Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAHSTEABA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students have the opportunity to immerse themselves in the cultures they are studying through Global Education programs (https://goglobal.asu.edu/). In programs available throughout East Asia, students can deepen their understanding of East Asian history and culture, and the heightened cultural competency, adaptability, and critical thinking and communication skills they acquire enhance their resumes.

The College of Liberal Arts and Sciences recommends the following study abroad programs (https://goglobal.asu.edu/asia-studies-ba) for students majoring in Asia studies with a concentration in East Asia.

Career opportunities

People knowledgeable about Asia are required in virtually every arena in which the U.S. interacts with the rest of the world, including:

- communication and journalism
- diplomacy, trade and international organizations
- food security
- higher education
- humanitarian service and philanthropy
- intelligence
- law and law enforcement
- military studies
- technology transfer
- transportation and tourism

Asian Languages (Chinese), BA (LACHIBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in Asian languages with a concentration in Chinese trains you to read, write and speak modern Mandarin proficiently, as well as in read classical Chinese.

You gain an in-depth understanding of the fundamentals of the rich Chinese cultural tradition, centered on primary Chinese texts from the literary, intellectual and religious cultures of Chinese-speaking societies.

If you're interested in learning Chinese, you're encouraged to inquire about the Chinese Flagship Language program (https://silc.asu.edu/chineseflagship). If you have higher levels of linguistic competency, you may enroll in targeted courses offered as part of the Chinese flagship track.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in

pursuing concurrent degrees or a second baccalaureate degree in The College of Liberal Arts and Sciences, visit The College's website (https://thecollege.asu.edu/) for more information.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACHIBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Effectively communicate orally and in writing in Mandarin Chinese at the mid-to-high Intermediate level standards according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
- Situate major literary Chinese works in their historical contexts and make textual analysis with critical depth.
- Create an independent research project in the areas of Chinese language and cultural production.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) is vital when learning the Chinese language. Immersing oneself in the second-most-spoken language in the world adds value to the degree, and having a thorough understanding of Chinese cultural elements prepares graduates to take off in an exciting multicultural career with valuable skills that employers seek, such as heightened cultural competence and enhanced adaptability, critical thinking and communication skills.

Career opportunities

Knowledge of multiple languages and intercultural competencies enhances any occupation and offers graduates many career opportunities. Language-intensive professions include:

- foreign correspondent
- foreign media professional
- foreign service officer
- international banking and finance professional
- language, literature or culture teacher
- law and immigration professional
- multilingual administrative professional
- translator or interpreter
- travel professional

Asian Languages (Japanese), BA (LAJPNBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in Asian languages with a concentration in Japanese, you study the language, literature and culture of Japan. You gain a respectable measure of competence in reading and writing Japanese, and you acquire oral and aural skills in the language. You also gain linguistic and cultural competence through the required study of classical Japanese.

In addition, ASU offers summer or yearlong programs to study abroad (https://goglobal.asu.edu/) in Japan.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAJPNBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Effectively communicate both orally and in writing in Japanese at a level equivalent to the Intermediate High level described in the ACTFL Proficiency Guidelines.
- Conduct a research project in the areas of language and/or cultural production.
- Analyze the historical and cultural development of the Japanese language by drawing connections between contemporary Japanese and earlier forms of the language through in-class translation assignments and course projects.

Global opportunities

Global experience: Study abroad programs are vital (https://goglobal.asu.edu/) when learning the Japanese language. Immersing oneself in the language and culture adds value to the degree and prepares students to take off in an exciting, multicultural career with valuable skills that employers seek, such as heightened cultural competence, adaptability, and critical thinking and communication skills.

Career opportunities

Knowledge of multiple languages and intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive professions include:

- foreign correspondent
- foreign media professional
- foreign service officer
- intelligence officer
- international banking and finance professional
- language, literature or culture teacher
- law and immigration professional
- multilingual administrative professional
- translator or interpreter
- travel professional

Relevant career fields and occupations include:

- advertising, marketing or communications
- airline industry
- film, television or multimedia
- hospitality industry
- intelligence
- international education and study abroad administration
- international law
- lifestyle management
- public relations
- technology industries

Asian Pacific American Studies, BA (LAAPABA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts in Asian Pacific American Studies prepares you to engage with and transform your communities by exploring the histories, struggles and contributions of Asian American, Native Hawaiian and Pacific Islander peoples. The program emphasizes real-world learning through community partnerships, internships and independent research, while fostering skills in activism, creative expression and cross-cultural understanding. You gain tools for future careers and community leadership, with an emphasis on well-being, creativity and making positive change.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The

College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social and Cultural Pedagogy, MA

American Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAAPABA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze a historical or contemporary issue affecting the AAPI community.
- Ability to critically discuss and analyze Asian American and Pacific Islander experiences and communities within local, national and global contexts.
- Demonstrate an understanding of the history of Asian American and Pacific Islander communities in the U.S. through an internship or a research project under the supervision of an ASU faculty member.

Global opportunities

Global experience: Students in the Asian Pacific American studies program are able to enhance their education by studying abroad.

With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them in more than 65 countries, including many countries in Asia, students can improve their language skills, gain firsthand experience in their field of study, and immerse themselves in new and distinct cultures. Students gain a new perspective on international affairs, dispel stereotypes and improve their cultural competency.

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/sst/asian-pacific-american-studies) for students majoring in Asian Pacific American studies.

Career opportunities

Graduates possess skills relevant for any career path, professional degree program or graduate school. Training from this program also complements work in positions involving:

- business
- community organizations
- creative arts
- education
- health
- immigration
- journalism
- law
- social work

Astronomical and Planetary Sciences, BS (LAASTPLSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Online

Program description

The online Bachelor of Science program in astronomical and planetary sciences provides you with broad training in the scientific foundations required to understand and communicate the fundamentals of space exploration and ongoing advances in the field.

The degree program includes groundwork in mathematics and physical sciences, topical courses focused on diverse

fields within astronomy and planetary science, and exposure to the engineering and computational tools and techniques used to carry out research.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus or higher
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/astronomy-bachelors/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAASTPLSBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Effectively communicate astronomical and planetary science concepts.
- Apply astronomical concepts and principles of physical science to explicate core disciplinary concepts in astronomy and planetary sciences.
- Solve quantitative problems and test hypotheses with astronomical data utilizing modern computing methods.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, astronomical and planetary sciences students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates pursue careers in fields that value the quantitative and technical skills taught as part of an astronomy education. These include K-12 STEM teaching positions, science and technology journalism and writing careers, technical careers involving statistical data analysis or computer programming, and technical positions supporting space and research industry and policy.

Career opportunities include:

- analytical lab technician
- astronomer
- data analyst
- instrumentation specialist
- museum director
- planetary scientist
- research scientist
- science teacher
- science writer
- telescope operator

Career settings include:

- aerospace industry organizations
- educational institutions
- federal, state and local government agencies
- manufacturing centers
- museums and planetariums
- NASA facilities
- national laboratories
- National Science Foundation facilities
- observatories
- space industry organizations

For more information, students can visit thecareer opportunities page on the School of Earth and Space Exploration website.

Biochemistry, BA (LABCHBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Arts program in biochemistry combines the study of chemistry, biology and the liberal arts to help you= understand how life works at the molecular level. You explore how cells function, and you learn to think critically and= solve complex problems. Along with science courses, you take classes in languages and the arts to gain a well-rounded,= global perspective.

Through lectures and lab activities, you build both scientific knowledge and practical research skills. You also have the= chance to work with professors on real research projects. The program's flexible design lets you shape your studies= around your goals --- whether you are working toward a dual degree or focusing on a special interest in science.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/biochemistry-ba/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABCHBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Predict molecular structure and reactivity using knowledge from organic, inorganic, analytical, physical and biological chemistry.
- Clearly communicate their findings from a basic chemical experiment.
- Analyze chemical data using common statistical methods.

Global opportunities

Global experience: When studying abroad (https://goglobal.asu.edu/), students gain valuable experience in a diverse= set of programs. Students earn ASU credit for completed courses while staying on track for graduation.

With their resumes enhanced by the heightened communication, critical thinking and leadership skills they acquired= through study abroad, graduates stand out competitively in their chosen fields.

Career opportunities

Graduates are prepared for careers in a variety of fields and sectors, such as medicine and health; chemical and= biotechnology industries; pharmaceuticals; environmental and food science; food production; environmental= protection; scientific sales and marketing; public service, such as policymaking and teaching; patent law; and many= technical areas.

Graduates are also well prepared to apply to medical, dental and pharmacy schools, and other graduate programs.

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in biochemistry, you learn about molecules, cells and the processes that sustain life.= You gain hands-on experience conducting experiments and analyzing data in laboratory settings, and you have the= chance to work with professors on exciting research projects and discover how science is used to solve real-world= problems.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

McKenna Life Sciences, Business and Entrepreneurship Program
This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (https://mlsbe.asu.edu/), which prepares academically outstanding students to solve health care challenges as leaders= in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the= MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in= finance and another in a natural science discipline of your choice. You also complete a certificate in entrepreneurship= and innovation, all in the time that it typically takes to earn a four-year degree.

A new cohort is accepted each fall. As an incoming first-year student, you're eligible to apply to the MLSBE Program= after you've submitted your application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biochemistry, MS

Chemistry, MS

Global Management, MGM

Computational Life Sciences, MS

Biochemistry (Medicinal Chemistry), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/undergraduate/bachelor-science-biochemistry/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABCHBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Predict molecular structure and reactivity in a biological context, using knowledge from organic, inorganic, analytical, physical and biological chemistry.
- Clearly communicate their findings from a basic chemical experiment.
- Analyze chemical data using common statistical methods.

Global opportunities

Global experience: Students who participate in Global Education programs (https://goglobal.asu.edu/) gain valuable= experience in a diverse set of programs in other countries. The study abroad experience helps students deepen their= understanding of biochemical processes and enhance their knowledge of research methods used across the globe.= With their resumes enhanced by the heightened skills in communication, critical thinking and leadership acquired= through study abroad, graduates stand out in their competitive fields.

Career opportunities

Biochemistry is an excellent choice for those pursuing careers in various fields and sectors, including medicine and= health, biotechnology, pharmaceuticals, new sources of energy and materials, research, government laboratories,= environmental and food science, teaching and many other technical areas.

The program provides the necessary training for competitive applications to medical, dental, pharmacy and other= health-related graduate schools, and to advanced research-oriented graduate degree programs in biochemistry.

Biochemistry (Medicinal Chemistry), BS (LABCHMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in medicinal biochemistry, you explore how chemistry and biology come together to create life-saving medicines. You learn how molecules work inside cells and how scientists design drugs that fight disease.

Through engaging lectures and hands-on lab work, you build a strong foundation in chemistry, biology and medicinal science. You learn how to think like a scientist, using chemistry and biochemistry to understand how medicines are made and how they work in the body.

You also have the chance to join research labs and work with faculty on real-world projects.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

McKenna Life Sciences, Business and Entrepreneurship Program
This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (https://mlsbe.asu.edu/), which prepares academically outstanding students to solve health care challenges as leaders in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in finance and another in a natural science discipline of their choice. You also complete a certificate in entrepreneurship and innovation, all in the same amount of time that a typical four-year degree program requires.

A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they have submitted their application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/medicinal-chemistry/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABCHMBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Predict molecular structure and reactivity using knowledge from organic, inorganic, analytical, physical and biological chemistry.
- Clearly communicate their findings from a basic chemical experiment.
- Analyze chemical data using common statistical methods.

Global opportunities

Global experience: Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options provides= an opportunity for students to develop a valuable skill set that can give them an advantage in career and personal= enrichment. Studying abroad helps students build cultural competency and heightened skills in communication, critical= thinking and leadership that enable them to stand out on their graduate school applications.

Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build= communication skills, challenge them to adapt and persevere, expose them to differences across the world, and= increase their ability to work with diverse groups of people. Students earn ASU credit for completed courses while they= stay on track for graduation.

Career opportunities

A solid undergraduate education in biochemistry with an emphasis in medicinal chemistry provides the necessary= background for career paths in chemical, medical, pharmaceutical and biotechnology industries and for careers in= governmental regulation, health care, research and other areas.

This degree program is ideal for those who wish to strengthen their applications to medical school. The program= provides excellent preparation for advanced graduate study in biochemistry, pharmaceutics, pharmacology and= toxicology, as well as for careers in drug design and pharmaceuticals, medicine and health, research, food production,= environmental protection and several other technical fields.

Those who are planning careers in medicine, dentistry, pharmacy, veterinary medicine or research in these or related= fields also often pursue the medicinal chemistry concentration with supporting work in biology and chemistry as the= route for preprofessional training.

Biological Sciences, BS (LABSCBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in biological sciences program, you study the organization and processes of life,= from molecules to ecosystems. Your coursework explores genetics, evolution, ecology, physiology, zoology,= microbiology, and cell and molecular biology to reveal how living systems develop, adapt and interact with their= environments. Through lectures, laboratory work and research opportunities, you build skills in critical thinking and= scientific communication.

You may pursue the general degree or select from concentrations in biology and society; biomedical sciences;= conservation biology and ecology; genetics, cell and developmental biology; or neurobiology, physiology and behavior.= The general degree offers flexibility to explore multiple disciplines or tailor coursework to your individual interests.

This program is also available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you're considering concurrent or second baccalaureate degrees in The College of Liberal= Arts and Sciences, you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional details and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Biology, MS

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Molecular and Cellular Biology, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Computational Life Sciences, MS

Biology (Biology and Society), MS

Microbiology, MS

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/biological-sciences-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABSCBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Demonstrate capacity for scientific thinking by applying relevant background knowledge to analyze and/or develop scientific explanations.
- Effectively communicate complex scientific concepts, ideas, and reasoning with appropriate use of relevant sources and evidence.
- Demonstrate preparedness for graduate/professional degree programs and/or employment.

Global opportunities

Global experience: Professional health education is competitive. Less than 50% of students who apply to medical= schools are admitted; the numbers vary for other health-related fields. Medical and professional school admission= officers increasingly focus on students with dedication to community service, so engaging in community activities and= research abroad helps any student who intends to pursue a health career to create a diverse, accomplished portfolio= that can give them an advantage over the competition.

Study abroad students experience distinct biological environments and gain an understanding of worldwide differences= in the human condition. Global Education programs (https://goglobal.asu.edu/) enable students to develop a valuable= skill set by exposing them to different health environments and expanding their knowledge of culturally specific health= approaches.

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/biological-sciences) for students majoring in biological sciences.

Career opportunities

Graduates are prepared for careers in diverse STEM fields, including environmental management, education,= government and industry. The degree also provides a strong foundation for graduate study and professional programs= in biological and health sciences, including medicine, dentistry, pharmacy, veterinary medicine and law.

Biological Sciences (Biology and Society), BS (LABSCSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in biological sciences with a concentration in biology and society examines the= relationship between biology and its broader social, philosophical, ethical, historical and policy contexts. You= investigate how biological knowledge is created, interpreted and applied in society, and how these processes influence= scientific priorities and decision-making.

Through coursework in history and philosophy of the life sciences and medicine, ethics, and science policy, you gain= insight into what science is and how it changes over time. The program encourages your skills in critical thinking and= effective communication through engagement with topics such as bioethics, history of biology and medicine,= biodiversity and science policy.

You may complete independent research projects to investigate the social, philosophical, historical, ethical and policy= considerations of science, technology and medicine. The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you are considering= concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you should consult The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional= information.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Demonstrate capacity for scientific thinking by applying relevant background knowledge to analyze and/or develop scientific explanations.
Effectively communicate complex scientific concepts, ideas, and reasoning with appropriate use of relevant sources and evidence.
Demonstrate preparedness for graduate/professional degree programs and/or employment.

Global opportunities

Global experience: Through study abroad programs, whether in a foreign country, in the U.S. or online, biological sciences students experience distinct biological environments and gain an understanding of worldwide differences in the human condition. They are exposed to a variety of laws, policies and practices in biology-centric environments

worldwide and expand their knowledge of how science impacts society. Students can engage in community service and outreach activities all around the world, which can help their graduate and professional program applications stand out.

With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their specific interests and skill sets. The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/sls/biological-sciences-biology-society) for students majoring in biological sciences with a concentration in biological and society.

Career opportunities

Graduates are prepared for careers in law, medicine, education, policy, public health, and science communication. The program also provides a foundation for graduate study in biology, ethics and history and philosophy of science. Students develop skills applicable to roles addressing the ethical and societal impacts of scientific advancement.

Biological Sciences (Biomedical Sciences), BS (LABSCMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in biological sciences with a concentration in biomedical sciences provides you with a strong foundation in the biological sciences with a focus on human health and disease. You study physiology, genetics, developmental biology, cell biology and neurobiology to understand the biological complexities of medical science. The curriculum supports preparation for the MCAT and other professional school entrance requirements.

You develop the knowledge, critical thinking, and laboratory skills necessary for success in medical, biomedical research, and health-related fields. Through coursework, laboratory experience, and independent research or internships, you engage in biomedical inquiry and gain hands-on experience in experimental design and data analysis.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. Students interested in concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences should review The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional details and requirements.

McKenna Life Sciences, Business and Entrepreneurship Program
This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (https://mlsbe.asu.edu/), which prepares academically outstanding students to solve health care challenges as leaders in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in finance and another in a natural science discipline of choice. You also complete a certificate in entrepreneurship and innovation, all in the same amount of time as a typical four-year degree program.

A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they've submitted their application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biology, MS

Public Administration, MPA

Molecular and Cellular Biology, MS

Global Management, MGM

Computational Life Sciences, MS

Biology (Biology and Society), MS

Microbiology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

Demonstrate capacity for scientific thinking by applying relevant background knowledge to analyze and/or develop scientific explanations.
Effectively communicate complex scientific concepts, ideas, and reasoning with appropriate use of relevant sources and evidence.
Demonstrate preparedness for graduate/professional degree programs and/or employment.

Global opportunities

Global experience: Through study abroad, whether in a foreign country, in the U.S. or online, students studying biological sciences are able to experience distinct biological environments and gain an understanding of worldwide differences in the human condition. They are exposed to a variety of laws, policies and practices in biology-centric environments worldwide, expanding their knowledge of how science impacts society. Students can also engage in community service and outreach all around the world, helping their graduate and professional program applications stand out.

With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their specific interests and skill sets. The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/sls/biological-sciences-biomedical-sciences) for students majoring in biological sciences with a concentration in biomedical sciences.

Career opportunities

Graduates are prepared for professional or graduate programs in medicine, dentistry, optometry, pharmacy and related health professions. The degree also prepares students for positions in biotechnology, genetics, immunology, genomics, and physiology, or for advanced study leading to careers in biomedical science, health care and medical technology.

Biological Sciences (Conservation Biology and Ecology), BS (LABSCCBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in biological sciences with a concentration in conservation biology and ecology= focuses on understanding and conserving Earth's biological diversity while restoring damaged ecosystems. You study= how organisms interact with each other and their environments, integrating ecological theory with practical= conservation strategies.

Through research, laboratory work, and field experiences, you examine the effects of human activity on ecosystems= and biodiversity. You explore methods to protect species, restore ecological balance, and promote ecosystem= resilience. Coursework includes ecology, conservation biology, environmental policy, and quantitative analysis,= providing a foundation for applied and theoretical work in biological and environmental sciences.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you are pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts= and Sciences, you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for requirements and additional information.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Biology, MS

Public Administration, MPA

Molecular and Cellular Biology, MS

Global Management, MGM

Computational Life Sciences, MS

Biology (Biology and Society), MS

Microbiology, MS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/conservation-biology-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABSCCBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Demonstrate capacity for scientific thinking by applying relevant background knowledge to analyze and/or develop scientific explanations.

- Effectively communicate complex scientific concepts, ideas, and reasoning with appropriate use of relevant sources and evidence.
- Demonstrate preparedness for graduate/professional degree programs and/or employment.

Global opportunities

Global experience: Through study abroad programs, biological sciences students are able to experience distinct= biological environments and gain an understanding of conservation biology practices worldwide. They are exposed to a= variety of laws, policies and practices in biology-centric environments and expand their knowledge of how science= impacts society. Students also are able to engage in community service and outreach activities, which can help them= stand out in graduate study or a professional career.

With more than 300 programs available, Global Education programs (https://goglobal.asu.edu/) enable students to= tailor their experience to their specific interests and skill sets. The College of Liberal Arts and Sciences recommends= these programs (https://goglobal.asu.edu/students/major/sls/biological-sciences-conservation-biology-ecology) for= students majoring in biological sciences with a concentration in conservation biology and ecology.

Career opportunities

Graduates are prepared for careers in conservation, ecology, environmental consulting, wildlife management,= education and sustainability planning. The program also provides a foundation for graduate study in ecology,= environmental law and policy, and conservation biology. Students gain skills for restoring ecosystems and protecting= biodiversity in an evolving global environment.

Biological Sciences (Genetics, Cell and Developmental Biology), BS (LABSCGBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in biological sciences with a concentration in genetics, cell and developmental biology= examines the molecular and cellular mechanisms that drive growth, development and disease. You explore how= genetic information is organized, expressed and regulated, and how genes interact with the environment to influence= biological function. Coursework integrates genetics, cell biology, molecular biology and developmental biology to reveal= how life operates from the molecular to the organismal level.

Through hands-on laboratory experiences, research and internships, you work alongside faculty engaged in= investigations into gene expression, cellular dynamics, and developmental processes. The curriculum emphasizes= experimental design, data interpretation, and scientific communication, preparing you for professional or academic= pathways in the life sciences.

This program is also offered as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you are considering pursuing concurrent or second baccalaureate degrees in The College of= Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Biological Sciences (Neurobiology, Physiology and Behavior), BS (LABSCABS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in biological sciences with a concentration in neurobiology, physiology and= behavior, you examine how animals, including humans, function, think and behave by integrating the study of= neurobiology, physiology and behavior. You explore how molecular and cellular processes support the operation of= major systems, including neural, muscular, cardiovascular, respiratory, renal and digestive systems, and how evolution= and environment influence biological function and behavior.

Coursework emphasizes quantitative analysis, experimental design, and scientific communication. Through laboratory= and research experiences, you collaborate with faculty mentors to investigate the mechanisms of animal function and= behavior and apply biological principles to biomedical and biological questions.

You may participate in internships or independent research projects to gain professional experience. The program is= available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science)= option. If you are pursuing concurrent or second baccalaureate degrees within The College of Liberal Arts and Sciences,= you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees)= for details and requirements.

Biophysics, BS (LABIPHBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in biophysics, you use the methods and theories of physics to study biological= systems. This includes gaining a working understanding of principles that govern all scales of biological organization,= from molecular processes of life, to organisms, to ecosystems.

You are exposed to novel learning methods and laboratory experiences, with additional opportunities to conduct= independent research and work directly with faculty in the field. This strong foundation prepares you to seek roles= within academia, medicine, renewable energy, research and technology.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students who wish to change their major to biophysics should have a minimum cumulative GPA of 2.50 for all critical classes they have completed.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/biophysics-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABIPHBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Study abroad affords students the opportunity to gain valuable experience in a diverse set of programs (https://goglobal.asu.edu/) in many countries around the world. Students can study biophysics abroad through a wide set of opportunities related to physics, chemistry and biology.

Graduates with the heightened skills in communication, critical thinking and leadership they acquired through study abroad may stand out in a competitive field.

Career opportunities

The wide variety of applicability of the principles of biophysics allows for great flexibility in the choice of career or further education.

Graduates have the necessary background for career paths in the biotechnology, chemical and medical industries.

Graduates are also well prepared for medical school or advanced graduate study in biochemistry, biophysics, neurobiology, pharmacology, physics or radiology.

Chemistry, BS (LACHMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in chemistry offers a challenging and rewarding path for you if you want to understand the world at the atomic and molecular levels. You build strong scientific and laboratory skills while exploring areas such as energy, medicine, nanoscience, environmental science, forensics, cosmetics and food chemistry.

Through rigorous courses and hands-on lab work, you develop a deep understanding of chemical principles and sharpen your problem-solving and analytical thinking abilities. The program encourages curiosity and critical inquiry --- skills that are essential for success in science and research.

You are also encouraged to join faculty-led research groups, where you can gain real-world experience investigating complex scientific questions. Because the School of Molecular Sciences offers a wide variety of research areas, you have access to an exceptional choice of opportunities.

Accredited by the American Chemical Society, this program meets national standards for excellence in chemistry education. With a strong foundation in theory, lab experience and scientific reasoning, you are well prepared to make meaningful contributions in science, industry or graduate study.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biochemistry, MS

Chemistry, MS

Materials Science and Engineering, MS

Biochemistry (Medicinal Chemistry), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACHMBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Predict molecular structure and reactivity using knowledge from organic, inorganic, analytical, physical and biological chemistry.
- Clearly communicate their findings from a basic chemical experiment.
- Analyze chemical data using common statistical methods.

Global opportunities

Global experience: When studying abroad (https://goglobal.asu.edu/), chemistry students can gain valuable experience= in a diverse set of programs. They acquire heightened skills in communication, critical thinking and leadership, enabling= them to stand out competitively in their chosen field. Students earn ASU credit for completed courses while they stay= on track for graduation.

Career opportunities

A degree in chemistry provides the background for careers in chemical and electronics industries and in national= research, environmental and forensic labs. Chemistry can be combined with law for patent work, with economics for= sales and marketing careers, and with computer science for careers in information technology. Graduates also emerge= well prepared for advanced studies in chemistry and material science, positioning them competitively for graduate= degree programs; some have chosen to complete a BS in chemistry to be competitive applicants for admission to= medical, dental or pharmacy schools.

Chemists conduct research and routine work in laboratories; study the environment; work in manufacturing, sales and= marketing; determine policy and regulation in the public sector; and teach in a variety of settings.

Chemistry, BA (LACHMBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Arts program in chemistry offers a flexible and well-rounded path if you want to explore how chemistry= shapes the world. You study how atoms and molecules work and how chemistry connects to areas such as energy,= sustainability, medicine, the environment, forensics, cosmetics, and even patent law and marketing.

Through a combination of lectures and hands-on lab courses, you learn to think critically and solve real-world problems= using chemistry. This program combines science with liberal arts, helping you build strong communication and= analytical skills that apply to many careers.

While research isn't the main focus, you have opportunities to join lab projects or explore topics that match your= interests. The program's flexibility makes it a great choice if you want to combine science with other fields, including= policy, law, business and public service.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACHMBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Predict molecular structure and reactivity using knowledge from organic, inorganic, analytical, physical and biological chemistry.
Clearly communicate their findings from a basic chemical experiment.
Analyze chemical data using common statistical methods.

Global opportunities

Global experience: When studying abroad (https://goglobal.asu.edu/), chemistry students can gain valuable experience in a diverse set of programs. Students earn ASU credit for completed courses while staying on track for graduation. Students who study abroad acquire heightened skills in communication, critical thinking and leadership.

Career opportunities

A degree in chemistry provides graduates with the background for careers in chemical and electronics industries and in national research labs, environmental labs and forensic labs.

Chemistry can be combined with law for patent work, with economics for sales and marketing careers, and with computer science for careers in information technology. Graduates with a strong liberal arts background are also prepared for careers in marketing and scientific sales.

Graduates are competitive applicants for admission to medical, dental or pharmacy school.

Chemistry (Environmental Chemistry), BS (LACHMEBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Science program in chemistry with a concentration in environmental chemistry, you learn how chemistry connects to the environment. You study topics such as pollution control, energy and climate change while learning how to solve real environmental problems.

The program combines chemistry with environmental science, geology, math and physics to give you a broad understanding of how the Earth works. Through lectures and hands-on lab work, you build strong problem-solving and critical thinking skills. You also have the chance to work with faculty on research projects and gain experience creating solutions that protect the planet.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-

students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biochemistry, MS

Chemistry, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACHMEBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Predict molecular structure and reactivity using knowledge from organic, inorganic, analytical, physical and biological chemistry.
Clearly communicate their findings from a basic chemical experiment.
Analyze chemical data using common statistical methods.

Global opportunities

Global experience: Students who participate in Global Education programs (https://goglobal.asu.edu/) can strengthen their understanding of environmental chemistry through hands-on experience in new and exciting environments. Programs provide students with a global perspective and knowledge in preparation for a forward-thinking career.

Career opportunities

The solid chemistry education that graduates have obtained in this program provides the necessary background for many career paths in chemical industries, government and other areas. This degree can be combined with law for patent work or government work, economics for sales and marketing careers, and computer science for careers in storage and retrieval of information related to the environment.

The environmental chemistry concentration is especially valuable for those who plan to work in areas related to the environment; graduates are also prepared for careers in environmental science, environmental monitoring, policy and regulation.

Graduates are well positioned to pursue graduate studies in environmental science, chemistry or related fields.

Civic and Economic Thought and Leadership, BS (LACETLBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in civic and economic thought and leadership integrates philosophical inquiry, qualitative and quantitative political analysis, economic theory, and the core texts of the American constitutional order as the basis of ethical leadership.

Faculty teach using the Socratic method, which challenges you to analyze the complex topics that impact lives today. You refine your ability to read closely, think analytically, write carefully and speak effectively.

You have internship opportunities (https://scetl.asu.edu/internships) on Capitol Hill, in congressional offices in your district, and with nonprofit organizations. These opportunities enable you to build your resume with professional experience and network with potential future employers. Global intensive experiences allow you to study in places such as Romania and India. You also engage with distinguished scholars through the school's public programs (https://scetl.asu.edu/events).

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The

College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Classical Liberal Education and Civic Leadership, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students in the School of Civic and Economic Thought and Leadership have a variety of global and domestic experiential courses (https://goglobal.asu.edu/students/major/civic-and-economic-thought-and-leadership-ba-bs-1) available to them. Whether they involve practicing leadership skills in a rural Indian village, examining the

politics and cultures of Europe in Romania, or studying Aristotle in the Arizona mountains, all of these courses ask students to cultivate curiosity, excellence and leadership.

Career opportunities

Graduates are inspired and prepared to lead and serve in civil society, public affairs or government.

Potential career paths include business, education, foreign service, government, law, politics, national security affairs and public office.

Communication, BS (LACOMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

This Bachelor of Science program in communication combines the power of human connection with the precision of data-based research. With a strong foundation in social science and quantitative research methods, you learn how to understand human behavior, collect and interpret data, and back up your ideas with evidence.

Alongside developing critical research skills, you build expertise in speaking and writing effectively. You learn how to communicate complex information in engaging ways, which is essential for leading teams, managing client relationships, and creating a positive work climate that promotes productivity.

In addition to reviewing the guidelines in the Concurrent Program Options selection below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Management, MGM

Communication, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students who have previously attended ASU and are returning to the university with transfer credit must have a minimum ASU cumulative GPA of 2.00 in order to be admitted into the Hugh Downs School of Human Communication.

Transfer admission requirements: Students who are transferring into ASU must meet current university admission requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students who would like to change their major to communication must have a minimum cumulative GPA of 2.00.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-communication/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACOMBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their specific interests and skill sets. Students may engage in distinct and exciting opportunities to gain intercultural experience through tailored international programs of study. Students improve language and cross-cultural skills for effective communication, develop critical teamwork and problem-solving skills, and expand their knowledge of the liberal arts through lenses of different cultures.

Whether in a foreign country, in the U.S. or online, students in communication are able to improve their language and cross-cultural skills for effective communication across populations. The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/communication) for students majoring in communication.

Career opportunities

Graduates are prepared for a wide variety of career paths --- including business, tech, government and beyond. Graduates often attend leading graduate schools in communication, law or business, or find gainful employment in the areas of:

- business consulting
- data analysis
- event planning

- fundraising
- human resource management
- marketing
- public relations
- sales
- social media
- training and development

Communication, BA (LACOMBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

This communication degree program emphasizes qualitative research and human-centered inquiry. Through methods= such as interviews, focus groups, ethnography, and discourse analysis, you learn to explore lived experiences, uncover= patterns of meaning, and gain deep insight into how people connect and communicate.

Alongside research training, you develop strong cross-cultural communication skills --- learning to engage respectfully= and effectively across differences in language, identity and worldview.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation

Global opportunities

Global experience: With more than 300 Global Education program options (https://goglobal.asu.edu/) available to them, students may engage in a distinct and exciting opportunity to gain intercultural experience through international programs of study, which they can tailor according to their experience and specific interests and skills.

Whether in a foreign country, in the U.S. or online, students in communication develop critical teamwork and problem-solving skills, expand their knowledge of the liberal arts through lenses of different cultures, and improve their language and cross-cultural skills for effective communication across populations.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/communication) for students majoring in communication.

Career opportunities

Graduates are prepared to work with community groups, support advocacy and social change, and build meaningful relationships in both local and global contexts. Whether entering careers in nonprofits, education, business, government, or community outreach, graduates bring cultural competence, critical thinking and communication leadership to every role.

Graduates often attend leading graduate schools in communication, law or business or find gainful employment in the areas of:

- campaign management
- community leadership
- diplomacy
- event planning
- health care management
- human resource management
- intercultural relations
- nonprofit management
- public relations
- sales
- training and development

Computational Mathematical Sciences, BS (LACMSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in computational mathematical sciences is a fusion of mathematics, science and computing. You learn how to translate science and engineering problems into mathematical problems and solve them using computing algorithms.

You develop strong problem-solving, analytical and programming skills as you work across diverse areas of science and mathematics. You have the opportunity to work with applied scientists in associated fields such as cancer modeling, computational neuroscience, environmental modeling and weather forecasting, all of which involve computational mathematical sciences.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mathematics, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACMSBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze quantitative problems and draw conclusions by applying proper mathematical theories.
- Employ appropriate mathematical models to analyze and simulate various applicable phenomena and processes.
- Apply computational tools for effective implementation of modeling of applicable phenomena and processes.

Global opportunities

Global experience: Students gain valuable experience through study abroad programs. They can tailor their program to their specific interests and skill sets, and gain hands-on experience. Whether in a foreign country, in the U.S. or online, students are able to build communication skills, are challenged to adapt and persevere, and are exposed to differences, enhancing their ability to work with diverse groups of people.

Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options available around the world provides students with the opportunity to develop a valuable skill set that can give them an advantage in their career, as well as personal enrichment.

Career opportunities

According to Research.com (https://research.com/degrees/best-college-majors-to-pursue), mathematics and computer science rank among the top college majors in terms of salary and job growth. The computational mathematical sciences program brings these disciplines together.

A BS degree in computational mathematical sciences offers graduates many career options, including in:

- business
- computer technology
- engineering
- medical research
- teaching and education

Some pursue graduate education in areas such as biophysics, economics, medicine, statistics and data science.

Culture, Technology and Environment, BA (LACTEBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Arts program in culture, technology and environment is a collaborative program offered by the= humanities division in The College of Liberal Arts and Sciences. You take a humanistic approach to address issues= surrounding:

• culture: approaching equitable and diverse global citizenship through the study of society and language
• environment: addressing climate change, biodiversity loss, pollution and environmental justice through the arts and humanities

• technology: bringing humanities thinking to the practical and ethical challenges of a world shaped by technology

Course topics include English, film and media studies, history, philosophy, religious studies, languages and cultures. You also complete a core of classes that provide context and grounding, as well as hands-on experience in identifying challenges and developing solutions.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/culture-technology-environment/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LACTEBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Study abroad expands students' perspectives by exposing them to new cultures, communities and people. Students can explore the English language at a deeper level through an extended lens of literature, dialects and rhetoric in one of more than 300 Global Education programs (https://goglobal.asu.edu/). Students who study abroad gain heightened cultural competency as well as communication and critical-thinking skills, which enhance their educational experience and their resumes.

Career opportunities

This multidisciplinary program combines the strengths of humanities training with a focus on practical skills, preparing graduates for a variety of careers. Potential career fields include:

- climate change or policy analysis
- documentary writing or producing
- environmental activism
- environmental law
- journalism
- nature or science writing
- nonprofit leadership and management
- technical writing

Data Science, BS (LADATSCIBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Data science professionals use sophisticated statistical, computational and mathematical tools to extract patterns from= large, complex and often unordered data sets. In the Bachelor of Science program in data science, you are prepared to= be a critical analyst in a variety of areas, such as business, research and government.

With a mathematical core consisting of linear algebra, statistical inference and classification, data mining, machine= learning and associated computer methods, the program gives you a strong background in data-related skills that are

useful in understanding and solving practical issues.

This transdisciplinary program enables you to choose a focus area in:

• behavioral sciences
• biosciences
• business analytics
• chemistry and biochemistry
• computer science
• mathematics
• social sciences
• spatial sciences

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Computational Life Sciences, MS

Data Science, Analytics and Engineering (Human-Centered Applications), MS

Data Science, Analytics and Engineering (Computational Mathematics and Data), MS

Data Science, Analytics and Engineering (Bayesian Machine Learning), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/data-science-online-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LADATSCIBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Employ analysis of data sets in order to make action oriented, ethical recommendations for societal change.
Engage critically with real world data problems involving chosen areas such as healthcare, education, and government.
Develop team oriented skills related to civil discourse while utilizing diverse programming languages and statistical processes to interpret results of their own data collection.
Write a critique of data interpretations provided by real world sources in which they make critical inferences regarding the validity of provided data.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, data science students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

U.S. News & World Report ranks data scientist at No. 8 on its list of best jobs. The U.S. Bureau of Labor Statistics= projects overall employment of data science occupations to grow 36% through 2033.

