutions adheres to specific academic requirements. Students are strongly encouraged to become familiar with the expectations listed in their graduate program handbook. [27]

Academic advising

It is important for Health Solutions graduate students to cultivate the following skills in their development as health professionals:

- accept feedback in a positive manner
- assume responsibility for learning
- communicate with others in a respectful and confident manner
- modify performance in response to feedback
- proactively identify problems and possible solutions

Academic advising at the graduate level is facilitated by graduate support staff [28] in the Student Success Hub.

Faculty advisors meet with students in the academic area of concentration.

Honors - Barrett, the Honors College policies

Students who demonstrate exceptional academic achievement and intellectual curiosity are invited to apply for admission to Barrett, The Honors College. Admission requires a separate application that must be submitted by the stated Barrett deadlines.

Barrett conducts a holistic, test-optional review. ACT or SAT scores are neither required nor retrieved from ASU records; however, applicants may choose to self-report their scores on the Beyond the Classroom section of the Barrett application if they believe the scores strengthen their candidacy.

Applicants must provide academic records, including high school and college transcripts and any AP or IB test scores, along with information about their activities, leadership, community involvement and personal experiences. High school GPAs used in the evaluation process are calculated in accordance with the Arizona Board of Regents competency requirements, pursuant to ABOR Policy 2-121 Undergraduate Admission [1] (PDF).

The Barrett admission application and additional information about the college and its activities are available at the Barrett website.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [2]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [3]

Undergraduate policies

Advising

Barrett students are supported by an assigned Barrett Honors Advisor [4], an advisor in the college of their major, and Faculty Honors Advisors across the university. Students are expected to meet with their Barrett Honors Advisor during their first, second and third years, and are encouraged to stay in regular contact with all advising resources. Appointments with a Barrett Honors Advisor can be scheduled via the Academic Support Team link [5] on MyASU.

Students can explore honors opportunities within their majors on the Faculty Honors Advisors page [6]. Special pre-professional advising [7] is also available, and additional information can be requested by emailing barrettadvising@asu.edu.

Degree requirements

Barrett academic course requirements

To graduate from Barrett, lower-division students must complete 36 credit hours of honors coursework and meet the following requirements:

1. HON 171 and HON 272: The Human Event. A two-semester sequence course taken in the first two semesters of enrollment.
2. Thirty additional credit hours of honors coursework must be earned with a letter grade of "C" (2.00) or higher. This may include HON prefix classes, honors sections of classes, honors enrichment contracts, internship and

research credit, honors study abroad programs, leadership and community engagement credit, and graduate-level coursework.
3. Of the 36 honors credit hours, at least 18 must be upper-division or graduate-level courses completed with a grade of “C” (2.00) or higher. Students should investigate specialized honors upper-division tracks within their majors.
4. Students must complete an honors thesis project, earning up to six credit hours, which count toward the 18 required upper-division honors credits. The thesis is confirmed with a prospectus, which includes a commitment from the thesis director and second committee member on a topic and project plan. Before enrolling in thesis credit, students complete a required thesis workshop and advising session. The final thesis must be defended and submitted by the published honors deadline in the student’s graduation semester.
5. ASU graduation requirements for an academic major must be met.
6. Students must earn a cumulative GPA of 3.25 or higher by graduation.

Barrett course requirements may be met in a variety of ways. Only courses in which a student receives a grade of “C” (2.00) or higher may be used to meet Barrett requirements.

Lower-division students may complete up to 18 lower-division honors credit hours, including HON 171 and HON 272: The Human Event, and at least 18 upper-division honors credit hours, for a total of 36 honors credits. HON 171 and HON 272 are transdisciplinary seminars that acquaint students with ideas that form the foundation of a university education and emphasize critical thinking, discussion and writing.

Students entering Barrett as upper-division students must complete 21 upper-division honors credit hours, including HON 370: The History of Ideas, 18 additional upper-division honors credit hours, and an honors thesis. Upper-division transfer students are required to complete 21 upper-division honors credit hours.

Barrett Online students must complete 21 honors credit hours, including HON 370: The History of Ideas taught by an honors faculty fellow, 18 additional honors credit hours, and an honors thesis. Both lower- and upper-division credit hours earned through oCourses may count toward the 18 honors credit hours.

Departmental honors-only courses are restricted to honors students and provide a deeper, more rigorous intellectual experience than their non-honors equivalents. Other disciplinary honors courses may group honors students in small cohorts for shared research projects or combine honors and non-honors students while offering specific honors opportunities.

Honors enrichment contracts [8] are available in many academic department courses offered by the major. These allow honors students to contract with the instructors of designated non-honors courses to earn honors credit hours by pursuing enrichment activities, which include supplemental sessions with the instructor. Honors enrichment contracts are filed during the first weeks of the session and are to be completed during the semester in which the course is offered. The enrichment contract form offers guidelines to aid students and faculty in developing appropriate contracts. Contract work is due on the last day of the session unless otherwise indicated by the supervising faculty member.

Courses reserved for students in Barrett, and that always count for honors credit, are those listed in the online ASU Class Search and Course Catalog [9] as course numbers 492 Honors Directed Study, 493 Honors Thesis and 497 Honors Colloquium; all classes with the HON prefix; and those with a departmental prefix or course note that carries the honors designation. Barrett recognizes internships, research, teaching assistant courses and 500-level graduate courses for honors credit. The honors courses webpage [10] provides guidance on honors courses.

Academic department courses numbered 492 and 493 are reserved for honors students completing their honors thesis. A student may enroll in these courses with approval from the sponsoring academic department and the faculty member who serves as the student’s thesis project director. Passing credit in 492 and 493 courses counts as upper-division honors credit for Barrett students.

College of Integrative Sciences and Arts policies

The College of Integrative Sciences and Arts stands out for its focus on applied degrees and career-connected learning. Its programs are designed to meet industry needs and prepare students for today's evolving marketplace. Through its three schools — the School of Applied Professional Studies, the School of Applied Sciences and Arts, and the School of Counseling and Counseling Psychology — CISA offers programs that integrate the sciences, humanities and arts. With a strong presence at ASU's Polytechnic, Tempe and Downtown Phoenix campuses and online, CISA advances ASU's mission by fostering hands-on learning and practical applications, helping students succeed locally, nationally and globally.

Academic integrity

Academic honesty is expected of all students in all examinations, papers, projects, partnerships, internships, academic transactions and records. Possible sanctions include appropriate grade penalties, loss of registration privileges and disqualification. The College of Integrative Sciences and Arts adheres strictly to the ASU academic integrity policy [1], and all concerns related to academic integrity must be reported to the college's academic integrity officer.

For more information on academic integrity or to report a concern, students should visit the college's student academic integrity website. [2]

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [3]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, Students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [4]

Undergraduate policies

Academic standing

To be considered in academic good standing in the College of Integrative Sciences and Arts, students must achieve a cumulative GPA of 2.00 or higher. All CISA students who are not in good standing are required to complete the CISA Rising Scholars Online Workshop. This workshop provides additional information on academic standing status and helps students explore strategies to return to good standing.

Academic warning

Students who do not achieve a 2.00 GPA at the completion of their first term of study are placed on academic warning. Upon the completion of a second term, students who achieve a cumulative GPA of 2.00 or higher are placed in university good standing. Students who do not achieve a cumulative GPA of 2.00 or higher after the completion of a second term are placed on university academic probation.

Probation

Students who do not achieve a 2.00 GPA are placed on university academic probation and must meet with an academic success advisor to discuss academic success strategies. Students on academic probation are required to enroll in UNI 220: Mindset Connections. UNI 220 appears on these students' DARS as a graduation requirement.

Within one semester, a student on academic probation must do either of the following:

- Achieve a cumulative ASU GPA of 2.00 or higher to return to academic good standing.
- Obtain a semester GPA of 2.00 or higher to continue on probation. Students on continued academic probation may remain in that status for as many semesters as needed to achieve academic good standing.

Disqualification

Students who have been disqualified from ASU may be readmitted to CISA for a fall or spring semester if they do either of the following:

- Achieve a cumulative ASU GPA of 2.00 by taking ASU summer session courses.
- Complete 12 or more transferable credit hours at a community college or university with no grade lower than a “C” and a GPA of 2.50 or higher. Courses in which the student failed or received a “D” at ASU should not be repeated at another institution.

Academic policy appeals

Academic appeals regarding college policies or other variances or exceptions should be discussed with the student's academic success advisor, and students may be required to submit a College of Integrative Sciences and Arts Standards Committee petition [5]. Some petitions may require a secondary review by the ASU University Undergraduate Standards Committee.

Medical/compassionate withdrawal

A medical or compassionate withdrawal request may be made in extraordinary cases in which serious illness or injury (medical) or another extraordinary personal situation, such as a death in the family (compassionate), prevents a student from continuing their classes, and "I" (incomplete) grades or other arrangements with the instructors are not possible. Students should review the CISA medical/compassionate withdrawal requirements and procedures for more information. [6]

Academic advising

All students are encouraged to meet with their academic success advisor [7] before registration. Students must review their Degree Audit Report, major map or curriculum checksheet, and the academic calendar [8] each semester for information and deadlines pertaining to enrollment, including course adds, drops and withdrawals.

The ASU academic catalog is the governing source for all degree requirements. Students are expected to read the requirements for university general studies, college graduation and major degree requirements.

Mandatory advising

The following students in the College of Integrative Sciences and Arts must receive advising clearance before course registration:

- new students in their first semester of attendance
- readmitted students in their first returning semester
- students on academic probation or continued probation
- students who have been disqualified

Students are encouraged to check their advising status requirements on My ASU [9] each semester before attempting any registration transactions.

Credit and registration

Students enrolling in courses offered by the College of Integrative Sciences and Arts are expected to follow the rules and deadlines specified in this catalog and the current registration and tuition payment guide. Students are encouraged to meet with their academic success advisor before registration.

Course load

Students may enroll in a maximum of 18 credit hours per fall or spring semester, with a maximum of nine credits taken in session A or session B. Students may enroll in a maximum of 14 credit hours for a summer session, with no more than seven credits in session A or session B. Students may enroll in a maximum of nine credit hours for the summer session C (eight weeks).

Any student who wishes to enroll in more than 18 credit hours in the fall or spring (or 14 in summer) or more than nine credit hours in an A or B session (or seven hours in summer) should first meet with their academic success advisor to discuss a course overload request. Some overload requests may require CISA standards petition approval.

The ASU catalog has further details on credit hour limits [10]. Students should refer to the CISA petitioning process [5] before submitting a standards petition.

Repeat and replace policy

Students who wish to repeat courses and possibly replace prior course grades must follow SSM 203-06, the repeat and replace policy [11] in the University Student Services Manual [12], regarding the number of credit hours that can be repeated and the types of courses that are eligible for a grade replacement.

Students who wish to repeat a course for a third time must petition the College of Integrative Sciences and Arts Standards Committee.

Pass/fail grade options

A "P" grading option is used to indicate a passing grade of "D" or higher in a class when an individual student receives permission from both the class instructor and their college or school. When a student earns a "P" grade, they earn credit hours, but the grade is not used for computing GPA. If requirements for the "P" grade are not met, a failing "E" grade is applied. The "E" grade is calculated in the GPA. The "P" grade does not meet requirements for course or program progression in which a "C" or higher is required.

The pass/fail grade option may be used under the following conditions:

- The pass/fail option is available for the specific course.
- Approval has been granted by the instructor and the college offering the course before the start of class.
- Enrollment for the pass/fail option must be indicated during registration and may not be changed after the add period.
- A maximum of 12 credit hours taken for pass/fail may be counted toward graduation.

CISA students may not enroll under the pass/fail option for the following:

- courses that meet first-year composition requirements
- major, minor, concentration area or certificate program required courses
- honors credit courses
- courses that meet language proficiency requirements
- courses that meet general studies requirements

Satisfactory ("Y") grade option

The "Y" grade is generally used for successfully completed internships, projects, reading and conference, research, seminars, theses, dissertations and workshops. Students earn credit hours for a "Y" grade, but the grade is not used for computing GPA. If requirements for the "Y" grade are not met, a failing "E" grade is applied. The failing grade of "E" is calculated into GPA. The "Y" grade may meet requirements for which a "C" or better is required. However, some exceptions may be made. For more information about the "Y" grade option, students should contact their academic advisor.

The "Y" grade option may be used only under the following conditions:

- The "Y" grading option is available for the specific course.

- Approval has been granted by the instructor and the college offering the course.
- The "Y" grading option was chosen during initial registration for the course.

Grade appeals

Students enrolled in a course within CISA who believe they have been unfairly or improperly graded can seek fair treatment and consideration through the grade appeal process outlined below. Grade grievances must be initiated within the regular semester immediately following the course in question, regardless of whether the student is currently enrolled at the university.

Grade appeals are only applicable to the final course grade, not to individual assignments or exams. Appeals can only be requested at the end of the semester and may proceed for one of the following three reasons:

1. There was an error in calculating the final grade (arithmetic error).
2. The criteria for determining the final grade were changed from those stated in the syllabus (e.g., four quizzes were given instead of five).
3. The evaluation system was not applied consistently and fairly to all students.

More information on grade appeals for CISA students can be found the college's grade appeal website. [13]

Degree requirements

All candidates for graduation with a bachelor's degree are required to complete at least 120 credit hours, of which at least 45 must be from upper-division courses. A minimum ASU cumulative GPA of 2.00 is required for graduation. All new College of Integrative Sciences and Arts first-year students are required to enroll in an ASU 101 course during their first ASU semester.

Associate degrees

Students in the Associate of Arts programs should refer to their major map or curriculum checksheet and the university associate degree graduation requirements policy [14] for minimum credit hour, GPA and other degree requirements.

Minors

The college offers minors in many of its disciplines. All minors must entail a minimum of 15 credit hours in the discipline, and at least 12 of those hours must be upper-division courses.

- Six of the upper-division credit hours must be taken from courses offered by CISA.
- Students may not use courses in their minors for major core requirements, and, similarly, students may not use courses in their major core requirements to fulfill the requirements of their minors. Students should see an academic success advisor for more details.
- Some disciplines are too close in content for a student to choose a particular combination of minor and major.

Concurrent degrees

CISA allows undergraduate students to request approval to pursue a concurrent degree through the university approval process [15]. Students must have completed at least 30 graded credit hours with a minimum GPA of 2.00. Concurrent degrees may not be from the same discipline or have overlap in the courses required for each major. Students must earn at least 30 distinct credit hours for each degree.

To request a concurrent degree, students must meet with an academic success advisor in each degree program as part of the approval process.

Readmission

Once readmitted, the student may be placed on academic probation for at least one semester. Students on probation have one semester to raise their cumulative or semester GPA to meet the required 2.00 GPA to remain at ASU. Failure to do so results in disqualification from the university.

Graduate policies

Students should review the ASU Graduate College policy manual. [16]

College of Integrative Sciences and Arts master's degree and PhD students are allowed to enroll in a maximum of 15 credits per term, with a maximum of seven credits permitted in each A and B session.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those established by the Graduate College and CISA.

New College of Interdisciplinary Arts and Sciences policies

The New College of Interdisciplinary Arts and Sciences [1] offers interdisciplinary programs built on the foundation of disciplines such as English, history, philosophy, communication, psychology, sociology, biology, mathematics and statistics. Through distinct combinations and innovative partnerships, the college offers many diverse degrees, including digital forensics, disability studies, environmental science, forensic science, interdisciplinary arts and performance, pharmacology and toxicology, social and behavioral sciences, and social justice and human rights.

New College degrees provide students with future-focused skills, enabling them to contribute meaningfully to solving the most critical and complex challenges of today and tomorrow. Students are prepared to steward sustainable societies that incorporate ethics and a respect for human rights, a regard for the environment, and an appreciation of culture and language, while at the forefront of innovation in science and technology.

Academic integrity

The New College of Interdisciplinary Arts and Sciences adheres to ASU's student academic integrity policy [2]. At ASU, academic honesty is expected of all students in all examinations, papers, assignments, academic transactions and records. New College students should also review New College academic integrity procedures and resources [3].

Graduate students should also consult the ASU Graduate College academic integrity policy. [4]

Academic dishonesty investigation and procedures

Anyone with a good-faith basis for believing that a student has engaged in academic dishonesty may report the alleged violation to the instructor or academic integrity officer for the college or school in which the academic dishonesty occurred.

- If the instructor or academic integrity officer concludes that there is a sufficient basis to believe that the student engaged in academic dishonesty, the instructor or the academic integrity officer notifies the student of the alleged violation and initiates the investigative process.
- Before concluding the investigation, the instructor or academic integrity officer provides the student with a summary of the information gathered. The student has five business days after the notice is sent to respond to the allegation.
- At any point in the process, the student can contact the academic integrity officer to seek consultation or clarification.
- The student may be accompanied by an advisor at any point in the process. The advisor is not permitted to participate directly or speak for the student.
- Once the investigation is complete, in consultation with the academic integrity officer, the instructor recommends a sanction. The student is notified of the result of the investigation and of any sanction to be imposed.

Sanctions and appeal

The following sanctions may be imposed for academic dishonesty:

- a grade of "XE" [5]
- expulsion from the university without expectation of readmission
- other sanctions as consistent with this policy and the Student Code of Conduct [6]
- reduced or failing grade for the academic evaluation
- reduced or failing grade for the course
- suspension from the university for a specific period
- withdrawal of credit for a previously accepted course or requirement

At any time, the student and the instructor may agree on the sanction and inform the academic integrity officer.

A student alleged to have violated the academic integrity policy has the following rights:

- The student is notified of their right to appeal. The student must file their appeal no later than 10 business days after the date the notification is sent. If the student does not file a timely appeal, the sanction is final.

- A student's appeal of an allegation of an academic integrity violation or recommended sanction must be submitted in writing and include the following:
    - a description of the alleged academic dishonesty, including a factual narrative of events, the dates and times of occurrences, and any other reason that the sanction should not be imposed
    - the names of persons who have information about relevant circumstances or events
    - the general nature and description of all evidence
- If the student files an appeal, the student must meet with the academic integrity officer to discuss hearing procedures. The academic integrity officer helps the student navigate the process and provides additional information when needed.
- If the student wishes to dispute any aspect of the allegation or sanction, the student may file an appeal. If the student files a timely appeal, the sanction is not final until the appeal is resolved. If the student files an appeal at the end of a semester, or during the last semester of enrollment, the course grade or degree may be withheld until the matter is resolved. If a grade or degree is withheld for any period, the academic integrity officer or dean must notify the registrar's office.

Student Affairs and Grievances Committee hearing

The academic integrity officer forwards a student's timely appeal to the instructor.

Prehearing proceedings

The academic integrity officer sends a notice of hearing to the student, the instructor and the New College Student Affairs and Grievances Committee (termed "college/school board" on the Office of the University Provost website). The notice includes the following information:

- the time and place of the hearing before the Student Affairs and Grievances Committee (Unless the parties and academic integrity officer agree otherwise, the hearing takes place during the regular fall or spring semester.)
- a copy of this policy or instructions on how to access the policy electronically
- the requirement that the parties provide to the academic integrity officer a written list of witnesses and a description of any documents or other evidence they intend to use at the hearing (Unless the chairperson provides otherwise, this information must be exchanged at least five business days before the hearing.)
- the length of time set for the hearing, the time limitation for the presentation of evidence and any other procedural requirements

Conduct of the hearing

To preserve the confidential nature of the disciplinary process and to protect the privacy of those involved, the hearing is closed to the public.

The chairperson of the Student Affairs and Grievances Committee presides at the hearing and rules upon all procedural matters. The formal rules of evidence do not apply, although objections to the introduction of specific statements or documents may be considered by the chairperson. Irrelevant, immaterial, privileged or unduly repetitious information is excluded.

The instructor has the burden of showing that it is more likely than not that the student engaged in academic dishonesty. The instructor must also explain the reason for the sanction. If the student accepts responsibility for academic dishonesty, then the Student Affairs and Grievances Committee may focus the hearing on the appropriate sanction.

Information regarding prior violations or informal resolutions of previous allegations may not be used as proof of a current violation but may be admitted for other purposes, such as to show that the student had prior experience relevant to the allegations or to show that the student had been informed previously that the conduct was unacceptable. The Student Affairs and Grievances Committee may also consider information regarding prior violations in determining an appropriate sanction.

A student who fails to appear or refuses to participate at the hearing is deemed to have abandoned the appeal unless the student can demonstrate that extraordinary circumstances prevented appearance or participation.

The student and instructor may each have an advisor present, but the advisors are not permitted to address the Student Affairs and Grievances Committee directly, except as the chairperson deems necessary or appropriate.

Except as otherwise permitted by the Student Affairs and Grievances Committee, witnesses are excluded from the hearing except during their own testimony. The chairperson may remove a party, advisor or witness from the hearing if that person's conduct is disruptive.

When necessitated by fairness or extraordinary circumstances, the Student Affairs and Grievances Committee may permit the parties to make arrangements for recorded, written or telephonic testimony from their witnesses for use in the proceeding.

The instructor proceeds first at each stage of the presentation.

1. Each party may present an opening statement that summarizes the information expected to be presented.
2. Each party calls a witness or witnesses to provide statements under oath.
3. At the conclusion of each witness's statement, they may be questioned by the other party.
4. The committee may ask further questions of each witness.
5. Each party may present a closing statement, which summarizes the information that was presented.

If the alleged academic dishonesty involves the work of multiple students, the Student Affairs and Grievances Committee may modify these procedures to address the circumstances. The college Student Affairs and Grievances Committee should provide prior written notice of any modification of the procedures to all parties. Each student must file his or her own appeal. A student who has not filed an appeal should not expect to benefit from another student's appeal.

College board deliberations and recommendations

Following the presentation of information and closing statements, the Student Affairs and Grievances Committee discusses the information presented and the reasonable inferences to be drawn from it. Only the committee, its legal advisor, if any, and the academic integrity officer may be present during the deliberations. Neither the student nor the instructor may be present during the deliberations.

Based solely upon the information presented, the Student Affairs and Grievances Committee formulates a recommendation to the dean as to whether the student has more likely than not engaged in academic dishonesty, and the appropriate sanction. Recommendations must be supported by a simple majority of the Student Affairs and Grievances Committee.

The Student Affairs and Grievances Committee prepares and sends a written recommendation to the dean within five business days of the hearing. The written recommendation includes findings of fact and a statement of the reasons for the recommendation, and it is signed by the Student Affairs and Grievances Committee chair. If the recommendation is not unanimous, dissenting opinions should be reflected in the recommendation.

Review and decision by the dean

After reviewing the Student Affairs and Grievances Committee's recommendation, the dean renders a written decision that affirms, denies or accepts the committee's recommendation with modifications.

The dean may not make new findings adverse to the student or increase the severity of a sanction unless:

- The dean provides the student notice and an opportunity to respond to the new findings or sanction.
- The dean remands the matter to the Student Affairs and Grievances Committee for further proceedings.

The dean (or dean's designee) provides written notice of the decision to the student, the academic integrity officer, the instructor and the Student Affairs and Grievances Committee within 20 business days following receipt of the Student Affairs and Grievances Committee's recommendation. A delay may occur if it becomes necessary to conduct further investigation or to remand the matter to the Student Affairs and Grievances Committee. In those cases, the written decision is transmitted no later than 20 business days following completion of the investigation or the Student Affairs and Grievances Committee's subsequent recommendation.

The dean's decision is final and may not be further appealed unless the dean recommends that the provost suspend or expel the student from the university.

If the dean recommends the suspension or expulsion of an international student, both the student and academic integrity officer should consult with the ASU International Students and Scholars Center. [7]

If the dean recommends that the provost suspend or expel the student from the university, the letter from the dean states that the student may appeal the recommendation by filing a written request for review with the provost within 10 business days of the date of the letter.

If the student does not appeal in a timely manner, the provost or designee reviews the dean's recommendation and issues a final decision on suspensions or expulsions from the university.

Review and decision of a suspension or expulsion from the university

A student may seek to have a dean's decision reviewed by the University Academic Integrity Hearing Board only if the dean recommends that the provost suspend or expel the student from the university. However, a student who has failed to appeal or has abandoned the appeal at the Student Affairs and Grievances Committee hearing may not appeal to the University Academic Integrity Hearing Board.

The appeal must be in writing and must be filed with the provost within 10 business days of the date of the dean's decision letter.

The provost or designee appoints and charges a University Academic Integrity Hearing Board to conduct the hearing. The board comprises three members; one member must be a student, and one of the other members acts as chairperson. The hearing follows the procedures set forth in the Student Code of Conduct procedures [8] (PDF), except that the college or school takes the role of the dean of students, and the provost or designee takes the role of the senior vice president for Educational Outreach and Student Services.

New College classroom disruption protocol

New College is committed to maintaining a respectful and productive learning environment. Significant classroom disruption is behavior that materially interferes with instruction or with other students' ability to engage in the course, and that continues after a direct verbal warning from the instructor. This does not include appropriate academic discussion, peer interaction directed by the instructor, or brief pre-class conversation.

Progressive response to disruption

This protocol follows a three-step process, with enforcement shared between instructors and New College administration:

1. Verbal Warning
   If disruptive behavior continues after an initial warning, the instructor meets with the student and formally notifies them that the behavior has been cited.
2. Formal Citation
   Continued disruption requires a meeting with the relevant School Director (or designee). The student is informed that further disruption may result in a Student Code of Conduct violation and instructor-initiated course withdrawal.
3. Final Action
   A subsequent significant disruption may result in the student being asked to leave the classroom immediately, referral to Student Rights and Responsibilities, and instructor-initiated withdrawal from the course per SSM-201-10 Instructor Withdrawal of a Student for Disruptive Classroom Behavior. [9]

Safety exception

At any time, behavior that poses a risk to the safety of the class will be reported immediately to ASU Police. Classroom safety supersedes all procedural steps.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [10]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [11]

Undergraduate policies

Academic standing

New College students must achieve a cumulative GPA of 2.00 to be considered in good academic standing at ASU. Students with a semester or cumulative GPA lower than 2.00 are placed on academic probation and are required to meet with an advisor to effectively plan academic progress toward graduation. Further information is available on the university retention and academic standards policy webpage. [12]

Advising

All students in the New College of Interdisciplinary Arts and Sciences are expected to meet with their academic advisors [13] regularly, especially before course enrollment each semester.

To ensure that students are making timely progress toward degree completion, advising may be required for the following:

- newly admitted students
- first-year students
- students on academic probation
- students off track for eAdvisor tracking requirements

For eAdvisor tracking and other general academic program information, students should reference eAdvisor [14], their program major map or their curriculum checksheet.

Credit and registration

Audit grade option

Students may choose to audit a course, allowing them to attend classes but not earn credit. Students must obtain instructor approval before enrollment. This grade option may not be changed after the add period.

The audit option [15] may be used under the following conditions:

- The audit grade option is available for the specific course.
- Approval has been granted from the instructor and college offering the course.
- The audit option is chosen during initial registration for the course.

Course load

Students are limited to a maximum of 18 credit hours per term. Enrollment in additional credit hours requires completion of a credit overload petition form [16] and approval from the college academic advisor.

Course prerequisites

Course prerequisites are established to ensure student success in a course. Students must complete all course prerequisites before enrolling in the desired course. Prerequisite overrides may be granted under the following conditions:

- A transfer course has been accepted to fulfill a course prerequisite.
- A prerequisite override has been granted by an advisor.

Grade of incomplete

Students are responsible for contacting their course instructors regarding the process of requesting and fulfilling requests for an incomplete. The grade of "I" (incomplete) [15] can only be given by an instructor when a student who is doing otherwise acceptable work is unable to complete a course (e.g., final exam or term paper) because of illness or other conditions beyond the student's control; it is also subject to unit director approval. The student must submit a request to the instructor to be considered for a grade of "I." A completed request must have the incomplete grade request form [17] and include a justification, a listing of requirements that have not been fulfilled and a proposed schedule of completion. The instructor reviews the request and determines whether to accept or deny the request. The instructor may propose modifications when submitting a copy of the accepted request to the appropriate office.

An "I" in any course that is a prerequisite for sequential courses automatically denies the student enrollment in subsequent courses and could result in the student being administratively dropped from a subsequent course if the student has already enrolled.

The student has a maximum of one calendar year from the date the grade of "I" is recorded to complete the course, but faculty can place lesser time limitations at their discretion. A student does not re-register or pay fees for a course for which an "I" has been received in order to complete the course. When the course is completed, the instructor must submit an online grade change request. If the course is not completed within one calendar year, the grade of "I" in an undergraduate course is automatically changed to a failing grade "E."

Pass/fail grade option

The "P" grading option is used to indicate a passing grade in a class when an individual student receives permission from both the class instructor and their college or school. If the student earns a "P" grade, they earn credit hours, but the grade is not used for computing the GPA. If requirements for the "P" grade are not met, an "E" grade (failing) is applied. The "E" is calculated into the GPA. The "P" grade does not meet requirements for course or program progression where a "C" or higher is required.

A "P" grade should only be assigned when an individual student receives permission to take a course as pass/fail. Permission is recorded on the pass/fail enrollment form. If the course only awards pass/fail grades, the "Y" grade should be used to indicate successful completion of the course (see satisfactory "Y" grade option below).

To request the pass/fail grade option on a course, New College students can submit the pass/fail enrollment application form [18] to their academic advisor. Permission is considered only under the following conditions:

1. The pass/fail grade option is available for the specific course.
2. Enrollment for the pass/fail option has been approved by both the instructor and the college offering the course.
3. Enrollment for the pass/fail option was indicated during registration.

The pass/fail option may not be changed after the add period.

New College students may not enroll under the pass/fail option in the following courses:

- those taken to satisfy first-year composition requirements
- those taken for the student's major, minor or certificate program
- those counted toward satisfying ASU general studies requirements
- those counted toward satisfying New College proficiency requirements
- those requested after the start date of the class

For further information about this ASU grading option or to determine how a "P" or "Y" grade transfers from another institution, students should contact their advisor.

Satisfactory ("Y") grade option

Unlike the "P" grade option, which can be requested by students, the "Y" grade is standard for some courses. The "Y" grade is generally used for successfully completed internships, projects, readings and conference, research, seminars, theses, dissertations and workshops. Students earn credit hours for a "Y" grade, but the grade is not used for computing the GPA. If requirements for the "Y" grade are not met, a failing grade ("E") is applied. The "E" grade is calculated into the GPA. The "Y" grade may be acceptable in cases in which a "C" or higher is required, but there may be some exceptions. For more information about the "Y" grade option, students should contact their academic advisor.

Academic (grade) grievance policy

Any student seeking to appeal a grade must take the steps listed below. This process does not address academic integrity allegations or faculty misconduct.

Student grade appeals must be processed before the end of the regular semester immediately following the issuance of the grade in dispute (by commencement for fall or spring), regardless of whether the student is enrolled at the university.

Typically, final course grade appeals are only considered when one or more of the following criteria are met. Appeals requested for areas outside these parameters are not eligible for formal hearings and are not heard.

- There was an error in calculating the final course grade.
- The criteria for determining the final course grade were changed from those specified in the syllabus.
- The evaluation system was not consistently and fairly applied to all students.

The grade grievance process has two stages: the informal process and the formal process. Each process consists of a series of steps.

Informal process

Step 1: An aggrieved student must first confer with the instructor; the student must state the reasons for questioning that the grade received was given in good faith. The instructor must review the matter, explain the grading procedure used, and explain how the grade in question was determined. If the instructor is a graduate assistant and this interview does not resolve the difficulty, the student may then take the problem to the faculty member in charge of the course.

Step 2: If the grading dispute is not resolved in step 1, the student may appeal to the school academic director or designee within the school offering the course. The school director or designee may confer with the instructor to handle the problem. In most instances, the grievance procedure can be resolved with steps 1 or 2 and does not go beyond this level.

Step 3: If the matter is not resolved to the student's satisfaction after completing steps 1 and 2, the student may then confer with the dean's designee (at 602-543-7000), who reviews the case and explains the formal process to the student. If the matter is still unresolved, the student may proceed to the formal process.

Formal process

Step 4: No later than 10 business days after meeting with the dean's designee, the student must provide a written statement noting the evidence, if any, and describing the reasons for determining that the grade received was not given in good faith. Supporting materials should be attached as exhibits to the statement.

Step 5: The dean's designee provides the student's statement (with any exhibits) to the instructor and requests that the instructor respond to the dean's designee within 10 business days.

Step 6: When the official, written response is received from the instructor, the dean's designee contacts the student, who can then schedule an appointment to review the instructor's response. After reviewing the instructor's response, the student may submit a written request for a hearing before the New College of Interdisciplinary Arts and Sciences Student

Affairs and Grievances Committee. This written request for a hearing must be submitted no later than 10 business days after the dean's designee notifies the student that the instructor's response was received. This is a regular committee that meets monthly, as necessary, during the fall and spring semesters when classes are in session. The dean's designee serves as a nonvoting, ex officio member of the committee.

Step 7: The committee meets with the student and the instructor in an attempt to resolve differences. To preserve the confidential nature of the grade grievance process and to protect the privacy interest of those involved, the hearing is closed to the public. The committee chairperson presides at the hearing and rules upon all procedural matters. A student who fails to appear or refuses to participate at the hearing is deemed to have abandoned the request for a hearing, unless the student can demonstrate that extraordinary circumstances prevented the appearance or participation.

Step 8: After all parties have been heard, they are excused, and the committee deliberates in closed session. Upon reaching consensus, the committee chairperson submits their recommendation to the dean of the New College of Interdisciplinary Arts and Sciences. The dean reviews the report and makes a final determination regarding the appropriate course of action. The dean's office informs the student, instructor, school director, registrar and Student Affairs and Grievances Committee in writing of the decision. The dean's decision is final.

It is university policy that students filing grievances and those who are witnesses be protected from retaliation. Students who believe they are victims of retaliation should immediately contact the dean's office in the New College of Interdisciplinary Arts and Sciences.

Transfer coursework

Credit is granted for transferred courses deemed equivalent to corresponding courses in the selected program of study, subject to grade and ASU resident credit requirements. Courses for which a grade lower than "C-" (2.00) has been earned do not transfer to ASU. A maximum of 64 semester hours of credit are accepted as lower-division credit when transferred from a regionally accredited community, junior or two-year college, with the exception of some special programs. For a listing of the acceptable courses transferable to the various degree programs, prospective Arizona transfer students should consult their advisors and refer to the ASU transfer tools [19].

Some courses taken at other ASU colleges or other universities may be acceptable for general university credit but may not be applicable toward the degree requirements of the college. Determination of those particular courses applicable to a specific degree program is made within the appropriate academic unit.

Withdrawal

Complete session withdrawal information

Because a complete session withdrawal from the university can be a difficult decision and could result in serious academic and financial consequences, undergraduate students are encouraged to connect with their academic advisor to facilitate the withdrawal process.

