English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio
• contact information of two references
• professional resume or CV
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom: https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login). The applicant also must complete the Graduate College application requirements.

In the letter of intent, the applicant should explain their motivation for applying to the program and describe their future goals in the field, briefly touching on their background and the experiences and qualifications that make them a suitable candidate.

The portfolio should be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can be current or past faculty members, professional mentors, supervisors, or community leaders or elders.

Admission to the program is selective and cannot be deferred. Students are required to enroll in the semester for which they are admitted; otherwise, they must repeat the entire application process to be considered for a future semester.

Admission requirements for the two-year pathway:
Applicants must have completed a four-year Bachelor of Science degree with a major in architectural studies or similar preprofessional degree in architecture. The undergraduate degree must be granted by an institution that is recognized by ASU and offers a National Architectural Accreditation Board-accredited degree program in architecture.

Admission requirements for the three-year pathway:
Applicants must have earned a baccalaureate or graduate degree in any field other than architectural studies.

Additional coursework:
If a student is assigned any additional coursework by the academic unit upon admission, depending on their undergraduate background, they must complete those courses with a grade of "B" or higher before completing the master's program required coursework.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/masters-architecture/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice, as identified by the National Architectural Accreditation Board.
- Distinguish the basic context and framework of diverse cultural and social contexts as they relate to The Design School Imperatives (history, context, program, technology, construction, representation).
- Design a response to social issues, cultural representation, and sustainability concerns through their proficiency in analyzing, discussing, and applying their findings in a professional design and/or presentation.

Career opportunities

Graduates of the architecture program often pursue careers as:

- architects
- building information modeling managers
- contractors
- developers
- energy modelers
- facilities managers
- film and media producers
- politicians or public servants
- professors

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.In the United States, most registration boards require a degree from an accredited professional degree program (https://design.asu.edu/about/accreditation) as a prerequisite for licensure.

Art (Art Education), MA (FAARTEDMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Art program in art with a concentration in art education focuses on issues in teaching and learning from multiple perspectives, including art inquiry, curriculum design, studio practice, visual culture, human development and cultural context. The culminating experience may be conducted in a variety of contexts where art learning takes place, such as K-12 art classrooms, nonprofit organizations, museums and public settings.

In addition to the expansive curriculum, you benefit from the vast resources afforded by a Research I university. You are encouraged to engage with faculty from a variety of departments across ASU. Special initiatives also add opportunities for professionalization and for you to learn from and connect with artists and curators. You are eligible to

apply for a studio space at Grant Street Studios (https://art.asu.edu/about/galleries-and-facilities/grant-street-studios), which is located in the cultural hub of downtown Phoenix and includes a common wood shop, printmaking presses, photography darkroom, ceramics kilns, computer lab and 3D print lab.

The program is further augmented by internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide variety of arts organizations, visiting artist and scholar lectures (https://art.asu.edu/events/visiting-artist-and-scholar-series) and public exhibitions (https://art.asu.edu/events) supported by the School of Art galleries (https://art.asu.edu/galleries), the ASU Art Museum (https://asuartmuseum.org/), the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/) and Pyracantha Press (https://art.asu.edu/degree-programs/printmaking/pyracantha-press). These events and activities offer you the opportunity to develop a working knowledge of the art world, gain an appreciation of contemporary art and culture, and build a professional network of future colleagues. The program is enriched by close proximity to cultural institutions in the Phoenix metropolitan area and nearby regions, such as the Phoenix Art Museum, Scottsdale Museum of Contemporary Art, The Heard Museum and the Los Angeles County Museum of Art.

You should visit the art education areas of study (https://art.asu.edu/degree-programs/art-education) webpage to learn more about the program and the faculty members. If you want to engage the school's creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours, a thesis and a written comprehensive exam (qualifying research proposal)

Required Core (3 credit hours)
ARA 589 Writing Art and Design Criticism (3) or
ARS 586 Theories of Contemporary Art (3)

Concentration (12 credit hours)
ARE 510 Visual Culture Research (3)
ARE 520 Issues in Teaching Inquiry in Art (3)
ARE 530 Issues in Teaching Studio Art (3)
ARE 540 Teaching Art in Cultural Contexts (3)

Restricted Electives (3 credit hours)

Electives (6 credit hours)
special topics on research related to integrating the teaching of studio art, art history and criticism, or aesthetics (6)

Culminating Experience (6 credit hours)
ARE 599 Thesis (6)

Additional Curriculum Information
Before the end of the first semester of coursework (six or more credit hours), a plan of study must be submitted to the Graduate College. Additional program requirements are indicated in the guidelines for the master's degree in art education. Restricted electives and electives should be selected in consultation with the student's program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants should submit:
• graduate admission application and application fee
• official transcripts
• a formal art education research paper for review
• resume
• statement of intent
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must have a bachelor's degree from a regionally accredited college or university and have completed no fewer than 45 credit hours of art, including 12 credit hours of art history and six credit hours of art education. Additional hours may be required by the school.

Applicants must have a GPA of at least 3.00 (scale is 4.00 = "A") in undergraduate coursework for their junior and senior years.

The resume should demonstrate how professional experience will help the student succeed in this program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Design a research study in the field of Art Education.
- Communicate research findings through oral and written communication.
- Situate and articulate original research within historical and contemporary Art Education contexts.

Global opportunities

Global experience: More and more ASU graduate students are pursuing Global Education opportunities (https://goglobal.asu.edu/). Although participating in a Global Education program as a graduate student can present challenges, it can also deepen the educational experience and connect an international opportunity with a student's career aspirations.

Career opportunities

A degree in the arts offers graduates a pathway to a rich and varied choice of careers. School of Art graduates are prepared to initiate creative careers as artists, scholars and educators in the public and private spheres.

A degree in art education provides employment opportunities with charter schools, art museums, nonprofit organizations, and recreational or community-oriented service groups that offer art instruction. Those who also complete the state certification requirements for an art specialist certificate may teach in public and private elementary schools, middle schools and high schools. A master's degree may lead to a higher salary for art educators in some districts, and graduates are well positioned for advancement to administrative positions or doctoral programs. A doctorate is a necessity for employment as a university or college instructor and for some administrative and curatorial positions in the museum and publishing world.

Art (Art History), MA (FAARTHISMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Arts program in art with a concentration in art history is a comprehensive graduate offering that fosters a critical understanding of visual art and material culture, and engages you in a rich and diverse curriculum. Inherently interdisciplinary, art history intersects with a variety of fields, including museum studies, archaeology, anthropology, media and performance studies, gender and ethnic studies, history, literature, philosophy and economics. Faculty members apply critical methodologies in their teaching of art history, encompassing transcultural exchange and technologies of production and reception. Faculty mentor you in the application of theoretical and methodological approaches to scholarly research, advise on your comprehensive literature review, and guide you as you determine your individual contribution to the field, culminating in a master's thesis. You take advanced seminars that engage with critical issues in art history, preparing you to develop your research with a particular focus in the discipline of art history.

In addition to art history courses, the program includes coursework in other disciplines across the university, especially in museum studies. The program is further augmented by internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide variety of arts organizations, visiting artist and scholar lectures (https://art.asu.edu/events/visiting-artist-and-scholar-series) and public exhibitions (https://art.asu.edu/events) supported by the School of Art galleries (https://art.asu.edu/galleries), the ASU Art Museum (https://asuartmuseum.org/), the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/) and Pyracantha Press (https://art.asu.edu/degree-programs/printmaking/pyracantha-press). These events and activities offer you the opportunity to develop your knowledge and appreciation of contemporary art and culture while building a professional network. The program is enriched by close proximity to cultural institutions in the Phoenix metropolitan area and nearby regions, such as the Phoenix Art Museum, the Scottsdale Museum of Contemporary Art and the Heard Museum.

Successful applicants are considered for financial aid in the form of a graduate assistantship position or scholarship.

You should visit the art history areas of study page (https://art.asu.edu/degree-programs/art-history) to learn more about the program and the faculty. If you want to engage the creative community you should subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours, a thesis and a foreign language exam

Required Core (3 credit hours)
ARA 589 Writing Art and Design Criticism (3) or
ARS 586 Theories of Contemporary Art (3)

Concentration (3 credit hours)
ARS 501 Methodologies and Art History (3)

Focus Area Coursework (12 credit hours)
seminars (12)

Electives (3 credit hours)

Research (3 credit hours)
ARS 592 Research (3)

Culminating Experience (6 credit hours)
ARS 599 Thesis (6)

Additional Curriculum Information
This program requires a minimum of 24 credit hours in art history, with at least 12 of these earned in 500-level seminars.

Four courses in the areas shown below are required, and two of these courses must be outside the student's geographical area of specialization:

• ancient
• Asian
• contemporary
• global
• Latin American
• medieval
• modern
• pre-Columbian
• Renaissance

For elective coursework, students may choose to take either 500-level courses in art history or related areas, such as anthropology, history, museum studies or religion, or up to six credit hours of the following omnibus courses:

ARS 584 Internship
ARS 590 Reading and Conference
ARS 592 Research

Students must have a reading knowledge of one research language in addition to English. The selected language needs to be appropriate to the area of research concentration and must be approved by the faculty mentor. This requirement can be met by taking a language for reading knowledge course in the School of International Letters and Cultures with a grade of "B" or higher or by passing the Graduate Foreign Language Examination offered by SILC, which requires a fee.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution. In addition, applicants must have an undergraduate major or minor in art history or at least four upper-division art history courses in which a GPA of 3.00 or higher was maintained.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation.
• one formal research paper for review
• statement of intent
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should be one page and indicate the objectives for graduate study.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will propose original research within their focus area.
- Verbally communicate knowledge in the analysis of images and objects
- Will be able to write a thesis paper up to program capstone standards, which includes the development of a thorough bibliography and the extended examination of a single subject, conceptualized as a research question that engages with their field

Global opportunities

Global experience: More and more ASU graduate students are pursuing Global Education opportunities (https://goglobal.asu.edu/). Although participating in a Global Education program as a graduate student presents distinct challenges, it has the potential to deepen the student's educational experience, connecting a meaningful international opportunity with their career aspirations.

Career opportunities

A master's degree is essential for many professional roles in museums, specialized nonprofit and commercial art galleries, foundations, archives and libraries, and auction houses. It is also important for editorial work and for teaching positions at the community college and university levels. Teaching some specialized high school curricula may require an MA in art with a concentration in art history.

Art (Digital Technology), MFA (FADIGITMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Fine Arts program in art with a concentration in digital technology combines technological and artistic goals and is ideal if you have skills and experience in both realms.

The program is offered by the School of Art in collaboration with the School of Arts, Media and Engineering. The School of Art supplies you with graduate-level courses in digital audio, video, photography, printing, interactive sculpture and rapid prototyping. Graduate courses offered to you by the School of Arts, Media and Engineering focus on topics such as interactive media, sensing and understanding activity, perception and cognition, programming and media installations.

The curriculum provides you with a foundation in contemporary art, a visiting artist and scholar lecture series, professional development workshops, teaching opportunities and pedagogical training. The program fosters your global awareness, civic engagement, social responsibility and collaborative action. Coursework is designed to advance discourse across a variety of fields and shared research interests, including representation, identity, advanced technology, material studies, ecology, sustainability and science.

You gain a foundation in digital media and have hands-on experiences in creating new digital tools. You work closely with faculty to develop knowledge, expand technical skills, and participate with communities to engage in impactful research and sustain a lifelong professional arts practice. You are also provided world-class studio space at Grant Street Studios (https://art.asu.edu/about/galleries-and-facilities/grant-street-studios), which is located in the cultural hub of downtown Phoenix and includes a common wood shop, printmaking presses, photography darkroom, ceramics kilns, computer lab and 3D print lab.

The MFA program culminates in a solo thesis exhibition in one of the four School of Art galleries (https://art.asu.edu/galleries). You can explore prior thesis projects on the School of Art exhibitions (https://art.asu.edu/research/student-work) website.

In this program, you benefit from the vast resources afforded by a Research I university. You are encouraged to engage with faculty across all disciplines and with distinguished researchers from a variety of departments across ASU. You also have access to the vibrant community of museums, galleries, businesses and cultural organizations in Phoenix as well as in nearby Los Angeles, Santa Fe and Denver. Augmenting the curriculum are internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide variety of arts organizations. Special initiatives also add dynamic opportunities for professionalization and for you to learn from and connect with artists and curators. The School of Art galleries, the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/), and the ASU Art Museum (https://asuartmuseum.org/) support a robust schedule of public exhibitions and visiting artist and scholar lectures. These events (https://art.asu.edu/events) offer you the opportunity to develop your knowledge and appreciation of contemporary art and culture while building a professional network.

The MFA program emphasizes collaboration and immersive learning, providing you access to specialized facilities and

collections that offer an invaluable resource for examining the ways in which history has shaped contemporary ways of seeing.

You can visit School of Art advising support (https://art.asu.edu/resources/students/advising) to learn more about the program and connect with graduate coordinators.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and an oral comprehensive exam

Graduate credit is subject to committee approval and includes:

36 graduate studio credit hours in the major areas of concentration; 18 of these credit hours are ART studio classes, and 18 are graduate-level courses in the School of Arts, Media and Engineering
6 credit hours of ART 621 In Practice
6 credit hours of graduate-level art history
6 credit hours of ART 680 Practicum and 6 credit hours of AME 593 Applied Project, leading to either a final exhibition or an applied project

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• an art and digital technology resume
• current resume or curriculum vitae
• portfolio
• statement of intent
• statement and evidence of work demonstrating digital technology skills beyond end user applications
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency via a TOEFL score.

Admission is a two-step process. Although applicants fill out one application through the online graduate application process, they must be admitted to the MFA program and to the Graduate College.

The portfolio must be of 20 images sized with maximum dimension of 1024 pixels; video files of less than 60 MB each;

and an image list that accompanies the portfolio. The method for submission for the portfolio is online via SlideRoom: https://asuherberger.slideroom.com/#/Login (https://asuherberger.slideroom.com/#/Login). Applicants may upload images (.jpg), video (.mov, .wmv, .fly), music (.mp3) or PDF documents.

The statement of intent should not exceed 1,000 words and should address the applicant's artistic interests, reasons for applying to graduate school in general, and the ASU School of Art in particular, and the applicant's professional goals.

The letters of recommendation should be from faculty members with whom the applicant has studied or from recognized professionals in the field. All instructions for the letters of recommendation must be followed when submitting the application to the Graduate College.

Applicants should see the program website for application deadlines.

Prospective students should demonstrate accomplishments in art and technology, particularly in having developed new digital technology for the arts.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply concept development and knowledge of material practice in their focused media area to contextualize their research.
- Demonstrate professional preparedness by developing a comprehensive toolkit for self-promotion that will position them for success in the field of art and design.
- Demonstrate how their cohesive body of artwork fits within the context of the digital and fine art world holistically.

Global opportunities

Global experience: More and more ASU graduate students are pursuing Global Education opportunities (https://goglobal.asu.edu/). Although participating in a Global Education program as a graduate student presents specific challenges, it can also provide a meaningful opportunity to deepen the educational experience and connect an international opportunity with a student's career aspirations.

Career opportunities

Graduates are prepared to initiate creative careers as artists, scholars and educators in the public and private sphere --- a degree in the arts offers students a pathway to a rich and varied choice of careers. Studio art graduates find employment opportunities as artists in the field, selling their works through commercial galleries and commissions, and to private collectors; as museum or gallery professionals, art dealers and directors; as private school art teachers or college professors; and as community-based artists (venues might include health care settings, nonprofit agencies, and local and national public arts organizations). MFA degree holders have the credentials necessary to teach courses in their discipline at colleges and universities. They also are fully prepared to enter the art market or art administration, or to work in other competitive creative fields. Graduates of this program also go on to start their own galleries or small businesses, or exhibit at notable institutions; some have been awarded prestigious grant and residency opportunities. Graduates of the concentration in digital technology are also engaged as technology consultants, freelance artists and technologists, and they join a variety of art and technology collaborations.

A graduate degree is essential for many professional positions. A master's degree prepares individuals to teach at the community college level; to practice and publish as an art critic or writer; to enhance one's own practice as an artist; or

to gain employment in museums, archives, historical societies, art libraries, auction houses, publishing companies and academic presses. A doctorate is a necessity for employment as a university or college instructor and for responsible administrative and curatorial positions in the museum and publishing world.

Art History, PHD (HIARSPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Philosophy program in art history focuses on critical understanding of the aesthetics, production, patronage and reception of art, architecture and design. The program offers classes and opportunities for research across many cultures, geographies and time periods as well as many theoretical approaches and methodologies.

The PhD program offers you a tailored experience to develop critical and creative thinking. Small seminars and lecture courses help you gain expertise in a broad range of methodologies, critical theory and contemporary debates in the field, as well as explore ways to bring about change in the field. Internationally-recognized faculty train you in the fields of modern and contemporary art in global contexts, art of the Americas (including the U.S.), and Asian art, among others. The art history faculty members mentor you in applying theoretical and methodological approaches to conduct original research and to write a dissertation that has lasting benefits for the field.