Graduates of the data science program have skills related to data analysis, data prediction models and ethical uses of= research data, helping them to meet the expressed needs of society. Graduates work in a variety of fields, including= governmental research, education, health services, consumer behavior and business.

Earth and Environmental Sciences, BA (LAEESBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Arts in Earth and environmental sciences helps you understand the function and evolution of the world= and the vulnerabilities of the environment. You receive broad training in physical science and geoscience, with an= emphasis on understanding Earth's life-sustaining surface environment.

The program explores climate change, energy resources, natural hazards, ocean environments and implications for= sustainable human civilizations, empowering you to help Arizona and the global community address many critical= environmental challenges facing society.

Through elective tracks, you can focus your studies on climate and environmental change, environmental policy,= sustainability, Earth resources, environmental management or environmental education.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
or higher
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some

combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/earth-environmental-sciences-major-ba/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAEESBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply scientific methods to analyze Earth-system and environmental data.
- Synthesize core concepts of Earth system science and societal factors to analyze linkages among Earth-system processes, environmental conditions, and human societies.
- Collaborate effectively in interdisciplinary groups to evaluate societally significant environmental problems and propose viable solutions.

Global opportunities

Global experience: The physical environment is highly varied across the globe, and so is the human treatment of it. Global education programs (https://goglobal.asu.edu/) enable students to gain a deeper understanding of the global

environment, how culture affects the environment, and how to best communicate environmental research to a diverse audience. Programs are offered in a variety of countries around the world.

Career opportunities

The Bureau of Labor Statistics and the American Geosciences Institute project strong job growth in environmental science and geoscience. Graduates are well prepared for "green" professional careers in fields such as environmental education, environmental reporting, public planning, environmental consulting and natural resource management. Graduates are also prepared for graduate school in related disciplines, such as natural and environmental sciences or education, environmental public policy and environmental management.

Career opportunities include these positions:

- conservation scientist or natural resource manager
- data analyst
- environmental monitoring and exposure assessor
- environmental or sustainability consultant or planner
- environmental protection or remediation scientist, consultant or manager
- environmental specialist, analyst or technician
- natural hazards assessment and mitigation specialist
- public policy and planning specialist
- science teacher
- water resources specialist

Career settings include:

- educational institutions
- environmental consulting firms
- environmental engineering firms
- federal, state and local government agencies
- museums
- nongovernmental organizations
- nonprofit organizations
- publishing companies
- regulatory agencies
- utility companies

For more information, please see thecareer opportunities page on the School of Earth and Space Exploration website.

Earth and Space Exploration, BS (LASESBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in Earth and space exploration offers you an integrated education across Earth sciences, planetary sciences, astrophysics and engineering. The degree program incorporates a learning community that includes science and engineering students, a year long collaborative capstone senior exploration project, and strong quantitative preparation.

This foundation in geosciences, astrophysics and exploration engineering prepares you for key roles in Earth resources

and exploration, environmental and geologic engineering, space research and industry, and water and environmental use policy.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Space exploration is an international endeavor, and an international experience provides students with opportunities for cross-cultural engagement and improvement of language and communication skills. Global Education (https://goglobal.asu.edu/) allows students to take relevant classes while they live in another country. Each of the more than 300 Global Education program options enables students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and increase their ability to work with diverse groups of people.

Career opportunities

The Earth and space exploration major addresses critical future shortfalls in the national and regional training of the next generation of geoscientists and aerospace engineers.

Arizona has an expanding space industry with major new investments and is prepared to engage new technologies to monitor and understand environmental issues in the state, the Southwest and throughout the world.

Graduates with a BS in Earth and space exploration have the tools, knowledge and understanding to address key problems of a global nature, whether they are working in the private or the public sector.

Career opportunities include:

- analytical lab technician
- astronomer
- data analyst
- geoscientist
- instrumentation specialist
- museum director
- planetary scientist
- research scientist
- science teacher
- science writer

Career settings include:

- aerospace industry organizations
- educational institutions
- federal, state and local government agencies
- manufacturing centers
- museums or planetariums
- NASA facilities

national laboratories
National Science Foundation facilities
observatories
space industry organizations

Earth and Space Exploration (Astrobiology and Biogeosciences), BS (LASESABBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

Astrobiology and biogeosciences are closely related. Astrobiology informs the exploration for life on other worlds, while biogeosciences motivates exploration of life's limits on Earth.

You acquire a strong and rigorous foundation in geology, biology, chemistry and astronomy in the astrobiology and biogeosciences concentration in the Bachelor of Science program in Earth and space exploration. You develop the systems-thinking perspective needed to:

• contribute to the search for life on other planets
• study how the integrated Earth-life system evolves and responds to global environmental challenges
• understand the complex and evolving diversity and distribution of life on Earth

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASESABBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design research projects to solve scientific problems foundational to astrobiology and biogeosciences.
Apply knowledge in the natural sciences to interdisciplinary questions in astrobiology and biogeosciences.
Effectively apply crucial skills for employment including communication, creative and critical thinking, inquiry and analysis, and problem solving.
Function in an interdisciplinary environment to solve complex scientific and technological problems.

Global opportunities

Global experience: Space exploration is an international endeavor, and an international experience provides students with opportunities for cross-cultural engagement and to improve their language and communication skills. Global Education programs (https://goglobal.asu.edu/) allow students to take relevant classes while they live in another country. Each of the more than 300 Global Education program options enables students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and increase their ability to work with diverse groups of people.

Career opportunities

Graduates of the astrobiology and biogeosciences program are well prepared for graduate studies in two rapidly advancing fields. They are also well suited for careers in earth sciences, environmental sciences and space sciences. More broadly, the program provides training across a variety of sciences and a "systems thinking" perspective, giving graduates a strong background for careers in biomedical or sustainability areas, as well as science education, writing or policy.

Career opportunities include these positions:

- astronomer
- data analyst or scientist
- ecologist or natural resource manager
- environmental monitoring and exposure assessor
- environmental or sustainability consultant
- environmental protection or remediation scientist, consultant or manager
- geoscientist
- hydrogeologist
- science policy consultant
- science teacher

Career settings include:

- educational institutions
- environmental consulting firms
- environmental engineering firms
- federal, state and local government agencies
- museums or planetariums
- NASA and National Science Foundation facilities
- national laboratories
- nonprofit organizations
- observatories
- space industry organizations

More information is available on thecareer opportunities page on the School of Earth and Space Exploration website.

Earth and Space Exploration (Astrophysics), BS (LASESABS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in Earth and space exploration with a concentration in astrophysics offers you a fundamental grounding in astronomy and astrophysics, with exposure to the related fields of geology, planetary science and engineering.

You develop a background in theoretical modeling and observational techniques of galactic and stellar astronomy, extragalactic astronomy and cosmology. You engage in rigorous coursework in engineering and computer programming, and you learn to think critically about scientific problems. Through a capstone project, you gain valuable experience in translating science drivers into engineering solutions.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Exploration Systems Design (Sensor Networks), MS

Exploration Systems Design (Instrumentation), MS

Exploration Systems Design (Systems Engineering), MS

Exploration Systems Design, MS

Astrophysics and Astronomy, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASESABS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Solve quantitative problems and test hypotheses with astronomical data utilizing modern computing methods.
Apply advanced math and physics concepts to solve problems in astronomy and astrophysics.
Function effectively in a team-based interdisciplinary research environment to formulate solutions for and solve complex scientific and technological problems.
Effectively apply crucial skills for employment including communication, creative and critical thinking, inquiry and analysis, and problem solving.

Global opportunities

Global experience: Space exploration is an international endeavor, and an international experience gives students opportunities for cross-cultural engagement and to improve their language and communication skills. Global Education (https://goglobal.asu.edu/) allows students to take relevant classes while they live in another country. Each of the more than 300 Global Education program options enables students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and improve their ability to work with diverse groups of people.

Career opportunities

Graduates have the skills required for a career in astrophysics, physics and related fields, opening up diverse opportunities for employment in industry, government, education and other settings. They also are prepared to pursue graduate school in astrophysics or to perform laboratory research or data-intensive analyses that enable scientific progress or inform public policy.

Career opportunities include:

analytical lab technician
astronomer
data analyst

instrumentation specialist
museum director
planetary scientist
research scientist
science teacher
science writer
telescope operator

Career settings include:

aerospace industry organizations
educational institutions
federal, state and local government agencies
manufacturing centers
museums or planetariums
NASA facilities
national laboratories
National Science Foundation facilities
observatories
space industry organizations

The rigor of this degree makes it excellent preparation for graduate study in the field of astrophysics, especially when combined with a physics minor. Interested students can find more information on thecareer opportunities page on the School of Earth and Space Exploration website.

Earth and Space Exploration (Exploration Systems Design), BS (LASESESDBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in Earth and space exploration with a concentration in exploration systems design offers you a fundamental curriculum in geology, physics and astrophysics while providing tools that enable you to design and build hardware and software to explore Earth and the universe beyond.

The program has a rigorous and quantitative grounding in the fundamentals of physics, mathematics and chemistry. Coursework focuses on conceiving the requirements needed for a mission or project destined for space or extreme environments on Earth. You are expected to complete a senior project that takes a desired scientific measurement and realizes the technological solution to achieve the observation.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT

extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 265 - Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design technological approaches to solving research problems in the earth and space sciences.
Function effectively in a team-based, interdisciplinary environment to solve complex problems in earth and space science, using an engineering approach and a set of options, including cost, risk, and schedule.
Effectively apply crucial skills for employment including communication, creative and critical thinking, inquiry and analysis, and problem solving.

Global opportunities

Global experience: Space exploration is an international endeavor, and an international experience provides students with opportunities for cross-cultural engagement and improvement of language and communication skills. Global Education (https://goglobal.asu.edu/) enables students to take relevant classes while they live in another country. Each of the more than 300 Global Education program options enables students to develop a valuable skill set that can give them an advantage in their career and personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and improve their ability to work with diverse groups of people.

Career opportunities

Graduates have the skills required for a career in systems engineering, space systems engineering, scientific instrument engineering and engineering-focused careers in astronomy, geoscience and planetary science, opening up diverse opportunities for employment in industry, government, education and other organizations. They are also prepared to pursue graduate school in astrophysics, physics and engineering, or to perform laboratory research or data-intensive analyses that facilitate scientific progress or inform public policy.

Career opportunities include:

astronomer
computer software quality engineer
computer systems architect
engineering or technical services manager
planetary scientist
research scientist or instrumentation specialist
science policy consultant
science teacher (K-12)
space systems engineer
systems engineer

Career settings include:

aerospace industry organizations
educational institutions
federal, state and local government agencies
manufacturing centers
NASA centers
National Science Foundation facilities

museums or planetariums
national laboratories
observatories
space industry organizations

For more information, students can see thecareer opportunities page on the School of Earth and Space Exploration website.

Earth and Space Exploration (Geological and Planetary Sciences), BS (LASESGSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in Earth and space exploration with an emphasis in geological and planetary sciences uncovers the processes that have shaped Earth and other planets since the origin of the solar system. You explore the coevolution of Earth's life, oceans, atmosphere and climate system and how their evolution is recorded in rocks, soil, ice and isotopes.

You learn traditional and modern field methods, data analysis and more to effectively study the natural environment. This knowledge empowers you to work for the benefit of local, national and global communities. You also have the opportunity to study the potential for extraterrestrial life and the possibilities for the colonization of space.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you are advised to visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas

Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASESGSBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Solve problems in the Earth and planetary sciences using their understanding of the formation, structure and composition of the Earth and planets.
- Synthesize scientific data in the context of geologic material properties, processes, and time.
- Effectively apply crucial skills for employment including communication, creative and critical thinking, inquiry and analysis, and problem solving.
- Interpret geologic history from field and/or remote sensing data.

Global opportunities

Global experience: With more than 300 programs available, Global Education (https://goglobal.asu.edu/) enables students in the geological and planetary sciences concentration to gain hands-on experience in a variety of programs all over the world.

Graduates with heightened cultural competency, leadership and critical thinking skills acquired through study abroad may stand out in a competitive field.

Career opportunities

Graduates are well prepared for a wide variety of careers in growing fields such as environmental geology, hydrogeology, geographical information systems analysis, critical mineral exploration, environmental consulting and natural resource management.

Career opportunities include:

- environmental monitoring and exposure assessor
- environmental or sustainability consultant
- geologist
- geophysicist
- hydrogeologist
- mineral exploration geologist or project manager
- natural hazards assessment, mitigation and recovery specialist
- natural resource manager
- science teacher (K-12)
- water resources scientist

Possible career settings include:

- educational institutions
- environmental consulting firms
- environmental engineering firms
- environmental industry organizations
- federal, state and local government agencies
- geotechnical industry organizations
- museums
- nonprofit organizations
- petroleum industry companies
- small exploration companies and large mining companies

Graduates are also prepared for graduate school in numerous disciplines within geoscience, planetary science,= biogeoscience, science education or science communication.

For more information, students can visit thecareer opportunities page on the School of Earth and Space Exploration= website.

Economics, BS (LAECNBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Department of Economics at ASU provides you with the highest quality instruction, conducts innovative research, and provides leadership and service to its professional communities. ASU is ranked No. 35 among global universities for economics and business (U.S. News & World Report, 2023-2024).

The Bachelor of Science in economics degree is built on a strong core of micro- and macroeconomic theory supplemented by mathematics, statistics and data analysis. The flexibility of the BS degree enables you to supplement your study of economics with elective coursework offered by The College of Liberal Arts and Sciences to broaden your knowledge and customize your program to suit individual goals and interests.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College, you are advised to visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
Any math course that meets the MATH designation, except MAT 114 College Mathematics.
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/economics-bs-college-liberal-arts-and-sciences/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAECNBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: The world is increasingly interconnected, and study abroad enables students to explore economics in other countries while developing in-demand professional skills, such as cross-cultural communication and problem-solving. Summer programs can provide students with experience at international financial institutions, helping them increase their understanding of economics on a global scale. Students can learn more on the Global Education Office (https://goglobal.asu.edu/) website.

Career opportunities

Graduates possess the analytical tools and critical-thinking skills that have led some to placements with top private companies and consulting firms as well as within government. Others have landed research assistantships with the Federal Reserve and other nonprofit research institutions.

Those choosing to continue their studies have earned admission to top master's degree and doctoral programs in the U.S. and abroad. Economics is considered one of the best majors as preparation for law school, and some graduates have gone on to the best law schools in the country.

Economics (Politics and the Economy), BS (LAECNPECBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

If you wish to pursue careers in business, economic and political consulting, political science, law and government, the Bachelor of Science program in economics with a concentration in politics and the economy is for you.

In addition to economics coursework, the concentration requires courses that highlight the impact of government policies on the economy and the conditions under which government interventions may be warranted. You take political science courses that provide a deep understanding of political processes and institutions, as well as methodologies for understanding the behavior relevant to them.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-english/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAENGBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Define and utilize key terms and conventions of literary, linguistics, and rhetorical scholarship.
- Analyze the formal construction of texts from diverse rhetorical and literary traditions to explain how they function.
- Compose original texts that situate their interpretations in conversation with multiple perspectives.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) expands students' perspectives by exposing them to new and distinct cultures, communities and people. Students can explore the English language at a deeper level through an extended lens of dialects, literature and terminology in one of more than 300 study abroad programs.

Students can enhance their resumes and educational experience with the heightened cultural competency, communication and critical thinking skills they acquire through study abroad.

The College of Liberal Arts and Sciences recommends these study abroad programs for students majoring in English. (https://goglobal.asu.edu/students/major/english)

Career opportunities

Graduates of degree programs in English are prepared for a variety of careers in diverse fields. Employers seek those with strong writing, communication and critical thinking skills. Some of the most common professions for English majors are in the fields of:

- business
- law
- journalism
- nonprofit service
- publishing

Graduates often find roles in which they spend time:

- developing web content
- editing
- managing public relations
- teaching
- writing professional and technical content

Graduates are also prepared to continue their studies in graduate and professional programs.

English (Creative Writing), BA (LAENGCBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in English with a concentration in creative writing, you focus on the study and practice= of the literary arts, with courses in poetry, fiction and creative nonfiction.

You gain practical experience through writing workshops and internship opportunities.

The undergraduate program features an outstanding faculty whose many books have received major national and international recognition.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (http://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

English (Linguistics), BA (LAENGNBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts in English with a concentration in linguistics examines the history and structure of language. You have the opportunity to study with distinguished faculty members actively engaged in scholarly research, and to gain practical experience through internships that prepare you for an ever-expanding variety of careers. The program also prepares you to continue your studies through programs such as ASU's accelerated Master of Teaching English to Speakers of Other Languages and accelerated Master of Arts in linguistics and applied linguistics.

In addition to the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (http://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Teaching English to Speakers of Other Languages, MTESOL

Linguistics and Applied Linguistics, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

English (Literature), BA (LAENGTBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in English with a concentration in literature guides you from the earliest texts and cultures in English to contemporary expressions on paper, online and in the world. In learning to read critically, analyze narratives and understand how stories work to define the human experience, you can consider problems and find solutions while developing written and oral communication skills.

You have the opportunity to engage with internationally renowned faculty in exploring literature, critical theories and methods from around the world. You choose from a broad array of courses to further explore subjects such as race and ethnicity, gender and sexuality, and literary histories and traditions.

You gain practical experience through research, writing and internships that prepare you for an ever-expanding variety of careers or to continue your studies in graduate or professional programs.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (http://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

English (Narrative Studies), BA (LAENGNSBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in English with a concentration in narrative studies, you explore the varied forms,= contexts and cultures of narrative. Drawing from a variety of perspectives and disciplines, you learn methods to= critically interrogate the social, historical, aesthetic and ethical dimensions of story and storytelling.

You gain an understanding of key narrative concepts and their uses across modalities. You become familiar with the= diverse applications of narrative, including the principles of narrative generation and interpretation across a variety of= traditional and emerging media, the uses of narrative in various spheres of social and political life, and creative and= communicative practices.

As a student of narrative studies, you prepare to translate facts, events and stories into compelling narratives relevant= for creative, professional and socially embedded purposes. You are empowered to engage globally with pressing= concerns, such as climate change, justice movements, and the frontier of computational developments, including= narratives generated by artificial intelligence.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics

English (Secondary Education), BA (LAENGSEBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in English with a concentration in secondary education provides rigorous content in literature, composition, linguistics and secondary teaching, extensively preparing you to meet the needs of all learner populations. In particular, the program gives you strategies for teaching a range of academic abilities and classrooms with cultural and linguistic diversity.

You finish the program with Arizona Department of Education certification for middle and high school English language arts. Both a fingerprint clearance and a background check are required in the second year of the program.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze current and historic issues in connection to teaching English language arts in secondary schools.
Develop curriculum using English language arts content and pedagogical practices.
Develop lesson plans for English language integrating best practices for limiting common learning problems

Global opportunities

Global experience: Students who wish to pursue a future in education must understand the diverse sets of experiences, backgrounds and cultures that can shape the students in their classrooms. Students can gain firsthand experience of a wide variety of cultures and communities when they enhance their English degree with a Global Education program (https://goglobal.asu.edu/). With a diverse set of students and interests, the Department of English seeks to work with all students to create an international experience that meets their individual needs and goals.

In addition to providing a once-in-a-lifetime opportunity for students to build their skills in a distinct environment, Global Education programs help them stand out in the job market long after graduation.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/english) for students majoring in English with a concentration in secondary education.

Career opportunities

Graduates have tremendous opportunities for employment. Certified teachers continue to be in high demand in Arizona, and Arizona State University provides more of these teachers than any other institution of higher education.

After student teaching in school districts in the greater Phoenix area or within one of the 22 Native American nations in the state, graduates are often hired to teach in the same school where they completed their internship.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

English (Writing, Rhetorics and Literacies), BA (LAENGWBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in English with a concentration in writing, rhetorics and literacies, you learn strategies for inquiry and action.

You explore how communication creates knowledge and action, and you study how communication is constructed, circulated, reacted to and repurposed through time and place. You investigate the history, theories and methods of inquiry as well as pragmatic and social actions of rhetoric, writing and literacies.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (http://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply available theories and/or methods given the demands of the rhetorical situation at hand or the problem to be investigated.
- Identify and analyze the historic, cultural, and political contexts of rhetorical situations.
- Compose arguments that respond to context and can be circulated, reacted to, and repurposed by audiences for sharing in and across various professional, social, and personal contexts.

Global opportunities

Global experience: Study abroad (https://goglobal.asu.edu/) expands students' perspectives by exposing them to new and distinct cultures, communities and people. Students can explore the English language at a deeper level through an

extended lens of literature, dialects and rhetoric.

Those who study abroad gain heightened cultural competency as well as communication and critical thinking skills, which enhance their educational experience and their resumes.

More than 300 study abroad programs are available. The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/english) to students majoring in English.

Career opportunities

Graduates with a degree in English are prepared for graduate studies in a number of programs, including English, creative writing, education, law and business. They also have a variety of career opportunities in diverse fields. Employers seek those with strong writing and communication skills and the ability to think critically. Some of the most common professions for English majors are in these fields:

- business
- editing
- journalism
- law
- nonprofit organizations
- professional and technical writing
- public relations
- publishing
- teaching
- web content development

Family and Human Development, BS (LAFASBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in family and human development focuses on helping children and families thrive in= the modern world by teaching you how to encourage healthy relationships and tackle contemporary societal issues.

You study the stages of human development throughout the life span and gain a deep understanding of the complex= dynamics of human relationships in families, workplaces and communities. You also become proficient in written= communication, research methodology and data analysis.

Elective courses provide a specialized skill set in areas such as infancy, adolescence and aging. You may also participate= in learning experiences outside the classroom, such as working in the Child Development Lab, working as a research= assistant and completing an internship.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Sociology, MA

Family and Human Development, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-family-and-human-development/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=LAFASBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply developmental theory to the stages and domains of human development over the lifespan.
- Describe theory and research on relational and family processes and the contexts in which they occur.
- Analyze variations in family communication and relational patterns across different contexts.
- Analyze social science research to determine the quality of the findings.

Global opportunities

Global experience: Through study abroad, students can explore different cultures and social dynamics while developing in-demand professional skills, including teamwork and problem-solving. Opportunities include homestays, which enable students to make connections with families in other countries. Students can stay on track academically while earning ASU credit over winter or spring break trips. More information is available on the Global Education website (https://goglobal.asu.edu/).

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/ssfd/family-human-development) to students majoring in family and human development.

Career opportunities

Graduates with a BS degree in family and human development are prepared for a rewarding career in:

- business
- child and family advocacy
- education
- government
- social services

This program also provides excellent preparation for future graduate work in:

- counseling
- health-related professions
- law
- social work

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Students will be able to analyze the aesthetics of film, television and digital media texts.
Students will be able to analyze the cultural significance of representations of class, gender, nation, race and sexuality in film, television and digital media.
Students will be able to assess and analyze the business of film, television and digital media practices.

Global opportunities

Global experience: Students gain valuable experience through study abroad, experience that enhances their resumes. More than 300 Global Education programs (http://goglobal.asu.edu) enable students to tailor their experience to their specific interests and skill sets. In addition to providing students a once-in-a-lifetime opportunity, these programs enable them to hone their creative and communication skills in a distinct environment.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/film-media-studies) for students majoring in film with a concentration in film and media studies.

Career opportunities

Graduates with a degree in film and media studies have skills that can be applied in a number of professional fields, including:

creative management
film
journalism
marketing and communications
social media
streaming
television
video games

Some graduates have gone on to pursue graduate studies at prestigious universities, while others elect to begin their careers. They are prepared for employment as:

analysts
bloggers

executives
marketers
producers
reviewers
screenwriters
teachers

French, BA (LAFREBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in French offers you the opportunity to study the language, literature and culture of France and other French-speaking countries.

You gain competence in reading, writing, speaking and listening to French, and you take a number of related courses on topics such as:

• art
• cinema
• colonization
• government and political science
• history and civilization
• international business
• literature and theater
• popular culture
• religion

You are encouraged to join the French Club to help you gain proficiency in the language. In addition, the School of International Letters and Cultures offers faculty-directed summer study abroad programs (https://goglobal.asu.edu/) in Lyon, France, and Quebec, Canada, and it endorses partnership and exchange programs in French-speaking Africa, Canada and Europe.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Language Teaching, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAFREBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Effectively communicate orally and in writing in French at the Intermediate to Advanced level according to the ACTFL (American Council on the Teaching of Foreign Languages) Proficiency Guidelines.
- Discuss major historical and contemporary works, genres, and trends of French and global Francophone literatures and cultures.
- Synthesize Francophone cultural artifacts and contexts in a final project.

Global opportunities

Global experience: There is no better way to learn a language than to be immersed in it. Being surrounded by French speakers offers a learning experience that cannot be acquired in a classroom. By studying abroad (https://goglobal.asu.edu/), students have the opportunity not only to strengthen their language skills by living in a Francophone country, potentially with a local host family, but also to earn ASU credit toward their degree.

Career opportunities

Knowledge of multiple languages and having intercultural competencies enhance any occupation and offer graduates many career opportunities.

Career fields that involve using French include:

- advertising, marketing and communications
- diplomatic and foreign service
- domestic and international business
- fashion
- film, television and multimedia
- foreign correspondence and journalism
- international student services and study abroad
- interpreting and translation
- teaching and research
- travel and tourism

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze the ways in which gender intersects with other social locations in shaping ideology, as well as social, political and cultural institutions.
Apply digital literacy skills to present their research in the field.
Demonstrate an understanding of key concepts and methodologies in the field.

Global opportunities

Global experience: Study abroad enables students to immerse themselves in a different culture. Through study and internships, they discover how other cultures view women and gender, and they learn to analyze issues related to gender.

The Global Education Office (https://goglobal.asu.edu/) offers programs in more than 65 countries across the globe. The College of Liberal Arts and Sciences recommends specific study abroad programs (https://goglobal.asu.edu/students/major/sst/women-gender-studies) for students majoring in women and gender studies.

Career opportunities

Graduates are prepared for many different career opportunities and have obtained careers in a wide array of fields, including:

- consulting
- counseling
- education
- government
- health care
- law
- nonprofits
- women's advocacy

They are also well prepared for graduate and law school and have been admitted to prestigious programs.

Geographic Information Science, BS (LAGISBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Science program in geographic information science, you start by learning the basics of mapping,= geospatial technology, data analysis, and computer programming. As you move into higher-level courses, you build on= these skills to learn how geospatial tools can be used to study and solve real-world environmental and social problems= through advanced spatial analysis.

If you want to earn a concurrent or second bachelor's degree in The College of Liberal Arts and Sciences, you should= review the information in the Concurrent Program Options section below and visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for details and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 170 - Precalculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Urban and Environmental Planning, MUEP

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/geographic-information-science-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAGISBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students have the opportunity to apply their knowledge of geographic information science in a new and different setting through study abroad (https://goglobal.asu.edu/). Students can gain a deeper understanding of the complex societal and environmental issues that influence the uses of geographic information science.

Students' resumes are enhanced by the heightened cultural competence and improved communication and critical thinking skills acquired through study abroad.

Career opportunities

Graduates pursue opportunities in the private and public sectors. Potential careers include:

- business location analyst
- geographic information system technician
- geospatial information scientist or technologist
- remote sensing scientist or technologist

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure= (https://admission.asu.edu/academics/licensure) webpage.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Will interpret geographic forms in the context of the United States using spatial skills and knowledge of physical geography processes.
- Will analyze interactions between human geography and physical geography processes.
- Will write a scholarly literature review on a contemporary geographical research problem.

Global opportunities

Global experience: Students deepen their understanding of cultural traditions in the human experience of place when studying abroad. With more than 300 programs available, students who participate in a Global Education program (https://goglobal.asu.edu/) tailor their experience to their specific interests and skill sets. Studying abroad grants students the ability to explore the world and gain hands-on experience in diverse cultures and traditions. Students enhance their resumes with heightened cultural competency, and enhanced communication and critical thinking skills they acquire through study abroad.

Career opportunities

Having gained skills in geospatial techniques, geographers with a BS degree in geography go on to careers such as:

- computer cartographer
- environmental impact assessment analyst
- geographic information science specialist or analyst
- geomorphologist
- hydrology and water resource specialist
- location analyst for businesses
- photogrammetry specialist
- remote sensing analyst

Graduates also are presented with a host of other geospatial career options in the burgeoning fields of geographic= information science, mapping and navigation systems.

Geography, MA

Urban and Environmental Planning, MUEP

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-geography/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site

while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAGCUBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Integrate spatial thinking knowledge and skills with knowledge of culture and cultural processes to be able to connect geographic processes to geographic forms in the context of the United States.
Apply geographic perspective when interpreting past international events that changed cultural landscapes.
Construct a scholarly literature review on a contemporary geographical research problem.

Global opportunities

Global experience: Students deepen their understanding of cultural traditions in the human experience of place when studying abroad. Through study abroad programs, students explore the world and gain hands-on experience in diverse cultures and traditions.

With more than 300 Global Education programs (https://goglobal.asu.edu/) available, study abroad enables students to tailor their experience to their specific interests and skill sets. Students' resumes are enhanced by the heightened cultural competency, and communication and critical thinking skills acquired through study abroad.

Career opportunities

Geographers obtain careers in:

community development
foreign service
geodemographic analysis
governmental organizations
intelligence analysis
international trade
public sector transportation planning
teaching
urban and regional planning

Geography (Meteorology-Climatology), BS (LAGCUMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The meteorology-climatology concentration under the Bachelor of Science program in geography enables you to meet the requirements for certification as a meteorologist by the National Weather Service. It covers dynamic as well as synoptic meteorology.

You gain a focused understanding of weather, climate and the various related methods of measurement and instrumentation. Required courses include atmospheric physics, operational weather forecasting, three semesters of calculus and two semesters of calculus-based physics.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Geography, MA

Urban and Environmental Planning, MUEP

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Transfer admission requirements: Transfer students must have a minimum cumulative GPA of 3.00 from a transfer institution.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAGCUMBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Construct a scholarly literature review (single outcome) on a contemporary geographical research problem in their capstone course.
Solve specific radiative energy balance problems in the final exam for GPH 412 (Physical Meteorology).
Apply knowledge of climate change theories to specific theoretical world constructs.

Global opportunities

Global experience: Students deepen their understanding of cultural traditions in the human experience of place when studying abroad. With access to more than 300 Global Education programs (https://goglobal.asu.edu/) available around the world, students are able to tailor their experience to their specific interests and skill sets and gain hands-on experience in diverse cultures and traditions. Students' resumes are enhanced with the heightened cultural competence and improved communication and critical thinking skills acquired through study abroad.

Career opportunities

Program graduates have found employment with:

airlines
energy power companies
government agencies
military (meteorology and pilot training)
National Weather Service

This program also provides suitable preparation for graduate study in either meteorology or climatology.

German, BA (LAGERBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in German, you study the language, literature and culture of German-speaking people and gain competence in reading, writing, listening and speaking.

German classes provide opportunities for exploring how people in German-speaking Europe:

• engage with politics, economics, social justice and humanitarianism
• have become global leaders in the fields of business, engineering and the natural sciences
• think deeply about philosophy, the influence of history and the environment
• understand the world through literature, film, the performing arts and other cultural practices

You are encouraged to participate in the School of International Letters and Cultures faculty-directed summer abroad program in Regensburg or in a semester or academic-year exchange program available at several German universities.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Language Teaching, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=LAGERBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Compare and contrast German cultural processes with those of other cultures.
Effectively communicate orally and in writing in German at the mid-to-high Intermediate level standards according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
Design projects on German cultural processes for a general and academic audience.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) is vital when learning the German language and culture: There is no better way to learn a language than to be immersed in it. Students can choose from two-week to full-year programs in German-speaking countries.

Studying abroad adds value to students' degrees by preparing them with the useful skills employers seek --- skills that are needed for leadership in a multicultural career.

Career opportunities

Knowledge of multiple languages and having intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive careers include:

foreign correspondent
foreign media professional
foreign service officer
international banking and finance professional
language, literature or culture teacher
law and immigration professional
multilingual administrative professional
translator or interpreter
travel professional

Global Asia Studies, BA (LAASIABA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in global Asia studies offers you a comprehensive, interdisciplinary exploration of Asia --- from China, Japan and Korea to India, Indonesia and beyond --- through a coherent plan of academic study. The program equips you with a wide range of intellectual tools to examine languages, religions, cultural and artistic traditions, political and social issues and transnational networks across Asia. It also emphasizes the diasporic

experiences of Asians worldwide, enabling you to apply this knowledge in academic, professional and cross-cultural settings.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAASIABA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Through ASU global education programs (https://goglobal.asu.edu/) across Asia, students can experience the cultures they study firsthand. These opportunities deepen students' understanding of Asian history and culture, and strengthen their critical thinking, communication and intercultural skills. Such experiences enhance personal growth, while giving graduates a competitive edge in today's global job market.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/asia-studies-ba) for students majoring in global Asia studies.

Career opportunities

Knowledge of Asia is highly valued in virtually every sector in which the U.S. interacts with the wider world, including:

- communication and journalism
- environmental studies
- government services and diplomacy
- higher education
- international business
- natural resource management
- popular art and culture
- supply chain management
- translation and editing
- transportation and tourism

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) is the perfect transition to life outside the classroom. As students become scholars in languages, cultures and how they intertwine, study abroad programs immerse them in the language of their choice. While studying abroad, students take courses in literature, history, sociology and more. They gain a deeper insight into how common languages and cultures develop in particular areas of the world by studying abroad.

Career opportunities

Graduates are globally informed citizens, having completed an immersive, international experience that shapes their understanding of the world. These experiences open doors to a variety of fulfilling career opportunities. Graduates are prepared to study advanced degrees and also pursue careers in:

- diplomacy
- education
- foreign correspondence
- foreign service
- global security
- international law
- journalism
- nongovernmental organization professions
- nonprofit leadership and management

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASSHBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate the global burden of disease considering social and environmental determinants of disease.
Design community-based health initiatives in domestic and international settings using principles of global health research, collaboration, and ethical practice.
Conduct epidemiological investigations of global health data, using quantitative social science research methods, including statistics and epidemiology.

Global opportunities

Global experience: Study abroad can be crucial in helping students gain a clearer view of the world, its peoples and the complex challenges that exist for all. Numerous faculty-directed study abroad programs are available that are designed to connect students with real-life issues that impact local communities yet transect boarders. Whether they are studying environmental health issues in Australia or investigating ancient cultures in France, students can see the world and gain hands-on experience to prepare for a future-focused career through Global Education programs (https://goglobal.asu.edu/).

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/global-health) for students majoring in global health.

Career opportunities

In Arizona and elsewhere, there is a pressing need for professionals who have the skills to work in cross-cultural settings or with underserved populations --- such as migrants, minorities and those living in poverty --- and many opportunities in this area are directly or indirectly related to health.

Nationally and internationally, the health field provides varied career opportunities, and demand is growing for graduates who exhibit the recognized interprofessional global health competencies. The program supports the goals of those pursuing careers in academic research, programming, teaching and policy. Sample employment categories include:

- data analyst
- learning specialist
- program manager
- research associate
- technical advisor

The program also provides a broad intellectual base for those who plan to pursue advanced specialist health training in fields such as:

- dentistry
- medicine
- nursing
- pharmacy

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate the global burden of disease considering social and environmental determinants of disease.
Design community-based health initiatives in domestic and international settings using principles of global health research, collaboration, and ethical practice.
Justify a theoretical or analytical framework for addressing health disparities across social, economic, and structural dimensions.

Global opportunities

Global experience: Study abroad can be crucial in helping students gain a clearer view of the world, its peoples and the complex challenges that exist for all. There are numerous faculty-directed study abroad programs designed to connect students with current issues that impact local communities yet transect boarders. Whether studying environmental health issues in Australia or investigating ancient cultures in France, students can see the world and gain hands-on experience to prepare for a future-focused career through Global Education programs (https://goglobal.asu.edu/).

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/global-health) for students majoring in global health.

Career opportunities

Training in global health provides enormous and varied career opportunities, both national and international, and demand is high and growing for graduates with these skills. The major program supports the goals of those pursuing careers in health services, academic and applied research, and teaching. Potential employers include:

- departments of health
- government agencies
- international agencies (World Health Organization, Centers for Disease Control and Prevention, Global Health Council, World Bank, Inter-American Development Bank)
- nongovernmental organizations
- universities

The degree program also provides a broad intellectual base for those who plan advanced specialist health training in fields such as:

- dentistry
- medicine
- nursing
- pharmacy

In Arizona and elsewhere, there is a pressing need for professionals with appropriate skills to work in cross-cultural= settings or with underserved populations such as migrants, minorities and those living in poverty; many of these jobs= are directly or indirectly related to health.