Students must complete the following steps in the order shown here:

1. Review the academic calendar [20] for complete session withdrawal and tuition refund deadlines.
2. Log in to My ASU. [21]
3. Under My Classes, select Registration, then Drop/Withdrawal.
4. Indicate all the classes and sessions for the withdrawal, answer the required questions and select Submit Withdrawal Request.
5. The request is reviewed, and the academic advisor may contact the student for further discussion. If approved, the complete session withdrawal request is sent to University Registrar Services for processing.

Before requesting a complete session withdrawal, the student is encouraged to discuss a potential complete session withdrawal with an academic advisor. To schedule an appointment, students should call 602-543-3000. ASU has many resources in place to help students. Students may want to consider one or more of the following:

- Withdraw from one or some classes in a session, not all (course withdrawal). Students may withdraw from one or some of the classes in a session while remaining enrolled in other classes as long as the withdrawal is completed by the university course withdrawal deadline. Students are encouraged to contact their academic advisor to discuss the impact this may have on meeting critical requirements. Students are also encouraged to contact a financial aid team member to consider any impact that withdrawing will have on scholarships, grants and loan packages.
- Request a medical or compassionate withdrawal. A medical or compassionate withdrawal request [22] may be made in extraordinary cases in which serious illness or injury (medical) or another extraordinary personal situation, such as a death in the family (compassionate), prevents a student from continuing their classes, and "I" (incomplete) grades or other arrangements with the instructors are not possible. Students should review the specific New College medical and compassionate withdrawal requirements and procedures [23] for more information.
- Seek tutoring or academic support services. The university Academic Support Network [24] provides a variety of services to help students become better learners and gain the confidence and skills they need to achieve their academic goals. Services include writing centers, math tutoring, subject area tutoring and supplemental instruction.
- Make an appointment with ASU's Counseling Services. Counseling and mental health services are provided at each of the four ASU campuses. ASU students may seek services at any of the campus counseling centers [25], regardless of their college affiliation.
- Explore the possibility of an "I" (incomplete) grade.

Possible consequences of a complete session withdrawal:

- Financial aid: Financial aid recipients who completely withdraw from the university may be responsible for immediate repayment of funds. The effect of a complete withdrawal from financial aid depends on the date of the withdrawal and the type of financial aid. Students should review the maintaining financial aid [26] procedures for more information.
- Tuition and refunds: By registering for classes, students agree to pay all applicable tuition and registration fees. Students are required to pay all tuition and fees for any registered course unless enrollment is officially cancelled during the 100% refund period. For more information, students should review the ASU tuition refund policy [27].
- Health insurance: Students should contact their health insurance company to determine whether withdrawing from the university affects their coverage.
- University housing: Students who live on campus should contact their residential hall community staff to determine what impact withdrawing will have on their eligibility to live on campus, complete a license agreement release form [28] and arrange an appointment to officially check out.
- Veterans benefits and certifications: Students should contact the appropriate veterans benefits and certifications office to discuss information regarding veterans educational benefits and military activation. For more information, students should send an email to w.westvso@asu.edu or visit the Pat Tillman Veterans Center website [29].

Procedures for general university withdrawal can be found at the University Registrar Services registration website [30].

Degree requirements

All candidates for graduation with a bachelor's degree in the New College of Interdisciplinary Arts and Sciences are required to satisfy all university undergraduate graduation requirements [31], including:

- a minimum cumulative grade point average of 2.00 for all courses taken at ASU
- a minimum of 30 credit hours in resident credit courses at ASU
- at least 45 credit hours of upper-division courses
- completion of a minimum of 120 credit hours
- completion of major requirements that involve concentrated coursework in one program
- completion of university first-year composition [32] and general studies [33] requirements

In addition to meeting the university undergraduate graduation requirements, all New College students in a Bachelor of Arts or Bachelor of Science program must also satisfy the following college requirements:

- NEW 101 or equivalent (first-year students)

- IAS 300 (transfer students)
- New College global and civic engagement requirement (General Studies Gold) or New College language and cultures requirement (General Studies Maroon)
- minimum of 12 credit hours of major-specific upper-division (300- and 400-level) coursework offered by New College (college residency)

New College students in the Bachelor of Applies Science program are not subject to the college-specific requirements above. BAS students are subject to all university graduation requirements.

It is the student's responsibility to be aware of the degree program requirements and to select courses accordingly.

Proficiency requirements

All New College students in a BA or BS program are required to demonstrate proficiency in either global and civic engagement (General Studies Gold) or the analysis of language and cultures (General Studies Maroon), as well as mathematics (both), by passing an examination or by completing the courses specified below with a grade of "C" or higher in each course.

New College global and civic engagement requirement (General Studies Gold)

This requirement may be satisfied through one of the following:

- completion of six credit hours of upper-division courses that have a global communities, societies and individuals (GCSI) or governance and civic engagement (CIVI) designation, in addition to the courses used to meet the university general studies requirements
- completion of three credit hours from an ASU-approved global education program (e.g., faculty-directed study abroad, Global Intensive Experience, exchange programs)

New College language and cultures requirement (General Studies Maroon)

This requirement may be satisfied through one of the following:

- completion of secondary education at a school in which the language of instruction is not English
- completion of a language course at the intermediate level (202 or equivalent), including American Sign Language IV
- completion of an upper-division course or courses taught in a foreign language, taken in the United States or the relevant country
- completion of six credit hours of upper-division courses that have a global awareness designation (G) or cultural diversity in the U.S. designation (C), in addition to the courses used to meet the university general studies requirements
- completion of two sequential semesters of coursework in a current computer language

Students may obtain information about applicable coursework through the college advising office.

New College mathematics proficiency requirement

All New College students in a BA or BS program are required to complete a general studies course designated as mathematics (MA in General Studies Maroon; MATH in General Studies Gold) with a "C" or higher. Completing MAT 114: College Mathematics or MAT 117: College Algebra with a "C" or higher fulfills this college requirement. Some majors may require a higher-level mathematics course.

Major requirements

Each student is required to select a major from among the programs offered by the New College of Interdisciplinary Arts and Sciences.

Credit toward a major, minor or undergraduate certificate is granted only for courses completed with a grade of “C” (2.00) or higher. A grade of “Y” (satisfactory) must be verified as equivalent to a “C” (2.00) or higher to fulfill major or minor requirements.

General electives

After completing all other requirements, the student may fulfill the remainder of the minimum 120 credit hours required for graduation with general electives. Students should contact college advisors for assistance in selecting elective courses.

Concurrent degrees

Students in the New College of Interdisciplinary Arts and Sciences may apply for concurrent degrees through the university approval process [34]. Students are eligible to pursue a concurrent degree within New College when the following criteria have been met:

1. Students must be in good standing with a cumulative GPA of 2.00 or higher.
2. Students must have completed a minimum of 30 credit hours in their first program of study.
3. Students must complete 30 credit hours specific to each program.
4. Students must meet admission criteria and concurrent degree eligibility requirements for both programs.

Students should connect with advising to discuss their selected combinations. Degree combinations with significant course overlap may not be approved. Examples of incompatible majors include:

- Biology BA or BS/biochemistry BA or BS
- Biology BA or BA/pharmacology and toxicology BS
- Conflict resolution BA/communication BA or BS
- History BA/history (secondary education) BA
- Political science BA or BS/social justice and human rights BA
- Psychology BA or BS/counseling and applied psychological science BS
- Psychology BA or BS/psychology (forensic psychology) BA or BS
- Spanish BA (West Valley campus)/Spanish BA (Tempe campus)

Minors

New College offers minors [35] in many of its disciplines. All minors require a minimum of 15 credit hours in the discipline, with at least nine of those hours completed as upper-division coursework. A minimum of six of the upper-division credit hours must be taken from courses offered by New College. Courses used for the minor may not be used for the student's major.

Readmission

Undergraduate degree-seeking students who have previously attended ASU but have not been enrolled at ASU for up to seven consecutive fall or spring semesters are eligible to return through quick re-entry [36]. These students are not required to submit a new application or application fee but must contact an academic advisor in their school to enroll.

Undergraduates who have been away from the university for more than seven semesters and want to return to ASU in a New College program are required to apply for readmission [37] through ASU Admission Services.

Disqualified students must follow the procedures for readmission; their cases are reviewed by the college on a case-by-case basis.

Graduate policies

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Graduate academic success advisors can be contacted at NCGradAdvising@asu.edu.

Academic standing

Satisfactory academic progress

All graduate students are expected to make systematic progress toward completion of their graduate program. This progress includes satisfying the conditions outlined in the policies listed below and achieving the benchmarks and requirements set by the individual graduate programs as well as the Graduate College. Graduate students should review the New College satisfactory academic progress policy [38] and the ASU Graduate College policy manual [39].

Credit and registration

Grade of incomplete

When an "I" (incomplete) grade [15] is given in a graduate course (500 level or higher), the "I" grade becomes a permanent part of the transcript if the course is not completed within one year, and the student must re-register and pay fees to repeat the course for credit.

Academic (grade) grievance policy

The following steps must be followed by any student seeking to appeal a grade. This process does not address academic integrity allegations or faculty misconduct.

Student grade appeals must be processed in the regular semester immediately following the issuance of the grade in dispute (by commencement for fall or spring), regardless of whether the student is enrolled at the university.

Typically, final course grade appeals are only considered when one or more of the following criteria are met (appeals requested for areas outside these parameters are not eligible for formal hearings and are not heard):

- There was an error in calculating the final course grade.
- The criteria for determining the final course grade were changed from what was specified in the syllabus.
- The evaluation system was not consistently and fairly applied to all students.

The grade grievance process has two stages: the informal process and the formal process. Each process consists of a series of steps.

Informal process

Step 1: An aggrieved student must first confer with the instructor; the student must state the reasons for questioning that the grade received was given in good faith. The instructor must review the matter, and explain the grading procedure used and how the grade in question was determined. If the instructor is a graduate assistant, and this interview does not resolve the difficulty, the student may then take the problem to the faculty member in charge of the course.

Step 2: If the grading dispute is not resolved in step 1, the student may appeal to the school academic director or designee within the school offering the course. The school director or designee may confer with the instructor to handle the problem. In most instances, the grievance procedure can be resolved with step 1 or step 2 and does not go beyond this level.

Step 3: If the matter is not resolved to the student's satisfaction after completing steps 1 and 2, the student may then confer with the dean's designee (at 602-543-7000), who reviews the case and explains the formal process to the student. If the matter is still unresolved, the student may proceed to the formal process.

Formal process

Step 4: No later than 10 business days after meeting with the dean's designee, the student must provide a written statement noting the evidence, if any, and reasons for determining that the grade received was not given in good faith. Supporting materials should be attached as exhibits to the statement.

Step 5: The dean's designee provides the student's statement (with any exhibits) to the instructor and requests that the instructor respond to the dean's designee within 10 business days.

Step 6: When the official, written response is received from the instructor, the dean's designee contacts the student, who can then schedule an appointment to review the instructor's response. After reviewing the instructor's response, the student may submit a written request for a hearing before the New College of Interdisciplinary Arts and Sciences Student Affairs and Grievances Committee. This written request for a hearing must be submitted no later than 10 business days after the dean's designee notifies the student that the instructor's response was received. The committee is a regular committee and meets monthly, as necessary, during the fall and spring terms when classes are in session. The dean's designee serves as a nonvoting, ex officio member of the committee.

Step 7: The committee meets with the student and the instructor in an attempt to resolve differences. To preserve the confidential nature of the grade grievance process and to protect the privacy interest of those involved, the hearing is closed to the public. The committee chairperson presides at the hearing and rules upon all procedural matters. A student who fails to appear or refuses to participate at the hearing is deemed to have abandoned the request for a hearing unless the student can demonstrate that extraordinary circumstances prevented their appearance or participation.

Step 8: After all parties have been heard, they are excused, and the committee deliberates in closed session. Upon reaching consensus, the committee chairperson submits their recommendation to the dean of the New College of Interdisciplinary Arts and Sciences. The dean reviews the report and makes a final determination regarding the appropriate course of action. The dean's office informs the student, instructor, school director, registrar and Student Affairs and Grievances Committee in writing of the decision. The dean's decision is final.

It is university policy that students filing grievances and those who are witnesses be protected from retaliation. Students who believe they are victims of retaliation should immediately contact the dean’s office in the New College of Interdisciplinary Arts and Sciences.

Other graduate policies

Graduate students are expected to have knowledge of the information in this catalog as well as information published in the ASU Graduate College Policy Manual [39] and New College graduate program handbooks [38].

Additional considerations

Request a medical or compassionate withdrawal

Walter Cronkite School of Journalism and Mass Communication policies

The Walter Cronkite School of Journalism and Mass Communication has a student-centered culture focused on supporting timely degree completion. Students are encouraged to visit the school website [1] or contact its student services center at 602-496-5055 with questions about any of the school's policies.

Academic integrity

The Walter Cronkite School of Journalism and Mass Communication insists on academic integrity in every course and educational activity offered or sanctioned by the school. Instructors will notify students of concerns about academic dishonesty and request additional information as needed. Based on the outcome of the communication (or if the student fails to engage), the instructor will follow the academic integrity policy regarding a sanction and referral for additional investigation as appropriate. Students should refer to ASU's policy on academic dishonesty for procedures and potential penalties.

Deadlines: Assignments submitted even one second past the deadline are subject to a 25% deduction; thus, a "C" becomes the highest possible grade for a late submission within the first 24 hours after the deadline. This includes assignments submitted at 12:00 a.m. when the deadline is 11:59 p.m. Assignments submitted more than 24 hours after the initial deadline receive zero points. Instructors do not grant exceptions for preventable circumstances, including technical difficulties and poor time management.

If a student begins an assignment but runs out of time to complete it, the student should remember that submitting a partially completed assignment is better than not submitting anything at all (as long as the work meets all expectations for academic integrity and does not compromise the work of other students).

Extreme personal circumstances: Students should notify their instructor as soon as possible if an extreme individual circumstance interferes with their ability to complete coursework. Examples include hospitalization of a student, death of an immediate family member or a natural disaster.

Active duty military: Students who are on active duty with the military and, because of deployment or service responsibilities, experience Internet connectivity issues that prevent them from participating in course activities or meeting assignment deadlines must notify the instructor as soon as possible to discuss appropriate accommodations.
Religious accommodations: Students who must be absent from class because of religious observance should notify their instructors at the beginning of the semester.

ACEJMC values and competencies: As a member of the Accrediting Council on Education in Journalism and Mass Communication, the Cronkite School is committed to classroom learning that supports ACEJMC professional values and competencies (http://www.acejmc.org/policies-process/principles).

Course Content: Course content, including lectures, is considered copyrighted material. Students may not share course content outside of class activities (which includes live streaming, video conferencing, audio-visual materials and generative AI programs), or upload, sell, distribute or trade course content, evaluations, access codes, or notes. (See ACD 304-06 Commercial Note Taking Services for more information. [2]) Students must refrain from uploading to any course shell, discussion board, website, social media platform, or other course forum any material that is not the student's original work unless the student first complies with all applicable copyright laws; instructors reserve the right to delete materials on the grounds of suspected copyright infringement.

Recording or sharing course lectures and class activities without a university-approved accommodation requires permission from the course instructor. Students may not disclose or modify course content in any manner that disrupts the learning environment or otherwise violates university policy. (See ABOR 5-308 Student Code of Conduct, ABOR 6-908 Intellectual Property Policy.) For additional information on restrictions on recording for commercial purposes, students should see the ASU commercial filming and photography on campus guidelines. [3]

Original work and collaborations: All work submitted for classes must be original work, created solely for the current session of the class. This includes photos, text, video and images. Students may not submit assignments or evaluations done for any other class, for any other organization or for a previous session of the class. ASU offers resources for learning more about plagiarism and self-plagiarism [4]. Students who violate this clause are referred to an academic integrity officer.

All assignments must be the student's own work — from concept to execution — unless the instructor specifies collaboration. Even when students are part of a team, not all elements of the assignment may be team-based. For example, the assignment may call for a team discussion of a topic, but a writing assignment based on that discussion must be the student's individual work. Violating this policy may qualify as academic dishonesty. Students are responsible for understanding what elements of an assignment or task (if any) require peer collaboration or individual completion.

Grade appeals and grievances: Students in Cronkite School courses must follow the Cronkite School procedures for grade appeals and grievances. [5]

Notice of Nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [6]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website [7].

Undergraduate policies

Academic standing

Probation and Walter Cronkite School of Journalism and Mass Communication continuing academic probation

All ASU students, first-year students through seniors, must maintain a minimum GPA of 2.00 for all courses completed at ASU. If this standard is not maintained, the student is placed on probation. Students on probation must see an advisor before further registration and must do one of the following:

- Achieve an ASU GPA of 2.00 or higher to return to academic good standing.
- Obtain a semester GPA of 2.50 with no grade lower than "C" to be granted one additional semester on continuing probation. At the end of the continuing probation, the student must return to academic good standing (a minimum cumulative ASU GPA of 2.00) to avoid disqualification.

Disqualification

Students who do not meet probation requirements are academically disqualified. Disqualified students should meet with their academic advisors. These students may attend ASU only during the summer session immediately following disqualification.

Students must follow university policies on retention and academic standards [8] for GPA requirements, probation and disqualification.

Advising

Undergraduate students are assigned an advisor according to the student's last name. Students should see the Cronkite School advising [9] page for specifics.

To ensure that students make progress toward their degrees, the school encourages students to check in with their advisors each semester. Advising is mandatory for:

- first-time, first-year students, in both semesters during their first year at ASU
- students on academic probation
- students who are off track in their major
- students who have completed 75 credit hours
- transfer students before they enroll in their first semester at ASU

For additional information, students should contact the school's advising office at cronkiteadvising@asu.edu.

Students should follow the requirements outlined in degree graduation audits and contact their advisor with any questions. Critical requirements for first-year students are available at the school website [10].

Credit and registration

Changes of major

Students are eligible to change their major [11] if they have a cumulative GPA of at least 2.00.

Transfer credit

An unlimited number of credit hours are accepted from four-year institutions, while a maximum of 64 credit hours are accepted as lower-division credit when transferred from a regionally accredited community, junior or two-year college, with the exception of some special programs. Upon admission to the university, students work with an ASU academic advisor to determine how their transferable credits apply toward their selected major.

Students interested in having credits earned at other institutions reviewed for transfer credit should collect detailed course syllabi, review the ASU transfer credit criteria [12] and consult a Cronkite academic advisor [9] or admission specialist [13] for assistance.

Degree requirements

All students must meet the critical requirements for their majors. Students who are required to follow eAdvisor tracking requirements and do not comply with the critical requirements are off track, and a hold is placed on their records. These students must meet with an advisor to have the hold removed.

- specific requirements for the journalism and mass communication degree [14]
- specific requirements for the sports journalism degree [15]
- specific requirements for the mass communication and media studies degree [16]
- specific requirements for the digital audiences degree [17]
- specific requirements for the digital media literacy degree [18]

Concurrent degrees

The primary degree is the one that appears at the top of a student's transcript. A concurrent degree is an additional degree that a student pursues.

Following are general rules for students pursuing concurrent degrees in the Walter Cronkite School of Journalism and Mass Communication:

- Students currently enrolled in a Cronkite School degree program who would like to add a concurrent degree must have a cumulative ASU GPA of 2.00 or higher and must have completed 30 credit hours of coursework.
- ASU students not enrolled in the Cronkite School who would like to add a concurrent Cronkite degree must be in good academic standing, must have a cumulative GPA of at least 2.00 in a degree program and must have completed 30 credit hours of coursework.
- Students currently enrolled in a Cronkite School undergraduate degree program may not pursue a concurrent degree in another Cronkite School undergraduate program, given the similarity in disciplines and the overlap in required coursework.

Procedures for adding a concurrent degree:

1. Once a student has decided to declare a concurrent degree, they should inform the academic advisor for each degree to receive information about degree requirements and courses.
2. When a student meets the requirements for a concurrent degree, they should contact the assigned academic advisor for each major to review and complete the university's approval process. [19]
3. If a student no longer wishes to pursue a concurrent degree, they should email that intention to both academic advisors. The message should include the student's full name and ASU ID number, and specify the degree that the student wants to have removed from the academic record.

Students can direct any questions to cronkiteadvising@asu.edu.

Reinstatement/readmission

Students seeking readmission after being discontinued from the university should contact admission services. [20]

Graduate policies

Complete information on the Cronkite School's academic standards, policies and procedures can be found in each graduate program handbook. [21]

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the graduate program handbook [21]. Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Degree requirements

Plan of study

Graduate students are required to complete their interactive plan of study [22] in their first enrolled semester. This requirement is monitored by the academic unit and is considered critical to satisfactory academic progress. The plan of study is available online in the My Programs box on My ASU [23].

Students who need to file a POS are notified by the Graduate College via email. If the student fails to file the POS within the specified period, a hold is placed on the student's ASU record. The hold prevents the student from registering for classes. Once the student has filed the POS and it has been approved, the hold is removed. The Graduate College monitors students' iPOS statuses and places or removes the holds.

Time limitations

Consult the program handbook [21] for degree completion requirements.

Academic standing

Satisfactory academic progress

All ASU graduate students must follow the Graduate College satisfactory academic progress policies [24]. Additionally, students enrolled in a Cronkite School graduate program must abide by these additional policies:

- If any of a student's GPAs are lower than 3.00, the student is placed on academic probation. If the student's GPAs are not raised to at least 3.00 by the end of the next semester, the Cronkite School may recommend dismissal to ASU's Graduate College.
- Individual courses within graduate programs require minimum passing grades. Students should consult each graduate program handbook [21] for course standards within degree programs.
- Students are required to earn at least a "B" (3.00) in their culminating experience or capstone course.

Credit and registration

Transfer credit

Transfer credit guidelines are provided in each graduate program handbook. [21]

400-level courses taken for graduate credit

The Cronkite School may allow graduate students to enroll in and use up to two three-credit, 400-level courses on their POS (no more than six credit hours). Students must receive permission from the program director before enrolling in any 400-level course they intend to include in their POS. Students complete the 400-level course contract form, which specifies what the student must do to receive graduate credit for the course.

Preadmission credit

In accordance with Graduate College preadmission policy [25], credit earned in graduate-level courses by undergraduate students may count toward their graduate degrees at ASU, provided the credit hours have not been used toward a previously awarded degree. Before they are awarded a bachelor's degree, ASU undergraduate students should contact their undergraduate advisor to set aside graduate courses for use toward a graduate degree.

Reserving a course does not guarantee that the student will be admitted to a graduate degree program or that the course will be used to meet graduate degree requirements. A maximum of nine credit hours may be reserved, and only courses

with a grade of "B" (3.00) or higher are applicable. Reserved credit is classified as nondegree credit and must be taken within the six-year limit to be included on a POS.

Grades of "I" (incomplete)

The Graduate College requires students who receive an "I" in graduate coursework (500 level and higher) to complete the necessary work within one calendar year or a shorter time frame as agreed upon by the instructor and student. If the "I" is not removed within one calendar year, it becomes part of the student's permanent transcript and cannot be used on a student's POS. To receive credit for the course, the student must repeat the course by re-registering, paying fees and fulfilling all course requirements.

Master's degree students with more than one "I" at any time are considered failing to make adequate progress, and they are placed on probation. If the student does not complete the work to remove the "I" and earn a letter grade by the end of the calendar year, a recommendation may be made to the Graduate College to remove the student from the program.

In 400-level courses taken for graduate program, students are required to complete the necessary work to remove an incomplete grade within one calendar year. If the incomplete grade is not removed within one calendar year, the "I" becomes an "E" (failing) grade. An "E" cannot be used to meet the requirements for a graduate degree, but it is used to calculate the student's GPA. Students may retake the class to earn a higher grade; however, both the "E" and the new grade are used in calculating the student's GPA. If this results in a GPA lower than 3.00, a recommendation to withdraw the student from the program is made to the Graduate College.

Sandra Day O’Connor College of Law policies

Academic integrity

Academic integrity code

The legal profession, a self-regulating association, depends on the integrity, honor and personal morality of each member. Similarly, the integrity and value of a Sandra Day O'Connor College of Law degree depend on a reputation for fair competition. The ASU Law Academic Integrity Code (PDF) [1] is intended as a measure to preserve the integrity of the school's diploma and to create an arena in which students can compete fairly and confidently.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU’s policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [2]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [3]

Graduate policies

Academic standing

Retention standards - Juris Doctor students

If a student's 1L GPA is above 2.00 but below 2.33 after the first year, that student is disqualified from ASU Law but may be reconsidered for readmission, if the student applies. If a student's 1L cumulative GPA is below 2.00, that student is permanently disqualified in accordance with ASU Law policies. If an upper-level student's cumulative GPA is below 2.33 (2.00 for students who started law school before fall 2020), that student is disqualified from ASU Law but may apply for readmission.

Retention standards - all students

The ASU Law JD Statement of Student Policies (PDF) lists additional retention and academic policies. [4]

Advising

Academic advising for currently enrolled law students is available through the Office of Academic Services, with designated points of contact for different degree programs.

Degree requirements

Concurrent degrees

ASU Law students must be in academic good standing to be eligible to pursue a concurrent degree.

Shared credit

Per the Graduate College policy for concurrent master's degrees, a maximum of 20% of the minimum total credit hours for the completion of both degrees may be hours shared between the degree programs. The total number of credit hours

common to both degree programs may vary from this maximum value only when the Graduate College office has formally approved coordinated degree programs.

The Graduate College policy also states that for a concurrent master's or doctoral degree, a maximum of 12 credit hours may be shared between the degrees and may only include coursework completed after admission to both degree programs. The total number of hours common to both degree programs may vary from this maximum value only when the Graduate College has formally approved coordinated degree programs.

The Graduate College policy for concurrent doctoral degrees states that a maximum of 12 credit hours may be shared between the degrees. The total number of hours common to both degree programs may vary from this maximum value only when the Graduate College has formally approved coordinated degree programs.

Process

Current ASU Law Juris Doctor students who are interested in pursuing a concurrent degree should contact ASU Law's assistant dean for academic affairs or the assistant registrar before applying to ASU Law or the department or school offering the desired concurrent degree.

Master's degree students at ASU Law who are interested in pursuing a concurrent degree should contact ASU Law's associate dean for new education initiatives before applying to the college, department or school offering the concurrent degree.

Current ASU students who are not enrolled in ASU Law and who wish to pursue a concurrent degree with ASU Law should contact the admission office. [5]

Admission process

Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

JD admission

The Sandra Day O'Connor College of Law enrolls only one first-year JD class per year, beginning in the fall semester. This is a three-year program, and almost all students study full time. The college offers a flexible scheduling option for students whose circumstances make full-time enrollment impossible. To be considered for admission to the JD program, applicants must have taken the LSAT (excluding applicants applying to the ASU Achievement Program) and have earned, by the time of enrollment in law school, a bachelor's degree awarded by an institution accredited by an agency recognized by the United States Department of Education.

ASU Law is committed to a more sustainable and resilient future and requires applicants to apply electronically through the Law School Admission Council website: https://www.lsac.org/.

An application for admission must include:

1. electronic application
2. personal statement (no more than two pages, double-spaced, 11-point or larger font)
3. resume (no more than two pages, 11-point or larger font)
4. character and fitness statements; if applicable, explaining affirmative answers to questions 1-8 in the character and fitness section of the application
5. binding admission contract, if applicable
6. valid LSAT score (except applicants applying to the ASU Achievement Program)
7. transcripts from each undergraduate and graduate institution attended (must be sent to LSAC)
8. proof of English proficiency for applicants whose native language is not English, regardless of current residency

The application may also include:

- Arizona residency form
- "elevator pitch" video
- inclusive excellence statement

- letters of recommendation — no more than two*
- optional addenda

*Because letters are not required, the admission office does not wait for them to complete an applicant's file for review.

Application deadlines:

- Priority deadline: February 28, 2026
- Final deadline: July 31, 2026

Students should visit the college website for detailed information about the JD application process. [6]

The College of Liberal Arts and Sciences policies

These are the current policies in The College of Liberal Arts and Sciences.

Academic integrity

Academic honesty is expected of all students in all examinations, assignments, papers, laboratory work, academic transactions and records. More information about academic honesty is available at the academic integrity website [1], and information about The College of Liberal Arts and Sciences policies and procedures can be found at the college website [2].

Academic dishonesty investigation and procedures

- Anyone with a good faith basis for believing that a student has engaged in academic dishonesty may report the alleged violation to the instructor or academic integrity officer for the college or school in which the academic dishonesty occurred.
- If the instructor or academic integrity officer concludes that there is a sufficient basis to believe the student engaged in academic dishonesty, the instructor or the academic integrity officer notifies the student of the alleged violation and initiates the investigative process.
- Before concluding the investigation, the instructor or academic integrity officer provides the student a summary of the information gathered. The student has five business days after the ntice is sent to respond to the allegation.
- At any point in the process, the student can contact the academic integrity officer to seek consultation or clarification.
- The student may be accompanied by an advisor at any point in the process. The advisor is not permitted to participate directly or speak for the student.
- Once the investigation is complete, the student is notified of the result of the investigation and of any sanction to be imposed.

Sanctions and appeal

The following sanctions may be imposed for academic dishonesty:

- reduced or failing grade for the academic evaluation
- reduced or failing grade for the course
- a grade of "XE" [3]
- withdrawal of credit for a previously accepted course or requirement
- suspension from the university for a specific period
- expulsion from the university without expectation of readmission
- other sanctions as consistent with this policy and the Student Code of Conduct [4]

At any time, the student and the instructor may agree on the sanction and inform the academic integrity officer or the dean. The academic integrity officer or the dean may reject the proposed resolution and appoint a designee to pursue the case on behalf of the college.

A student alleged to have violated the academic integrity policy has the following rights:

- The student is notified of their right to appeal to the dean. The student must file their appeal no later than 10 business days after the date the notification is sent. If the student does not file a timely appeal, the sanction is final.
- A student's appeal of an allegation of an academic integrity violation or recommended sanction must be submitted in writing and include the following:
    - a description of the alleged academic dishonesty, including a factual narrative of events, the dates and times of occurrences, and any other reason that the sanction should not be imposed
    - the names of persons who have information about relevant circumstances or events
    - the general nature and description of all evidence

- If the student files an appeal, the student must meet with the academic integrity officer to discuss hearing procedures. The academic integrity officer helps the student navigate the process and provides additional information when needed.
- If the student wishes to dispute any aspect of the allegation or sanction, they may file an appeal. If the student files a timely appeal, the sanction is not imposed until the appeal is resolved. If the student files an appeal at the end of a semester or during the last semester of enrollment, the course grade or degree may be withheld until the matter is resolved. If a grade or degree is withheld for any period, the academic integrity officer or dean must notify the registrar's office.

Student Affairs and Grievances Committee hearing

The academic integrity officer forwards a student's timely appeal to the instructor.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [5]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [6]

Undergraduate policies

Student responsibilities

Students enrolling in courses offered by The College of Liberal Arts and Sciences are expected to follow the rules and deadlines specified in this catalog pertaining to enrollment, adding or dropping classes, withdrawals and tuition payment. Students are encouraged to meet with their academic advisors regularly. Students with additional questions regarding the academic rules of The College and the university are welcome to meet with their academic advisor. Academic advisor contact information and appointment scheduling tools are available on My ASU [7] under the Academic Support Team heading.

In addition, students must understand and follow the requirements for the university's general studies policy [8] and undergraduate graduation requirements policy [9] in their edition of ASU's academic catalog. The academic catalog is the governing source for all degree requirements.

Academic standing

The standards for GPA and the terms of academic warning, academic probation or continuing probation, disqualification and reinstatement are identical to those of the university, as set forth under the retention and academic standards policy. [10]

After students are placed on academic warning or probation, one of three things can happen:

1. They can return to academic good standing by raising the cumulative GPA to 2.00 or higher.
2. They can remain on probation by earning the required semester GPA of at least 2.00 but not raising the cumulative GPA to academic good standing. Students may continue on academic probation, earning the required semester GPA, for as many semesters as it takes to raise the cumulative GPA to academic good standing.
3. They can be disqualified if they fail to achieve the required semester GPA of 2.00.

Students who are on academic probation are placed in a hold that prevents future enrollment. To remove the hold, students must complete a Canvas Academic Success Planner.

Students who are placed on academic warning or academic probation are required to interact with their major academic advisor in each term they remain on continuing probation before enrollment in subsequent terms. On-campus students are required to take UNI 220, and online students are strongly encouraged to take the course as well.

Students who leave the university for a semester or longer while on academic probation are automatically readmitted, except when reapplying to degree programs in the Hugh Downs School of Human Communication, which has specific readmission criteria. Students should review the reinstatement and readmission portion of this page for more information about policies and procedures.

Students who fail to meet the minimum semester GPA of 2.00 in the fall or spring semester after being placed on academic probation are disqualified from further attendance at Arizona State University for a minimum of one semester. Students who are academically disqualified should contact their academic advisor to discuss options for returning to ASU.

Academic advising

All students are encouraged to seek academic advising before registering for courses each semester. Academic advisor contact information and appointment scheduling tools are available on My ASU [7]under the Academic Support Team heading.

eAdvisor

eAdvisor [11] provides students with the tools to successfully follow their major map or curriculum checksheets for graduation and assists students with:

- learning more about graduation requirements for their majors
- discerning what courses and grades are required to stay on track to successfully complete their degrees
- planning for and scheduling appropriate courses in the correct sequence to maximize success
- monitoring progress toward their degrees
- finding out how courses may fit into other majors if they decide to change majors or add concurrent degrees

Academic advising locations

The College of Liberal Arts and Sciences continuing on-campus students and all new and continuing online students should seek academic advising in the department or school [12] of their major.

All on-campus first-year students and newly admitted transfer students in The College of Liberal Arts in Sciences should seek academic advising with advisors located in the Academic Advising Hub on the first floor of Armstrong Hall.

The Office of Student and Academic Programs, in Armstrong Hall, first floor south, is the central resource center for academic information in the college. Clarification of rules, procedures and academic advising needs of The College and university should be directed to that office. The Office of Student and Academic Programs also provides information on policies and procedures regarding academic integrity, student grievances with respect to grades, and various petitions involving college and university degree and graduation requirements.

Required advising

The following groups of students are required to consult with their academic advisor before they are eligible to register for courses:

- all students registering for their first semester at ASU
- first-year students registering for their second semester at ASU (Successful completion of LIA 101 class assignment meets the academic advising requirement.)
- students on academic probation or continuing probation
- students newly readmitted to the university
- students who are off track in their major

Students listed above should consult an advisor in the department or school of their major. Disqualified students seeking readmission should first apply to the university for readmission [13]. Once students have been readmitted to ASU, they should consult an academic advisor in the department or school of their major.