In addition to art history courses, the program includes coursework in other disciplines across the university, particularly in museum and curatorial practices. The program is further augmented by internships (https://students.herbergerinstitute.asu.edu/creative-career-services/internships) offered by a wide variety of arts organizations, visiting artist and scholar lectures (https://art.asu.edu/events/visiting-artist-and-scholar-series) and public exhibitions (https://art.asu.edu/events) supported by the School of Art galleries (https://art.asu.edu/galleries), the ASU Art Museum (https://asuartmuseum.org/), the Ceramics Research Center and Archive (https://asuartmuseum.org/research-learning/ceramics-research-center-archive/) and Pyracantha Press (https://art.asu.edu/degree-programs/drawing-painting-printmaking/pyracantha-press). These events and activities offer you the opportunity to develop your knowledge and appreciation of contemporary art and culture while building a professional network. The program is enriched by close proximity to cultural institutions in the Phoenix metropolitan area and nearby regions, such as the Phoenix Art Museum, the Scottsdale Museum of Contemporary Art and the Heard Museum.

Financial aid in the form of a graduate assistantship position or scholarship may be available. You should visit the art history areas of study page (https://art.asu.edu/degree-programs/art-history) to learn more about the program and the faculty. If you want to engage with the creative community, you can subscribe (https://art.asu.edu/events/email-list) to the School of Art newsletters and follow the school on social media.

The degree prepares you for a range of professions, including academia, the museum world and publishing.

Additional Curriculum Information
For ARS 591 and elective coursework, students should see their program advisor for a complete list of approved topics and courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution. Examples of related fields include art history, architectural history, design history or fields in the humanities, such as history or literature; archaeology and anthropology may also be considered. Students without graduate experience in the history of art, history of architecture and history of design may be asked to complete additional coursework.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• abstract of proposed research
• personal statement
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current

residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Applicants must submit the personal statement, abstract of proposed research and contact information for three references to Slideroom (https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)). It is required that these be submitted in addition to the Graduate College application requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of this program can pursue careers as:

- appraisers
- archivists
- gallery curators
- museum administrators
- museum curators
- university faculty members

Art, MA (FAARTMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Arts program in art enables you to professionalize and advance your studio art practice. You develop an expert understanding of how a medium of your choosing can be used in the field of contemporary art, while also leveraging the creativity and problem-solving inherent in art practice to inform the rest of your professional life.

This self-paced program consists of 30 credit hours of coursework and culminates in a practice-based thesis project. The coursework consists of graduate-level studio art and seminar courses. Situated between the Bachelor of Fine Arts in art and the Master of Fine Arts in art, the MA is ideal if you are a local student who has already earned a degree in art or a complementary field. You can enter the program from professions as varied as K-12 teacher and project manager.

In addition to the expansive curriculum, you benefit from the vast resources afforded by a Research I university. You are encouraged to engage with faculty across all disciplines and with renowned researchers from a number of departments across ASU. You also have access to the vibrant community of museums, galleries, businesses and cultural organizations in Phoenix and Tempe.

GI Bill® benefits
This reinstated program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education

benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill/. (https://www.benefits.va.gov/gibill/)

STEM-OPT extension eligible: No

Degree requirements

30 credit hours and a portfolio

Required Core (3 credit hours)
ARA 589 Writing Art and Design Criticism (3)
ARS 586 Theories of Contemporary Art (3)

Electives (21 credit hours)

Research (6 credit hours)
ART 592 Research (6)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information
Students complete a total of six credit hours of ART 592. They take one credit hour of this course in each of their first three semesters, with their committee chair or a faculty member from an appropriate discipline. Students take the remaining three credits with their committee chair in their final semester, leading to the culminating group exhibition.

The culminating experience, a portfolio, is a group exhibition of MA students' work in the Harry Wood Gallery in the art building on the Tempe campus. Students create a small body of work --- two to three pieces --- to enter in this show. The portfolio is evaluated by the student's committee for a pass or fail grade.

The 21 credit hours of electives can consist of any lecture, studio, research or seminar class at the 500 or 600 level, or any 500- or 600-level ART or ARA course offered at ASU. Students choose these classes with the help of the graduate program manager and their committee chair to enhance their interdisciplinary investigation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• current resume or CV
• portfolio

• statement of intent
• one letter of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Admission is a two-step process. Although applicants fill out one online graduate application, they must be admitted to both the MA program and the Graduate College.

The portfolio should include a combination of 10 images with a maximum dimension of 1024 pixels and video files smaller than 60 MB each, and should be accompanied by a file list. The statement of intent should be no longer than 1,000 words and describe the applicant's artistic interests, reasons for applying to graduate school in general and the ASU School of Art in particular, and personal artistic goals.

The letter of recommendation should be from a professional colleague within or outside the field of art. Applicants should carefully follow instructions for submitting the letter of recommendation to the Graduate College.

The resume or CV, portfolio, statement of intent and letter of recommendation are submitted online via SlideRoom: https://asuherberger.slideroom.com/#/Login (https://asuherberger.slideroom.com/#/Login). Applicants may upload images (.jpg), videos (.mov, .wmv, .flv), music files (mp3) or PDF documents.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with an MA in art have employment opportunities with charter schools, art museums, nonprofit organizations and recreational or community-oriented service groups that offer art instruction. A master's degree may lead to increased earnings for art educators in some school districts and enable advancement to administrative positions. School of Art graduates are prepared to initiate creative careers as artists, scholars and educators in the public and private spheres. Graduates can apply the skills derived from this degree to other fields, leveraging the creativity and creative problem-solving that are key to art-making.

Art, MFA (HIARTMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Fine Arts program in art offers multiple pathways for you to advance your artistic practice. The program values diversity and creative thinking to advance research. You work closely with distinguished faculty to develop the skills to produce culturally relevant work and sustain a lifelong creative practice. You move across disciplines such as

animation, ceramics, installation, painting and drawing, photography, printmaking, video, textiles, and sculpture while working through conceptual concerns such as social practice, environmental justice, sustainability and emerging technologies. Thematic studios and seminars are offered each semester to support and develop these discourses. The MFA program provides three years of experience as a teaching assistant or instructor of record within the program, allowing you to gain valuable teaching experience while developing a thriving art career. You also benefit from various funding opportunities, including numerous scholarships and awards supporting travel and research.

Upon admittance, all MFA students are provided with the same tuition funding.

The MFA curriculum nurtures material mastery, critical discourse, and interdisciplinary practices, culminating in a solo thesis exhibition in one of the School of Art's professional galleries. You learn from one of the nation's largest MFA faculty composed of nationally and internationally recognized artists. You develop relationships with curators and artists in the region, resulting in alumni showing and being represented by galleries and museums in the Phoenix area after graduation.

MFA Studios at Grant Street
You are provided 24/7 access to world class private studio space at Grant Street Studios, located in the cultural hub of downtown Phoenix. This facility is also home to two galleries and enhanced resources including a common wood shop, printmaking presses, photography darkroom, ceramics kilns, computer lab and 3D print lab. You also have access to the vibrant community of museums, galleries, businesses and cultural organizations. The metro Phoenix area alone includes institutions such as Heard Museum, Phoenix Art Museum, ASU Art Museum, and Scottsdale Museum of Contemporary Art.

Initiatives at ASU, The Herberger Institute for Design and the Arts, and School of Art
In addition to the expansive curriculum, you benefit from a robust Visiting Artist and Scholar Series, professionalization workshops, teaching opportunities and pedagogical training. You also supplement your arts curriculum by taking advantage of the vast resources afforded by a research university, engaging with world renowned researchers and taking courses across disciplines.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and an oral comprehensive exam (defense of MFA exhibition)

Required Core (9 credit hours)
ARA 522 Studio Art Pedagogy (3)
ARS 586 Theories of Contemporary Art (3)
ART 501 Cross-practice Critique (3)

Studio (18 credit hours)
ART 621 In Practice (6)
ARS/ART coursework (12)

Seminar (9 credit hours)
ART 502 Cohort: Field Research (9)
ART 503 Cohort: Strategies in Contemporary Art (3)
ART 504 Cohort: Professional Strategies (3)

Practicum (14 credit hours)
ART 680 Practicum (14)

Research (4 credit hours)
ART 592 Research (4)

Electives (6 credit hours)

Additional Curriculum Information
For studio coursework, students complete six credit hours of ART 621 and 12 credit hours of 500- and 600-level ARS seminar or studio courses. The practicum includes 14 credit hours and results in an MFA exhibition.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 ="A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• current resume or curriculum vitae
• portfolio
• statement of intent
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Admission is a two-step process. Although applicants fill out one application through the online graduate application process, they must be admitted to both the MFA program and the Graduate College.

The portfolio should include a combination of 20 images sized with a maximum dimension of 1024 pixels and video files with less than 60 MB each; it should be accompanied by an image list. The statement of intent (not to exceed 1,000 words) should address the applicant's artistic interests, reasons for applying to graduate school in general and the ASU School of Art in particular, as well as professional goals.

The three letters of recommendation should be from faculty members with whom the applicant has studied or from recognized professionals in the field. All the instructions for letters of recommendation must be followed when submitting them with the application to the Graduate College.

The method for submitting the resume or CV, portfolio, statement of intent, and letters of recommendation is online via SlideRoom: https://asuherberger.slideroom.com/#/Login (https://asuherberger.slideroom.com/#/Login). Applicants may upload images (.jpg), video (.mov, .wmv, .flv), music (.mp3) or PDF documents.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply concept development and knowledge of material practice in their focused media area to contextualize their research.
- Demonstrate professional preparedness by developing a comprehensive toolkit for self-promotion that will position them for success in the field of art and design.
- Demonstrate how their cohesive body of artwork fits within the context of the fine art world holistically.

Global opportunities

Global experience: More and more ASU graduate students are pursuing Global Education opportunities (https://goglobal.asu.edu/). Although participating in a Global Education program as a graduate student can present= challenges, it can also provide a meaningful opportunity to deepen the educational experience and connect an= international opportunity with a student's career aspirations.

Career opportunities

MFA degree holders have the credentials necessary for teaching courses in their discipline at colleges and universities= as well as for entering the art market, working in art administration or other competitive creative fields. Graduates of= this program also go on to start their own galleries or small businesses, exhibit at notable institutions and are awarded= prestigious grants and residency opportunities.

CLO 3D Virtual Fashion Design, Certificate (HICLOGRCT)

College/School: Herberger Institute for Design and the Arts

Campus: Online

Program description

The microcertificate program in CLO 3D virtual fashion design provides students with a comprehensive foundation in= 3D digital patternmaking using CLO 3D, the leading software for virtual garment design and simulation. Students learn= to develop and construct digital garments, create and articulate patterns, and apply sustainable design practices that= reduce material waste in the prototyping process.

Designed for fashion professionals and graduates seeking to advance their technical expertise, this program= emphasizes industry-level concept development and sustainable digital practices. Students gain the skills to integrate= 3D technologies into contemporary fashion production and communication pipelines, positioning themselves at the= forefront of innovation in fashion technology and design.

Degree requirements

9 credit hours

Required Core (9 credit hours)
FSH 531 CLO 3D: Virtual Fashion Design I (3)
FSH 532 CLO 3D: Virtual Fashion Design II (3)
FSH 533 CLO 3D: Virtual Fashion Design III (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in fashion or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master¿s degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/clo3d-fashion-design-graduate/) for program descriptions and to request more information.

Career opportunities

Graduates of this program are prepared for diverse careers spanning fashion, entertainment, technology and digital commerce. By combining creative design fluency with technical CLO 3D proficiency, they are equipped to pursue roles across a wide range of industries in a rapidly evolving global market. Career opportunities include:

- costume visualization artist
- digital asset creator for e-commerce
- digital product developer
- metaverse fashion designer
- sustainability and innovation specialist
- technical designer (3D specialist)
- 3D fashion designer

Composition (Interdisciplinary Digital Media), MM (FADIGITMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

If you have interests and the creative skills to work within a cross-section of the arts and sciences, the Master of Music program in composition with a concentration in interdisciplinary digital media is designed for you. Program offerings extend beyond typical music coursework to allow more opportunities for digital sound and experimental media projects, and allow you to be actively involved in current developments in the field of media and digital culture.

There are state-of-the-art media facilities, hybrid arts-engineering faculty and courses in electronic music with relevant resources. You're encouraged to develop your own compositional voice and focus on your area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with the composition faculty.

You have multiple performance opportunities each year, including collaborations with student performers; readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the ASU Wind Ensembles and Philharmonia Orchestra; commissions for the PRISMS Contemporary Music Festival; and collaborations with student animators, filmmakers and dancers.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours including a thesis and a written comprehensive exam, or
32 credit hours including a thesis, a written comprehensive exam and an oral comprehensive exam, or
32 credit hours including a written comprehensive exam and the required applied project course (MTC 593), or
32 credit hours including a written comprehensive exam, an oral comprehensive exam and the required applied project course (MTC 593)

Required Core (6 credit hours)
MTC 523 Advanced Composition (2-3)

Concentration (18 credit hours)
Arts, Media and Engineering coursework (9)
Music Theory and Music History (9)

Electives (2 credit hours)

Culminating Experience (6 credit hours)
AME or MTC 599 Thesis (6) or
MTC 593 Applied Project (6)

Additional Curriculum Requirements
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance, and Theatre. MTC 523 is offered for two to three credit hours each semester. Students repeat MTC 523 until they have completed six credit hours.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country and officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of a student's first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume and personal statement
• official transcripts
• prescreening portfolio
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Although a bachelor's degree in music is not required to be eligible for admission, applicants who do not hold an undergraduate degree in music may wish to take foundational courses in music theory and history as recommended by their advisor.

Students should see the program website for application deadlines. After the School of Music, Dance and Theatre receives the complete application (this includes recommendation letters, transcripts and English proficiency requirements) and it is reviewed by the department, the applicant may be invited for an interview (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Evaluate specific musical products within the context of a specific historic or cultural tradition, including contemporary media.
- Create independent musical products or performances using interdisciplinary digital media.
- Apply software engineering skills to music, sound and video.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching, advocating for the arts, and serving as therapists are in high demand across many sectors. They are welcomed in many industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games or television
- performing musician
- public or community school teacher
- university professor

Composition, MM (FAMCOMPMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in composition is a comprehensive professional degree offering for you if you are an outstanding student of acoustic, electronic or multimedia composition.

You develop your own compositional voice and focus on your area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with faculty members.

You have multiple performance opportunities, including readings by the Symphony Orchestra and visiting ensembles; yearlong residencies with the ASU Wind Ensembles and Philharmonia Orchestra; commissions for the PRISMS contemporary music festival; and collaborations with student performers, animators, filmmakers and dancers.

The program provides extensive faculty interaction and opportunities to develop advanced skills in compositional techniques from a wide variety of styles and traditions, with emphasis on fostering your personal approach to composition. Through collaborations with music scholars, theorists, performers, educators and other composers, you develop a broad and well-rounded foundation for advanced careers in music.

Although a bachelor's degree in music is not required to be eligible for admission, applicants who do not hold an undergraduate degree in music may wish to take foundational courses in music theory and history, as recommended by their advisor.

Applicants should see the program website for application deadlines. After complete application materials (including recommendation letters, transcripts and proof of English proficiency) are received and prescreening materials are reviewed, an applicant may be invited for an interview (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Critique compositions in a variety of styles, applying theoretical understanding of compositional techniques.
- Create an original portfolio that synthesizes principles of composition.
- Interpret specific musical products within the context of a specific historic or cultural tradition.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching and advocating for the arts are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries and community arts organizations. Skills such as creativity, collaboration, innovation and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide variety of companies and professions.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games or television
- performing musician
- public or community school teacher
- university professor

Music (Conducting), DMA (FACONDDMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Doctor of Musical Arts program in music with a concentration in conducting, you have the opportunity to improve your art, craft and scholarship while you become well versed in multiple areas of conducting.

You take several common courses regardless of emphasis and become acquainted with the repertory and conducting issues for each medium. Coursework emphasizes a thorough knowledge of repertory, historical and analytical issues; an understanding of efficient, effective rehearsal technique; and clear, expressive conducting technique. You receive considerable individual attention and have regular opportunities to rehearse and to conduct a variety of ensembles.

This program has three tracks:

Choral conducting --- You expand your expertise in global, intercultural approaches to communal vocal musicking and work to integrate this into your pedagogy and rehearsal process. Score study integrates musical, textual and socio-critical analysis, enabling you to gain insights into the unique interpretive demands of each work. Gestural study regards integrated approaches of Western ideals of conducting with Laban movement principles, diverse dance forms and body mapping. You receive a plethora of podium time, both as primary conductor of ASU choral ensembles and as assistant conductor for faculty-led ensembles.

Orchestra and opera conducting --- You work closely with the director of orchestras and the artistic director of the music theatre and opera program, and gain a breadth of experience in both orchestral and opera conducting. Time in front of an ensemble is essential; therefore, you have significant podium time and twice-weekly studio chamber orchestra classes. You study conducting technique, rehearsal technique, leadership, interpretation, score study, audience development and outreach, and career development.

Wind band conducting --- You study privately with the director of bands and work closely with other members of the conducting faculty to develop your conducting and rehearsal skills. You are trained in the artistic, technical, physical and leadership skills required of successful conductors at the professional and post-secondary levels. Intensive coursework in conducting, score study, analysis, musicology and theory is combined with regular opportunities to conduct university ensembles. If interested, you also have opportunities to enhance your work with athletic bands and, if desired, may elect individual study with the director of athletic bands. Furthermore, you may select integrated conducting as your cognate, allowing for in-depth work in a second conducting area.

The doctoral program lecture recital is a performance with the top pool of wind and percussion players in the School of Music, Dance and Theatre and includes a repertoire chosen from the complete body of wind band and chamber wind literature.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a written comprehensive exam, an oral comprehensive exam and a research paper

Conducting Core (18 credit hours)

Specialty Courses (9 credit hours)

Electives (9 credit hours)

Cognate (integrated conducting, instrumental performance or music learning and teaching) (9 credit hours)

Music History and Music Theory (21 credit hours)

Recitals and Research (24 credit hours)

Other Requirement
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before course enrollment in the School of Music, Dance and Theatre.