Global Studies, BA (LASGSBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in global studies, you examine the causes and consequences of problems that cross= national boundaries, and the governance of these problems in social, cultural and economic contexts.

The program's award-winning and internationally recognized faculty have extensive global experience from a wide= variety of disciplines in the social sciences and humanities. Courses use case studies, research and public policy= activities to address current problems and their solutions in various fields, including:

• economic and social development
• ethnoreligious identities, rights and conflicts

• global cities and urbanization
• global governance of health and climate change
• justice and human rights
• world cultures

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Political Science, MA

Global Security (Irregular Warfare), MA

International Affairs and Leadership, MA

Global Security (Cybersecurity), MA

Global Security, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-global-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASGSBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze key contemporary global issues.
Compare cultural perspectives of governance and/or global issues.
Effectively communicate, in writing, insights from their global experience or internship.

Global opportunities

Global experience: Global Experiences (https://goglobal.asu.edu/) not only satisfy degree requirements within the global studies major but also help students develop a portfolio of distinct experiences, with research and internship opportunities available in an international setting. Students have the chance to challenge themselves to adapt and persevere under potentially unfamiliar social and cultural circumstances. When studying abroad, students encounter many opportunities to improve their language skills and cultural competence, helping them to effectively communicate across populations.

The College of Liberal Arts and Sciences recommends specific global experience programs (https://goglobal.asu.edu/global-studies-ba) for students majoring in global studies.

Career opportunities

Graduates have skills useful for success in political or government careers, law school, graduate study, business or the nonprofit sector. Many program graduates have found positions in:

the courts and judicial administration
foreign service organizations
international organizations
legislative staff organizations
lobbying and advocacy groups
local and national media organizations
local, national and global nonprofit organizations
multinational corporations
national, state, and local government agencies
political consulting
research institutions

In addition, some graduates have gone on to other top-tier graduate and professional schools. These students have found a variety of employment opportunities in the fields of:

- communication
- education
- foreign service
- journalism
- law
- political science
- public service

History, BA (LAHISBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Accelerated MGM program options are not available to ASU Online students at this time.

Program description

In the Bachelor of Arts in history, you study the growth and development of human society from political, social,= economic and cultural perspectives. You learn to craft stories from materials that other people have left behind --- constitutions, land deeds, diaries, guns and bones. You learn to make decisions about what to investigate, whom to= believe, what happened first, and why things fell apart or came together.

History is a discipline that constantly adopts new techniques of analysis and new ways of gathering and presenting= information. You learn to use and create digital media, work on public history projects, conduct oral history interviews,= perform qualitative analysis and present your findings in compelling ways to all kinds of audiences.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

History, MA

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/undergraduate/bachelor-arts-history/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAHISBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Discern and articulate matters of historical cause and effect and construct a well-reasoned argument accounting for the necessary and sufficient causes of historical events.
Analyze and discuss historical change and continuity in American institutions and cultures.
Explore historical evidence in order to understand and compare competing perspectives on events.
Analyze continuity and change in global contexts, and understand the reasons for and consequences of dividing history into eras.
Acquire information about one or more societies outside of the United States and be able to analyze the culture and institutions of that society.

Global opportunities

Global experience: Understanding the events that have led humanity to this point is a large aspect of being a history major. There is no better way to understand historical events than through study abroad (https://goglobal.asu.edu/), living in the nations where the events happened, among the people and surrounded by the language and culture. Students gain not only memories that last a lifetime, but also skills that can help them succeed in every aspect of their professional and personal lives.

The College of Liberal Arts and Sciences recommends the following study abroad programs (https://goglobal.asu.edu/history-ba) for students majoring in history.

Career opportunities

History majors are in demand. They know how to find and evaluate evidence, form arguments and present analysis --- skills essential to most careers, including law, business, education, medicine and government.

Three out of four employers surveyed by the Association of American Colleges and Universities say they want colleges to place more emphasis on helping students develop five key learning outcomes: critical thinking, complex problem-solving, written communication, oral communication and applied knowledge in real-world settings. These learning outcomes are integral elements of an undergraduate degree in history.

History majors seek jobs in:

business and industry
communications
education
foreign service

law enforcement
museums
public administration
social services

History is an excellent foundation for graduate and professional studies in:

business
history
justice studies
law
medicine
public administration
public history
theology

History (Secondary Education), BA (LAHISSEBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

If you are considering a career in education, the secondary education concentration within the Bachelor of Arts program in history offers a flexible degree program for you. The concentration program fully prepares you for teaching and certification. You also receive all the disciplinary knowledge of a traditional history degree to prepare for a variety of noneducation careers.

History is a discipline that constantly adopts novel techniques of analysis and new ways of gathering and presenting information. As a student of history, you learn to use and create digital media, work on public history projects, conduct oral history interviews, perform qualitative analysis and present your findings in compelling ways to all kinds of audiences.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees)for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will explore historical evidence in order to understand and compare competing perspectives on events.
- Students will discern and articulate matters of historical cause and effect and construct a well-reasoned argument accounting for the necessary and sufficient causes of historical events.
- Students will analyze continuity and change in global contexts and will understand the reasons for and consequences of dividing history into eras.
- Graduates of the history program, secondary education concentration, will be able to develop lessons, unit plans and assessments for secondary school history courses.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) help students gain a global perspective and an increased appreciation for the history, philosophy and religion of different cultures.

The experience and understandings gained across borders can aid students in their future careers. Overcoming challenges through intuition and resourcefulness shows future employers that the graduate can tackle a variety of problems that may come up in the workplace.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/history-ba) for students majoring in history.

Career opportunities

The combination of courses within the secondary education concentration offers a broad education that prepares graduates for careers in a variety of fields, including:

archival research
business and industry
education
law and law enforcement
public history
publishing
social work

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Integrated Studies, BA (LAISTBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

If you excel in your studies, but your interests lie beyond established departmental emphases and boundaries, the Bachelor of Arts program in integrated studies was developed you. If you are approved for the major, you have the opportunity to work one-on-one with faculty mentors to create a personalized, focused and coherent course of study that draws its curriculum from more than one academic department or college.

The integrated studies degree program shares with all other liberal arts and sciences programs the goal of developing your analytical abilities and communication skills. The program combines breadth of learning across multiple disciplinary contexts with an appropriate depth in a focused area of inquiry.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: Any math course that meets the MATH designation.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
This program is not available to first-year students. There is an additional application for this degree program. Admission consists of completion of 32 credit hours at ASU with a GPA of at least 3.25, and three letters of recommendation from ASU faculty members. For more information, students should contact the senior director for advising and retention, Office of Student and Academic Programs, Futures Center, Armstrong Hall, Suite 112.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

This degree program is only for students who have earned at least 32 graded credit hours at ASU, who have a minimum cumulative GPA of 3.25, and whose study interests are not met by an existing major offered by ASU. Students who meet these qualifications and who have faculty mentors in their areas of interest are invited to meet with the Office of Student and Academic Programs in The College of Liberal Arts and Sciences to discuss the possibility of being approved to pursue this opportunity. Appointments may be scheduled by calling 480-965-6506.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAISTBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students pursuing integrated studies are unique, innovative and passionate, and they have a wide variety of interests. With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, students can tailor their experience to their specific interests and skill sets. Students gain hands-on experience and heightened cultural competency, as well as leadership and critical thinking skills in programs across the globe.

Career opportunities

The professional and vocational opportunities provided by the integrated studies degree depend on the area of concentration and the particular focus of study. Graduates are prepared to enter the workforce and to pursue graduate and professional studies.

International Letters and Cultures, BA (LASLCBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in international letters and cultures is grounded in the advanced study of at least one foreign language.

The program is more transcultural and transdisciplinary than a traditional languages and literatures degree program and encourages you to explore and challenge the traditional boundaries of cultures, texts and disciplines. You work closely with faculty and advisors to choose a program that combines study and research in a minimum of two cultures or disciplines, or in both.

You must meet with an advisor in the School of International Letters and Cultures to discuss this degree option. It's not recommended for first-year students.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (https://thecollege.asu.edu/) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASLCBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Effectively communicate orally and in writing in one language other than English at the mid-to-high Intermediate level standards according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
- Conduct a trans-lingual or trans-disciplinary research project in the two or more areas of language and/or cultural production.
- Analyze different kinds of existing, multimodal media sources that represent cross-cultural ideas or phenomena.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) is the perfect transition to life outside the classroom. As students become scholars in language and multiple cultures and how they intertwine, study abroad programs immerse them in the language of their choice. While studying abroad, students take courses in literature, history, sociology and more. They can gain a deeper insight into how common languages and cultures develop in particular areas of the world by studying abroad.

Career opportunities

Knowledge of multiple languages and having intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive careers include:

foreign correspondent
foreign media professional
foreign service officer
international banking and finance professional
language, literature or culture teacher
law and immigration professional
multilingual administrative professional
translator and interpreter
travel professional

Possible career fields include:

advertising, marketing and communications
airline industry
film, television and multimedia
hospitality industry
hotel and resort management
international education and study abroad administration
international law
military
publishing
technology industries

Additional education and certification may be required for some career paths.

International Letters and Cultures (Arabic Studies), BA (LASLCASBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in international letters and cultures with a concentration in Arabic studies provides you with critical and cultural diversity in advanced Arabic language and literature.

This concentration complements existing degree programs in the School of International Letters and Cultures and enhances your studies in social science disciplines such as political science and global studies, as well as many humanities fields, including anthropology, history, philosophy and religious studies. You gain a broad knowledge and understanding of the culture, literature and traditions of the vast Arabic-speaking world.

Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASLCASBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Effectively communicate orally and in writing in Arabic at the mid-to-high Intermediate level standards according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
Evaluate cultural practices, film, religion, history, geography, arts, and politics in Arabic literature through research projects.
Apply literary criticism to a variety of primary Arabic sources.

Global opportunities

Global experience: As students become scholars in the language, cultures and history of the Arabic-speaking world, studying abroad is the perfect transition to life outside the classroom. Students can become culturally and linguistically immersed while gaining a deeper insight into a particular part of the world. Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment.

Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and increase their ability to work with diverse groups of people. When studying abroad, students gain a global perspective and knowledge that prepare them for a future-focused career.

Career opportunities

Graduates of the program have greater insight into the vast Arab world of 22 countries, leading to career opportunities in areas such as journalism, translation, international consultations, government (e.g., United Nations, CIA), social work, law and health.

Graduates are prepared for a thriving job market. The degree also benefits those interested in academic research and careers in public and diplomatic service, and national security.

International Letters and Cultures (Classical Civilization), BA (LASLCVBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in international letters and cultures with a concentration in classical civilization, you gain a thorough grounding in the literature, culture and history of the ancient Greeks and Romans, which have provided a lasting foundation for innovative leaders and societies in the past and the present.

You can build a program to meet your needs and interests in fields including:

• ancient art and architecture
• ancient history, war, politics and economics
• archaeology of the ancient Mediterranean world
• mythology and religious practices
• renowned philosophers and writers such as Plato, Aristotle and Lucretius
• use of the classics in film, books and other media

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in

pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (https://thecollege.asu.edu/) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASLCVBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Describe significant people, events, cultural products and practices from ancient Greek or Roman antiquity.
Conduct a comprehensive research study examining aspects of ancient Greek or Roman cultures.
Construct or evaluate an argument using secondary theories to interpret primary sources.

Global opportunities

Global experience: Students can walk the same steps as some of the most famous thinkers, historians and poets in history. Studying classical civilizations helps renew many of the ideas, languages and societies that have shaped the modern day. Ancient civilizations are brought to life when students see the connections between the past and present.

Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options available, whether in a foreign country, in the U.S. or online, provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Students build communication skills, are challenged to adapt and persevere, and are exposed to differences across the world as they enhance their ability to work with diverse groups of people.

Career opportunities

Graduates with a degree in classical civilization have gained a new perspective that serves them well in a variety of disciplines. Classical civilization graduates may consider careers in:

business
film, television or multimedia
K-12 education
law
public service
writing and editing (fiction, journalism, technical writing)

Additional education may be required for some career fields.

International Letters and Cultures (Classics), BA (LASLCCBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in international letters and cultures with a concentration in classics begins with two cores: language skills in ancient Greek or Latin (or, if you choose, both) and knowledge of ancient history.

Among the variety of topics you pursue are:

• ancient art and architecture
• ancient history, war, politics and economics
• archaeology of the ancient Mediterranean world
• literary classics such as those by Homer, Sophocles, Virgil and Ovid
• mythology and religious practices

• renowned philosophers and writers such as Plato, Aristotle and Lucretius
• use of the classics in film, books and other media

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's website (https://thecollege.asu.edu/) for more information and requirements.

Second language requirement: Yes

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Translate ancient Greek or Latin texts, in both prepared and at-sight passages.
- Analyze features of genre and style in the text(s) or author(s) they read in their historical context(s).
- Construct or evaluate an argument using secondary theories to interpret primary sources.

Global opportunities

Global experience: Students can walk the same steps as some of the most famous thinkers, historians and poets in history. Studying classical civilizations helps renew many of the ideas, languages and societies that have shaped the modern day. Ancient civilizations are brought to life when students see the connections between the past and present.

Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options available, whether in a foreign country, in the U.S. or online, provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career, as well as personal enrichment. Students build communication skills, are challenged to adapt and persevere, and are exposed to differences across the world, and they increase their ability to work with diverse groups of people.

Career opportunities

Graduates with a degree in the classics have skills in research and the precise use and analysis of language. The transdisciplinary study of a culture that is very different from that of the modern world yet lies at the root of it also fosters the ability to view issues from many angles and to think critically about them.

As many employers are well aware, a classics graduate has the training to solve difficult puzzles, see through obscure language and conduct rigorous research on often ill-defined problems. These skills are prized in any field of endeavor. Classics graduates often find careers in:

- business
- Christian ministry
- education
- film, television and multimedia
- law
- politics
- writing and editing (fiction, journalism, technical writing)

International Relations, BS (LAINRBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In a globalized world with increasing political, economic, demographic and climatic challenges, studies in international relations are all the more prized by the public and private sectors.

In the Bachelor of Science program in international relations, you develop analytic and quantitative skill sets and mastery of forward-thinking content areas through rigorous curriculum, distinct internships and research. You gain valuable practical knowledge about national security, cybersecurity, AI and governance, intelligence, conflict processes, diplomacy, international trade, and both international organizations and countries across the globe.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Security (Irregular Warfare), MA

International Affairs and Leadership, MA

Global Security (Cybersecurity), MA

Global Security, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/undergraduate/international-relations-bs/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAINRBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Correctly apply one of the main theories of international relations, liberalism, to a global event or policy.
Write about topics of international relations using clear and concise language.
Apply social science research methods and elementary statistics in research design.

Global opportunities

Global experience: Faculty expertise and an international network of public, private and nonprofit partnerships provide international relations students with distinct and impactful internships and research opportunities at home, in Washington, D.C., and abroad. With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, international relations students can tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

International relations graduates leverage their analytic, statistical and communication skills to pursue careers in intelligence, security, international trade and public policy, and other data-driven forecasting fields. They are prepared for a variety of employment opportunities in:

data analytics
foreign service
intelligence and security
journalism
law
political science
politics
public relations

Program graduates are prepared for positions in the following types of establishments:

federal and international civil service
foreign service organizations
intelligence and security agencies and contractors
international agencies and organizations
international development institutions
law firms specializing in international law

- lobbying and advocacy groups
- local, national and global nonprofit organizations
- local and national media organizations
- multinational corporations
- political consulting firms
- research institutions

In addition, graduates are well positioned to attend top-tier graduate, law and professional schools in global trade, public policy, diplomacy and leadership, political science and data analytics.

Italian, BA (LAITABA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in Italian, you learn to speak, write, read and comprehend Italian. You develop the ability to think critically, learn about and appreciate the historical and contemporary cultures of the Italian peninsula and their relationship to other global traditions, and develop empathy as a globally informed leader.

You complete courses on topics such as:

• art
• culture

• film
• government
• history
• literature
• religion

You have a choice of four faculty-directed programs in Italy. In your chosen program, you can focus on developing your linguistic skills and learn more about Italy's contemporary responses to global challenges, such as natural disasters and the industrialized food system.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Effectively communicate orally and in writing in Italian at the Advanced level standards according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
Analyze current social and environmental challenges in Italy and across cultures.
Effectively communicate research findings through different media and platforms.

Global opportunities

Global experience: Students have the opportunity to be immersed in the Italian language and culture through a Global Education program (https://goglobal.asu.edu/), a vital component to the major. Experience in Italy adds value to the degree, preparing students to take off in an exciting, multicultural career with valuable skills that employers seek, such as communication and problem-solving.

Students majoring in Italian can study in Italy while taking courses in a variety of areas.

Career opportunities

Knowledge of multiple languages and having intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive careers include:

foreign correspondent
foreign media professional
foreign service officer
international banking and finance professional
language, literature or culture teacher
law and immigration professional
multilingual administrative professional
nongovernmental organization professional
translator and interpreter
travel professional

Jewish Studies, BA (LAJSTBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in Jewish studies offers you a transdisciplinary, cross-cultural and temporally expansive program of study. In the program, you focus both on the study of Judaism as a religion and on Jewishness as a distinct set of cultural values, peoplehood and historical legacy.

As with other degree programs in the humanities or social sciences, a BA program in Jewish studies provides you with an intellectual balance and complement to the study of science and technology. By engaging the Jewish experience as both a historical and contemporary reality, the program facilitates your enhanced cultural, historical and global awareness.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Study abroad programs can help students connect the past to the present. Judaism dates back to ancient times, and people of this heritage can be found all over the world. Students can immerse themselves in places that hold much significance for Jewish peoples, whether in Israel or elsewhere in the diaspora.

Participation in one of the more than 300 available Global Education programs (https://goglobal.asu.edu/) can provide practical experience that complements skills and lessons learned in the classroom. Studying abroad helps students gain a global perspective and an increased appreciation for the history, philosophy and religion of different cultures. In addition, the experience and understandings gained across borders can aid in a competitive job search.

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/jewish-studies-ba) for students majoring in Jewish studies.

Career opportunities

Graduates who receive a bachelor's degree in Jewish studies and pursue a career with one of the hundreds of U.S. companies that do business in Israel have a competitive edge because of their familiarity with Jewish culture.

Jewish studies graduates are also prepared to:

- attend rabbinical seminary in preparation for becoming a community rabbi or chaplain
- engage in world political and economic issues
- pursue advanced education in Jewish professional service fields

The degree also provides a firm foundation for those who wish to pursue advanced degrees related to their area of interest in fields that may include:

- archaeology
- creative writing
- ethics

- film and media
- history
- journalism
- law and justice studies
- philosophy
- political science
- religious studies

Justice Studies, BS (LAJUSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science in justice studies is an innovative social science and liberal arts program that examines current= and historical social justice issues. You explore social justice in the context of inequality, race, gender, citizenship,= indigeneity or other major contemporary issues.

This program provides a broad approach to understanding justice within the legal system and in wider social contexts.= To provide you with the analytical skills required of today's workforce, the program offers a social science focus while= also requiring a quantitative data analysis course.

You use multiple research methodologies to understand social justice issues in diverse settings, working with a variety= of people and cultures. The skills you gain enable you to create real change.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Social and Cultural Pedagogy, MA

Public Administration, MPA

Justice Studies, MS

Science and Technology Policy, MSTP
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-justice-studies/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAJUSBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze a current justice issue.
- Explore and analyze key concepts and methodologies in the field.
- Apply principles in justice studies to research activities or community engagement.

Global opportunities

Global experience: Human rights, violence, resource conflict and immigration are some of the issues that every country currently faces in some form or another. One of the best ways students can investigate potential solutions is by observing patterns from one culture to another through study abroad (https://goglobal.asu.edu/). Students who study issues of justice in another culture can bring a new lens to their own experience and become positive changemakers in the world.

The College of Liberal Arts and Sciences recommends specific study abroad programs (https://goglobal.asu.edu/students/major/sst/justice-studies) for students majoring in justice studies.

Career opportunities

Graduates emerge from this program with knowledge and skills that enable them to identify and address social justice concerns as they manifest in their professional lives. Program graduates work in a variety of fields, including:

- business
- economics
- education
- human welfare and social work
- international relations
- law
- nongovernmental organizations
- politics
- public service fields
- social advocacy

Many graduates go on to law school, graduate school or other professional degree programs.

Latin American Studies, BA (ASLASBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts program in Latin American studies, you examine the diverse historical trajectories, social formations, cultural expressions, and political processes that shape Latin America. You are exposed to the breadth and depth of knowledge about issues impacting Latin America as well as its global impact, preparing you for a global-minded career path.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or any math course that meets the MATH designation
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Social Justice and Human Rights, MA

Global Management, MGM

English, MA

Communication Studies, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Studying abroad enables students in the Latin American studies program to learn firsthand about the culture, language and food of their area of study. When studying in a Latin American country, students are able to immerse themselves in the culture and gain a greater understanding of that country and its people.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, students are able to tailor their experience to their specific interests and skill sets. Students in these programs build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network. Participation in a study abroad program provides students with the heightened cultural competency, and leadership and critical thinking skills that enhance their resumes and help them stand out in a competitive career field. Whether in a foreign country, in the U.S. or online, students in the New College of Interdisciplinary Arts and Sciences can explore how their varied fields and interests interact in different settings around the world.

Career opportunities

Graduates are prepared for further study in graduate or professional schools and in multicultural environments, including:

- arts and arts administration
- business and finance
- counseling
- diplomacy
- education
- global health
- journalism
- ministry
- nonprofit organizations and advocacy
- public policy
- technology

Mathematics, BS (LAMATBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Science program in mathematics, you acquire a deep grounding in both theoretical and applied mathematical concepts. Courses cover a broad spectrum of advanced mathematical topics, including differential equations, modeling, numerical analysis, number theory, topology, cryptography and real analysis. This degree focuses on the highest levels of math offered in undergraduate courses and is recommended if you are considering a graduate degree in mathematics.

This degree pairs well with several other areas of study in a variety of fields, including computer science, physics, astrophysics and engineering, as well as economics, business, music and art.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mathematics, MA

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze quantitative problems and draw conclusions by applying proper mathematical theories.
Synthesizing definitions and previous theoretical results to draw new conclusions and prove them.
Apply concepts from advanced mathematics to solve real-world problems in STEM fields

Global opportunities

Global experience: Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career and personal enrichment.

Whether in a foreign country, in the U.S. or online, students are encouraged to build communication skills, challenged to adapt and persevere, and exposed to differences across the world as they increase their ability to work with diverse groups of people. Graduates who have heightened cultural competence, and leadership and critical thinking skills acquired through study abroad may stand out in a competitive job market.

Career opportunities

Graduates with a BS degree in mathematics go on to careers in areas such as research, computer science, cybersecurity, law, finance, biotechnology, government, engineering, health care and education. Additionally, graduates have a strong foundation to pursue further mathematical studies.

Mathematics, BA (LAMATBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Arts degree program in mathematics, you apply the critical thinking, reasoning and problem-solving skills you learn to many endeavors. You complete courses that provide a strong mathematics background, and liberal arts requirements, including a foreign language.

The program is a fantastic option if you are interested in where and how math fits on the broad spectrum of human endeavor. The flexibility of the BA makes it particularly well suited for several combinations of concurrent degrees. As an example, you could earn a BA in mathematics and a concurrent degree in a foreign language, such as Spanish, or other complementary degrees such as music, sustainability, economics or philosophy.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas

Program description

The Bachelor of Science program in mathematics with a concentration in secondary education provides an excellent pathway for you if you are interested in teaching. This degree program offers a mastery of mathematics, an understanding of teaching best practices, and the ability to handle the challenges of a high school classroom.

If you wish to teach at the secondary level, you take courses that prepare you to earn certification in the state of Arizona through this program. You emerge equipped to provide mathematics communication that is coherent, meaningful and challenging.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Able to complete the process of synthesizing definitions and previous theoretical results to draw new conclusions and prove them.
Able to apply the proper cognitive, curricular, and pedagogical theories appropriate to the design and evaluation of mathematics instruction and instructional materials.
Able to analyze quantitative problems and draw conclusions by applying proper mathematical theories.

Global opportunities

Global experience: Students who wish to pursue a future in education must understand the diverse set of experiences, backgrounds and cultures that can shape the students in their classrooms. Students can enhance their mathematics degree with a global education program (https://goglobal.asu.edu), in which they can boost their communication skills and gain firsthand experience in a wide variety of cultures and communities.

Career opportunities

The mathematics BS degree with a secondary education concentration provides fantastic preparation for careers in teaching and education. In addition to the option of teaching high school mathematics, options for jobs in diverse fields include business, finance, industry and technology. Graduates can also choose to pursue graduate-level studies in mathematics or mathematics education.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Mathematics (Statistics), BS (LAMATTBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

Statistics involves identifying relevant details of data and how to collect that data to make reliable conclusions. In the Bachelor of Science program in mathematics with a concentration in statistics, you gain a strong math background with a focus on statistics. Flexibility is built into the program, giving you the freedom to explore other mathematical areas of interest in addition to statistics.

Using statistical methods, you discover how to generate insights that inform fact-based decision-making and research through statistical inference and controlled experimentation. You use next-generation techniques to study and explore strategies for dealing with uncertainty.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Statistics, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAMATTBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Devise strategies that leverage the proper mathematical and statistical tools for application to the analysis of data.
Perform statistical analysis of data, in order to draw valid conclusions.
Perform the process of analyzing quantitative problems and drawing conclusions by applying proper mathematical theories.

Global opportunities

Global experience: Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world, and increase their ability to work with diverse groups of people.

Each of the more than 300 Global Education program (https://goglobal.asu.edu/) options provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career as well as personal enrichment. Graduates who have the heightened cultural competence, and leadership and critical thinking skills acquired through study abroad may stand out in a competitive field.

Career opportunities

Based on factors such as pay, growth and job satisfaction, statistics has been named in separate job reports as one of the best career areas, and statistical analysis and data mining have been identified as two of the most desirable skills in today's job market.

The U.S. Bureau of Labor Statistics projects 8% employment growth for statisticians by 2034. The role of statistical thinking is exploding in many important areas, such as biostatistics, business analytics and the social sciences. For those pursuing a BS in mathematics with a concentration in statistics, that means an exciting future of career opportunities in fields including:

biostatistics
business
economics
engineering
finance
government
marketing
sports
technology

Microbiology, BS (LAMICBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in microbiology examines microorganisms and their vital roles in health, biotechnology and the environment. You study microbial genetics, physiology, diversity and ecology to understand how microbes interact with other organisms and influence biological and environmental systems.

Through laboratory and field experiences, you gain practical skills in experimental design, microscopy, molecular techniques, and data analysis. Coursework integrates microbiology, bacterial physiology, biochemistry, bacterial genetics, and advanced bacteriology labs to explore how microbes contribute to medicine and global society. You may work alongside faculty on research projects and may complete internships that connect classroom learning with applied experiences.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you are considering pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional requirements and opportunities.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 117 - College Algebra
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Biology, MS

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Molecular and Cellular Biology, MS

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Computational Life Sciences, MS

Microbiology, MS

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAMICBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Demonstrate capacity for scientific thinking by applying relevant background knowledge to analyze and/or develop scientific explanations.
> Effectively communicate complex scientific concepts, ideas, and reasoning, with appropriate use of relevant sources and evidence.

Demonstrate mastery in performing and interpreting results of microbiology lab tests.

Global opportunities

Global experience: Students gain valuable, resume-enhancing experience when studying abroad (https://goglobal.asu.edu/). Microbiology students are able to expand their knowledge of how microbes impact people and society in a variety of cultures, and challenge themselves to adapt and persevere in a new and exciting culture.

With more than 300 programs available, study abroad enables students to tailor their experience to their distinct interests and skill sets. The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/sls/microbiology) for students majoring in microbiology.

Career opportunities

Graduates are prepared for careers in research, biotechnology, environmental science, public health and the national STEM workforce. The degree also provides a strong foundation for graduate or professional study in microbiology, medicine and environmental studies. Graduates have scientific and technical skills valued across academic, government and industry settings.

Microbiology (Medical Microbiology), BS (LAMICMBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

In the Bachelor of Science program in microbiology with a concentration in medical microbiology, you focus on the biology of microorganisms and their roles in human health and disease. You examine bacteria, viruses, fungi and parasites while exploring the mechanisms of infection, immunity and disease prevention. Coursework integrates microbiology, genetics, immunology, molecular biology, biochemistry and physiology to prepare you for professional and research careers.

The curriculum aligns with scientific competencies recommended for premedical and health-related fields, providing a strong foundation for success on the MCAT and admission to medical or graduate programs. You can gain hands-on laboratory experience, conduct research, and complete internships in clinical or research settings.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Molecular Biosciences and Biotechnology, BS (LAMBBBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in molecular biosciences and biotechnology program explores the molecular foundations of life and their application to modern biotechnology. You study how biological systems can be engineered for advancements in medicine, agriculture and environmental sustainability. The curriculum integrates molecular genetics, microbiology, genetic engineering, biochemistry and biotechnology to prepare you for diverse scientific and professional pathways.

Through laboratory research, internships and capstone courses, you develop molecular and biotechnical expertise. Working alongside faculty mentors, you design experiments; analyze data; and explore the ethical, scientific and commercial aspects of biotechnology. You may also participate in collaborative research programs that provide individualized guidance and professional development.

The program is available as an accelerated degree (https://sols.asu.edu/degree-programs/accelerated-bachelors-masters-science) option. If you're pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts

and Sciences, you should consult The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for additional requirements and information.

Neuroscience, BS (LABMENBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

The Bachelor of Science program in neuroscience explores how the brain and nervous system operate to control bodily function, behavior and mental states. You receive interdisciplinary training at the intersection of biology, chemistry and psychology, gaining hands-on research experience in a collaborative, close-knit community within ASU's Department of Psychology.

This program offers direct access to award-winning faculty and research labs. Coursework spans four key domains of neuroscience:

• Behavioral neuroscience: How does the brain work to control behavior?
• Cellular and molecular neuroscience: How do the cells of the nervous system work?
• Cognitive neuroscience: How does brain activity underlie our thoughts and emotions?
• Systems and computational neuroscience: How do the billions of neurons work together?

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

McKenna Life Sciences, Business and Entrepreneurship Program
This degree qualifies for participation in the McKenna Life Sciences, Business and Entrepreneurship Program (mlsbe.asu.edu), which prepares academically outstanding students to solve health care challenges as leaders in medicine and biotechnology. With industry-informed, customized support and tight-knit 30-student cohorts, the MLSBE Program gives you the tools to become a successful entrepreneur at the intersection of science and business.

The program transcends traditional disciplinary boundaries, allowing you to graduate with two degrees --- one in finance and another in a natural science discipline of choice. You also complete a certificate in entrepreneurship and innovation, all in the same amount of time as a typical four-year degree program.

A new cohort is accepted each fall. Incoming first-year students are eligible to apply to the MLSBE Program after they've submitted their application to ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 251 - Calculus for Life Sciences
or MAT 265 Calculus for Engineers I or MAT 270 Calculus with Analytic Geometry I
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Molecular and Cellular Biology, MS

Microbiology, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/neuroscience-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LABMENBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Describe the structure and function of the nervous system at cellular, systems, and behavioral levels.
Evaluate scientific articles and research-related evidence pertaining to neuroscience phenomena.
Communicate scientific information in an organized and coherent manner.

Global opportunities

Global experience: Students can gain valuable experience when studying abroad, experience that enhances their resumes. Students majoring in neuroscience are able to expand their communication and research skills and challenge themselves to adapt and persevere in a new and exciting culture.

With more than 300 programs available (https://goglobal.asu.edu/) in a variety of cultures, study abroad enables students to tailor their experience to their specific interests and skill sets. The College of Liberal Arts and Sciences recommends specific study abroad programs (https://goglobal.asu.edu/students/major/sls/neuroscience) for students majoring in neuroscience.

Career opportunities

The BS in neuroscience opens pathways to careers focused on the human brain, spanning numerous areas of the health sciences and related fields. Graduates pursue opportunities in academic research, bioengineering, biotechnology, data science, law, medicine, psychology, pharmaceutical development, and physical or speech rehabilitation.

The program's interdisciplinary curriculum builds analytical, experimental and communication skills applicable across health and human sciences. Graduates are well prepared for advanced study or professional programs in biomedical fields such as medicine, nursing, clinical practice, technology and veterinary medicine.

Philosophy, BA (LAPHIBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Accelerated MGM program options are not available to ASU Online students at this time.

Program description

In the Bachelor of Arts program in philosophy, you learn to think well --- a skill that lays the foundation for personal and professional success.

You learn how to structure arguments, write precisely and clearly, and communicate your ideas in an orderly, persuasive and unambiguous way. Many philosophical texts are complicated, and philosophy courses teach you how to read, comprehend and summarize conceptually difficult material. In short, studying philosophy trains you to be a better, clearer thinker.

Coursework includes the major subfields of philosophy, such as metaphysics, epistemology and ethics, and electives that connect philosophy to other areas of inquiry, emphasizing the social relevance of philosophy.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-philosophy/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAPHIBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Present and defend a philosophical view using concepts, technical terminology, and methods acquired in an advanced topical seminar as well as skills in logical analysis and civil and respectful argumentation.
Present and explain central philosophical positions from key figures in the historical development of philosophical thought, especially their metaphysical and epistemological positions.
Evaluate how well different normative ethical theories such as consequentialism, deontology, virtue theory provide moral standards that dictate which (if any) actions are right and wrong or how well different metaethical theories such as realism, expressivism, relativism, and nihilism account for the meaning and truth of moral claims.
Evaluate arguments for formal validity and construct formal proofs. Students will be able to capture the logical form of prose arguments.

Global opportunities

Global experience: Students can explore a diverse variety of cultures and philosophies through study abroad. Study abroad programs (https://goglobal.asu.edu/) help students gain valuable skills --- such as problem-solving, communication and adaptability --- as well as cultural competence, enhancing their resumes. With more than 300 distinct programs around the globe available to them, students can tailor their study abroad experience to their interests and skill sets.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/philosophy-ba) for students majoring in philosophy.

Career opportunities

Philosophy alumni are well prepared for leadership roles regardless of the path they take, whether in business, law, politics, medicine or education.

The analytical, rhetorical and writing skills developed through the study of philosophy provide ideal preparation for careers in a wide variety of fields, including:

- business
- education
- journalism
- law
- medicine
- public service

Philosophy (Morality, Politics and Law), BA (LAPHIMPBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Accelerated MGM program options are not available to ASU Online students at this time.

Program description

The Bachelor of Arts program in philosophy with a concentration in morality, politics and law combines the basic= analytical approaches of philosophy with an emphasis on the moral questions that arise in political theory and law. The= foundations of political and legal systems are moral values, such as individual liberty, equality and justice. These are= contested values, open to different understandings of their nature and implications.

You explore the nature of morality, political theory, legal theory and the interconnections between them. You complete= philosophy courses and courses from disciplines related to philosophy to enrich and enliven your understanding of the= intersections of morality, politics and law.

This degree program is of special interest if you plan to pursue postgraduate work in law, policy or politics.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you're interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Global Management (Sustainable Tourism), MGM

Global Management (Global Digital Transformation), MGM

Global Management (Global Health Care Delivery), MGM

Global Management (Creative Industries and Design Thinking), MGM

Global Management (Global Development and Innovation), MGM

Public Administration, MPA

Global Management (Nonprofit Leadership and Management), MGM

Global Management (Global Entrepreneurship), MGM

Global Management (Global Business), MGM

Global Management, MGM

Global Management (Global Affairs), MGM

Global Management (Public Administration), MGM

Global Management (Public Policy), MGM

Global Management (Global Legal Studies), MGM

Global Management (Digital Audience Strategy), MGM

Global Management (Sustainability Solutions), MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/philosophy-morality-politics-and-law-ba/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAPHIMPBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Present and defend a philosophical view about a specific sub-topic in philosophy using concepts, technical terminology, and methods acquired in an advanced topical seminar as well as skills in logical analysis and civil and respectful argumentation.
> Evaluate how well different normative ethical theories such as consequentialism, deontology, virtue theory, provide moral standards that dictate which (if any) actions are right and wrong.
> Evaluate different approaches to constitutional interpretation and their application to actual case law.
> Apply the concept of formal validity and the rules of deductive inference to evaluate the deductive validity of prose arguments and to construct formalized proofs in symbolic logic.

Global opportunities

Global experience: Students can explore the diverse variety of cultures and philosophies around the globe. With more than 300 distinct programs (https://goglobal.asu.edu/) available to them, students can tailor their study abroad experience to their interests and skill sets. Study abroad programs help students gain valuable skills, such as problem-solving, communication and adaptability skills, as well as cultural competence --- all of which enhance their resumes.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/philosophy) for students majoring in philosophy with a concentration in morality, politics and law.