Professional field	Advisor location
Dentistry	ARM 162
Foreign Service	Diplomat in Residence, Antoinette Hurtado (HurtadoAC@state.gov)
Law	ARM 162
Medicine	ARM 162
Ministry	School of Historical, Philosophical and Religious Studies, COOR 3309
Occupational therapy	ARM 162
Optometry	ARM 162
Pharmacy	ARM 162
Physical therapy	ARM 162
Physician assistant	ARM 162
Veterinary medicine	ARM 162

Health professions

Students who plan to pursue a health profession should meet regularly with the preprofessional advising staff [14] located in the Futures Center (ARM 162). For each of the health-related fields listed above, specific courses must be taken to complete graduate or professional school prerequisites and to prepare for required standardized admission exams (e.g., MCAT). To schedule a meeting with a pre-health advisor, students should email prehealthtempe@asu.edu, or they can visit Handshake [15].

Prelaw

Students who plan to pursue a law-related profession should seek guidance from the preprofessional advising staff [16] located in the Futures Center (ARM 162). There are no specific course requirements for entrance to law school. However, courses that engage students in intense critical analysis and include substantial amounts of writing are recommended, as are practical experiences outside the classroom (e.g., internships). Students can schedule a meeting with a prelaw advisor by emailing prelawadvising@asu.edu, or they can visit Handshake [15].

Credit hours, degrees and course registration

Credit requirement

All candidates for graduation with a bachelor's degree from The College of Liberal Arts and Sciences are required to complete at least 120 credit hours, of which at least 45 must consist of upper-division courses. A minimum cumulative ASU GPA of 2.00 is required for graduation.

Minors

Current ASU students seeking a bachelor's degree may pursue a minor and have it recognized on their ASU transcript at graduation. Minor requirements appear on the degree audit once the minor is added. Minors require students to complete

a minimum of 15 credit hours, of which at least nine must be from upper-division courses. For minors offered by The College, a minimum of six upper-division credit hours must be completed through The College. Only courses completed with a grade of "C" (2.00 on a scale of 4.00) or higher may be applied toward the minor requirements.

Certain major and minor combinations may be deemed inappropriate by the college or department of either the major or the minor program. Courses taken for the minor may not count toward both the major and the minor

Students should work with their major academic advisors to confirm that they are making the most effective choices to complete their minors. If there are additional questions regarding the minor, the major academic advisor consults with the department offering the minor.

Undergraduate certificates

With the exception of special programs, undergraduate certificates are not awarded before the completion of an undergraduate degree. A student who already holds a baccalaureate degree may pursue an undergraduate certificate as a nondegree-seeking graduate student.

Undergraduate certificates require students to complete a minimum of 15 credit hours, of which at least 12 must be from upper-division courses. For certificates offered by The College of Liberal Arts and Sciences, a minimum of six upper-division credit hours must be completed through The College. Only courses completed with a grade of "C" (2.00 on a scale of 4.00) or higher may be applied toward the certificate requirements.

Course load

A minimum full-time course load for an undergraduate student is 12 credit hours.

The maximum course load for which a degree-seeking student may register in a fall or spring semester across all three sessions (A, B and C) is 18 credit hours, with a maximum of nine credit hours in each A or B session.

Students who wish to register for more than 18 hours must meet GPA criteria based on the number of additional credit hours requested. Students should review The College's website for specific criteria, further guidelines and the course overload petition form [17]. Students who meet these requirements may seek an overload for 19 or more credit hours (or up to 10 credit hours in either session A or B) from the academic advising office in the department or school of their major.

Students should not assume that their petition for overload will be granted. Overload requests are evaluated based on the student's most recent academic performance, cumulative performance and the reasons for requesting the overload. First-year students and transfer students are not permitted to receive course overloads for their first semester at ASU.

Pass/fail grade option

The pass/fail grade option is intended to broaden the education of liberal arts and sciences undergraduates by encouraging them to take advanced courses outside their specializations. A grade of "P" (pass) contributes to a student's earned credit hours but does not affect their GPA. A failing grade of "E" is computed into their GPA.

Students in The College of Liberal Arts and Sciences with at least 60 credit hours may take courses under the pass/fail option. The following conditions apply:

- Enrollment for the pass/fail option must be approved by both the instructor and the college offering the course, as well as the student's school or department. Permission is recorded on the pass/fail enrollment application form [18].
- Enrollment for the pass/fail option must be indicated during registration and may not be changed after the add period.
- A maximum of 12 credit hours taken for pass/fail may be counted toward graduation.

Students may not enroll under the pass/fail option in courses that are:

- taken to satisfy the second-language or first-year composition requirements
- required in the student's major, minor or certificate program

- counted toward or required to supplement the major
- counted as 499 Individualized Instruction

Degree requirements

The College graduation requirements

All students in The College of Liberal Arts and Sciences must complete the university general studies requirements [8] and all requirements of their major. In addition, the college has established requirements that are specific to the Bachelor of Arts, Bachelor of Science and Bachelor of Science in Planning programs.

Requirements for all undergraduates in The College of Liberal Arts and Sciences

All students are required to obtain a grade of "C" or higher in MAT 114 or MAT 117, or in any MAT course that satisfies the general studies MATH or MA requirement. Students should note that many majors in The College require additional mathematics courses beyond those that fulfill the university general studies MATH or MA requirement.

Each student admitted as a first-time, first-year student is required to complete a first-year success course or first-year seminar. These courses are designed to introduce students to The College and help them understand what they need to do to be successful students at ASU. Topics include academic success, academic integrity and student engagement.

BA requirements

Students in BA program in The College have a language requirement, which may be satisfied through one of the following:

- completion of second language coursework at the intermediate level (202 or equivalent)
- a second language course at the 300 level or higher that is taught in the foreign language and has 202 or its equivalent as a prerequisite
- demonstrated completion of secondary education at a school where the language of instruction is not English
- completion of ASL 202 American Sign Language IV or its equivalent

BS and BSP requirements

Each student pursuing a BS or BSP must complete six credit hours (two courses) of science and society courses [19]. At least one course must be completed at the upper-division level. Students should consult an advisor in the department or school of their major for a list of appropriate courses.

Major requirements

Each student is required to select a major from among the fields of study offered by The College. Curriculum checksheets list the requirements for completion of each degree program.

The department or school of the major may require up to 45 credit hours of coursework; the minimum is 30 hours. A maximum of 15 additional credit hours may be required in related courses and prerequisites. No more than 60 credit hours of coursework should be required to complete the major, related courses and prerequisites. Some departments require calculus-level mathematics, and up to five of these credit hours may be excluded from the 60 credit hour maximum because they satisfy The College's mathematics proficiency requirement. A minimum of 12 upper-division credit hours in the major must be taken from courses offered by The College.

Credit toward completion of major requirements is awarded only for courses in which a minimum grade of “C” has been achieved. In The College, the grade of “Y” (Satisfactory) denotes performance at or above the “C” level under the regular grading system. Students are advised to consult curriculum checksheets for information regarding other minimum grade standards.

Major fields of study are classified into the following three areas:

Humanities [20]

- Asian languages (Chinese/Japanese)
- culture, technology and environment
- English*
- film and media studies
- French
- German
- global Asia studies
- history*
- international letters and cultures
- Italian
- Jewish studies
- philosophy
- religious studies
- Russian
- Spanish

Natural sciences and mathematics [21]

- actuarial science
- astronomical and planetary sciences
- biochemistry
- biological sciences
- biophysics
- chemistry
- computational mathematical sciences
- data science
- earth and environmental sciences
- earth and space exploration
- mathematics
- microbiology
- molecular biosciences and biotechnology
- neuroscience
- physics
- psychology

Social sciences [22]

- African and African American studies
- American Indian studies
- American studies
- anthropology
- Asian Pacific American studies
- civic and economic thought and leadership
- communication
- economics
- family and human development
- gender, women and sexuality studies
- geographic information science
- geography
- global health
- global studies
- international relations
- justice studies
- meteorology-climatology
- political science
- politics and the economy
- sociology
- transborder Chicana/o and Latina/o studies
- urban planning

*These degree programs offer a concentration in secondary education.

General electives

Most liberal arts and sciences majors can meet all the requirements stated above with fewer than the 120 credit hours required for graduation. Remaining hours are general electives that may be selected from any of the departments of The College or from the offerings of other ASU schools and colleges.

Concurrent and second baccalaureate degrees

To complete a second baccalaureate degree or concurrent degree, students must earn at least 30 distinct credit hours applied toward the requirements for each major's degree.

Specific combinations of degrees may be deemed inappropriate. [23]

Pursuing a concurrent degree in The College requires approval. To request pursuit of a concurrent degree, students must have completed at least 30 credit hours, have completed at least one fall or spring semester at ASU, and have a minimum GPA of 2.00. Students should visit the college's concurrent degree checklist for more information on pursuing a concurrent degree. [24]

Reinstatement/readmission

Students who have been academically disqualified from the university and have not attended for at least one regular semester can earn readmission [13] to the college and to their majors. The first step for students seeking readmission is to complete the undergraduate admission application [25]. Students should work with the academic advisor in the desired major to discuss a plan and strategies for being readmitted to ASU. The plan may include taking coursework at a two-year college, taking ASU summer classes, or both, and meeting specific GPA requirements to demonstrate readiness to return to ASU.

Disqualified students who were off track for two or more semesters at the time of their disqualification are not automatically readmitted to their former majors.

Graduate policies

Students should consult the handbook for their degree program or the individual school or department for information about requirements for graduate study.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all policies set forth by the Graduate College [26] and The College of Liberal Arts and Sciences. Any questions regarding graduate policies for The College can be directed to TheCollege-Grad@asu.edu.

John Shufeldt School of Medicine and Medical Engineering policies

The mission of the John Shufeldt School of Medicine and Medical Engineering is to cultivate physicians who can integrate their medical expertise with leading-edge engineering and augmented intelligence skills within a human-centered framework, and to develop innovative solutions to health care challenges. Faculty advance clinical practice and knowledge through education and translational research to deliver a groundbreaking medical education experience that fosters uncompromised excellence in patient care, biomedical discovery, engineering solutions, and an entrepreneurial mindset. Graduates of the school will be equipped to identify, envision, and implement creative answers to the evolving obstacles in health care for their individual patients, communities and beyond.

Academic integrity

Academic honesty is taken very seriously. While interaction among students is encouraged, students are expected to adhere to the ASU Student Academic Integrity Policy [1]. Plagiarism of any kind is not tolerated. Students must properly cite sources used for assignments. Students must take exams independently without assistance from others. Students may not submit papers written by persons other than themselves. Students must submit original work for courses and may not submit papers previously submitted to another class. Consequences of non-compliance can be significant, including: failing the assignment or course, receiving a permanent “XE” grade for the course, removal from a major or program of study, expulsion from the university, among others.

The ASU Student Academic Integrity Policy [1] lists violations in detail. These violations fall into five broad areas that include:

1. cheating on an academic evaluation or assignment
2. plagiarizing
3. academic deceit, such as fabricating data or information
4. aiding academic integrity policy violations and inappropriately collaborating
5. falsifying academic records

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU’s policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [2]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [3]

Inclusivity

The John Shufeldt School of Medicine and Medical Engineering encourages excellence and seeks to enhance the learning environment for students; advance student and faculty achievement; strengthen the school’s ties to nearby communities; and contribute in measurable ways to improving the health of the Arizona population.

Inclusivity is a fundamental value that underpins the John Shufeldt School of Medicine and Medical Engineering’s mission to foster physicians who can integrate their medical expertise with cutting-edge engineering skills in a humanistic framework and develop innovative solutions to health care challenges.

In promoting excellence, graduates will be equipped to identify, envision and implement creative answers to the evolving obstacles in health care for their individual patients, communities and beyond.

The school commits to the recruitment, admission, hiring, retention, promotion, education and success of talented students, faculty and staff members whose experiences, backgrounds and broad range of perspectives reflect all of Arizona's communities, contribute to the academic and clinical mission, and inform the school's worldview.

By intentionally embracing the pursuit of excellence through inclusivity, the John Shufeldt School of Medicine and Medical Engineering commits to building and supporting an educational framework that prepares future physicians to provide outstanding care for all patient populations and promotes innovative public-interest research, education and care that benefit all the communities it serves.

Graduate policies

Standards for performance and satisfactory academic progress

Shufeldt School strives to graduate professionals who are knowledgeable, skillful, compassionate and caring. This policy provides a framework to determine eligibility for academic advancement, taking into account that graduates with a Doctor of Medicine degree who achieve licensure will have the prerogative to provide patient care in the future.

The student evaluation for advancement involves both objective criteria and subjective judgments. To be considered for advancement, students must have satisfactorily completed all course work; demonstrate motivation, maturity, sound judgment, responsibility, and acceptable professional behavior; demonstrate the required technical skills; and possess other such attributes as the faculty deems to be essential to become a reliable and effective physician.

The faculty and administrators assigned the responsibility to make decisions regarding academic standing, promotion, remediation, and dismissal are charged to globally evaluate individual student performance and use their judgment in making decisions. In order to make satisfactory progress across curricular phases, towards the MD degree, each student must satisfy academic, professional, and essential characteristics and abilities standards on an ongoing basis.

1. Academic: To be considered to be making satisfactory academic progress, a student must:
    - Achieve a passing grade in all courses and clerkships
    - Meet all project requirements
    - Meet all examination requirements, such as the USMLE Step 1 and Step 2-CK, and Clinical Competency Assessment
    - Correct all academic deficiencies within one additional academic year (or otherwise within the time limit specifically set by the Student Progress Committee for the individual case

    Under certain circumstances, the Student Progress Committee may recommend dismissal. Such circumstances may include when one or more of the following conditions apply:
    - The student receives a grade of "Fail" in more than three courses of the pre-clerkship phase of the curriculum (whether or not remediated).
    - The student fails to pass the USMLE Step 1 or Step 2-CK examinations within the time frame specified in the Policy on USMLE Examinations and Clinical Competency Assessment.

    A student's failure to attend required meetings, comply with Student Progress Committee directives for remediation, or meet Student Progress Committee deadlines may preclude remediation and result in immediate dismissal from the MD degree program.

2. Professional Behavior: Students are required, on an ongoing basis, to demonstrate satisfactory professional behavior. A serious breach of professionalism may result in immediate dismissal from the MD degree program.

3. Essential Characteristics and Abilities: Students are required, on an ongoing basis, to satisfy technical standards as outlined in the Policy on Essential Characteristics and Abilities. Continued fulfillment of such standards is a requirement for ongoing registration in the MD degree program.

A student who has at the end of an academic year has completed all courses without deficiency; has demonstrated the professional attitudes, values and behaviors expected of physicians; and who is otherwise in good academic standing will be promoted to the next curricular phase or recommended for graduation. Students may be conditionally enrolled in a

subsequent year of the program pending receipt of requirements for advancement, such as score reports for USMLE or grade reports for courses or clerkships that end immediately prior to the next academic year.

Graduation requirements

To receive the MD degree, each student must satisfy academic, professional, and essential abilities and characteristics standards on an ongoing basis and fulfill specific requirements:

- The student must have completed the curricular requirements for each of the three curriculum phases. This includes passing all required courses, clerkships, selective and elective experiences.
- The student must have received a passing grade on the United States Medical Licensing Examination Steps 1 and 2-CK.
- The student must have passed the Clinical Competency Assessment.
- The student must meet accepted standards of professional behavior. A student who meets all other curricular and technical requirements but does not meet accepted standards of professional behavior will not be granted the MD degree.
- The student must have continued satisfactory fulfillment of the essential characteristics and abilities standards.
- The student must have no unresolved concerns regarding academic performance (including remediation of failures), professional behavior, or fulfillment of the essential characteristics and abilities standards.

Any exceptions to this policy are granted by the Student Progress Committee.

Advising

Academic and career advising is provided within the Shufeldt School, within the Office of Student Affairs.

Admission process

Applicants must fulfill the requirements of both the Graduate College and the John Shufeldt School of Medicine and Medical Engineering through one admission process.

The John Shufeldt School of Medicine and Medical Engineering enrolls only one first-year MD class per year, beginning in the fall semester. This is a four-year program, and almost all students study on a full-time basis. This program is only available to U.S. citizens and permanent residents. To be considered for admission to the School of Medicine and Medical Engineering at ASU, applicants must have taken the MCAT and scored a minimum of 504. The MCAT must be taken no more than three years before matriculation to be eligible.

Recommended coursework

The school does not require specific majors or coursework for entry into the concurrent degree program. However, to maximize student preparedness and chances for success in the program, candidates are strongly recommended to have successfully completed the following courses:

Medical curriculum preparedness:

- behavioral sciences
- biological sciences, including anatomy and physiology
- chemistry, including organic and biological chemistry
- English
- humanities

Engineering curriculum preparedness:

- calculus
- differential equations
- linear algebra
- physics
- statistics

Personal and professional experiences

As part of the mission-aligned review for the John Shufeldt School of Medicine and Medical Engineering admission process, the school also considers the personal and professional experiences of applicants to help discover well-rounded students in research and clinical exposure, contributions, and goals for the future. Recommended experiences include:

- clinical exposure
- engineering or data science
- extracurricular activities
- leadership
- service

Letters of recommendation

The school requires four letters of recommendation. One from a clinical experience, and one from an engineering or data science experience or course instructor are recommended.

Additional requirements

- acknowledgement of concurrent degree program
- AZ fingerprint clearance
- background check
- criminal background check
- technical standards and essential qualifications
- U.S. citizenship

For more detailed information on admission requirements, how to apply to the John Schufeldt School of Medicine and Medical Engineering, and important dates and deadlines, applicants should visit the main admission page. [4]

Edson College of Nursing and Health Innovation policies

The Edson College of Nursing and Health Innovation may need to implement new policies, protocols and procedures to comply with accreditation, regulatory or clinical health care agency requirements; therefore, policies, protocols and procedures are subject to change. Students should confirm current policies, protocols and procedures for clinical placements with the respective student handbook [1].

Students should contact the college's Student Success Initiatives office at 602-496-0888 or edsoncollege@asu.edu with any questions about college policies.

Academic and professional integrity

Academic honesty is expected of all students. The Edson College of Nursing and Health Innovation adheres to the ASU Student Code of Conduct [2], the ASU academic integrity policy [3], and the college academic and professional integrity protocol in student handbooks [4]. Academic dishonesty is not tolerated in any course and is subject to specific Nursing and Health Innovation policies and procedures. Possible sanctions include appropriate grade penalties, disqualification and dismissal.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation [5].

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [6]

Equal access

Students with a disability who have need of assistance or special accommodations can find information about support and access as well as contact information through Student Accessibility and Inclusive Learning Services [7]. Students requesting accommodations for a disability must register with SAILS and must submit appropriate documentation to the instructor from SAILS. For more information, students are asked to review ASU policy SSM 701-02: Eligibility for Accommodations–Required Disability Documentation [8].

Undergraduate policies

Academic standing

University standards for academic good standing [9] are followed for all majors in the college. Students who do not maintain the minimum GPA after each fall or spring semester are placed on academic warning, academic probation or continuing probation. Students on academic probation or continuing probation must meet with an academic advisor before registering for future semesters. Students placed on academic probation have one semester to raise their cumulative or semester GPA; otherwise, they may be disqualified. Disqualified students are not permitted to enroll in the fall or spring semesters.

- University academic warning: An undergraduate student with a cumulative GPA lower than 2.00 at the end of their first semester (fall or spring) is considered to be in university academic warning status.
- University academic probation: An undergraduate student is placed on university academic probation if, at the end of a semester (fall or spring) that is not the student's first semester at ASU, they have a cumulative GPA lower than 2.00 or received an academic warning in the prior term.

- Continuing probation: A student is considered to be on university continuing academic probation each semester (fall or spring) that they (previously on university academic probation) earn a semester GPA higher than 2.00 but have a cumulative GPA lower than 2.00.
- Disqualification: A student on university academic probation who does not earn a semester GPA of 2.00 or higher (fall or spring) is disqualified. Students who are disqualified are not permitted to enroll at ASU in any subsequent fall or spring semester unless they are readmitted.

eAdvisor tracking [10] focuses on students who initially enroll as full-time, first-year students, and the tool tracks their progress during their first four semesters. It identifies and outlines the critical courses, GPA requirements and milestones that predict success in each major. Students use major maps, curriculum checksheets or progress reports to plan which courses to take each semester.

Students in the Bachelor of Science in Nursing traditional prelicensure clinical nursing program, in alignment with continuing eligibility criteria, are required to change their major if they are off track for one semester. Students with direct admission to the BSN program must follow the continuing eligibility criteria exactly as outlined to maintain their status.

Students pursuing the RN to BSN or concurrent enrollment program or who are enrolled as a postbaccalaureate student (pursuing a second degree) are not critically tracked.

Advising

Academic advising is an essential aspect of the educational experience and is provided by the college through the Student Success Initiatives office. Academic advisors assist students with program planning, registration, preparation of petitions, verification of graduation requirements, referrals to university and community resources, and career planning. It is ultimately the responsibility of each student to fulfill academic and program requirements.

ASU accepts coursework transferred from other accredited institutions, and the Edson College of Nursing and Health Innovation determines if and how the courses are applied.

To learn more about how to meet with an advisor, students can visit Edson College Advising. [11]

Mandatory advising

Advising is required for:

- newly admitted students (all first-year students and new undergraduate transfer students) before students register for courses for the first term.
- students who are not making satisfactory progress (academic warning, probation, continuing probation); these students are required to meet with an academic advisor to plan strategies for improving academic standing.

Credit and registration

Course load

Students who wish to register for more than the maximum allowable credits in a term must contact their academic advisor to request an overload before registration. Their assigned advisor reviews the criteria for any overloads.
All upper-division nursing courses must be taken for a letter grade, except for selected clinical courses in the prelicensure program that are taken for "P" (pass) or "Y" (satisfactory).

Degree requirements

Nursing course grades and currency

Students in nursing programs must earn a grade of "C" (2.00) or higher in all nursing coursework, except in nursing practice courses in which a "Y" (satisfactory) or "P" (pass) grade is required. In addition, students are allowed only one nursing course failure (i.e., grade below "C"). The second failure in a nursing course results in disqualification from the nursing major.

For the undergraduate and graduate prelicensure clinical nursing programs, science courses, which include CHM 101, BIO 201, BIO 202, MIC 205, MIC 206 and HCR 240, must be completed within seven years of the program start date.

Undergraduate and prelicensure graduate nursing courses (prefix: NUR) expire after five years. After course expiration, students must re-enroll in the course and earn a grade of "C" or higher. Students may earn university elective credit for the original course.

Concurrent degrees

Concurrent degrees are multiple degrees with one conferral date. The student receives both degrees at the same time regardless of whether coursework for one degree is completed before coursework for the other degree. To pursue concurrent degrees, students must be in good academic standing.

A student who wishes to pursue a concurrent degree program must submit a request to add the concurrent degree. [12]

The Edson College of Nursing and Health Innovation reviews the student's concurrent degree request. Concurrent degrees may not be from the same discipline or have significant overlap in the courses required for each major.

Specific requirements for students pursuing a prelicensure BSN are listed below.

Both a student's current school and college, and the one offering the degree program being requested must approve the request. Fully approved requests are forwarded to the university registrar for notation on the student's record.

To remove a concurrent degree, the student should email edsoncollege.advising@asu.edu. The email should include the student's full name and ASU ID number and specify the degree that the student wants to remove from the academic record. The student must indicate if they wish to retain any minors they are pursuing.

Prelicensure nursing: Additional courses, concurrent degrees, minors, leaves of absence and study abroad

Additional coursework: Students in the prelicensure nursing programs are not eligible to enroll in additional courses during the program without program approval. Students are not permitted to enroll in additional courses during their first semester in the program, with the exception of honors research or thesis hours. Students may submit a petition with their assigned advisor to request additional courses after they have completed their first semester. A review of the student's academic progress in the program is taken into consideration.

Concurrent degrees and minors: Students in the prelicensure nursing programs may be ineligible for concurrent degrees or minors if the plan includes taking additional coursework during the prelicensure nursing program semesters or if the plan delays graduation from the BSN program. Prelicensure students should consult with their advisor to review their proposed plan of study for a concurrent degree or minor to discuss what might be possible.

Leaves of absence: Students in the prelicensure nursing programs may petition for a leave of absence by meeting with their advisor. Clinical site placement is limited, and leave of absence requests are reviewed carefully. Leaves of absence from a prelicensure nursing program are only considered for students who have successfully completed their first semester in the program and have a detailed justification, with supporting documentation, for the leave. Approvals are not guaranteed.

Study abroad: Students who plan to advance to the prelicensure nursing programs must complete any study abroad experiences before they begin the program or during summers (for programs that do not have summer courses in the plan of study). A study abroad experience is not an approved reason for a leave of absence from the required plan of study once the student has advanced to a prelicensure nursing program. Students also may not postpone BSN graduation for a study abroad experience.

Reinstatement/readmission

Undergraduate students disqualified from ASU must follow the procedures for readmission [13]. Applications for reinstatement and readmission are subject to rigorous requirements that reflect admission and progression standards.

Other special requirements

Special note: The Edson College of Nursing and Health Innovation periodically needs to implement new policies, protocols and procedures to comply with accreditation, regulatory or clinical health care agency requirements; therefore, policies, protocols and procedures with respect to clinical placement are subject to change. Students should confirm current policies, protocols and procedures by referring to the student handbooks. [1]

Professional licensure

The Edson College of Nursing and Health Innovation prepares graduates for excellence upon entering the workplace. Certification and licensure requirements vary by profession and from state to state, and students should review professional licensure information [14] for whether a program meets educational requirements for licensure or certification in a specific state. Students and prospective students are strongly encouraged to contact the state's licensure entity where they intend to practice using the links provided on the professional licensure page and review all licensure and certification requirements imposed by the state of choice.

State authorization

As a participating National Council for State Authorization Reciprocity Agreements institution, Arizona State University is authorized to offer distance education to persons located in individual SARA states in accordance with NC-SARA established policies and standards. SARA has no effect on state professional licensing requirements. ASU may offer academic programs at ASU at Los Angeles that are approved to operate by the California Bureau for Private and Postsecondary Education. To learn more about how ASU is authorized to operate in a specific state, policies for out-of-state students and program exceptions, students should review the ASU state authorization webpage. [15]

Graduate policies

Academic advising

Prospective graduate students may receive information at 602-496-0937 or edsoncollege@asu.edu. Upon admission, each student is assigned an advisor within the degree program.

Handbooks

Students should review the student handbooks [1] for the Edson College of Nursing and Health Innovation for information regarding graduate academic procedures and protocols.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College [16] and the Edson College of Nursing and Health Innovation.

Watts College of Public Service and Community Solutions policies

Watts College of Public Service and Community Solutions believes that students are its greatest resource. The college strives to put the well-being of students at the center of every policy and program. Each student situation is specific, and students are encouraged to work directly with the advising staff to address concerns and issues within the stated policies and procedures.

Academic integrity

Watts College of Public Service and Community Solutions' academic integrity process models the ASU policy and process [1]. Students can find more information about academic integrity at the Public Service and Community Solutions website [2].

Academic grievances

Students who have academic grievance issues should review the college's grievance process [3] for more information on the process, including next steps.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU’s policy ACD 401: Prohibition Against Discrimination, Harassment, and Retaliation. [4]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It webpage. [5]

Undergraduate policies

Academic standing

Students in the Watts College of Public Service and Community Solutions are considered to be in good standing for the purpose of retention if they maintain a cumulative GPA of 2.00 or higher in all courses taken at ASU. Certain majors within Public Service and Community Solutions may require a progressively higher GPA than 2.00 as a student advances toward their degree. These requirements are outlined in those degrees’ curriculum checksheets or major maps.

Changing majors

A student who wishes to change their major to one offered by the Watts College of Public Service and Community Solutions should have a GPA of 2.00 or higher.

Academic warning

Watts College of Public Service and Community Solutions follows the university policy on academic warning [6] for students in their first term of study.

Probation

Any student who does not maintain good standing is placed on academic probation. A student on academic probation is required to observe any limitations or rules the college may impose as a condition for retention.

Disqualification

A student who is on probation becomes disqualified if either of the following occurs:

- The student has not returned to good standing.
- The student has not met the required semester GPA.

Disqualification is exercised at the discretion of the college and becomes effective on the first day of the fall or spring semester following college action. A disqualified student is notified by the college and is not allowed to register for a fall or spring semester at the university until reinstated. A student who is disqualified may not attend as a nondegree student.

Advising

Watts College of Public Service and Community Solutions offers undergraduate academic advising at the West Valley, Downtown Phoenix and Tucson campuses. The mission of the college's professional academic advising staff is to assist students in developing meaningful educational plans for meeting their academic, career and personal goals. This is done through an ongoing process of evaluation and clarification. The advisors strive to perform their duties in a professional, ethical, confidential, accurate and supportive manner, respecting student diversity and needs and always holding the individual in the highest regard. The student and advisor should accomplish this process in a spirit of shared responsibility to help the student develop academic excellence, strong decision-making skills and self-reliance. A student who has been admitted to Watts College works with professional advisors and student services staff with expertise in the student's major area of study. Questions about advising should be directed to the student's advising team or to the Watts College student services office.

Contact information and the college's mission statement can be found on the college's advising page. [7]

Mandatory advising

Students in the following categories are required to receive advising and be cleared by a program advisor before they may register for classes:

- all students majoring in social work
- disqualified students interested in attending ASU
- first-time, first-year students, for both semesters during their first year at ASU
- readmission students [8] interested in returning to ASU
- students on academic probation
- students who are off track according to eAdvisor [9] tracking requirements
- students with admission competency deficiencies
- students with special admission status
- transfer students before enrolling in their first semester at ASU

Credit and registration

Course load

A normal course load per semester is 15 or 16 credit hours. The maximum number of credit hours for which a student can register is 18 (fall or spring semesters) unless an overload petition has been approved by the department or school standards committee and dean or dean's designee.

Semester course loads may be further limited for students in mandatory advising status. Petitions for overload ordinarily are not approved for students who have a cumulative GPA lower than 3.00 and who do not state valid reasons for the need to register for the credits.

Students who register for an excess of 18 credit hours and do not have an approved overload petition on file may have courses randomly removed through an administrative drop action. Specific degree requirements are explained in detail in the respective college, school and department sections.

Withdrawal

Medical or compassionate withdrawal

Medical or compassionate withdrawals may be considered when incompletes or other arrangements with instructors are not available or when restricted withdrawals and other enrollment options are not possible.

To receive a medical or compassionate withdrawal, students must complete these steps:

1. Fill out the medical/compassionate withdrawal form [10].
2. Gather all documentation.
3. Review financial implications [11] and confer with financial aid [12].
4. Fill out the DocuSign form when it is sent out.
5. Email all supporting documentation to publicservicemcw@asu.edu or attach directly to the DocuSign form.
6. Wait 7-10 business days for processing and monitor My ASU for changes.

Watts College of Public Service and Community Solutions allows a maximum of three medical or compassionate withdrawals over the course of a degree program. Multiple requests for the same circumstances using the same documentation will not be approved. For a new request to be considered for the same circumstances, substantial new information or documentation is required.

A medical withdrawal may be requested when extraordinary circumstances, such as a serious illness or injury, prevent the student from continuing classes. This policy covers both physical health and mental health difficulties.

A compassionate withdrawal may be used in extraordinary cases in which a significant personal situation (for example, the serious illness of a child or spouse, or the death of a close family member) prevents a student from continuing in classes.

More information about the required documentation components can be found on the college website. [13]

Degree requirements

Watts College of Public Service and Community Solutions has two college-level graduation requirements for all undergraduate students majoring within the college.

Interdisciplinary public service requirement

The first degree requirement is the interdisciplinary public service requirement. Each student must complete coursework from other schools within the college. Students may choose a core course from their major and two courses from the approved course list for this requirement, in addition to completing ASU 101-CPP The ASU Experience, which must be completed in the first year at ASU; the other courses can be taken while completing the degree. The approved course list for each catalog year is available on the major map or curriculum checksheet. Questions about this requirement should be directed to a Watts College academic advisor. [7]

Solutions-based learning requirement

The second college-level graduation requirement for all undergraduate students majoring within the college is the solution-based learning requirement. Each student must complete coursework from their school or another school within the college that has an SBL designation. Students must choose a course from the SBL list to meet this requirement. The approved course list for each catalog year is available on the major map or curriculum checksheet. Questions about this requirement should be directed to a Watts College academic advisor. [7]

Concurrent degrees

Watts College supports students who wish to pursue concurrent degrees. Students earn a separate diploma for each degree. Degrees may not be too closely related and are reviewed by an academic advisor during the approval process. The structure of a student's academic program is customized to meet degree requirements for both programs of study. Students are encouraged to meet with an academic advisor from each degree to establish a feasible program of study

and to start the concurrent degree approval process. If a student is adding a concurrent major from outside the college, the university approval process [14] must be completed for both Watts College and the college of the other major.

Associate degrees

Students in the Associate of Science programs should refer to their major map or curriculum checksheet and the university associate degree graduation requirements policy [15] for minimum credit hour, GPA and other degree requirements.

Reinstatement/readmission

Students seeking reinstatement after disqualification should contact Watts College of Public Service and Community Solutions student services office regarding procedures and guidance for returning to good standing. When reinstatement includes readmission, application must be made through the ASU readmission process [8]. All academic disciplinary action is the function of the Watts College student services office under the direction of the dean of the college. Students who are having academic problems should contact Watts advising at 602-496-1658 or see the college's academic advising page [7].

Graduate policies

Advising

Advising is usually handled by a professional academic graduate advisor, graduate faculty or a committee. Once admitted, each student is typically assigned an advisor in their degree's department who assists in planning a course of study. For degree programs that require the completion of a thesis or dissertation, a chairperson and thesis or dissertation supervisory committee is selected by the student, approved by their degree program's director of graduate studies, and appointed by the dean of the Graduate College. Each graduate degree program in Watts College of Public Service and Community Solutions has its own set of policies regarding academic performance expectations. Students should contact their graduate advisor to review policies relevant to their degree.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College [16] and Watts College.

Mary Lou Fulton College for Teaching and Learning Innovation policies

ASU's Mary Lou Fulton College for Teaching and Learning Innovation creates knowledge, mobilizes people and takes action to improve education. Faculty create knowledge by drawing from a wide variety of academic disciplines to gain insight into important questions about the quality of teaching and learning, and the performance of education systems. The college mobilizes people through bachelor's, master's and doctoral degree programs; through nondegree professional development programs; and through socially embedded, multilateral community engagement. MLFC takes action by bringing people and ideas together to increase the innovation capabilities of individual educators, schools and organizations, districts and communities.

MLFC embraces a core value of Principled Innovation® by holding itself accountable to three imperatives:

Economic imperative: To prepare learners for the next economy.

Democratic imperative: To prepare students to become part of an educated citizenry capable of assuming the responsibilities of self-government and of participating in a thriving civil society.

Equity imperative: To deliver equitable and excellent education to all learners.

For more information, students should visit the Mary Lou Fulton College for Teaching and Learning Innovation website. [1]

Academic integrity

No matter the stage of educational or professional career pursuits, acting with integrity is a cornerstone of leadership and good citizenship. Integrity is a character-driven commitment to honesty, acting in accordance with professional ethical behavior, and guiding others to do what is right. Arizona State University students are expected to act with integrity in their educational pursuits.