Additional Curriculum Information
Thirty credit hours from a master's degree may be applied toward the 90 credit hour degree requirement. Once admitted to the program, a student is required to be enrolled continuously, excluding summer sessions, until all requirements for the degree have been fulfilled. In general, the student should expect to spend at least the equivalent of three academic years beyond the bachelor's degree in the program. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Students can find additional information on requirements for this degree on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution. Students seeking admission typically hold a Master of Music. Applicants with other degrees are considered if they have received graduate training similar to that normally expected in a MM program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• official transcripts
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume and personal statement; also, from choral applicants, an uploaded writing sample
• prescreening video
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Students should see the program website for application deadlines. An applicant may be invited for a live audition after complete application materials have been received, including recommendation letters, transcripts and English proficiency requirements, and prescreening materials have been reviewed. Applicants can find information on the audition on the School of Music, Dance and Theatre auditions page (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Synthesize performance practices in the context of diverse musical settings and genres.
- Evaluate specific conducting repertoire and pedagogy to support a unique and professional musical style.
- Implement an independent research project that makes a unique contribution to the discipline of music performance.

Career opportunities

School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching and researching; in arts advocacy; and in music therapy are in high demand across many sectors. They are welcomed in many industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide variety of companies and professions.

Career examples include:

- artistic director
- arts administrator
- community arts advocate
- performing musician
- public or community school teacher
- university professor

Creative Enterprise and Cultural Leadership, MA (HICECLMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

In this program, you can be a changemaker and innovator working toward more a just and sustainable future that connects art and design to society.

The Master of Arts program in creative enterprise and cultural leadership has a particular emphasis on impact and place, looking at how art practice intersects with the social, political, economic and other structures that shape communities. This cross-disciplinary, collaborative program merges theory and practice in arts management, civic practice, creative placemaking, leadership and the management of innovation in the expanded creative fields.

The program offers classes that mix theory and practice through applied learning in collaboration with a range of community, nonprofit, business and public sector partners. Local and national leaders engage with you in classes, site visits and collaborative projects. The program culminates with a capstone applied project that can take the form of research or the launch of a new project.

In addition to core classes, you select additional focused coursework to advance your own professional goals and interests. The program offers several areas of curricular emphasis including creative placemaking and placekeeping, civic practice, cross-sector work and new business models.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Music, BA

Film (Film and Media Production), BA

Film (Filmmaking Practices), BA

Environmental Design, BS

Art (Art History), BA

Media Arts and Sciences, BA

Art (Museum and Curatorial Practices), BA

Theatre, BA

Arts (BA in the Arts), BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (HDA 593)

Required Core (12 credit hours)
GRA 501 Creative Environment and Collaborative Leadership (3)
HDA 511 Purpose, Collaboration and Accountability (3)
HDA 514 Creativity and Impact, Opportunities for Change (3)
IVD 560 Innovation Studio I: Discovery and Insight (3)

Electives (3 credit hours)

Focus Area Coursework (9 credit hours)

Culminating Experience (6 credit hours)
HDA 593 Applied Project (6)

Additional Curriculum Information
For electives, students may choose from a list of approved courses or choose their own with advisor approval.

For focus area coursework, students select three classes from a curated list of options that intersect with the MA in

creative enterprise and cultural leadership's core themes of entrepreneurship, social impact and urban futures, and nonprofit and policy.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's degree in an arts, design, business, public policy or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• example of academic or professional work
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, work samples, resume or CV, and contact information for professional references be submitted via SlideRoom in addition to the Graduate College application requirements. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants are required to express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program, and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

Applicants are required to submit an example of academic or professional work that demonstrates, within a maximum of 30 pages, the ability and potential to be successful in the program. Following are examples of appropriate submissions:

• business plan for a new or existing enterprise
• critical essay from previous academic work
• critical essay for professional audiences
• curatorial materials
• marketing materials designed or written by applicant
• material produced for professional creative practice
• other professional or technical writing relevant to the creative industries

Applicants must submit contact information for two professional references. These can come from current and past faculty, professional mentors, supervisors, or community leaders and elders. Admission to the program is selective.

Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year for which they are applying.

An online interview may be held for applicants who reach the final stage of consideration for admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate challenges to and opportunities for success in the creative industries emphasizing impact and place, and the intersection of art practice and social, political, economic, and other structures that shape communities
Apply design thinking to the development of creative enterprises including arts management, civic practice, creative placemaking, leadership, and the management of innovation in the expanded creative fields.
Foster collaborative relationships that support dynamic co-creation in art and design learning and constructive outcomes in systems creation.

Career opportunities

Using arts and design-based methods to advance a spectrum of enterprises, graduates are equipped to pursue positions such as:

arts managers
civic leaders
cultural entrepreneurs and business leaders
cultural producers

Dance (Interdisciplinary Digital Media and Performance), MFA (FADANDIMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

This program is not currently accepting applications.

Program description

The Master of Fine Arts program in dance with a concentration in interdisciplinary digital media and performance is typically completed during three years of residency.

The program offers you the chance to be a part of a select group of graduate students with a rigorous and in-depth opportunity to specialize in dance and transdisciplinary technology. Classes and research activities offered by The Game School; the Herberger Institute experience; and the School of Music, Dance and Theatre provide the springboard for you to advance your practice and research. If you have a transdisciplinary and cross-cultural approach, are self-motivated, have clear and demonstrated objectives, and are willing to explore new possibilities in the field of dance and beyond, this program is are ideal.

You develop creative work, scholarship and research that represents your unique perspective as a creative, thinker, teacher and arts advocate. Frequent showings are required for degree completion.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and a portfolio

The degree program involves three years of residency:

a final MFA portfolio (8 credit hours)
a written document
an oral defense
required coursework in the concentration taught by the School of Arts, Media and Engineering (18 credit hours)
electives (15 credit hours)
required courses in the School of Music, Dance and Theatre (19 credit hours)
ongoing showings of work

The current MFA program is completed during three years of residency in the School of Music, Dance and Theatre. Ongoing showings of creative work are required. Foundational coursework is offered in areas of creative practice, movement practices, professional development, technology and theory.

Students enrolled in the program specialize in areas related to independent research. The MFA portfolio acts as the culminating experience for the program and may involve producing original choreography or presenting a lecture demonstration on a body of research. Completing the process are a presentation, a final written document that is reflective in nature, and an oral defense.

Additional information on requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre application (https://apply.mdt.asu.edu/) including a personal statement, teaching sample, recent creative work and a current resume
• letters of recommendation
• proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

All applicants should thoroughly review the application materials and deadlines on the school's admission website (https://musicdancetheatre.asu.edu/admission).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students will be able to apply advanced knowledge of media applications to live dance performances, installations and alternative creative outputs.
- Students will implement relevant practical and theoretical frames for the creation, performance, embodied experience and teaching of dance.
- Students will develop creative and movement inquiry and research processes relevant to dance and digital media.

Career opportunities

Graduates have the opportunity to work in a variety of settings and industries, including higher education, digital media and arts programs, media production companies, commercial dance venues, arts organizations, dance production, and performance settings. For some, the degree serves as preparation for the study of dance or other disciplines at the Doctor of Philosophy level.

Dance interdisciplinary media artists are empowered to secure employment at diverse international venues and events, and many work abroad as independent multimedia artists and performers, digital media consultants and specialists. In addition to working in traditional performance spaces and venues, dance media artists are finding employment opportunities in rapidly evolving global digital performance and entertainment spaces.

Opportunities may include positions that involve:

- choreography, dance film or installation art
- community and social engagement
- curation and archives
- dance lighting, stage production, sound design and technology
- education
- research and scholarship
- interactive performance art
- intermedia specialist
- performing artist and entrepreneurship
- research and scholarship

Dance Teaching Artist Praxis, Certificate (HIDTAPGRCT)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

This certificate program equips you with practical and theoretical knowledge, skills and credentials that deepen your understanding of dance pedagogy. You engage in a mix of studio-based courses, seminars and experiential learning to fully explore and scaffold appropriate teaching practices for dancers of any age and skill level.

When you complete the dance teaching artist praxis certificate, you fulfill the coursework requirements necessary to obtain a Provisional Arts Education pre-K-12 certificate in dance from the Arizona Department of Education. You also gain qualifications and credentials required for developing and teaching university teacher preparation courses and training programs, as well as the skills and perspectives necessary to work effectively as a teaching artist in diverse sociocultural and learning contexts.

STEM-OPT extension eligible: No

Degree requirements

28 credit hours and a portfolio

Required Core (16 credit hours)
DCE 530 Somatic Movement Inquiry I (3)
DCE 531 Somatic Movement Inquiry II (3)
DCE 554 Teaching Praxis I: Postsecondary Teaching Philosophies, Foundations and Practices (3)
DCE 654 Teaching Praxis II: Theories, Contexts, Populations, Psychomotor Development and Curriculum Design (3)
DCE 656 Teaching Praxis III: Secondary Practices and Teacher Preparation Course Development/Implementation (4)

Other Requirements (12 credit hours)
DCE 680 Dance Practicum (12)

Culminating Experience (0 credit hours)
written portfolio (0)

Additional Curriculum Information
Students must submit the written portfolio culminating experience in the last semester of enrollment in the certificate program.

Additional information on degree requirements is available on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a minimum of a master's degree in dance or a related field from a regionally accredited college or university or have successfully completed their first semester of the ASU Master of Fine Arts program in dance.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program or in the ASU MFA program in dance at the time of their application submission.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letters of recommendation
• School of Music, Dance and Theatre application (https://apply.mdt.asu.edu/)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted to a graduate degree program before being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for this program.

Applicants who are currently enrolled ASU students are not required to submit letters of recommendation.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design pedagogical approaches and curricular content for university or professional teacher preparation courses.
Implement pedagogical approaches and curricular content for pre-K--12 dance education courses.

Global opportunities

Global experience: Study abroad is possible for graduate students. There are more than 50 program opportunities (https://goglobal.asu.edu/), with programs on every continent. Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Career opportunities

Dance artists and educators who complete a dance teaching praxis graduate certificate are credentialed to work as dance teaching artists, K-12 dance educators, higher education dance professors specializing in teacher preparation, and dance pedagogy scholars. Graduates can work across a number of sectors, including public and private K-12 schools; higher education institutions; and local, national and international dance communities and organizations, as well as in dance studio settings.

Career examples include:

community arts facilitator
community engagement and social activist artist
dance education researcher or scholar
dance studio owner
K-12 dance educator
K-12 performing arts administrator

performing arts curriculum and program developer
social engagement practitioner
somatics educator
teaching artist
university dance professor and teacher preparation specialist
wellness instructor

Dance teaching artists are successful in securing employment in diverse international venues and events, such as working abroad as resident dance teaching artists, dance educators and performers. Teaching artists have employment opportunities all over the world.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Dance, MFA (FADANCEMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Fine Arts program in dance is typically accomplished during three years of residency.

The School of Music, Dance and Theatre is an environment of inclusive excellence wherein you grow as an artist, educator and scholar. The MFA in dance program welcomes you as a returning dance professional, experienced and interested in creative practices, somatics, teaching praxis, technology, community engagement, practices of equity and inclusion, professional partnerships, scholarship, arts advocacy, theoretical study and inquiry. If you have a approach that is transdisciplinary and cross-cultural in nature, you are self-motivated, and you have clear and demonstrated objectives, you are ideal for this program.

The program encourages in-depth study through a variety of dance practices and related fields. You develop creative work, scholarship and research that represents your specific perspective as a creative, thinker, teacher and arts advocate. Frequent showings are required for degree completion.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and a portfolio

Students in the MFA program in dance take coursework in dance and related fields that have been designed to provide a broad and fundamental preparation for future careers. Opportunities on and off campus further develop the knowledge and skills students need to become leaders in the dance community through teaching, performing, creating, and engaging in scholarship and arts advocacy.

The MFA portfolio in dance serves as the culminating experience in the graduate dance curriculum. The portfolio takes

into consideration the student's future goals and serves as a bridge to careers beyond graduate school.

Additional information on requirements for this degree is available on the curriculum check sheet on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre application (https://apply.mdt.asu.edu/), including a personal statement, teaching sample, recent creative works and a current resume
• letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

All applicants should thoroughly review the application materials and deadlines on the program admission webpage (https://musicdancetheatre.asu.edu/admission).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Develop relevant practical and theoretical frames for the analysis and teaching of dance.
> Develop creative and movement inquiry and research processes relevant to their chosen area of focus.
> Create new artistic work, practices, or research and processes in core areas of interest, including dance performance and creative practice, somatic inquiry, teaching praxis, technology, scholarship, and socially and community engaged practice.

Career opportunities

Graduates continue in the profession in a variety of settings and industries, including dance in higher education, commercial dance venues, arts organizations, community and wellness programs, professional dance companies, and

stage production settings. For some, the degree serves as preparation for the study of dance or other disciplines at the Doctor of Philosophy level.

Graduates are empowered to secure employment at diverse international venues and events, and many work abroad as dance artists and educators. Global opportunities include university, professional or dance festival instruction; professional and community choreography creation; professional dance company performance; or independent artistry. Graduates have a number of full- and part-time employment opportunities around the world.

Opportunities may include work with:

arts programming, grant writing and development
choreography, dance, film or installation art
community and social engagement
dance curation
education
entrepreneurship
performance
research, scholarship and curricular development
somatics

Design (Experience Design), MSD (HIDEDMSD)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Mesa City Center

This program is not currently accepting applications.

Program description

In the Master of Science in Design program with a concentration in experience design, you focus on design practices for virtual experiences in extended reality technologies, including environmental design, programmatic in both real and virtual universes, rapid prototyping, storytelling and world-building. This program is distinct among emerging media programs with its application of these technologies and practices in socially engaged and transdisciplinary modalities. You learn to take tools that evolved primarily from and for entertainment and applies them to the modeling of authentic challenges and futures.

You develop human-centered design methods to improve user experience using theories and concepts from cognition and psychology, in addition to developing the ability to manage projects, work effectively in teams, and transform research into creative and technological products.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Art (Animation), BFA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

DSC 599 Thesis (6)

Additional Curriculum Information
In the concentration coursework, HDA 581 should be taken three times for one credit hour.

For other requirements, students must complete a minimum of four credit hours of faculty-led research (DSC 592), individualized instruction (DSC 590), the design and implementation of public programs (HDA 580), or an internship (DSC 584).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in design and media arts or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee

• official transcripts
• letter of intent
• portfolio
• contact information of two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom in addition to the Graduate College application requirements. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

The portfolio should be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can come from current and past faculty members, professional mentors, supervisors, or community leaders and elders.

Admission to the program is selective. Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they need to go through the entire application process again for the year for which they are applying.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate human experience needs and wants using immersive concepts and technologies.
Apply their understanding and practice of design, storytelling, and worldbuilding through a design proposal that utilizes immersive technologies to addressing problems, challenges and obstacles.
Develop solutions to real-world challenges through collaboration with interdisciplinary, transdisciplinary, and multi-stakeholder partners.

Career opportunities

Graduates of this program are well prepared for careers in a variety of fields related to the application of immersive experience design and extended reality technologies and practices.

Virtual and augmented reality have practical and popular applications in entertainment, gaming, workforce development and research, but graduates of this program also had direct experience with the application of these tools to other areas that can expand their available pathways: architecture, interior design, urban planning, health care and education, among others. They are ideally suited for the rapidly changing climate of this field.

Career opportunities include:

architects and interior designers
experience designers
film and video editors
graphic designers
mobile developers
software developers
3D modelers and visualizers
web developers

Design (Space Architecture and Extreme Environments), MSD (HIDSCSMSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

If you are passionate about pushing the boundaries of design and engineering to shape the future of human habitation beyond Earth, the Master of Science in Design program with a concentration in space architecture and extreme environments at The Design School is for you. This interdisciplinary program breaks conventional barriers and connects learners to the emerging space sector through innovative partnerships.

You investigate how to live on another planet while discovering ways to improve lives on Earth. Through a curriculum that emphasizes innovation, research and hands-on projects, you explore human factors in space, limited resource utilization, microgravity effects and psychological well-being in extreme environments. You learn in state-of-the-art facilities and have access to pioneering experts in the fields of space architecture and extreme environments.

You are prepared for a rewarding career in designing alternatives for humanity to live, work and thrive in space. It involves exploring, learning and adapting to extreme environments to design habitats, structures and systems for an interplanetary future. Working collaboratively with people across disciplines and delving into ASU's broader space initiatives, you contribute to designing an inclusive and sustainable pathway to space with humans at the center.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

36 credit hours and a thesis, or
36 credit hours including the required applied project course (DSC 593)

Required Core (3 credit hours)
DSC 501 Qualitative Research in Design (3)

Concentration (6 credit hours)
DSC 550 Prototyping Futures (3)
IND 544 Human Factors Systems and Documentation (3)

Research Methods (3 credit hours)
DSC 500 Research Methods (3)

Electives (15 credit hours)

Research (3 credit hours)
DSC 592 Research (3)

Culminating Experience (6 credit hours)
DSC 593 Applied Project (6)
DSC 599 Thesis (6)

Additional Curriculum Information
A wide variety of elective options are offered by The Design School and collaborating units, enabling students to tailor their education to align with their research interests and career objectives. Students may also explore other elective courses from affiliated schools with approval. As part of these elective opportunities, students may take nine credits of the elective core or pursue a certificate at the Media and Immersive eXperience (MIX) Center, either as part of a focus area in immersive technologies or through the digital twin microcertificate.