Career opportunities

Graduates are prepared for career opportunities in law, policymaking and analysis, politics and intelligence work. For example, graduates may find employment with the U.S. Department of State, the Central Intelligence Agency or the U.S. Department of Justice. The program is excellent preparation for law school.

Philosophy (Science, Nature and Mind), BA (LAPHISNMBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in philosophy with a concentration in science, nature and mind combines training in philosophy with an emphasis on questions raised by the natural, social and cognitive sciences.

Scientific investigation of the physical world and the mind inevitably makes assumptions about what sorts of things are real, the relationship of physical systems to conscious thought, and the nature of scientific explanation. The natural and social sciences are thus connected with philosophical views in metaphysics and epistemology. In addition, more applied areas of science, such as those concerned with sustainability and new technologies, raise ethical and policy questions as well as questions about humans' moral relationship to the natural world.

You enrich your understanding of the natural and social sciences through courses in philosophy as well as courses from related disciplines. This program is a great fit for you if you want to complement a science major with a second major in the humanities and if you wish to do postgraduate work in medicine, sustainability or technology.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAPHISNMBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Present and defend a philosophical view about a specific sub-topic in philosophy using concepts, technical terminology, and methods acquired in an advanced topical seminar as well as skills in logical analysis and civil and respectful argumentation.
Evaluate how well such different theories of mind as dualism, behaviorism, identity theory, functionalism and eliminativist materialism solve the mind-body problem and the problem of explaining phenomenal consciousness.
Evaluate different approaches to understanding the nature of scientific justification, the aims of science and how they can be achieved, and what makes some theories preferable to others.
Apply the concept of formal validity and the rules of deductive inference to evaluate the deductive validity of prose arguments and to construct formalized proofs in symbolic logic.

Global opportunities

Global experience: Students can explore the wide variety of cultures and philosophies around the globe. With more than 300 distinct study abroad programs (https://goglobal.asu.edu/) available to them, students can tailor their experience to their interests and skill sets. Study abroad programs help students gain valuable skills, such as problem-solving, communication and adaptability skills, as well as cultural competence --- all of which enhance their resumes.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/students/major/philosophy) for students majoring in philosophy with a concentration in science, nature and mind.

Career opportunities

The analytical, writing and problem-solving skills gained through a philosophy major are highly transferable to a wide variety of jobs, and graduates with a degree in philosophy have the highest median income of all humanities graduates.

Graduates of the science, nature and mind concentration are prepared for career opportunities in medical and mental health fields, climate change and sustainability, information and policy analysis, and scientific and nature education and writing. For example, graduates may find employment with the U.S. Environmental Protection Agency.

This program also provides excellent preparation for students interested in medical school.

Physics, BA (LAPHYBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Physics is concerned with the nature, structure and interactions of matter and radiation. The Bachelor of Arts program= in physics is a flexible and efficient option if you are interested in a liberal arts degree that provides you a broad= knowledge of physics. This degree program also is ideal if you are seeking to complete two degrees, with physics as the= second degree.

The program combines innovative learning methods with time-tested classroom and laboratory experiences for an= education that is thorough in physics training and flexible enough to encourage interdisciplinary opportunities in areas= such as chemistry, biology and materials science.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you are advised to= visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more= information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: Yes
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
or MAT 265 Calculus for Engineers
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students who wish to change their major to physics should have a minimum cumulative GPA of 2.00 for all critical classes they have completed.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAPHYBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students majoring in physics can study abroad (https://goglobal.asu.edu/) in one of more than 300 programs. A study abroad experience offers students a way to supplement their ASU experience as well as the chance to build helpful, resume-boosting skills that employers seek. Students who study abroad improve their communication skills, learn to adapt to unforeseen challenges, and expand their worldview through international experiences that expose them to different perspectives.

Career opportunities

Graduates with a BA degree in physics may pursue such careers as:

- data analyst
- K-12 STEM teacher
- lab assistant
- patent scientist
- science writer
- technology support analyst

Physics, BS (LAPHYBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Physics is concerned with the nature, structure and interactions of matter and radiation. In the Bachelor of Science program in physics, you develop general problem-solving skills that enable you to interpret and solve new problems that involve virtually any phenomenon in the physical universe, including classical or quantum systems, electric or magnetic behavior, and thermal or statistical physics.

The BS program in physics provides a solid foundation in physical science and mathematics, and prepares you for graduate study in physics, other sciences or engineering programs.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 270 - Calc w/Analytic Geometry I
OR MAT 265 Calculus for Engineers I
Math intensity: Substantial

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Materials Science and Engineering, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students gain valuable experience through study abroad (https://goglobal.asu.edu/) --- experience that enhances their resumes. With more than 300 programs available in a variety of countries around the world, study abroad enables students majoring in physics to tailor their experience to their specific interests and skill sets.

Graduates who have the heightened cultural competence, and leadership and critical thinking skills they acquired when studying abroad may stand out in a competitive field.

Career opportunities

The wide variety in applicability of the principles of physics allows for great flexibility in a choice of career or further education.

Graduates with a BS in physics have analytical and technical skills suitable for employment in areas such as data analytics, education, engineering, finance, information technology, materials science, science communication and more.

Graduates are also prepared for admission to graduate school or advanced study in astronomy, engineering, mathematics, medicine and physics.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply a key political ideology, Classical Liberalism, to a public policy.
Communicate using clear and concise language on topics related to political science.
Apply social science research methods and elementary statistics in research design.

Global opportunities

Global experience: Students can experience firsthand the diverse political and social powers governing communities around the globe. With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, students can tailor their experience to their specific interests and skill sets. Students majoring in political science can develop a global perspective on politics and public affairs in countries with regimes that have distinctive characteristics.

The College of Liberal Arts and Sciences recommends these global experience programs (https://goglobal.asu.edu/students/major/political-science) for students majoring in political science.

Career opportunities

Graduates have the skills to analyze and interpret the significance and dynamics of political events and governmental processes. These related quantitative skills and knowledge position them for success in political or governmental

careers, business and nonprofit entities, and law school and graduate study. Many program graduates have found positions in:

- foreign service organizations
- international organizations
- legislative or judicial staff organizations
- lobbying and advocacy groups
- local and national media organizations
- local, national and global nonprofit organizations
- multinational corporations
- national, state and local government agencies
- political consulting
- research institutions
- survey research

In addition, some graduates have gone on to other top-tier graduate and professional schools. These graduates have found a variety of employment opportunities in the fields of:

- communication
- data science
- education
- foreign service
- journalism
- law
- political science
- public service

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply a key political ideology, Classical Liberalism, to a public policy.
Communicate using clear and concise language on topics related to political science.
Apply social science research methods in research design.

Global opportunities

Global experience: Students can experience firsthand the diverse political and social powers governing communities around the globe. With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, students can tailor their experience to their specific interests and skill sets. Students majoring in political science can develop a global perspective on politics and public affairs in countries with regimes that have distinctive characteristics.

The College of Liberal Arts and Sciences recommends these global experience programs (https://goglobal.asu.edu/students/major/political-science) for students majoring in political science.

Career opportunities

Graduates have the skills to analyze and interpret the significance and dynamics of political events and governmental processes. This knowledge, combined with related skills, equips them for success in political or governmental careers, law school, graduate study, business and the nonprofit sector. Many program graduates have found positions in:

the courts and judicial administration
foreign service organizations
international organizations
legislative staff organizations
lobbying and advocacy groups
local and national media organizations
local, national and global nonprofit organizations
multinational corporations
national, state and local government agencies
political consulting
research institutions

In addition, some graduates have gone on to other top-tier graduate and professional schools. These students have found a variety of employment opportunities in:

communication
education
foreign service

journalism
law
political science
public service

Politics and the Economy, BS (LAPECBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in politics and the economy prepares you for careers that require a sophisticated understanding of the relationship between politics and the economy.

This program was created in response to the growing recognition that many of the world's most pressing problems (e.g., growth and development, tax reforms and climate change) are fundamentally political and economic problems. The program combines core courses in economics and political science. Using the combined strengths of the Department of Economics and the School of Politics and Global Studies, the program enables you to gain strong quantitative and modeling skills and a rich understanding of political context.

In addition to the guidelines in the Concurrent Program Options section below, if you're interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 210 - Brief Calculus
Any math course that meets the MATH designation, except MAT 114 College Mathematics.
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Political Science, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
All students are required to meet general university admission requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LAPECBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate the impacts of a public policy using economic and social science methods.
- Communicate using clear and concise language on topics related to political science and economics.
- Apply social science research methods in research design.

Global opportunities

Global experience: Students can examine politics and economics from others' standpoints while studying abroad. With more than 300 Global Education programs available (https://goglobal.asu.edu/), students can tailor their experience to their specific interests and skill sets. It can help them explore how other countries and cultures approach their most pressing problems, giving students insights they can apply in their future careers.

Career opportunities

According to external forecasters of employment growth (U.S. Department of Labor and U.S. News & World Report), overall employment in life, physical and social science occupations is projected to grow faster than the average for all occupations from 2024 to 2034. The demand for graduates grounded in economics and political science is driven by the growing complexity of the global economy, the increased implementation of financial regulations in wealthier nations and the growing competitiveness of the business environment.

In terms of specific sectors, graduates are well prepared for entry positions in government at all levels --- local, state and federal --- and in business, economic and political consulting, and law. They are also prepared to pursue advanced degrees in law, business, economics or political science.

Psychology, BS (LAPGSBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Science program in psychology emphasizes the scientific study of human behavior, cognition and more. The program combines innovative learning methods with classroom and laboratory experiences for an education that encourages interdisciplinary opportunities.

You gain a strong foundation in psychological theory and practice, honing research analysis and critical thinking skills. You engage with esteemed faculty, exploring human and animal behavior, and you learn to effectively interact with diverse groups across scientific interests and disciplines.

This program connects you to a robust support network, internships and engaged alumni.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 119 - Finite Mathematics
or MAT 170 Pre-Calculus
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)

Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
First-year student admission requirements for this program are the same as the university's first-year admission requirements.

Transfer admission requirements: Transfer applicants must meet university transfer admission requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Exercise scientific reasoning when investigating psychological phenomena in a research project.
Differentiate the specific subfields and themes (e.g., nature vs. nurture; mind and body) of Psychology.
Create career development materials appropriate for future employment or graduate study in Psychology.

Global opportunities

Global experience: Through study abroad programs, students are exposed to distinct differences in human behavior and the human condition, are able to improve language and cross-cultural skills for effective communication, and are challenged to adapt to new social and cultural circumstances.

The expanded education that students acquire through a Global Education program (https://goglobal.asu.edu/) is a valuable enhancement to their resume, helping them stand out when applying for graduate school or pursuing their choice of careers

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/psychology) for students majoring in psychology.

Career opportunities

Graduates have diverse career options. They have gained foundational psychology knowledge that enhance their work, relationships and family roles. Graduates have a strong foundation for immediate entry into science-based career fields, such as health care or research and development in an academic or business environment.

Graduates are well positioned for a pathway into medical school. They are also well prepared for rewarding careers in pre-med and health fields as well as research and graduate study in psychology, health sciences, law and other graduate-level degree programs.

Religious Studies (Religion, Culture and Public Life), BA (LARELCPBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Accelerated options for this program are not currently available to ASU Online students.

Program description

In the Bachelor of Arts program in religious studies with a concentration in religion, culture and public life, you approach religion as a mode of human culture, as constituted in intellect, language, emotion, practice, art and everyday life.

The program offers you a focus on the role religions play in the formation of cultural identities, traditions, norms and memories. You examine, in particular, the impact that religions have on culturally specified ways that people reason, communicate, socialize, work, entertain, dress, eat, live and die. Special consideration is given to the influence of religion on gender roles and sexual norms; the formation of images of the body and the moral assessment of medical practices; and the reflection and reproduction of religion in film, popular culture and conventional, digital and social media.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

Second language requirement: Yes

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Formulate a thesis about a significant issue in religious studies relating to culture and public life.
Address and analyze a scholarly issue in religious studies relating to culture and public life.
Develop a sustained, evidence-based argument about a significant issue in religious studies relating to culture and public life.

Global opportunities

Global experience: Religion plays a major role in cultural and societal norms, identities and traditions all over the world. Through one of more than 300 distinct Global Education programs (https://goglobal.asu.edu/), students witness firsthand diverse religions and cultures, and gain a heightened understanding of the impact of religion on human culture. Students also enrich their cultural competence and improve their communication and critical thinking skills, which can enhance their resumes.

The College of Liberal Arts and Sciences recommends these study abroad programs (https://goglobal.asu.edu/religious-studies-ba) for students majoring in religious studies with a concentration in religion, culture and public life.

Career opportunities

Religious studies majors seek jobs in many professional areas, including:

chaplaincy
diversity management
education
foreign service
health care, including mental health and counseling
journalism
law
nonprofit and nongovernmental organizations
public service and public policy
publishing

Religious studies is an excellent foundation for graduate and professional studies in:

anthropology
gender studies
health care
history
justice studies
law
philosophy
political science
sociology
theology

The concentration addresses present-day interests and prepares students for jobs in a variety of professions. In addition to the fields listed above, students also pursue employment in media studies, migration and international studies.

Religious Studies (Religion, Politics and Global Affairs), BA (LARELPGBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Accelerated options for this program are not currently available to ASU Online students.

Program description

In the Bachelor of Arts program in religious studies with a concentration in religion, politics and global affairs, you consider how the study of religion expands the understanding of political culture, communal formation, governance, nationalism, statehood and citizenship in domestic and global contexts.

You explore religion's role in shaping political values, social movements, civic organizations and communal norms, with particular attention to how religion impacts issues of health, the environment, migration, peace, conflict, violence and various issues of social justice. Special consideration is given to the religious intersections of nationality, ethnicity, race, gender and other vital facets of human community and identity.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Formulate a thesis about a significant issue in religious studies related to politics and global affairs.
Address and analyze a scholarly issue in religious studies related to politics and global affairs.
Develop a sustained, evidence-based argument about a significant issue in religious studies related to politics and global affairs.

Global opportunities

Global experience: Religion plays a major role in societal norms, politics and traditions all over the world. Through Global Education programs (https://goglobal.asu.edu/) (more than 300 distinct programs are available), students witness diverse religions and cultures firsthand and gain a heightened understanding of the impact of religion. This understanding, as well as the cultural competence and strengthened communication and critical thinking skills that students acquire, enhances their resumes.

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/religious-studies-ba) for students majoring in religious studies with a concentration in religion, politics and global affairs.

Career opportunities

Religious studies graduates seek jobs in many professional areas, including:

chaplaincy
diversity management
education
foreign service
health care, including mental health and counseling
journalism
law
nonprofit and nongovernmental organizations
public service and public policy
publishing

Religious studies is an excellent foundation for graduate and professional studies in:

anthropology
gender studies
health care
history
law
justice studies
philosophy
political science
sociology
theology

Russian, BA (LARUSBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in Russian explores Russia's language, literature, history and more. As part of a small community of program participants with the resources of a large university, you gain intermediate to advanced reading, writing and speaking skills in Russian. You also study Russian civilization, popular culture, protest and propaganda, and classical Russian works.

Faculty members mentor you throughout the program to win prestigious paid internships in places such as Washington, D.C., and scholarships from U.S. government entities, including the Department of Defense, the Department of Education, the Department of Justice and the Department of State.

The program partners with the Melikian Center for Russian, Eurasian and East European Studies to offer a certificate in agribusiness, anthropology, architecture, economics, geography, history, political science, religious studies, Russian, sociology or women's studies.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management, MGM

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LARUSBA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Speak the Russian language as the level described in the SILC-GRS (Slavic) assessment to be equivalent to or exceed ACTFL "intermediate mid/ high" language proficiency.
Situate Russian and Russophone literature and cultural traits within their historical context at an ILR 2 level in intercultural communication, "Limited Working Competence".
Analyze cultural concepts and values through course assignments.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) is vital when learning the Russian language and culture. Being immersed among native speakers adds value to the degree, and the experience prepares students to take off in an exciting, multicultural career with valuable skills that employers seek. Students can choose from programs in many Russian-speaking countries. Programs vary in length, from summer experiences to full-year programs.

Career opportunities

Graduates of the program have intermediate to advanced Russian language and cultural proficiency.

Internship opportunities available through the program open doors to a variety of fulfilling career possibilities. Graduates are prepared to pursue advanced degrees or careers in:

business
diplomacy
education
global security
international law
journalism
military
public policy
translation
travel

Sociology, BS (LASOCBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Sociology is the study of social life, social change and the social causes and consequences of human behavior.

The Bachelor of Science program in sociology offers you courses on contemporary social phenomena such as crime,= population trends and technology. You also explore social institutions such as family, health, sports, law and the= workplace. You develop proficiency in written communication, statistical analysis and research methodology, and gain= computer skills.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The= College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and= requirements.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Sociology, MA

Public Administration, MPA

Family and Human Development, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition= and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-sociology/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASOCBS~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify global and cross-cultural variations in social phenomena and points of intersectionality in social institutions and processes.
- Apply key sociological concepts and theoretical frameworks critical to understanding social institutions and structural inequality
- Critically evaluate quantitative/qualitative social science research in a class assignment

Global opportunities

Global experience: Students explore different cultures and social dynamics when studying abroad (https://goglobal.asu.edu/) and develop in-demand professional skills such as teamwork and problem-solving. Students can stay on track academically while earning ASU credit over winter or spring break trips. Among the opportunities available are homestays, which enable students to make connections with families in other countries.

The College of Liberal Arts and Sciences recommends these programs (https://goglobal.asu.edu/students/major/sociology) for students majoring in sociology.

Career opportunities

Graduates with a BS degree in sociology are prepared for direct entry into positions in:

- business
- government
- social service

The degree also provides excellent preparation for future graduate and postbaccalaureate studies in:

- health care

- law
- social work and counseling
- sociological research

Spanish, BA (LASPABA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

In the Bachelor of Arts program in Spanish, you gain reading, speaking and writing proficiency through either the= Spanish linguistics track or the Spanish literature and culture track. The linguistics track provides an in-depth= understanding of the Spanish language. In contrast, the literature and culture track addresses issues throughout the= Spanish-speaking world, as seen through the lenses of the Spanish language, culture and literature.

Throughout the year, through study abroad and exchange programs (https://goglobal.asu.edu/), ASU offers you= opportunities to study in Spanish-speaking countries.

If you are an online student, the BA program is also available as a combination of courses from both tracks. You are= encouraged to contact a school advisor to discuss the best option.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in= pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, visit The College's= website (https://thecollege.asu.edu/) for more information and requirements.

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Spanish, MA

Global Management, MGM

Language Teaching, MA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-spanish/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=LASPABA~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Effectively communicate orally and in writing in Spanish at the Advanced-Low level according to the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.
Conduct a research project in the areas of Spanish language and/or cultural production.
Analyze cultural concepts and values through course reflection assignments.

Global opportunities

Global experience: Spanish is one of the most widely spoken languages in the world. Culture teaches people about themselves and how to prepare for the challenges of life; learning about foreign cultures broadens that perspective to include other people whose lives may be both notably different from and remarkably similar to one's own.

Global Education programs (https://goglobal.asu.edu/) provide students with opportunities for immersion in Spanish-speaking societies, along with a diverse array of individual and group activities that enable them to have enriching

personal experiences. Global Education programs enhance students' experiences of the world's diversity --- and the knowledge of such diversity makes every person a better human and citizen.

Career opportunities

Knowledge of multiple languages and having intercultural competencies enhance any occupation and offer graduates many career opportunities. Language-intensive professions include:

- foreign correspondent
- foreign media professional
- foreign service officer
- international banking and finance professional
- language, literature or culture teacher
- law and immigration professional
- multilingual administrative professional
- translator or interpreter
- travel professional

Technological Leadership, BS (LATECLDRBS)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

This program is not accepting applications at this time.

Program description

In the Bachelor of Science program in technological leadership, you learn complex problem-solving, technical design= thinking and leadership skills. Coursework focuses on individual and team-based research, technology design, intensive= internships and fundamental skills in writing, math and coding.

Offered by the Interplanetary Initiative, this major consists of an interdisciplinary blend of student-driven classroom= learning and hands-on projects. In inquiry classes, you use an innovative inquiry cycle to explore big questions= associated with human society and space exploration. Examples of these questions include, "What will the moon look= like after human settlement?" and "How can we create and sustain a human biosystem in space?" In hands-on classes,= you use technical design thinking processes with software and lab tools to create physical products, digital solutions, or= service designs that address complex challenges in the world of science and technology.

In addition, immersive internships provide you with an opportunity to apply knowledge from academic courses in order= to address research opportunities or practical challenges, and to gain valuable experience in the workplace before= graduation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 210 - Brief Calculus
or MAT 265 Calculus for Engineers I
Math intensity: Moderate

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Management of Technology, MS

Design (Space Architecture and Extreme Environments), MSD

Human Systems Engineering (User Experience Research), MS

Public Interest Technology, MS

Global Management, MGM

Technology (Management of Technology), MSTech

Organizational Leadership, MS

Human Systems Engineering (Intelligent Systems), MS

Global Technology and Development, MS

Human Systems Engineering, MS

Transborder Chicana/o and Latina/o Studies, BA (LATCLBA)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

Program description

The Bachelor of Arts program in transborder Chicana/o and Latina/o studies challenges you to understand the intersections of identity, culture and community for Mexican-origin, Chicano and Latino populations in the United States and the U.S.-Mexico transborder region, with implications for other border communities around the world.

More specifically, you learn about the diversity of cultural, social, political, economic, historical, health-related and artistic experiences in these communities, and you develop tools for understanding borders and border communities worldwide. The curriculum focuses on growing the next generation of critical thinkers and changemakers who work toward improving the lives of Latinos, strengthening Latino and transborder communities, and honoring transborder knowledge.

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Compare and contrast the complex and multi-faceted cultures, backgrounds, and histories of Latino subgroups in the Americas.
Apply theory to a creative or scholarly work that contributes to understandings of local and global transborder communities and experiences.
Develop a research proposal using appropriate methodological approach(es) to address pressing social issues in Latinx/transborder communities.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, transborder studies students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Latinos are the country's second largest ethnic group behind white non-Hispanics. Graduates are equipped to address the changing needs of Latinos in the U.S. and are prepared to pursue careers or further education; possible positions include immigration lawyer, nonprofit leader, teacher, entrepreneur, government employee, political activist, community organizer, advocate and artist. Career paths enhanced by this degree include:

the arts
education (administration and teaching)
film and media
law
local, state and national government agencies
local, state, and national public and private health services
public policy and administration
social work and nonprofit organizations

College/School: The College of Liberal Arts and Sciences

Campus: Tempe

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

The Bachelor of Arts program in transborder Chicana/o and Latina/o studies focuses on the cultural, social, political, economic, historical, health-related and artistic experiences of Mexican-origin, Chicano and Latino populations in the United States and the U.S.-Mexico transborder region.

In the U.S. and Mexican regional immigration policy and economy concentration, you focus your studies on the growing political and economic influence of Latinos in the U.S. and the U.S.-Mexico region, considering relevant current topics such as:

• border enforcement
• demographic change
• economic integration
• globalization
• immigration policy
• international migration
• regional development

Second language requirement: Yes
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students have the opportunity to immerse themselves in the homelands of the Chicano and Latino cultures they are studying. Study abroad programs (https://goglobal.asu.edu/) across Central America, Mexico and other Latin American countries deepen students' understanding of transborder influences, and they gain a new perspective on international migration. The heightened cultural competency, and critical thinking and communication skills that students acquire through study abroad are valued enhancements to students' resumes.

Career opportunities

Graduates of the U.S. and Mexican regional immigration policy and economy concentration are prepared for careers in several fields, such as:

- education (administration and teaching)
- local, state and national government agencies
- nonprofit organizations
- public affairs
- public policy and administration
- social work

Graduates are also equipped with the theoretical and practical knowledge necessary to pursue graduate work in law= and other fields.

Urban Planning, BSP (ARPUPBSP)

College/School: The College of Liberal Arts and Sciences

Campus: Tempe, Online

Program description

Urban planners guide communities in making wise decisions about their use of land and resources. The urban planning program introduces you to issues faced by urban areas and the tools necessary to address them.

In the Bachelor of Science in Planning program, you gain expertise in the analysis and synthesis of the physical, social, political and economic issues that shape urban and regional development. Courses cover comprehensive planning, computer and analytical methods, public policy formulation and administration, socioeconomic and environmental analyses, urban design and many other fields that urban planning encompasses, such as:

• environmental planning
• geographic information systems
• housing
• landscape architecture
• planning and zoning law
• transportation
• urban and development economics
• urban resilience

In addition to reviewing the guidelines in the Concurrent Program Options section below, if you are interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences, you can visit The College's website (https://thecollege.asu.edu/concurrent-and-second-baccalaureate-degrees) for more information and requirements.

First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Urban and Environmental Planning, MUEP

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-urban-planning/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=ARPUPBSP~null&college=CLA) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze the physical characteristics, social dynamics and economic conditions that influence urban and regional planning challenges through course projects
- Apply professional planning skills to evaluate urban planning scenarios by utilizing real-world data, simulation tools, and best practices in planning analysis.
- Apply professional norms through independent and team-based course projects.

Global opportunities

Global experience: Through study abroad (https://goglobal.asu.edu) programs, students of urban planning can gain an understanding of how communities around the world have developed urban areas, and look at urban issues from a global perspective. The valuable experience that students obtain through study abroad enhances their resumes, and they use their acquired insights to help communities at home and around the world.

More than 300 study abroad programs are available in more than 65 countries.

Career opportunities

Graduates of the urban planning program pursue career opportunities with private planning firms and governmental planning agencies, mainly at the city level, but also with county, state and federal entities. Some planners elect to pursue graduate degrees to develop specialty skills and enhance their opportunities for career advancement.

The urban planning degree, especially when combined with a focus on geographic information science, gives graduates an advantage in careers that combine urban planning with GIS and in other jobs that involve urban issues, including:

comprehensive and long-range planning
economic development planning
housing issues
planning law
public participation in the planning process
socioeconomic and environmental analyses
sustainable planning
transportation

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Nursing and Health Innovation, Edson College of

Applied Science (Health Entrepreneurship and Innovation), BAS (NUHCIBAS)

College/School: Edson College of Nursing and Health Innovation

Campus: Downtown Phoenix, West Valley, Online

Program description

If you have an Associate of Applied Science degree and want to lead transformative change in health through the= creation of new products, processes and systems, the Bachelor of Applied Science program with a concentration in= health entrepreneurship and innovation is for you.

In this program, you examine health care policy and evidence-based practices through an innovative lens, using an= integrated systems approach, enabling you to hone the skills necessary to be a leader of innovation in a health care= context.

If you have an AAS degree in any field, you can pursue this pathway.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work= authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT= extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree= through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: Any math course with the MATH general studies designation will satisfy the math= requirement.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Aging, MS

Healthcare Innovation, MHI

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students must have an AAS degree from a regionally accredited institution to be eligible for admission to BAS programs at Arizona State University.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students with an AAS degree in any field are eligible to change their ASU major to this applied science program in health entrepreneurship and innovation.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/health-innovation-bas/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUHCIBAS~null&college=CNU) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop a personal philosophy of innovation and health.
- Develop the seven pillars of innovation as the foundation of advancing positive change in healthcare.
- Design value-driven models for implementing health innovations or entrepreneurial initiatives using appropriate theoretical, financial, and strategic frameworks.

Global opportunities

Global experience: Students learn to thrive in a global environment through the rich educational and interpersonal experiences inherent in study abroad opportunities. A resume enhanced by a valuable study abroad experience impresses prospective employers and helps students stand out should they decide to pursue advanced study.

With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, health entrepreneurship and innovation students are able to tailor their experience to their interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Primary career opportunities include health care administrators and health care managers, as well as:

- entrepreneurs
- health architects
- health care administrators
- health care strategists, advisors, project managers and administrators
- health innovation consultants
- health product and service managers
- health system designers
- intrapreneurs (managers who promote innovative product development and marketing)
- public relations experts in health

Community Health, BS (NUCHLTBS)

College/School: Edson College of Nursing and Health Innovation

Campus: Downtown Phoenix, West Valley, Online

Program description

Modern health care extends beyond the hospital and into local neighborhoods. Whether it means ensuring everyone= has access to nutritious and fresh foods, or providing vulnerable populations with preventive checkups, health care is= now a community matter.

The Bachelor of Science program in community health develops you into a leader who is dedicated to addressing= health challenges at their source and creating partnerships with both public and private organizations to leverage= resources. By creating a communitywide response to these challenges, you can better advocate for patients and= provide education opportunities for people of all backgrounds.

If you have an interest in community change, you find that this degree prepares you to be an informed health activist,= organizer, planner and well-rounded member of the local, regional and national community.

Key program areas of emphasis:

• advocacy for diverse individuals, families and communities
• providing health education, health promotion and care coordination
• providing understanding of environmental concerns and their impact on health
• understanding components of a healthy, sustainable community

This degree program has the same prerequisites as the nursing major; therefore, you may transition seamlessly to this program and obtain a bachelor's degree in a health-related field.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Collaborate across professional health care disciplines and with volunteers, organizations, community members and partners to promote healthy communities.
- Apply research findings to professional health care disciplines, organizations, community members and partners to promote healthy communities.
- Utilize leadership skills to build partnerships with culturally and ethnically diverse communities.

Global opportunities

Global experience: Study abroad (https://goglobal.asu.edu/) enables community health students to learn how to address the health needs of diverse populations. By immersing themselves in a culture outside the U.S., students can learn about global health trends and how people in another country have advocated for positive change in the health care systems of their communities.

Career opportunities

Graduates of this program provide health education, health promotion, care coordination, disease management, health care navigation and advocacy services for individuals, families and communities.

Graduates may obtain employment as:

- community health managers
- community health outreach specialists
- health care navigators
- health promotion evaluators
- health services administrators

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Differentiate the Seven Essential Elements of an Effective Compliance Program overseen by the Office of Inspector General (OIG).
- Examine health care and medical credentialling in relation to the scope of practice.
- Justify the ethical and legal reasons health care organizations may need a compliance program.
- Apply individual selected compliance plan elements to develop a corrective action plan to prevent causes of non-conformities.

Global opportunities

Global experience: Students gain valuable experience when studying abroad, experience that enhances their resumes. With more than 300 Global Education programs (https://goglobal.asu.edu/) available to them, students can tailor their experience to their interests and skill sets. Students majoring in health care compliance and regulation can learn about other global health care systems and how they are regulated.

Graduates who possess the heightened cultural competency, leadership and critical-thinking skills they acquired when studying abroad may stand out in a competitive field.

Career opportunities

Graduates may be employed as:

- compliance analysts or specialists
- compliance leads or trainers for health care operations (revenue, clinical care, research, education)
- health care regulatory affairs analysts or specialists
- HIPAA privacy compliance analysts or specialists
- internal auditors, claims auditors or audit response leads
- Medicare and Medicaid compliance analysts or specialists
- special investigation unit analysts or specialists
- patient safety survey specialists
- regulatory compliance specialists

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Health Entrepreneurship and Innovation, BS (NUHCIBS)

College/School: Edson College of Nursing and Health Innovation

Campus: Downtown Phoenix, West Valley, Online

Program description

The Bachelor of Science program in health entrepreneurship and innovation provides a broad background in the= principles of innovation, leadership, complexity science, change theory, collaboration and evidence-based decision-making to ensure that you are prepared to manage implementation of innovation in the health care arena.

Through the use of evidence-based decision-making and leadership skills in interprofessional teams, you learn to tackle= health care challenges using modern technology, public policy and communication. This distinct program situates you= at the intersection of innovation and entrepreneurship, enabling you to develop your own solutions to health= challenges.

Program areas of emphasis:

• develop competence in the design, application and testing of innovative processes and products
• incorporate current trends with interprofessional teams
• lead processes of innovation and transformation

The BS in health entrepreneurship and innovation is an attractive degree completion pathway if you are a transfer student or a student seeking to change their major, as well as incoming first-year students. You should consult with an advisor to review the applicability of completed coursework and to review a degree completion plan.

Integrative Health, BS (NUIHLTBS)

College/School: Edson College of Nursing and Health Innovation

Campus: Downtown Phoenix, West Valley, Online

Program description

Every health journey is unique, and care should be too.

The Bachelor of Science program in integrative health empowers you to think beyond traditional health care and= embrace the full picture of well-being. This forward-thinking degree explores the powerful connection between mind,= body and spirit, preparing you to support patients through a truly holistic lens.

You explore both modern and traditional practices from herbal medicine and acupuncture to physical medicine and= traditional Chinese medicine, learning how to integrate these approaches into personalized, patient-centered care.

Through innovative coursework and interprofessional collaboration, you examine the ethical, legal and cultural= dimensions of integrative health while grounding your learning in evidence-based practice. You emerge ready to make= an impact in the growing field of wellness, shaping a future where health care is as diverse and dynamic as the people= it serves.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics First math varies depending on the track chosen.=
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Aging, MS

Healthcare Innovation, MHI

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-integrative-health/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUIHLTBS~null&college=CNU) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop treatment plans considering the foundations of integrative health and its relationship to traditional healthcare.
- Apply integrative health philosophies, evidence-based modalities, and whole-person approaches to support improved health outcomes in diverse populations.

- Evaluate research findings for their effectiveness, safety, and feasibility of health practices within traditional and emerging healthcare.

Global opportunities

Global experience: Through study abroad (https://goglobal.asu.edu/), students majoring in integrative health are able to expand their knowledge of different therapies used in a variety of cultures and observe standards of practice around the globe.

With more than 300 programs available, students can tailor their experience to their interests and skill sets. The valuable cultural competency, leadership and critical-thinking skills they acquire from study abroad opportunities will enhance their resumes and be applicable to any career choice.

Career opportunities

This degree program prepares students for graduate study in the areas of osteopathic medicine, chiropractic care, naturopathic medicine, physician assistant training, physical therapy and more.

Graduates may be self-employed or employed in hospitals, clinics, doctor offices, companies and holistic centers. Graduates may go on to pursue positions such as:

- chiropractic doctor
- health coach
- health educator
- health program manager
- health services administrator
- naturopathic doctor
- osteopathic doctor
- physician assistant
- wellness consultant
- wellness director

Nursing, BSN (NUNURDBSN)

College/School: Edson College of Nursing and Health Innovation

Campus: Downtown Phoenix, Polytechnic, West Valley, ASU Sync, ASU at The Gila Valley, Online

The accelerated BSN/MS option is currently only available to ASU Online students.

Program description

Achieving a Bachelor of Science in Nursing is possible through various distinctive pathways.

Prelicensure Clinical Nursing Programs
ASU offers programs if you wish to become a registered nurse (or RN) by completing a BSN. Programs are full-time and= include didactic lecture courses, experiential learning, and clinical experiences. You must complete prerequisite= courses and apply for advancement to the program. Upon graduation, you will be eligible to sit for the National Council= Licensure Examination.

You advance in one of two ways: direct admission or competitive advancement. Direct admission is offered if you are

an incoming first-year student from a high school that meets specific admission criteria. If you are admitted directly, you must meet continuing eligibility criteria while attending ASU to advance into a nursing program. In other cases, --- including if you are a first-year student who does not meet direct admission criteria, you are a direct admission student who does not meet continuing eligibility criteria, you are a transfer student, you are a second degree student, or you are an ASU student who is changing majors --- you may apply for advancement as a competitive applicant for any remaining spaces.

Program options:

• Traditional BSN: a four-semester program with three starts per year: fall, spring, and summer (cohorts vary by campus). Depending on the cohort, the program may be completed in a 16-month year-round or 24-month academic year schedule.
• Accelerated BSN: a three-semester year-round program (12-month) with two starts per year: fall and spring (cohorts vary by campus). Priority is given to if you are a student with an earned bachelor's degree seeking an additional degree.
• Learn Where You Live (https://nursingandhealth.asu.edu/programs/learn-where-you-live/students): an accelerated 12-month option if you're looking for a more accessible and affordable prelicensure nursing program in Arizona. This program includes a blend of live sessions via ASU Sync*, in-person clinical and lab experiences, and self-directed studying.

RN to BSN and Concurrent Enrollment Programs
ASU offers online options to complete a BSN if you are a nursing transfer student. There are five starts per year: two in fall, two in spring and one in summer. Transfer pathway agreements are in place with community college nursing programs, providing additional benefits to you. These programs are not available if you reside in Tennessee or Washington.

• RN to BSN: available if you have an associate degree in nursing and a current RN license in good standing with a state board of nursing. Courses are offered online in 7.5-week sessions and can be completed in as little as 14 months.
• Concurrent Enrollment Program: available if you're admitted to or enrolled in a regionally accredited associate degree nursing program. If you are a qualified student, you can enroll in ASU courses and earn your BSN while simultaneously pursuing your associate degree in nursing. ASU courses are delivered online in 15-week sessions.