Violations of academic integrity fall into five broad areas:

1. cheating on an academic evaluation or assignment
2. plagiarizing
3. engaging in academic deceit, such as fabricating data or information
4. aiding others in academic integrity policy violations or inappropriately collaborating
5. falsifying academic records

At ASU, academic integrity is expected of all students in all examinations, papers, projects, academic transactions and records, including student and apprentice teaching reporting. The possible sanctions include appropriate grade penalties, loss of registration privileges, disqualification and dismissal. ASU strictly adheres to the student academic integrity policy. [2]

The academic integrity officer [3] handles all questions and concerns related to academic integrity violations in the Mary Lou Fulton College for Teaching and Learning Innovation. Both students and faculty can contact the academic integrity officer to report an academic integrity violation or to ask questions related to academic integrity policies and procedures.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [4]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to

both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [5]

Satisfactory academic progress and professional conduct policy

To remain in good standing in Mary Lou Fulton College for Teaching and Learning Innovation, students must maintain satisfactory academic progress consisting of both standards of academic performance and adherence to the Teachers College Professional Disposition Standards, as described in this policy. This document sets forth the standards and expectations for satisfactory academic progress and good standing, and explains the consequences of failure to meet these standards. This policy applies to undergraduate students and graduate students in MLFC.

In addition to adhering to the policies stated herein, students are expected to abide by applicable university and Arizona Board of Regents policies, including the Student Code of Conduct [6], the ASU academic integrity policy [2] and ASU Graduate College policies and procedures [7] (for graduate students), as well as all policies, procedures, rules, regulations and requirements established by the local education agency, school district and school in which they are engaged in field experience or student teaching (for certification students). Consequences for the failure to do so may include dismissal from the program and expulsion from the university. Graduate students should also refer to the ASU Graduate College website [8] for further information about Graduate College policies.

Section I: MLFC standards of academic performance

A. Satisfactory academic progress

Advisors conduct ongoing reviews of students' academic performance to determine retention and continuation status. Students with records that contain indicators of academic concerns may be placed on academic probation or may be dismissed (permanently removed) from their programs or the college. (Graduate students should refer to ASU Graduate College policies.)

To meet satisfactory academic requirements, all MLFC students must:

1. Maintain minimum GPA as follows:
    - Undergraduate students must maintain an overall cumulative GPA of 2.00 or higher.
    - Graduate students must maintain at least a 3.00 on the following three GPAs every semester:
        - Plan of study GPA. The plan of study GPA is calculated on all courses that appear on the student's approved iPOS.
        - Overall graduate GPA. The overall graduate GPA is calculated on all courses numbered 500 or higher that appear on the transcript, except courses that counted toward an undergraduate degree at ASU (unless shared with a master's degree in an approved bachelor's/master's degree program) and courses identified as outstanding in the original letter of admission.
        - Cumulative GPA. The cumulative GPA represents all courses completed at ASU during each graduate career.
2. Achieve specific course grades as outlined below:
    - Undergraduate students should refer to their major map or curriculum checksheet, which outlines courses that require a minimum "C" grade.
    - Master's degree and graduate certificate students must earn a grade of "B" or higher in culminating experience courses (applied project, thesis, capstone, etc.)
    - Doctoral students carrying more than three credits of "I" grades are considered as not making satisfactory academic progress.
3. Pass all required upper division professional experiences, including traditional and job-embedded internships (to include internships embedded in courses), and student teaching with a grade of "C" or higher.
4. Maintain good standing as outlined in the Standards for Professional Disposition section.
    - Students who violate professional responsibilities may be placed on college academic probation or suspension, or they may be recommended for dismissal.
5. Graduate students must remain continuously enrolled in their graduate program. Failing to do so without a Graduate College-approved leave of absence is considered lack of academic progress and may result in the

Graduate College withdrawing students from the program. See the complete Graduate College leave of absence policy for more details.
    - Students may maintain continuous enrollment through any of the Graduate College-approved methods. However, multiple semesters of enrollment in continuing registration (595, 695, 795) may be considered lack of academic progress.
    - Repeated medical or compassionate withdrawals, or any pattern of enrollment that results in a student not making meaningful academic progress toward degree completion across multiple terms, may also be considered a lack of academic progress, which can result in academic probation or recommendation for dismissal.
6. Doctoral students must pass comprehensive exams by the end of the sixth academic-year semester of enrollment; pass a proposal defense by the end of the seventh academic-year semester of enrollment; and pass a dissertation final defense by the end of the 11th academic-year semester of enrollment. An academic-year semester is defined as each spring or fall semester starting from the term of first enrollment.
7. All graduate students must satisfy the maximum time limit for graduation for the student's graduate program (six years for master's degrees and certificates, 10 years for doctoral degree); more information is available in the Time Limit section of the Graduate College Policy Manual.
    - Students who are in danger of not meeting the maximum time limit for degree completion are considered not meeting satisfactory academic progress and may be placed on academic probation.

The following applies to students enrolled in accelerated bachelor's to master's degree programs:

Students enrolled in a Bachelor of Arts in Education or Bachelor of Applied Science to master's degree program, also known as an accelerated master's program, are considered undergraduate students until all undergraduate requirements have been met. Undergraduate students enrolled in the accelerated master's program are eligible to enroll in graduate-level courses and seminars. However, they are not eligible for most graduate prerequisites, including teaching and research assistantships and related health insurance, financial aid or graduate award programs until the undergraduate degree is completed.

Students are reviewed on an ongoing basis to ensure academic progress in bachelor's and master's degree requirements. Students enrolled in an accelerated master's degree program must meet the following requirements, in addition to the requirements outlined above for undergraduate and graduate students:

- Undergraduate students in an accelerated master's program before the awarding of their undergraduate degree must complete all their bachelor's degree requirements and graduate with their undergraduate degree within 12 months of the first day of the semester for which they were admitted to the accelerated program.
- Undergraduate students must maintain a 3.00 cumulative GPA from the time they apply to the program (at 75 credit hours completed in the BAE or BAS degree) to the time they begin taking graduate courses (at 90 credit hours completed in the BAE or BAS degree). A student must continue to maintain a GPA of 3.00 in all coursework. If a student's GPA drops below 3.00 between the time they are admitted to the accelerated master's program and the time they begin their coursework, their admission to the accelerated program may be revoked.
- If the student's GPA drops below the 3.00 requirement once they have started the accelerated master's program, the student falls under the policy for graduate students. The student is allowed to complete their undergraduate degree but is no longer be able to complete the graduate degree as part of the accelerated program.

B. Unsatisfactory academic progress

Undergraduate students

Academic warning is imposed for any student who does not achieve the minimum GPA standard at the completion of the first term of study. If, after one term with an academic warning, a student still does not achieve the minimum GPA standard, they are placed on probation for at least one additional term. If a student's minimum GPA first falls below the standard in a term that is not the student's first term at ASU, they are placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

A student with an academic warning or on academic probation is considered in conditional good standing and is permitted to enroll.

A student who has received an academic warning or is on probation must meet with an academic success advisor to discuss academic success strategies for the subsequent semester and develop a success plan for returning to university academic good standing. That plan may require successful completion of the academic refresher course UNI 220 Mindset Connections.

College academic probation is imposed if an undergraduate student has a cumulative GPA below 2.00. An undergraduate student placed on college academic probation is required to meet with an academic advisor.

College academic suspension is imposed after an undergraduate educator preparation student has been on college academic probation (a cumulative GPA below 2.00) for two consecutive semesters. An undergraduate student placed on college academic suspension may not progress to the next term until deficiencies have been resolved. Students on college academic suspension are required to meet with an academic advisor to develop a support plan. Failure to do so may result in withdrawal from all MLFC courses for the subsequent term.

Graduate students

Students should carefully review ASU Graduate College policies [9], which apply in addition to the college policies. Students should pay special attention to the policies regarding GPA, time limit for degree completion, requirements for culminating experience courses, and continuous enrollment.

Deficiencies for graduate students include:

1. Plan of study GPA below 3.00.
2. Overall graduate GPA below 3.00.
3. Cumulative GPA below 3.00.
4. Earning a grade below "C" in any required course. Students must repeat the course in the next semester or session it is offered and earn a grade of "C" or higher.
5. Earning a grade below "B" in a culminating experience (applied project, capstone, thesis, etc.). Students must repeat the course in the next semester it is offered and earn a "B" or higher.
6. Failure to achieve a "C" or higher on the second attempt may result in recommendation for dismissal from the program.
7. Earning a grade of "I" or "W" in a required course or carrying more than three credits of "I" for students in doctoral programs.

Graduate students who are placed on academic probation may not be permitted to complete culminating experiences (applied project, etc.) until they return to good standing. Doctoral students must be in good academic standing to complete comprehensive exams or to schedule oral defenses.

Note: Students may not be approved for traditional, apprentice or job-embedded student teaching if they are on academic probation or academic suspension.

Professional experience deficiencies — undergraduate and graduate students

The following policies apply to both undergraduate and graduate students enrolled in initial teacher certification or administrator certification programs. Professional experiences refers to internships, courses with embedded internships (clinically embedded courses), student teaching and apprentice teaching.

1. A student who fails a professional experience for reasons other than a placement release may be allowed to retake the professional experience one time if the reasons for failure are determined by college leadership to be remediable. If a student is permitted to retake the professional experience and fails to pass the second time, they may be dismissed from the teacher or administrator certification program. Students should note: If a student is removed or released from a professional experience placement (e.g., internship or student teaching), opportunities for re-placement in another school or district may be contingent on the timing within the academic semester and the availability of appropriate partner sites. While MLFC makes every effort to facilitate a timely re-placement when warranted, options may be limited or unavailable depending on how far the semester has progressed. In such cases, the student may be required to defer their professional experience to a future term in order to meet all certification and program requirements.

2. A student who withdraws from a professional experience for reasons other than an approved medical or compassionate withdrawal is required to meet with an academic advisor to develop a support plan. Repeated withdrawals from a professional experience may result in a recommendation for dismissal from the program.

3. In some cases, concerns occurring in the field may be untenable. These may include actions that cause the sponsoring school district or other organization to request a placement release or termination from a professional experience. Reasons include violations of professional disposition standards, violations of ASU code of conduct, district policy, or state or federal law, or other behavior deemed inappropriate. The associate directors of educator preparation determine, based on information from the faculty supervisor, the mentor teacher, the school district, other sponsoring organization and the student, whether the student's actions warrant immediate dismissal from the teacher or administrator certification program without benefit of a period of college academic probation, or the student should be given another attempt to pass.

4. A student whose paid professional experience placement is terminated by the school district for reasons unrelated to performance, such as reductions in force, is not be recommended for college academic probation or involuntary withdrawal on that basis alone. However, if the student does not secure another full-time teaching position, they must complete the degree and certification requirements by transferring to a traditional certification pathway and successfully completing the requirements of that program. Professional experience coursework completed in the alternative pathway before loss of employment may apply to the traditional pathway with approval of the program.

5. Students enrolled in a course with an embedded internship (clinically embedded course) who do not successfully complete the internship component are not eligible to pass the course.

6. Students must adhere to the deadlines for professional experience placements, to include the following. (a) The priority placement deadline to complete the Placement Request Form for clinically embedded courses or internship courses is four weeks after the start of the semester for the following semester's placement. (b) The absolute deadline for enrollment in a clinically embedded course or internship and completion of the Placement Request Form is four weeks before the start of the semester. Students who miss this deadline but enroll in a professional field experience course are administratively withdrawn from their course. (c) The absolute deadline for enrollment in student teaching or apprentice teaching and completion of the Placement Request Form is six weeks after the start of the semester for the following semester's placement.

7. All students in certification programs, regardless of location, must have an Identity Verified Prints fingerprint clearance card on file to register for a professional field experience course (internship, student teaching and apprentice teaching). Registration permission is not granted until advising has received a copy (front and back) of the current IVP card. Students may submit a petition requesting to override this requirement if they believe they have extenuating circumstances.

8. Students who are outside of Arizona and who are not able to be placed may face delays in their program's progression or may have to relocate to Arizona to fulfill their professional field experience requirement.

9. Student teachers are required to arrive at least 30 minutes before the school day begins, stay at least 30 minutes after the school day ends, and attend all commitments expected of a teacher (staff, parent and grade level collaboration meetings, etc.), including attending professional development during early release days.

Note: Students enrolled in Applied Behavior Analysis Practicum (SPE 580) must follow the policies and procedures found in the ABA Practicum Handbook provided as part of the course.

C. Reinstatement to good academic standing

To be restored to good academic standing:

1. A student must improve GPA and course grades to meet the academic performance requirements. Graduate students must meet the academic performance requirements of MLFC and academic progress requirements outlined by the Graduate College.

2. Students must meet the expectations of any Professional Improvement Plan related to satisfactory academic progress or professionalism while in the program.
3. Graduate students must meet satisfactory academic progress requirements as stated by the Graduate College.

Note: A student on college academic probation or college academic suspension for lack of satisfactory progress in one area (e.g., academic progress or professional responsibilities) who subsequently fails to maintain good standing in the other area will be recommended for dismissal. Return to good standing requires satisfactory progress in both areas during the time on probation. Sequential semesters of probation for repeated failures to maintain satisfactory progress are not considered.

Section II: MLFC standards for professional disposition

The professional dispositions are the essence of the ideal of educator professionalism. These dispositions are pieces of individuals that contribute to the moral and ethical decision-making — the practical wisdom — necessary to uphold policies, laws and regulations that are relevant to professional educator conduct, as well to navigate moral dilemmas that arise in education that have no clear, right answer and cannot be solved by simple adherence to policies and procedures. These educator dispositions also guide the personal and professional practices that support the well-being of learners, colleagues and educators.

As professional educators, Mary Lou Fulton College for Teaching and Learning Innovation is committed to developing and demonstrating these dispositions through the eight practices of Principled Innovation® [10]. MLFC embraces Principled Innovation® as its core value. It informs how the school does everything, in areas as diverse as navigating large-scale systems change and the everyday decisions that affect the lives and learning of other people. The moral, civic, intellectual and performance dispositions at the heart of Principled Innovation®, also referred to as character assets [10], are the essence of the ideal of educator professionalism.

A. These professional dispositions are assessed by faculty, staff, cooperating teachers, school districts and community partners.

All MLFC students are expected to demonstrate the following:

Disposition 1: Demonstrating professional practice and demeanor

Evidenced by:

1. knowing and upholding the policies, laws and regulations relevant to professional educator conduct in the classroom, in the field and in the profession, regardless of one's personal views
2. adhering to the ASU Student Code of Conduct
3. monitoring and maintaining sound mental, physical and emotional health necessary to perform duties and services in any professional environment and taking appropriate measures when personal- or health-related issues may interfere with work- or program-related duties and responsibilities
4. refraining from professional or personal activity that may lead to reducing one's effectiveness in the classroom or community
5. taking responsibility and credit only for work actually performed or produced and acknowledging work and contributions made by others
6. appropriately recognizing others' work by citing data or materials from published, unpublished or electronic sources when disseminating information

Disposition 2: Receive and act upon professional feedback

Evidenced by:

1. reflecting upon and assessing one's professional skills, content knowledge and competency on an ongoing basis
2. accepting the responsibilities, performing duties and providing services corresponding to the area of certification, licensure and training of one's position
3. using the ethical code of conduct specific to one's discipline to guide and frame educational decision-making
4. conducting research in an ethical and responsible manner with appropriate permission and supervision

Disposition 3: Communicate and collaborate with others in a positive and professional manner

Evidenced by:

1. respecting the dignity, worth and uniqueness of each individual, including actual and perceived gender, gender expression, gender identity, civil status, family status, sexual orientation, religion, age, disability, race, ethnicity, socioeconomic status and culture
2. engaging in professional communication with others in a clear, respectful and culturally sensitive manner in physical or virtual spaces
3. using technology — including social media — responsibly, transparently and primarily for purposes of teaching and learning per school and district policy and considering the ramifications of using social media and indirect communication via technology on one's interactions with students, colleagues and the general public
4. establishing and maintaining an environment that promotes the emotional, intellectual and physical safety of all students

Note: This is not an exhaustive list of all of the professional dispositions required of educators, and not all examples are included.

Key terminology

Term	Definition	Highlights in practice
Civility [11]	Treating others with sincere respect and as members of a shared community, including those who may challenge beliefs or opinions.	• creating inclusive environments where people can voice a variety of opinions • talking to people with differing opinions, even when it is challenging or uncomfortable • staying engaged through difficult conversations to create deeper understanding
Collaboration [12]	The act of working together toward a common goal.	• creating a sense of psychological safety to engage a diverse set of perspectives • developing shared goals and working together to overcome obstacles and setbacks • reflecting in a group setting to learn more from shared experiences
Critical thinking [13]	The process of refining beliefs through analysis, interpretation of evidence, inference, explanation, self-regulation, open-mindedness and problem-solving.	• analyzing and assessing personal beliefs and those of others • exploring and evaluating new information, perspectives and ideas • being open to changing opinions in response to new or conflicting information
Fairness [14]	The equitable, just and reasonable treatment of others according to their needs.	• creating solutions that result in equitable and just outcomes • considering how decisions and actions affect a wide variety of people • seeking to understand a community's values around what fairness looks like

Term	Definition	Highlights in practice
Honesty [15]	Being open, trustworthy and truthful in a sincere and straightforward way.	• gaining clarity on issues that might be hard to consider or hear • saying what needs to be said by communicating with empathy, civility and courage • seeking to understand others' perspectives and being willing to admit when someone is wrong
Humility [16]	Being honest with ourselves about what we can offer, acknowledging that there's always more to learn, and having a genuine desire to advance the best interests of the community.	• using self-reflection and honesty to accept strengths and weaknesses • recognizing the limits of knowledge and being willing to change our minds • being open to new ideas, information and creative approaches
Inclusivity [17]	Seeking to create environments that respect, bring together and build upon the multiple perspectives, lifestyles and experiences of each member of the community.	• actively creating environments where all voices are welcome and heard • building understanding of challenges by listening to a diverse set of perspectives • generating more creative ideas by drawing on different and even conflicting opinions
Perspective taking [18]	The ability to take on another's point of view to better understand how they think or feel, and consider options that may have initially been missed due to personal positionality.	• learning about others' experiences and points of view through dialogue and engagement • seeking out a variety of perspectives to gain new knowledge and understand challenges • navigating differences and developing solutions based on deeper understandings
Reflection [19]	Making the time and space to process thoughts, feelings and experiences in order to take meaningful action moving forward.	• learning from personal experiences by thinking about what happened and why • being humble and honest enough to face one's own shortcomings • reflecting with others to gain more perspectives, deepen learning and amplify impact
Truth-seeking [20]	Rigorously pursuing the information needed to better understand the world and then using that information in an honest, fair and empathetic manner.	• critically assessing the quality and source of data • staying open to new information by recognizing the limits of knowledge • pursuing accurate information to address critical social and systemic challenges

More information about the Principled Innovation® assets can be found on the How PI works website [10].

B. Violations of MLFC professional disposition standards

Students are informed of and have an opportunity to respond to an allegation of a violation of, or behavior inconsistent with, the Professional Disposition Standards. As a general rule, the college seeks to assist students to become professionals by working with them to develop and improve professional conduct. Students accused of violating or not acting in accordance with the Professional Disposition Standards attend a meeting with college leadership to discuss the allegations. Possible sanctions include college academic probation, suspension, disqualification or dismissal from the program.

Following are the steps taken in the referral process for a violation of MLFC professional disposition standards.

1. The instructor, faculty supervisor or other university representative discusses concerns with the student and informs the student that a referral will be submitted to college leadership. Depending on the nature of the referral, the student may be required to attend a meeting with college leadership.
2. If the referral is made for a violation of MLFC professional disposition standards, the student must attend a meeting to discuss the alleged violations. This meeting provides the student with an opportunity to share their side of the situation. At the meeting, a professional improvement plan agreement is developed with input from the student and college administration. Students on a PIP are placed on a probationary status in the college until requirements of the PIP are met.
3. Students may be required to attend a follow-up meeting to discuss their status in meeting requirements outlined in their plan. Failure to attend a required meeting or fulfill expectations outlined in the PIP agreement may result in program dismissal.

C. Release from professional experiences (traditional or job-embedded internship or student teaching)

In the event a school district or community partner requests that a student be released from professional experience placement for unprofessional or inappropriate behavior, the intern, apprentice or student teacher is required to attend a meeting with college leadership to discuss the concerns submitted by the school district or community partner representative. The student receives a copy of the release recommendation before the meeting with college leadership. During the release meeting, the student has the opportunity to share their perspective and provide details, evidence or other supporting documentation to explain the situation from their perspective.

Students who are employed by the local education agency or community partner should report their placement release to their direct supervisor at the local education agency (usually the school principal or HR director) or community partner (often the director). Continued employment after a placement release is a decision of the local education agency or community partner. If a student is released from their paid placement, their employment with the local education agency or community partner may be terminated by the agency. Decisions related to employment are not made by MLFC.

After meeting with MLFC leadership to discuss the circumstances leading to the placement release, the student has the option to appeal the release to the associate director of educator preparation. If it is determined that the allegations of a violation of unprofessional behavior resulting in the request for release from the placement site are warranted, one or more of the following actions may result. The intern or student teacher:

- is formally removed from the internship or student teaching placement.
- receives a failing grade ("E") for the internship or student teaching course.
- may not withdraw from the internship or professional experience course or student teaching course. If a withdrawal is processed by the Office of the Registrar, the grade is administratively changed to an "E."
- is not assigned another internship or student teaching placement during the same semester.
- must withdraw from all courses that require concurrent enrollment with a professional experience course.

If a student intends to repeat the internship, apprentice teaching or student teaching course during the semester following the release, they must show evidence of how they plan to resolve the situation or circumstances that resulted in their removal from the internship or student teaching placement. The student is required to meet with MLFC leadership to develop a PIP outlining expectations for continued professional growth and academic development.

If the student violates the rules, policies or procedures for conduct established by the school, district, local education agency, ASU, MLFC or the law, the intern, apprentice teacher, student teacher or administrator candidate is dismissed from the program. Students who are dismissed may not continue in a certification pathway but may be eligible to pursue other, non-certification degree options within MLFC or within other colleges at ASU.

Students who opt to remain in the non-certification pathway are required to adhere to the same professionalism standards as students enrolled in certification programs. Failure to adhere to these standards results in dismissal from the college and possible sanctions from the university.

Section III: Initial teacher and administrator certification policies

The following policies apply to students enrolled in initial teacher certification or administrator certification programs. Undergraduate students in initial teacher preparation programs are required to earn a minimum of 30 upper-division credit hours in their education major to meet the resident credit requirement at ASU.

Undergraduate students may not change their campus affiliation in their final semester if they are completing a student teaching experience. The modality and campus location used in term seven must remain consistent through term eight.

To be eligible to progress to student teaching, a student must be in good academic and professional standing. Students who have academic or professional experience deficiencies as outlined above are not approved to participate in student teaching until the deficiencies are addressed. For undergraduate students, this includes all courses that appear on the curriculum checksheet. For graduate students, this includes all requirements that appear on the program and plan of study.

Undergraduate students are permitted to take one course concurrently with student teaching as long as the course does not conflict with student teaching requirements. Students who wish to take more than one course concurrently with student teaching must submit a petition for review by the Office of Academic and Career Success. The course must be offered in the evening or online and not conflict with student teaching contracted hours.

Professional experience placements must be appropriate for the certification that the student is seeking for the greater part of their instructional schedule.

Essential functions of professional experiences

As a credentialing institution of the State of Arizona, the college's mission is to prepare teachers for service in P-12 school settings. Students are required to complete multiple professional experiences (internships, apprentice teaching and student teaching) in which they must be able to perform the essential functions of teaching. The essential functions include physical capacity, cognitive flexibility and communication. The ability to perform these essential functions is required for successful completion of the educator preparation program. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform these essential functions.

Teaching is a demanding profession, requiring a great deal of physical, mental and emotional stamina in which the safety and well-being of children and youth are paramount. Interns, apprentice teachers and student teachers spend the majority of their days standing while interacting with P-12 students in the classroom and other areas of the school grounds. Escorting students from one classroom to another and maneuvering through tight spaces between desks or other classroom furniture is commonplace. In early childhood and elementary settings, it is necessary to circulate and move quickly along uneven surfaces on the playground. Student teachers may also be required to monitor and assist students when they arrive at and depart from school at bus or parent pick-up locations. Playground and bus duties can require teachers to spend time outdoors in extreme heat during Arizona summers or extreme cold during winters elsewhere. Working with P-12 students also entails kneeling or squatting, stooping and bending from 50 to 70 degrees at the waist frequently throughout the day. Reaching at, below or above shoulder height to write on the chalkboard or whiteboard and using technology and audiovisual equipment require significant manual dexterity. Occasionally, interns, apprentice teachers and student teachers are required to lift or move up to 30 pounds. These physical requirements enable the effective intern, apprentice teacher or student teacher to engage students in activities and materials that challenge and sustain students' attention during instruction.

The cognitive demands of professional experiences require that interns, apprentice teachers and student teachers master relevant content in all subjects taught in the assigned classroom, use personal modeling to demonstrate performance expectations with precise and correct command of the English language, provide oral and written feedback that is academically focused, frequent and of high quality, and use content-specific instructional strategies that enhance student content knowledge. Students must also be able to provide differentiated instruction to ensure that all children have the opportunity to master what is being taught. In addition, they must maintain emotional control under stress and establish rules for learning and behavior both inside the classroom and on all other areas of the school grounds by monitoring student safety and behavior. Students are evaluated using a performance assessment instrument across the essential functions of teaching. The instrument can be accessed in the Professional Experiences Handbook located in the course documents.

The physical, cognitive and communicative demands described here are representative of those that must be met by students to successfully perform the essential functions of their assigned professional experiences.

Students on an Alternative Teaching or Teaching Intern certificate

The teaching position may require that the student hold an Alternative Teaching or Teaching Intern certificate; however, not all teaching positions require students to hold a certificate and may vary by state. The Alternative Teaching or Teaching Intern certificate requires MLFC to certify to the Arizona Department of Education that the student is enrolled in an educator preparation program and in good academic standing. The Alternative Teaching or Teaching Intern certificate is valid for two years. If a third year is required for program completion, the certificate must be renewed with Arizona Department of Education. At the completion of the second year, only students in good academic standing are eligible for an Institutional Recommendation to obtain a standard teaching certificate. Out-of-state students need appropriate certification in their state, if required.

A student on an Alternative Teaching or Teaching Intern certificate who ceases to be eligible for their certificate can no longer continue in the alternative pathway to teacher certification program. The student may be allowed to complete the degree and certification requirements by enrolling in the traditional pathway. More information is available from the Office of Academic and Career Success.

Note: Because of the intensity of program coursework and job-embedded student teaching, students participating in an alternative pathway are not permitted to enroll in courses outside of the prescribed program of study without approval from the program. Students who wish to concurrently enroll in a graduate certificate or degree program should work with their advisor to complete a petition, which is reviewed on a case-by-case basis by the program and may require approval from MLFC leadership.

Completion of the applied project

As a part degree requirements, all students in a master’s degree program must complete an applied project course (Secondary: SED 593, Special Education: SPE 593, Elementary Education: EED 593, Early Childhood: ECD 593 or Early Childhood Special Education: ECS 593). The applied project, which serves as the graduate capstone experience, is designed to synthesize and showcase the knowledge and skills students have developed throughout the program.. As a part of this course, students begin by formulating a topic that they will research. A grade of "B" or higher is required to pass the course and graduate from the master’s degree program.

Section IV: Student support policies and procedures

A. Supporting Our Students (SOS)

Students enrolled in an MLFC program are provided individualized support and feedback from course and field instructors. In addition, MLFC’s Office of Academic and Career Success provides a tier-based ecosystem of integrated and holistic support for student growth and learning outcomes throughout the program.

If, at any time, a student is in need of additional support, a faculty member, faculty supervisor, mentor teacher, academic advisor or other representative can submit an SOS form. Students can also submit an SOS for themselves if they have a

concern or are in need of assistance. Areas of support include financial assistance, wellness coaching, academic support, job-seeking skills and professionalism.

When an SOS is submitted, it is triaged by the Coordinated Care Team. Depending on the type of support needed, the student is invited to meet with members of the success team. During the meeting, the student is provided with an opportunity to share their perspective with a student advocate, be connected to resources, and participate in the development of a support plan.

B. Pregnancy leave policy

MLFC is committed to ensuring that all students who are pregnant or are experiencing medical challenges due to pregnancy or childbirth are able to continue in the programs. To receive support and accommodations due to pregnancy-related needs, students should register with Student Accessibility and Inclusive Learning Services. [21]

Students requesting services because of pregnancy should be prepared to submit documentation regarding the pregnancy and any complications, and clearance to return to school-related activities. Students may refer to the following ASU policy for additional information: 701–10: Accommodations and Services for Pregnant Students. [22]

C. Accommodations

MLFC is committed to student success and ensures an inclusive learning environment for all students. Students with disabilities or disabling health conditions who need accommodations are required to document their condition with Student Accessibility and Inclusive Learning Services, also known as SAILS. MLFC encourages admitted students with disabilities or disabling health conditions who believe they may need accommodations to register with SAILS before enrolling in the program so that all reasonable accommodations can be in place at the beginning of the program. Students who are registered with SAILS are key participants in establishing reasonable and appropriate accommodations with course instructors. Students must re-register with SAILS every semester for which they would like to receive accommodations.

D. Incomplete grade requests

The grade of “I” (Incomplete) can only be given by an instructor when a student who is doing otherwise acceptable work is unable to complete a course (e.g., final exam or term paper) because of illness or other conditions beyond the student’s control. Unfinished work must be completed with the same instructor except under extenuating circumstances. The completion date is determined by the instructor but may not exceed one calendar year from the date the mark of “I” is recorded.

To request an incomplete in a course, a student must first obtain approval from their instructor and submit an incomplete request form, including a deadline for coursework to be completed. The incomplete request is then routed to the vice dean or their designee for review and final approval. Approval of the request is at the discretion of the vice dean or designee, and the approval process may include modification of the deadline or a request for additional details. Students who fail to complete the course by the agreed-upon deadline receive the grade specified in the incomplete request. In accordance with ASU’s grades and grading policies [23], incomplete deadlines may never exceed one year from the date the incomplete grade was issued.

Section V: MLFC appeal policies and procedures

Academic probation

There is no appeal from the action of being placed on probation. Probation provides warning to the student of the potential for academic suspension or dismissal.

Grade appeal procedure

For a student to receive consideration, grade appeals must be submitted to the course instructor within 10 business days of the last date for posting final grades, as noted in the academic calendar. [24]

Official course grades are listed on My ASU via the student's transcript. Students should check their transcripts regularly following the grade posting date for each term. If there is a discrepancy between the final grade noted in the transcript and the grade the student expected to receive based on the Canvas gradebook, students must contact the instructor within 10 business days of the last date for posting final grades and may then follow the appeal process outlined below.

Reasons for grade appeal: A student may appeal a grade only when they can document that one or a combination of the following has occurred:

- The instructor erred in calculating points or acknowledging timely submission of assignments.
- The instructor did not apply grading standards equitably (that is, there is evidence of bias, for example, due to race, age, sex, religion or national origin).
- The instructor did not assign grades consistently with the standards and procedures for evaluation announced at the beginning of the course in the course syllabus. The instructor may amend or supplement the standards and procedures during the course by providing written or oral notice to the entire class.

Step 1: Informal meeting with instructor

This step is mandatory and applies to appeal of course grades only.

1. The student must contact the instructor of the course and submit the grade appeal (PDF) [25]. The student must provide to the instructor any additional relevant documentation to support the appeal and reasons for disputing the grade. The narrative accompanying the grade appeal form may not exceed five pages, double-spaced.
2. The student must meet with the instructor either face-to-face or, in the case of online classes only, virtually. If this meeting does not resolve the grievance, the student may move to step 2 and submit the grade appeal form to the appropriate Office of Academic and Career Success contact.

Note: If the required meeting with the instructor has not taken place, the appeal is accepted only if the student supplies evidence that they contacted the instructor and (a) have received no reply for five business days, or (b) have been unable to schedule a meeting within 10 business days of the date of contact. If the student does not receive a response from the course instructor within five business days, the student should move the appeal to step 2. Appeals received after 10 business days are not accepted.

Step 2: Submit grievance to Office of Academic and Career Success

If the grievance is not resolved in step 1, the student may forward the grade appeal [26] to the executive director of academic and career success.

Step 3: Vice dean or appointed designee reviews grade appeal

The executive director of academic and career success reviews the grade appeal and may request additional information, if needed. The grade appeal is forwarded to the vice dean for review. The vice dean reviews all information and notifies the student of the outcome.

Step 4: Appeal decision to the dean (Student Issues Committee)

- Per university policy, if not satisfied with the outcome, the student may appeal the vice dean's decision to the dean, whose decision is final. The student must appeal within 10 business days of receiving the vice dean's decision.
- To submit an appeal to the Student Issues Committee, the student must forward the original appeal and the vice dean's response to the director of academic operations, who begins the appeal process with the committee.
- Only the issue appealed to the vice dean may be appealed; no new issues or complaints may be added.
- The student has the option to request to appeal before the committee.
- The Student Issues Committee makes a recommendation to the dean. The dean's decision is final.
- The student is notified by email of the outcome.

It is university policy that students filing grievances and those who are witnesses be protected from retaliation. Students who believe they are victims of retaliation should immediately contact the dean of the college in which the course is offered.

For more information on university grading policies, students can reference the university grade appeal policy [27]. During the time of the appeal, a student may register for courses; however, if the appeal is denied and the student is withdrawn, university policies on tuition refunds are applied. Any concerns about tuition charges should be addressed to Student Business Services.

Graduate students — appealing a recommendation for dismissal from the program

The ASU Graduate College admits students to graduate study at ASU. Students who fail to make satisfactory academic progress may be involuntarily withdrawn (dismissed) from their academic programs by the ASU Graduate College upon the recommendation of the college. The student has the right to appeal a recommendation for dismissal.

Steps in the dismissal process:

1. The advisor sends an informal notice of dismissal recommendation to the student. The student has 10 days to respond to the notice and provide any supporting documentation for review and reconsideration of the dismissal recommendation.
2. The student receives formal notice from the executive director of academic services that a recommendation for dismissal from the program is being made to the ASU Graduate College.
3. Within 10 business days of receiving this notice, the student may appeal in writing to the appropriate vice dean in MLFC.
4. If the appeal is denied by the vice dean, the student may continue the appeal process to the MLFC Student Issues Committee (dean's designee). Appeal materials can be sent to the director of academic operations. Failure to file the appeal within 10 business days of the date of notification results in an automatic denial of the appeal.
5. If the appeal is denied by the Student Issues Committee (MLFC dean), the dismissal recommendation is forwarded to the Graduate College for final review and recommendation.