In alignment with students' academic and professional aspirations, the culminating experience gives students the flexibility to choose between a traditional thesis and an applied project. The applied project is an opportunity for hands-on experience in solving practical challenges within extreme environments.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in architecture, engineering, environmental design, interior design, urban planning or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• design portfolio
• contact information for two references
• professional resume or CV

• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English is required to provide proof of English proficiency regardless of current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom; the applicant also must complete the Graduate College application requirements. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should explain their motivation for applying to the program and their goals in the field, briefly describing their background and the experiences and qualifications that make them a suitable candidate.

The design portfolio must be a curated collection of a candidate's design works, projects and creations. It should visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can be current or past faculty members, professional mentors, supervisors, or community leaders or elders.

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they must submit another application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze complex spatial challenges in space architecture and extreme environments, leveraging knowledge from technology and media applications relevant to the field.
Develop a thesis or design proposal utilizing both traditional and digital media technologies, applying their understanding and design practice to address challenges in extreme environments.
Develop innovative solutions for sustaining life and designing habitats in space and extreme environments through transdisciplinary, multi-stakeholder collaboration and the application of scientific and technological knowledge.

Career opportunities

Graduates are prepared to pursue careers as:

space architects
space artists
space eco-tourism consultants
space industry analysts
space industry consultants
space industrial designers
space interior designers
space tourism experience designers
space visual graphic designers

Graduates can specialize for roles specific to the aerospace industry, such as:

aerospace entrepreneur
environmental control and life support systems designer
environmental impact assessor
environmental scientist
extraterrestrial habitat designer
planetary designer
science communicator

They also have the skills to work outside the space industry as:

educators
human factors specialists
materials scientists
sustainable design consultants
urban space planners

Admission deadlines (https://design.asu.edu/admission)

Design (Visual Communication Design), MSD (ARVCDMSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science in Design degree program with a concentration in visual communication design at The Design School offers you advanced studies in visual language, history, theory, criticism and methodology, design processes, and technology.

Through a specialized research and design skills curriculum, you develop an understanding of contemporary graphic design issues.

STEM-OPT extension eligible: No

Degree requirements

36 credit hours and a thesis, or
36 credit hours including the required applied project course (DSC 593)

Students may choose to complete their graduate work by way of a thesis or an applied project.

A master's degree thesis is a scholarly endeavor that demonstrates the author's ability to do supervised research and intellectual writing.

The applied project, different from a thesis, includes a project and a written document. Through this scholarly endeavor, the designer both demonstrates the ability to do supervised research and presents substantial evidence of their ability to apply research creatively to a design situation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• portfolio
• letter of intent
• resume
• contact information for two references
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students are required to submit proof of English proficiency through either the TOEFL or the IELTS if their native language is not English.

When applying for admission, applicants must declare an MSD concentration (such as this visual communication design concentration). Students should see the department website for an approved list of graduate programs.

The portfolio, letter of intent, resume and contact information for two references must be submitted via SlideRoom (https://asudesign.slideroom.com (https://asudesign.slideroom.com/#/Login)). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise they must submit another application for the year in which they are applying.

GRE scores are not required.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Engage in scholarly field inquiry involving the language and research of visual communication design.
Disseminate the results of their thesis or applied project research in a public forum.
Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career opportunities

Graduates are prepared for a career in graphic design education or for advanced design professions.

Design, Environment and the Arts (Design), PHD (HIDEADSPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Philosophy in design, environment and the arts with a focus in design is a flexible, interdisciplinary program prepares you with the experience, skills and framework you need in order to become a competent researcher, scholar, innovator, visionary and leader in the various disciplines of design, environment and the arts.

Broad in scope, the program involves interdisciplinary research interests at both the micro- and macro-scales of design, environment and the arts. You are able to study architecture, industrial design, interior design, landscape architecture, visual communication design, urban design and related disciplines. There are opportunities for research specialization in areas such as:

• global health and human factors
• history, culture, theory and philosophy
• social justice, placemaking and placekeeping
• sustainability and resilience
• technology, innovation and entrepreneurship

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
EPD 700 Research Methods (3)
EPD 710 Current Research in Design (3)

Concentration (9 credit hours)
DSC 594 Conference and Workshop (3)
EPD 791 Seminar (3)
GRA 501 Creative Environment and Collaborative Leadership (3)

Other Requirements (12 credit hours)
EPD 590 Reading and Conference (3)

EPD 790 Reading and Conference (9)

Research (12 credit hours)
EPD 792 Research (12)

Electives (33 credit hours)

Culminating Experience (12 credit hours)
EPD 799 Dissertation (12)

Additional Curriculum Information
Students must take all three courses from the list of concentration courses above. Other courses as relevant coursework should be taken as Electives with approval of the supervisory committee. When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in a closely related field from a regionally accredited institution. Examples of appropriate fields include art history, architectural history and design history. Fields in the humanities such as history, literature, archaeology and anthropology also may be considered. Students without graduate experience in the history of art, history of architecture and history of design may be asked to fulfill deficiencies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GRE scores
• letters of recommendation
• professional resume
• personal statement
• abstract of proposed research
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

Applicants must submit the personal statement, abstract of proposed research and contact information for two

references to Slideroom (https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)). It is required that these be submitted in addition to the Graduate College application requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Synthesize iterative ideas and design concepts into deliverables that meet the professional standards in design, environment and the arts sectors.
> Disseminate the results of their design, environment and the arts research in a public forum.
> Effectively use theories and concepts in design, environment and the arts for critical analysis of real-world problems in their respective fields.

Career opportunities

Graduates pursue university teaching and research careers in design, environment and the arts fields. Others have careers leading planning and design firms or are engaged in business, industry, government and advocacy careers.

Design, Environment and the Arts (Digital Culture in Design), PHD (HIENVDGPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications to this program.

Program description

The Doctor of Philosophy program in design, environment and the arts with a concentration in digital culture in design focuses on the role of computational systems in enhancing creativity and the quality of human design. In the program, you learn to be a thinker as well as a doer; you discover how to question the existing paradigms that govern the digital world as they impact design and the arts; you learn to analyze systematically how digital tools affect the way designers and artists think, conceptualize, create and evaluate their designs and artwork; and, as a result, you are able to come to a unique synthesis, leading the way in these fields.

This concentration program primarily explores the impact of digital culture on how built environments, products and visual communications are designed and analyzed by design professionals and are utilized by their intended audience. You learn how to systematically question existing paradigms and ontologies of digital tools, evaluate the new paradigms that emerge as a result of digital culture, and propose new frameworks for design disciplines. Issues such as user interface design for new products, computer simulation of the performance of buildings and products, the effects of digital tools on architectural form giving, digital design processes, better incorporation of human factors into design tools, usability and interaction design are some examples of faculty expertise and areas of focus.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
EPD 700 Research Methods (3)
EPD 710 Current Research in Design (3)

Required Concentration (12 credit hours)

Other Requirements (30 credit hours)
a previously awarded master's degree or approved relevant coursework (30)

Research and Approved Electives (24 credit hours)

Culminating Experience (12 credit hours)
EPD 799 Dissertation (12)

Additional Curriculum Information
Students must be thoroughly familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program. Up to 30 credit hours from a previously awarded master's degree can count toward the requirements of the doctoral program.

Of the 54 credit hours remaining after the master's degree, 12 must be dissertation credit and 12 may be research. These 24 credit hours plus the remaining 30 credit hours must be completed after admission to the program. No transfer credits are allowed to fulfill the 54 credit hour minimum requirement completed after admission to the program.

The student is required to take 12 credit hours in the concentration and a minimum of nine credit hours of specialized coursework outside the concentration; a minimum of six credit hours in current research and research methods is required.

Each student entering the program is required to submit a plan of study during the first year.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in the field of architecture, graphic design, industrial design, interior design, landscape architecture, arts media or engineering from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GRE scores

• three letters of recommendation
• a statement of purpose summarizing career objectives and the reasons for pursuing doctoral education
• an indication of proposed area of concentration (design, history, theory and criticism; digital culture in design; or health care and healing environments)
• an indication of a potential mentor
• a sample of sole-authored written work in English or any other evidence relevant to admission to the program (i.e., master's degree thesis, research paper or published articles)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Admission to doctoral programs in The Design School requires a minimum TOEFL iBT score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; a minimum IELTS overall band score of 7.0; a minimum PTE score of 65; a minimum Duolingo English Test score of 115; or a minimum Cambridge English exam score of 185.

International applicants who are interested in receiving funding as teaching assistants must take the Speaking Proficiency English Assessment Kit, administered at ASU and become certified. Additional information is available on the department website.

ASU does not accept the GRE® General Test at home edition.

Students are admitted to the program only upon completion of a degree in architecture, graphic design, industrial design, interior design, landscape architecture or fine arts, or upon the demonstration of equivalent standing. Applicants must be familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program.

The letters of recommendation preferably would be academic, although they could be professional. Applicants are to provide the names and contact information of three recommenders at the time of their online application. Recommenders receive an email with a link to the online letter of recommendation to complete. Applicants are able to see which recommenders have already completed their recommendation by logging into the My ASU system and viewing their To Do list. Once a recommender has submitted the letter of recommendation, the recommender's name is removed from the To Do list. All letters must be in English.

Applicants should identify a proposed research topic or list of possible topics that aligns with the research mission of the program and the research interests of faculty.

Applicants must have identified a doctoral program faculty member who has agreed to serve as a mentor. The faculty mentor should be from the Herberger Institute for Design and the Arts. Students should introduce themselves by email to the faculty members who they feel have related research interests and to inquire about their availability to be mentors.

The application is considered incomplete if any of the application items is missing.

The doctoral executive committee evaluates the applications and supporting materials. Admission decisions are based on the ability of the potential mentor to devote time to the student; the compatibility of the applicant's career goals with the purpose of the degree program; GRE scores; previous academic training and performance; recommendation letters; and the research mission of the institute and the research interests of faculty. The recommendations of the committee are forwarded to the program director for approval. Upon the written recommendation from the program director, the dean of the Graduate College notifies all applicants in writing of the admission decision.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Design, Environment and the Arts (Healthcare and Healing Environments), PHD (ARENHHEPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

In the health care and healing environments concentration under the Doctor of Philosophy program in design, environment and the arts, you focus on the integration of evidence-based design, sustainable science and best practices benchmarks when planning health care facilities. Facility-related responsibilities supported by this area cluster into seven functional work units:

• facilities analysis (physical and environmental)
• human factors and user needs
• interior planning and design
• programming (long-range planning)
• research methodologies
• space management and planning
• strategic planning

This multidisciplinary program integrates the principles of medical and clinical innovations, interior architecture, human health services, communication studies, architecture, and behavioral and engineering sciences. You are mentored by local health care design consultants, teaming with nursing students and working directly with real clients and corresponding with forward thinking health care research centers.

Upon graduating, you are able to address contemporary issues facing the health care industry, address health care environments on multiple levels, apply evidence-based research techniques, and effectively communicate with clinicians.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
EPD 700 Research Methods (3)
EPD 710 Current Research in Design (3)

Concentration (18 credit hours)

Electives or Research (48 credit hours)
EPD 792 Research (12)
other electives or research (36)

Culminating Experience (12 credit hours)
EPD 799 Dissertation (12)

Additional Curriculum Information
Students must be thoroughly familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If the student has not completed a master's degree, elective courses approved by the supervisory committee may be substituted.

The student is required to take 18 credit hours in the concentration and a minimum of nine credit hours of specialized coursework outside the area of concentration.

Students are not allowed to use transfer credits to fulfill the 54 credit hour minimum requirement for resident credit. Each student entering the program is required to submit a plan of study during the first year.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in the field of design, interior design, architecture, nursing or other related fields from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GRE scores
• three letters of recommendation
• a statement of purpose summarizing career objectives and the reasons for pursuing doctoral education
• an indication of proposed area of concentration (design, history, theory and criticism; digital culture in design; or health care and healing environments)
• an indication of a potential mentor
• a sample of sole-authored written work in English or any other evidence relevant to admission to the program (i.e., master's degree thesis, research paper or published articles)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Admission to doctoral programs in The Design School requires a minimum TOEFL iBT® score of 4.5, or 90 (taken at testing center) if taken before January 21, 2026; a minimum IELTS overall band score of 7.0; a minimum PTE score of 65; a minimum Duolingo English Test score of 115; or a minimum Cambridge English exam score of 185.

International applicants who are interested in receiving funding as teaching assistants must take the Speaking Proficiency English Assessment Kit, administered at ASU, and become certified. Additional information is available on the department website.

ASU does not accept the GRE® General Test at home edition.

Ideal candidates must already hold a master's degree in design, interior design, architecture, nursing or other related fields. A statement of intent should express interest in the health care research and design concentration. If students enter the program with no design or health care background, they must take certain additional courses.

The letters of recommendation preferably would be academic, although they could be professional. Applicants provide the names and contact information of three recommenders at the time of their online application. Recommenders receive an email with a link to the online letter of recommendation to complete. Applicants are able to see which recommenders have already completed their recommendation by logging into the My ASU system and viewing their To Do list. Once a recommender has submitted the letter of recommendation, the recommender's name is removed from the To Do list. All letters must be in English.

Applicants should identify a proposed research topic, or list of possible topics, that aligns with the research mission of the program and the research interests of faculty.

Applicants must have identified a doctoral program faculty member who has agreed to serve as a mentor. The faculty mentor should be from the Herberger Institute for Design and the Arts. Applicants are recommended to introduce themselves by email to the faculty members who they feel have related research interests and to inquire about their availability to be mentors.

The application is considered incomplete if any of the application items is missing.

The doctoral executive committee evaluates the applications and supporting materials. Admission decisions are based on the ability of the potential mentor to devote time to the student, the compatibility of the applicant's career goals with the purpose of the degree program, GRE scores, previous academic training and performance, recommendation letters, and the research mission of the institute and the research interests of faculty. The recommendations of the committee are forwarded to the program director for approval. Upon the written recommendation from the program director, the dean of the Graduate College notifies all applicants, in writing, of the admission decision.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates may pursue advanced positions in the following arenas:

- elite consulting firms as facility programmers
- large health care systems and corporations as strategic planners
- leading manufacturers and vendors as expert representatives
- planning divisions in architectural and planning firms as medical planners
- research centers as decision-makers

Design, Environment and the Arts (History, Theory, and Criticism), PHD (HIDEAHTPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Program description

In the history, theory and criticism concentration within the Doctor of Philosophy program in design, environment and the arts, you focus on the theoretical dimensions of architectural, design and art histories including critical discourse in the design or art disciplines. The program offers you classes and research across many cultures, geographies and time periods as well as many approaches and methodologies within the art history program. Within this broad-based, on-demand program, you gain extensive knowledge of basic issues in the areas of architecture, design and art history.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus, a dissertation and two foreign language exams

Required Core (6 credit hours)
EPD 700 Research Methods (3)
EPD 710 Current Research in Design (3)

Required Concentration (15 credit hours; choose five courses)
APH 515 Current Issues and Topics (3)
APH 590 Reading and Conference (3)
APH 598 Special Topics (3)
ARS 501 Methodologies and Art History (3)
ARS 506 Critical Studies in Roman Art (3)
ARS 514 Monasteries, Madonnas and Manuscripts (3)
ARS 533 The Pre-Raphaelites (3)
ARS 574 Art of Japan (3)
ARS 575 Approaches to Chinese Painting (3)
ARS 584 Internship (3)
ARS 585 Women in the Visual Arts (3)
ARS 591 Seminar (3)
ARS 598 Special Topics (3)
ARS 790 Reading and Conference (3)
EPD 790 Reading and Conference (3)

Research (12 credit hours)
EPD 792 or ARS 792 Research (12)

Electives (39 credit hours)

Culminating Experience (12 credit hours)
EPD 799 or ARS 799 Dissertation (12)

Additional Curricular Requirements
A foreign language exam is required in order to show reading knowledge of two foreign languages as demonstrated by the exam administered by the School of International Letters and Cultures (or equivalent) during the program or by a "B" or higher (scale is 4.00 = "A") in a reading course such as a 400- or 500-level special topics course (example: ITA 494 or FRE 598 for reading knowledge). These credits do not count toward the degree total unless taken at the 500 level or above and approved by the faculty mentor as a concentration course.

When approved by the student's supervisory committee, this program allows 30 credit hours from a previously awarded master's degree to be used for this program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution. Examples of appropriate fields include art history, architectural history, design history or fields in the humanities, such as history or literature; archaeology and anthropology may also be considered. Students without graduate experience in the history of art, history of architecture and history of design may be asked to fulfill deficiencies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• abstract of proposed research
• personal statement
• letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must submit to Slideroom (https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)) the personal statement, abstract of proposed research, and contact information for three references. It is required that these be submitted in addition to the Graduate College application requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Study abroad (https://goglobal.asu.edu/) is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Career opportunities

Graduates are well prepared to pursue opportunities in authentication agencies, antiques reselling and brokerages, gallery spaces and other related businesses and organizations. A doctorate degree is necessary for responsible

administrative posts in museums and higher education and for employment as a university or college faculty member.

Design, Environment and the Arts, PHD (HIDEAPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

In the Doctor of Philosophy program in design, environment and the arts, you work through an individualized, institute-wide, transdisciplinary degree program that integrates graduate courses and faculty research with expertise in design; health care and healing environments; history, theory and criticism; and digital culture in design.