*If you have F-1 or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

If you seek to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available on the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Nursing, MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The admission standards for majors in the Edson College of Nursing and Health Innovation are higher than minimum university standards. Effective fall 2022, first-year admission requirements are:

• top 10% of high school graduating class, OR
• an overall high school cumulative GPA of 3.80 in ASU competency courses (scale is 4.00 = "A"), OR
• an overall high school cumulative GPA of 3.50 in ASU competency courses AND either a 25 ACT or 1230 SAT combined evidence-based reading and writing plus math score

Priority application date: November 1

First-year applicants should select an additional major when applying for admission.

English language proficiency requirements (https://admission.asu.edu/apply/international/undergrad/english-proficiency) for applicants whose native language is not English: total TOEFL iBT score of 4 with a minimum section score of 3.5 (Reading: 3.5, Writing: 3.5, Listening: 3.5, Speaking: 3.5.), or 76 (taken at a testing center) if taken before January 21, 2026; or a minimum IELTS score of 6.5; or a minimum Duolingo English test score of 100; or a minimum Cambridge English exam score of 176.

First-year admission applications to the Bachelor of Science in Nursing program that are received after the November 1 application priority date are considered on a space-available basis. Students not offered admission directly to the nursing program are placed in the BS program in community health (https://degrees.apps.asu.edu/bachelors/major/ASU00/NUCHLTBS/community-health).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Current ASU students interested in changing to this program need to apply for the upper-division clinical nursing program through an advancement application process. Space is limited, and selection is based upon GPA and the score earned on the TEAS. Students should speak with an advisor in the Edson College of Nursing and Health Innovation for more information on how to change a major to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-nursing-rn-bsn/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NUNURDBSN~null&college=CNU) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Implement safety and quality principles to minimize risk and enhance patient outcomes through system effectiveness and individual accountability.
- Deliver collaborative population health interventions aimed at prevention, health promotion, and disease management to promote equitable population health outcomes.
- Evaluate evidence-based nursing knowledge to enhance nursing care delivery, improve health, and transform health care.

Global opportunities

Global experience: Through study abroad, students majoring in nursing are able to expand their knowledge of how nursing is practiced across the globe.

With more than 300 programs available (https://goglobal.asu.edu/), students can tailor their experience to their interests and skill sets. The heightened cultural competency, leadership and critical-thinking skills they achieve enhance their resumes and are applicable in any career choice.

Career opportunities

The Edson College of Nursing and Health Innovation prepares graduates for excellence upon entering the workplace. Graduates deliver nursing care to individuals, families and communities. Completion of this degree program also prepares individuals for entrance into graduate study in nursing at the master's or doctoral degree levels, which is essential for teaching, administration, clinical specialization and research.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Public Service and Community Solutions, Watts College of

Applied Science (Emergency Management), BAS (PPEMGBAS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

The Bachelor of Applied Science program with a concentration in emergency management is a flexible, 60 credit hour degree program.

If you have completed an Associate of Applied Science from a regionally accredited institution, the curriculum is designed specifically for you.

The required capstone class provides you with experience through coordinated internships.

This program is not available if you are a first-year student.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Second language requirement: No
STEM-OPT extension eligible: Yes
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
Students applying to this program must have completed an AAS degree from a regionally accredited institution. This program is not available to first-year students.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have completed an AAS from a regionally accredited institution to change to this major. Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPEMGBAS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Conduct analysis applying foundational principles of emergency policy and management in the context of complex systems.
- Demonstrate understanding of the complex organizational and governance structures operating in emergency management and homeland security.
- Synthesize their understanding of risk, organizations, and governance to create basic mitigation strategies to manage disruption.

Global opportunities

Global experience: Understanding how different regions around the world react to disasters can lead to insight on how= to bring solutions to students' own communities. When studying abroad (https://goglobal.asu.edu/), students can make= meaningful connections through exchange of ideas and perspectives. Study abroad programs that focus on issues like= counterterrorism, resource management and urban infrastructure can help students develop a more informed and= well-rounded view of emergency management.

Career opportunities

The degree in emergency management opens the door to a challenging career as a professional emergency manager.= The advancement of technology has created the potential for more devastating disasters than ever before. As a result,= there is an increasing demand for emergency managers who have a solid foundation in scientific and technical= disciplines as well as management skills.

Community Advocacy and Social Policy, BA (PPCASPBA)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix, West Valley, Online

Program description

In the Bachelor of Arts program in community advocacy and social policy, you focus on advocacy strategies through an in-depth exploration, analysis and comparison of social service systems and policies from an empowerment perspective.

The program emphasizes examining the needs of historically underserved individuals, families and communities. Policy analysis and social change are critical themes in developing an advocacy knowledge base, as are the equally important themes of prevention and social well-being. You complete courses in two core areas: diversity and oppressed populations, and social issues and interventions.

While the BA program in community advocacy and social policy is fully accredited regionally under the Higher Learning Commission, it isn't accredited through the Council of Social Work Education because it doesn't lead to a Bachelor of Social Work degree. If you're ultimately interested in pursuing a master's degree in social work, you can build a strong foundation within this program.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change majors to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-community-advocacy-and-social-policy/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPCASPBA~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply professional theories to working with diverse, oppressed and marginalized populations in both micro and macro practice.
- Apply social justice techniques to advance human rights, and social and economic justice.
- Identify and apply advocacy concepts and methods that support and advance social, economic and environmental justice.

Global opportunities

Global experience: Global Education programs (https://goglobal.asu.edu/) give students the chance to witness how policy, advocacy and social service systems function internationally, providing an opportunity for them to develop a valuable skill set that can give them an advantage in their career, as well as personal enrichment. Enhancing global awareness, communication competency and leadership skills through study abroad can better prepare a student for a career in social services.

Whether in a foreign country, in the U.S. or online, participation in one of the more than 300 Global Education programs encourages students to build communication skills that span intercultural boundaries, challenges them to adapt and persevere, exposes them to differences across the world that they can't experience from textbooks, and increases their ability to work with diverse groups of people.

Career opportunities

Graduates are prepared for employment in the social services arena, such as performing basic case management tasks, staffing hotlines and warmlines, making referrals to needed services, recruiting volunteers, and developing and providing training.

In addition, advocate positions are part of many organizations and areas, such as hospitals and the behavioral health system.

This degree program also prepares students to pursue graduate education.

Community Sports Management, BS (PPCSMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Students interested in this program should apply directly to the BS in Parks, Recreation and Sport Management.

Program description

The Bachelor of Science program in community sports management focuses on preparing you to manage sport programs and activities for children, youth, adults and seniors in nonprofit, municipal and for-profit organizations.

The program emphasizes the many roles sports play in the community, including as a way to improve the overall quality of life, youth development, sport tourism and community development. Both program delivery and managerial functions are targeted. Specific areas of opportunity include work with youth sports, adaptive sports, sports tourism, sport events and adult recreational sports.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Sports can bring communities together, at home and abroad, despite language and cultural differences. Studying abroad (https://goglobal.asu.edu/) gives students an opportunity to immerse themselves in a different culture and see firsthand the role of sport at the community level while building skills to help them in their future careers. Students who study abroad can achieve heightened cultural competency and leadership and critical thinking skills.

Career opportunities

Numerous career opportunities exist within community sports. Sport programs for youth and adults are offered by city parks and recreation departments, nonprofit organizations such as the Boys and Girls Club or the YMCA, and local nonprofit and for-profit sport clubs. In addition, many communities have sport tourism organizations and sport programs offered through adaptive or therapeutic sports programs such as Special Olympics, Wounded Warriors Project and Ability 360.

Possible positions for graduates of this major include sport supervisors, programmers and managers in local park and recreation departments and nonprofit organizations, as well as community relations and programming positions with professional and local sport organizations.

Criminology and Criminal Justice, BS (PPCRIMJBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix, West Valley, Online

Program description

The Bachelor of Science program in criminology and criminal justice teaches you how to understand the causes of crime, the role of criminal justice agencies in the control of crime, and the consequences of crime. This program also provides a solid foundation if you are interested in pursuing a prelaw track.

You learn sociological, psychological, biological and economic explanations for individual crime as well as differences in crime across neighborhoods, states, countries and over time. You also learn about the history, legal issues and current practices of crime control via police agencies, the court system, prisons, probation and parole.

These topics are delivered by top-ranking research faculty who offer you hands-on research opportunities and by experienced criminal justice professionals with intimate knowledge of the daily realities of crime and those who engage in crime. You are encouraged to take advantage of internship opportunities in more than 200 agencies, study abroad programs and flexible course scheduling offered in-person, online and across multiple campuses.

Second language requirement: No

Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Emergency Management and Homeland Security (Emergency Management), MA

Public Policy (Science and Technology Policy), MPP

Public Policy, MPP

Public Administration (Urban Management), MPA

Public Policy (Environmental Policy), MPP

Forensic Psychology, MS

Public Administration (Nonprofit Administration), MPA

Public Administration, MPA

Emergency Management and Homeland Security (Homeland Security), MA

Public Policy (Policy Informatics), MPP

Emergency Management and Homeland Security (Biosecurity and Threat Management), MA

Emergency Management and Homeland Security (Community Resilience), MA

Program Evaluation and Data Analytics, MS

Crime Analysis, MS

Criminology and Criminal Justice, MS

Public Administration (Public Finance), MPA

Public Administration (Emergency Management), MPA

Criminal Justice, MA

Emergency Management and Homeland Security, MA

Emergency Management and Homeland Security (Cybersecurity Policy and Management), MA
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Transfer admission requirements: The MyPath2ASU pathway allows Arizona transfer students to complete a prescribed sequence of courses that meet the requirements for the community college's AA degree along with the lower-division requirements for the ASU major.

Students completing their ASU BA degree at Yuma: Once the MyPath2ASU pathway requirements are complete, students complete the remaining requirements for the ASU bachelor's degree at the community college.

Students should visit Admission Services (https://admission.asu.edu/apply/transfer) for more information about ASU degrees offered at local community colleges.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-criminology-and-criminal-justice/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPCRIMJBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze theories of crime and how the criminal justice system responds to crime.
- Examine fundamental methodological and statistical techniques used in criminology and criminal justice research.
- Leverage an understanding of the systemic inequalities of crime for working in 21st century agencies and organizations related to criminal justice.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to them, criminology and criminal justice students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

The Watts College of Public Service and Community Solutions recommends these programs (https://goglobal.asu.edu/students/major/criminology-criminal-justice) for students majoring in criminology and criminal justice.

Career opportunities

Graduates of the criminology and criminal justice program find a strong job market in the public and private sectors. Employment opportunities exist in:

- corrections

- courts
- federal agencies
- homeland security
- law enforcement
- legal offices
- parole offices
- private security
- probation offices
- victim advocate agencies

In addition, graduates are able to work in combating bank fraud and domestic terrorism. They also may pursue advanced degrees in law, criminology and criminal justice, and other social science disciplines.

Criminology and Criminal Justice (Community Safety, Law and Social Change), BS (PPCRJCSLBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix, West Valley, Online

Program description

The community safety, law and social change concentration in the Bachelor of Science program in criminology and criminal justice helps you explore innovative and equitable approaches to public safety, legal reform and community well-being. This program emphasizes strategies for reducing harm and victimization that extend beyond traditional criminal justice responses.

You learn about emerging approaches to safety --- including crisis response teams, transformative justice practices, and community-led initiatives. You also examine the social impacts of law and policy, as well as efforts to build trust, accountability and resources within communities. Through the curriculum, you gain a deeper understanding of how safety can be achieved through prevention, collaboration and structural change.

Courses are taught by nationally recognized faculty with expertise in community justice, legal advocacy and social change, and by professionals engaged in shaping real-world alternatives to the current system. You're encouraged to participate in internships, applied research and community engagement opportunities that provide hands-on experience in building safer, more just communities.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

Criminology and Criminal Justice (Policing), BS (PPCRJPOLBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix, West Valley, Online

Program description

The concentration in policing in the Bachelor of Science program in criminology and criminal justice provides students= with knowledge on policing strategies, police management, police accountability, crime analysis and procedural= criminal law. This program also provides a solid foundation for those interested in pursuing a prelaw track.

Students who complete the concentration have a better understanding of how police organizations operate and are= led; effective strategies for reducing crime, building trust and increasing accountability; improving police-citizen= community relations (especially in communities of color); how the Constitution protects the rights of individuals in= interactions with law enforcement; and techniques for analysis and mapping of crime and other police data.

After finishing the concentration in policing, students are better prepared for future employment in law enforcement= and to contribute to the future of policing in the United States.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Draw connections between disparate risks and vulnerabilities within complex systems.
- Classify emergency management and homeland security organizations.
- Improve extant policies, programs, and governance systems to mitigate risk and manage disruption.

Global opportunities

Global experience: Understanding how different governments around the world manage disasters can provide insight= for bringing solutions to students' own communities. Global Education programs (https://goglobal.asu.edu/) can help= students gain practical knowledge and experience in how governments function at varying levels in a community.= Students increase their knowledge and experiential base through study abroad programs to bring about positive= change in their own communities. The heightened cultural competency and the leadership and critical thinking skills= students acquire through study abroad programs also enhance their resumes.

Career opportunities

Graduates possess the knowledge and skills required for entry- and midlevel supervisory and managerial positions in= the public sector at the local, state and federal levels, as well as other opportunities in the commercial and nonprofit= sectors. Graduates have a significant advantage in the coming hiring boom within the field in response to the upcoming= wave of retirees in the public sector and increasing demand for public services, especially at the federal level.

For those who already possess relevant knowledge and experience, the program provides complementary knowledge= valuable for promotion in the field.

Graduates also may choose to further their education in graduate programs in emergency management, public policy,= law or public administration.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Incorporate multiple perspectives when proposing creative solutions to complex NLM issues.
- Demonstrate proficiency in written communications with diverse audiences (e.g. clients, interdisciplinary team members, donors, community members).
- Integrate knowledge from diverse disciplines to develop comprehensive strategies that address the complex challenges faced by nonprofit organizations.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) can provide students with hands-on experience in nonprofit leadership through a global lens. Students gain skills to be used in their future careers through internships in nonprofits around the world. Students have the opportunity to intern abroad during summer break or during a semester while taking courses in locations such as South America and Asia.

Career opportunities

Graduates are prepared for leadership and management roles across the growing nonprofit sector, which employs millions of professionals in organizations of all sizes and missions. They work in community-based nonprofits, foundations and national organizations that address issues in health, education, human services, the arts and the environment.

Prominent employers include the American Red Cross, America's Second Harvest, the Humane Society of the United States, March of Dimes, National Urban League and United Way, as well as youth-serving organizations such as Big Brothers Big Sisters, Boys and Girls Clubs, Girl Scouts of the USA, and YMCA of the USA.

Typical positions include:

- field executive
- fund development director
- program director
- program officer for a grantmaking organization
- volunteer program manager

Nonprofit Leadership and Management (American Indian Studies), BS (PPNLMAIBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

The Bachelor of Science program in nonprofit leadership and management with a concentration in American Indian studies prepares you to be a leader who understands and respects Native and Indigenous perspectives and aims to strengthen and advance nonprofit organizations that serve tribal communities. You explore the structure and purpose of nonprofits that operate on or in partnership with tribal lands, including those organized by tribal governments.

Coursework integrates classroom learning with applied field experiences and an internship that builds professional skills and community connections. You develop skills in leadership, program management and resource development while you learn to address the distinct opportunities and challenges of nonprofit work within Indigenous contexts.

You may also pursue the Certified Nonprofit Professional credential through the Nonprofit Leadership Alliance (https://nla1.org/cnp-professionals (https://nla1.org/cnp-professionals)), enhancing your preparation for leadership across the social sector. This degree is accredited by the Nonprofit Academic Centers Council (https://www.nonprofit-academic-centers-council.org (https://www.nonprofit-academic-centers-council.org)).

Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Community Resources and Development, MS

Public Administration, MPA

Nonprofit Leadership and Management, MNLM

Community Resources and Development (Nonprofits and NGOs), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 (scale is 4.00 = "A") is required to change majors to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPNLMAIBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Incorporate multiple perspectives when proposing creative solutions to complex NLM issues.
- Demonstrate proficiency in written communications with diverse audiences (e.g. clients, interdisciplinary team members, donors, community members).
- Integrate knowledge from diverse disciplines to develop comprehensive strategies that address the complex challenges faced by nonprofit organizations.

Global opportunities

Global experience: Studying abroad (https://goglobal.asu.edu/) can provide students with hands-on experience in nonprofit leadership with a global perspective. Through internships with nonprofits, students build skills they can apply in their future careers. Students have the opportunity to intern over the summer or during a semester while taking courses in locations such as South America and Asia, gaining a global perspective on issues that Indigenous communities face around the world.

Career opportunities

Graduates are prepared for careers in nonprofit organizations and tribal programs that serve American Indian communities. Career pathways include fundraising, community development, volunteer coordination, youth programming and social services.

Many major nonprofit organizations in Arizona and across the U.S. partner with tribal nations to deliver services, creating opportunities for graduates to support initiatives that promote health, education, cultural preservation and community empowerment.

Parks, Recreation and Sport Management, BS (PPPRMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

In the Bachelor of Science program in parks, recreation and sport management, you prepare to lead and manage programs that enhance quality of life and strengthen communities. You gain a broad understanding of the field through coursework and applied experiences that integrate natural, social and management sciences.

Coursework includes wilderness and environmental communication, policy, assessment, and recreation planning and programming. The program also features an internship that enables you to apply your learning in professional settings within the parks, recreation and sport industries.

This degree is accredited by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions. https://accreditationcouncil.org (https://accreditationcouncil.org/)

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Community Resources and Development, MS

Public Administration, MPA

Community Resources and Development (Nonprofits and NGOs), MS

Community Resources and Development (Parks and Recreation Management), MS

Community Resources and Development (Sustainable Communities), MS

Community Resources and Development (Tourism), MS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 (scale is 4.00 = "A") is required to change majors to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPPRMBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Incorporate multiple perspectives when proposing solutions to complex PRSM issues.
- Integrate knowledge from diverse disciplines to develop comprehensive strategies that address the complex challenges faced by park, recreation and sport organizations.
- Demonstrate proficiency in written communications with diverse audiences (e.g., clients, interdisciplinary team members, families, community members).

Global opportunities

Global experience: Study abroad programs that include travel to some of the world's most renowned and pristine parks, wildlife reserves and other recreational facilities, as well as to forests, reefs and deserts, provide students with invaluable professional development and insight that they can use in their future career.

With more than 300 programs available, study abroad (https://goglobal.asu.edu/) enables students to tailor their experience to their interests and skill sets.

Career opportunities

Graduates are prepared for professional roles in which they design, develop and manage recreation services that meet the needs of diverse communities. They are employed in public, private and nonprofit organizations in Arizona, nationally and abroad, in settings such as:

- armed forces recreation
- city park and recreation departments
- county and state park agencies
- federal natural resource agencies
- hospitals and care facilities
- nonprofit recreation programs

- private and commercial recreation facilities
- special event management
- sport venues and theme parks
- youth agencies

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-public-service-and-public-policy/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=PPPAFBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students in the public service and public policy program work to create policies that advance the public interest. When studying abroad (https://goglobal.asu.edu/), students gain a better understanding of how government functions at various levels around the world and an understanding of which public policies are beneficial to society and which policies need to be improved upon. Students increase their knowledge and experiential base through study abroad programs to bring about positive change in their own communities.

Career opportunities

Graduates possess the knowledge and skills to transform government and policy in positions at all levels in city, county, state and federal agencies --- entry, midlevel supervisory and managerial. They are prepared for work in nonprofit organizations and in the private sector at the interface of public affairs and private enterprise. For those who already have work experience, the degree provides further opportunity for promotion.

The public service sector offers sustainable, exciting and fulfilling career options. Graduates are empowered to use knowledge of the public sector as a catalyst to change the world. By understanding the challenges facing government and being well-versed in the development of multiple useful and realistic solutions, graduates contribute to the development of local, national and global communities.

Public Service and Public Policy (American Indian Studies), BS (PPPAFAISBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Interested students should apply to the Public Service and Public Policy BS program.

Program description

The American Indian studies concentration within the Bachelor of Science program in public service and public policy provides you with specialized knowledge about the policy implications of American Indian-related decisions and actions. This concentration focuses on the latest policy implications and research impacting Indigenous communities in the United States.

The BS program in public service and public policy offers you comprehensive coverage of topics in public policy, public leadership and management. Applications and examples encompass a wide variety of policy topics and management approaches.

In this program, you examine the public sector and addresse the challenges facing the public in a practical way. The program is distinct because it enables you to study public service, policy and administration with a focus on professional preparation for a career. The major is also well-suited to you if you are interested in pursuing further education in law, public administration, public policy and other graduate pursuits focused on public affairs and the common good.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPPAFAISBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students can apply a global lens to their studies by learning how American Indians view the world and by learning about current issues and tribal governance of Indigenous peoples around the world.

Participation in study abroad programs increases students' ability to work with diverse groups of people. Whether in a foreign country, in the U.S. or online, any of the more than 300 available Global Education programs (https://goglobal.asu.edu/) provide an opportunity for students to develop a valuable skill set that can give them an advantage in their career and personal enrichment. Students are encouraged to build communication skills that span intercultural boundaries, are challenged to adapt and persevere, and are exposed to differences they can't always read about in textbooks.

Career opportunities

Graduates of this program have gained the knowledge and skills required for entry- and midlevel supervisory and managerial positions in the public sector, such as city, county, state and federal agencies, though they would function successfully in many other types of organizations as well. Graduates are prepared for work in nonprofit organizations and in the private sector at the interface of public affairs and private enterprise. For those who already have work experience, the degree provides further opportunity for promotion.

Global opportunities

Global experience: Students seeking in-depth knowledge of the public sector related to agencies that conduct business in various capacities can benefit from studying abroad (https://goglobal.asu.edu/). Many programs focus on topics such as urban sustainability, challenges to a country's economy and governmental issues so students can see the concepts they have learned through a distinct cultural lens.

Career opportunities

This BS program in public service and public policy is preparation for entry- and midlevel supervisory and managerial positions in city, county, state and federal agencies. Graduates are prepared for work in nonprofit organizations and in the private sector at the interface of public affairs and private enterprise. They have the skills to be entrepreneurs in any sector, with career opportunities as diverse as small towns and Fortune 500 companies. For those who already have work experience, the degree provides further opportunity for promotion.

This business concentration prepares those with an interest in policy to focus on business issues and their policy implications.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-science-public-service-and-public-policy-emergency/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPPAFEHBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Understanding how different governments around the world manage disasters can provide insight for bringing solutions to students' own communities. Study abroad programs (https://goglobal.asu.edu/) can help students gain practical knowledge and experience in how governments function at varying levels in a community. The heightened cultural competency and the leadership and critical thinking skills students acquire through study abroad programs also enhance their resumes.

Career opportunities

Graduates possess the knowledge and skills required for entry- and midlevel supervisory and managerial positions in the public sector, such as city, county, state and federal agencies, though they would successfully function in many other types of organizations as well. For those who already have work experience, the degree provides further opportunity for promotion. In addition, the program prepares students for future graduate study in law, public policy and public administration.

The number of people retiring paired with the increasing demand for public services has resulted in an increase in job opportunities for graduates in the public sector. The federal government is the nation's largest employer with nearly two million people employed across the country, and nearly 85% of those jobs exist outside the Washington, D.C., area. The federal government is anticipated to hire tens of thousands of new employees for mission-critical positions in the next few years. Those with preparation in academic areas related to public service have an advantage in that market.

Public Service and Public Policy (Health Policy), BS (PPPAFHPBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

The School of Public Affairs offers a concentration in health policy as part of the Bachelor of Science program in public service and public policy. This program allows you to build a course of study that focuses on the health care industry. This sector continues to be a major part of the U.S. and world economy. The concentration in health policy provides you with an opportunity to focus on health-related issues and their policy implications. The courses in the concentration are offered by the College of Health Solutions and the School of Human Evolution and Social Change.

The BS program in public service and public policy includes comprehensive coverage of topics in public policy, public leadership and management. Applications and examples encompass a wide variety of policy topics and management approaches.

This program examines the public sector and addresses the challenges facing the public in a practical way. It's distinct because it enables you to study public service, policy and administration with a focus on professional preparation for a career.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Policy (Science and Technology Policy), MPP

Public Policy, MPP

Public Administration (Urban Management), MPA

Public Policy (Environmental Policy), MPP

Public Administration (Nonprofit Administration), MPA

Public Administration, MPA

Public Policy (Policy Informatics), MPP

Program Evaluation and Data Analytics, MS

Global Management, MGM

Public Administration (Public Finance), MPA

Public Administration (Emergency Management), MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPPAFHPBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students seeking in-depth knowledge of policy and the public sector related to the health care industry in various capacities can benefit from studying abroad (https://goglobal.asu.edu/). Programs are available that focus on topics such as public or global health, allowing students to see concepts they have learned through a distinct cultural lens and build skills in preparation for a future-focused career.

Career opportunities

The degree is primarily focused on providing its graduates with the knowledge and skills required for entry- and midlevel supervisory and managerial positions in the public sector, such as city, county, state and federal agencies, though they would function successfully in many other types of organizations as well. Graduates are prepared for work in nonprofit organizations and in the private sector at the interface of public affairs and private enterprise.

The program also readies graduates to pursue graduate education in law, public administration, public policy and other areas focused on public affairs and the common good.

For those who already have work experience, the degree provides further opportunity for promotion.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPPAFLPBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Students seeking in-depth knowledge of the public sector related to legal systems in various capacities can benefit from study abroad programs (https://goglobal.asu.edu/). When studying abroad, students gain a better understanding of how governments function and intertwine with the law around the world, and they view the policy implications of different approaches to law worldwide.

Career opportunities

The program is primarily designed for individuals who work in the public sector or are interested in doing so. The skills and knowledge students acquire allow them to successfully function in many other types of organizations; however the primary focus is on public organizations.

This program prepares students for entry- and midlevel supervisory and managerial positions in city, county, state and federal agencies; for work in nonprofit organizations; and for work in the private sector at the interface of public affairs and private enterprise. For those who already have work experience, the degree provides further opportunity for promotion. In addition, the program prepares students for future graduate study in law, public policy and public administration, and for pursuits focused on public affairs and the common good.

Public Service and Public Policy (Nonprofit Leadership and Management), BS (PPPANLMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Interested students should apply to the Public Service and Public Policy, BS program.

Program description

The School of Public Affairs offers a Bachelor of Science in public service and public policy with a concentration in nonprofit leadership and management.

The program includes comprehensive coverage of topics in public policy, public leadership and management. Applications and examples encompass a wide variety of policy topics and management approaches.

As the role of the nonprofit organization continues to grow, it presents broad policy implications for you as a future public sector professional. This concentration program empowers you to understand the social, political, economic and philanthropic factors related to the nonprofit sector.

In the program, you examine the public sector and addresses the challenges facing the public in a practical way. It particularly enables you to study public service, policy and administration with a focus on professional preparation for a career. The major is also well suited to you if you are interested in pursuing graduate education in law, public administration, public policy, and other areas focused on public affairs and the common good.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Public Service and Public Policy (Social Services Delivery), BS (PPPAFSSBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Interested students should apply to the Public Service and Public Policy, BS program.

Program description

Social services delivery is a fundamental building block of government affairs. Through this concentration, you explore the foundation and practices of social services, along with how social services can be designed, delivered and evaluated at local, state and federal levels.

The core Bachelor of Science program in public service and public policy includes comprehensive coverage of topics in public policy, public leadership and management. Applications and examples encompass a wide variety of policy topics and management approaches.

This program examines the public sector and addresses, in a practical way, the challenges facing the public. It enables you to study public service, policy and administration with a focus on professional preparation for a career. The major is also well suited to you if you're interested in pursuing graduate education in law, public administration, public policy and other areas focused on public affairs and the common good.

All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=PPPAFSSBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available, public service and public policy students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S., or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

The degree in public service and public policy is focused primarily on providing graduates with the knowledge and skills required for entry- and midlevel supervisory and managerial positions in the public sector, such as city, county, state and federal agencies, though they would successfully function in many other types of organizations as well. Graduates are prepared for work in nonprofit organizations and in the private sector at the interface of public affairs and private enterprise.

For those who already have work experience, the degree provides further opportunity for promotion. In addition, this program acts as preparation for future graduate study in law, public policy and public administration.

The number of people retiring paired with the increasing demand for public services has resulted in an increase in job opportunities for graduates in the public sector. The federal government is the nation's largest employer, with nearly two million people employed across the country, and nearly 85% of those jobs exist outside the Washington, D.C., area. The federal government is anticipated to hire tens of thousands of new employees for mission-critical positions in the next few years. Students with preparation in academic areas related to public service and social services delivery will have an advantage in that market.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Distinguish how elements of a qualified provider of recreational therapy services are formed and applied in practice.
- Illustrate solutions to complex community health issues (e.g., access to healthcare and recreation, health disparity, mental health, obesity, physical activity, substance abuse), using the APIE process (assess, plan, implement, evaluate).
- Employ effective communication skills including adapting use of messaging when communicating with diverse audiences

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu/) available to= them, recreational therapy students are able to tailor their experience to their individual interests and skill sets.= Whether in a foreign country, in the U.S. or online, students build communication skills, learn to adapt and persevere,= and are exposed to research and internships around the world, increasing their professional network.

Career opportunities

Graduates are prepared for rewarding careers helping people live fuller, healthier lives. They may work in hospitals,= rehabilitation centers, schools, veteran services, behavioral and mental health programs, senior centers or community= and adaptive sports organizations.

Graduates apply their skills to promote inclusion, support rehabilitation and enhance quality of life for individuals and= communities through recreation.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure= (https://admission.asu.edu/academics/licensure) webpage.

Social Work, BSW (PPSWUSWU)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix, West Valley, ASU Sync, ASU at Tucson, Online

Program description

In the Bachelor of Social Work program, you focus on social policy and services, human behavior in the social= environment and social work practice, and you receive research and practicum instruction in community agencies. In= addition, you take elective courses in related areas.

If you are interested in completing the BSW program in Tucson, you are encouraged to use MyPath2ASU® (https://admission.asu.edu/apply/transfer/MyPath2ASU). The Tucson option is only available if you are a transfer= student.

Format options

This program is also offered via ASU Sync if you have transfer credit or already hold an associate degree. As a ASU Sync student, you attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers.

The program features ASU Sync courses at the upper-division level --- courses numbered from 300 to 499 that are designed primarily for juniors and seniors. It is ideal if you are a transfer student who wishes to complete your BSW with live interactions without coming to campus. Prerequisites and other restrictions should be noted before class registration.

If you have F-1 or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

If you seek to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available on the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Public Administration, MPA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The ASU Sync option is available only to transfer students or those with an associate degree. Students on F-1 or J-1 immigration status visas are not allowed to complete courses via Sync.

Transfer admission requirements: The MyPath2ASU pathway allows Arizona transfer students to complete a prescribed sequence of courses that meet the requirements for the community college's AA degree along with the lower-division requirements for the ASU major.

Students should visit Admission Services (https://admission.asu.edu/apply/transfer) for more information about ASU degrees offered at local community colleges.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A minimum cumulative GPA of 2.00 is required to change majors to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-social-work-bsw/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPSWUSWU~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Plan, implement and evaluate evidence-based interventions.
- Apply professional case management intervention skills when working with individuals, families, groups and communities.
- Advocate for advanced human rights, and social and economic justice.

Global opportunities

Global experience: When participating in a study abroad program (https://goglobal.asu.edu/), students examine social work through an international lens as it relates to community-building, service organizations, support for disenfranchised people and human rights advocacy.

Cross-cultural understanding is one of the main learning outcomes of study abroad programs and is also one of the most important skills for those moving into social work careers. Students are able to use the knowledge and skills learned in the program and the distinct intercultural focus gained from study abroad to enhance their career.

Career opportunities

Graduates are prepared to be generalist social work practitioners who focus on advocacy, referrals, case management and problem-solving functions with individuals, groups, families, organizations and the community.

Employment in social work is expected to increase commensurately with the needs of a growing and diverse population. Social workers are employed in public and private agencies and deal with a wide variety of social issues, including:

adoption and teen pregnancy
aging
child abuse and foster care
corrections and delinquency
disability
discrimination
domestic violence and family dysfunction
health and mental health
homelessness and poverty
substance abuse

Social work skills such as problem-solving, resource use, counseling, group work and community organization are also useful for employee relations and mediation positions in industry.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Sport and Recreation Management, BS (PPTRMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Online

This program's name has changed effective Fall 2026. The previous name was Tourism and Recreation Management.

Program description

In the Bachelor of Science program in sport and recreation management, you prepare to lead and manage across the sport and recreation industries. You explore how sport and recreation enhance individual well-being, community development and economic growth.

You gain a broad understanding of these interconnected sectors while developing planning, marketing, financial and leadership skills. Coursework combines classroom learning with applied experiences in program design, facility management and operations.

Through internships and community-based projects, you are able to apply your learning in professional settings and develop the practical skills needed to succeed in the sport and recreation fields.

Second language requirement: No
STEM-OPT extension eligible: No

First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Interdisciplinary Education on Community Health and Wellbeing, MA

Sustainable Tourism, MST

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A student must have a minimum cumulative GPA of 2.00 to change their major to this program.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/online-sport-recreation-management-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPTRMBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate sport and recreation programs.
Design a sport or recreation program or event incorporating principles of program and event planning.
Communicate effectively and professionally with diverse stakeholders in sport and recreation contexts using written, oral, and digital formats.

Global opportunities

Global experience: Future sport and recreation professionals need to develop an understanding of international athletic systems and recreational frameworks around the world. Students gain valuable experience in a global context through study abroad (https://goglobal.asu.edu/), exploring international sport management policies and community recreation models in locations such as London..

Career opportunities

Industries in the sport and recreation sectors offer a wide variety of career options. Graduates are equipped to plan, design, develop and manage services to address the needs of a particular clientele. Graduates can seek work in the public, nonprofit or private sectors based on their interests. Employment opportunities are available in diverse organizations, including municipal recreation departments and community athletics. Other career paths include youth-based recreation, sports-oriented nonprofits, and sports and recreation program planning and management. Additionally, graduates are prepared for leadership roles in athletic facility management, community wellness coordination, and specialized recreation services.

Tourism Development and Management, BS (PPTDMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

In the Bachelor of Science program in tourism development and management, you develop the planning, management and leadership skills needed to guide the sustainable growth of tourism worldwide. The curriculum connects classroom learning with applied experiences through internships, community partnerships and opportunities for global engagement.

You explore a variety of professional areas, including heritage and sustainable tourism, resort management, and meeting and convention planning. The program maintains close ties with the tourism industry in Phoenix, offering you a direct connection to one of the nation's leading travel and hospitality markets.

You may also pursue a certificate in convention sales and meeting planning or participate in a study abroad program that broadens your global perspective and professional network.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Able to incorporate multiple perspectives when proposing creative solutions to complex tourism issues.
Integrate knowledge from diverse disciplines to develop comprehensive strategies that address the complex challenges faced by tourism organizations.
Able to demonstrate proficiency in written communications with diverse audiences (e.g., clients, interdisciplinary team members, community members).

Global opportunities

Global experience: Future tourism professionals need to know how and why people travel to destinations around the world, and how to effectively share the local environment with visitors. Through study abroad programs (https://goglobal.asu.edu/), students gain valuable experience in the various subsets of tourism development and management around the world, including in Europe, Latin America, Oceania, Asia and Africa.

Career opportunities

Graduates are prepared for careers across the expanding travel and tourism industry, a major driver of economic activity worldwide and a leading sector in Arizona. They can pursue roles in public, nonprofit and private organizations, including resorts, convention and visitor bureaus, tour operations, meeting and event planning, and commercial recreation enterprises. In these settings, graduates design, develop and manage services that meet the needs of diverse clients and communities.

The metropolitan Phoenix area serves as a key tourism hub in the Southwestern United States, offering opportunities in:

air transportation
business and corporate travel
gaming and casinos
meetings and conventions
resorts and hotels
sports tourism
state and national parks

Tourism Development and Management (Meetings and Events), BS (PPTDMMEBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

You prepare for leadership and management roles across the event industry in the Bachelor of Science program in tourism development and management with a concentration in meetings and events. You complete focused coursework in event planning, design and operations, drawing from both the special events and meeting management programs to build a strong professional foundation.

The program maintains close connections with the tourism and hospitality community in Phoenix, offering you opportunities for hands-on experience through applied projects and internships. Coursework explores heritage and sustainable tourism, resort management, and meeting and convention planning, helping you understand how events drive tourism development and community engagement.

You may also pursue a certificate in convention sales and meeting planning or participate in additional experiential learning opportunities that enhance your professional growth.

Tourism Development and Management (Sustainable Tourism), BS (PPTDMSBS)

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

Program description

You are prepared to lead in one of the world's largest and fastest-evolving industries in the Bachelor of Science program in tourism development and management with a concentration in sustainable tourism. You explore resilience and sustainability concepts and learn how to apply them to tourism destinations around the globe.