Appendix A: Definition of terms

ASU Graduate College: The academic organization within ASU that oversees all graduate study in every college; it has the authority to admit and involuntarily withdraw (dismiss) graduate students. The college recommends the actions, but it is the vice provost for the Graduate College who holds the ultimate authority.

College academic probation: Status assigned to a student who has failed to maintain satisfactory academic progress; also referred to as "not in good academic standing." A student placed on college academic probation is informed of the areas in which program standards are not being met and the actions the student must take to be removed from college academic probation and restored to good standing. A student who fails to meet the conditions for reinstatement to good standing may be recommended for dismissal from the program.

A student placed on college academic probation is permitted to progress to the next term (unless the next term includes student teaching) while addressing the deficiency. If a student is placed on college academic probation and the next term requires student teaching, they must meet with their advisor to discuss options for the semester.

College academic suspension: An undergraduate student placed on college academic suspension may not progress to the next term until all deficiencies have been resolved. Students are required to complete their deficiencies within one calendar year. Failure to do so results in dismissal from the program.

Cumulative GPA: Grade point average that represents all courses completed at ASU.

Deficiency: A required course or other program criterion that has not been met or was not successfully completed. This term refers to coursework and GPA criteria.

Dismissal: Administrative removal from the program or college.

An undergraduate student who has been dismissed from MLFC is not allowed to enroll in further teacher or administrator certification program courses for a minimum of one semester. When the student is notified of the dismissal, they must participate in the development of a PIP. The student's current and future status is determined by the terms of the PIP.

A student is dismissed from further enrollment in any initial teacher or administrator program for any of the following reasons:

- expulsion from Arizona State University
- failure to meet ASU graduate education policies (for graduate students)
- failure to meet the professional responsibilities outlined in the Mary Lou Fulton College for Teaching and Learning Innovation Professional Responsibilities Standards and the ASU Student Code of Conduct
- failure to resolve academic deficiencies
- noncompliance with a PIP

GPA: Grade point average.

Institutional recommendation: All MLFC certification programs are approved by the Arizona Department of Education to issue institutional recommendations to students who have fulfilled the state's requirements for certification. The IR allows for expedited issuance of the teaching or administrative certificate.

iPOS: Graduate plan of study entered and approved electronically and consisting of the courses required for the student to earn the degree. iPOS stands for interactive plan of study.

iPOS GPA: Grade point average calculated using the courses on the plan of study.

Overall graduate GPA: Grade point average calculated on all graduate courses, regardless of whether they are on the approved program of study.

Placement release: Removal from the traditional or job-embedded internship or student teaching placement.

Professional experience: Any practicum, internship, student teaching or other field-based course that takes place off campus in a professional setting such as a school district, charter school, government agency or other educational organization.

Professional improvement plan: A tool designed to support students who may be at risk of not progressing in their major or academic plan. The PIP outlines specific action steps a student must complete to maintain or return to good standing within their major or academic plan.

SOS — Supporting Our Students: A referral system that connects students with the Office of Student Services student success team for personalized support.

Student Code of Conduct: The ASU code of conduct. [6]

Undergraduate policies

Advising

The Office of Career and Academic Success is dedicated to providing students with the very best academic support and guidance in every phase of their academic program. Academic program advisors provide students with assistance in selecting classes and in fulfilling program requirements. Each ASU campus has dedicated academic advisors knowledgeable about all Mary Lou Fulton College for Teaching and Learning Innovation programs. Students should review MLFC undergraduate student services [28] for advising locations and contact information. Students are encouraged to meet with their advisors every semester.

Credit and registration

Students are limited to a maximum of 18 credit hours per semester. Enrollment in additional credit hours requires college academic advisor approval.

Audit

MLFC students are permitted to audit any course that is not part of the professional pathways curriculum. Additional university fees are assigned to courses when the audit option is chosen.

Course prerequisites

Enrollment in upper-division professional pathways coursework requires approval from MLFC. Students should review current course descriptions for course prerequisites.

Pass/fail

A “Y” (satisfactory) grade is assigned for a passed course, and an “E” grade is assigned for a failed course. Only the “E” grade is computed in the ASU cumulative GPA.

Transfer

Students may transfer a maximum of 64 credit hours from two-year institutions. There is no limit to the number of credit hours transferred from four-year institutions. Students interested in substituting previous teacher preparation courses for current professional pathway MLFC courses must submit the petition for adjustment of requirements to the Office of Academic and Career Success at their chosen campus.

Any transfer student who is interested in starting an initial teacher certification pathway must submit an online form, meet with an academic advisor, have a cumulative GPA of 2.00, have completed 60 credit hours, and fulfill specific course requirements as outlined by each education major. Students who complete an Associate of Arts program in elementary education or who complete required courses at an Arizona community college through MyPath2ASU® [29] meet the requirements for progression to the professional pathway.

Withdrawal

Students should review the Mary Lou Fulton College for Teaching and Learning Innovation undergraduate withdrawal policy [30] and the current university withdrawal procedures [31]. It is each student’s responsibility to withdraw from courses. Students are not automatically withdrawn for nonattendance.

Degree requirements

Students who begin at ASU as first-year students follow the curriculum for their chosen programs. These courses are listed on the curriculum checksheets. My Major Map is the ideal course progression plan that students follow each semester for enrollment, and students should meet regularly with an academic advisor to ensure appropriate course selection and review progress toward graduation. Students who have attended only ASU have their progress reviewed at the completion of each term to ensure that they are on track for graduation. Transfer students must attend an advising session in which they learn the degree requirements and minimum eligibility requirements for degree completion. Students must fulfill professional experiences, including internships and student teaching requirements, as part of degree completion. Mary Lou Fulton College for Teaching and Learning Innovation is committed to providing support and resources for students who need academic or professional growth assistance.

To be in good standing in MLFC, undergraduate students in teacher preparation programs must maintain an overall cumulative GPA of 2.00 or higher. Students are evaluated in accordance with the MLFC satisfactory academic progress and professional conduct policy. Students in the professional pathway are formally reviewed regarding their academic progress to determine retention and continuation status. Students with records that contain indicators of professional or academic concerns are placed on probation or suspension, or permanently removed (dismissed) from their programs.

Students who exhibit unprofessional behaviors or attributes are required to meet with a MLFC administrator to develop an individualized growth plan that outlines the expectations for continuing in the program. Such students are placed on probation or suspension and are subject to the disqualification policy of the MLFC. Students should refer to the satisfactory academic progress and professional conduct policy for additional information.

Concurrent degrees

The primary degree is the one that appears at the top of a student's transcript. A concurrent degree is an additional degree that a student pursues.

Requirements for students who wish to pursue a concurrent degree:

- Students must be in good academic standing, maintaining a minimum cumulative GPA of 2.00 or higher.
- Students must inform their MLFC advisor of each degree being pursued as a concurrent degree. This information is important to the department's recordkeeping, and it may affect recommended courses.
- If one of the degrees is offered through another college, the student must contact that college and complete its required procedures for requesting and pursuing concurrent degrees.
- Students must earn at least 30 distinct credit hours applied toward the requirements for each major's degree.

Reinstatement and readmission

Applications for reinstatement and readmission are reviewed by the director of undergraduate student services on a case-by-case basis.

If a student is not eligible for quick re-entry [32], they must apply for readmission and submit applicable fees. To submit an application for readmission to the Mary Lou Fulton College for Teaching and Learning Innovation, a student must have left in good academic standing by having a cumulative GPA of 2.00 or higher.

A student who did not leave ASU in good academic standing may appeal. In this case, a student must have both:

1. completed at least 12 credit hours since leaving ASU with a grade of a "C" or higher
2. a 2.00 cumulative GPA since leaving ASU

All transcripts must be on file with ASU for review if appealing. Students who do not meet these two requirements will not be admitted to MLFC. If a readmission appeal is required, the decisions may take four to six weeks. The director of undergraduate services may contact a student for more information.

Other special requirements

Additional requirements for teacher certification candidates

Fingerprint clearance card

Per Arizona state statute A.R.S. § 15-106, all teachers and persons who are required to be fingerprinted to work in the classroom are required to have an identity-verified fingerprint clearance card (Google doc) [33]. All students enrolling in programs that lead to certification must participate in professional experiences. Students participating in a professional experience must have proof of a fingerprint clearance card on file in the Office of Professional Experiences before clinical placement hours begin.

Non-MLFC students

Non-MLFC progression students who are ready to start their upper-division courses must meet with their college advisor. Students receive an email from the CAPES team to complete the Placement Request Form.

For MLFC programs that lead to certification, students must meet with their MLFC college advisor to discuss progressing into upper-division courses.

Graduate policies

The college offers master's degree and doctoral programs as well as graduate certificates. Some programs also allow students to obtain state or professional certification.

After a student is admitted to a degree program, specific advice related to degree requirements and activities is provided by academic advisors in the OACiS graduate services office. Once admitted, all graduate students are required to submit a plan of study. The plan of study functions as a contract between the student, the academic unit and the Graduate College. The interactive plan of study contains certain degree requirements such as coursework, a committee and a culminating experience. Students can contact an academic advisor for assistance completing the interactive plan of study through the contact information found on My ASU.

Other graduate policies

Continuous enrollment and re-entry for graduate programs

Once admitted to a graduate program, the student must be enrolled continuously, excluding summer sessions, until all requirements for the degree have been fulfilled. If a plan of study must be interrupted for one semester, the student may apply to the Graduate College for a leave of absence not to exceed one semester. An application for leave status, endorsed by the vice dean or designee, must be approved by the Graduate College; for a doctoral student, the leave must also be endorsed by the members of the student's supervisory committee. This request must be filed and approved before the semester of anticipated absence. A student on leave is not required to pay fees and is not permitted to place any demands on university faculty or use any university facilities. Students may be continuously enrolled by registering for one credit hour of continuing registration; students should contact an academic advisor for more details. A student who interrupts a program without obtaining an approved leave of absence may be removed from the program by the Graduate College.

Concurrent degrees

The primary degree is the one that shows at the top of a student's transcript. A concurrent degree is an additional degree that a student pursues.

For concurrent master’s degrees, concurrent master’s and doctoral degrees, and concurrent doctoral degrees, students must follow the Graduate College policies. [9]

Graduation requirements

A candidate for a graduate degree must satisfactorily complete the program's culminating experience requirements. Information is available for each program from the Office of Academic and Career Success.

Master's degree programs

In addition to the Graduate College policies and procedures that govern graduate programs at ASU, which are provided elsewhere in this catalog, the policies specific to each master’s degree program are provided to students at the time of enrollment in the program. Students are limited to 15 credit hours per semester. Online students are limited to nine credit hours per semester. Exceptions must be approved by the division director. Students who enroll in additional hours may be administratively withdrawn.

Doctoral programs

In addition to the Graduate College policies and procedures that govern doctoral programs at ASU, which are provided elsewhere in this catalog, satisfactory academic progress and professional conduct policies apply. Additional information specific to a degree program may be provided when students first register for the program.

Doctor of Philosophy and Doctor of Education satisfactory academic progress and professional conduct policy
Students in doctoral programs may be placed on academic probation for reasons stated in the satisfactory academic progress and professional conduct policy. These include:

- failure to meet the academic requirements of the Graduate College, to have a GPA of 3.00, or to meet the academic requirements of the particular program, as stated in the program handbook
- failure to meet the standards of professional conduct, or violations of the student conduct code, which may result in academic probation or, for egregious violations, immediate recommendation to the Graduate College for dismissal

- unsatisfactory progress as noted on the annual review form by the mentor, or failure to meet for annual review

In addition to meeting minimum academic requirements and conduct requirements, a student must maintain progress to degree completion. A student can be recommended to the Graduate College for dismissal for failure to adhere to the Graduate College policies.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and abide by all university policies.

Additional requirements

Fingerprint clearance card

Per Arizona state statute A.R.S. § 15-106, all teachers and persons who are required to be fingerprinted to work in the classroom are required to have an identity-verified fingerprint clearance card. All students enrolling in programs leading to certification must participate in clinical experiences and student or apprentice teaching. Students participating in clinical experiences must have proof of a fingerprint clearance card on file in the Office of Professional Experiences before field placement hours begin.

School of Technology for Public Health policies

The School of Technology for Public Health bridges the disconnect between public health and other historically siloed disciplines to create impact at scale. Programs within the school offer distinct transdisciplinary coursework that seamlessly weaves together core public health competencies with elements of human-centered technology, systems engineering, data science and design.

Training students to be proficient in public health and technology, however, requires more than classroom-based learning. Technology for Public Health exposes students to a constellation of tools and technologies and teaches them how to apply these effectively in practical settings. Through placements with community and cross-sector partners, students explore how existing technologies can be deployed to improve public health systems, outcomes and processes, and how to imagine, implement and communicate entirely new public health technologies.

Health equity and inclusive excellence

The School of Technology for Public Health is on a mission to improve the mental and physical health of both larger and immediate communities by better understanding the challenges that individuals and populations face, while striving to be part of the solution. The school is committed to the idea that every member of society should have the opportunity for good health and wellness throughout their life span. In an effort to actualize this ideal, the school embraces and supports greater justice, diversity, equity and inclusion in everything it does, including teaching, research, service and clinical practice.

Academic integrity

Academic honesty is expected of all students in all examinations, papers, laboratory work, academic transactions and records. The ASU Academic Integrity policy [1] is strictly enforced, and for students found in violation of this policy, possible sanctions include appropriate grade penalties, loss of registration privileges, disqualification and expulsion.

For more information on graduate-specific policies, students should refer to the Graduate College's policies and resources for academic integrity. [2]

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU's policy ACD 401: Prohibition Against Discrimination, Harassment, and Retaliation. [3]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [4]

Undergraduate policies

Academic standing

The standards for GPA and the terms of academic warning, academic probation or continuing probation, disqualification and reinstatement are identical to those of the university, as set forth under the retention and academic standards policy. [5]

Academic good standing

For the purpose of retention, university academic good standing [6] for degree-seeking students is defined as maintaining a minimum cumulative GPA of 2.00. This standard is in effect for all students, regardless of catalog year.

Academic warning and probation

An ASU student who does not achieve the minimum GPA standard at the completion of the first term of study receives an academic warning [7]. If, after one term with an academic warning, a student still does not achieve the minimum GPA standard, they are placed on probation [8] for at least one additional term. If a student's minimum GPA first falls below the standard in a term that is not their first term at ASU, they are placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

If a student is placed on academic warning or probation, they receive communication from the college indicating next steps and requirements.

Students on academic probation receive an advising hold and are required to complete the academic refresher course UNI 220: Mindset Connections. UNI 220 appears on the student's DARS as a graduation requirement.

Continuing probation

Students are placed on continuing probation [9] when their cumulative GPA is below 2.00 for two consecutive semesters but they have shown academic progress and have not earned lower than a "C" (2.00) in any course in their most recent semester.

Disqualification

Students are disqualified from the School of Technology for Public Health and ASU if their cumulative GPA remains lower than 2.00 for two consecutive semesters after they have been placed on probation. Students who are disqualified cannot enroll in classes at ASU for a minimum of two semesters (fall and spring). Disqualified students may take courses during the summer to raise their GPA; however, this does not guarantee reinstatement for the following fall semester. Disqualified students must apply for readmission or reinstatement for the semester in which they wish to return to the university.

eAdvisor tracking

In addition to being in university good academic standing, students in Technology for Public Health must adhere to critically tracked requirements. For more information on critically tracked courses, students should review the My Major Map progress for their degree program, which is accessible through My ASU. Students are off track if they fail to meet one or more critical requirements, as stated in terms 1-4 of their major map, in a given fall or spring semester. All off-track students receive a hold that requires them to meet with their academic advisor and set a plan for getting back on track with their degree program.

Students who remain off track for two or more consecutive semesters may be required to change majors.

Advising

The School of Technology for Public Health is committed to maximizing the academic, social and personal experiences of students by providing high-quality, student-centered academic advising. Academic advisors are trained to know degree requirements and can assist students with planning their courses in an appropriate sequence; they also ensure that students have the resources necessary to reach their career goals. Students can direct most university-related questions to their advisor, who can guide them to available resources. Advisors are available to meet with students in undergraduate programs in person, by phone or on Zoom.

Students can monitor their own academic progress using tools such as their graduation audit, their major map or their curriculum checksheet found on My ASU. The DARS Explainer Experience [9] provides more information.

The following students receive academic advising holds and are required to consult with their academic advisor to be eligible to register for courses:

- all new first-year and transfer students
- students newly readmitted to the university
- students not in satisfactory academic standing status (e.g., probation, continuing probation, off-track status)

Pre-health advising

Pre-health advising [10] supports students who are interested in pursuing careers in medicine, veterinary medicine, optometry, dentistry, chiropractic medicine, pharmacy, occupational therapy or physical therapy, or who want to become a physician assistant. Pre-health advising offers guidance on career pathways, application timelines, prerequisites, personal statement reviews and mock interviews, including multiple mini interviews.

Credit and registration

Course load limit

For fall or spring semesters, a minimum full-time course load for an undergraduate student is 12 credit hours. The maximum course load for which a student may register is 18 credit hours during a fall or spring semester, with a maximum of nine credit hours in session A or B; the load limit is a total of 18 credit hours for any combination of sessions. The summer session load limit is seven credit hours for each six-week session and nine credit hours for the eight-week session; the load limit is a total of 14 credit hours for any combination of sessions.

A student who wishes to register for more than the maximum credit limit per term must petition to obtain an approved overload before registration. Additional instructions to petition can be found on the school's student policies and forms site. [11]

Graduate credits earned by undergraduate students

Undergraduate students interested in taking graduate-level credits while enrolled in a bachelor's degree program must adhere to the university policy for graduate credits earned by undergraduate students [12]. Before registering for a graduate-level course, undergraduate students must petition [11] the School of Technology for Public Health Academic Standards and Grievances Committee through their academic advisor for permission to enroll in a specific course.

ASU students enrolled in an approved accelerated master's degree program (formerly called 4+1), may use a maximum of 15 pre-admission credit hours, which may be shared between a bachelor's and master's program. Students must contact their ASU undergraduate advisor and graduate support staff to ensure proper sharing of credit hours.

Late registration

Students should be aware that this exception to university policy is not guaranteed to be approved.

To register for a class after the university add deadline [13], students must obtain authorization from the instructor and the college. The course in question must have open seats, and the student must meet the prerequisites. Students who wish to request late registration for a Technology for Public Health course must follow the steps below in the order listed:

- Fill out an enrollment change request form. [14]
- Obtain the instructor's signature by having them sign the form, or have the instructor send an email confirming their approval to add the course late.
    - Late add requests are only considered with instructor approval during the following time frames:
        - First week of A and B session courses (end of the fifth business day from the first day of the session).
        - Second week of C session courses (end of the 10th business day from the first day of the session).
        - Any late add requests beyond these time frames are not considered.
    - Many classes and labs have attendance policies. Confirm with the instructor whether adding the class late means that the missed days count toward total absences.

    - Students should ask the instructor if they are allowed to make up any work they missed by adding the class late.
- Obtain authorization from Technology for Public Health:
    - Send the signed form and approval, including all pertinent attachments, to the advising office via email: stph@asu.edu.
- Submit the approved form to the University Registrar Services office:
    - Once the advising office has provided authorization, submit the form to any registrar location for processing. [15]

Technology for Public Health may approve a late add, late drop or late withdrawal for an STPH course that is due to extenuating or extraordinary circumstances beyond the student's control. The student must outline extenuating circumstances in an email statement and attach the enrollment change request form [14] along with a written statement or email of support from the instructor of the course. These items should be sent to stph@asu.edu.

Degree requirements

Experiential learning

Bachelor's degree programs in the School of Technology for Public Health require students to complete a credit-bearing experiential learning opportunity. Students must complete at least three credit hours of experiential learning, determined by their degree program. This requirement is satisfied by a variety of opportunities, including translational research, internships and other hands-on experiences. Students can find detailed information on how this requirement can be completed for their specific degree program on the Technology for Public Health experiential learning site.

Concurrent degrees

Students at Arizona State University are permitted to pursue concurrent degrees as long as they meet the requirements for both programs and receive permission in advance from the college or colleges offering their chosen majors. Technology for Public Health students are required to meet specific criteria before starting the university approval process. Students interested in applying for a concurrent degree should consult with their academic advisor about the feasibility of pursuing a concurrent degree as it relates to their overall graduation plan.

If a student is adding a concurrent major outside the college, the university approval process must be completed for both Technology for Public Health and the college of the other major.

Students earn a separate diploma for each degree. Degrees may not be too closely related and are reviewed by an academic advisor during the approval process. For a student to add a concurrent degree, there must be a minimum of 30 distinct credit hours of coursework in each degree program.
Technology for Public Health minimum requirements to add a concurrent degree are:

- sophomore standing or higher
- minimum ASU cumulative GPA of 3.00
- minimum of 12 credit hours of coursework completed in the first major
- minimum of nine credit hours of coursework completed in the second major

Readmission

Undergraduate degree-seeking students who previously attended ASU but have not been enrolled at ASU for up to seven consecutive semesters are eligible to return through quick re-entry [16]. Students do not need to submit a new application or application fee, but they must contact an academic advisor in their program for registration. Exceptions may apply, including for students on leaves of absence and students who serve in the military.

Students who have been disqualified from ASU and would like to return to a major in the School of Technology for Public Health are encouraged to schedule an appointment with an academic advisor to discuss requirements and recommendations. Disqualified students must follow ASU procedures for readmission [17]. Exceptions may apply, including for students on leaves of absence and students who serve in the military.

Graduate policies

Students are strongly encouraged to review the student handbook for their graduate program in the School of Technology for Public Health for information regarding graduate program requirements, academic procedures and protocols.

Students must fulfill all requirements of their individual graduate programs to remain in good academic standing, and they must abide by all university policies, including those of the Graduate College [18] and the School of Technology for Public Health [11].

Academic advising

Academic advising within Technology for Public Health is conducted via phone, Zoom and in-person appointments. The advisor can be reached by email at stph@asu.edu or by phone at 602-496-0100. Replies to email and voicemail should be provided within two business days.

It is important to note that graduate advising is a team effort by the advisor, student and the student's committee chair. Together, they help students meet graduation requirements and maximize the student experience.

University College policies

University College is leading a new approach to higher education. The college seeks to end achievement disparities for learners of all backgrounds through designing personalized learning experiences, preparing learners for a future of integrated working and learning, and supporting students through the use of automation, analytics and intelligent systems.

Academic integrity

University College values academic honesty in academia as the basis of shaping students who will become productive members of the workplace and contributors to society. University College is committed to supporting student success by supporting accountability. The college uses every learning opportunity, including academic violations, to help students gain experience, resources and personal growth.

Academic dishonesty falls into five broad areas:

- academic deceit, such as fabricating data or information
- aiding academic integrity policy violations and inappropriately collaborating
- cheating on an academic evaluation or assignment
- falsifying academic records
- plagiarizing

It is important that students understand what constitutes a violation of academic integrity; they should review the full ASU academic integrity policy. [1]

Why is it important?
Academic integrity violations have a negative impact on students, the ASU community and students' future career aspirations.

Academic dishonesty undermines a student's ability to demonstrate their academic excellence. Furthermore, academic dishonesty interferes with instructors' opportunities to develop a student's educational aptitude to prepare them for a career, and it diminishes the integrity of the ASU academic community.

Who can report academic dishonesty?
Anyone with a good faith basis for believing that a student has engaged in academic dishonesty may report the alleged violation [2] to the instructor or academic integrity officer for the college or school in which the academic dishonesty occurred.

Student resources
If students are unsure as to whether an issue could be construed as academic dishonesty, they should use the academic integrity student resources [3]. Sun Devils are champions of integrity and making the right decision.

Students with questions about ASU’s academic integrity policy or alleged violations should contact University College’s academic integrity officer Bruce Bailey [4] with any questions.

Notice of nondiscrimination

ASU prohibits all forms of discrimination, harassment and retaliation. Students should review ASU’s policy ACD 401: Prohibition Against Discrimination, Harassment and Retaliation. [5]

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the ASU Title IX coordinator or to the U.S. Department of Education Office for Civil Rights or to both. For more information, students should email titleixcoordinator@asu.edu, call 480-965-0696, or visit the office located

at 1120 S. Cady Mall, INTDSB 284. For information on making a report, students should reference the Report It website. [6]

Undergraduate policies

Academic standing

To be considered in academic good standing in University College, students must achieve a cumulative GPA of 2.00 or higher. Academic standing is determined twice annually — in December after fall semester grades have posted, and in May after spring grades have posted. Grades earned during summer sessions affect GPA but are not considered for academic standing purposes until the next review period.

Academic warning

An undergraduate student with a cumulative GPA lower than 2.00 at the end of their first semester (fall or spring) is placed on university academic warning.

Academic probation

If a student's minimum cumulative GPA first falls below 2.00 in a term that is not the student's first term at ASU, the student is placed on probation. Failure to return to good academic standing after being placed on probation may result in disqualification.

What happens to a student on academic warning or academic probation?
A student on academic warning or academic probation is considered in conditional good standing and is permitted to enroll.

All University College students who are not in good standing are required to meet with an academic advisor and complete an academic success agreement. During the appointment, the advisor reviews the prior semester, discusses the student's academic standing status, possibly makes adjustments to the course schedule, and helps the student explore strategies to return to good standing.

Improved performance helps a student earn either good standing or continued probation status. Students who achieve a cumulative GPA above 2.00 are considered in good standing. Students who achieve a semester GPA above a 2.00 but retain a cumulative ASU GPA below 2.00 are placed on continuing probation. Students who fail to achieve a semester or cumulative GPA above 2.00 are subject to disqualification from the university.

All students who receive an academic warning or are placed on academic probation for at least one semester must successfully complete the academic refresher course UNI 220: Mindset Connections as a requirement of graduation.

Disqualification

Students who have been disqualified from ASU are not eligible to take classes at ASU during fall or spring semesters; however, enrollment in summer classes is permitted and encouraged. Students may enroll in summer classes at ASU to improve their GPA and bring their cumulative ASU GPA back to academic good standing (2.00).

Students who have had a fall or spring semester lapse in enrollment while on disqualification status need to submit an application for readmission to ASU [7] to enroll in summer classes or to be considered for a future fall or spring enrollment.

Academic advising

All students are encouraged to seek advising from their academic success specialist (i.e., their academic advisor) before registration. Students must review the academic calendar [8] each semester for information and deadlines pertaining to enrollment, including course adds, drops and withdrawals.

The ASU academic catalog is the governing source for all degree requirements. Students are expected to read the requirements for university general studies [9], undergraduate graduation [10] and major degree requirements. The academic success specialist provides guidance.

Contact advising: exploratory@asu.edu

Mandatory advising

The following students in University College must receive advising clearance before course registration:

- new students in all exploratory tracks
- new students in their first semester of attendance
- readmitted students in their first returning semester
- students on academic probation or continuing probation
- students who are off track for graduation
- students who have been disqualified

Students are encouraged to use My ASU [11] to check their advising status requirements each semester before attempting any registration transactions.

Credit and registration

Credit overload petition

A student may take up to 18 credit hours per semester (fall or spring) and seven credit hours each summer session. Before submitting the request for credit overload, the student must:

1. meet with their advisor
2. have a legitimate academic reason for making the request
3. have a written plan describing in detail how the demands of a heightened workload will be met
4. complete a full semester at ASU before the overload semester
5. be in good academic standing
6. not be repeating a course during the overload term
7. be a degree-seeking student
8. submit the form at least a week before the start of the session
9. meet the GPA requirements as outlined on the credit overload petition form [12]

Class overrides

Class overrides are not considered unless there are specific extenuating circumstances (e.g., if the prerequisite has been completed or will be completed at another institution before the start of the class in question). Class override requests are not considered after the add period has ended for that session (A, B or C).

The student must complete the class prerequisites override form. [13]

Space overrides

Under certain circumstances, the college may approve a student's enrollment in a class that has filled the number of allotted seats. Space overrides are not considered if the room has reached maximum fire code occupancy or if other sections of the same class are available at another time. Override requests are not considered after the add period has ended for that session (A, B or C).

The student must complete the space override form. [14]

Transfer credit and appeals

ASU accepts transfer credit [15] for traditional coursework that a student has successfully completed at regionally accredited institutions of higher education as documented on an official transcript.

When a student transfers to ASU from another college or university, the following general standards for transfer credits apply:

- ASU accepts credits for college-level (not remedial) courses in which the student has earned a grade of "C-" (scale is 4.00 = "A") or higher from a regionally accredited college or university.
- A maximum of 64 credit hours are accepted as lower-division credit when transferred from a regionally accredited community, junior or two-year college, with the exception of some special programs.
- Acceptable academic credits earned at other institutions that are based on a different unit of credit than the one prescribed by the Arizona Board of Regents [16] are subject to conversion before being transferred to ASU. All ASU students must meet graduation requirements (university, college, major and general studies requirements) to earn a bachelor's degree.
- Grades and honor points earned at other colleges and universities are considered for admission, but the ASU cumulative GPA is based solely on coursework taken at ASU.

Types of transfer credits not accepted by ASU:

- courses for which the student earned a final grade lower than "C-"
- credit awarded by postsecondary schools in the United States that lack candidate status or are not accredited by a regional accrediting association
- credit awarded by postsecondary schools for life experience
- credit awarded by postsecondary schools for courses taken at noncollegiate institutions (e.g., government agencies, corporations, industrial firms)
- credit awarded for continuing education units, continuing education credit, workshops, seminars, professional development courses, and other not-for-credit courses through postsecondary institutions.

A student who feels they have been unjustly denied credit for transfer may appeal the decision.

- Prospective students can contact ASU Admission Services [17] or Academic Transfer Credit Solutions (articulation@asu.edu).
- Admitted students can contact their academic advisor or academic unit (found via My ASU [11]).

Repeat/replace policy

Students who wish to repeat courses and possibly replace prior course grades must follow the repeat/replace policy [18] (also university policy SSM 203-06 [19]) regarding the number of credit hours that can be repeated and the types of courses that are eligible for a grade replacement.

All prerequisites for the course must be met with the required grades before the student submits the petition to enroll in a course for the third time or more (even if registration has previously been permitted without them). Students may not repeat a course for a third time or more if they have passed the course with a "C" grade or higher. Approval to retake a course does not imply that enrollment in a class after the add deadline is permitted or that the student may register for a class section that is already full.

Pass/fail grade options

A grade of "Y" (satisfactory) contributes to a student’s earned credit hours but does not affect GPA.

The pass/fail grade option ("P"/"E") may be used under the following conditions:

- Approval has been granted from the instructor and college offering the course.
- Enrollment for the pass/fail option must be indicated during registration and may not be changed after the add period.
- A maximum of 12 credit hours taken for pass/fail may be counted toward graduation.

Students may not enroll under the pass/fail option in the following courses:

- first-year composition required courses
- general studies required courses

Late registration

For a student to add, drop or swap sections of the same course after the official add and drop deadlines, the course must be open and course prerequisites must be met, or overrides must have been authorized and posted. If these criteria are met, the student should do the following:

1. complete the enrollment change request form [20]
2. include instructor's email approval, which includes course information
3. submit an enrollment change request form to the department up to three business days after the late add deadline to register for a course

Requests received after the three business day deadline are not approved unless the instructor provides confirmation that the student's grade will not be impacted.

Students should allow at least 24 hours for University College to process the request. If the request is approved, University College forwards the request to the Registrar's Office for processing.

Withdrawals

Course withdrawals

Requests to drop a course after the drop deadline are not considered unless there are extenuating circumstances beyond the student's control. In these cases, a student may initiate a late withdrawal up to three business days after the deadline by emailing ucacademicservices@asu.edu. Backdated drops need department approval.

Medical or compassionate withdrawals

What is a medical or compassionate withdrawal?
Students who experience a serious illness, injury or other significant personal situation that prevents them from continuing classes may request a medical or compassionate withdrawal from the college of their major.

Medical or compassionate withdrawals require relevant and detailed supporting documentation for consideration. Approval is at the discretion of the college, and there is no guarantee that a request will be approved.

Students may review the full ASU medical or compassionate withdrawal policy. [21]

Steps for submitting a medical or compassionate withdrawal:

1. meet with an academic advisor to explore the withdrawal procedures
2. work with faculty for alternative class arrangements or incomplete grades
3. consult with a student financial assistance [22] counselor to determine financial obligation
4. review guidelines of required documentation sections below
5. submit the medical or compassionate withdrawal request form [23]

Required documentation for medical withdrawal
Students must obtain an official letter from a health care provider on the health care provider's letterhead stationery that details:

- the circumstances or challenges of the student
- the date of illness onset
- the dates the student was under professional care
- the general nature of the medical condition and why or how it prevented the student from completing the coursework or attending class
- the date of anticipated return to school
- the last date the student was able to attend class

Students who make a request for some, but not all, courses in a semester must provide a statement as to why they were successful in some courses but not others.

Required documentation for a compassionate withdrawal
The official documentation must include a statement from the student explaining the circumstances or challenges they are facing. Documentation should corroborate the request either by strengthening the request or by providing a timeline for events.

Example: If the request involves a death, attach a copy of the death certificate, airline itinerary and receipt, and funeral pamphlet showing dates.

Medical or compassionate withdrawal for international students
International students on an F-1 or J-1 visa must consult with the International Students and Scholars Center [24] to discuss the serious immigration consequences that may result from a withdrawal from ASU. Students on an F-1 or J-1 visa must provide medical documentation from a U.S. licensed medical doctor, doctor of osteopathy or licensed clinical psychologist.

Medical or compassionate withdrawal for students receiving GI Bill® benefits
Students who receive GI Bill® benefits must contact Pat Tillman Veterans Center for advisement on how their benefits may be affected. GI Bill® benefit recipients who withdraw from one or more courses may incur a debt with ASU or the Veterans Administration, or both.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill/.

Complete session withdrawal
Because a complete session withdrawal from the university can be a difficult decision and could result in serious academic and financial consequences, beginning the first day of the fall and spring semesters, undergraduate students are required to contact the college or school of their major to facilitate the withdrawal process. Students should review the academic calendar [8] for complete session withdrawal deadlines.

To complete a full session withdrawal, students must complete the complete session withdrawal procedures. [25]

Note: International students must contact the International Students and Scholars Center regarding intent to seek a complete session withdrawal by sending an email to issc@asu.edu. Students are notified of the status of the submission. If approval is granted, the completed session withdrawal is forwarded to the ASU Registrar's Office for processing.

Degree requirements

Exploratory tracks

All first-year students who choose to become an exploratory student are required to declare an exploratory track in one of four areas:

- exploratory health and life sciences [26]
- exploratory humanities, fine arts and design [27]
- exploratory math, physical sciences, engineering and technology [28]
- exploratory social and behavioral sciences [29]

Each of these tracks is designed to provide students with introductory courses in a field of choice (e.g., Introduction to Psychology, Introduction to Environmental Design), general studies curriculum and elective courses that reinforce student interests. Each exploratory track is composed of a three-semester major map, culminating in the declaration of a major by the completion of 45 credit hours.