Broad in scope, the program is at the cutting edge of creating new knowledge in architecture, design and the arts. It complements transdisciplinary research in other disciplines within the university. The program provides research experience for you, if you wish to pursue careers in industry as a member of interdisciplinary design teams on environmental and energy issues, as well as if you wish to teach in the architecture, design or the arts fields.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Up to 30 credit hours from a previously awarded master's degree can count toward the requirements of the doctoral program.

Of the 54 credit hours remaining after the master's degree, 12 must be dissertation credit and 12 may be research. These 24 credit hours plus the remaining 30 credit hours must be completed after admission to the program. No transfer credits are allowed to fulfill the 54 credit hour minimum requirement completed after admission to the program.

The student is required to take 15 credit hours in the concentration and a minimum of nine credit hours of specialized coursework outside the area of focus; a minimum of six credit hours in current research and research methods is required.

Each student entering the program is required to submit a plan of study during the first year.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in the field of architecture, graphic design, industrial design, interior design, landscape architecture or fine arts from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• a statement of purpose summarizing career objectives and the reasons for pursuing doctoral education
• an indication of proposed area of concentration (design; history, theory and criticism; digital culture in design; or health care and healing environments)
• an indication of a potential mentor
• a sample of sole-authored written work in English or any other evidence relevant to admission to the program (i.e., master's degree thesis, research paper or published articles)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Admission to doctoral programs in The Design School requires a minimum TOEFL iBT score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; a minimum IELTS overall band score of 7.0; a minimum PTE score of 65; a minimum Duolingo English Test score of 115; or a minimum Cambridge English exam score of 185.

International applicants who are interested in receiving funding as teaching assistants must take the Speaking Proficiency English Assessment Kit, administered at ASU, and become certified. Additional information is available on the department website.

Students are admitted to the program only upon completion of a degree in architecture, graphic design, industrial design, interior design, landscape architecture or fine arts, or upon the demonstration of equivalent standing. Applicants must be familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program.

Applicants must have identified a doctoral program faculty member who has agreed to serve as a mentor. The faculty mentor should be from the Herberger Institute for Design and the Arts. Students should introduce themselves by email to the faculty members who they feel have related research interests and to inquire about their availability to be mentors.

The letters of recommendation preferably would be academic, although they could be professional. Applicants must provide the names and contact information of three recommenders at the time of their online application. Recommenders receive an email with a link to the online letter of recommendation to complete. Candidates are able to see which recommenders have already completed their recommendation by logging into the My ASU system and viewing their To Do list. Once a recommender has submitted the letter of recommendation, the recommender's name is removed from the To Do list. All letters must be in English.

Applicants should identify a proposed research topic or list of possible topics that aligns with the research mission of the program and the research interests of faculty.

The application is considered incomplete if any of the items is missing.

The doctoral executive committee evaluates the applications and supporting materials. Admission decisions are based on the ability of the potential mentor to devote time to the student; the compatibility of the applicant's career goals

with the purpose of the degree program; GRE scores (optional); previous academic training and performance; recommendation letters; and the research mission of the institute and the research interests of faculty. The recommendations of the committee are forwarded to the program director for approval. Upon receipt of the written recommendation from the program director, the dean of the Graduate College notifies all applicants in writing of the admission decision.

ASU does not accept the GRE® General Test at home edition.

Applicants should see the program website for application deadlines.

Digital Culture, MA (HIDGCMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

If you are a practitioner of design and the arts, have an interest in engaging in scholarly knowledge creation at the intersection of computational arts and sciences, and seek to enhance your practice through expanded engagement with interactive and embodied media theory and design, the Master of Arts program in digital culture is for you. As an artist and desiger, you can explore new avenues for real-time media creation that aim to go beyond current paradigms.

The GAME School educates the next generation of learners, empowering you with technofluency --- its development, application and implications --- and prepares you to be a socially aware, critically thinking global citizen who strives to bring about positive change in a society that'll be increasingly shaped by new technologies. Its mission is to improve and facilitate learning, creativity and communication; it does this through the integration of human physical experience and computational and digital media practice-based methods.

You can explore:

• critical media theory --- philosophical technologies, speculative design
• engineering --- social and embedded design, system engineering
• experiential media --- interaction design, responsive environments
• machine learning --- artificial intelligence, augmented reality, virtual reality
• science --- mediated rehabilitation, public participation in science
• sensory --- food design and sensory science, somatic and movement studies
• sound design --- digital composition and performance, acoustic ecology
• sustainability --- sustainability and critical climate studies, urban climate infrastructure

STEM-OPT extension eligible: No

Degree requirements

33 credit hours including the required applied project course (AME 593)

Required Core (12 credit hours)
AME 520 Movement and Computing (3)
AME 530 Philosophy of Media Technology (3)
AME 531 Experimental Media Philosophy (3)
AME 532 Creating Interactive Media (3)

Electives or Research (18 credit hours)

Culminating Experience (3 credit hours)
AME 593 Applied Project (3)

Additional Curriculum Information
Students should check with the academic unit regarding appropriate electives coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in one of the following areas from a regionally accredited institution: arts, humanities, design, media studies, computer science, engineering or a closely related field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letters of recommendation
• portfolio
• statement of purpose
• writing sample
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A portfolio is required; however, because of the transdisciplinary nature of the program, submissions will vary and depend on the background of each prospective student. Applicants from a wide variety of disciplines are expected to be interested in the program. Key works are requested from applicants to illustrate the types of skills they wish to develop in the program. Examples include games they have designed and programmed, interactive installations and performances (submitted as video), websites they have created or programmed, music they have composed digitally, or films they have made.

The statement should explain, in a concise and persuasive manner, how the student's educational, professional and

personal experiences inform their research and creative interests, and it should elaborate on any aspect of their background that supports their candidacy for admission to The GAME School.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates go on to careers in areas such as:

- acoustics research
- communications
- graphic design
- marketing
- mobile development
- sound design
- 3D modeling

Entertainment Engineering, MS (HIEEMS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

This program has a fee pending ABOR approval.

Program description

The Master of Science program in entertainment engineering provides you with the technical expertise to design and develop the systems that power immersive experiences across gaming, virtual reality and related media. Emphasizing innovation, the program prepares you to engineer the underlying technologies that drive the entertainment industry's rapid evolution.

Through a multidisciplinary curriculum that integrates engineering, media and design, you gain a deep understanding of real-time interactive systems, computer graphics, computer vision and immersive technologies. The program helps you take your existing technical background and expand your skill set into areas that combine creativity with computational precision.

You are equipped to create transformative tools and platforms that support storytelling, interactivity, simulation and entertainment. Upon graduation, you will be well-positioned for careers in industries such as game development, extended reality, simulation, virtual production and interactive media.

By preparing you to lead in a dynamic, technology-driven field, the MS in entertainment engineering supports ASU's broader mission to address global challenges through forward-thinking research and education.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (AME 593)

Required Core (15 credit hours)
AME 530 Philosophy of Media Technology (3)
AME 534 Machine Learning for Media Arts (3)
AME 551 Designing Extended-reality Experiences (3)
AME 554 Integrated Entertainment Systems (3)
DSC 551 Immersive Experience Design I (3)

Restricted Electives (12 credit hours)
AME 520 Movement and Computing (3)
AME 532 Creating Interactive Media (3)
CSE 570 Advanced Computer Graphics I (3)
CSE 578 Data Visualization (3)
EEE 515 Machine Vision and Pattern Recognition (3)
THP 555 Advanced Media Design (3)

Culminating Experience (3 credit hours)
AME 593 Applied Project (3)

Additional Curriculum Information
Students select four of the courses in the restricted electives section in consultation with their program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in entertainment engineering, media arts, animation, game design, computer graphics, computer music, computer science, engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The statement of purpose should explain in a concise and persuasive manner how the student's educational, professional and personal experiences inform their research and creative interests, and the student should elaborate on any aspect of their background that supports candidacy to The GAME School program.

Design (Design of Healthcare and Healing Environments), MSD (ARHHEMSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science in Design program with a concentration in design of health care and healing environments is focused on the science and experiences behind the built environment's real and perceived impacts on health and wellness. To this end, the program emphasizes the intersection and integration of evidence-based research and practice, transdisciplinary studies, best practices, and innovation in supporting and advancing the design of healthy environments, products and processes. You explore and synthesize principles from a variety of disciplines that include innovation, architecture, design, communication, human behavior, policy, quality and performance improvement, among others, to arrive at a thorough understanding of the critical issues facing the health care industry.

In this concentration you have opportunities to:

• communicate with forward-thinking health care research centers
• engage directly with real clients
• interact with prominent health care organizations
• participate in industry conferences
• recieve mentorship by local health care design consultants
• team with nursing and health innovation faculty members and students

STEM-OPT extension eligible: No

Degree requirements

36 credit hours and a thesis, or
36 credit hours including the required applied project course (DSC 593)

Students may choose to complete the graduate work by way of a thesis or an applied project. A master's degree thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project is somewhat different. It includes a project and a written document and is a scholarly endeavor that demonstrates the ability of the designer to do supervised research and present substantial evidence of the ability to apply research creatively to a design situation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• portfolio
• letter of intent
• contact information for three references
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Other information for international applicants can be found on the ASU Admission Services (https://admission.asu.edu/apply/international/graduate) website.

When applying for admission, applicants must declare one of seven focus areas:

• arts, media and engineering
• design of health care and healing environments
• industrial design
• interaction design
• interior design
• new product innovation
• visual communication design

The portfolio, letter of intent and contact information for three references must be submitted to SlideRoom (https://asuherberger.slideroom.com/#/Login (https://asuherberger.slideroom.com/#/Login)). The Design School requires that these be submitted in addition to application materials required by ASU Admission Services.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which

they are admitted, otherwise another application must be submitted for the year in which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Teaching or Research Assistantships
Applicants who wish to be considered for teaching or research assistantships should submit an additional statement outlining areas in which they feel competent to serve as a teaching or research assistant. All interested applicants can apply for a teaching assistantship position online. The link to the application is provided on the MSD website.

All international teaching or graduate assistants whose primary language is not English are required to be certified in their English language abilities. Those individuals whose native language is not English is required to submit a Speaking Proficiency English Assessment Kit score, which is administered at ASU. Students also have the option of completing the Test of Spoken English, administered directly by the Educational Testing Service. For this group, no personnel action form is signed until this examination has been successfully completed.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Engage in scholarly field inquiry involving the language and research of healthcare and wellness design.
Disseminate the results of their thesis or applied research in a public forum.
Compose a research proposal that embodies methodologies suitable to the research questions identified.

Immersive Experience Design, MS (HIIMEXDMS)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Mesa City Center

Program description

The Master of Science in immersive experience design is a comprehensive, two-year graduate program designed to advance your skills in creating immersive experiences that transcend traditional boundaries. The program emphasizes developing expertise in extended reality, immersive storytelling, real-time rendering engines, generative art, 3D asset generation and animation, data visualization, computational media, artificial intelligence, creative programming, human-computer interaction and world-building across both physical and virtual realms.

Unique among emerging media and design programs, this program leverages these technologies with a focus on immersive media experiences from extended reality applications to large-scale media installations. You gain practical and theoretical insights through rigorous coursework and research that includes technical skillsets development, critical discussion and collaborative opportunities across the Herberger Institute for Design and the Arts diverse programs. The curriculum is enriched with courses, critiques and one-on-one mentorship, ensuring you produce a compelling and impactful body of work that addresses real-world challenges and possibilities for the future.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Art (Animation), BFA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

36 credit hours including the required capstone course (DSC 559)

Required Core (18 credit hours)
DSC 551 Immersive Experience Design I (3)
DSC 552 Interactive Art and Media Installations (3)
DSC 553 Designing Digital Worlds (3)
DSC 554 Introduction to Extended Realities (3)
DSC 556 Programming Fundamentals for Immersive Experience Design (3)
DSC 557 Ethics and Social Impact in Immersive Experiences (3)

Research (3 credit hours)
DSC 558 Applied Research in Immersive Experience Design (3)

Electives (12 credit hours)

Culminating Experience (3 credit hours)
DSC 559 Immersive Experience Integration and Realization (3)

Additional Curriculum Information
Students should see the academic unit for an approved elective list.

The culminating experience course is a final design studio with a written component, taken under the guidance of studio faculty and industry professionals.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in design and media arts or a related field from a regionally accredited institution. Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• contact information of two references
• letter of intent
• portfolio
• professional resume
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The portfolio, letter of intent, resume and contact information of two references must be submitted via SlideRoom (https://asudesign.slideroom.com/#/Login). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year in which they are applying.

In the letter of intent, applicants are required to express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program, and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

The portfolio must be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can come from current and past faculty members, professional mentors, supervisors or community leaders and elders.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design immersive experiences that integrate virtual, computational, and physical design elements in course projects.
Conduct interdisciplinary research in immersive experience design in course assignments.
Incorporate ethical and sustainable principles across immersive experiences.

Career opportunities

Immersive design is a dynamic and rapidly evolving field with increasing demand for skilled professionals. Graduates of this program are equipped with a powerful blend of technical expertise, critical thinking and creative design

methodologies. This unique skill set enables them to lead innovation in immersive technologies and apply them across industries that require not just digital tools, but integrated design strategies for physical, social and spatial experiences. Possible career fields include:

creative and design leadership
extended realities and interactive systems
experience and interface design
media technology and content development
spatial and environmental systems

Possible careers in these fields include:

creative technologist
experience design lead
extended reality developer
human-computer interaction specialist
immersive media developer
immersive user experience designer
spatial computing designer
smart environment designer
simulation designer (digital twins, real-time training environments)
technical artist

Indigenous Placekeeping and Design, MS (HIIPDMS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Science program in Indigenous placekeeping and design is an applied, interdisciplinary offering that prepares you to address regional and global design challenges in partnership with Indigenous peoples and knowledge systems worldwide. Rooted in Indigenous frameworks relevant across continents, the curriculum integrates concepts such as traditional ecological knowledge, design justice, speculative design futures and community capacity building. You develop skills in place-based and community-action research methods, workshop facilitation and the ethics of engagement, preparing you to lead in culturally responsive design.

You have opportunities to collaborate with Native nations in the U.S. Southwest and elsewhere, as well as examine case studies in Indigenous communities from South America, Asia, the Pacific and other regions where Indigenous practices shape cultural resilience. Through immersive, hands-on projects with Indigenous partners and civic and industry collaborators, you gain field experience in placekeeping, cultural design and sustainable development.

The program equips you with a comprehensive understanding of how to incorporate Indigenous design principles in varying design contexts. As such, the program encourages a holistic perspective, fostering a deeper appreciation for diverse cultural influences in design practices, whether working with Amazonian communities, Pacific Island nations, Himalayan villages, First Peoples in Australia or other Indigenous peoples around the world.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (DSC 593)

Required Core (12 credit hours)
DSC 517 Indigenous Placekeeping and the Built Environment (3)
DSC 518 Indigenous Architectural History and Contemporary Design (3)
DSC 519 Indigenous Design Data Collection, Analysis, Research and Representation (3)
DSC 521 Futurity of Indigenous Knowledge (3)
DSC 522 Indigenous Design and Media Communication (3)
DSC 523 Resource-driven Construction and Design (3)
DSC 524 The Indigenous Landscape: Place Meaning and Attachment (3)
DSC 525 Contemporary Digital Topics (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)
DSC 593 Applied Project (3)

Additional Curriculum Information
For their core courses, students select four from the approved list.

The program offers a wide variety of elective options from The Design School and collaborating units, enabling students to tailor their education to their research interests and career goals.

Students may also explore other elective courses from affiliated schools with the approval of their program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in architecture or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio or other work samples
• contact information for three professional references
• professional resume or CV
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current

residency.

The applicant must complete the Graduate College application requirements, and The Design School also requires the letter of intent, portfolio, resume or CV, and contact information for professional references to be submitted via SlideRoom. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should explain their motivation for applying to the program and their future goals in the field, briefly touching on their background and the experiences and qualifications that make them a suitable candidate.

Applicants are required to submit a portfolio or other collection of work samples. They may submit a design portfolio, writing samples, tear sheets or a combination of different work samples. The portfolio should be a curated collection of the candidate's works, projects and creations to represent their skills, creativity, passion and ability to conceptualize, innovate and effectively communicate ideas.

Applicants must submit contact information for three professional references. These can be current or past faculty members, professional mentors, supervisors, or community leaders or elders.

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted, otherwise they must repeat the entire application process.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the program are prepared for careers that bridge design, planning and cultural resilience in both North American and global contexts. Career pathways include roles with Native and Indigenous nations, municipalities, international nongovernmental organizations, and design firms working across continents. Opportunities include:

community development planner (domestic or international)
cultural advisor or consultant for global Indigenous heritage projects
cultural heritage and resource manager
design educator with a global Indigenous lens
design practitioners involved in Native communities and Indigenous urban spaces
interior designer focused on culturally informed practice
landscape or urban designer with cross-cultural expertise
tribal or Indigenous community liaison

Admission deadlines (https://design.asu.edu/admission)

Industrial Design, MID (HIINDMID)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the studio-based Master of Industrial Design program, you learn to design new products, systems, services, experiences or businesses by envisioning the future.

You engage in research, brainstorming, idea visualization, prototyping and testing creative solutions that address different stakeholders' challenges while acknowledging a new competitive industry environment.

You are encouraged to work in a transdisciplinary way, harnessing creativity to solve problems and co-create solutions that improve the user experience and deliver value while considering environmental responsibility.

The program includes a design trip as a guided learning experience. In locations such as Tokyo, Milan or San Francisco, you engage with industries and industrial design practice on a deep level, discovering an optimistic way of looking at the future by reframing problems as opportunities.