Coursework provides you with a foundation in sustainability science, including the theories and practices that support responsible tourism development. You gain skills to measure, design and implement sustainability policies throughout all stages of tourism planning and management.

The program integrates courses from the School of Sustainability and the School of Community Resources and Development, combining environmental insight with professional application. Career exposure, study abroad opportunities and a culminating internship further prepare you for leadership in sustainable tourism.

Tourism, Hospitality and Event Management, BS (PPTHEMBS)

College/School: Watts College of Public Service & Community Solut

Campus: Online

Program description

The Bachelor of Science program in tourism, hospitality and event management prepares you to become a leader in the global experience economy. You learn the knowledge and skills to manage traditional hospitality sectors such as hotels, resorts, food and beverage, events and attractions, while also exploring tourism's broader influence across private and public sectors.

The program emphasizes holistic, innovative and collaborative approaches to understanding and managing tourism's economic, social, political and environmental impacts.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. You can find more information about education benefits offered by VA at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: This program provides opportunities for hospitality and tourism-specific study abroad experiences (https://goglobal.asu.edu/), networking and service learning through student-led organizations, community partnerships and recruitment efforts. The program requires students to earn career field exploration hours to

determine where they best fit into a vast industry of possibilities. Service learning opportunities and internships are available both domestically and internationally.

Career opportunities

Graduates are prepared for careers in:

destination management and marketing
economic development planning
entrepreneurship
event management
food and beverage management
governmental or nonprofit tourism
hospitality sales and marketing
hotel and resort management
human resources and recruiting
visitor and guest experience management

College/School: Watts College of Public Service & Community Solut

Campus: Downtown Phoenix

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

Located in the heart of downtown Phoenix, the Bachelor of Science program in urban and metropolitan studies equips you to understand urban theory in order to effectively address the challenges of rapid growth along with other contemporary urban issues.

In this program, you discover what makes the city tick --- and the city is your classroom. You examine challenges and solutions by researching history, society, culture, economy and politics in order to understand urban theory, and you use that knowledge to get involved in your community. This gives you an outlet through which you can experience practical ways of solving complex problems faced by metropolitan regions. When you invested in your neighborhood, you learn how to improve urban health and well-being, often training yourself to be a future leader of urban environments. Or you can focus on making a wide variety of other contributions to society, studying the role of arts and culture, business and property development, and revitalization and community-building in the life of the region.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=PPURBBS~null&college=CPP) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze the basic factors affecting the development of urban policies.
- Use management principles to work effectively in complex urban organizations.
- Apply research and analytic tools to urban public problems.

Global opportunities

Global experience: As populations grow and lead to urban sprawl, countries around the world grapple with how to best serve society. Global Education programs (https://goglobal.asu.edu/) expose students to challenges large urban and metropolitan cities face in Europe, South America, Africa and Asia. Students experience cultural immersion and can research ways to improve and solve complex issues faced by urban and metropolitan cities.

Career opportunities

The transdisciplinary approach of the urban and metropolitan studies program ensures its graduates are prepared for work in a wide range of fields. Graduates successfully enter fields as diverse as urban management, revitalization, community development, urban sustainability and urban planning.

Some careers require additional graduate-level studies and professional experience. Students in the program are advised to explore their options with academic and career advisors to prepare an appropriate program of study and a plan to participate in an internship that complements their long-term professional goals.

Teaching and Learning Innovation, Mary Lou Fulton College for

Applied Science (Early Childhood Studies), BAS (TEAPSECBAS)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Online

Program description

The Bachelor of Applied Science with a concentration in early childhood studies is a two-year program for you, if you already have an Associate of Applied Science degree in early childhood education or a similar field.

You gain skills in communication, critical thinking and leadership so you can positively affect lifelong learning for children from birth to age 5 (not yet in kindergarten). Through online coursework, you deepen your understanding of the social, emotional, cognitive and physical development of young children. You learn to set developmentally appropriate learning goals, create and support effective instructional strategies, and develop highly individualized instruction for young learners.

This program integrates experiential learning opportunities into the curriculum, enabling you to put coursework into practice. You must be able to work or volunteer with learners in an early childhood setting (birth to age 5, not yet in kindergarten) for at least 15 hours per month throughout your junior and senior year.

If you don't have an AAS degree, you may consider the Bachelor of Arts in Education program in educational studies with a concentration in early childhood studies (https://degrees.apps.asu.edu/bachelors/major/ASU00/TEESECEBAE/educational-studies-early-childhood-studies), which has a parallel curriculum.

This program doesn't lead to teacher certification. If you're seeking teacher certification, you should enroll in one of the Mary Lou Fulton College for Teaching and Learning Innovation undergraduate programs that lead to institutional recommendation for teacher certification.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Elementary Education, MEd

Elementary Education (Teacher Certification), MEd

Early Childhood Special Education (Teacher Certification), MEd

Early Childhood Special Education, MEd

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
This program is not available to first-year students.

Transfer admission requirements: Students applying to this program must have completed an Associate of Applied Science degree from a regionally accredited institution and be employed or volunteer in an early childhood setting (e.g., Head Start, child development center, early care and education center, private or public preschools, home-based child care) to successfully participate and complete coursework.

Students who have earned an AAS degree from a regionally accredited Arizona community college may be eligible to transfer up to 75 credits towards the BAS degree.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student must have completed an AAS degree program in early childhood education or a closely related field from a regionally accredited institution to change to this major.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/early-childhood-applied-science/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEAPSECBAS~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply theories of child development, culture, and context to make evidence-based decisions that support children's learning and well-being.
- Collaborate with families and community organizations to support the learning and well-being of young children.
- Use observation, documentation, and assessment tools to inform planning and support individualized instruction in early learning environments.
- Implement developmentally, culturally, and linguistically responsive teaching strategies that promote each child's learning, development, and sense of belonging.
- Plan curriculum using early learning standards and child-centered approaches.
- Create advocacy strategies to address an early childhood policy issue.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that, for the foreseeable future, migration will increase globally. Learners will migrate to new communities, and in response, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments.

Education students can prepare for this reality by participating in Global Education programs (https://goglobal.asu.edu/), in which they can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

This program is a great option for those who are already working in the field of early childhood education.

Graduates may become early childhood educators in various settings, such as Head Start programs, early care and education centers, private preschools, nonprofit centers and home-based service providers. Other career opportunities include center-based administrators or directors; topic specialists who provide resources, training and technical assistance to early childhood educators and programs; program managers; family support specialists and consultants.

Behavior Analysis, BS (TEBEHANBS)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Online

Program description

The Bachelor of Science program in behavior analysis equips you with the knowledge and applied skills to understand and influence behavior in ways that improve individual and community outcomes. Rooted in the scientific principles of learning, this fully online program emphasizes assessment, data-based decision-making, and ethical practice across diverse applied settings. You learn to measure behavior, design and implement research-based interventions, and analyze treatment effectiveness in schools, clinics and various community organizations focusing on learning, behavior and human performance.

The program is designed to meet coursework requirements if you're seeking the Board Certified Assistant Behavior Analyst® credential. With its emphasis on accessibility and real-world applications, the program expands inclusive

access to high-quality education and contributes to the social, cultural and economic health of local communities.

GI Bill® benefits

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/behavior-analysis-online-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEBEHANBS~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: With more than 300 Global Education program opportunities (https://goglobal.asu.edu) available to them, behavior analysis students are able to tailor their experience to their specific interests and skill sets. Whether in a foreign country, in the U.S., or online, students build communication skills, learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates are prepared for a variety of entry-level and mid-level positions in behavioral health, education and human services. Career opportunities include:

- behavior technician or senior therapist
- behavioral health specialist
- Board Certified Assistant Behavior Analyst® or Board Certified Behavior Analyst®
- early intervention specialist
- operations manager in human service agencies
- program supervisor
- special education support professional

This program also serves as a strong foundation for graduate study in applied behavior analysis, psychology or special education.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.The program is designed to meet the academic coursework requirements for the Board Certified Assistant Behavior Analyst® credential, administered by the Behavior Analyst Certification Board. Additional supervised fieldwork is required for eligibility, completed outside of the degree program. The BCaBA® credential is a national certification; however, state licensure laws vary. Students are encouraged to consult specific state regulations regarding the practice of applied behavior analysis and related services.

Early Childhood Education, BAE (TEECDEDBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe, ASU Sync

Program description

You are prepared to meet the educational, behavioral and social-emotional needs of children, ages birth to age 8 or= grade 3, in the Bachelor of Arts in Education program in early childhood education. This program focuses on child= development and best practices in early childhood education, including the skills to create inclusive learning= environments; conduct instructional design, planning and facilitation; and assess, monitor and report the progress of= young children.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher= preparation, enabling you to participate in professional experiences (internships and student teaching) with a team of= peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-based professional experiences prepare you to work with mutually supportive colleagues to address the academic and= social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with= multiple opportunities to apply knowledge learned in coursework to practice in the classroom.

You complete a series of internships before a semester-long full-time student teaching experience, with the support of= a certified mentor teacher and ASU faculty.

Upon graduation, you will be eligible to earn an institutional recommendation from ASU for Arizona teacher= certification in Early Childhood Education, Birth-Age 8/Grade 3, as well as a Structured English Immersion, PreK-12,= endorsement from the Arizona Department of Education. To teach in an Arizona public school, you must pass the= appropriate Arizona educator exams: National Evaluation Series or Arizona Educator Proficiency Assessments.

Format option
This program is also offered via ASU Sync (https://provost.asu.edu/sync/students). ASU Sync enables you to attend live= classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty= and peers. As an ASU Sync student, you must reside in Arizona throughout the duration of the program. If you have F-1= or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students= with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

The ASU Sync option is only available to transfer students residing in Arizona because of state regulations and student= teaching placement requirements. You should have completed an associate degree by the time you enroll at ASU.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center= regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education= benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The ASU Sync option is available only to transfer students residing in Arizona because of state regulations and student teaching placement requirements. Students should have completed an associate degree by the time they are enrolled at ASU. Students on F-1 or J-1 immigration status are not allowed to complete courses via Sync.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEECDEDBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students participating in study abroad programs can prepare for this reality by engaging in Global Education programs (https://goglobal.asu.edu/), where they can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

There is a strong demand for early childhood educators in Arizona and nationwide. Many graduates with a degree in early childhood education hold leadership positions in Head Start, private nonprofit and private for-profit center-based programs, and public school early childhood environments.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Educational Studies, BAE (EDSLSTBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe, West Valley, Online

Program description

Learning happens everywhere and at all ages. The Bachelor of Arts in Education program in educational studies= provides a flexible pathway to a bachelor's degree if you want to work with children, youth and adults within nonprofit= settings, community-based organizations, civic organizations and businesses. You develop practical skills aligned with= workforce demands, including facilitating learning experiences with, and for, diverse people in different contexts. You= also develop skills for effective communication, collaboration, critical thinking, leadership, advocacy and innovation --- all of which are essential to educators working across professional contexts.

The educational studies curriculum prepares you to serve in a variety of roles in a variety of educational settings.= Additional benefits include:

• Applied learning experiences, including a two-semester internship, provide opportunities for developing creative problem-solving, effective communication, collaboration and leadership skills that you can leverage to secure employment after graduation.
• You develop relationships with prospective employers during the program through embedded learning experiences and partnerships.
• You have access to flexible learning options that accommodate diverse schedules and preferences, supported by engaged faculty and knowledgeable advisors.
• The program can be a pathway to one of three accelerated bachelor's to master's degree programs, which provide you with the opportunity to secure a master's degree in a single year. Two of the programs lead to teacher certification.

While a shared set of learning objectives unites educational studies students, you also have the ability to curate a customized educational experience tailored to your professional interests and the opportunity to explore new areas of

interest.

This program doesn't lead to teacher certification. However, if you're enrolled in the BAE in educational studies you can secure certification by pursuing one of the accelerated master's programs (https://acceleratedmasters.asu.edu/how-apply) that lead to certification.

Second language requirement: No
STEM-OPT extension eligible: No

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Design sustainable educational innovations to address a social concern within an educational system.
- Integrate professional ethics, personal values, and personal beliefs in their educational practice as demonstrated in reflections during class.
- Apply professional communication strategies, technology tools and skills to engage in educational partnerships.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students who participate in study abroad programs can prepare for this reality by engaging in Global Education programs (https://goglobal.asu.edu/), where they can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

Graduates hold a versatile degree that qualifies them for a variety of career paths in education, including roles at nonprofit organizations, community institutions, youth serving organizations, civic organizations and businesses.

Nearly 90% of alumni report being employed three months after graduation in various roles across multiple sectors, including:

- education sector
- health care sector
- nonprofit sector
- private sector
- social services sector

Educational Studies (Early Childhood Studies), BAE (TEESECEBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Online

Program description

The Bachelor of Arts in Education program in educational studies with a concentration in early childhood studies prepares you for careers working with and advocating for children from birth to age 5 (not yet in kindergarten).

You gain skills in communication, critical thinking and leadership, enabling you to instill a lifelong love of learning in young children. Through online coursework, you deepen your understanding of the social, emotional, cognitive and physical development of young children. You learn to set developmentally appropriate learning goals for this age group, create and support effective instructional strategies, and develop highly individualized instruction.

This program integrates experiential learning opportunities into the curriculum, enabling you to put coursework into practice. You must be able to work or volunteer with learners in an early childhood setting (birth to age 5, not yet in kindergarten) for at least 15 hours per month throughout your junior and senior years.

Transfer students who already have an Associate of Applied Science in early childhood education or a closely related field should consider the Bachelor of Applied Science in applied science (early childhood studies) program, which has a parallel curriculum.

This program doesn't lead to teacher certification. If you are seeking teacher certification, you should enroll in one of the other Mary Lou Fulton College for Teaching and Learning Innovation undergraduate programs or one of the accelerated program options.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Elementary Education, MEd

Elementary Education (Teacher Certification), MEd

Early Childhood Special Education (Teacher Certification), MEd

Early Childhood Special Education, MEd
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/early-childhood-education/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEESECEBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply theories of child development, culture, and context to make evidence-based decisions that support children’s learning and well-being.
- Collaborate with families and community organizations to support the learning and well-being of young children.

- Use observation, documentation, and assessment tools to inform planning and support individualized instruction in early learning environments.
- Implement developmentally, culturally, and linguistically responsive teaching strategies that promote each child's learning, development, and sense of belonging.
- Plan curriculum using early learning standards and child-centered approaches.
- Create advocacy strategies to address an early childhood policy issue.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and bring a variety of cultures into classrooms and learning environments. Education students can prepare for this reality by participating in Global Education programs (https://goglobal.asu.edu/), where they can expand their notion of "normal" schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

This program is a great option for those who are already working in the field of early childhood education.

Career opportunities for graduates include positions as early childhood educators in various settings, such as Head Start programs, early care and education centers, private preschools, nonprofit centers and home-based service providers. Other career opportunities include positions as center-based administrators or directors; topic specialists who provide resources, training and technical assistance to early childhood professionals and programs; program managers; family support specialists; and consultants.

Educational Studies (Instructional Design), BAE (TEEDUSTBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Online

Program description

In the Bachelor of Arts in Education program in educational studies with a concentration in instructional design, you build critical competencies related to designing effective online learning to meet the needs of learners.

The curriculum is grounded in modern learning theory and design. Coursework addresses a variety of components within the field of education, including foundations of instructional design, theory and design of digital learning, and digital learning evaluation. All courses are taught online and combine a variety of resources and technologies to facilitate direct interactions between you, other students and program faculty.

This program culminates with an internship in which you create and present a project that is applied in a professional context, demonstrating your knowledge of instructional design. You work with an organization to identify an instructional need, problem or performance gap, and then you develop and deploy a solution to be delivered in an online or blended format.

An instructional design minor is also available.

This program doesn't lead to teacher certification. If you are seeking teacher certification, you should enroll in one of the other Mary Lou Fulton College for Teaching and Learning Innovation undergraduate programs.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Learning Design and Technologies, MEd

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Conduct needs analyses to formulate evidence-based recommendations that inform instructional design decisions.
- Design inclusive, learner-centered instruction using appropriate learning theories and instructional design principles.
- Develop a fully functional prototype of a basic declarative or procedural instructional solution.
- Design a comprehensive plan for evaluating the effectiveness of an instructional solution.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students who participate in study abroad programs can prepare for this reality by engaging in Global Education programs (https://goglobal.asu.edu/), where they can expand their notion of "normal" schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

There is growing demand for online educators, including in companies that develop materials for online students and any organization focused on digital learning. Graduates are prepared for instructional design roles in K-12 and higher education, nonprofits and corporate settings.

Career examples include:

- curriculum coordinator
- curriculum designer or developer
- distance learning manager
- instructional designer
- media center specialists
- technology coordinator
- training specialist, coordinator or manager

Elementary Education, BAE (TEEEDBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe, West Valley, ASU Sync, Online

The online option is not available to students who reside outside the U.S.

Program description

The Bachelor of Arts in Education program in elementary education prepares you to work with children in grades K-8 classrooms. This program leads to a K-8 elementary education credential in the state of Arizona.

You receive a firm grounding in academic content with current research and best practices from nationally recognized faculty in their fields of expertise, accompanied by professional experiences. You also gain experience in integrating technology into teaching practices.

The teacher certification program is clinically embedded during sophomore, junior and senior years. The school has developed a team-based approach to teacher preparation, allowing you to participate in professional experiences (internships and student teaching) with a team of peers while receiving guidance and support from faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply knowledge learned in coursework to practice in the classroom.

You complete a series of internships before a semester-long full-time teaching experience. With the support of a certified mentor teacher and ASU faculty, you apply what you learn in coursework in a learning environment.

Upon graduation, you are recommended for grades K-8 elementary teacher certification. If you wish to teach in a public school, you must pass the appropriate Arizona educator exams (National Evaluation Series or Arizona Educator Proficiency Assessments) to be credentialed to teach in Arizona.

Format options

ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. You may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/bachelor-arts-education-educational-studies/) for program descriptions and to request more information.

You must reside in the United States throughout the duration of the program.

ASU Sync
This program is also offered via ASU Sync. (https://provost.asu.edu/sync/students) ASU Sync enables you to attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. As an ASU Sync student, you must reside in Arizona throughout the duration of the program. If you are on F-1 or J-1 immigration status, you should should speak with an advisor about other options to complete this program. Students on F-1 or J-1 immigration status are not permitted to complete courses via Sync.

If you are seeking to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs.

More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The ASU Sync option is available only to transfer students residing in Arizona because of state regulations and student teaching placement requirements. Students should have completed an associate degree by the time they are enrolled at ASU. Students on F-1 or J-1 immigration status are not allowed to complete courses via Sync.

Transfer admission requirements: The MyPath2ASU® pathway allows Arizona transfer students to complete a prescribed sequence of courses that meet the requirements for the community college's AA degree, along with the lower-division requirements for the ASU major.

Students should visit Admission Services (https://admission.asu.edu/apply/transfer) for more information about ASU degrees offered at local community colleges.

Tuition information

Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students can prepare for this reality by participating in Global Education programs (https://goglobal.asu.edu/), expanding their notion of normal schooling and deepening their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

There is a demand for highly qualified elementary teachers in Arizona. A high percentage of students from this program receive job offers during their residencies. Many graduates with a degree in elementary education work in:

- charter schools
- nontraditional settings
- private school settings
- public elementary schools

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Elementary Multilingual Education, BAE (TEEMLEBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe

Program description

The Bachelor of Arts in Education program in elementary multilingual education prepares you to become an educator for linguistically and culturally diverse learners in grades K-8. You can specialize in several areas, including transborder and cultural studies, Indigenous education and Spanish.

Course topics include language diversity, dialectal variation, funds of knowledge (i.e., collections of knowledge-based cultural practices), and practices that value cultural and community engagement. You learn processes for identifying English language learners as well as how to develop and support the needs of students with individual language learning plans. You also receive preparation in teaching elementary content areas, including math, language arts, social

studies and science, with a specific focus on meeting the academic and linguistic needs of English language learners.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher preparation, allowing you to participate in professional experiences (internships and student teaching) with a team of peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with mutually supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply to practice in the classroom the knowledge gained in coursework.

You complete a series of internships before a semester-long, full-time student teaching experience with the support of a certified mentor teacher and ASU faculty.

Upon graduation, you are eligible to earn an institutional recommendation from ASU for Arizona teacher certification in Elementary Education, K-8, as well as an endorsement in either bilingual education or English as a second language from the Arizona Department of Education. To teach in an Arizona public school, you must pass the appropriate Arizona educator exams: National Evaluation Series or Arizona Educator Proficiency Assessments. In addition, you must complete six credit hours of a foreign language or equivalent and pass an appropriate language proficiency test outlined by the Arizona Department of Education to be eligible for the bilingual education or English as a second language endorsement.

Format option
Upper-division courses in this program are also offered via ASU Sync (https://provost.asu.edu/sync/students). ASU Sync enables you to attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty and peers. As a ASU Sync student, you must reside in Arizona throughout the duration of the program. If you have F-1 or J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with F-1 or J-1 immigration status are not permitted to complete courses via Sync.

If you are seeking to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations.

Middle Grades Education, BAE (TEMGEBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe

Program description

Through the Bachelor of Arts in Education program in middle grades education, you prepare to become certified to teach grades 5-9 in the state of Arizona. You learn the essential knowledge and skills you need to become a highly impactful middle-grades teacher, and you learn to plan and implement evidence-based practices that support the specific needs of adolescents. In addition to general education and foundational courses, you select one content area of focus: middle grades English language arts, middle grades general science, middle grades mathematics or middle grades social studies.

The middle grades education coursework emphasizes developmentally responsive curriculum, instruction and assessment practices that are grounded in research, empower teachers and students, and prioritize equity. Extensive professional experiences are built into the program to prepare you to enter the teaching profession after graduation.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher preparation, enabling you to participate in professional experiences --- internships and student teaching --- with a team of peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with mutually supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply the knowledge gained in coursework to practice in the classroom.

You complete a series of internships before a semester-long, full-time student teaching experience with the support of a certified mentor teacher and ASU faculty.

You earn an institutional recommendation from ASU for Arizona teacher certification in Middle Grades Education, and an endorsement in Structured English Immersion, PreK-12, from the Arizona Department of Education. To teach in an Arizona public school, you must pass the appropriate Arizona educator exams: National Evaluation Series or Arizona Educator Proficiency Assessments.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Physical Education, BAE (TEPPEBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe

Program description

In the Bachelor of Arts in Education program in physical education, you prepare to teach quality physical education programs to learners in preschool through grade 12.

The curriculum directly aligns with national beginning teacher standards of SHAPE America --- Society of Health and Physical Educators. You take foundational coursework in the areas of growth and motor development, movement activities and lifelong physical fitness. The coursework covers elementary, secondary and adaptive physical education methods, including topics such as instructional design, lesson planning and modifications, and accommodations for P-12 learners. You develop skills in creating positive and productive learning environments, assessing and monitoring student progress, reporting outcomes, and conducting yourself as a responsible and ethical professional.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher preparation, enabling you to participate in professional experiences --- internships and student teaching --- with a team of peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-based professional experiences are designed to prepare you to work with mutually supportive colleagues to address the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences provide you with multiple opportunities to apply to practice in the classroom the knowledge gained in coursework.

You complete a series of internships before a semester-long, full-time teaching experience with the support of a certified mentor teacher and ASU faculty.

Upon graduation, you earn an institutional recommendation for teacher certification in Physical Education, P-12, as well as a Structured English Immersion, P-12, endorsement through the Arizona Department of Education. To teach in a public school, you must pass the appropriate Arizona educator exams (National Evaluation Series or Arizona Educator Proficiency Assessments) to be certified to teach in the state of Arizona.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Education, MA

Global Education, MEd

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEPPEBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students can prepare for this reality by engaging in Global Education programs (https://goglobal.asu.edu/). They expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

Graduates are highly sought-after teachers in public, charter and private education institutions. Many graduates with degrees in physical education pursue careers in coaching, fitness instruction, or other roles focused on health and wellness.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for

licensure or certification in another state. For more information, students should visit the ASU professional licensure=
(https://admission.asu.edu/academics/licensure) webpage.

Secondary Education, BAE (TESEDBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe, West Valley, ASU Sync

Program description

The Bachelor of Arts in Education program in secondary education prepares you to educate learners in grades 6-12 in=
the content area of your choice.

You develop strong content knowledge, instructional competency and professional skills needed to lead successful=
classrooms in middle and high schools. You gain extensive experience integrating educational technology, and the=
program has a strong focus on teaching and learning practices that foster equitable access and outcomes for diverse=
secondary populations. You select one content area as your subject emphasis and complete at least 24 credit hours in=
that area. Content areas may vary depending on location and include biology, business, chemistry, earth and space=
sciences, economics, English, general science, geography, health, history, mathematics, physics, physical education,=
political science and American government, and some foreign languages.

Mary Lou Fulton College for Teaching and Learning Innovation has developed a team-based approach to teacher=
preparation, enabling you to participate in professional experiences --- internships and student teaching --- with a team=
of peers while receiving guidance and support from ASU faculty members and highly qualified certified teachers. Team-
based professional experiences are designed to prepare you to work with mutually supportive colleagues to address=
the academic and social-emotional needs of learners. Clinically embedded courses and professional experiences=
provide you with multiple opportunities to apply knowledge learned in coursework to practice in the classroom.

You complete a series of internships before a semester-long, full-time student teaching experience with the support of=
a certified mentor teacher and ASU faculty.

You earn a bachelor's degree in secondary education and receive an institutional recommendation for teacher=
certification in Secondary Education, 6-12, as well as a structured English Immersion, P-12, endorsement through the=
Arizona Department of Education. To be eligible for secondary certification in Arizona, you must also earn a passing=
score on the professional knowledge exam offered through the National Evaluation Series or Arizona Educator=
Proficiency Assessments.

Format option
This program is also offered via ASU Sync (https://provost.asu.edu/sync/students). As a ASU Sync student, you attend=
live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with=
faculty and peers. ASU Sync students must reside in Arizona throughout the duration of the program. If you have F-1 or=
J-1 immigration status, you should speak with an advisor about other options to complete this program. Students with=
F-1 or J-1 immigration status are not permitted to complete courses via Sync.

The BAE program in secondary education via ASU Sync is available for transfer students who reside in Arizona.

You have the opportunity to speak to an advisor about the content areas and modalities offered at ASU campuses in=
and outside Maricopa County.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center regarding certain limitations. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill).

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Education, MA

Global Education, MEd

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Additional requirements:
The ASU Sync option is available only to transfer students residing in Arizona because of state regulations and student teaching placement requirements. Students should have completed an associate degree by the time they are enrolled at ASU. Students on F-1 or J-1 immigration status are not allowed to complete courses via Sync.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?

major=TESEDBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students can prepare for this reality. By engaging in Global Education programs (https://goglobal.asu.edu), they can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

Graduates are recommended for certification in an approved area for grades 6-12. The demand for well-prepared secondary teachers is strong, particularly in math and science. Job opportunities in a fast-growing state such as Arizona are numerous. Graduates with a degree in secondary education work in:

- charter schools
- online schools
- private school settings
- public schools

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure= (https://admission.asu.edu/academics/licensure) webpage.To be eligible for a secondary education credential in= Arizona, students must meet all requirements specified by the Arizona Department of Education, including passing the= appropriate Arizona educator subject knowledge exam, as well as the professional knowledge exam offered through= the National Evaluation Series or Arizona Educator Proficiency Assessments. Individuals who have previously earned a= bachelor's or master's degree in the content area may be eligible to waive the subject knowledge exam and should= contact mlfccertification@asu.edu (mailto:mlfccertification@asu.edu) to learn more.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TEMATBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. As learners migrate to new communities, educators will increasingly be asked to meet the needs of students who speak languages other than English and who bring diverse cultures into classrooms and learning environments. Education students participating in study abroad programs can prepare for this reality. By engaging in Global Education programs (https://goglobal.asu.edu/), students can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

Graduates are highly sought-after teachers in public, charter and private education institutions. The demand for well-prepared secondary teachers is especially strong in the areas of mathematics and science. Job opportunities in a fast-growing state such as Arizona are numerous.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Special Education, BAE (TESPCEDBAE)

College/School: Mary Lou Fulton College for Teaching & Learning In

Campus: Tempe, ASU Sync, Online

The online option is not available to students who reside outside the U.S.

Program description

Special educator are curious about how people learn and develop throughout their lifespan. As a special educator, you= can make a difference in the lives of children and families. A special education degree with mild/moderate teacher= certification prepares you to understand human diversity, communicate effectively and develop problem-solving skills= that support your success and that of others.

The Bachelor of Arts in Education program in special education prepares you to work with students with disabilities in= inclusive settings. You learn to use evidence-based practices that promote students' success with general education= content, including high-leverage practices in literacy and math. You develop adaptive techniques for students with= disabilities and learn to use instructional and assistive technologies to facilitate success.

You participate in professional experiences designed to expose you to numerous ways of teaching and learning.= Internships and student teaching are embedded during sophomore, junior and senior years to provide you with= multiple opportunities to work directly with children and youth.

Upon graduation, you will be eligible for the Standard Professional Mild/Moderate Disabilities Special Education= Certificate - Grades K-12. If you want to teach in a public school in Arizona, you must pass the appropriate Arizona= educator exams: National Evaluation Series or Arizona Educator Proficiency Assessments.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two= diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some= combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered= as an accelerated bachelor's plus master's degree with:

Education, MA

Global Education, MEd

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree= program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/special-education-degree/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=TESPCEDBAE~null&college=CTE) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Because of climate change, geopolitical instability or economic factors, the United Nations and other institutions predict that migration will increase globally for the foreseeable future. Learners will migrate to new communities. Increasingly, educators will be asked to meet the needs of students who speak languages other than English and who bring a variety of cultures into classrooms and learning environments. Education students who participate in study abroad programs can prepare for this reality. By engaging in Global Education programs (https://goglobal.asu.edu/), students can expand their notion of normal schooling and deepen their understanding of how to foster inclusive and inspiring learning environments.

Career opportunities

The BAE program in special education leads to teacher certification to support a critical market demand for special education teachers in Arizona and beyond. Graduates are poised to find employment in any career that supports learners with disabilities; common settings include community- and youth-serving organizations, higher education institutions and health-related organizations.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. Technology for Public Health, School of

Public Health, BS (NHPBHBS)

College/School: School of Technology for Public Health

Campus: Downtown Phoenix

Program description

Public health is the practice of preventing disease and promoting good health within groups of people in communities or countries. The Bachelor of Science program in public health prepares you to make an impact in health care on a local and global scale. You engage in coursework related to the five pillars of public health:

• biostatistics: analyzing data to understand health trends and outcomes
• environmental health: how environmental surroundings such as air, water and living conditions affect human health
• epidemiology: how diseases spread, their causes and how to control their growth
• health administration: the delivery of health services
• health education and health promotion: creating and delivering programs to encourage healthier behaviors and lifestyles in order to prevent disease and improve well-being

While in the program, you participate in an internship that gives you practical experience in the public health workforce.

The BS program pairs well with the health education specialist certificate, the health care policy and delivery certificate, and the hospice and palliative care certificate, each offered by the College of Health Solutions.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: MAT 114 - College Mathematics
or MAT 117 College Algebra
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

A current ASU student has no additional requirements for changing majors.

Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=NHPBHBS~null&college=CTPH) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Utilize multilevel communication strategies when developing artifacts tailored for individuals, groups, communities, and the larger population.
- Synthesize large amounts of information on the history and evolution of public health concepts and practices.
- Develop strategic public health programs.
- Analyze the social-ecological factors affecting the health of a community (e.g., equity, income, education, and environment) when applying the five principles for moral common ground (value of life, goodness, justice, honesty, and autonomy) in academic and professional work.

Global opportunities

Global experience: Study abroad is important for future success in the public health field. Exposure to distinct health environments expands students' cultural competencies and worldviews and eliminates bias, and students can enhance their portfolio of experience through hands-on research --- all of which give them an advantage in their field.

With more than 300 options available, Global Education programs (https://goglobal.asu.edu/) enable students to tailor their experience to their specific interests and skill sets. Whether in a foreign country, the U.S. or online, students in public health are able to learn about different health environments and differences in the human condition worldwide. The College of Health Solutions recommends these programs (https://goglobal.asu.edu/students/major/chs) for students majoring in public health.

Career opportunities

Graduates qualify for entry-level positions in public health education, environmental and occupational health, public health administration, health promotion and similar areas.

Employment opportunities are available within national, state and local health departments and in community clinics, community and private advocacy groups, health education programs and nonprofit organizations.

Popular positions include:

- community health worker --- liaising with officials to improve the quality and cultural competence of health care service delivery to the community or to vulnerable groups
- environmental specialist --- investigating environmental health and food risks, advising communities on risk reduction, and implementing public health projects
- epidemiologist --- investigating patterns, causes and the effectiveness of public health interventions, policies and treatments
- occupational health and safety specialist --- inspecting workplaces for adherence to regulations and designing programs for injury and illness prevention
- public health educator --- developing and implementing strategies to improve the health of individuals and communities

Graduates are also prepared to continue their education in graduate programs in public health, population health or community health.

University College

Exploratory Health and Life Sciences, (UCHSCIEXPL)

College/School: University College

Campus: Downtown Phoenix, Polytechnic, Tempe, Online

Program description

The exploratory health and life sciences track enables you to explore majors and career pathways related to= understanding the health and well-being of living organisms.

ASU recognizes that you may be seeking the opportunity to explore possible academic programs when you first enter= the university. By selecting an exploratory program, you can meet general studies requirements that all ASU graduates= must fulfill while simultaneously exploring a variety of academic courses and disciplines that help inform your next= major at the university.

The exploratory health and life sciences program is a student-centered experience that enables you to explore who you= are and what matters to you as you engage in deep self-exploration and design possible pathways for the future.= Guided by design-thinking principles, you explore your interests, values and skills while engaging in experiential= learning opportunities. You immerse yourself in diverse disciplines, which fosters the discovery of majors as well as= career interests and pathways.

The exploratory program offers four tracks: health and life sciences; humanities, fine arts and design (https://degrees.apps.asu.edu/bachelors/major/ASU00/UCHUFAEXPL/exploratory-humanities-fine-arts-and-design);= math, physical sciences, engineering and technology (https://degrees.apps.asu.edu/bachelors/major/ASU00/UCEMTPEXPL/exploratory-math-physical-sciences-engineering-and-technology); and social and behavioral sciences (https://degrees.apps.asu.edu/bachelors/major/ASU00/UCSBSEXPL/exploratory-social-and-behavioral-sciences).

As a student in the exploratory major, you are required to enroll in these major and career exploration courses:

• ASU 230 Life by Design --- This course empowers you to proactively shape your academic and personal journey, assisting you in identifying your interests, strengths and values.
• UNI 250 Designing Your ASU Experience --- This course provides you with comprehensive guidance on academic pathways and potential career opportunities, leading to greater confidence when you select your major.
• UNI 270 Work by Design: Preparing for a Career --- This course equips you with essential skills and strategies to pursue opportunities in your chosen or desired career fields.

Through these courses and the exploratory health and life sciences track, ASU encourages you to explore and develop academic interests and make informed decisions about your educational and career paths.

Second language requirement: No
STEM-OPT extension eligible: No
First required math course: Math courses needed are determined by potential major choice.
Math intensity: General

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
First-year (https://admission.asu.edu/first-year/apply)
Transfer (https://admission.asu.edu/transfer/apply)
International (https://admission.asu.edu/international/undergrad-apply)
Readmission (https://admission.asu.edu/undergrad/readmission)

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Change of Major requirements

Students who have completed fewer than 45 college credit hours may change to exploratory status.
Students should visit the Change of Major form (https://changemajor.apps.asu.edu) for information about how to change a major to this program.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/undergraduate/exploratory-health-life-sciences/) for program descriptions and to request more information.

ASU Local: It is now possible to earn an ASU degree with ASU Local (https://asulocal.asu.edu), an integrated college experience in which students take advantage of in-person success coaching and programming experiences on site while completing one of 130+ undergraduate online degree programs, all of which come with online faculty interaction and tutoring support.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=UCHSCIEXPL~null&college=CUC) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Exploring health and life sciences on a global scale can be beneficial to students as they narrow their focus of study. While taking courses abroad (https://goglobal.asu.edu/), students learn more about themselves and what career path they want to pursue.

Students earn ASU credit for completed courses, while staying on track for graduation. They may apply financial aid and scholarships toward program costs.

Career opportunities

Career opportunities are specific to the ultimate major of choice.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU® (https://webapp4.asu.edu/transfercreditguide/app/transfermap?major=UCSBSEXPL~null&college=CUC) to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships (https://admission.asu.edu/transfer/MyPath2ASU) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience: Exploring social and behavioral sciences on a global scale (https://goglobal.asu.edu/) can be beneficial to students who are narrowing their focus of study. While taking courses abroad, students are able learn more about themselves and what career path they want to pursue.