All exploratory students are required to enroll in a major and career exploration class (UNI 150, 250 or 270) each semester the student remains designated as an exploratory student.

Readmission/reinstatement

Students who have been disqualified from ASU may be reinstated to University College for a fall or spring semester if they complete either of the following:

- Raise their cumulative ASU GPA to an academic good standing level (2.00) by taking ASU summer session courses.
- Complete 12 or more transferable credit hours of ASU general studies courses at a community college or an accredited college or university with no grade lower than a "C" and a GPA of 2.50 or higher. Courses in which the student failed or received a “D” at ASU should not be repeated at another institution.

Once readmitted, the student may be placed on academic probation for at least one semester. Students on probation have one semester to raise their cumulative or semester GPA to meet the required 2.00 GPA to remain at ASU. Failure to do so results in disqualification from the university. Students should meet with a University College advisor to identify their options and develop a plan for success.

Students who have been disqualified two or more times are not be reinstated until they achieve an ASU GPA of 2.00 or higher by taking summer courses.

Quick re-entry: Students who have had an absence from ASU for up to seven semesters may be eligible to return to the university via the quick re-entry process [7]. Students should see an advisor for additional information.

Readmission: Students not eligible for quick re-entry must submit an application for readmission [7] for the semester for which they wish to return to ASU. This readmission is contingent on meeting the requirements stated above.

ASU Academic Programs – Table of Contents

Graduate Programs

Graduate Degrees and Certificates (Program Descriptions and Requirements)

Business, W. P. Carey School of

- Accountancy and Data Analytics, MAcc (BAACCMACC)
- Artificial Intelligence in Business, MS (BAAIBMS)
- Business Administration (Accountancy), PHD (BAACCTPHD)
- Business Administration (Agribusiness), PHD (BAAGRIPHD)
- Business Administration (Computer Information Systems), PHD (BAINFSYPHD)
- Business Administration (Finance), PHD (BAFINANPHD)
- Business Administration (Management), PHD (BAMGMTPHD)
- Business Administration (Marketing), PHD (BAMARKPHD)
- Business Administration (Supply Chain Management), DBA (BABUASCDBA)
- Business Administration (Supply Chain Management), PHD (BASCMPHD)
- Business Administration, DBA (BASCMDBA)
- Business Analytics, MS (BABUSANMS)
- Economics, MS (BAECONMS)
- Economics, PHD (BAECONPHD)
- Entrepreneurship and Innovation, MS (HIIVDMS)
- Finance, MS (BAFINMS)
- Fundamentals of Business Analytics (Certificate), CERT (BABUSAGRCT)
- Global Financial Management, DBA (BAGFMDBA)
- Global Logistics, MS (BAGLSMS)
- Information Systems Management, MS (BAINFOMS)
- Management, MS (BACMRMS)
- Management, MS (BAMCCMS)
- Marketing, MS (BAMKTCEMS)
- Real Estate (Certificate), CERT (BAREAGRCT)
- Real Estate Development, MREDev (ARREMREDEV)
- Supply Chain Management (certificate), CERT (BASCMCERT)
- Supply Chain Management and Engineering, MS (BASCMEMS)

- Supply Chain Management, MS (BASCMMS)
- Taxation and Data Analytics, MTax (BATAMTAX)
- W. P. Carey MBA, MBA (BACORPMBA)
- W. P. Carey MBA, MBA (BAEVEAMBA)
- W. P. Carey MBA, MBA (BAEVENMBA)
- W. P. Carey MBA, MBA (BAEXECMBA)
- W. P. Carey MBA, MBA (BAFULLMBA)
- W. P. Carey MBA, MBA (BAONLINMBA)
- W. P. Carey MBA, MBA (BASHANGMBA)

Design and the Arts, Herberger Institute for

- Architecture (Energy Performance and Climate Responsive Architecture), MS (ARENERGYMS)
- Architecture, MArch (ARARCMARCH)
- Art (Art Education), MA (FAARTEDMA)
- Art (Art History), MA (FAARTHISMA)
- Art (Digital Technology), MFA (FADIGITMFA)
- Art History, PHD (HIARSPHD)
- Art, MA (FAARTMA)
- Art, MFA (HIARTMFA)
- CLO 3D Virtual Fashion Design (Certificate), CERT (HICLOGRCT)
- Community-Engaged Practices in Design and the Arts (Certificate), CERT (HISEPGRCT)
- Composition (Interdisciplinary Digital Media), MM (FADIGITMM)
- Composition, MM (FAMCOMPMM)
- Creative Enterprise and Cultural Leadership, MA (HICECLMA)
- Dance (Interdisciplinary Digital Media and Performance), MFA (FADANDIMFA)
- Dance Teaching Artist Praxis (Certificate), CERT (HIDTAPGRCT)
- Dance, MFA (FADANCEMFA)
- Design (Design of Healthcare and Healing Environments), MSD (ARHHEMSD)
- Design (Experience Design), MSD (HIDEDMSD)
- Design (Industrial Design), MSD (ARINDDEMSD)
- Design (Interior Design), MSD (ARINTDEMSD)
- Design (Space Architecture and Extreme Environments), MSD (HIDSCSMSD)
- Design (Visual Communication Design), MSD (ARVCDMSD)
- Design, Environment and the Arts (Design), PHD (HIDEADSPHD)

- Design, Environment and the Arts (Digital Culture in Design), PHD (HIENVDGPHD)
- Design, Environment and the Arts (Healthcare and Healing Environments), PHD (ARENHHEPHD)
- Design, Environment and the Arts (History, Theory, and Criticism), PHD (HIDEAHTPHD)
- Design, Environment and the Arts, PHD (HIDEAPHD)
- Digital Culture, MA (HIDGCMA)
- Entertainment Engineering, MS (HIEEMS)
- Immersive Experience Design, MS (HIIMEXDMS)
- Indigenous Placekeeping and Design, MS (HIIPDMS)
- Industrial Design, MID (HIINDMID)
- Interior Architecture, MIA (HIIAMIA)
- Landscape Architecture, MLA (ARLDEMLA)
- Media Arts and Sciences (Extended Reality Technologies), MS (HIDGCERTMS)
- Media Arts and Sciences, MS (HIDGCMS)
- Media Arts and Sciences, PHD (FAMASPHD)
- Museum and Curatorial Practices, MA (HIMCPMA)
- Music (Conducting), DMA (FACONDDMA)
- Music (Ethnomusicology), MA (FAETHNMA)
- Music (Interdisciplinary Digital Media), DMA (FAINTDDMA)
- Music (Music Composition), DMA (FACOMPDMA)
- Music (Music Learning and Teaching), PHD (FAMUSEDPHD)
- Music (Musicology), MA (FAMHISTMA)
- Music (Musicology), PHD (HIMUSMPHD)
- Music (Performance), DMA (FAPERFDMA)
- Music Entrepreneurship (Certificate), CERT (HIMERTGRCT)
- Music Learning and Teaching, MM (FAMUSEDMM)
- Music Theory Pedagogy (Certificate), CERT (HIMTPGRCT)
- Music Therapy, MM (FAMTHERMM)
- Narrative and Emerging Media, MA (CSNEMMA)
- Performance (Collaborative Piano), MM (FACPIANOMM)
- Performance (Conducting), MM (HIPERCOMM)
- Performance (Performance Pedagogy), MM (FAPPEDMM)
- Performance (Performance), MM (FAPERF3MM)
- Performance (Voice, Music Theatre, Opera), MM (FAMUTPOMM)
- The Art of Bespoke Tailoring (Certificate), CERT (HIBTGRCT)
- Theatre (Directing), MFA (FADIRMFA)

- Theatre (Dramatic Writing), MFA (FADRWRTMFA)
- Theatre (Interdisciplinary Digital Media), MFA (FATHEADMFA)
- Theatre (Performance), MFA (FAPERFMFA)
- Theatre (Theatre and Performance of the Americas), PHD (FAPERAMPHD)
- Theatre (Theatre for Youth and Community), MFA (FAYOUTHMFA)
- Theatre (Theatre for Youth and Community), PHD (FAYOUTHPHD)
- Theatre, MA (FATHEAMA)
- Urban Design, MUD (ARMUDMUD)
- Visual Communication Design, MVCD (HIVCDMVCD)

Engineering, Ira A. Fulton Schools of

- Aerospace Engineering, MS (ESAEROSPMS)
- Aerospace Engineering, PHD (ESAERSPPHD)
- Applied Ethics and the Professions (Ethics and Emerging Technologies), MA (LAAEPEETMA)
- Artificial Intelligence and Machine Learning (Certificate), CERT (ESAIMLGRCT)
- Artificial Intelligence Engineering (Aerospace Engineering), MS (ESAIEAEMS)
- Artificial Intelligence Engineering (Chemical Engineering), MS (ESAIECEMS)
- Artificial Intelligence Engineering (Computing Sciences), MS (ESAIECSMS)
- Artificial Intelligence Engineering (Electrical Engineering), MS (ESAIEEEMS)
- Artificial Intelligence Engineering (Human-Centered Artificial Intelligence), MS (ESAIEHCMS)
- Artificial Intelligence Engineering (Intelligent Biomedical Systems Engineering), MS (ESAIEBSEMS)
- Artificial Intelligence Engineering (Manufacturing), MS (ESAIEMMS)
- Artificial Intelligence Engineering (Materials Science and Engineering), MS (ESAIEMSEMS)
- Artificial Intelligence Engineering (Mechanical Engineering), MS (ESAIEMEMS)
- Artificial Intelligence Engineering (Operations and Decision Science), MS (ESAIEODSMS)
- Artificial Intelligence Engineering (Robotics), MS (ESAIERMS)
- Artificial Intelligence Engineering (Software Engineering), MS (ESAIESEMS)
- Artificial Intelligence Engineering (Sustainable Engineering and Built Environment), MS (ESAIESUBMS)
- Artificial Intelligence in Information Technology, MS (ESAIITMS)
- Artificial Intelligence, MS (ESAIMS)
- Artificial Intelligence, PHD (ESAIPHD)
- Big Data (Certificate), CERT (ESBDTAGRCT)

- Biological Design, MS (ESBDEMS)
- Biological Design, PHD (GCBDSPHD)
- Biomedical Engineering, MS (ESBIOENMS)
- Biomedical Engineering, PHD (ESBIOENPHD)
- Chemical Engineering, MS (ESCHEMEMS)
- Chemical Engineering, PHD (ESCHEMEPHD)
- Civil, Environmental and Sustainable Engineering, MS (ESCIVILMS)
- Civil, Environmental and Sustainable Engineering, PHD (ESCIVILPHD)
- Clean Energy Systems, MS (ESCESMS)
- Clean Energy Systems, PHD (ESCESPHD)
- Cloud Security Architecture (Certificate), CERT (ESCLARGRCT)
- Computer Engineering (Computer Systems), MS (ESCENCMS)
- Computer Engineering (Computer Systems), PHD (ESCENCPHD)
- Computer Engineering (Electrical Engineering), MS (ESCENEMS)
- Computer Engineering (Electrical Engineering), PHD (ESCENEPHD)
- Computer Science (Artificial Intelligence), MS (ESCSEAIMS)
- Computer Science (Big Data Systems), MCS (ESCSEBDMCS)
- Computer Science (Big Data Systems), MS (ESCSEBDMS)
- Computer Science (Biomedical Informatics), MS (ESCSBIOIMS)
- Computer Science (Cybersecurity), MCS (ESCSEIMCS)
- Computer Science (Cybersecurity), MS (ESCSEIAMS)
- Computer Science (Cybersecurity), PHD (ESCSEIAPHD)
- Computer Science (Media Arts and Sciences), MS (ESAMECSMS)
- Computer Science (Media Arts and Sciences), PHD (ESAMECSPHD)
- Computer Science, MCS (ESCOMSCMCS)
- Computer Science, MS (ESCOMSCMS)
- Computer Science, PHD (ESCOMSCPHD)
- Construction Engineering, MSE (ESCONEMSE)
- Construction Management and Technology, MS (ESCONSTMS)
- Construction Management, PHD (ESCONPHD)
- Cybersecurity (Certificate), CERT (ESCYSCGRCT)
- Data Science, Analytics and Engineering (Bayesian Machine Learning), MS (ESDSEBMLMS)
- Data Science, Analytics and Engineering (Computational Mathematics and Data), MS (ESDSECMDMS)
- Data Science, Analytics and Engineering (Computing and Decision Analytics), MS (ESDSECDAMS)

- Data Science, Analytics and Engineering (Electrical Engineering), MS (ESDSEEEMS)
- Data Science, Analytics and Engineering (Human Centered Applications), MS (ESDSEHCAMS)
- Data Science, Analytics and Engineering (Materials Science and Engineering), MS (ESDSEMSEMS)
- Data Science, Analytics and Engineering (Mechanical and Aerospace Engineering), MS (ESDSEMAEMS)
- Data Science, Analytics and Engineering (Sustainable Engineering and Built Environment), MS (ESDSESEBMS)
- Data Science, Analytics and Engineering, PHD (ESDSEPHD)
- Electrical Engineering (Media Arts and Sciences), MS (ESAMEMS)
- Electrical Engineering (Media Arts and Sciences), PHD (ESAMEPHD)
- Electrical Engineering, MS (ESEEMS)

Graduate College

- Advanced Studies, MAS (GCADVSTMAS)

Health Solutions, College of

- Audiology, AuD (LAAUDAUDD)
- Auditory and Language Neuroscience, MS (NHALNEUMS)
- Behavioral Health (Clinical), DBH (NHBVHCDBH)
- Behavioral Health (Management), DBH (NHBVHMDBH)
- Biomedical Diagnostics, MS (NHBMDMS)
- Biomedical Informatics and Data Science, MS (ESBIOINFMS)
- Biomedical Informatics and Data Science, PHD (ESBMIPHD)
- Biostatistics, MS (NHBSTMS)
- Biostatistics, PHD (NHBSTPHD)
- Clinical Exercise Physiology, MS (NHCEPMS)
- Clinical Molecular Diagnostics (Certificate), CERT (NHCMDGRCT)
- Communication Disorders in Multilingual/Multicultural Populations (certificate), CERT (NHCDMPGRCT)
- Communication Disorders, MS (LACOMDISMS)
- Cytology, MS (NHCYTOLMS)
- Exercise and Nutritional Sciences, PHD (ECNUTRIPHD)
- Genetic Counseling, MS (NHGCOMS)
- Health Care Administration and Policy, MS (NHSHCDMS)
- Health Informatics, MAS (GCHLHINMAS)
- Integrated Behavioral Health - Clinical (Certificate), CERT (NHIBHCGRCT)
- Integrated Behavioral Health - Management (Certificate), CERT (NHIBHMGRCT)
- International Health Management, MIHM (NHIHMIHM)
- Medical Nutrition (Certificate), CERT (NHMNTRGRCT)
- Medical Nutrition, MS (NHMNTRMS)

- Nutritional Science (Dietetics), MS (ECNTRDMS)
- Nutritional Science, MS (ECHNUTMS)
- Population Health, MS (NHPOPHLMS)
- Population Health, PHD (NHPOPHLPHD)
- Science of Health Care Delivery (Certificate), CERT (NHHCDGRCT)
- Speech and Hearing Science (Auditory and Language Neuroscience), PHD (NHSHSALPHD)
- Speech and Hearing Science (Translational Genetics of Communication Abilities), PHD (NHSHSTGPHD)
- Speech and Hearing Science, PHD (LAHEARPHD)
- Strength and Conditioning, MS (NHSTRCDMS)

Integrative Sciences and Arts, College of

- Applied Biological Sciences, MS (TSAPBIOSMS)
- Counseling (School Counseling), MC (LSCOUNSCMC)
- Counseling Psychology, PHD (EDCPSYPHD)
- Counseling, MC (EDCOUNMC)
- Integrative Social Science, MS (LSISSMS)
- Liberal Studies, MLSt (LAMLSMLS)
- Narrative Studies (Certificate), CERT (LSNRSGRCT)
- Narrative Studies, MA (LSNRSMA)
- Organizational Leadership (Certificate), CERT (LSORGLGRCT)
- Organizational Leadership, MS (LSORGLMS)
- Project Management (Certificate), CERT (LSPMGGRCT)
- Project Management, MPM (LSPMGMPM)
- Strategic Project Management (Certificate), CERT (LSSPMGRCT)
- Technical Communication (certificate), CERT (LSTECGRCT)
- Technical Communication, MS (LSTCCMMS)

Interdisciplinary Arts and Sciences, New College of

- Behavioral Data Science (Certificate), CERT (ASBHDSGRCT)
- Biological Data Science (Biotechnology), MS (ASBDSTECMS)
- Biological Data Science (Certificate), CERT (ASBDSGRCT)
- Biological Data Science, MS (ASBDSMS)
- Communication Studies, MA (ASCOMSTMA)
- English, MA (ASENGLMA)
- Forensic Psychology, MS (ASFPSYMS)

- Forensic Science, MS (ASFOREMS)
- Forensic Science, PSM (ASFRSCIPSM)
- Human Factors in Forensic Science (Certificate), CERT (ASHFFSGRCT)
- Industrial and Organizational Psychology (Certificate), CERT (ASIOPGRCT)
- Interdisciplinary Studies, MA (ASINTERMA)
- Law and Psychology, PHD (ASLPSYPHD)
- Positive Psychology (Certificate), CERT (ASPPSYGRCT)
- Psychological Fundamentals of Well-being, CERT (ASPFWBGRCT)
- Psychological Science (Certificate), CERT (ASPSYSGRCT)
- Psychology (Data Science), MS (ASPSYDTSMS)
- Psychology (Industrial and Organizational Psychology), MS (ASPGSIOPMS)
- Psychology (Positive Psychology), MS (ASPGSPPMS)
- Psychology (Sport Psychology), MS (ASPGSSPMS)
- Psychology, MS (ASPGSMS)
- Science Communication (Certificate), CERT (ASSCOMGRCT)
- Social Data Science, MA (ASSTCMA)
- Social Justice and Human Rights (Certificate), CERT (ASJHRGRCT)
- Social Justice and Human Rights, MA (ASJHRMA)

Journalism and Mass Communication, Walter Cronkite School of

- Digital Audiences (certificate), CERT (CSDASGRCT)
- Digital Strategy and Audience Engagement, MS (CSDASMS)
- Investigative Journalism, MA (CSINVJOUMA)
- Journalism and Mass Communication, PHD (CSJMCPHD)
- Journalism, MA (CSJRNMA)
- Mass Communication, MMC (CSMCOMMMC)
- Media Research and Technology, MS (CSMRTMS)
- Science Communication, MA (CSSCOMMA)
- Sports Journalism, MA (CSSPJMA)
- Sports Strategic Communication, MA (CSSPSTCOMA)
- Strategic Communication (Health), MA (CSSTRCHEMA)
- Strategic Communication, MA (CSSTRCOMMA)

Law, Sandra Day O'Connor College of

- Biotechnology and Genomics, LL.M. (LWGENOMLLM)
- Health Care Compliance and Administration, MLS (LWHCCMLS)

- Health Law and Policy (Certificate), CERT (LWHLPGRCT)
- Human Resources and Employment Law, MHREL (LWHREMHREL)
- Indian Law (certificate), CERT (LWLAWGRCI)
- Intellectual Property Law (Certificate), CERT (LWIPLGRCT)
- Juris Doctor of Law, JD (LWJDJD)
- Law and Sustainability (Certificate), CERT (LWLSUSGRCT)
- Law, Science, & Technology (certificate), CERT (LWLAWSTCE)
- Laws (Global Legal Studies), LL.M. (LAWLGLPLLM)
- Laws, LL.M. (LAWLAWSLLM)
- Legal Studies, MLS (LWLGSMLEGS)
- Sports Law and Business, MSLB (LWSLBMSLB)
- Trial Advocacy (Certificate), CERT (LWTAGRCT)
- Tribal Policy, Law and Government, LL.M. (LWTBLMLAWS)

Liberal Arts and Sciences, The College of

- Actuarial Science, MS (LAACTMS)
- Addiction and Substance-Use Related Disorders (certificate), CERT (LAASRDGRCT)
- Addiction Psychology, MS (LAADPSYMS)
- African and African American Studies (certificate), CERT (LAAFRICACE)
- American Indian Studies (Cultural Resource Revitalization and Sustainability), MS (LAAISCMS)
- American Indian Studies (Indigenous Rights and Social Justice), MS (LAAISIMS)
- American Indian Studies (Tribal Leadership and Governance), MS (LAAISTMS)
- American Indian Studies (Visual and Oral Culture), MS (LAAISVMS)

Undergraduate Programs

Undergraduate Degrees (Program Descriptions)

Business, W. P. Carey School of

- Accountancy, BS (BAACCBS)
- Applied Business and Technology Solutions, BA (BAAPBTSBA)
- Artificial Intelligence in Business, BS (BAAIBBS)
- Business (Accounting and Business Decisions), BA (BABUSCABA)
- Business (Agribusiness Innovation and Technology), BA (BABUSGAGBA)
- Business (Applied Supply Chains), BA (BABUSGLBA)
- Business (Business Administration), BA (BABUSBABA)
- Business (Communication), BA (BABUSCBA)
- Business (Financial Planning), BA (BABUSFPBA)
- Business (Food Industry Management), BA (BABUSFIMBA)
- Business (Global Leadership), BA (BABUSGBA)
- Business (Global Politics), BA (BABUSGPBA)
- Business (Health Care), BA (BABUSHCBA)
- Business (Human Resources), BA (BABUSHRBA)
- Business (Information Security), BA (BABUSISBA)
- Business (Language and Culture), BA (BABSLACUBA)
- Business (Law), BA (BABUSLBA)
- Business (Public Service and Public Policy), BA (BABUSPBA)
- Business (Retail Management), BA (BABUSRBA)
- Business (Sports Business), BA (BABUSMSBA)
- Business (Statistics), BA (BABUSTABA)
- Business (Sustainability), BA (BABUSSBA)
- Business (Technology), BA (BABUSTCBA)

- Business (Tourism), BA (BABUSTBA)
- Business Data Analytics, BS (BABDABS)
- Business Entrepreneurship, BS (BABUENTBS)
- Business Exploratory, Pre-Prof/E (BABUSEXP)
- Business, BA (BABUSBA)
- Computer Information Systems, BS (BACISBS)
- Economics, BS (BAECNBS)
- Entrepreneurial Leadership, BA (BAENTLBA)
- Finance, BS (BAFINBS)
- Financial Technology, BS (BAFINTBS)
- Logistics (Maritime), AS (BALGMARAS)
- Management, BS (BAMGTBS)
- Marketing (Digital), BS (BAMKDIMCBS)
- Marketing (Professional Sales), BS (BAMKTPSBS)
- Marketing, BS (BAMKTBS)
- Real Estate and Applied Finance, BS (BAREAFBS)
- Supply Chain Management, BS (BASCMBS)

Design and the Arts, Herberger Institute for

- Apparel Technical Design, AA (HIATDAA)
- Architectural Studies, BSD (ARSTDBSD)
- Art (Animation), BFA (HIARTANBFA)
- Art (Art Education), BFA (FAARTEBFA)
- Art (Art History), BA (FAARTHBA)
- Art (Art Studies), BA (FAARTSTDBA)
- Art (Art Therapy), BFA (HIARTATBFA)
- Art (Ceramics), BFA (FAARTCBFA)
- Art (Craft and Sculptural Practices), BFA (FAARTSBFA)
- Art (Digital Photography), BFA (HIARTDPBFA)
- Art (Drawing), BFA (FAARTDBFA)
- Art (Expanded Arts), BFA (FAARTIBFA)
- Art (Museum and Curatorial Practices), BA (FAARTMSBA)
- Art (Painting, Drawing and Printmaking), BFA (HIARTPDBFA)
- Art (Painting), BFA (FAARTPABFA)
- Art (Photography), BFA (FAARTPHBFA)
- Art (Printmaking), BFA (FAARTPMBFA)
- Art (Textiles), BFA (FAARTFBFA)

- Costume Design and Technology for the Creative Industries, BFA (HICOSBFA)
- Dance (Dance Education), BFA (FADANEBFA)
- Dance, BFA (FADANBFA)
- Environmental Design, BS (HIEDSBS)
- Fashion (Apparel Product Development), BA (HIFSHAPDBA)
- Fashion (Apparel Technical Design), BA (HIFSHATDBA)
- Fashion (Design), BA (HIFSHDBA)
- Fashion (Merchandising), BA (HIFSHMBA)
- Fashion Styling, AA (HIFSHAA)
- Fashion, BA (HIFSHBA)
- Film (Film and Media Production), BA (FAFLMBA)
- Film (Filmmaking Practices), BA (FAFPRBA)
- Film and Media Production (Cinematography), BFA (HIFMPCBFA)
- Film and Media Production (Directing), BFA (HIFMPDBFA)
- Film and Media Production (Post-Production), BFA (HIFMPPBFA)
- Film and Media Production (Screenwriting), BFA (HIFMPSBFA)
- Film and Media Production, BFA (HIFMPBFA)
- Game Design, BS (HIGMDESBS)
- Game Studio Production, BS (HIGSPBS)
- Graphic Design, BSD (ARGRABSD)
- Industrial Design, BSD (ARINDBSD)
- Interior Design, BSD (ARINTBSD)
- Landscape Architecture, BSLA (ARPLABSLA)
- Media Arts and Sciences (Art), BA (HIDGCABA)
- Media Arts and Sciences (Design), BA (HIDGCDBA)
- Media Arts and Sciences (Education), BA (HIMASEDBA)
- Media Arts and Sciences (English), BA (HIDGCENBA)
- Media Arts and Sciences (Film), BA (HIDGCFBA)
- Media Arts and Sciences (Games and Interactive Media), BS (HIMASGIMBS)
- Media Arts and Sciences (Graphic Information Technology), BA (HIDGCTEBA)
- Media Arts and Sciences (Interdisciplinary Arts and Performance), BA (HIDCIAPBA)
- Media Arts and Sciences (Media Processing), BS (HIDGCMPBS)
- Media Arts and Sciences (Music), BA (HIDGCMBA)
- Media Arts and Sciences (Theatre), BA (HIDGCTBA)
- Media Arts and Sciences, BA (HIDGCBA)

Merchandising, AA (HIMERCHAA)

Music (Music and Culture), BA (HIMUSMCBA)

Music (Popular Music), BA (HIMUSPMBA)

Music Learning and Teaching, BMUS (FAMUSEBM)

Music Therapy, BMUS (FAMUSTHBM)

Music, BA (FAMUSBA)

Performance (Collaborative Piano), BMUS (FAMUSPPBM)

Performance (Guitar), BMUS (FAMUSPGBM)

Performance (Jazz), BMUS (FAMUSPJBM)

Performance (Keyboard), BMUS (FAMUSPKBM)

Performance (Music Theatre), BMUS (FAMUSPMBM)

Performance (Orchestral Instrument), BMUS (FAMUSPOBM)

Performance (Voice), BMUS (FAMUSPVBM)

Performance and Movement, BA (HIPERMVBA)

The Arts, BA (FAATSBA)

Theatre (Acting), BA (FATHEABA)

Theatre (Design and Production), BA (FADSNPRBA)

Theatre, BA (FATHEBA)

Theory and Composition (Composition), BMUS (FAMUSTCBM)

Theory and Composition (Theory), BMUS (FAMUSTTBM)

Engineering, Ira A. Fulton Schools of

Aeronautical Management Technology (Air Traffic Management), BS (ESAMTATBS)

Aeronautical Management Technology (Air Transportation Management), BS (TSAMTMBS)

Aeronautical Management Technology (Professional Flight), BS (TSAMTFBS)

Aeronautical Management Technology (Unmanned Aerial Systems), BS (TSAMTUASBS)

Aerospace Engineering (Aeronautics), BSE (ESAEROBSE)

Aerospace Engineering (Astronautics), BSE (ESAEASBSE)

Aerospace Engineering (Autonomous Vehicle Systems), BSE (ESAEAVSBSE)

Applied Science (Aviation), BAS (TSAMTABAS)

Applied Science (Graphic Information Technology), BAS (TSGITBAS)

Applied Science (Internet and Web Development), BAS (TSIWDBAS)

Applied Science (Operations Management), BAS (TSIMCOBAS)

Biomedical Engineering (Biological Devices), BSE (ESBMEBDBSE)

Biomedical Engineering (Biomedical Devices), BSE (ESBMEMDBSE)

Biomedical Engineering, BSE (ESBMEBSE)

Chemical Engineering, BSE (ESCHEBSE)

Civil Engineering (Sustainable Engineering), BSE (ESCEESUBSE)

Civil Engineering, BSE (ESCEEBSE)

Computer Science (Artificial Intelligence), BS (ESCSEAIBS)

Computer Science (Cybersecurity), BA (ESCSEIBA)

Computer Science (Cybersecurity), BS (ESCSEIBS)

Computer Science (Software Engineering), BS (ESCSESBS)

Computer Science and Artificial Intelligence, AS (ESCSEAIAS)

Computer Science, BA (ESCSEBA)

Computer Science, BS (ESCSEBS)

Computer Systems Engineering (Cybersecurity), BSE (ESCSEIBSE)

Computer Systems Engineering, BSE (ESCSEBSE)

Construction Engineering, BSE (ESCONBSE)

Construction Management and Technology, BS (ESCONMGTBS)

Electrical Engineering (Electrical Power and Energy Systems), BSE (ESEEEPBSE)

Electrical Engineering, BSE (ESEEEBSE)

Engineering (Automotive Systems), BSE (TSEGRASBSE)

Engineering (Clean Energy Systems), BSE (ESEGRCEBSE)

Engineering (Electrical Systems), BSE (TSEGRESBSE)

Engineering (Mechanical Engineering Systems), BSE (TSEGRMEBSE)

Engineering (Robotics), BSE (TSEGRRBSE)

Engineering Management, BSE (ESEMGBSE)

Engineering Science (Business), BS (ESESCBUSBS)

Engineering Science (Microelectronics), BS (ESESCMEBS)

Engineering, BSE (TSEGRBSE)

Environmental and Resource Management, BS (TSETMBS)

Environmental Engineering, BSE (ESEVEBSE)

Graphic Information Technology (Full-Stack Web Development), BS (ESGITFSWBS)

Graphic Information Technology (User Experience), BS (ESGITUEBS)

Graphic Information Technology, BS (TSGITBS)

Human Systems Engineering (User Experience), BS (ESHSEUEBS)

Human Systems Engineering, BS (ESHSEBS)

Industrial Engineering, BSE (ESIEEBSE)

Informatics, BS (ESCPIBS)
Information Technology (Cybersecurity), BS (ESIFTCSBS)
Information Technology (Networking), BS (ESIFTNBS)
Information Technology, BS (TSIFTBS)
Manufacturing Engineering, BS (TSMEGRBS)
Manufacturing Systems, BAS (ESMFGSYBAS)
Materials Science and Engineering, BSE (ESMSEBSE)
Mechanical Engineering (Computational Mechanics), BSE (ESMAECBSE)
Mechanical Engineering (Energy and Environment), BSE (ESMAEEBSE)
Mechanical Engineering, BSE (ESMAEMBSE)
Robotics and Autonomous Systems, BS (ESRASBS)
Robotics and Autonomous Systems, BSE (ESRASBSE)
Software Engineering, BS (TSSERBS)
Technological Entrepreneurship and Management, BS (TSTEMBS)

Global Futures, Rob Walton College of

Complexity Science, BS (LAAMLBS)
Innovation in Society, BA (FIFISBA)
Innovation in Society, BS (FIFISBS)
Ocean Futures (Coastal and Marine Science), BS (GFSEACMSBS)
Ocean Futures, BS (GFSEABS)
Sustainability, BA (SUSUSTBA)
Sustainability, BS (SUSUSTBS)
Sustainable Food Systems, BS (SUSFOSYSBS)

Global Management, Thunderbird School of

Global Management, BGM (TBTGMBGM)
International Trade, BS (TBINTRABS)

Health Solutions, College of

Applied Nutrition and Health, BS (NHFNUENBS)
Applied Science (Applied Nutrition and Health), BAS (ECNTRBAS)
Applied Science (Health Sciences), BAS (NUHSCBAS)
Applied Science (Medical Laboratory Science), BAS (NUMLSBAS)
Biomedical Informatics and Data Science, BS (ESBMIBS)
Clinical Exercise Science, BS (ECEXERBS)

Dietetics, BS (NHDIETCSBS)
Health Care Administration and Policy, BS (NHHCDBS)
Health Education and Health Promotion, BS (NHHEHPBS)
Health Sciences (Healthy Lifestyles and Fitness Science), BS (NUHSCHLCBS)
Health Sciences (Pre-Professional), BS (NUHSCPREBS)
Health Sciences, BS (NHHSCBS)
International Public Health, BIPH (NHIPHBIPH)
Kinesiology, BS (NUKINBS)
Medical Studies, BS (NHMEDBS)
Nutrition (Dietetics), BS (ECNTRDBS)
Nutrition, BS (NHNTRBS)
Nutritional Science, BS (NHNUSCIBS)
Population Health, BS (NHPOPHLBS)
Speech and Hearing Science, BS (LASHSBS)
Sports Science and Performance Programming (Strength and Conditioning), BS (NHSSPPSCBS)
Sports Science and Performance Programming, BS (NHSPTSPPBS)

Honors - Barrett, The Honors College

Honors College (9HOHONALL)

Integrative Sciences and Arts, College of

Applied Biological Sciences (Natural Resource Ecology), BS (LSABSNRBS)
Applied Biological Sciences (Pre-Dental), BS (LSABSPDBS)
Applied Biological Sciences (Preveterinary Medicine), BS (LSABSPMBS)
Applied Biological Sciences (Secondary Education in Biology), BS (TSABSSBS)
Applied Biological Sciences (Sustainable Horticulture), BS (TSABSUBS)
Applied Biological Sciences, BS (TSABSABS)
Applied Mathematics, BS (LSMATBS)
Applied Military and Veterans Studies, BA (LSAMVSBA)
Applied Physics, BS (LSAPHYBS)
Applied Quantitative Science, BS (LSAQSBS)
Applied Science (Animal Biology), BAS (LSANBIOBAS)
Applied Science (Applied Leadership), BAS (LSALSBAS)
Applied Science (Project Management), BAS (LSAPSPMBAS)
Applied Science (Technical Communication), BAS (LSTECBAS)
Communication, BA (LSCOMBA)

Counseling and Applied Psychological Science (Counseling Military Members and Veterans), BS (LSCAPSMVBS)

Counseling and Applied Psychological Science (Sexuality and Gender Issues in Counseling), BS (LSCAPSSGBS)

Counseling and Applied Psychological Science (Sport and Performance Counseling), BS (LSCAPSSPBS)

Counseling and Applied Psychological Science (Substance Abuse and Addictions), BS (LSCAPSAABS)

Counseling and Applied Psychological Science, BS (LSCAPSBS)

English, BA (LSENGBA)

General Studies, BA (LSGNSBGS)

History (Military and Veterans Studies), BA (LSHISVSSBA)

History of Science, Technology and Innovation, BA (LSHSIIBA)

History, BA (LSHISBA)

Integrative Social Science, BS (LSISSBS)

Interdisciplinary Studies (Organizational Studies), BA (LSORGBIS)

Interdisciplinary Studies, BA (LSBISBIS)

Liberal Studies, BA (LABLSBLS)

Military Studies, AA (LSMILSTAA)

Organizational Leadership (Military and Veterans Studies), BA (LSORGLVSBA)

Organizational Leadership (Project Management), BA (LSORGLPMBA)

Organizational Leadership, AA (LSORGLAA)

Organizational Leadership, BA (LSORGLBA)

Political Science, BS (LSPOLBS)

Professional Studies, AA (LSPRFSTAA)

Project Management, BS (LSPMGBS)

Psychology, BA (LSPGSBA)

Psychology, BS (LSPGSBS)

Science, Technology and Society, BS (ECSTSBS)

Technical Communication (Data Visualization), BS (LSTECDVBS)

Technical Communication (Medical and Health), BS (LSTECMHBS)

Technical Communication (Social Media Management), BS (LSTECSMMBS)

Technical Communication (User Experience), BS (LSTECUBS)

Technical Communication, BS (LSTECBS)

User Experience, BS (LSUSEXBS)

Interdisciplinary Arts and Sciences, New College of

Aging, BS (ASALDBS)
Applied Computing (Cybersecurity), BS (ASACOCBS)
Applied Computing, BS (ASACOBS)
Applied Mathematics, BS (ASMATBS)
Applied Science (Biotechnology), BAS (ASBASBTBAS)
Applied Science, BAS (ASBASBAS)

Graduate Programs

Graduate Degrees (Program Descriptions)

Business, W. P. Carey School of

Accountancy and Data Analytics, MAcc (BAACCMACC)

College/School: W. P. Carey School of Business

Campus: Tempe, Online

Program description

The Master of Accountancy program can be completed in one year. The program is delivered by the highly regarded School of Accountancy, which has been accredited by the AACSB since 1987. This program is offered in person or online, providing flexibility if you are a working professional. A pathway program (https://wpcarey.asu.edu/accounting-degrees/pathway-program) is available if you have a nonaccounting background to prepare for success in the master's degree program.