You gain skills in using principles of design innovation, sustainability and systems thinking in problem-solving.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

60 credit hours including the required capstone course (IND 622)

Required Core (40 credit hours)

Electives (12 credit hours)

Other Requirement (3 credit hours)
IND 584 Internship (3)

Culminating Experience (5 credit hours)
IND 622 Advanced Industrial Design Studio IV (5)

Additional Curriculum Information
Students should see the academic unit for an approved course list.

The MID program includes sequential studio courses. Requirements involve an average of 14 credit hours per semester. An internship is required during the summer before the final year.

Additional coursework is required for students who are in the three-plus-year program; students should contact the academic unit for more information.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom (the applicant also must complete the Graduate College application). https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should explain their motivation for applying to the program and their goals in the field, briefly describing their background, experiences and qualifications that make them a suitable candidate.

The portfolio should be a curated collection of the candidate's design works, projects and creations to visually represent their skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references; these can be current or past faculty members, professional mentors, supervisors, or community leaders and elders.

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they must repeat the entire application process.

Applicants may be admitted to the two-year program with additional coursework if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. In this case, the student must complete additional coursework before taking the required courses, which may extend the program duration beyond two years.

Admission requirements for the two-year program
Applicants must hold a minimum of a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing in a related field such as industrial design or product design.

Admission requirements for the three-plus-year program
Applicants must hold a bachelor's degree or equivalent from a regionally accredited college or university of recognized standing in a field other than industrial design.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Defend design research findings with a presentation of their unique design concepts
Develop a new product concept design and present it in written and visual mediums to a committee of faculty and stakeholders.
Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice as determined by the National Association of Schools of Art and Design (NASAD).

Career opportunities

Graduates are able to apply critical thinking and design processes to global opportunities centered on the necessity for change. They find positions in industry and academia and also develop startup ventures. Possible opportunities include:

design consultant
design strategist
head of innovation
interaction designer
product design director
senior industrial designer
senior product design manager
senior UI or UX product designer
university faculty member
UX strategist

Graduates find employment with consulting firms that design products, services and experiences for various clients, such as corporations, nonprofit institutions and nongovernmental organizations.

Those with an entrepreneurial mindset address specific social or environmental problems and create market innovations; some graduates establish their own design and manufacturing ventures, or lead product development teams and innovations at renowned organizations.

Graduates may pursue teaching positions in art and design schools, colleges or universities.

Design (Industrial Design), MSD (ARINDDEMSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science in Design program in industrial design at The Design School prepares you for advanced studies in:

• criticism and methodology
• design processes
• history
• human factors
• technology
• theory

You develop an understanding of contemporary design issues and develop skills by conducting specialized research.

This is a research-based program. If you're interested in a studio-based program, you should refer to the Master of Industrial Design (https://degrees.apps.asu.edu/masters-phd/major/ASU00/HIINDMID/industrial-design-mid).

STEM-OPT extension eligible: No

Degree requirements

36 credit hours and a thesis, or
36 credit hours including the required applied project course (DSC 593)

Students may choose to complete their graduate work by way of a thesis or an applied project. A master's degree thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project is different from a thesis. It includes a project and a written document and is a scholarly endeavor that demonstrates the ability of the designer to do supervised research and present substantial evidence of the ability to apply research creatively to a design situation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• a portfolio
• a professional resume
• letter of intent
• contact information for two references
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency through either the TOEFL

or the IELTS regardless of their current residency.

When applying for admission to an MSD program, applicants must declare one of the concentrations, such as this concentration in industrial design.

The portfolio, letter of intent, resume and contact information of two references must be submitted via SlideRoom (https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise another application must be submitted for the year in which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Engage in scholarly field inquiry involving the language and research of industrial design.
Disseminate the results of their thesis or applied research in a public forum.
Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career opportunities

Graduates work for global design consultancies, corporate design teams, universities, research institutes and manufacturing companies.

Graduates are also prepared for a career in industrial design education.

Interior Architecture, MIA (HIIAMIA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Interior Architecture program is a studio-based offering accredited by the Council for Interior Design Accreditation. In this program, you prepare to become a design leader who addresses pressing environmental, cultural and social challenges through the built environment. Drawing on history, theory and criticism, you develop evidence-based design approaches rooted in design excellence, creative innovation and advanced technical proficiency.

This program goes beyond foundational skills to cultivate strategic thinking and leadership capacity. You address complex design challenges --- including sustainability, adaptive reuse, health equity and community resilience --- and

you learn to navigate the intersection of aesthetic, ethical and technical considerations. Through rigorous research and making, you drive interior architecture practice toward greater social impact.

Situated within The Design School, you engage in advanced transdisciplinary collaborations with peers in architecture, urban planning, industrial design and complementary fields. This integrated approach prepares you to lead challenging projects and shape the future of interior environments.

The program welcomes you, whether you have an accredited undergraduate degrees in interior design or architecture, or you come from other disciplines through a preparatory pathway.

STEM-OPT extension eligible: No

Degree requirements

56 credit hours including the required capstone course (INT 622)

Required Core (39 credit hours)
INT 519 Designing with Materials (3)
INT 520 Professional Practice for Interior Architecture (2)
INT 521 Advanced Interior Architecture Studio I (5)
INT 522 Advanced Interior Architecture Studio II (5)
INT 527 Contemporary Design Theory (3)
INT 529 Design Criticism (3)
INT 541 Codes and Building Regulations (1)
INT 547 Sustainability in Interior Architecture (3)
INT 550 Environmental Systems of Interior Architecture (3)
INT 554 Construction Documents for Interior Architecture (3)
INT 558 Lighting Design (3)
INT 621 Advanced Interior Architecture Studio III (5)

Elective (3 credits)
Design Professional Elective (3)

Other Requirements (9 credits)
DSC 598 Topic: Principles of Collaboration in Design (3)
INT 584 Internship (3) or Professional Design Elective (3)
INT 650 Diversity and Design (3)

Culminating Experience (5 credits)
INT 622 Advanced Interior Architecture Studio IV (5)

Additional Curriculum Information
For Other Requirements, students take three credit hours each of DSC 598 Topic: Principles of Collaboration in Design (3) and INT 598 Topic: Diversity and Design (3). Students complete the three remaining credit hours by enrolling in an internship through INT 584 Internship or selecting a professional design elective. Electives should be selected in consultation with the program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom; the applicant also must complete the Graduate College application requirements. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should explain their motivation for pursuing the program and future goals in the field, briefly describing their background and the experiences and qualifications that make them a suitable candidate.

The portfolio should be a curated collection of the candidate's design works, projects and creations that visually represent their skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can be current or past faculty members, professional mentors, supervisors, or community leaders or elders.

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they must repeat the entire application process.

Applicants may be admitted to the two-year program with additional required coursework if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. In this case, the student must complete additional coursework before taking the required courses, which may extend the program duration beyond two years.

Admission requirements for the two-year program:
All applicants must have completed a minimum of a bachelor's degree or equivalent in interior design or interior architecture from a Council for Interior Design Accreditation-accredited program or a four-year degree in architecture from a program accredited by the National Architectural Accrediting Board.

Admission requirements for the three-plus-year program:
All applicants must have completed a minimum of a bachelor's degree or equivalent in a field other than interior design, interior architecture or architecture.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice, as identified by the Council for Interior Design Accreditation.
> Synthesize iterative ideas and design concepts into plans for built works to meet professional standards and The Design School Design Imperatives (History, Context, Program, Technology, Construction, Representation).
> Create collaborative relationships that support dynamic co-creation in design learning and constructive outcomes in design creation.

Career opportunities

Graduates are prepared to fill leadership positions in interior architecture, interior design practice and education.

They find employment opportunities with interior design firms, architecture firms, corporations and government entities of all sizes. Firms may specialize in interior design for residential, commercial, retail, hospitality, institutional and health care spaces. Career specialties include historic restoration, branding, sustainability, new product innovation and incorporation of new technology.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Completion of the program qualifies a graduate to seek work experience as an interior designer and then sit for the National Council for Interior Design Qualification examination.

Design (Interior Design), MSD (ARINTDEMSD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science in Design program in interior design at The Design School is a research program that enables you to deeply investigate how people use and interact with various interior environments. It can be completed in as little as two years.

The program encourages you to explore creativity, innovation and critical thinking while acknowledging the importance of cultural and historical precedent. This program helps you develop an understanding of contemporary interior design issues through acquisition of specialized research and design skills.

STEM-OPT extension eligible: No

Degree requirements

36 credit hours and a thesis, or
36 credit hours including the required applied project course (DSC 593)

Students may choose to complete their graduate work by way of a thesis or an applied project. The thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project includes a project and a written document. Through this scholarly endeavor, the designer both demonstrates the ability to do supervised research and presents substantial evidence of their ability to creatively apply research to a design situation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• portfolio
• letter of intent
• resume
• contact information for two references
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency through either the TOEFL or the IELTS, regardless of their current residency.

When applying for admission, applicants must declare one of the MSD concentrations (such as this concentration in interior design).

The portfolio, letter of intent, resume and contact information for two references must be submitted via SlideRoom (https://asudesign.slideroom.com (https://asudesign.slideroom.com/#/Login)). The Design School requires that these be submitted in addition to the materials required for the graduate application.

GRE scores are not required.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise another application must be submitted for the year in which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Engage in scholarly field inquiry involving the language and research of interior design.
Disseminate the results of their research in a public forum.
Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career opportunities

Graduates from this program can expect to go into interior design research or higher education instruction; the program is also good preparation for entry into doctoral programs.

Landscape Architecture, MLA (ARLDEMLA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Landscape Architecture program at The Design School is an accredited graduate professional degree (https://design.asu.edu/about/accreditation) offering that prepares you for professional practice, advanced study and leadership in landscape architecture. The program integrates knowledge from arts, science and technology and trains you to design the built environment through integrated systems thinking and transdisciplinary skills and knowledge. You cultivate your capacity to work with communities to address pressing issues such as climate change and environmental justice. The program also prepares you for advanced research study toward a doctoral degree.

The program offers three pathways to accommodate applicants with various undergraduate and professional backgrounds, and you can complete the program in two to three years. If you come from a nondesign background, you are encouraged to apply to the three-year program.

This program values and supports the landscape architecture profession's mission to design more sustainable, resilient and just neighborhoods, cities and regions.

The program is accredited by Landscape Architectural Accreditation Board. www.asla.org/accreditationlaab.aspx (https://www.asla.org/accreditationlaab.aspx)

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-

students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

56 credit hours and a thesis, or
56 credit hours including the required applied project course (LDE 593), or
56 credit hours including the required capstone course (LDE 622)

Required Core (23 credit hours)
LAP 513 Landscape Architecture Theory and Criticism (3)
LAP 571 Advanced Landscape Architecture Professional Practice I (1)
LAP 572 Advanced Landscape Architecture Professional Practice II (1)
LAP 613 Design Synthesis (3)
LDE 521 Advanced Landscape Architectural Studio I (5)
LDE 522 Advanced Landscape Architectural Studio II (5)
LDE 621 Advanced Landscape Architectural Studio III (5)

Research (9 credit hours)
LAP 514 Research in Landscape Architecture (3)
Research area electives (6)

Electives (18 credit hours)
Design professional elective (18)

Culminating Experience (6 credit hours)
LDE 593 Applied Project (6) or
LDE 599 Thesis (6) or
LDE 622 Advanced Landscape Architectural Studio IV (6)

Additional Curriculum Information
Students complete nine credit hours of research: three credit hours of LAP 514 and six research area electives.
Students should see the academic unit for an approved elective list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee

• official transcripts
• letter of intent
• portfolio
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency) regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom; the applicant also must complete the application requirements for the Graduate College. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants should explain their motivation for applying to the program and their goals in the field, briefly describing their background and the experiences and qualifications that make them a suitable candidate.

The portfolio is a curated collection of the candidate's design works, projects and creations. It should visually represent the applicant's skills, creativity, design sensibilities, and ability to conceptualize, innovate and effectively communicate design ideas.

Admission to the program is selective and cannot be deferred. Students must enroll in the semester for which they are admitted, otherwise another application must be submitted.

Admission requirements for the two-year pathway
An applicant must have completed a four-year or five-year bachelor's degree program with a major in landscape architectural studies or be a licensed landscape architect. The undergraduate degree must be granted by an institution that offers the Landscape Architectural Accreditation Board or equivalent accredited degree program in landscape architecture.

Admission requirements for the two-plus pathway
Applicants must have earned an undergraduate or graduate degree in architecture, urban design, landscape design, planning, urban design, environmental design or a related design field, or a baccalaureate degree with a major or minor in landscape design.

Admission requirements for the three-year pathway
Applicants must have earned a baccalaureate or graduate degree in any field other than landscape architecture or a design-related field.

Additional Coursework
If a student is assigned any additional coursework by the academic unit upon admission, depending on the undergraduate background, those courses must be completed with a grade of "B" (3.00 on a 4.00 scale) or higher before completing the master's program required coursework. For students who are assigned additional coursework, there are two pathways.

Additional courses may include:

LAP 231 Introduction to Digital Applications for Designers
LAP 251 Plant Materials for Sustainable Landscapes
LAP 311 History of Landscape Architecture
LAP 312 Contemporary Topics in Landscape Architecture
LAP 332 GIS Applications in Environmental Design
LAP 341 Landscape Construction I

LAP 342 Landscape Construction II
LAP 352 Ecosystems and Sustainable Design
LAP 353 Planting Design for Sustainable Landscapes
LDE 501 Foundation Landscape Studio I
LDE 502 Foundation Landscape Studio II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Examine design creative process through theory and research articles measured through the final assignment.
Apply key skills in the field related to the analysis of existing landscape conditions and the design of new proposals.
Learn how to design a professional level in landscape architecture studio project.

Global opportunities

Global experience: The Design School is committed to the merging of global and local contexts and experiential learning through travel experiences. Graduate students may incorporate travel as part of their studio design learning experience. The school also offers a number of summer study abroad programs in an effort to extend the learning opportunities through field studies and global engagement.

Career opportunities

Graduates are prepared to work across diverse areas of the landscape architecture profession, including public and private sectors and nonprofit organizations. Examples include:

climate change mitigation and adaptation
community development
creative placemaking and placekeeping
ecosystem services and restoration
environmental and climate justice
low-impact development
parks, open space and recreation
smart cities
sustainable cities and landscapes
transportation and infrastructure development

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.For detailed information on licensure requirements, students should contact the Council of Landscape Architectural Registration Boards. www.clarb.org (https://www.clarb.org/)

Media Arts and Sciences (Extended Reality Technologies), MS (HIDGCERTMS)

College/School: Herberger Institute for Design and the Arts

Campus: ASU at Mesa City Center

Program description

In the Master of Science program in media arts and sciences with a concentration in extended reality technologies, you focus on the development of innovative tools and methodologies for extended reality and immersive technologies, including simulation, visualization, interaction, computer vision, human-computer interaction, experience design, artificial intelligence and machine learning.

You develop a fundamental understanding of how emerging media technologies can be used to create virtual worlds that simulate the existing world alongside entirely new ones. In addition, you develop skills in programming languages and software applications necessary for these production workflows, and you have the ability to manage projects; work effectively in collaborative teams; transform research into creative and technological products; and reflect on the ethical, cultural and social frameworks within which your work occurs.

This program is distinct among emerging media programs through the application of these technologies and practices in socially engaged and transdisciplinary modalities, taking tools that evolved primarily from and for entertainment and applying them to the modeling of real-world challenges and futures.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

33 credit hours including the required applied project course (AME 593)

Required Core (9 credit hours)
AME 520 Movement and Computing (3)
AME 530 Philosophy of Media Technology (3)
AME 532 Creating Interactive Media (3)

Concentration (9 credit hours)
AME 539 Edge and Cloud Computing for XR (3)
AME 541 Design Activation: Practical Research Lab (3)
AME 551 Designing Extended-reality Experiences (3)

Electives (9 credit hours)

Other Requirements (3 credit hours)
AME 584 Internship (3)
AME 590 Reading and Conference (3)
AME 592 Research (3)
HDA 580 Practicum (3)

Culminating Experience (3 credit hours)
AME 593 Applied Project (3)

Additional Curriculum Information
For other requirements, students must complete a minimum of three credit hours of faculty-led research (AME 592), individualized instruction (AME 590), the design and implementation of public programs (HDA 580), or an internship (AME 584).

HDA 581 is taken three times at one credit hour.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in media arts, engineering, design or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• portfolio
• letter of intent
• resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

In the letter of intent, applicants should detail their professional goals and the alignment of those goals with the program.

Because of the transdisciplinary nature of the program, portfolio submissions can vary based on the prospective student's background. Materials may illustrate the types of skills the applicant has. Portfolios can be submitted in the form of a website, photos, video, PDFs and other physical documentation. Examples include games designed and programmed by the applicant, music composed by the applicant, performances (submitted as video), and websites programmed by the applicant.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are well prepared for careers in a variety of fields related to the application of extended reality technologies and practices. Virtual reality and augmented reality have obvious and popular applications in entertainment, gaming, workforce development and research, but alumni of this program also have direct experience with the application of these tools to other areas that can expand their available pathways, including urban planning, health care and education. They are ideally suited for the rapidly changing climate of this field.

Media Arts and Sciences, MS (HIDGCMS)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

If you are a practitioner and maker in design and the arts who has an interest in software and system development and seek to enhance your practice through expanded engagement with interactive, embodied media design in an interdisciplinary environment, the Master of Science program in media arts and sciences is for you. The program enables you to explore new avenues for real-time media creation that go beyond current paradigms.