Students earn ASU credit for completed courses, while gaining a global perspective applicable to many careers. They may apply financial aid and scholarships toward program costs.

Career opportunities

Career opportunities are specific to the ultimate major of choice.

ENG 101 First-Year Composition AND ENG 102 First-Year Composition OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree

requirements in four years.

Students must earn a 2.00 GPA in all courses offered by the W. P. Carey School of Business.

Students must earn a 2.00 GPA in major courses.

Students must complete a minimum of 32 credit hours of W. P. Carey School of Business courses at ASU.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Business and Technology Solutions, BA

Specialization #1

Students choose two specializations. Each specialization must have a minimum of 12 credits (four courses).

Specialization Course	C	3

Communication Specialization (offered at West Valley):

COM 100 Introduction to Human Communication (SOBE)

Requirement	Minimum Grade	Credit Hours
COM 312 Communication, Conflict, and Negotiation (CIVI)		
COM 316 Gender and Communication (HUAD)		
COM 430 Leadership in Group Communication		
ENG 311 Persuasive Writing (CIVI)		
Digital Business Specialization (offered as iCourses):		
CIS 235 Introduction to Information Systems, Analytics and AI in Business		
CIS 300 Web Design and Development		
CIS 311 Business Agile Project Management		
CIS 312 Business Mobile Commerce and Monetization		
Food and Agribusiness Innovation Specialization (offered at Poly):		
AGB 100 Introduction to Agribusiness		
AGB 321 Agribusiness Sales and Marketing		
AGB 333 Agribusiness Finance		
AGB 366 Food System Technology Innovations		
AGB 410 Food Supply Chains		
AGB 414 Food and Agribusiness Policy Issues		
AGB 452 Global Food and Agricultural Trade		

Requirement	Minimum Grade	Credit Hours
Food Industry Management Specialization (offered as iCourses):		
AGB 250 Economics of Resource Allocation: Food and Agriculture		
AGB 370 Food Retailing Strategy Development and Case Competition		
AGB 420 Food Advertising and Promotion		
AGB 425 Food Supply Networks		
AGB 435 Commodity Futures and Options Markets		
AGB 445 Food Retailing		
Global Management Specialization (offered at West Valley):		
Required Course:		
TGM 101 Principles of Global Management (GCSI)		
Choose three courses:		
TGM 312 Big Data in the Global Economy		
TGM 460 Global Risk Assessment and Management		
TGM 468 States and Markets in a Global Economy (GCSI)		

Requirement	Minimum Grade	Credit Hours
TGM 478 Cross-Cultural Communication and Negotiation		
Health Care Innovation Specialization (offered at West Valley and as iCourses):		
HCI 311 Health Innovation: Foundational Concepts		
HCI 421 Health Care Policy: The Innovator's View (CIVI)		
HCI 425 Facilitating Innovation to Achieve Outcomes		
HCI 428 Technology: A Tool to Advance Innovation in Health Care		
Human Resource Management Specialization (offered at Poly):		
Required Course:		
MGT 420 Human Resource Management		
Choose three courses:		
MGT 421 Compensation in Organizations		
MGT 422 Staffing		
MGT 423 Training and Development in Organizations		
MGT 424 Employment Law		
MGT 425 Global Human Resources		

Requirement	Minimum Grade	Credit Hours
Human Systems Engineering Specialization (offered at Poly):		
Required Course:		
HSE 101 Introduction to Human Systems Engineering (SOBE)		
Choose three courses:		
HSE 323 Perceptual Systems (SOBE)		
HSE 324 Applied Cognitive Science (SOBE)		
HSE 325 Human-Computer Interaction		
HSE 422 Human Factors in Sport		
HSE 423 Human Factors in Transportation		
HSE 424 Human Automation Interaction		
HSE 425 Human Factors in Medical Systems		
HSE 426 Training and Expertise		
HSE 427 Designing for Learning		
HSE 428 Judgment and Decision Making		
HSE 429 Product Design and Evaluation		
Inclusive Excellence Specialization (offered at West		

Requirement	Minimum Grade	Credit Hours
Valley):		
DST 101 Introduction to Disability Studies (CIVI)		
DST 494 Topic: Disability and Aesthetics		
ENG 353 African American Literature: Beginnings through the Harlem Renaissance (HUAD)		
ETH 430 Gender on the Borderlands (HUAD)		
SOC 426 Social Inequalities (CIVI)		
Leadership Development Specialization (offered at West Valley):		
COM 225 Public Speaking and Presentations (CIVI) **or** COM 312 Communication, Conflict, and Negotiation (CIVI) **or** COM 319 Persuasion and Social Influence (CIVI) **or** COM 400 Communication in Professions		
MGT 310 Collaborative Team Skills		
MGT 400 Cross-Cultural Management (GCSI)		
MGT 411 Leading Organizations		
Medical Studies Specialization (offered at Poly):		
HCD 303 Global Health Care Systems (GCSI)		
MED 300 Historical and Contemporary Issues in Health		
MED 320 Applied Medical/Health Care Ethics (HUAD)		

Requirement	Minimum Grade	Credit Hours
MED 450 Leadership and Professionalism		
Project Management Specialization (offered as iCourses):		
Required Course:		
PMG 240 Introduction to Project Management		
Choose three courses:		
PMG 321 Project Leadership, Strategy and Scope		
PMG 322 Project Schedule Management		
PMG 324 Resources in Project Management		
PMG 326 Project Procurement Management		
PMG 421 Project Risk Management		
PMG 422 Project Quality Management		
Sales and Marketing Essentials Specialization (offered as iCourses):		
MKT 391 Essentials of Selling		
MKT 392 Essentials of Business Marketing		
MKT 395 Essentials of Advertising and Marketing Communication		

Requirement	Minimum Grade	Credit Hours
MKT 396 Essentials of Services Marketing		
MKT 397 Essentials of Global Marketing		
MKT 398 Essentials of Sports Business		
Supply Chain Management & Sustainability Specialization (offered as iCourses):		
SCM 200 Society, Supply Chains and You (SUST)		
SCM 385 Business and Sustainability I (SUST)		
SCM 463 Global Supply Chain Management (GCSI)		
SCM 485 Business and Sustainability II		
Technical Communication Specialization (offered at Poly):		
TWC 301 Fundamentals of Writing for Digital Media		
TWC 401 Fundamentals of Technical Communication		
TWC 411 Principles of Visual Communication		
TWC 422 Social Media in the Workplace		
TWC 431 Principles of Technical Editing		
TWC 435 Global Issues in Technical Communication (GCSI)		
Technical Entrepreneurship and Management		

Requirement	Minimum Grade	Credit Hours
Specialization (offered at Poly):		
TEM 200 Entrepreneurial Mindset for Technologists		
TEM 301 Applied Social Entrepreneurship II		
TEM 400 Technology Entrepreneurship		
TEM 431 Innovation Management		
TEM 450 Design for the Developing World		
TEM 455 Global Impact Entrepreneurship		
TMC 498 Pro-Seminar		
Tourism Specialization (offered as iCourses):		
Required Course:		
TDM 205 Introduction to Travel and Tourism (GCSI)		
Choose three courses:		
TDM 345 Meeting and Convention Planning		
TDM 350 Tourism, Hospitality, Recreation and Sports Marketing

TGM 468 States and Markets in a Global Economy (GCSI)		
TGM 478 Cross-Cultural Communication and Negotiation		
TMC 498 Pro-Seminar		
TWC 301 Fundamentals of Writing for Digital Media		
TWC 401 Fundamentals of Technical Communication		

Requirement	Minimum Grade	Credit Hours
TWC 411 Principles of Visual Communication		
TWC 422 Social Media in the Workplace		
TWC 431 Principles of Technical Editing		
TWC 435 Global Issues in Technical Communication (GCSI)		

Specialization #2

Students choose two specializations. Each specialization must have a minimum of 12 credits (four courses).

Specialization Course	C	3
Communication Specialization (offered at West Valley):		
COM 100 Introduction to Human Communication (SOBE)		
COM 312 Communication, Conflict, and Negotiation (CIVI)		
COM 316 Gender and Communication (HUAD)		
COM 430 Leadership in Group Communication		
ENG 311 Persuasive Writing (CIVI)		
Digital Business Specialization (offered as iCourses):		

Requirement	Minimum Grade	Credit Hours
CIS 235 Introduction to Information Systems, Analytics and AI in Business		
CIS 300 Web Design and Development		
CIS 311 Business Agile Project Management		
CIS 312 Business Mobile Commerce and Monetization		
Food and Agribusiness Innovation Specialization (offered at Poly):		
AGB 100 Introduction to Agribusiness		
AGB 321 Agribusiness Sales and Marketing		
AGB 333 Agribusiness Finance		
AGB 366 Food System Technology Innovations		
AGB 410 Food Supply Chains		
AGB 414 Food and Agribusiness Policy Issues		
AGB 452 Global Food and Agricultural Trade		
Food Industry Management Specialization (offered as iCourses):		
AGB 250 Economics of Resource Allocation: Food and Agriculture		
AGB 370 Food Retailing Strategy Development and Case Competition		
AGB 420 Food Advertising and Promotion		

Requirement	Minimum Grade	Credit Hours
AGB 425 Food Supply Networks		
AGB 435 Commodity Futures and Options Markets		
AGB 445 Food Retailing		
Global Management Specialization (offered at West Valley):		
Required Course:		
TGM 101 Principles of Global Management (GCSI)		
Choose three courses:		
TGM 312 Big Data in the Global Economy		
TGM 460 Global Risk Assessment and Management		
TGM 468 States and Markets in a Global Economy (GCSI)		
TGM 478 Cross-Cultural Communication and Negotiation		
Health Care Innovation Specialization (offered at West Valley and as iCourses):		
HCI 311 Health Innovation: Foundational Concepts		
HCI 421 Health Care Policy: The Innovator's View (CIVI)		
HCI 425 Facilitating Innovation to Achieve Outcomes		

Requirement	Minimum Grade	Credit Hours
HCI 428 Technology: A Tool to Advance Innovation in Health Care		
Human Resource Management Specialization (offered at Poly):		
Required Course:		
MGT 420 Human Resource Management		
Choose three courses:		
MGT 421 Compensation in Organizations		
MGT 422 Staffing		
MGT 423 Training and Development in Organizations		
MGT 424 Employment Law		
MGT 425 Global Human Resources		
Human Systems Engineering Specialization (offered at Poly):		
Required Course:		
HSE 101 Introduction to Human Systems Engineering (SOBE)		

Requirement	Minimum Grade	Credit Hours

Choose three courses:

HSE 323 Perceptual Systems (SOBE)		
HSE 324 Applied Cognitive Science (SOBE)		
HSE 325 Human-Computer Interaction		
HSE 422 Human Factors in Sport		
HSE 423 Human Factors in Transportation		
HSE 424 Human Automation Interaction		
HSE 425 Human Factors in Medical Systems		
HSE 426 Training and Expertise		
HSE 427 Designing for Learning		
HSE 428 Judgment and Decision Making		
HSE 429 Product Design and Evaluation		

Inclusive Excellence Specialization (offered at West Valley):

DST 101 Introduction to Disability Studies (CIVI)		
DST 494 Topic: Disability and Aesthetics		
ENG 353 African American Literature: Beginnings through the Harlem Renaissance (HUAD)		
ETH 430 Gender on the Borderlands (HUAD)		

Requirement	Minimum Grade	Credit Hours
SOC 426 Social Inequalities (CIVI)		
Leadership Development Specialization (offered at West Valley):		
COM 225 Public Speaking and Presentations (CIVI) **or** COM 312 Communication, Conflict, and Negotiation (CIVI) **or** COM 319 Persuasion and Social Influence (CIVI) **or** COM 400 Communication in Professions		
MGT 310 Collaborative Team Skills		
MGT 400 Cross-Cultural Management (GCSI)		
MGT 411 Leading Organizations		
Medical Studies Specialization (offered at Poly):		
HCD 303 Global Health Care Systems (GCSI)		
MED 300 Historical and Contemporary Issues in Health		
MED 320 Applied Medical/Health Care Ethics (HUAD)		
MED 450 Leadership and Professionalism		
Project Management Specialization (offered as iCourses):		
Required Course:		

Requirement	Minimum Grade	Credit Hours
PMG 240 Introduction to Project Management		
Choose three courses:		
PMG 321 Project Leadership, Strategy and Scope		
PMG 322 Project Schedule Management		
PMG 324 Resources in Project Management		
PMG 326 Project Procurement Management		
PMG 421 Project Risk Management		
PMG 422 Project Quality Management		
Sales and Marketing Essentials Specialization (offered as iCourses):		
MKT 391 Essentials of Selling		
MKT 392 Essentials of Business Marketing		
MKT 395 Essentials of Advertising and Marketing Communication		
MKT 396 Essentials of Services Marketing		
MKT 397 Essentials of Global Marketing		
MKT 398 Essentials of Sports Business		
Supply Chain Management & Sustainability Specialization (offered as iCourses):		

Requirement	Minimum Grade	Credit Hours
SCM 200 Society, Supply Chains and You (SUST)		
SCM 385 Business and Sustainability I (SUST)		
SCM 463 Global Supply Chain Management (GCSI)		
SCM 485 Business and Sustainability II		
Technical Communication Specialization (offered at Poly):		
TWC 301 Fundamentals of Writing for Digital Media		
TWC 401 Fundamentals of Technical Communication		
TWC 411 Principles of Visual Communication		
TWC 422 Social Media in the Workplace		
TWC 431 Principles of Technical Editing		
TWC 435 Global Issues in Technical Communication (GCSI)		
Technical Entrepreneurship and Management Specialization (offered at Poly):		
TEM 200 Entrepreneurial Mindset for Technologists		
TEM 301 Applied Social Entrepreneurship II		
TEM 400 Technology Entrepreneurship		
TEM 431 Innovation Management		
TEM 450 Design for the Developing World		

Requirement	Minimum Grade	Credit Hours
TEM 455 Global Impact Entrepreneurship		
TMC 498 Pro-Seminar		
Tourism Specialization (offered as iCourses):		
Required Course:		
TDM 205 Introduction to Travel and Tourism (GCSI)		
Choose three courses:		
TDM 345 Meeting and Convention Planning		
TDM 350 Tourism, Hospitality, Recreation and Sports Marketing		
TDM 386 Convention Sales and Management		
TDM 448 Heritage and Cultural Tourism		
TDM 458 International Tourism and Hospitality (GCSI)		
TDM 475 Entrepreneurial Recreation and Tourism		
TDM 480 Sustainable Tourism		
TDM 483 Sports Tourism		
Interdisciplinary Business Studies Specialization:		
AGB 100 Introduction to Agribusiness		

Requirement	Minimum Grade	Credit Hours
AGB 250 Economics of Resource Allocation: Food and Agriculture		
AGB 321 Agribusiness Sales and Marketing		
AGB 333 Agribusiness Finance		
AGB 366 Food System Technology Innovations		
AGB 370 Food Retailing Strategy Development and Case Competition		
AGB 410 Food Supply Chains		
AGB 414 Food and Agribusiness Policy Issues		
AGB 420 Food Advertising and Promotion		
AGB 425 Food Supply Networks		
AGB 435 Commodity Futures and Options Markets		
AGB 445 Food Retailing		
AGB 452 Global Food and Agricultural Trade		
CIS 235 Introduction to Information Systems, Analytics and AI in Business		
CIS 300 Web Design and Development		
CIS 311 Business Agile Project Management		
CIS 312 Business Mobile Commerce and Monetization		
COM 100 Introduction to Human Communication (SOBE) or COM 319 Persuasion and Social Influence (CIVI) or COM 400 Communication in Professions		

Requirement	Minimum Grade	Credit Hours
COM 312 Communication, Conflict, and Negotiation (CIVI)		
COM 316 Gender and Communication (HUAD)		
COM 430 Leadership in Group Communication		
DST 101 Introduction to Disability Studies (CIVI)		
DST 494 Topic: Disability and Aesthetics		
ENG 311 Persuasive Writing (CIVI)		
ENG 353 African American Literature: Beginnings through the Harlem Renaissance (HUAD)		
ETH 430 Gender on the Borderlands (HUAD)		
HCD 303 Global Health Care Systems (GCSI)		
HCD 330 Health Care Systems in the U.S. (CIVI)		
HCD 420 Population Health Management		
HCI 311 Health Innovation: Foundational Concepts		
HCI 421 Health Care Policy: The Innovator's View (CIVI)		
HCI 425 Facilitating Innovation to Achieve Outcomes		
HCI 428 Technology: A Tool to Advance Innovation in Health Care		
HSE 101 Introduction to Human Systems Engineering (SOBE)		
HSE 323 Perceptual Systems (SOBE)		
HSE 324 Applied Cognitive Science (SOBE)		

Requirement	Minimum Grade	Credit Hours
HSE 325 Human-Computer Interaction		
HSE 422 Human Factors in Sport		
HSE 423 Human Factors in Transportation		
HSE 424 Human Automation Interaction		
HSE 425 Human Factors in Medical Systems		
HSE 426 Training and Expertise		
HSE 427 Designing for Learning		
HSE 428 Judgment and Decision Making		
HSE 429 Product Design and Evaluation		
MED 300 Historical and Contemporary Issues in Health		
MED 320 Applied Medical/Health Care Ethics (HUAD)		
MED 450 Leadership and Professionalism		
MGT 310 Collaborative Team Skills		
MGT 400 Cross-Cultural Management (GCSI)		
MGT 411 Leading Organizations		
MGT 420 Human Resource Management		
MGT 422 Staffing		
MGT 423 Training and Development in Organizations		
MGT 424 Employment Law		
MGT 425 Global Human Resources		

Requirement	Minimum Grade	Credit Hours
MKT 391 Essentials of Selling		
MKT 392 Essentials of Business Marketing		
MKT 395 Essentials of Advertising and Marketing Communication		
MKT 396 Essentials of Services Marketing		
MKT 397 Essentials of Global Marketing		
MKT 398 Essentials of Sports Business		
PMG 320 Project Approaches		
PMG 321 Project Leadership, Strategy and Scope		
PMG 322 Project Schedule Management		
PMG 323 Project Cost Management		
PMG 324 Resources in Project Management		
PMG 326 Project Procurement Management		
PMG 421 Project Risk Management		
PMG 422 Project Quality Management		
SCM 200 Society, Supply Chains and You (SUST)		
SCM 385 Business and Sustainability I (SUST)		
SCM 463 Global Supply Chain Management (GCSI)		
SCM 485 Business and Sustainability II		
SOC 426 Social Inequalities (CIVI)		

Requirement	Minimum Grade	Credit Hours
TDM 205 Introduction to Travel and Tourism (GCSI)		
TDM 345 Meeting and Convention Planning		
TDM 350 Tourism, Hospitality, Recreation and Sports Marketing		
TDM 386 Convention Sales and Management		
TDM 448 Heritage and Cultural Tourism		
TDM 458 International Tourism and Hospitality (GCSI)		
TDM 483 Sports Tourism		
TEM 200 Entrepreneurial Mindset for Technologists		
TEM 301 Applied Social Entrepreneurship II

ASU 101 or College-Specific First-Year Seminar		
ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.		

WPC 101 Student Success in Business WPC 101 is the W. P. Carey School of Business course that satisfies ASU 101.		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students must earn a 2.00 GPA in all courses offered by the W. P. Carey School of Business.

Students must complete a minimum of 22 credit hours of W. P. Carey School of Business courses taken at ASU.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Artificial Intelligence in Business, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: W. P. Carey School of Business
Plan Code: BAAIBBS
Minimum credit hours: 120
Upper division minimum credit hours: 50.5

Requirement	Minimum Grade	Credit Hours
Career Navigation		
WPC 148 First-Year Introduction to Career Development	C	
WPC 248 Sophomore Career Narrative Design OR **WPC 347 Intermediate Career Management** Career Navigation Course Sequence: Continuing first-year students will take WPC 248, after completing WPC 148. New transfer students will take WPC 347.	C	0.25

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Art (Photography), BFA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Fine Arts, BFA
College/School: Herberger Institute for Design and the Arts
Plan Code: FAARTPHBFA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
BFA Core Requirements

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.		
DSC 100 ASU Design Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General

Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Fashion, BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: Herberger Institute for Design and the Arts
Plan Code: HIFSHBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Fashion Core		
FSH 125 Survey of the Fashion Industry (HUAD)	C	3

Capstone

FSH 495 Fashion Capstone	C	3

Emphasis Requirement

Students select one emphasis area of study to complete 24 credit hours (15 must be upper division).

Upper Division Fashion Communications Emphasis	C	15

Required Courses:

FSH 326 Fashion Styling

FSH 380 Fashion Forecasting

FSH 475 Communication Strategies for Fashion

Select 15 additional credits from the following Communications, Mass Communications, or Technical Communications options:

COM 312 Communication, Conflict, and Negotiation (CIVI)

COM 319 Persuasion and Social Influence (CIVI)

COM 320 Communication and Consumerism

COM 325 Advanced Public Speaking and Presentations (CIVI)

MCO 307 The Digital Audience

MCO 335 Social Media Foundations

MCO 366 Mass Communication Ethics

MCO 375 Podcasting

MCO 430 International Mass Communication (GCSI)

MCO 433 Social Media Campaigns, Engagement and Research

MCO Elective

TWC 301 Fundamentals of Writing for Digital Media

TWC 401 Fundamentals of Technical Communication

OR **Upper Division Fashion Sustainable Systems Emphasis**

Required Courses:

FSH 365 Technical, Functional and Sustainable Textiles

Select nine additional credits from Sustainable coursework:

FSH 361 Sustainable Design Studio

FSH 394 Topic: Knitwear Design

FSH 394 Topic: Textile Application & Color Management

SOS 311 Future Thinking and Strategies

SOS 320 Society and Sustainability (SOBE)

SOS 344 Culture and Society Transformation (GCSI)

SOS Elective

Select six additional credits from Global & Ethics coursework:

BIO 324 / PHI 310 Environmental Ethics (SUST)

PHI 360 Business and Professional Ethics (HUAD)

POS 325 Public Policy Development (CIVI)

SGS 303 Global Trends (GCSI)

SGS 379 The Resource Curse

OR

Upper Division Fashion History and Museum Practice Emphasis

Complete 12 additional credits from Fashion History Related Elective course list.

Complete 12 credits from Art, Art History, and Museum Practice topics:

ARA 460 Gallery Exhibitions

ARS 323 Curatorial Activism

ARS 394 Topic: Museum Accessibility & Institutional Change

ARS 394 Topic: Principles of Collections Management

ARS 438 Art of the 20th Century I (HUAD)

ARS 439 Art of the 20th Century II

ARS 460 Art Now

ARS 494 Topic: Curating the Contemporary In Practice

ARS Elective

OR **Upper Division Minor, Certificate, or Concurrent Degree**

Students seeking to partner knowledge of Fashion with another existing subject area or field of study may select this option. Students will integrate their learning from both Fashion and their other area or field into a one semester culminating Capstone experience.

Additional credits in the same subject area or field of the Minor or Certificate may be required to reach the 24 total required; consult with a Fashion advisor.

Fashion Communications Emphasis C 9

Required Courses:

FSH 326 Fashion Styling

FSH 380 Fashion Forecasting

FSH 475 Communication Strategies for Fashion

Select 15 additional credits from the following Communications, Mass Communications, or Technical Communications options:

FSH 294 Topic: Trend Forecasting

COM 225 Public Speaking and Presentations (CIVI)

COM 230 Teamwork and Collaboration (SOBE)

COM 250 Communication and the Workplace (SOBE)

COM 263 Communication Across Cultures and Global Engagement

COM 312 Communication, Conflict, and Negotiation (CIVI)

COM 319 Persuasion and Social Influence (CIVI)

COM 320 Communication and Consumerism

ARS 438 Art of the 20th Century I (HUAD)

ARS 439 Art of the 20th Century II

ARS 460 Art Now

ARS 494 Topic: Curating the Contemporary In Practice

ARS Elective

OR **Minor, Certificate, or Concurrent Degree**

Students seeking to partner knowledge of Fashion with another existing subject area or field of study may select this option. Students will integrate their learning from both Fashion and their other area or field into a one semester culminating Capstone experience.

Additional credits in the same subject area or field of the Minor or Certificate may be required to reach the 24 total required; consult with a Fashion advisor.

Why select the Fashion Communications emphasis?

Step into the world of fashion communications, where you will craft stories that shape brands and captivate audiences with every campaign, post, and press release. Fashion

communications transports you into the world of PR, trend forecasting, and corporate messaging to craft the brand voice and elevate its public image. In a communications role, you will blend creativity and strategy to turn style into a powerful narrative that defines how the world sees - and feels - fashion.

Why select the Fashion Sustainable Systems emphasis?

The fashion industry is at a critical crossroads, balancing creativity with the urgent need for environmental and social responsibility. This track explores how designers and innovators can address the most pressing challenges in the industry, from pollution and material waste to global social justice concerns. Students will investigate the systems and inefficiencies that drive these issues and develop forward-thinking solutions that promote sustainability, equity, and positive change across the fashion ecosystem.

Why select the Fashion History and Museum Practice emphasis?

Fashion history inspires and provides momentum for innovative/creative design and thought. Students in this area will dive deeper into the history of aesthetic movements, inspiration, and methods of the artists and designers that influence fashion and related industries. Students also have the opportunity to learn about specialized practices used across museums and fashion archives. This track prepares students for a master degree program, internships, and emerging career positions in cultural institutions.

Why select the Minor, Certificate, or Concurrent Degree emphasis?

Students seeking to partner knowledge of Fashion with another existing subject area or field of study may select this option. Students will integrate their learning from both Fashion

and their other area or field into a one semester culminating Capstone experience. Additional credits in the same subject area or field of the Minor or Certificate may be required to reach the 24 total required; consult with a Fashion advisor.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies

requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Film and Media Production (Cinematography), BFA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Fine Arts, BFA
College/School: Herberger Institute for Design and the Arts
Plan Code: HIFMPCBFA
Minimum credit hours: 120
Upper division minimum credit hours: 49

Requirement	Minimum Grade	Credit Hours
Film and Media Production Core		
FMP 180 Principles of Production Technology	C	3

Film GPA Requirements

Check: Minimum 3.0 Major GPA

Check: Minimum 2.5 ASU Cumulative GPA

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

FMP 101 Orientation to Film FMP 101 is not required for transfer students. Transfer students will complete one additional hour of elective credit instead.	C	1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**	C	6

OR **ENG 105 Advanced First-Year Composition**

OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

It is suggested to complete at least one semester in Los Angeles. See your advisor for more information.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Game Design, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Herberger Institute for Design and the Arts
Plan Code: HIGMDESBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Major Requirements		
AME 160 Introduction to Game Design	C	3
AME 161 Game Engine Fundamentals	C	3

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

> General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Media Arts and Sciences (Art), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: Herberger Institute for Design and the Arts
Plan Code: HIDGCABA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Core Courses		
AME 111 Introduction to Digital Culture (HUAD)	C	
AME 130 Prototyping Dreams (HUAD)	C	3
AME 230 Programming for the Media Arts	C	3
Media Arts and Sciences Foundational Media Course		
AME 112 Computational Thinking for Media Arts	C	12
AME 161 Game Engine Fundamentals		
AME 210 Media Editing		
AME 220 Programming for the Web		
AME 240 Introduction to Physical Computing		
AME 244 Introduction to Interactive Environments		
AME 294 Topic: Intro to Blender and 3D Concepts		

Requirement	Minimum Grade	Credit Hours

Track Focus/Digital Media

Track Focus Areas: Students may choose courses from any combination of focus areas and are encouraged to choose courses that align with their career goals. Contact your advisor for guidance or suggestions.

Upper Division Track Focus Area Course	C	12
Creative Code and Development Track		
AME 360 Designing Mixed-Reality Experiences		
AME 394 Topic: Computational Photography		
AME 394 Topic: Introduction to Python for Interactive Media		
AME 400 Minds and Machines		
AME 430 Mac Development for Media Arts		
AME 434 Machine Learning for Media Arts		
AME 435 Mobile Development		
AME 436 Animating Virtual Worlds		
AME 470 Programming for Social and Interactive Media		
AME 494 Topic: Artificial Intelligence for Social Good		
AME 494 Topic: Programming for the Internet of Things		

Requirement	Minimum Grade	Credit Hours

School Requirement

MAT 117 College Algebra (MATH)	C	3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

AME 101 ASU Media Arts and Sciences Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree

requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Media Arts and Sciences (Design), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: Herberger Institute for Design and the Arts
Plan Code: HIDGCDBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Core Courses		
AME 111 Introduction to Digital Culture (HUAD)	C	
AME 130 Prototyping Dreams (HUAD)	C	3
AME 230 Programming for the Media Arts	C	3
Media Arts and Sciences Foundational Media Course		
AME 112 Computational Thinking for Media Arts	C	12
AME 161 Game Engine Fundamentals		
AME 210 Media Editing		
AME 220 Programming for the Web		
AME 240 Introduction to Physical Computing		
AME 244 Introduction to Interactive Environments		
AME 294 Topic: Intro to Blender and 3D Concepts		

Requirement	Minimum Grade	Credit Hours

Track Focus/Digital Media

Track Focus Areas: Students may choose courses from any combination of focus areas and are encouraged to choose courses that align with their career goals. Contact your advisor for guidance or suggestions.

Upper Division Track Focus Area Course	C	12
Creative Code and Development Track		
AME 360 Designing Mixed-Reality Experiences		
AME 394 Topic: Computational Photography		
AME 394 Topic: Introduction to Python for Interactive Media		
AME 400 Minds and Machines		
AME 430 Mac Development for Media Arts		
AME 434 Machine Learning for Media Arts		
AME 435 Mobile Development		
AME 436 Animating Virtual Worlds		
AME 470 Programming for Social and Interactive Media		
AME 494 Topic: Artificial Intelligence for Social Good

AME 101 ASU Media Arts and Sciences Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition **OR ENG 105 Advanced First-Year Composition** **OR ENG 107 First-Year Composition AND ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Media Arts and Sciences (Education), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: Herberger Institute for Design and the Arts
Plan Code: HIMASEDBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Core Courses		
AME 111 Introduction to Digital Culture (HUAD)	C	
AME 130 Prototyping Dreams (HUAD)	C	3
AME 230 Programming for the Media Arts	C	3
Media Arts and Sciences Foundational Media Course		
AME 112 Computational Thinking for Media Arts	C	12
AME 161 Game Engine Fundamentals		
AME 210 Media Editing		
AME 220 Programming for the Web		
AME 240 Introduction to Physical Computing		
AME 244 Introduction to Interactive Environments		
AME 294 Topic: Intro to Blender and 3D Concepts		

Requirement	Minimum Grade	Credit Hours

Track Focus/Digital Media

Track Focus Areas: Students may choose courses from any combination of focus areas and are encouraged to choose courses that align with their career goals. Contact your advisor for guidance or suggestions.

Upper Division Track Focus Area Course	C	15
Creative Code and Development Track		
AME 360 Designing Mixed-Reality Experiences		
AME 394 Topic: Computational Photography		
AME 394 Topic: Introduction to Python for Interactive Media		
AME 400 Minds and Machines		
AME 430 Mac Development for Media Arts		
AME 434 Machine Learning for Media Arts		
AME 435 Mobile Development		
AME 436 Animating Virtual Worlds		
AME 470 Programming for Social and Interactive Media		
AME 494 Topic: Artificial Intelligence for Social Good		
AME 494 Topic: Programming for the Internet of Things		
Emerging Media Arts Track		

Requirement	Minimum Grade	Credit Hours
AME 320 Motion Capture for Integrative Systems		
AME 394 Topic: Computational Photography		
AME 394 Topic: User Experience in Media Arts		
AME 444 Media Installations		
AME 494 Topic: Spatial Design		
AME 494 Topic: Systems and Content Design for Digital Experiences		
Online: Emerging Media Arts Track		
AME 394 Topic: Computational Photography		
AME 494 Topic: Digital Marketing and Consumers in Esports		
AME 494 Topic: The Forthcoming Metaverse		
Games and Immersive Worlds Track		
AME 320 Motion Capture for Integrative Systems		
AME 360 Designing Mixed-Reality Experiences		
AME 365 People at Play (HUAD)		
AME 367 Identity, Industry and Games		
AME 394 Topic: Endless Games Studio Project		
AME 394 Topic: Intro to Esports Management		
AME 465 Designing Play		

Requirement	Minimum Grade	Credit Hours
AME 494 Topic: Cinema and Game Worlds		
AME 494 Topic: Spatial Audio for XR		
AME 494 Topic: Worldbuilding		
Sound and Music Track		
AME 333 Improvising Cyborgs		
AME 394 Topic: Synthesis and Expression		
AME 411 Advanced Interactive Sound		
AME 494 Topic: Acousmatic Composition		
AME 494 Topic: Musical Microcontrollers		
AME 494 Topic: Spatial Audio for XR		
AME 494 Topic: Wearable Music		
AME 494 Topic: Web Audio for Collaborative Situated Media		
Tangible and Physical Computing Track		
AME 320 Motion Capture for Integrative Systems		
AME 330 Digital-Physical Systems		
AME 410 Interactive Materials		
AME 444 Media Installations		
AME 494 Topic: Advanced Modeling and Fabrication		
AME 494 Topic: Expressive Robotics		

Requirement	Minimum Grade	Credit Hours
AME 494 Topic: Musical Microcontrollers		
AME 494 Topic: Wearable Music		
Tech and Society Track		
AME 310 Media Literacies and Composition		
AME 325 Technical Lives		
AME 365 People at Play (HUAD)		
AME 369 Gender, Technology and Design (SOBE)		
AME 394 Topic: Imagining Futures in Science Fiction		
AME 404 Reading the Algorithm		
AME 494 Topic: Alternate Ecologies and Economies		
AME 494 Topic: Media Archaeology		
AME 494 Topic: Sensable Heatscapes		
AME 494 Topic: Sense-making Complexity		
AME 494 Topic: Socio-Technical Futures		
AME 494 Topic: Worldbuilding		
Online: Tech and Society Track		
AME 325 Technical Lives		
AME 394 Topic: Imagining Futures in Science Fiction		
AME 394 Topic: Intro to Esports Management		

Requirement	Minimum Grade	Credit Hours
AME 404 Reading the Algorithm		
AME 445 The Art of Teaching Media Arts		
AME 494 Topic: Socio-Technical Futures		
Upper Division Track Focus Area Course	C	6
Creative Code and Development Track		
AME 360 Designing Mixed-Reality Experiences		
AME 394 Topic: Computational Photography		
AME 394 Topic: Introduction to Python for Interactive Media		
AME 400 Minds and Machines		
AME 430 Mac Development for Media Arts		
AME 434 Machine Learning for Media Arts		
AME 435 Mobile Development		
AME 436 Animating Virtual Worlds		
AME 470 Programming for Social and Interactive Media		
AME 494 Topic: Artificial Intelligence for Social Good		
AME 494 Topic: Programming for the Internet of Things		
Emerging Media Arts Track		
AME 320 Motion Capture for Integrative Systems		

Requirement	Minimum Grade	Credit Hours
AME 394 Topic: Computational Photography		
AME 394 Topic: User Experience in Media Arts		
AME 444 Media Installations		
AME 494 Topic: Spatial Design		
AME 494 Topic: Systems and Content Design for Digital Experiences

applied according to the designation the course carries at the time the class is taken.

Curriculum - Media Arts and Sciences (Media Processing), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Herberger Institute for Design and the Arts
Plan Code: HIDGCMPBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Core Courses		
AME 111 Introduction to Digital Culture (HUAD)	C	
AME 130 Prototyping Dreams (HUAD)	C	3
AME 230 Programming for the Media Arts	C	3
Media Arts and Sciences Foundational Media Course		
AME 112 Computational Thinking for Media Arts	C	12
AME 161 Game Engine Fundamentals		
AME 210 Media Editing		
AME 220 Programming for the Web		
AME 240 Introduction to Physical Computing		
AME 244 Introduction to Interactive Environments		
AME 294 Topic: Intro to Blender and 3D Concepts		

Requirement	Minimum Grade	Credit Hours

Track Focus/Digital Media

Track Focus Areas: Students may choose courses from any combination of focus areas and are encouraged to choose courses that align with their career goals. Contact your advisor for guidance or suggestions.