Infused with a data and analytics emphasis, the developed curriculum is structured to provide you with an in-depth working knowledge of advanced accounting topics that are most relevant in today's business environment and reviewed every year with input from accounting professionals and alumni. Esteemed faculty experts bring practical experience into each class, giving the degree even more long-term value.

The MAcc program is designed for to help you pursue professional success in accounting --- whether you are working toward Certified Public Accountant licensure or preparing for other advanced roles in the field. The high quality of the program enables you to gain the skills and knowledge needed to launch your accounting career, opening the door to top hiring firms.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Business (Accounting and Business Decisions), BA

Accountancy, BS

Business (Financial Planning), BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (ACC 512)

Required Core (3 credit hours)
ACC 586 Shareholder Value Creation and Financial Statement Analysis (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)
ACC 512 Advanced Auditing (3)

Additional Curriculum Information
Students should see the academic unit for an approved list of elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have a foundational knowledge of accounting principles demonstrated by either a bachelor's degree in accountancy or proficiency achieved through an approved bridge or boot camp.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts of all coursework completed at institutions other than ASU
• one letter of recommendation
• current resume
• short answer question responses
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and opportunity for success in the program.

Complete application instructions may be obtained from the department's website.

Applicants must complete program prerequisites (https://wpcarey.asu.edu/masters-programs/accounting/academics?sort-by=last_name_asc#prerequisites) before admission to the program. Graduate-level accounting courses are open only to students admitted to the graduate program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/accountancy-data-analytics) for program descriptions and to request more information.

Career opportunities

The MAcc program is designed for individuals pursuing professional success in accounting, whether they are working toward Certified Public Accountant licensure or preparing for other advanced roles in the field. The high quality of the program gives graduates the skills and knowledge needed to launch their accounting careers, opening the door to top hiring firms.

Graduates are prepared with the essential academic preparation to pursue professional careers in public, corporate and governmental accounting, as well as consulting or financial planning.

Career examples include:

- accountant
- auditor
- budget analyst
- tax auditor

Business Administration (Accountancy), PHD (BAACCTPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

In the Doctor of Philosophy program in business administration with a concentration in accountancy, you develop the capability to review, analyze, conduct and publish research.

The curriculum consists of a series of research seminars and theory-building and statistical coursework that supplement and complement your abilities and interests. In addition, you participate in ongoing research projects in conjunction with faculty members in the School of Accountancy.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
This program consists of 12 credit hours of dissertation and 72 credit hours of coursework and research. Students may not apply credit hours earned from a previously awarded doctoral degree from ASU or another institution toward their current ASU doctoral degree. However, at the academic unit's discretion, students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral plan of study.

Students work with their study committees to determine an appropriate plan of study. Common areas of functional specialization include financial and managerial accounting, auditing and taxation. Within these functional areas, doctoral studies may emphasize experimental or archival research methods. All accountancy doctoral students are

required to take a three-semester sequence of accountancy doctoral coursework. A maximum of 12 approved graduate credit hours may be transferred to satisfy program requirements.

Comprehensive Examinations
Once the student has completed all necessary coursework on their approved plan of study, the academic unit may initiate the scheduling and administering of the student's comprehensive examinations, which consist of a minimum of a written exam; an oral exam may also be required at the discretion of the academic unit.

Candidacy
After they pass their comprehensive examinations and successfully defend their dissertation prospectus, doctoral students receive a letter from the dean of the Graduate College indicating that they have achieved candidacy status.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled in at least one credit hour that appears on the plan of study or one hour of appropriate graduate-level credit, such as 795 Continuing Registration, during the semester (including a summer session) in which the student defends the dissertation.

For detailed information regarding the university's doctoral degree requirements, students should refer to the Graduate College policy and procedures for a Doctor of Philosophy program.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GMAT scores
• portfolio
• letters of recommendation
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applications are initially reviewed by a School of Accountancy doctoral committee using a portfolio approach. GMAT scores, prior academic performance, letters of recommendation and a personal statement are reviewed to ensure a good match between the applicant's goals and the school. Recommendations for action are then made to the director of doctoral programs in the W. P. Carey School of Business, who in turn makes recommendations to Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for careers at leading research universities. Career opportunities include these positions:

- professor
- researcher in accounting
- research professor

Business Administration (Agribusiness), PHD (BAAGRIPHD)

College/School: W. P. Carey School of Business

Campus: Polytechnic

Program description

The discipline of agribusiness applies theory and quantitative methods in economics, finance, marketing and management to issues involved in the production, distribution, and marketing of food and fiber. As a doctoral agribusiness student, you become involved with research in:

• agribusiness management
• derivatives, commodity marketing and risk management
• food and fiber supply chain management
• food marketing
• food policy and promotion
• global agricultural trade and policy
• strategic marketing by food retailers

The interdisciplinary Doctor of Philosophy program in business administration with a concentration in agribusiness trains you in the latest methods of business and economic analysis and prepares you to lead problem-solving in a vital sector of the global economy.

This program is offered by the W. P. Carey School of Business and the Morrison School of Agribusiness.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
At least 30 credit hours (including research credit) of the approved doctoral program and 12 dissertation credit hours must be completed after admission to the doctoral program. Students may not apply credit hours earned for a previously awarded doctorate degree from ASU or another institution toward their current ASU doctorate. However, at the individual academic unit's discretion, students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral plan of study.

Agribusiness doctoral students are expected to develop a program of study that consists of three elements. Students study core theory and quantitative methods coursework in economics and management from the Morrison School of Agribusiness as well as advanced courses in at least one of these areas in the W. P. Carey School of Business: economics, finance, marketing, supply chain management or management. Students also complete a three-course sequence of doctorate-level theory and methods from the Morrison School of Agribusiness as applied to issues and concepts specific to the agribusiness sector.

The agribusiness doctorate is designed to allow flexibility with focus; each student's program of study is distinct but is designed to produce the highest level of research competency in the student's chosen area of interest.

Comprehensive Examinations
After the student has completed all necessary coursework on their approved program of study, the academic unit may initiate the student's comprehensive examination process. The examination consists of, at minimum, a written exam; an oral exam may also be required at the discretion of the academic unit.

Candidacy
Doctoral students are notified that they have achieved candidacy status in a letter from the dean of the Graduate College after passing the comprehensive examinations and successfully defending the dissertation prospectus.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled in at least one credit hour that appears on the plan of study or one hour of appropriate graduate-level credit, such as 795 Continuing Registration, during the semester (including summer session) in which the student defends the dissertation.

For detailed information regarding the university's doctoral degree requirements, students should refer to the Graduate College policies and procedures.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• official GRE general exam or GMAT scores
• personal statement
• current curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Complete information on the English proficiency exams and other required documents can be found on the Graduate Admission Services (https://admission.asu.edu/apply/international/graduate) website.

ASU does not accept the GRE General Test at home edition.

Applicants must submit all the items listed above to complete an application file. Incomplete files are not reviewed.

An explanation of the applicant's goals should be addressed in the personal statement.

Students should see the program website for application deadlines. Late applications may be considered for the same application term or for the next term of admission; however, the department reserves the right to deny or not review a late application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the doctoral program in business administration at one of the largest public universities in the U.S. have learned from thought leaders in their respective fields and benefitted from the university's tremendous resources. Agribusiness graduates are expected to assume teaching and research positions at top-ranked research universities.

Career opportunities include:

- data scientist
- economic consultant
- market analyst
- professor
- research economist

Artificial Intelligence in Business, MS (BAAIBMS)

College/School: W. P. Carey School of Business

Campus: Tempe, ASU at Los Angeles, Online

Program description

In the Master of Science program in artificial intelligence in business, you develop technical AI and professional skills needed for success in the constantly evolving landscape of technology and business. The program emphasizes mindful implementation; you learn the implications and possibilities enabled by AI, in addition to the importance of governance and principled innovation. You gain the necessary foundation to excel in evolving fields, with a focus on mindful AI that sets you apart in the workforce. An optional third-semester custom track enables you to maximize the value of your degree by selecting additional courses from a variety of topics.

Anchored in the triad of mindful AI --- business domain knowledge, technical understanding and ethical awareness --- the program aims to cultivate you to be a part of a highly skilled workforce proficient in thoughtfully applying AI across various industries and sectors. The demand for AI professionals is expected to grow as more companies invest in AI technologies to improve their operations and customer experiences. You can prepare to meet this demand with dedicated resources and career coaching from the W. P. Carey Career Services Center (https://career.wpcarey.asu.edu/).

The Department of Information Systems conducts inspirational and impactful research (https://wpcarey.asu.edu/information-systems-degrees/faculty-research) that helps advance the frontiers of knowledge. The department incorporates state-of-the-art knowledge and advanced technology in teaching and seeks meaningful engagement with students, corporate stakeholders and society.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Global Management, MGM

Global Management (Global Business), MGM

Global Management (Global Digital Transformation), MGM

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Economics, BS

Business (Technology), BA

Business (Applied Supply Chains), BA

Financial Technology, BS

Real Estate and Applied Finance, BS

Business (Agribusiness Innovation and Technology), BA

Business (Accounting and Business Decisions), BA

Marketing (Digital), BS

Business (Statistics), BA

Business (Sports Business), BA

Business Data Analytics, BS

Accountancy, BS

Business (Business Administration), BA

Business (Information Security), BA

Marketing (Professional Sales), BS

Marketing, BS

Business (Sustainability), BA

Business Entrepreneurship, BS

Artificial Intelligence in Business, BS

Business (Financial Planning), BA

Management, BS

Supply Chain Management, BS

Computer Information Systems, BS

Business (Food Industry Management), BA

Business (Retail Management), BA

Finance, BS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (CIS 576)

Required Core (6 credit hours)
CIS 565 Artificial Intelligence in Business (3)
CIS 568 AI Business Strategy (3)

Electives (21 credit hours)

Culminating Experience (3 credit hours)
CIS 576 Transforming Business with AI (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in business or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• responses to short-answer questions
• one letter of recommendation
• professional resume
• written statement
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

Complete application instructions may be obtained from the department website (https://wpcarey.asu.edu/information-systems-degrees).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/artificial-intelligence-business/) for program descriptions and to request more information.

Career opportunities

Graduates are equipped with the in-demand technical and business acumen needed to excel in the rapidly changing realms of technology and business.

The AI market is experiencing rapid growth, with worldwide AI spending projected to top $2 trillion in 2026 and updated long-term forecasts indicating a multitrillion-dollar economic impact within the next five years. Similarly, AI and machine learning specialists are among the fastest-growing roles worldwide. The World Economic Forum projects

net job growth of 78 million jobs globally by 2030, driven largely by AI and related technologies.

According to McKinsey, 86% of business leaders expect AI and digital technologies to fundamentally transform their organizations. Compensation for AI roles remains strong, particularly for mid-career positions at major technology firms. Early career salaries vary depending on experience, geographic location and industry focus.

Career examples include:

- AI consultant
- AI entrepreneur
- AI product or project manager
- AI specialist
- big data analyst
- business intelligence analyst
- chatbot developer
- data analyst
- machine learning engineer
- Python developer

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a master's degree in business administration or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Curriculum Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The professional resume and personal statement should reflect a minimum of seven years of relevant leadership experience.

There are no length or content requirements for the personal statement or the letters of recommendation.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates can pursue opportunities in a variety of industries to analyze and solve global supply chain challenges. They are prepared to advance into roles as:

- administrators
- corporate executives
- senior consultants
- university teaching faculty

Business Analytics, MS (BABUSANMS)

College/School: W. P. Carey School of Business

Campus: Tempe, Online

Program description

Delivered by the highly ranked W. P. Carey departments of Information Systems and Supply Chain Management, the STEM-designated Master of Science program in business analytics builds on the quantitative skills and knowledge needed to advance on the analytics career ladder.

Data is becoming vital to today's world, making business analytics specialist one of the most valuable careers. You learn to extract value from data, lead data-driven projects and create an overall impact within business organizations. You can choose from five specializations to deepen your focus in one specific area: big data, cloud computing and tech consulting, fintech, marketing analytics or supply chain analytics.

Two formats are available for this program. The first pathway is the full-time program --- designed to immerse you in full-time graduate studies --- which takes nine months or 16 months, depending on the specialization track chosen. The second is the online delivery option in which you deepen skills in business analytics and learn more about evolving topics in this field. This option is ideal if you are a busy working professional who is looking to continue working full time while attending school.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Business Data Analytics, BS

Supply Chain Management, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project courses (SCM 593 and CIS 593)

Required Core (6 credit hours)
CIS 509 Analytics for Unstructured Data (3)
SCM 517 Business Process Analytics (3)

Electives (21 credit hours)

Culminating Experience (3 credit hours)
CIS 593 Applied Project (1.5)
SCM 593 Applied Project (1.5)

Additional Curricular Information
For electives, students should consult the academic unit for a list of approved courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• one letter of recommendation
• current resume
• short-answer question responses
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and opportunity for success in the program.

Complete application instructions may be obtained from the department website.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-business-analytics/) for program descriptions and to request more information.

Career opportunities

Graduates have the essential academic preparation required for roles that involve deriving value from data and modeling, leading data-driven analyses and creating critical business advantages.

Career examples include:

- business intelligence analyst
- computer database architect
- data analyst
- IT project manager

Business Administration (Computer Information Systems), PHD (BAINFSYPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The Department of Information Systems offers a computer information systems concentration within the Doctor of Philosophy degree in business administration, positioned at the intersection of AI, information technology and economics. This full-time doctoral program prepares you to be an exceptional scholar with a research-driven career at a top university or worldwide leading research institution.

You receive intensive research training through close collaboration with faculty on high-impact projects and develop rigorous skills in research design, empirical and computational methods, and scholarly writing. Research spans both established and rapidly evolving areas, including artificial intelligence, business analytics and big data, health care IT, fintech, information economics and strategy, security and privacy, and social media, e-commerce, and mobile platforms.

Faculty and PhD students regularly present their work at premier international conferences and publish in top-tier academic venues. Graduates of the program consistently publish in leading information systems journals and top AI conferences, underscoring the program's strong interdisciplinary reach and global visibility.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
The doctoral program consists of a minimum of 84 credit hours of graduate-level coursework beyond the bachelor's degree. A minimum of 42 credit hours of doctoral coursework and 12 credit hours of dissertation must be taken at Arizona State University's Tempe campus. At the department's discretion, students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral plan of study.

Students work with their program committees to determine an appropriate plan of study. Students can complete coursework in the following areas:

• artificial intelligence and machine learning
• business analytics and big data
• financial technology
• generative AI and large language models
• health care information technology
• information economics and strategy
• mindful AI and human-AI interaction
• security and privacy
• social media, e-commerce and mobile platforms

Comprehensive Examinations
Upon completion of all necessary coursework on a student's approved plan of study, the academic unit may initiate the scheduling and administering of the student's comprehensive examination. At minimum, the comprehensive examination consists of a written exam, and an oral exam may also be required by the academic unit.

Candidacy
Doctoral students are notified of achieving candidacy status by receipt of a letter from the dean of the Graduate College upon passing the comprehensive examinations and successfully defending the dissertation prospectus.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctoral degree. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled for at least one credit hour that appears on the plan of study, or one hour of appropriate graduate-level credit, such as 795 Continuing Registration, during the semester, including summer session, in which the student defends the dissertation.

For detailed information regarding the university's doctoral degree requirements, students should refer to the Graduate College policies and procedures.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee

• official transcripts
• GMAT or GRE score
• proof of English proficiency
• three letters of recommendation
• personal statement

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International applicants whose native language is not English must submit scores from the TOEFL iBT®. For more information on requirements, students should review the program's website. They should also review the admission services (https://admission.asu.edu/apply/international/graduate) website for specific ASU admission requirements.

A master's degree or MBA is recommended; 30 credit hours may count toward the minimum of 84 hours of coursework in the doctoral program. At least two years of full-time related work experience is recommended.

Doctoral students admitted to the W. P. Carey School of Business must have demonstrated competency in mathematics, strong quantitative ability, competency in the use of computer technology for analytical purposes, and an undergraduate degree in a related field from an accredited university.

Applications are reviewed by the department's faculty committee using a portfolio approach. The committee reviews each individual application and examines all parts equally.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for a career at leading research universities.

Career opportunities include professor and research scientist.

Economics, MS (BAECONMS)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The Master of Science program in economics incorporates applied learning experiences, flexible elective options and career coaching to prepare you for success in challenging roles across industries. You learn economic modeling tools and gain skills you can leverage to transform businesses, government and society.

For the first half of the program, you take core courses in microeconomics, macroeconomics, and data science and econometrics taught by leading economists with an extensive research record on these topics. You choose from a

variety of interdisciplinary electives to align the program with your career goals.

Additionally, you attend a summer math boot camp before the program starts to brush up on key concepts.

The W. P. Carey Career Services Center (https://career.wpcarey.asu.edu/) provides resources and career coaching that you can access throughout the program.

In the last 40 years, the Department of Economics (https://wpcarey.asu.edu/economics-degrees) has become well known for its contributions to several fields of economics, including applied microeconomics, macroeconomics, economic theory, environmental economics, public finance, labor economics and economics of education.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours including the required applied project course (ECN 593)

Required Core (18 credit hours)
ECN 530 Microeconomics I (3)
ECN 532 Microeconomics II (3)
ECN 531 Macroeconomics I (3)
ECN 533 Macroeconomics II (3)
ECN 560 Data Science and Econometrics I (3)
ECN 565 Data Science and Econometrics II (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)
ECN 593 Applied Project (3)

Additional Curriculum Information
Students should see the academic unit for an approved list of elective coursework. It is strongly recommended that students take an optional career coaching course through WPC 502. This course does not count for credit but strengthens students' experience and helps them build skills for their future careers.

For their culminating experience, students find local companies; work in assigned groups to analyze the problems that these companies are facing; and come up with practical, relevant solutions. Faculty members involved in the program are assigned to each group as the project advisor. At the end of the project, students write their own paper on the project and are evaluated individually.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts of all coursework completed at institutions other than ASU
• one letter of recommendation
• current resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates have the essential academic preparation to pursue a professional career in the fields of economics, corporate financial analysis and planning, commercial banking and insurance. Graduates are prepared for roles in banking, management, consulting, investment and government. Potential careers include:

- actuary
- budget analyst
- data scientist
- economist
- financial analyst
- market research analyst

Economics, PHD (BAECONPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

In the Doctor of Philosophy program in economics, you receive rigorous training in microeconomic theory, macroeconomic theory, applied economics and econometrics. Additionally, you may select a primary area of specialization for study:

• applied microeconomics
• econometrics

• economic theory
• environmental and resource economics
• financial economics
• macroeconomics

This full-time doctoral program prepares you for teaching and research positions at four-year institutions of higher education and for research positions in public agencies or private business organizations.

The program is relatively small, with about 45 doctoral students in residence at any time. The low student-to-faculty ratio affords you greater faculty attention and mentoring than larger programs. You become a valued member of the department, involved in teaching, research and seminar activities.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

In addition to completing 60 credit hours beyond the bachelor's degree (30 credit hours beyond the master's degree) and 24 credit hours of research and dissertation, the doctoral student must accomplish five tasks:
• meet the qualifying examination requirement
• present at least one area of emphasis
• pass the comprehensive examination (both written and oral components)
• pass the dissertation proposal defense
• complete a dissertation with an oral defense

Students should see the Department of Economics graduate student handbook for details concerning these tasks.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GRE scores
• three letters of recommendation

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Department of Economics requires applicants to send official GRE scores from their ETS account directly to Graduate Admission Services. Applications are not reviewed until GRE scores are received. ASU does not accept the GRE® General Test at home edition.

The admission policy weighs several factors, including letters of reference, overall GPA, GRE scores, and performance in selected mathematics and economics courses. There are no absolute standards for any of the factors, but performance on each should clearly indicate academic potential that is far above that of the average undergraduate student.

Admission guidelines are available on the Graduate Admission Services website. Applicants should see the program website for application deadlines and admission terms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with a W. P. Carey School of Business doctorate in economics embark on careers in research and academia, learning from thought leaders in their respective fields and gaining the resources of one of the largest universities in the U.S.

Career opportunities include:

- assistant professor
- economist
- research associate

Entrepreneurship and Innovation, MS (HIIVDMS)

College/School: W. P. Carey School of Business
Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Science program in entrepreneurship and innovation integrates the most advanced practices and technologies from business, engineering and design in a transdisciplinary, experience-based program. You are prepared to be a part of the next generation of leaders, with the skills needed to launch successful ventures in any industry or sector, inside existing organizations or as new entities. This program prepares you to define a new standard for venture development and helps intrapreneurs create change within existing organizations.

You prepare to lead cross-disciplinary teams in a world of growing uncertainty. You are able to identify needs, evaluate opportunities, generate insights from concrete problems, innovate solutions, and create and launch scalable business

models that provide value to all stakeholders.

Four optional tracks --- applied AI and business analytics, marketing, financial technology, and supply chain management --- provide additional experience and knowledge while adding only one semester to the program.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Business (Sports Business), BA

Entrepreneurial Leadership, BA

Business Entrepreneurship, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (MGT 593)

Required Core (3 credit hours)
IVD 562 Innovation Studio III: Explore, Fail, Solve (3)

Electives or Research (24 credit hours)

Culminating Experience (3 credit hours)
MGT 593 Applied Project (3)

Additional Curriculum Information
Students complete MGT 593 twice for 1.5 credit hours each time, for a total of three credit hours. Students should see the academic unit for a list of approved elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of the Graduate College, the Herberger Institute for Design and the Arts, the Ira A. Fulton Schools of Engineering and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree in business, design, engineering or a related field from a

regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• written statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The applicant's written statement should describe a professional experience that highlights their use of innovation and entrepreneurial skills.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Career opportunities for graduates include:

- chief innovation officer
- creative developer
- director of engineering
- founder or CEO
- innovation manager
- management consultant
- marketing director
- product developer

Finance, MS (BAFINMS)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

In the Master of Science program in finance, you develop deep expertise in corporate finance and asset or portfolio management and equip yourself with the tools needed to manage complex financial institutions. This is one of the few advanced finance degree programs offered by a top-ranked business school and provides you with a foundation in business and finance. You have access to highly distinguished faculty, motivated classmates and personalized career resources.

Faculty members bring advanced research and decades of practical experience into the classroom. Classes are offered full time during the week in a lockstep course format that enables you to build on concepts throughout the program. The program offers two tracks --- corporate finance and investments, and analytical methods --- to help you align your degree with your career goals.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Finance, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

33 credit hours including the required capstone course (FIN 575)

Required Core (15 credit hours)
ACC 502 Financial Accounting (3)
FIN 502 Managerial Finance (3)
FIN 509 Quantitative Methods in Finance I (3)
FIN 525 Investment Strategies (3)
FIN 530 Derivatives (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)
FIN 575 Finance Capstone (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution in business and management, economics, statistics, computer science, or other types of science, engineering, technology and mathematics areas.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter

hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• one letter of recommendation
• short-answer question responses
• current resume
• proof of English language proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

There are two main audiences for the program: recent undergraduates from business, economics or related majors or from programs in which quantitative skills have been emphasized, and career advancers who have strong quantitative skills and seek to adapt those skills to be more competitive in the job market. Career advancers must be able to commit to a full-time plan of study; the program may not cater to working professionals as it is currently designed.

This program is appropriate for students who have completed undergraduate programs with quantitative underpinnings at ASU or other universities.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

Complete application instructions may be obtained from the department's website.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are well prepared for the CFA Level I exam, the first step toward becoming a Chartered Financial Analyst®.

They have the essential academic preparation to pursue professional careers in corporate finance, risk management, money management, financial planning, investment banking, consulting or real estate.

Career examples include:

- budget analyst
- financial analyst
- financial manager
- investment specialist

Business Administration (Finance), PHD (BAFINANPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The primary objective of the Doctor of Philosophy program in business administration with a concentration in finance is to train you for a career as a professor of finance at major research universities.

The program provides you with a challenging course of study focused on the most recent developments in the theoretical and empirical aspects of financial economics. Combined with work in economics and statistics, the program gives you a foundation for understanding and critically analyzing current issues in finance.

You learn from thought leaders in their respective fields and draw on the resources of the largest public university in the U.S. The faculty produce advanced empirical research in the areas of equity markets, corporate finance, organization structure, international finance, financial institutions and asset pricing. The program is relatively small, promoting faculty-student mentoring relationships; you receive personal attention.

The program seeks highly capable students with strong academic backgrounds and, preferably, work experience.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
At least 30 credit hours of the approved doctoral degree program, which may include research credit, and 12 dissertation credit hours must be completed after admission to the program. Students may not apply credit hours earned for a doctoral degree previously awarded at ASU or at another institution toward this doctoral degree. However, at the individual academic unit's discretion, students may apply up to 30 relevant credit hours from a previously awarded master's degree toward their doctoral plan of study.

Comprehensive Examinations
After the student has completed all necessary coursework on their approved plan of study, the academic unit may initiate the scheduling and administering of the comprehensive examination. At minimum, the examination consists of a written exam; the academic unit may also require an oral exam.

Candidacy
Doctoral students are notified that they have achieved candidacy status by a letter from the dean of the Graduate College after passing the comprehensive examinations and successfully defending the dissertation prospectus.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled for at least one credit hour that appears on the plan of study or for one hour of appropriate graduate-level credit, such as 795 Continuing Registration, during the semester in which the student defends the dissertation, even if it is a summer session.

For detailed information regarding the university's doctoral degree requirements, students should refer to the Graduate College policy and procedures for the PhD.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three academic letters of recommendation
• GMAT or GRE scores
• a brief statement of their career objectives
• a resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The minimum TOEFL iBT® requirement is a score of at least 4, or a score of 80 (taken at a testing center) if taken before January 21, 2026. A score of 26 is required on the ASU Speaking Proficiency English Assessment Kit for applicants who wish to apply for teaching associateships.

Admission to the program is granted to applicants who present convincing evidence of high-order analytical skills, intellectual curiosity, the discipline required for original inquiry, and the ability to work independently in pursuing scholarly research.

While many accepted students have a Master of Business Administration or Master of Science in a business-related field, others have a background in other areas, such as engineering, economics, mathematics or physics.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are well prepared for careers in research and academia.

Career opportunities include:

- assistant professor
- professor
- researcher

Global Financial Management, DBA (BAGFMDBA)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

China is globalizing at an astonishing rate. This pace of change is profoundly affecting not only China's domestic situation, but also the global economy.

The Doctor of Business Administration in global financial management is an applied professional doctorate designed for senior corporate leaders and government officials in China who are seeking a terminal degree alternative to the traditional doctorate intended for those pursuing an academic career.

You prepare to transform China's economic structure and financial markets, and shape the future of China's leadership roles in the global economy. All such initiatives depend on the development of human capital --- the catalyst for all. Hence, the DBA program is designed to sustain and amplify you as you effect transformative changes in this exciting and dynamic global environment.

This program is offered by the W. P. Carey School of Business and Shanghai Advanced Institute of Finance.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (3 credit hours)
DBA 705 Global Corporate Strategy (3)

Electives (60 credit hours)

Research (9 credit hours)

Culminating Experience (12 credit hours)
DBA 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, 30 credit hours from a previously awarded master's degree can be used for this degree.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned, from a regionally accredited college or university of recognized standing, a Master of Business Administration, Master of Economics, Master of Finance, or Master of Accountancy, or a master's degree in a related field of specialization in business.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Additional Application Information
Proficiency in English is not required.

Official bachelor's and master's degree transcripts should be submitted and list all coursework in the native language along with an official English translation.

This program is offered in China only. All applicants are required to contact the program coordinator before submitting the online graduate admission application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

The program is essential academic preparation for those interested in pursuing professional careers as leaders within organizations, in diverse functions such as human resources, finance and marketing.

Career examples include:

- CEO
- finance manager
- marketing manager
- supply chain manager

Global Logistics, MS (BAGLSMS)

College/School: W. P. Carey School of Business

Campus: West Valley

ASU is not currently accepting applications for this program.

Program description

Classes for the Master of Science program in global logistics meet one night a week in person, followed by one night as a synchronous course. This evening program offers you flexibility with both in-person and online offerings.

You acquire specialized knowledge and practical perspectives on global operations, logistics and multicultural approaches. You build a foundation for a growing global field through curriculum developed by one of the leading supply chain management departments in the country.

In this program, you have access to distinguished faculty, motivated classmates and personalized career resources. The W. P. Carey Career Services Center provides you with innovative career programming and coaching, as well as an opportunity to meet with a wide variety of employers.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours including the required applied project course (SCM 593)

Required Core (24 credit hours)
SCM 502 Operations and Supply Chain Management (3)
SCM 515 Decision Models for Supply Chain Management (3)
SCM 516 Descriptive and Predictive Supply Chain Analytics (3)
SCM 520 Strategic Procurement (3)
SCM 532 Supply Chain Cost and Design Issues (3)
SCM 541 Logistics in the Supply Chain (3)
SCM 542 Logistics, Globalization and Economic Development (3)
SCM 545 Cases in Global Logistics (3)

Other Requirements (3 credit hours)
SCM 587 Project Management (1.5)
SCM 591 Seminar: Sustainability and Social Responsibility (1.5)

Culminating Experience (3 credit hours)
SCM 593 Applied Project (3)

Additional Curriculum Information
The schedule follows a combination of ASU scheduling options. Three courses follow the session C schedule and have a

semester-long duration. The other seven courses follow the 7.5-week quarterly schedule of the MBA program. Those courses require some online and extra class time to meet the 40 contact hours that are standard for the Association to Advance Collegiate Schools of Business.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution in business and management, computer information systems, economics or another type of global studies or similar degree area.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• essays
• one letter of recommendation
• resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

There are two main audiences for this program: recent undergraduates from logistics-related majors, and career advancers with a background in supply chain management and operations whose skills can be expanded to include a broader global context and exposure to emerging markets. Students must be able to commit to a full-time plan of study; the program may not cater to working professionals as it is currently designed.

This program is appropriate for applicants who have strong quantitative skills and seek to adapt those skills to be more competitive in the job market.

This program does not have a foreign language exam requirement.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for the growing field of global logistics. They have the essential academic preparation to pursue a professional career with an international perspective in logistics, supply chain and global operations.

Career examples include:

- logistics analyst
- logistics manager

supply chain analyst
transportation manager

Information Systems Management, MS (BAINFOMS)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The STEM-designated Master of Science program in information systems management provides you with the requisite skills and knowledge to effectively lead and improve performance with technology.

Building off a rigorous core curriculum, you have the option of adding a custom track. This third-semester track allows you to add four courses of their choosing to tailor the program to your career goals, and you also gain applied experience over the summer.

Through the latest techniques and methodologies, hands-on experience and relevant case studies, you discover how digital innovations, data analytics and information systems are transforming business.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Legal Studies, MLS

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Information Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (CIS 575)

Required Core (3 credit hours)
CIS 525 Strategic Value of Information Technology (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)
CIS 575 Emerging Technologies (3)

Admission requirements

General university admission requirements:

Management, MS (BAMCCMS)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The W. P. Carey School of Business at Arizona State University is directly involved in the development of top leadership in China. The Master of Science custom corporate program in China is designed for participants from a single company in China.

After successfully completing the program curriculum, you are granted an ASU MS degree in management through the W. P. Carey School of Business.

The curriculum is designed to leverage your existing strengths in a chosen management concentration, and you receive intensive instruction on managerial decision-making and strategic formulation. Accordingly, the curriculum is designed with a strong transdisciplinary focus while achieving cycle time efficiency. At the core of the curriculum delivery is emphasis on practical applications with direct business connectivity. A noteworthy feature of the curriculum is its integration of global practices and local market characterizations to enable you to excel in the modern economy.

The hallmarks of prestigious programs include two key elements: the faculty and the students. No other MS program in China offers a more impressive list of faculty or students than the W. P. Carey China program. The faculty includes distinguished professionals from the W. P. Carey School of Business and other prestigious American business schools.

STEM-OPT extension eligible: No

Degree requirements

36 credit hours including the required capstone course (MGT 588)

The curriculum consists of 12 courses concentrating on management. It is a world-class master's degree program with immersion in financial accounting, managerial finance, statistics and economics, marketing management, organizational theory and behavior, human resources management, supply chain management and information technology management.

All students must successfully complete the comprehensive requirement for MS graduates established by the W. P. Carey School of Business and the Graduate College. Because it is a lockstep program, participants do not have opportunities to make up missed courses or to substitute courses. Therefore, students must complete all 12 courses before graduation with a grade of "B" or higher (3.00 on a 4.00 scale) for each course to satisfy the comprehensive requirement. A thesis is not required.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Students must be nominated for the program by their company. The program is only delivered in China. Applicants are required to contact the program coordinator before submitting the online graduate admission application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the MS in management program have the essential academic preparation to pursue professional careers as leaders within organizations of diverse functions, such as human resources, finance or marketing.