Through coursework, you also explore current practices in various contexts (performance environments, health and well-being, social media and communication) as well as engineering-based approaches to developing experiential systems with social impact.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

33 credit hours including the required applied project course (AME 593)

Required Core (9 credit hours)
AME 520 Movement and Computing (3)
AME 530 Philosophy of Media and Technology (3)
AME 532 Creating Interactive Media (3)

Other Requirements (6 credit hours)
AME 533 Design for Media Arts (3)
AME 534 Machine Learning for Media Arts (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)
AME 593 Applied Project (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field, such as arts, humanities, design, media studies, computer science or engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• letter of intent
• professional resume
• portfolio
• writing sample
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Acceptable writing samples include research writing, published articles and other scholarly work.

Because of the transdisciplinary nature of the program, portfolio submissions can vary based on the prospective student's background. Materials may illustrate the types of skills the applicant has. Portfolios can be submitted in the form of a website, photos, video, PDFs and other physical documentation. Examples include games designed and programmed by the applicant, music composed by the applicant, performances (submitted as video), and websites they have created or programmed.

The letter of intent should explain the how the applicant's educational, professional and personal experiences inform their research and creative interests, and it should elaborate on any aspect of their background that supports their candidacy for admission to The GAME School.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates go on to careers in areas such as:

- acoustics research
- communications
- graphic design
- marketing

mobile development
museum and curatorial work
sound design
3D modeling

Media Arts and Sciences, PHD (FAMASPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Philosophy program in media arts and sciences is housed in The GAME School, a transdisciplinary center for creativity and innovation.

The school educates you to be a part of the next generation of learners, empowering you with technofluency --- its development, application and implications. You are prepared to be a socially aware, critically thinking global citizen who strives to bring about positive change in a society that's increasingly shaped by new technologies.

You are provided distinct opportunities to engage in knowledge creation at the intersection of computational arts and sciences, using the most advanced practice-based and theoretical methods. The opportunity for active participation in transdisciplinary research teams enables you to gain valuable experience as an agent of both your own research and your own education; this arrangement also fosters opportunities for collaborative and embedded research.

At the core of the program is a commitment to designing curriculum tailored to each student-researcher in conjunction with the diverse faculty, labs and centers, and you have the opportunity to work on the development of innovative, experiential media systems that can respond to the world's most pressing challenges. You can pursue research at the intersection of any of these fields, among others:

• artificial intelligence, system engineering and machine learning
• auditory culture, digital composition and performance
• critical media theory and philosophical technologies
• food design and sensory science
• interaction design, experiential media and responsive environments
• mediated rehabilitation, and somatic and movement studies
• public participation in science
• social and embedded design
• sustainability and critical climate studies
• virtual reality and augmented reality

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Required core (18 credits)
AME 520 Movement and Computing (3)
AME 530 Philosophy of Media Technology (3)
AME 531 Experimental Media Philosophy (3)
AME 532 Creating Interactive Media (3)
AME 533 Design for Media Arts (3)
AME 534 Machine Learning for Media Arts (3)

Research (33 credit hours)
AME 792 Research (33)

Restricted Electives (12 credit hours)

Electives (9 credit hours)

Culminating Experience (12 credit hours)
AME 799 Dissertation

Additional Curriculum Information
Students are expected to be research-active throughout the program, taking at least three research credit hours per semester.

For restricted electives, students must choose graduate-level AME or MDC courses, with approval from the student's advisor. Electives can be any graduate-level courses offered at ASU. The selection of courses relates to the student's research interests and requires the approval of the student's advisor.

When approved by the student's supervisory committee and the Graduate College, 30 credit hours from a previously awarded master's degree in a related field can be used for this degree.

A student can register for dissertation credits only after they have passed the comprehensive examination.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in arts, humanities, design, media studies, computer science, engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee

• official transcripts
• curriculum vitae
• statement of purpose
• three letters of recommendation
• portfolio of supporting material
• writing sample
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should explain in a concise and persuasive manner how the student's educational, professional and personal experiences inform their research and creative interests, and the student should elaborate on any aspect of their background that supports their candidacy for this program.

Each applicant must demonstrate entry-level competencies. This can be demonstrated primarily through a portfolio, which may include previously developed media products, projects or publications that illustrate an understanding of and involvement with digital media and computation. Entry-level competency can also be partially demonstrated through coursework and may include courses in:

• advanced computer programming
• computer graphics and animation
• computer music
• digital design
• film theory
• interactive technologies
• media authoring tools
• media theory
• multimedia systems
• signal processing

Students should see the program website for application deadlines and admission terms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates can go on to careers in areas such as:

academia
mobile and web development
product design
programming
research and development across diverse industries
software engineering
3D modeling
user experience design

Museum and Curatorial Practices, MA (HIMCPMA)

College/School: Herberger Institute for Design and the Arts

Campus: Online

Program description

The Master of Arts in museum and curatorial practices is a comprehensive degree program focused on the future of the art museums and curatorial practice. This curatorial practice centers on an equitable, imaginative, inclusive and relevant art museum practice. The curriculum pays special attention to the most pressing global and ethical issues currently facing art museums, including the urgent need to decolonize, repatriation claims, activist curating, the role institutions play in fighting climate change, gender and race inequities, accessibility concerns and the roles of technology. Classes are designed to cover history and theory with practical components woven throughout.

You complete online coursework and an in-person internship in your home city. You also participate in a culminating experience in which you work with faculty to design and execute a project within the field of museums or curation, or you conduct an extended examination of a research question that engages with your field.

This program prepares you to be a part of the next generations of culturally diverse art museum leaders, accelerates your careers if you already work in art museums, and equips you to lead radical change for inclusivity in the study and practice of art history and museum studies.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT extension eligible: No

Degree requirements

33 credit hours including an oral comprehensive exam and the required applied project course (ARS 593), or
33 credit hours, an oral comprehensive exam and a thesis

Required Core (9 credit hours)
ARS 501 Methodologies and Art History (3)
ARS 550 Anti-racist Approaches to Art History Today (3)
ARS 551 Decolonizing Museums (3)

Other Requirements (3 credit hours)
ARS 584 Internship (3)

Restricted Electives (15 credit hours)
ARS 590 Reading and Conference (3)
ARS 591 Seminar (3)
ARS 592 Research (3)
ARS 598 Special Topics (3)
GRA 501 Creative Enrollment and Collaborative Leadership (3)
HDA 514 Creativity and Impact, Opportunities for Change (3)

JHR 506 Grant Writing for Social Justice and Human Rights (3)
NLM 515 Nonprofit Organizational Behavior and Principles Management (3)

Culminating Experience (6 credit hours)
ARS 593 Applied Project (6) or
ARS 599 Thesis (6)

Additional Curriculum Information
Students complete an in-person internship in their home city. Students also complete five courses in the restricted electives list and should consult their program advisor for a complete list of topics for ARS 591 and ARS 598.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• letter of intent
• two letters of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The letter of intent should be one page and indicate the objectives for graduate study. Letters of recommendation should be from faculty with whom applicants have worked closely. They may also be from museum or curatorial colleagues with whom applicants have worked professionally within the last three years.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/museum-curatorial-practice-masters/) for program descriptions and to request more information.

Career opportunities

Graduates of this program can pursue the following careers:

art collections manager
exhibition developer
gallery manager
museum curator
museum educator
museum executive
researcher

Music (Ethnomusicology), MA (FAETHNMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Arts program in music with a concentration in ethnomusicology helps you develop skills in scholarship and performance as you focus on aspects of one or more of the world's musical cultures.

You can learn from traditions outside the Western European canon through participation in ensembles such as Javanese gamelan, Latin marimba, mariachi, steel pan and world percussion ensemble.

As a culminating demonstration of professional capability in the major field, you submit a final project that demonstrates advanced competence in research and writing in musicology or ethnomusicology. The final project may be a thesis, a series of special papers or a written work of equivalent scope and depth.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours, a thesis, a written comprehensive exam, an oral comprehensive exam and a foreign language exam

Required Core (13 credit hours)
MHL 532 Music Bibliography (3)
MHL 668 Introduction to Ethnomusicology (3)
MUP 587 Ethnomusicology Ensembles (1-2)
music theory (5)

Electives (11 credit hours)
music electives (6-9)
open electives (2-5)

Culminating Experience (6 credit hours)
MHL 599 Thesis (6)

Additional Curriculum Information
At least 20 credit hours for the program must be in the field of ethnomusicology or related fields approved by the student's advisor, complemented by courses in music theory, performance and cultural anthropology, as listed above. MUP 587 is taken twice for a total of two credit hours. Appropriate elective coursework is reviewed and approved by the academic unit before inclusion on the student plan of study.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before they enroll in courses for these programs through the School of Music, Dance and Theatre. This is tracked internally within the academic unit.

A passing grade on a foreign language exam or a grade of "B" or higher in a designated reading course through the School of International Letters and Cultures is required for graduation.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution or from an international institution officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00= "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00= "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume, personal statement and writing sample
• three letters of recommendation
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu for information on potential courses to complete. Additional courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed before starting graduate-level course requirements in music history and music theory.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Write research papers applying the conventions of scholarly discourse in music.
Apply, in written and oral exams, a synthesis of knowledge of a chosen or designated field of inquiry within ethnomusicology.
Implement a large-scale independent research project that makes a unique contribution to the discipline of ethnomusicology.

Career opportunities

Musicians with expertise in performing, composing, teaching and researching; arts advocacy; and music therapy are in high demand across many sectors and industries. Potential employers include performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation and entrepreneurship, as well as focused discipline can help graduates be successful in a variety of companies and professions. School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Career examples include:

arts administrator
community arts advocate
ethnomusicologist
performing musician
public or community school teacher
university professor

Music (Interdisciplinary Digital Media), DMA (FAINTDDMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Musical Arts program in music with a concentration in interdisciplinary digital media is a distinctive collaboration of the School of Music, Dance and Theatre and the School of Arts, Media and Engineering, with extensive faculty interaction from both schools.

If you have interests and the creative skills to work within a cross-section of the arts and sciences, the program is for you. Program offerings extend beyond typical music coursework to allow more opportunities for digital sound and experimental media projects and to enable you to be actively involved in current developments in the field of media and digital culture. You have access to state-of-the-art media facilities, hybrid arts-engineering faculty, and courses in electronic music, with resources that complement courses in electronic music.

In the program, you have multiple performance opportunities each year, including collaborations with student performers; readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the ASU Wind Ensembles and the Philharmonia Orchestra; commissions for the PRISMS contemporary music festival; and collaborations with student animators, filmmakers and dancers.

You are encouraged to develop your own compositional voice and focus on your area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with composition faculty members.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (25-27 credit hours)
Music Theory Core Area (12-19)
Music History Core Area (6-15)

Concentration (33 credit hours)
MTC 523 Advanced Composition (2-3)
MTC 723 Advanced Composition (3)
Arts, Media and Engineering coursework (21)

Electives (9-11 credit hours)

Research (9 credit hours)
MTC 792 Research (9)

Culminating Experience (12 credit hours)
MTC 799 Dissertation (12)

Additional Curriculum Information
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

MTC 523 and MTC 723 should each be taken for a total of six credit hours.

Concentration coursework for the Arts, Media and Engineering area must have the AME prefix.

Up to 30 credit hours from a previously awarded master's degree, with approval from the academic unit and the Graduate College, may be used toward the hours required for the elective and concentration coursework.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country and officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter-hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume and personal statement
• official transcripts
• prescreening portfolio
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Students should see the program website for application deadlines.

After all application materials are received and reviewed, including recommendation letters, transcripts and English proficiency requirements, an applicant may be invited for a live interview (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply knowledge of music history and music theory to engineering disciplines.
Apply software engineering skills to music, sound and video.
Design a major independent research project that makes a unique contribution to the discipline of interdisciplinary digital media.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching and advocating for the arts are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

Career examples include:

arts administrator

community arts advocate
composer for film, video games or television
performing musician
public or community school teacher
university professor

Music (Music Learning and Teaching), PHD (FAMUSEDPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

If you are a musician-teacher-scholar who seeks a career in musical and educational leadership, the Doctor of Philosophy program in music with a concentration in music learning and teaching is the world-class degree for you. You are immersed in an inclusive and multifaceted community of dynamic partnerships and research and teaching collaborations. You work with faculty members on creative projects that lead to independent and co-authored research publications, creative projects and professional presentations.

The program includes specialized study in music education, elective studies with scholars and artists in the Herberger Institute, and opportunities for transdisciplinary elective study with faculty and colleges across ASU. A plan of study is designed by you in consultation with the faculty to support your career trajectory. Typical projects interrogate and broaden discourse and practice in music education, and challenge methodological and disciplinary boundaries to imagine what could be. The program concludes with dissertation research that springboards you to the next phase of your career.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (10 credit hours)
MSI 601 Contemporary Topics in Music Research (2)
MSI 602 Current Issues in Music Research (2)
MSI 755 Historical Research in Music (3)
MTC 520 Analytical Techniques (3)

Concentration (30 credit hours)

Electives (29 credit hours)

Research (6 credit hours)

Other Requirements (3 credit hours)
MUE 784 Internship (3)

Culminating Experience (12 credit hours)

MUE 799 Dissertation (12)

Additional Curriculum Information
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

Students should see the academic unit for a complete list of approved electives.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. A minimum of two semesters must be spent in continuous full-time residence at ASU.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) (including curriculum vitae, personal statement and a writing sample)
• official transcripts
• teaching demonstration video
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Applications are accepted and reviewed on a rolling basis until all spaces are filled. Applicants are encouraged to apply as early as possible. Students should see the program website for more information on application deadlines. To ensure prompt processing of application, students should email MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) after submitting an application. An interview with the music learning and teaching doctoral faculty in person or via electronic media is scheduled after review of application materials.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design individual teaching practices that are appropriate to a beginning faculty position in music education at college level.
Implement a major independent research project that makes a unique contribution to the field of music learning and teaching.
Apply research methods to conduct independent research.

Career opportunities

Graduates have many possible career options and pathways.

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music. Graduates become scholars, researchers, music and arts administrators, and public policy advisors to education and arts organizations or civic and governmental groups.

Career examples include:

arts administrator
community arts advocate
community arts educator
performing musician
public or community school teacher
teaching artist
university professor
worship music leader
youth development facilitator

Music (Musicology), MA (FAMHISTMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Master of Arts program in music with a concentration in musicology, faculty provide and participate in multisensory learning experiences concerning musical genres, styles and forms, performance and listening practices, instruments, spaces, philosophies, musical infrastructures and geographic locations.

Faculty comprises leading scholars specializing in Western and non-Western music, particularly traditions in the Americas and music of the Middle East, Central Asia, Latin America and Indonesia. You can study a variety of topics such as medieval music cultures, the long nineteenth century, jazz, music in popular cultures, musical modernism and experimentalism, intellectual property law, cultural policy, improvisation, sound studies, ecomusicology, dance and embodiment, and music's role in well-being.

You must submit a final project that demonstrates advanced competence and professional capability in research and writing in musicology or ethnomusicology. The culminating project may be a thesis, a series of special papers or a written work of equivalent scope and depth.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours, a thesis, a written comprehensive exam, an oral comprehensive exam and a foreign language exam

Required Core (14 credit hours)
MHL 532 Music Bibliography (3)
MHL 691 Seminars (6)
music theory (5)

Electives (8 credit hours)
music electives (5-8)
open electives (0-3)

Other Requirement (2 credit hours)
performance ensembles (2)

Culminating Experience (6 credit hours)
MHL 599 Thesis (6)

Additional Curriculum Information
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

At least 20 credit hours of this program must be in the field of music history and literature.

Appropriate elective coursework is reviewed and approved by the academic unit prior to inclusion on the student's plan of study.

A passing grade on the foreign language exam or a grade of "B" or higher in a designated reading course through the School of International Letters and Cultures is required for graduation.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) (including a resume, personal statement and writing sample)
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed prior to starting graduate-level course requirements in music history and music theory.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Write research papers applying the conventions of scholarly discourse in music.
Implement a large-scale independent research project that makes a unique contribution to the discipline of ethnomusicology.
Apply a synthesis of knowledge of a chosen or designated field of inquiry within musicology to the articulation and defense of a particular scholarly viewpoint.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

Career examples include:

community arts advocate
musicologist
performing musician
public or community school teacher
university professor

Admission deadlines (https://musicdancetheatre.asu.edu/admission/graduate-music-admission)

Music (Musicology), PHD (HIMUSMPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Philosophy program in music with a concentration in musicology focuses on the scholarly study of sound and music in historical contexts, musical traditions as sociocultural artifacts and behaviors, and performance. These areas are approached through the investigation of genres, styles, forms, performance and listening practices, instruments, spaces, philosophies, musical infrastructures and geographic locations. Faculty members include Sabine Feisst, Dave Fossum, Kay Norton, Catherine Saucier, Ted Solis and Christi Jay Wells. They are leading scholars specializing in Western and non-Western music, particularly traditions in the Americas and music of the Middle East, Central Asia, Latin America and Indonesia.

You can study a variety of topics, including medieval music cultures, the long nineteenth century, jazz, music in popular cultures, musical modernism and experimentalism, intellectual property law, cultural policy, improvisation, sound studies, ecomusicology, dance and embodiment, and music's role in well-being.

Coursework includes historiography, applied musicology, methodologies and pedagogy. Transdisciplinary studies are encouraged with scholars and artists in the School of Music, Dance and Theatre (e.g., a studio professor, music theorist or composer), the Herberger Institute for Design and the Arts (e.g., a design or dance faculty member), and faculty in schools and institutes across the university (e.g., specialists in languages, regions or cultures).