Upper Division Track Focus Area Course	C	6
Creative Code and Development Track		
AME 360 Designing Mixed-Reality Experiences		
AME 394 Topic: Computational Photography		
AME 394 Topic: Introduction to Python for Interactive Media		
AME 400 Minds and Machines		
AME 430 Mac Development for Media Arts		
AME 434 Machine Learning for Media Arts		
AME 435 Mobile Development		
AME 436 Animating Virtual Worlds		
AME 470 Programming for Social and Interactive Media		
AME 494 Topic: Artificial Intelligence for Social Good		
AME 494 Topic: Programming for the Internet of Things		

Requirement	Minimum Grade	Credit Hours
Emerging Media Arts Track		
AME 320 Motion Capture for Integrative Systems		
AME 394 Topic: Computational Photography		
AME 394 Topic: User Experience in Media Arts		
AME 444 Media Installations		
AME 494 Topic: Spatial Design		
AME 494 Topic: Systems and Content Design for Digital Experiences		
Games and Immersive Worlds Track		
AME 320 Motion Capture for Integrative Systems		
AME 360 Designing Mixed-Reality Experiences		
AME 365 People at Play (HUAD)		
AME 367 Identity, Industry and Games		
AME 394 Topic: Endless Games Studio Project		
AME 394 Topic: Intro to Esports Management		
AME 465 Designing Play		
AME 494 Topic: Cinema and Game Worlds		
AME 494 Topic: Spatial Audio for XR		
AME 494 Topic: Worldbuilding		
Sound and Music Track		

Requirement	Minimum Grade	Credit Hours
AME 333 Improvising Cyborgs		
AME 394 Topic: Synthesis and Expression		
AME 411 Advanced Interactive Sound		
AME 494 Topic: Acousmatic Composition		
AME 494 Topic: Musical Microcontrollers		
AME 494 Topic: Spatial Audio for XR		
AME 494 Topic: Wearable Music		
AME 494 Topic: Web Audio for Collaborative Situated Media		
Tangible and Physical Computing Track		
AME 320 Motion Capture for Integrative Systems		
AME 330 Digital-Physical Systems		
AME 410 Interactive Materials		
AME 444 Media Installations		
AME 494 Topic: Advanced Modeling and Fabrication		
AME 494 Topic: Expressive Robotics		
AME 494 Topic: Musical Microcontrollers		
AME 494 Topic: Wearable Music		
Tech and Society Track		
AME 310 Media Literacies and Composition		

Requirement	Minimum Grade	Credit Hours
AME 325 Technical Lives		
AME 365 People at Play (HUAD)		
AME 369 Gender, Technology and Design (SOBE)		
AME 394 Topic: Imagining Futures in Science Fiction

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

> General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Ensembles

- Ensemble is based on area of applied study (lessons). Ensemble placement is by audition. For questions, see your studio instructor.
- Students are expected to participate in one ensemble every semester except the semester of student teaching to fulfill degree requirements.
- All large ensembles are made by audition that take place the first days of fall semester.
- Spring semester transfer students should meet with studio professor immediately who will work in consultation with head of the ensembles area to determine proper placement procedure.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

MUE 101 The ASU School of Music Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition OR ENG 105 Advanced First-Year Composition OR ENG 107 First-Year Composition AND ENG 108 First-Year Composition	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

International students may need a minimum of one additional semester to complete the program.

Successfully complete an entrance audition into the major before enrolling at ASU.

Music students must successfully complete the music theory diagnostic exam before enrolling in School of Music, Dance and Theatre courses.

Familiarize yourself with information about musician's health.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is

applied according to the designation the course carries at the time the class is taken.

MTC 251 Introduction to Music Cognition		
MTC 327 Form and Analysis I		
MTC 422 Musical Acoustics		
MTC 425 Studies in 20th- and 21st-Century Theory		
MTC 440 Jazz Theory and Ear Training		
MTC 441 Jazz Composition		
MTC 494 Topic: Analysis of Song		
MTC 494 Topic: Composing for Film and Media		

Applied Performance

MUP 127 Studio Instruction Four semesters required	C	16

Completion of Piano Diagnostic Exam determines placement into Class Piano courses.

MUP 131 Class Piano	C	1
MUP 132 Class Piano	C	1

Requirement	Minimum Grade	Credit Hours
MUP 231 Class Piano	C	1
MUP 232 Class Piano	C	1
MUP 210 Beginning Instrumental Conducting	C	1
MUP 327 Studio Instruction Four semesters required	C	16
MUP 495 Performance	Y	
MUP 496 Performance	Y	

Orchestral Instrument Core

Ensemble placement is by audition. For questions, see your studio instructor.

MUP 442 Instrumental Ensembles Eight semesters required	C	8
MUP 479 Chamber Music Ensembles OR **MUP 485 Percussion Ensemble** OR **MUP 489 Ethnomusicology Ensembles** OR **MUP 460 The Visiting Quartet Residency Program**	C	4

MUP 451 and MUP 481 are taught in different semesters depending on the instrument; please consult with studio instructor for the schedule.

MUP 451 Repertoire	C	2

Requirement	Minimum Grade	Credit Hours
MUP 481 Performance Pedagogy and Materials	C	2
Upper Division MHL Through Present Time Course		
MHL 342 Music History II (HUAD)		
MHL 344 Music in World Cultures (GCSI)		
MHL 363 Survey of Russian Music		
MHL 365 Popular Music and Race (HUAD)		
MHL 440 Topics in 20th-Century Music	C	3
MHL 441 Concerts in the 20th Century		
MHL 445 Music of the Silk Road (HUAD)		
MHL 447 Music and Healing (HUAD)		
MHL 494 Topic: Jazz History and Discourse		

Music Electives

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

MUP 101 The ASU School of Music Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition	C	6
OR **ENG 105 Advanced First-Year Composition**		
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Music students must successfully complete an entrance audition into the major before enrolling at ASU.

Music students must successfully complete the music theory diagnostic exam before enrolling in School of Music, Dance and Theatre courses.

Familiarize yourself with information about musicians' health.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Performance (Voice), BMUS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Music, BMUS
College/School: Herberger Institute for Design and the Arts
Plan Code: FAMUSPVBM
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Music Core		
MHL 140 Sounds and Cultures (GCSI)	C	3
Upper Division **MHL Elective** **AND** Upper Division Humanities, Arts and Design (HUAD)	C	3
Upper Division **MHL Elective** **AND** Upper Division Humanities, Arts and Design (HUAD)	C	3
MTC 125 Music Theory I Only offered in fall semesters	C	3
MTC 221 Music Theory II Only offered in spring semesters	C	3
MTC 222 Music Theory III Only offered in fall semesters	C	3
Music Theory Core Elective	C	3

Requirement	Minimum Grade	Credit Hours
MTC 223 Music Theory: 20th Century		
MTC 225 Popular Music Theory		
MTC 251 Introduction to Music Cognition		
MTC 327 Form and Analysis I		
MTC 422 Musical Acoustics		
MTC 425 Studies in 20th- and 21st-Century Theory		
MTC 440 Jazz Theory and Ear Training		
MTC 441 Jazz Composition		
MTC 494 Topic: Analysis of Song		
MTC 494 Topic: Composing for Film and Media		

Applied Performance

MUP 111 Topic: Voice Two semesters required	C	4

Completion of Piano Diagnostic Exam determines placement into Class Piano courses.

MUP 131 Class Piano	C	1
MUP 132 Class Piano	C	1
MUP 231 Class Piano	C	1

Requirement	Minimum Grade	Credit Hours
MUP 232 Class Piano	C	1
MUP 311 Topic: Voice Two semesters required	C	4
MUP 327 Topic: Voice Four semesters required	C	16
MUP 495 Topic: Voice	Y	
MUP 496 Topic: Voice	Y	
Ensemble placement is by audition. For questions, see your studio instructor.		
Upper Division Choral Ensemble **MUP 443 Choral Ensembles** **MUP 443 Topic: Chamber Singers** **MUP 443 Topic: Concert Choir** **MUP 450 Choral Union** **MUP 455 Canticum Bassum** **MUP 457 Sol Singers** **MUP 458 ASU Gospel Choir** **MUP 459 Barrett Choir** **MUP 459 Topic: Barrett Choir (Honors)**	C	8

Requirement	Minimum Grade	Credit Hours
MUP 458 (ASU Gospel Choir) can only be applied to your program twice, any other attempts would not help towards graduation.		

Voice Core

MUP 170 Music Theatre I Only offered in fall semesters	C	2
MUP 172 Music Theatre II Only offered in spring semesters	C	2
MUP 250 Topic: French	C	1
MUP 250 Topic: German	C	1
MUP 250 Topic: Italian Students starting in odd-numbered fall semester follow this MUP 250 Diction sequence starting in Term 1: Italian, German, French. Students starting in even-numbered fall semester follow this MUP 250 Diction sequence starting in Term 3: Italian, German, French.	C	1
MUP 360 Musicianship for Singers	C	1
MUP 451 Topic: Opera Repertoire	C	2
MUP 453 Art Song Repertoire	C	2
MUP 481 Performance Pedagogy and Materials	C	2
Upper Division MHL - Cross-Historical	C	3

Requirement	Minimum Grade	Credit Hours
MHL 342 Music History II (HUAD)		
MHL 447 Music and Healing (HUAD)		
MHL 494 Topic: Music, Nature and Sustainability

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is

applied according to the designation the course carries at the time the class is taken.

Curriculum - Theatre (Design and Production), BA

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Arts, BA
College/School: Herberger Institute for Design and the Arts
Plan Code: FADSNPRBA
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Theatre Core Requirements		
THE 320 History of the Theatre I (GCSI) Course offered in fall semesters only	C	3
THE 321 History of the Theatre II (HUAD) Course offered in spring semesters only	C	3
THF 126 Professional Development: Communication and Collaboration	C	2
THF 160 Introduction to Storytelling (HUAD)	C	3
THF 215 Design and Composition for Theatre and Film (HUAD)	C	3
THF 220 Principles of Dramatic Analysis (HUAD)	C	3
THP 102 Acting I	C	3
THP 201 Theatre Production Crew	C	1

Requirement	Minimum Grade	Credit Hours
THP 218 Directing I: Introduction to Directing	C	3
Upper Division THE Dramatic Literature Course **THE 421 Shakespeare: Stage and Film (HUAD)** **THE 422 Latinx Theatre and Film (HUAD)** **THE 423 African American Theatre (HUAD)** **THE 440 Experimental Theatre and Performance**	C	6

Theater (Design and Production) Concentration Requirements

THF 397 Professional Development Seminar Register with your senior project mentor; see theatre canvas site for information on senior projects	C	1
THF 497 Senior Project Register with your senior project mentor; see theatre canvas site for information on senior projects	C	1 - 3
THP 213 Introduction to Technical Theatre	C	3
THP 214 Introduction to Costuming	C	3
THP 301 Theatre Production Register with your supervisor for a season production assignment after securing an assignment (technicians, register with shop supervisor; other positions please register with your mentor)	C	2

Requirement	Minimum Grade	Credit Hours
THP 301 Theatre Production OR **THP 401 Theatre Practicum** OR **THP 498 Pro-Seminar**	C	3 - 9
Design & Production Concentration Elective	C	3

Design Electives:

- **THP 330 Costume Design**
- **THP 340 Scene Design**
- **THP 345 Lighting Design**
- **THP 350 Sound Design**
- **THP 355 Media Design for Performance**
- **THP 440 Advanced Scene Design**
- **THP 445 Advanced Lighting Design**
- **THP 455 Advanced Media Design**
- **THP 494 Topic: Costume Design II**

Technology:

- **THP 331 Costume Construction**
- **THP 333 Costume Crafts**
- **THP 335 Stagecraft**
- **THP 352 Everyday Audio Editing**
- **THP 394 Topic: Pattern Drafting for Theatre**

Requirement	Minimum Grade	Credit Hours
THP 430 Rigging for the Stage		
THP 431 Advanced Costume Construction		
THP 435 Technical Direction		
THP 441 Scene Painting		
THP 453 Sound System Design and Engineering		
THP 494 Topic: Advanced Sound Technology		
THP 494 Topic: Designing & Mixing a Musical		
THP 494 Topic: Materials for the Stage		
THP 494 Topic: Menswear Patterning & Construction Techniques		
THP 494 Topic: Properties for the Stage		
THP 494 Topic: Recording & Mixing Audio		
Management:		
THP 317 Stage Management		
THP 351 Arts Management (HUAD)

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: TSAMTFBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Aeronautical Management Technology Core		
AMT 220 Aviation Meteorology	C	3
AMT 280 Aerospace Structures, Materials and Systems	C	4
AMT 287 Aircraft Powerplants	C	4
AMT 308 Air Transportation (GCSI)	C	3
AMT 350 Aircraft Design and Logistics Management	C	4
AMT 396 Aviation Professional	C	1
AMT 408 National Aviation Policy	C	3
AMT 410 Aviation Safety and Human Factors	C	3
AMT 442 Aviation Law and Regulations	C	3
AMT 444 Airport Management and Planning	C	3

Requirement	Minimum Grade	Credit Hours
Professional Flight Concentration		
AMT 105 Flight Operations and Safety I	C	1
AMT 110 Flight Operations and Safety II	C	1
AMT 150 Flight Operations and Safety III	C	1
AMT 182 Private Pilot Ground School	C	3
AMT 201 Air Traffic Control	C	3
AMT 205 Flight Operations and Safety IV	C	1
AMT 210 Flight Operations and Safety V	C	1
AMT 214 Commercial Pilot Ground School	C	3
AMT 222 Instrument Pilot Ground School Completion of Private Pilot License is required to enroll in AMT 222 for Aeronautical Management Technology (Professional Flight) majors.	C	3
AMT 250 Flight Operations and Safety VI	C	1
AMT 285 Flight Instructor Ground School	C	3
AMT 286 Multiengine Pilot Ground School	C	1
AMT 292 Flight Instructor Instrument Ground School	C	3
AMT 305 Flight Operations and Safety VII	C	1
AMT 360 Aircraft Dispatch Ground School	C	3

Requirement	Minimum Grade	Credit Hours
AMT 382 Air Navigation Completion of Instrument Rating is required to enroll in AMT 382. AMT 382 begins a three-semester sequence of courses: (1) AMT 382, then (2) AMT 482 and AMT 486, then (3) AMT 490.	C	3
AMT 482 Airline Instrument Procedures	C	3
AMT 486 Regional Jet Aircraft Systems	C	3
AMT 489 Airline Administration	C	3
AMT 490 Regional Jet Operations Capstone AMT 490 requires a $5,000.00 course fee.	C	3

Aero Mngt Tech (Prof Flight) Major GPA

Check: Minimum 2.0 Major GPA

Math, Science, and Interdisciplinary Studies Requirements

HSE 101 Introduction to Human Systems Engineering (SOBE) OR **PSY 101 Introduction to Psychology (SOBE)**	C	3
HSE 230 Statistics for Human Systems Research I (QTRS) OR **PSY 230 Introduction to Statistics (QTRS)** OR **STP 226 Elements of Statistics (QTRS)**	C	3
MAT 170 Precalculus (MATH)	C	3
PHY 111 General Physics (SCIT)	C	3
PHY 113 General Physics Laboratory (SCIT)	C	1

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-TPS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Complete Professional Flight Secondary Application.

Professional Flight students are encouraged to continue to progress in flight courses over the summer session.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Aeronautical Management Technology (Unmanned Aerial Systems), BS

OR **Upper Division Unmanned Aerial Systems Focus Area**

AMT 370 Unmanned Aircraft Systems		
AMT 470 Unmanned Aircraft Payloads, Sensors, and Control Stations		
AMT 495 Unmanned Aircraft Systems Operations		

For the Unmanned Aerial Systems focus area, students must have completed AMT 170 and AMT 270, or equivalents, prior to AMT 370.

Applied Science (Aviation) Major GPA

Check: Minimum 2.0 Major GPA

Students who have not met all ASU general studies and first-year composition requirements with their transfer courses

must complete them at ASU to earn the BAS degree.

Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.

AAS Transfer Degree Block of Credit Hours

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

> General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Applied Science (Graphic Information Technology), BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: TSGITBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Graphic Information Technology Core		
GIT 303 Digital Publishing		3
GIT 314 Multimedia Design, Planning and Storyboards		3
GIT 333 Printing Technology		3
GIT 350 Cross-Media Design		3
GIT 384 Commercial Photography	C	3
GIT 402 New Media Internet Technologies		3
GIT 413 Professional Portfolio Design and Presentation	C	3
GIT 420 Prototyping and Wireframe (proposed)		3
GIT 432 Graphic Industry Business Practices		3
GIT 450 Digital Workflow in Graphic Industries		3
GIT 475 Design for Accessibility (proposed)		3

Requirement	Minimum Grade	Credit Hours
GIT 480 Senior Project		3

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses. https://catalog.asu.edu/undergraduatereq

All undergraduate students must complete General Studies requirements. https://catalog.asu.edu/ug_gsr

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2025 - 2026 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Computer Science, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESCSEBS
Minimum credit hours: 120
Upper division minimum credit hours: 54

Requirement	Minimum Grade	Credit Hours
Some ASU Online courses are only offered in specific sessions. Please see advising for course planning.		

Please see our degree requirements website for links to our flowcharts and our most up to date course lists.

Lab Science (SCIT)

Science Courses

> **Applied Biological Science:**

ABS 130 Introduction to Environmental Science (SCIT)

Astronomy:

AST 112 Introduction to Stars, Galaxies, and Cosmology (SCIT)

AST 112 Introduction to Stars, Galaxies, and Cosmology (SCIT)

Biology:

BIO 100 The Living World (SCIT)

BIO 130 Introduction to Environmental Science (SCIT)

BIO 160 Introduction to Anatomy and Physiology (SCIT)

BIO 181 General Biology I (SCIT)

BIO 182 General Biology II (SCIT)

BIO 201 Human Anatomy and Physiology I (SCIT)

BIO 202 Human Anatomy and Physiology II (SCIT)

Chemistry:

CHM 101 Introductory Chemistry (SCIT)

CHM 107 Chemistry and Society (SCIT) **AND** CHM 108 Chemistry and Society Laboratory (SCIT)

CHM 113 General Chemistry I (SCIT)

CHM 114 General Chemistry for Engineers (SCIT)

CHM 116 General Chemistry II (SCIT)

CHM 111 General Chemistry Laboratory for Majors I (SCIT) **AND** CHM 117 General Chemistry for Majors I (SCIT)

CHM 112 General Chemistry Laboratory for Majors II (SCIT) **AND** CHM 118 General Chemistry for Majors II (SCIT)

CHM 231 Elementary Organic Chemistry (SCIT)

CHM 235 Elementary Organic Chemistry Laboratory (SCIT)

Environmental Sciences:

ENV 130 Introduction to Environmental Science (SCIT)

Forensics:

FOR 105 Physical Evidence and the Crime Scene (SCIT)

FOR 106 Biology Behind the Crime Scene (SCIT)

Geological Sciences:

GLG 108 Water Planet (SCIT)

GLG 101 Introduction to Geology I (Physical) (SCIT) **AND** GLG 103 Introduction to Geology I: Laboratory (SCIT)

GLG 102 Introduction to Geology II (Historical) (SCIT) **AND** GLG 104 Introduction to Geology II: Laboratory (SCIT)

GLG 110 Dangerous World (SCIT) AND GLG 111 Dangerous World Laboratory (SCIT)

Physical Geography:

GPH 211 Landform Processes (SCIT)

GPH 111 Introduction to Physical Geography (SCIT) AND GPH 112 Introduction to Physical Geography Lab (SCIT)

GPH 212 Introduction to Meteorology (SCIT) AND GPH 214 Introduction to Meteorology Laboratory (SCIT)

Material Science:

MSE 208 Patterns in Nature (SCIT)

Physical Science:

PHS 110 Fundamentals of Physical Science (SCIT)

PHS 208 Patterns in Nature (SCIT)

Physics:

PHY 101 Introduction to Physics (SCIT)

PHY 111 General Physics (SCIT) AND PHY 113 General Physics Laboratory (SCIT)

PHY 112 General Physics (SCIT) AND PHY 114 General Physics Laboratory (SCIT)

PHY 121 University Physics I: Mechanics (SCIT) **AND** **PHY 122 University Physics Laboratory I (SCIT)**

PHY 131 University Physics II: Electricity and Magnetism (SCIT) **AND** **PHY 132 University Physics Laboratory II (SCIT)**

PHY 150 Physics I (SCIT)

PHY 151 Physics II (SCIT)

PHY 252 Physics III (SCIT)

Earth Space:

SES 106 Habitable Worlds (SCIT)

SES 121 Earth, Solar System and Universe (SCIT) **AND** **SES 123 Earth, Solar System and Universe Laboratory (SCIT)**

SES 141 Energy In Everyday Life (SCIT)

Sustainability:

SOS 182 Water Planet (SCIT)

AND Scientific Thinking in Natural Sciences (SCIT)

Students must complete eight credit hours of courses that satisfy SCIT from the same subject area. An additional course (3-4 credit hours) must be completed from a different subject area.

Computer Science (Lab Science)

Lab Science

Applied Biological Science:

ABS 130 Introduction to Environmental Science (SCIT)

Astronomy:

AST 111 Introduction to Solar Systems Astronomy (SCIT)

AST 112 Introduction to Stars, Galaxies, and Cosmology (SCIT)

Biology:

BIO 100 The Living World (SCIT)

BIO 130 Introduction to Environmental Science (SCIT)

BIO 160 Introduction to Anatomy and Physiology (SCIT)

BIO 151 Biological Thinking

BIO 181 General Biology I (SCIT)

BIO 182 General Biology II (SCIT)

BIO 201 Human Anatomy and Physiology I (SCIT)

BIO 202 Human Anatomy and Physiology II (SCIT)

Chemistry:

CHM 101 Introductory Chemistry (SCIT)

CHM 107 Chemistry and Society (SCIT) **AND** **CHM 108 Chemistry and Society Laboratory (SCIT)**

CHM 113 General Chemistry I (SCIT)

CHM 114 General Chemistry for Engineers (SCIT)

CHM 116 General Chemistry II (SCIT)

CHM 111 General Chemistry Laboratory for Majors I (SCIT) **AND** **CHM 117 General Chemistry for Majors I (SCIT)**

CHM 112 General Chemistry Laboratory for Majors II (SCIT) **AND** **CHM 118 General Chemistry for Majors II (SCIT)**

CHM 231 Elementary Organic Chemistry (SCIT)

CHM 235 Elementary Organic Chemistry Laboratory (SCIT)

Environmental Science:

ENV 130 Introduction to Environmental Science (SCIT)

Forensics:

FOR 105 Physical Evidence and the Crime Scene (SCIT)

FOR 106 Biology Behind the Crime Scene (SCIT)

Geological Science:

GLG 108 Water Planet (SCIT)

GLG 101 Introduction to Geology I (Physical) (SCIT) **AND** **GLG 103 Introduction to Geology I: Laboratory (SCIT)**

GLG 102 Introduction to Geology II (Historical) (SCIT) **AND** **GLG 104 Introduction to Geology II: Laboratory (SCIT)**

GLG 110 Dangerous World (SCIT) **AND** **GLG 111 Dangerous World Laboratory (SCIT)**

Physical Geography:

GPH 211 Landform Processes (SCIT)

GPH 111 Introduction to Physical Geography (SCIT) **AND** **GPH 112 Introduction to Physical Geography Lab (SCIT)**

GPH 212 Introduction to Meteorology (SCIT) **AND** **GPH 214 Introduction to Meteorology Laboratory (SCIT)**

Material Science:

MSE 208 Patterns in Nature (SCIT)

Physical Science:

PHS 110 Fundamentals of Physical Science (SCIT)

PHS 115 The Science of Musical Instruments

PHS 208 Patterns in Nature (SCIT)

Physics:

PHY 101 Introduction to Physics (SCIT)

PHY 111 General Physics (SCIT) **AND** **PHY 113 General Physics Laboratory (SCIT)**

PHY 112 General Physics (SCIT) **AND** **PHY 114 General Physics Laboratory (SCIT)**

PHY 121 University Physics I: Mechanics (SCIT) **AND** **PHY 122 University Physics Laboratory I (SCIT)**

PHY 131 University Physics II: Electricity and Magnetism (SCIT) **AND** **PHY 132 University Physics Laboratory II (SCIT)**

PHY 150 Physics I (SCIT)

PHY 151 Physics II (SCIT)

PHY 252 Physics III (SCIT)

Science Education:

SCN 250 Physical Science by Inquiry

Earth Science:

SES 106 Habitable Worlds (SCIT)

SES 121 Earth, Solar System and Universe (SCIT)
AND **SES 123 Earth, Solar System and Universe Laboratory (SCIT)**

SES 141 Energy In Everyday Life (SCIT)

Sustainability:

SOS 182 Water Planet (SCIT)

AND Scientific Thinking in Natural Sciences (SCIT)

Students must complete eight credit hours of courses that satisfy SCIT from the same subject area. An additional course (3-4 credit hours) must be completed from a different subject area.

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CAI The ASU Experience	C	1

First-Year Composition

ENG 101 First-Year Composition AND ENG 102 First-Year Composition		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition AND ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Computer Science (Software Engineering), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESCSESBS
Minimum credit hours: 120
Upper division minimum credit hours: 54

Requirement	Minimum Grade	Credit Hours
Some ASU Online courses are only offered in specific sessions. Please see advising for course planning.		

Please see our degree requirements website for links to our flowcharts and our most up to date course lists.

Computer Science (Software Engineering) Lower Division Core Requirements

CSE 110 Principles of Programming	C	
CSE 205 Object-Oriented Programming and Data Structures	C	3
CSE 230 Computer Organization and Assembly Language Programming	C	3
CSE 240 Introduction to Programming Languages	C	3

Requirement	Minimum Grade	Credit Hours

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-CAI The ASU Experience	C	1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** OR **ENG 105 Advanced First-Year Composition** OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**	C	6

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Computer Systems Engineering (Cybersecurity), BSE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Engineering, BSE
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESCSEIBSE
Minimum credit hours: 120
Upper division minimum credit hours: 48

Requirement	Minimum Grade	Credit Hours

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

Students are expected to take internships during the summer unless otherwise approved by the Internship Director and chair of the Construction program. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs. https://asu.my.salesforce-

General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Engineering, BSE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Engineering, BSE
College/School: Ira A. Fulton Schools of Engineering
Plan Code: TSEGRBSE
Minimum credit hours: 63
Upper division minimum credit hours: 0

Requirement	Minimum Grade	Credit Hours
Governance and Civic Engagement (CIVI)		3
Humanities, Arts and Design (HUAD)		3
Social and Behavioral Sciences (SOBE)		3

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-TPS The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition** OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition** OR **ENG 105 Advanced First-Year Composition**	C	6

Engineering Major Core

EGR 101 Foundations of Engineering Design Project I		
EGR 102 Foundations of Engineering Design Project II	C	3
EGR 201 Use-Inspired Design Project I	C	3
EGR 202 Use-Inspired Design Project II	C	3
EGR 216 Engineering Electrical Fundamentals	C	3
EGR 217 Engineering Mechanics Fundamentals	C	3
EGR 218 Materials and Manufacturing Processes	C	3
EGR 219 Computational Modeling of Engineering Systems	C	3

Math, Science, and Interdisciplinary Studies Requirements

CHM 113 General Chemistry I (SCIT)	C	4
EGR 280 Engineering Statistics (QTRS)		3
MAT 265 Calculus for Engineers I (MATH)	C	3
MAT 266 Calculus for Engineers II (MATH)	C	3
MAT 267 Calculus for Engineers III (MATH)	C	3
MAT 275 Modern Differential Equations (MATH)	C	3
PHY 121 University Physics I: Mechanics (SCIT)	C	3
PHY 122 University Physics Laboratory I (SCIT)	C	1

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Engineering (Automotive Systems), BSE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Engineering, BSE

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Human Systems Engineering (User Experience), BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESHSEUEBS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Human Systems Engineering Core		
HSE 101 Introduction to Human Systems Engineering (SOBE)	C	3
HSE 223 Applied Biology of Human Behavior (SOBE)	C	3
HSE 224 Applied Social Science (SOBE)	C	3
HSE 225 Human Systems Integration	C	3
HSE 230 Statistics for Human Systems Research I (QTRS)	C	3
HSE 290 Experimental Methods for Human Systems Research (QTRS)	C	3
HSE 323 Perceptual Systems (SOBE)	C	3
HSE 324 Applied Cognitive Science (SOBE)	C	3
HSE 325 Human-Computer Interaction	C	3
HSE 390 Qualitative Research Methods	C	3

Requirement	Minimum Grade	Credit Hours
HSE 477 Human Systems Engineering Capstone Experience		3

User Experience Concentration

Curriculum - Informatics, BS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science, BS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESCPIBS
Minimum credit hours: 120
Upper division minimum credit hours: 57

Requirement	Minimum Grade	Credit Hours
All major required courses may not be available every term		
Students may select from other focus areas for informatics electives as well as from the additional informatics electives list below.		
Please see our degree requirements website for links to our flowcharts and our most up to date course lists. https://scai.engineering.asu.edu/informatics/informatics-degree-requirements/		

Informatics Lower Division

CSE 110 Principles of Programming	C	3
CSE 205 Object-Oriented Programming and Data Structures	C	3
MAT 243 Discrete Mathematical Structures	C	3
CPI 101 Introduction to Informatics (QTRS)	C	3

Requirement	Minimum Grade	Credit Hours
CPI 200 Mathematical Foundations of Informatics (MATH)	C	3
CPI 220 Applied Data Structures and Algorithms OR **CSE 310 Data Structures and Algorithms**	C	3
CPI 221 Advanced Object-Oriented Principles Using Java	C	3
MAT 210 Brief Calculus (MATH) OR **MAT 265 Calculus for Engineers I (MATH)** OR **MAT 251 Calculus for Life Sciences (MATH)** OR **MAT 270 Calculus with Analytic Geometry I (MATH)**	C	3 - 4
MAT 242 Elementary Linear Algebra OR **MAT 342 Linear Algebra** OR **MAT 343 Applied Linear Algebra**	C	2

Informatics Upper Division

CSE 300 Ethics for the Information Age (proposed) **AND** Global Communities, Societies, and Individuals (GCSI)	C	3
CSE 463 Introduction to Human Computer Interaction	C	3
CSE 485 Computer Science Capstone Project I	C	3
CSE 486 Computer Science Capstone Project II	C	3
CPI 350 Evaluation of Informatics Systems	C	3
CPI 360 Decision Making and Problem Solving	C	3
CPI 310 Web-Based Information Management Systems	C	3

Requirement	Minimum Grade	Credit Hours
IEE 305 Information Systems Engineering	C	3

Informatics Focus Area

Upper Division Informatics Focus Area - Data Science	C	15

- **CSE 450 Design and Analysis of Algorithms**

MFG 390 Advanced Manufacturing Processes Lab	C	1
MFG 391 Materials Characterization Lab	C	1
MFG 490 Measurement and Metrology Lab	C	1
MFG 491 Computer Numerical Control Machining Lab	C	1

Manufacturing Engineering - Upper Division Core

EGR 401 Professional Design Project I	C	3
EGR 402 Professional Design Project II		3
MFG 311 Materials Processing Science	C	3
MFG 385 Design for Manufacturing	C	3
MFG 387 Industrial Automation	C	3
MFG 388 Industrial Robotics	C	3
MFG 461 Engineering Economics	C	3
MFG 480 Advanced Statistical Approaches for Manufacturing	C	3

Manufacturing Engineering Major GPA

Check: Minimum 2.0 Major GPA

Math and Science Requirements, Upper Division Interdisciplinary Studies

CHM 113 General Chemistry I (SCIT)	C	4
CHM 116 General Chemistry II (SCIT)	C	4
HST 318 History of Engineering (HUAD)	C	3
MAT 265 Calculus for Engineers I (MATH)	C	3
MAT 266 Calculus for Engineers II (MATH)	C	3
MAT 267 Calculus for Engineers III (MATH)	C	3
MAT 275 Modern Differential Equations (MATH)	C	3
MAT 343 Applied Linear Algebra	C	3
PHY 121 University Physics I: Mechanics (SCIT)	C	3
PHY 122 University Physics Laboratory I (SCIT)		1

Technical Electives

Upper Division Technical Electives	C	12

- MFG 472 Additive Manufacturing
- MFG 485 Engineering Internship
- MFG 486 CNC Computer Programming
- MFG 494 Special Topics
- CSE 477 Introduction to Computer-Aided Geometric Design

EGR 380 Advanced Computer Aided Design and Drafting (CADD) and Solid Modeling

FSE 394 Topic: Understanding Innovation in Corporate Technology

ASU 101 or College-Specific First-Year Seminar

ASU 101 or college-specific equivalent First-Year Seminar required of all first-year students.

ASU 101-MSN The ASU Experience		1

First-Year Composition

ENG 101 First-Year Composition **AND** **ENG 102 First-Year Composition**		
OR **ENG 105 Advanced First-Year Composition**	C	6
OR **ENG 107 First-Year Composition** **AND** **ENG 108 First-Year Composition**		

Notes

All baccalaureate degree students must fulfill university graduation requirements, including a minimum of 120 credit hours, with at least 45 credit hours in upper-division courses.

All undergraduate students must complete General Studies requirements.

Mathematics Placement Assessment score determines placement in first mathematics course.

Students should work with their academic advisor, and consider course prerequisites, in order to complete all degree requirements in four years.

General Studies designations listed next to courses were valid for the 2026 - 2027 academic year. Please refer to the course catalog for current General Studies designations at time of class registration. General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Manufacturing Systems, BAS

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Applied Science, BAS
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESMFGSYBAS
Minimum credit hours: 120
Upper division minimum credit hours: 45

Requirement	Minimum Grade	Credit Hours
Core Courses		
MSY 301 Smart Factory Essentials	C	3
MSY 330 Demand and Forecasting in Factory Operations	C	3
MSY 350 Lean Manufacturing in Factories	C	3
MSY 402 Manufacturing Systems Capstone Project	C	3
Concentration Courses		
CHM 101 Introductory Chemistry (SCIT) OR PHY 101 Introduction to Physics (SCIT)	C	4
CIS 105 Computer Applications and Information Technology (QTRS)		3
COM 312 Communication, Conflict, and Negotiation (CIVI)		3
MSY 305 Statistical Process Control in Factories	C	3
MSY 309 Factory Data Management	C	3

Requirement	Minimum Grade	Credit Hours
MSY 340 Preventative Maintenance Tools	C	3
TWC 347 Written Communication for Managers		3
TWC 435 Global Issues in Technical Communication (GCSI)		3
Upper Division Technical Electives MSY 320 Piping and Instrumentation Diagrams MSY 335 Industrial Robotics-Vision Integration MSY 360 Materials Characterization MSY 460 3D Factory Simulation MSY 484 Internship	C	12
Students who have not met all ASU general studies and first-year composition requirements with their transfer courses must complete them at ASU to earn the BAS degree.		
Students should work with their academic advisor to review the DARS graduation audit to determine needed requirements.		
AAS Transfer Degree Block of Credit Hours		

Notes

General Studies credit is applied according to the designation the course carries at the time the class is taken.

Curriculum - Materials Science and Engineering, BSE

Catalog Year: 2026 - 2027 **General Studies Gold**
Degree: Bachelor of Science in Engineering, BSE
College/School: Ira A. Fulton Schools of Engineering
Plan Code: ESMSEBSE
Minimum credit hours: 120
Upper division minimum credit hours: 47

Requirement	Minimum Grade	Credit Hours
Materials Science Lower Division		
FSE 100 Introduction to Engineering		
MSE 211 Introduction to Mechanics of Materials	C	3
MSE 212 Microstructure and Properties Lab	C	1
MSE 215 Materials Synthesis		3
MSE 250 Structure and Properties of Materials	C	3
Materials Science Upper Division		
IEE 380 Probability and Statistics for Engineering Problem Solving (QTRS)		3
MSE 330 Thermodynamics of Materials		3
MSE 335 Materials Kinetics		3
MSE 355 Structure and Defects	C	3
MSE 356 Thin Film and Microelectronic Devices Lab		1

Requirement	Minimum Grade	Credit Hours
MSE 415 Mathematical and Computer Methods in Materials		3
MSE 420 Advanced Metallurgical Alloys and Processes		3
MSE 440 Mechanical Behavior of Materials		3
MSE 450 Introduction to Materials Characterization		3
MSE 451 Nanomaterials and Electronics Characterization Lab		1
MSE 457 Quantum Mechanics for Understanding Properties of Atoms and Solids		3
MSE 458 Electronic, Magnetic, and Optical Properties		3
MSE 482 Materials Engineering Design		3
MSE 489 Capstone Design Project I		1
MSE 490 Capstone Design Project II		2

Materials Science Major Electives

Math/Science Elective	3
AST 111 Introduction to Solar Systems Astronomy (SCIT)	
AST 112 Introduction to Stars, Galaxies, and Cosmology (SCIT)	
BIO 130 Introduction to Environmental Science (SCIT)	
BIO 181 General Biology I (SCIT)	

Requirement	Minimum Grade	Credit Hours
BIO 182 General Biology II (SCIT)		
BIO 201 Human Anatomy and Physiology I (SCIT)		
CHM 113 General Chemistry I (SCIT)		
Can only be used if using CHM 113/CHM 116 sequence to complete CHM requirement. Cannot use if taking CHM 114.		
CHM 231 Elementary Organic Chemistry (SCIT)		
CHM 233 General Organic Chemistry I		
GLG 101 Introduction to Geology I (Physical) (SCIT)