Career examples include:

- CEO
- finance manager
- marketing manager
- supply chain manager

Business Administration (Management), PHD (BAMGMTPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

In the Doctor of Philosophy program in business administration with a concentration in management, you gain current and relevant knowledge of practice and theory from an esteemed faculty of world-class researchers and teachers in the Department of Management and Entrepreneurship, including multiple Academy of Management Fellows.

The doctoral program places primary emphasis on the development of research competence and emphasizes teaching as a vehicle to academic professionalism. It is not intended for your if you are seeking a career in industry or consulting.

The program equips you to assume the diverse responsibilities of faculty positions at leading research universities. Although management is a broad field, this doctoral program is best suited for you if you're interested in specializing in organizational behavior, strategic management or organization theory.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
At least 30 credit hours of the approved doctoral program, which may include research credit, and 12 dissertation credit hours must be completed after admission to the doctoral program. Students may not apply credit hours earned for a doctoral degree previously awarded at ASU or another institution toward their current ASU doctorate program. However, at the individual academic unit's discretion, students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral plan of study.

Doctoral students are required to commit full time to the program, at least until they have successfully defended the dissertation proposal. Full-time enrollment entails a minimum of six credit hours of coursework in any regular academic semester. To reach a total of 84 credit hours for the program, most students enroll for nine to 12 credit hours per semester. In addition, students work closely with faculty members through a research assistantship. The program is relatively small, with an emphasis on high quality, and students receive significant individual attention and mentoring.

Comprehensive Examinations
After the student has completed all necessary coursework on their approved plan of study, the academic unit may initiate the scheduling and administering of the student's comprehensive examinations. These consist of a minimum of a written exam; an oral exam also may be required at the discretion of the academic unit.

Candidacy
Doctoral students are notified that they have achieved candidacy status by a letter from the dean of the Graduate College after passing the comprehensive examinations and successfully defending the dissertation proposal.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled for at least one credit hour that appears on the plan of study or one hour of appropriate graduate-level credit during the semester (including summer sessions) in which the student defends the dissertation.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GMAT scores
• prior academic performance records
• three letters of recommendation
• a personal statement
• employment summary
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applications are initially reviewed by a faculty committee using a portfolio approach. Materials are reviewed to ensure a good fit between the student's goals and research interests, and those of the department. Graduate Admission Services admits or denies each applicant and notifies them in writing.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for careers at leading research universities. Possible career opportunities include:

assistant professor
professor

Marketing, MS (BAMKTCEMS)

College/School: W. P. Carey School of Business

Campus: Online

Program description

In the Master of Science program in marketing, you gain a variety of skills and knowledge that enable you to succeed in emerging marketing roles. You learn to combine creativity, strategy and technology to design intelligent, data-informed

marketing solutions that drive measurable results. Guided by industry experts and faculty, you gain experience working on real-world projects that apply AI technologies for consumer insights, predictive analytics, personalization and marketing automation. You develop the expertise to transform data into actionable insights, manage AI-powered campaigns, and lead strategic marketing initiatives across diverse industries.

Offering a comprehensive education in marketing, this program covers topics such as AI in marketing, digital marketing, innovation, marketing analytics and brand management. The curriculum emphasizes the latest tools and technologies used in the industry, helping you stay ahead of the curve in a rapidly changing business landscape.

The W. P. Carey Career Services Center (https://career.wpcarey.asu.edu/) provides resources and career coaching that you can access throughout the program and beyond.

The Department of Marketing (https://wpcarey.asu.edu/marketing-degrees) at the W. P. Carey School of Business combines timeless fundamentals with innovative thinking and technological fluency, empowering you to turn data into insight and ideas into measurable impact.

You learn directly from award-winning faculty who are advancing research and practice in areas such as digital marketing, AI applications, behavioral science and marketing analytics. Through this expertise, you are prepared to lead the next generation of intelligent, data-informed marketing practices.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required capstone course (MKT 579)

Required Core (3 credit hours)
MKT 561 Customer-centric Research and Analytics (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)
MKT 579 Generating Impact for Organizations (3)

Additional Curriculum Information
For elective coursework, students should consult the academic unit for a list of approved courses. Students can select up to nine credit hours of non-W.P. Carey courses from the electives list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee

• official transcripts
• one letter of recommendation
• professional resume
• written statement
• responses to short-answer questions
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/marketing-ms/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared for a variety of marketing roles, including those related to digital marketing, marketing research and brand management. Career examples include:

brand manager
digital marketing manager
marketing analyst
marketing manager
marketing research analyst
product manager
senior marketing manager

Business Administration (Marketing), PHD (BAMARKPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

As a student in the Doctor of Philosophy program in business administration with a concentration in marketing, you receive a comprehensive, broad-based education in marketing concepts and research techniques. You learn from thought leaders in their respective fields and benefit from the university's tremendous resources as part of the doctoral program at one of the largest public universities in the U.S.

You complete a core curriculum while tailoring your work to achieve personal goals. You can specialize in one of three research domains:

• consumer behavior
• quantitative marketing models
• service strategy

You do not need to declare a specialization during the application process, but you can indicate your intended specialized direction of study if you wish. It's expected that by the end of your first year, you commit to one of these three domains.

This is a full-time program and is not intended for those who plan to work in industry positions. The program is typically completed in five years.

Typically, the following financial aid package is offered to doctoral students:
• a competitive graduate assistant stipend per academic year (nine months) for five years, in addition to potential merit scholarships following the first year
• an opportunity to earn additional money by teaching at least one class during the six-week sessions each summer
• full tuition remission
• student health insurance

Loans and other forms of financial support may be available; you must file a FAFSA form to determine eligibility if you're seeking additional funding opportunities.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Plan of Study
At least 30 credit hours of the approved doctoral program, which may include research credit, and 12 dissertation credit hours must be completed after admission to the doctoral program. A student may not apply credit hours earned for a doctoral degree previously awarded at ASU or another institution toward their current ASU doctorate program. However, at the academic unit's discretion, a student may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral plan of study.

Comprehensive Examinations
After the student has completed all necessary coursework on their approved plan of study, the academic unit may initiate the scheduling and administering of the student's comprehensive examinations. These consist of a minimum of a written exam; an oral exam also may be required at the discretion of the academic unit.

Candidacy
Doctoral students are notified that they have achieved candidacy status by a letter from the dean of the Graduate College after passing the comprehensive examinations and successfully defending the dissertation proposal.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled for at least one credit hour that appears on the plan of study or one hour of appropriate graduate-level credit, such as MKT 795 Continuing Registration, during the semester in which the student defends the dissertation, including summer sessions.

Students should refer to the Graduate College policies and procedures (https://graduate.asu.edu/current-students/policies-forms-and-deadlines/policy-manuals) for detailed information regarding the university's doctoral degree requirements.

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years. Any exception must be approved by the supervisory committee and the dean of the Graduate College.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GMAT or GRE scores
• prior academic performance records
• letters of recommendation
• a personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their residency.

ASU does not accept the GRE® General Test at home edition.

Applications are initially reviewed by a faculty committee using a portfolio approach. Materials are reviewed to ensure a good fit between the student's goals and research interests, and those of the department. Recommendations for action are then made to ASU Admission Services, which admits or denies each applicant and notifies them in writing.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Real Estate Development, MREDev (ARREMREDEV)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

In the Master of Real Estate Development program, you participate in group projects focused on real estate development in a collaborative class environment. You learn to address the physical, legal, economic, political and financial conditions of property in order to find solutions and complete projects.

This transdisciplinary program is a partnership with the Sandra Day O'Connor College of Law, the Herberger Institute for Design and Arts and the Del E. Webb School of Construction.

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Legal Studies, MLS

Degree requirements

36 credit hours including the required capstone course (RED 515)

While there are no business course prerequisites, potential students must demonstrate strong quantitative ability and effective written and oral communication skills.

The program is offered in an intense format that spans two semesters. Students take required core course modules in a variety of formats, including:

• comprehensive module exams to assess aggregate knowledge

• face-to-face classroom instruction
• group work
• independent research
• synthesis projects
• topical quizzes
• weekly assignments

The business school does not accept graduate credits earned while students are in nondegree status or from courses taken before admission to the program or while enrolled in a program outside the W. P. Carey School of Business.

There is no foreign language requirement.

There is no thesis requirement.

All students must successfully complete the final synthesis project established by the W. P. Carey School and the Graduate College for the MRED. The comprehensive culminating experience is integrated with RED 515 Synthesis Project #3 Capstone Project Mixed-Use Property Development. Students must pass this course with a grade of "B" (scale is 4.00 = "A") or higher to satisfy the culminating experience requirement.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts of all coursework completed at institutions other than ASU
• one letter of recommendation
• current resume
• responses to short-answer questions
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

Complete application instructions may be obtained from the department's website.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates have the essential academic preparation needed to pursue professional careers in corporate finance, risk management, money management, financial planning, investment banking, consulting and real estate.

Career examples include:

- financial analyst
- real estate broker
- real estate manager
- regional planner

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Supply Chain Management, Certificate (BASCMCERT)

College/School: W. P. Carey School of Business

Campus: Online

ASU is not currently accepting applications for this program.

Program description

The certificate program in supply chain management comprises courses with tightly integrated content and offers comprehensive coverage of core topics in the field.

This certificate is well-suited if you are a working professional who has graduated from general management undergraduate or graduate business programs, and wish to supplement your degree with focused, graduate-level courses in supply chain management. Whether you are new to supply chain management or an experienced professional looking to update your knowledge, the program gives you foundational knowledge in supply chain management complexities, a strong understanding of how companies leverage their supply chains to achieve competitive advantage, and a framework for current understanding and best practices through interaction with faculty engaged in broad-based research and consulting.

Supply Chain Management and Engineering, MS (BASCMEMS)

College/School: W. P. Carey School of Business

Campus: Online

ASU is not currently accepting applications for this program.

Program description

The Master of Science program in supply chain management and engineering is a two-year, 30 credit hour program for working professionals in supply chain management, industrial engineering or a related field. Most students have an undergraduate degree in a technical field, such as business, engineering or science.

The program consists of 15 credit hours of courses from the Department of Supply Chain Management in the W. P. Carey School of Business, and 15 credit hours from the industrial engineering program in the School of Computing and Augmented Intelligence in the Ira A. Fulton Schools of Engineering.

The objective of the program is twofold: to provide you with knowledge of the fundamental foundations across the full spectrum of supply chain management functions, and to enable you to use state-of-the-art engineering tools to analyze, control and optimize modern supply chains.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (SCM 593)

Required Core (27 credit hours)

Culminating Experience (3 credit hours)
SCM 593 Applied Project (3)

English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• GMAT or GRE scores
• personal statement
• one letter of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

The W. P. Carey School of Business and the Ira A. Fulton Schools of Engineering seek exceptional individuals who are supply chain professionals or working in closely related fields. Applicants must be highly motivated and have strong intellectual capabilities. The admission committee looks for outstanding academic credentials; character qualities such as maturity, integrity and leadership; and diversity in perspectives and experiences.

Tuition information

Supply Chain Management, MS (BASCMMS)

College/School: W. P. Carey School of Business

Campus: West Valley, Online

Program description

You discover the technical elements of supply chain and learn how to manage the flow of products and the processes that generate them.

The Master of Science program in supply chain management provides you with an understanding of the role the supply chain manager can play in an enterprise supply chain and in the overall strategy. You are exposed to leading supply chain management operating practices, analysis methods, technology applications and strategy development.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Supply Chain Management, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (SCM 551)

Required Core (3 credit hours)
SCM 521 Supply Management and Negotiation (3)

Other Requirements (12 credit hours)
CIS 512 Business Intelligence (3) or SCM 545 Cases in Global Logistics (3)
SCM 515 Decision Models for Supply Chain Management (3)
SCM 532 Supply Chain Cost and Design Issues (3)
SCM 541 Logistics in the Supply Chain (3)

Electives or Research (12 credit hours)

Culminating Experience (3 credit hours)
SCM 551 Operations Planning and Execution (3)

Additional Curriculum Information
Students choose elective and research coursework from a restricted list of approved courses that is available from the academic unit; other coursework may be used with the unit's approval.

Business Administration (Supply Chain Management), PHD (BASCMPHD)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

Supply chain management incorporates the core areas of logistics management, operations management and supply management.

The Doctor of Philosophy program in business administration with a concentration in supply chain management is a

full-time residential program to help you reach your career goals of full-time university research and teaching. The curriculum guides you in conducting high-quality research and teaching at the university level.

You develop the ability to recognize problems related to supply chain management and frame these problems into research questions, which are then addressed in a scholarly way. You are able to review, analyze, conduct and publish research, which you are prepared to do through a series of doctoral seminars and research methods courses and by participating in active research projects. You also develop your teaching skills through assignments as teaching assistants or instructors. Teaching assignments typically take place during the last two years of the program.

This program is designed to be completed within five years.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

The doctoral program requires the completion of coursework, writing academic papers for submission to journals, taking a comprehensive exam and completing a dissertation. The program is generally viewed as a five-year process. Most students serve in research assistantships for all five years. During the program, students are expected to actively participate in required courses as well as in seminars and presentations given by colleagues, department faculty and visiting scholars.

Students also have the opportunity to teach courses during the program. Teaching assistantships are typically made available during the last two years of the program to allow students to get research projects and manuscripts into the multiyear pipeline typical of accepted research articles. Through areas of excellence, centers and the faculty, the supply chain management program has special opportunities for industry-based research projects.

Coursework
The program consists of a minimum of 84 credit hours of approved graduate coursework beyond the bachelor's degree. The department requires doctoral students to take 48 credit hours of graduate coursework in residence at ASU during their first two years. The specific classes must be approved by faculty in the student's area of excellence. Students are also required to take 12 hours of research and 12 hours of dissertation credit. A maximum of 12 credit hours can be transferred from previous graduate coursework. Moreover, the student's plan of study must be approved in advance by their program chair.

Academic Papers
Students are expected to work on academic papers for submission to journals during their doctoral program. Students who have not yet successfully defended their dissertation proposals are expected to write their manuscripts during the summer months. At the end of each summer, all doctoral students are required to have at least one new manuscript ready for submission to a journal for publication. Faculty in the areas of excellence supervise manuscript planning and writing. Students do the bulk of the writing during the summer. Faculty in the students' areas of excellence evaluate the papers and provide detailed feedback and instructions for rewriting.

Comprehensive Examinations
After the student has completed all necessary coursework on their approved plan of study, the academic unit may initiate the scheduling and administering of the student's comprehensive examinations. These consist of a minimum of a written exam; an oral exam also may be required at the discretion of the academic unit.

Candidacy
Doctoral students are notified that they have achieved candidacy status by a letter from the dean of the Graduate College after passing the comprehensive examinations and successfully defending the dissertation prospectus.

Dissertation Requirements
Students are required to present a dissertation to satisfy the research requirement for the doctorate. The dissertation

is defended in an oral examination commonly known as the dissertation defense.

Students must be enrolled for at least one credit hour that appears on the plan of study or one hour of appropriate graduate-level credit, such as 795 Continuing Registration, during the semester (including a summer session) in which the student defends the dissertation.

For detailed information regarding the university's doctoral degree requirements, students should refer to the Graduate College policies and procedures (https://graduate.asu.edu/current-students/policies-forms-and-deadlines/policy-manuals).

Maximum Time Limit
Doctoral students must complete all program requirements within 10 consecutive years.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GMAT or GRE scores
• prior academic performance records
• letters of recommendation
• a personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

Applications are initially reviewed by a faculty committee using a portfolio approach. Materials are reviewed to ensure a good fit between the student's goals and research interests, and those of the department. Recommendations for action are then made to ASU Admission Services, which admits each applicant or denies their admission and notifies them in writing.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the doctoral program in business administration at one of the largest public universities in the U.S. have learned from thought leaders in their respective fields and benefited from the university's tremendous resources. These graduates are fully prepared for careers in research and academia.

Career opportunities include:

assistant professor
professor
researcher

Taxation and Data Analytics, MTax (BATAMTAX)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The nine-month Master of Taxation program in taxation and data analytics is highly ranked by the Public Accounting Report. The advanced curriculum is structured to provide you with an in-depth working knowledge of the highly technical and demanding skills required to provide tax and business advice in the private and public sectors. Esteemed faculty experts bring practical experience into each class, giving the degree long-term value. You gain career preparation through case-based courses and team assignments.

You explore taxation in depth. Five of the 10 courses are technical, with small classes and personalized instruction. The School of Accountancy offers a Pathway Program (https://wpcarey.asu.edu/accounting-degrees/pathway-program) for you if you have a nonaccounting background, that delivers essential skills and knowledge needed to excel in the master's degree program.

The MTax program is designed to immerse you in full-time graduate studies, allowing you to take classes during the day to fulfill course requirements for the Certified Public Accountant exam in Arizona. This high-quality program enables you to gain the skills and knowledge needed to launch your career, opening the door to opportunities with top hiring firms.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Business (Accounting and Business Decisions), BA

Accountancy, BS

Business (Financial Planning), BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (ACC 589)

Required Core (3 credit hours)
ACC 571 Taxation of Corporations and Shareholders (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)
ACC 589 International Taxation (3)

Additional Curriculum Information
The MTax program is a nine-month, full-time, lockstep program that offers classes during the day and is completed in one academic year. Applicants must complete all program prerequisites before admission; a list of these courses is available on the W. P. Carey School of Business graduate programs website. Graduate-level accounting courses are open only to students admitted to the graduate program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• one letter of recommendation
• current resume
• responses to short answer questions
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

In addition to the ASU graduate admission application, applicants also must submit all supplemental application materials required by the W. P. Carey Graduate Programs office. Complete application instructions may be obtained from the department's website.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates have the essential academic preparation to pursue professional careers in public, corporate and governmental tax and auditing.

Career examples include:

budget analyst
revenue agent
tax auditor
tax preparer

W. P. Carey MBA, MBA (BAEVENMBA)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The Master of Business Administration program provides you with a solid foundation in the core business disciplines. You develop analytic and leadership skills that are essential to making sound business decisions. Through a comprehensive business curriculum taught by distinguished faculty, the MBA program enhances your strengths and helps you immediately impact your organization.

You can personalize your MBA through evening and online classes while earning your degree in two to four years. The curriculum is delivered in a case-based, team-oriented and discussion-style learning environment. Elective courses provide additional depth and breadth to enhance an area of emphasis, your knowledge base and career goals.

The evening MBA program is well-suited if you are a working professional who is seeking to continue working full time while attending school. The program can be completed in 21 months, depending on course formats, and begins in the fall or spring.

A W. P. Carey School of Business MBA stands apart from many part-time MBA programs that consist of a core business curriculum with very little specialization. The program offers more than 40 electives and options to add concurrent degrees and technical certificates, enabling you to align your MBA with your passions and pursue a degree at the same time. The MBA program is supported by each of the eight academic units within the W. P. Carey School.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to

high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Legal Studies, MLS

Degree requirements

48 credit hours including the required capstone course (MGT 589)

Required Core (3 credit hours)
LES 582 Ethical Issues for Managers (3)

Electives (42 credit hours)

Culminating Experience (3 credit hours)
MGT 589 Strategic Management (3)

Additional Curriculum Information
While there are no business course prerequisites, potential students must demonstrate strong quantitative ability and effective written and oral communication skills.

The school does not accept graduate credits earned while students are in nondegree status, or courses taken before admission to the MBA program or while enrolled in another MBA program outside the W. P. Carey School. Registration in W. P. Carey School courses numbered 501 and higher is limited to students who have been admitted to a graduate degree program and have the approval of the MBA program office.

The core course is designed to provide a foundation in business knowledge and skills and must be taken in the prescribed sequence. Elective courses build on the business core and center on the further development of an area of emphasis. Possible additional requirements vary by area of emphasis. The program is completed in 21 months.

All students must meet the comprehensive requirement established for the MBA by the W. P. Carey School and the Graduate College. The comprehensive culminating experience is integrated with MGT 589 Strategic Management. Students who pass this course with a grade of "B" (scale is 4.00 = "A") or higher satisfy the comprehensive examination requirement.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• two letters of recommendation
• current resume

• short answer question responses
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Letters of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

Applicants should see the department's website for more information.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/students/graduate-students) is possible for graduate students. More than 50 opportunities are available, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Career opportunities

Graduates have the essential academic preparation to pursue professional careers as leaders of diverse functions, such as human resources, finance or marketing.

Career examples include:

CEO
finance manager
marketing manager
supply chain manager

W. P. Carey MBA, MBA (BAEXECMBA)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

The executive Master of Business Administration program is a 21-month cohort-based offering developed for senior leaders.

The program emphasizes teaching you about ethical and high-impact leadership, data-driven decision-making,

innovation and hands-on learning across ASU's campuses and partner sites. The program stands out for its strong focus on applied leadership and strategic thinking, leveraging ASU's reputation for innovation and real-world engagement. Compared with programs offered by peer institutions, this program from the W. P. Carey School of Business offers similar rigor and leadership development, but it's often recognized more for its accessibility, flexibility, and strong regional and industry connections than for global brand prestige.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

48 credit hours including the required capstone course (MGT 589)

Required Core (1.5 credit hours)
LES 582 Ethical Issues for Managers (1.5)

Electives and Research (43.5 credit hours)

Culminating Experience (3 credit hours)
MGT 589 Strategic Management (3)

Additional Curricular Information
While there are no business course prerequisites, potential students must demonstrate strong quantitative ability and effective written and oral communication skills.

The school does not accept graduate credits earned while students are in nondegree status or from courses taken before admission to the MBA program or while enrolled in an MBA program outside the W. P. Carey School. Registration in W. P. Carey School courses numbered 501 and higher is limited to students who have been admitted to a graduate degree program and have the approval of the MBA program office.

The executive curriculum must be taken in the prescribed sequence and is augmented by a series of lectures on thought leadership and off-site learning programs, including a business and public policy course in Washington, D.C. An additional off-site course exploring issues and strategies in the global business environment is held in partnership with an international business school. The program is completed in 21 months.

All students must successfully complete the comprehensive requirement established for the MBA by the W. P. Carey School and the Graduate College. The comprehensive culminating experience is integrated with MGT 589 Strategic Management. Students who pass this course with a grade of "B" (scale is 4.00 = "A") or higher satisfy the comprehensive examination requirement.

W. P. Carey MBA, MBA (BAFULLMBA)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

Highly ranked by U.S. News & World Report, the full-time Master of Business Administration program meets the rapid changes and new realities in business and prepares you to be adaptable in the face of the uncertainty and ambiguity of a rapidly changing global economy. You are prepared for immediate success through an advanced curriculum, dedicated career services and a supportive community.

In tandem with rethinking the way the world does business, the W. P. Carey School of Business is rethinking the way business is taught. This program is designed to allow you to immerse yourself in full-time graduate studies and take classes during the day. Small class size supports individual learning, promotes student-faculty interaction and encourages personal and professional development.

The MBA curriculum is rooted in the transformation of both you and current business practices and is supported by each of the eight academic units within the W. P. Carey School of Business. Group projects and access to different organizations give you the tools to be ready to make a difference in your community and in the world upon graduation. You connect with internationally renowned faculty who bring years of real-world experience and innovative research into the classroom. The MBA program transforms you into a leader who can navigate circumstances filled with ambiguity.

You are able to complete the MBA simultaneously with other W. P. Carey School of Business master's degrees.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

W. P. Carey MBA, MBA (BAONLINMBA)

College/School: W. P. Carey School of Business

Campus: Online

Program description

The Master of Business Administration program provides a foundation and knowledge base in the core business disciplines, enabling you to develop analytic capabilities and decision-making and leadership skill sets that are essential

to making sound business decisions.

You develop your leadership skills wherever and whenever learning suits you best. With one core course at a time and flexible elective and concurrent degree options, this online program enables you to focus on your studies while managing your career and life.

Highly ranked (https://wpcarey.asu.edu/about/rankings) by U.S. News & World Report and accredited (https://wpcarey.asu.edu/about/accreditation) by the Association to Advance Collegiate Schools of Business, the online MBA program delivers the same course content taught by faculty members of the full-time and evening MBA programs, and you earn the same highly regarded degree.

The curriculum is delivered in a case-based, team-oriented learning environment. Elective courses provide additional depth and breadth to enhance your knowledge base and career goals. The program is ideal if you are a working professional who wishes to continue working full time while attending school. The program starts in January, February, May, August and September.

The program is supported by each of the eight academic units within the W. P. Carey School of Business.

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Electrical Engineering, MSE

Industrial Engineering, MS

Degree requirements

48 credit hours including the required capstone course (MGT 589)

Required Core (3 credit hours)
LES 582 Ethical Issues for Managers (3)

Electives (42 credit hours)

Culminating Experience (3 credit hours)
MGT 589 Strategic Management (3)

Additional Curriculum Information
All students must successfully complete the comprehensive requirement for the MBA established by the school of business and the Graduate College. The comprehensive culminating experience is integrated with MGT 589 Strategic Management. Students who pass this course with a grade of "B" (scale is 4.00 = "A") or higher satisfy the comprehensive examination requirement.

This program is designed to be completed within two years, with a maximum allowable time frame of three years.

Although there are no business course prerequisites, potential students must demonstrate strong quantitative ability and effective written and oral communication skills. To be successful in an online learning environment, students must also have computer proficiency and expertise in using spreadsheets, word processing and presentation software packages, email and an internet browser.

The business school does not accept graduate credits earned while students are in nondegree-seeking status, or courses taken before admission to the MBA program or while enrolled in an MBA program outside the W. P. Carey School of Business. Registration in W. P. Carey courses numbered 501 and higher is limited to students who have been admitted to a graduate degree program and have the approval of the MBA program office.

The core course is designed to provide a foundation in business knowledge and skills. Elective courses build on the business core and center on the further development of an area of emphasis.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the W. P. Carey School of Business.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• two letters of recommendation
• current resume
• responses to short-answer questions
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Letters of recommendation should comment on the student's motivation, commitment, achievements, work experience and likely success in the program.

Applicants should see the department's website for more information.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-business-administration/) for program descriptions and to request more information.

Global opportunities

Global experience: Study abroad (https://goglobal.asu.edu/students/graduate-students) is possible for graduate students. More than 50 program opportunities are available, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the

summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Career opportunities

The MBA program includes the essential academic preparation for those interested in pursuing professional careers as leaders within organizations, in such diverse functions as human resources, finance or marketing.

Career examples include:

CEO
finance manager
marketing manager
supply chain manager

W. P. Carey MBA, MBA (BASHANGMBA)

College/School: W. P. Carey School of Business

Campus: Tempe

Program description

As a business leader emerging from the W. P. Carey Master of Business Administration - Shanghai program, you can shape U.S.-Sino trade relationships during China's continued global expansion. This academic program is the cornerstone of a number of new offerings that include knowledge transfer and access to the highest level of decision-makers in China.

The W. P. Carey School of Business at ASU is directly involved in the development of top leadership in China. In 2003, the MBA program launched in Shanghai. The program is delivered in collaboration with Shanghai National Accounting Institute, an entity under the governance of China's Ministry of Finance.

This degree program is only offered in China.

STEM-OPT extension eligible: No

Degree requirements

48 credit hours including the required capstone course (MGT 589)

The curriculum is based on the integration of core management principles with in-depth study of accounting, finance, information management, supply chain management, service marketing, customer relations management and management of services innovation. At the core of the curriculum is emphasis on the practical applications with direct business connectivity. The school prides itself on the curriculum's integration of global practices and local market characterizations, which enables participants to excel in the modern economy.

In addition, the curriculum is designed with a strong transdisciplinary focus and emphasizes cycle-time efficiency. Each course is delivered in an intensive format over two consecutive weekends, with four full days of face-to-face instruction supplemented by online instruction materials to facilitate interaction between faculty and participants.

All students must successfully complete the comprehensive requirement for the MBA established by the W. P. Carey School of Business and the Graduate College. The comprehensive culminating experience is integrated with MGT 589 Strategic Management. Students who pass this course with a grade of "B" (3.00 on a scale of 4.00) or higher satisfy the comprehensive examination requirement. A thesis is not required.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

This degree program is only offered in China. All applicants are required to contact the program coordinator before submitting the online graduate admission application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the MBA program in China have the essential academic preparation to pursue professional careers as leaders within organizations of diverse functions, such as human resources, finance and marketing.

Career examples include:

- CEO
- finance manager
- marketing manager
- supply chain manager

Design and the Arts, Herberger Institute for

Architecture (Energy Performance and Climate Responsive Architecture), MS (ARENERGYMS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science program in architecture with a concentration in energy performance and climate-responsive architecture educates you to become an expert in energy-efficient building design and energy technology.

Courses in this concentration establish a basic core knowledge of the principles of the natural energies available at the building boundary that are due to climate and site; thermal and optic behavior of building materials and components; passive and low-energy architectural systems for heating, cooling and lighting; and appropriate integration with mechanical systems. Additional courses are available that support advanced study and research in a variety of related specialties.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (ATE 593)

Required Core (21 credit hours)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)
ATE 593 Applied Project (3)
ATE 599 Thesis (6)

Additional Curriculum Information
The applied project option consists of six credit hours of electives and three credit hours of ATE 593. The thesis option consists of three credit hours of electives and six credit hours of ATE 599.

Students should see the academic unit for an approved course list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution in one of the professions or fields of study outlined below:

• a five- or six-year National Architectural Accrediting Board-accredited professional degree in architecture (Bachelor of Architecture or Master of Architecture)*
• a four-year Bachelor of Science in landscape architecture or a master's degree in landscape architecture, which must be granted by an institution that offers the Landscape Architectural Accreditation Board-accredited degree program in landscape architecture
• an engineering degree (BS or MS) with a background in building sustainability issues**
• a science degree (BS or MS) with a background in building sustainability issues

*Applicants should refer to the NAAB website for more information about the BArch or MArch.
**Mechanical and civil engineering and construction majors are particularly suited for the BS or MS program in engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• portfolio or writing sample from applicants who have a science background
• statement of intent
• contact information for two references
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The portfolio or writing sample, statement of intent and contact information for three references must be submitted via SlideRoom. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted, otherwise another application must be submitted.

A personal interview is not required; however, a candidate who wishes to visit the school is welcome and should make arrangements by contacting The Design School.

Applicants should see the program website for application deadlines and admission terms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Engage in scholarly inquiry involving building performance and energy modeling.
- Compose a research proposal that embodies methodologies suitable to the research questions identified.
- Formulate climate-responsive design solutions for diverse factors impacting the built environment through critical thinking, calculations, and evidence-based design research.

Career opportunities

Graduates often pursue the following careers:

- architect
- energy modeler
- sustainability consultant

Architecture, MArch (ARARCMARCH)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe, Online

Program description

Architecture and the building industry are rapidly changing, and professionals need to be more effectively prepared to innovate and challenge a workforce that is far more complex and diverse than it was 20 years ago. Professional architecture firms and offices no longer specialize in only building design; they've expanded into related fields that compel architecture education to become more comprehensive and advanced than ever.

You can both complete the accredited architecture degree (https://design.asu.edu/about/accreditation) content and gain additional credentials for another master's degree or certificate that supports your individual interests. This enables you to pursue concurrent options in related areas, such as construction management, sustainability, real estate development, urban planning, landscape architecture, interior architecture and business. You may also simultaneously join other programs across ASU, such as health, education and fine arts.

Each semester includes a design studio and two other courses, such as technology, representation, history, theory, research and practice. You craft the design and plan the construction of economically and ecologically sustainable built environments and communities. You are rigorously trained on advanced design and digital prototyping, innovative building systems and new technologies, as well as in the research and advocacy of the expansive public role of architects within a broader civic dialogue and social justice aspirations.

The program is offered in two distinct learning modalities --- in person and online --- providing further opportunities for you to earn the same National Architectural Accrediting Board-accredited professional degree.

If you complete the requirements for the Master of Architecture program along with your chosen certificate electives, you may continue for an additional year in your certificate field and earn a second master's degree. When you pursue concurrent degrees, you earn two distinct degrees and receive two diplomas, enabling you to pursue your personal or professional interests.

The mission of The Design School is to prepare students for professional success, while continuing to innovate and

advance the discipline of architecture through an emphasis on place, context and contemporary culture. This emphasis recognizes the school's responsibility and commitment to social and environmental justice within Arizona, the region, the nation and the world.

The Design School in ASU's Herberger Institute for Design and the Arts offers the following NAAB-accredited degree program:

• Master of Architecture, two-year track (preprofessional degree + 48 graduate credit hours)
• Master of Architecture, three-year track (non-preprofessional degree + 72 credit hours)

Next accreditation visit: 2031
Accredited since 1985

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

W. P. Carey MBA - Full-Time Program

Degree requirements

54 credit hours including the required capstone course (ARC 602), or
78 credit hours including the required capstone course (ARC 602)

TWO-YEAR OPTION

Required Core (36 credit hours)
ARC 501 Advanced Architecture Studio I (6)
ARC 502 Advanced Architecture Studio II (6)
ARC 522 Advanced Architecture Technology I (3)
ARC 531 Advanced Architecture History (3)
ARC 532 Architectural Theory I (3)
ARC 601 Advanced Architecture Studio III (6)
ARC 622 Advanced Architecture Technology II (3)
ARC 631 Architectural Theory II (3)
ARC 662 Architectural Practice (3)

Electives (12 credit hours)

Culminating Experience (6 credit hours)
ARC 602 Advanced Architectural Studio IV (6)

THREE-YEAR OPTION

Required Core (36 credit hours)
ARC 501 Advanced Architecture Studio I (6)
ARC 502 Advanced Architecture Studio II (6)
ARC 522 Advanced Architecture Technology I (3)
ARC 531 Advanced Architecture History (3)
ARC 532 Architectural Theory I (3)
ARC 601 Advanced Architecture Studio III (6)
ARC 622 Advanced Architecture Technology II (3)
ARC 631 Architectural Theory II (3)
ARC 662 Architectural Practice (3)

Architectural Foundations Coursework (24 credit hours)
ARC 511 Architectural Studio (I) (6)
ARC 512 Architectural Studio (II) (6)
ARC 513 Architectural Technology (I) (3)
ARC 514 Architectural Technology (II) (3)
ARC 515 Architectural Representation (3)
ARC 516 Architectural History (3)

Electives (12 credit hours)

Culminating Experience (6 credit hours)
ARC 602 Advanced Architectural Studio IV (6)

Additional Curriculum Information
The culminating experience course is a final design studio with a written component, taken under guidance of studio faculty members and industry professionals. Elective courses should be selected in consultation with the program advisor.

For the two-year option, applicants must have completed a four-year Bachelor of Science degree with a major in architectural studies or a similar preprofessional degree in architecture. The undergraduate degree must be awarded by an institution recognized by ASU that offers a National Architectural Accreditation Board accredited degree program in architecture.

For the three-year option, applicants must have earned a baccalaureate or graduate degree in any field, excluding architectural studies.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