A plan of study is designed by you, with the faculty to support an individualized research trajectory. You conduct research in the doctoral program in musicology that aims to examine and interrogate the discipline of musicology and to expand the traditional boundaries of music scholarship by challenging methodological and disciplinary boundaries. The program concludes with a dissertation.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a written comprehensive exam, an oral comprehensive exam, two foreign language exams, a prospectus and a dissertation

Required Core (10 credit hours)
MSI 601 Contemporary Topics in Music Research (2)
MSI 602 Current Issues in Music Research (2)
MSI 755 Historical Research in Music (3)
MTC 520 Analytical Techniques (3)

Concentration (15 credit hours)
MHL 632 Applied Musicology (3)
MHL 668 Introduction to Ethnomusicology (3)
MHL 500, 600 (9)

Electives and Research (47 credit hours)

Teaching Experience (6 credit hours)
MHL 684 Internship (3)
MHL 691 Topic: Music History Pedagogy (3)

Culminating Experience (12 credit hours)
MHL 799 Dissertation (12)

Additional Curriculum Information
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

Concentration coursework includes MHL courses, which should be selected in consultation with your program advisor. No more than six credit hours outside of the School of Music, Dance and Theatre may apply to this requirement.

Teaching experience requirements consist of MHL 691 Music History Pedagogy, in which students examine multiple facets and modalities of teaching music history, and MHL 684 Internship, in which students teach an appropriate undergraduate musicology course as instructor of record with guidance of the musicology faculty.

Students should see the academic unit for a complete list of approved electives and research courses.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree program. Students entering the program without an earned Master of Arts degree complete the requirements for the MA in music with a concentration in ethnomusicology or musicology.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree in music or a graduate degree from an accredited college or university of recognized standing in music history, musicology, ethnomusicology or music theory.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

The School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) must include a curriculum vitae, a two-page personal statement expressing the goal in pursuing this degree and two writing samples. It's preferable that each of the writing samples be a paper from a course (either an upper-level undergraduate course or a graduate course) or an article or document written by the applicant.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Write research papers applying the conventions of scholarly discourse in music.
Implement a major independent research project that makes a unique contribution to the discipline of musicology.
Synthesize knowledge of music history pedagogy in the teaching of an undergraduate course.

Career opportunities

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions. The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Music (Performance), DMA (FAPERFDMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Musical Arts program in music with a concentration in performance is a professional offering for you as an advanced musician seeking high-level performance instruction and preparation for teaching positions at the university level.

You collaborate closely with faculty mentors to achieve professional performance standards through individual recitals, chamber music, and participation in ensembles such as wind band, orchestra, choir, brass, jazz, musical theatre and opera, depending on your area of emphasis.

On- and off-campus performance opportunities enhance your knowledge and abilities, preparing you to become a leader in your musical community through teaching, performance or arts advocacy. Mentorship from faculty and distinguished guest artists supports your musical growth, while you serve as a role model and mentor for your peers in performances, pedagogy and community engagement opportunities.

The program also fosters collaboration with music scholars, theorists, composers, educators, dancers and theatre artists, providing a diverse variety of experiences. You gain essential skills for a successful career, including audition preparation, networking, organizational strategies, and opportunity creation, and you learn to cultivate an entrepreneurial mindset.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a research paper, a written comprehensive exam and an oral comprehensive exam

Required Core (4 credit hours)
MUP 727 Studio Instruction (4)

Performance Concentration (24 credit hours)
MUP 727 Studio Instruction (12)
MUP 796 Solo Performance (12)

Emphasis Area Coursework (23 credit hours)

Music History and Music Theory (27 credit hours)

Research (12 credit hours)
MUP 792 Research (12)

Culminating Experience (0)
Research paper in the form of a bound document

Additional Curriculum Information
Students select an area of emphasis from the following: piano pedagogy, collaborative piano, instrumental, keyboard and voice. Emphasis coursework depends on the area selected. Students should work in consultation with their academic advisor in the development of their plan of study.

The performance concentration requires at least three recitals after admission to the program, and a research paper. Five recitals are required for the collaborative piano emphasis.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before enrollment in the School of Music, Dance and Theatre.

Thirty credit hours from a previously awarded master's degree may be applied toward the 90 credit hour degree requirement with approval from the academic unit and the Graduate College. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Vocalists: Placement tests in foreign language diction are required upon entry into the program. Students who are judged to be deficient in diction are required to complete and pass a diction review course.

Additional information on requirements for this degree is available on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a U.S. bachelor's degree or higher from a regionally accredited institution, or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country. Students seeking admission typically hold a Master of Music degree. Applicants with other degrees are considered if they have received graduate training similar to that offered in a Master of Music program.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume, personal statement and repertoire list

• official transcripts
• prescreening recording
• three letters of recommendation
• teaching demonstration video (piano pedagogy applicants)
• writing sample (solo piano and piano pedagogy applicants)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at at testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Students should see the program website for application deadlines.

After complete application materials are received, including recommendation letters, transcripts and English proficiency, and a review of prescreening materials is conducted, an applicant may be invited for a live audition. Information about the audition is on the school website (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Synthesize performance practices in the context of diverse musical settings and genres, demonstrating mastery with the literature of one's instrument.
Assess an instrument’s repertoire and pedagogy to develop a unique and professional musical style.
Implement an independent research project that makes a unique contribution to the discipline of music performance.

Career opportunities

Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many areas, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide variety of companies and professions. The School of Music, Dance and Theatre graduate programs inspire and empower individuals to become creative leaders who transform society through music.

Career examples include:

arts administrator
community arts advocate
composer for film, video games and television
music therapist
performing musician
public or community school teacher
university professor

Music (Music Composition), DMA (FACOMPDMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Doctor of Musical Arts program in music with a concentration in music composition is a comprehensive professional degree program if you are an outstanding student of acoustic, electronic and multimedia composition. You develop your own compositional voice and focus on your area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with faculty.

You have multiple performance opportunities that include readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the Wind Ensembles and the Philharmonia; commissions for the PRISMS contemporary music festival; and collaborations with student performers, animators, filmmakers and dancers.

You have extensive interaction with faculty and opportunities to develop advanced skills in compositional techniques from a wide variety of styles and traditions, with emphasis on fostering your personal approach to composition. Collaborations with music scholars, theorists, performers, educators and other composers provide you with a broad and well-rounded foundation for advanced careers in music and teaching at the university level.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a foreign language exam, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

The credit requirements for the degree are distributed as follows:

major area (composition, music technology, electives) (36 credit hours)
music theory and music history (30 credit hours)
research (12 credit hours)
dissertation (12 credit hours)

The music composition concentration requires the creation of a significant original work of music (considered to be a dissertation) and either two article-length research papers or a substantial paper.

Additional Curriculum Requirements
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before enrollment in the School of Music, Dance and Theatre.

Thirty credit hours from a master's degree may be applied toward the 90 credit hour degree requirement. Once admitted to the program, a student is required to be enrolled continuously, excluding summer sessions, until all requirements for the degree have been fulfilled. In general, the student should expect to spend at least the equivalent of three academic years in the program beyond the master's degree. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Additional information on requirements for this degree is available on the curriculum check sheet on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of a bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission), including a resume and personal statement
• official transcripts
• prescreening portfolio
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Students should see the program website for application deadlines.

After complete application materials have been received, including recommendation letters, transcripts and English proficiency, and review of prescreening materials, an applicant may be invited for an interview. Information about the interview can be found on the school's admission website (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Compose original works, applying theoretical understanding of musical techniques.
Create a significant original work that integrates and synthesizes various principles of composition.

- Interpret specific musical products within the context of a specific theoretical, historical, or cultural tradition.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower graduates to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching and researching, and in arts advocacy, are in high demand across many sectors. They are welcomed in many industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide variety of companies and professions.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games or television
- performing musician
- public or community school teacher
- university professor

Music Entrepreneurship, Certificate (HIMERTGRCT)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

Music entrepreneurship is a discipline that intersects the traditional music disciplines. Music entrepreneurship centers= the skills and mindset of the entrepreneur to empower you to create work that is meaningful, sustainable and oriented= to community and market need.

You benefit from the business, marketing and organizational skills offered by certificate courses as applied specifically= to and within the arts.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (3 credit hours)
MUP 538 The Enterprising Artist (3)

Electives (9 credit hours)

Internship (3 credit hours)
MSC 584 Internship (3)

Additional Curriculum Information
In consultation with the faculty coordinator, students select three electives based on their interests and goals for the certificate.

Additional information on requirements for this degree is available on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in music or related field from a regionally accredited institution or can demonstrate a background in music.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted to a graduate degree program before being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this program.

Applicants may be admitted to the program by submitting a statement of interest outlining their music background and personal goals.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply key concepts of entrepreneurship to critical evaluation of music career paths.
Synthesize knowledge of music entrepreneurship within the Phoenix area and surrounding communities through music entrepreneurship fieldwork.

Career opportunities

A certificate in music entrepreneurship enables students to enhance the marketable skills they acquire through their other studies and help them develop new skills, including marketing, business practices, grant writing, arts administration and fundraising management.

Career examples include:

arts administrator
community arts advocate
performing musician
public or community school teacher
university professor

Music Learning and Teaching, MM (FAMUSEDMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in music learning and teaching is designed for you as a music educator, teaching artist or music professional, to help you seek new and expanded opportunities for career development in learning and teaching.

Program flexibility affords you opportunities to customize degree pathways; advance your goals; and develop musical, scholarly and leadership roles in your professional settings. You develop your capacity to address pressing issues in music learning and teaching and contribute to professional dialogue.

You may elect courses in each part of the degree program and may design a course of study that meets your specific interests and needs. The program provides opportunities to study full time, part time (through evening courses) or in the summers only, or to combine full-time, part-time and summer study. As a full-time student, you may complete the program in as little as one year. You can also complete courses toward the degree program as a digital commuter (off campus) via the ASU Sync platform, which involves attending an in-person course live online.

If you're interested in teacher certification, you can pursue those requirements concurrently with or separately from master's degree study.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours and a portfolio

The degree credit requirements are distributed as follows:

music learning and teaching core (10 credit hours)
musicianship core (10 credit hours)
specialization (12 credit hours)

Additional Curriculum Requirements
Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to

enrollment in the School of Music, Dance and Theatre.

Six credit hours may be transferred from another regionally accredited graduate institution. Up to nine credit hours may be taken prior to admission.

As part of the portfolio, students also must participate in an oral review that is monitored internally by the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program.

All applicants must submit:
• online graduate admission application and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) (including a resume)
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed before starting graduate-level course requirements in music history and music theory.

Applications are accepted until all spaces are filled and are reviewed on a rolling basis. Applicants are encouraged to apply as early as possible and should see the program website for more information about application deadlines. To ensure prompt processing, applicants should email MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) after submitting an application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Develop independent research skills to analyze and interpret music.
Analyze one's own performance in research and teaching practices.
Design appropriate instructional activities for K--12 music programs.

Career opportunities

The flexibility of the MM program in music learning and teaching affords students opportunities to customize degree pathways toward multiple kinds of careers while still working as music educators, teaching artists or music professionals.

Career examples include:

arts administrator
community arts advocate
performing musician
public or community school teacher
teaching artist or university professor
worship music leader
youth development facilitator

Performance (Performance), MM (FAPERF3MM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Master of Music program in performance, you focus on developing advanced skills in both the performance and teaching of music.

You collaborate with faculty mentors to reach a professional level of performance through individual recitals; chamber music; and participation in ensembles such as choral, wind band, orchestra, jazz, musical theatre and opera, depending on your area of emphasis. On- and off-campus performance opportunities enhance your knowledge and abilities, preparing you for leadership roles in teaching, performance or arts advocacy within your musical communities.

Collaboration with music scholars, theorists, composers, educators, dancers and theatre artists provides a well-rounded foundation for advanced careers in music or continued doctoral studies. Additionally, you acquire essential skills for a successful music career, including audition preparation, networking, organizational strategies and opportunity creation, and you develop an entrepreneurial mindset.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours and a written comprehensive exam

Required Core (4 credit hours)
MUP 527 Studio Instruction (4)

Concentration (6 credit hours)
MUP 527 Studio Instruction (4)
MUP 596 Solo Performance (1)
MUP 597 Solo Performance (1)

Area of Emphasis (10-11 credit hours)

Other Studies in Music (11-12 credit hours)

Culminating Experience (0 credit hours)
written comprehensive exam (0)

Additional Curriculum Requirements
Students select an area of emphasis from the following: instrumental performance, jazz performance, keyboard performance or multiple woodwinds performance. Students should see the academic unit for specific requirements for the selected area of emphasis.

The Other Studies in Music requirement consists of six credit hours of MHL coursework and five or six credit hours of MTC coursework. Students should see the academic unit for specific requirements.

Area of Emphasis credit hours may include electives depending on course selections.

All new graduate music students must complete diagnostic exams in musicology and music theory before enrolling in courses for these programs through the School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on requirements for this degree is available on the curriculum checksheet on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) (including a resume, personal statement and repertoire list)
• official transcripts
• prescreening video (voice applicants)
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Applicants must perform an audition for admission. Auditions are scheduled following receipt of completed application materials (including recommendation letters, transcripts and proof of English proficiency) and, when applicable, a favorable review of prescreening materials. Students can find more information about the audition at the school's website (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview).

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu for information on potential courses to complete. Additional courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed before starting graduate-level required courses in music history and music theory.

Voice applicants: Students should see the program website for application deadlines. After receipt of the completed application and review of prescreening materials, an applicant may be invited for an audition.

Instrumental and keyboard applicants: Students should see the program website for application deadlines. After an applicant's complete application materials have been received, the applicant is confirmed for an audition.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of one's instrument.
Evaluate an instrument’s repertoire and pedagogy to develop a unique musical style.
Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower individuals to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand in many sectors and industries. Potential areas of employment include performing arts, education, entertainment, health and wellness, and community arts. Skills such as creativity, collaboration, innovation, entrepreneurship and focused discipline can help graduates be successful as musicians in a variety of companies, organizations and institutions.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games or television
- performing musician
- public or community school teacher
- university professor

Music Theory Pedagogy, Certificate (HIMTPGRCT)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

This certificate program in music theory pedagogy offers specialized study in music theory to help prepare you to teach= undergraduate courses in fundamentals, harmony, musicianship and basic form analysis. Completion of this certificate= indicates that you are prepared to offer instruction in basic music theory at the college level.

The certificate is intended to be pursued concurrently with a master's or doctoral degree program in the School of= Music, Dance and Theatre.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (3 credit hours)
MTC 525 Pedagogy of Theory (3)

Other Requirement (3 credit hours)
MTC 584 Internship (3)

Electives (9 credit hours)

Additional Curriculum Information
All new graduate music students must complete diagnostic examinations in musicology and music theory administered= by the School of Music, Dance and Theatre before enrolling in any graduate academic courses for the certificate= program.

Electives are selected with advisor approval from MTC courses in analytical topics. Students should see the academic= unit for a complete list of approved electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Students who are interested in this certificate should email the academic unit to express their interest before they submit an official application.

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree in music or music education from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an international institution officially recognized by that country. Other majors may be considered if applicants submit transcripts showing formal study in music theory and musicianship that is at least equivalent to what is required of ASU's undergraduate music majors (MHL 140, MHL 341, MHL 342, MTC 125, MTC 221, MTC 222 and MTC 223). The music theory faculty review transcripts for equivalency. In some cases, course descriptions or syllabi are required to verify equivalency.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in any applicable graduate work.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre certificate application (https://musicdancetheatre.asu.edu/admission/minors-certificates), to include materials listed below
• proof of English language proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted to a graduate degree program before they can be considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for this certificate program.

Official transcripts must show a completed bachelor's degree from a regionally accredited institution in the U.S. or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country. Also, if applicable, transcripts showing all coursework in music at the graduate level are required. The committee supervising this certificate program considers an applicant's undergraduate record (and graduate record if appropriate) in music theory, evaluating courses taken and grades received. A minimum GPA of 3.00 in these courses is required. International students applying to this program must also be in a degree program at ASU.

In the School of Music, Dance and Theatre application, applicants must submit a statement of interest explaining their reasons for applying to the certificate program and describing their experience and coursework in music theory. The statement should also indicate the applicant's level of piano proficiency (a necessary classroom skill) through a description of their study and their experience in keyboard performance.

Applicants also are asked to show proficiency in music theory by submitting samples of work that demonstrate analytical thinking, broadly defined. Samples should include a written component along with illustrative evidence, such as an annotated score, formal diagram or annotated composition.

For questions about submission materials, applicants should contact the graduate certificate program director.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design appropriate instructional activities for basic music theory at the college level.
Assess one's own pedagogy skills through an internship experience.

Career opportunities

The certificate program in music theory pedagogy can help graduates enhance the marketable skills they acquire in their master's or doctoral degree program and help them develop additional skills, though most career areas require more training than a certificate alone can provide.

Career examples include:

arts administrator
performing musician
public or community school teacher
university professor

Music Therapy, MM (FAMTHERMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in music therapy provides you with rigorous studies in the theory, practice and research of music therapy.

There's a two-year track if you've completed either the undergraduate music therapy degree or its equivalent and are board-certified, or hold a similar international music therapy credential. Additionally, a three-year track is offered if you have an undergraduate degree in music but not in music therapy.

The master's degree program fosters an expanded research perspective in music therapy, emphasizing community partnerships and program development with a concentration in your area of choice, drawing from a number of possible options. Cognate areas include counseling and counseling psychology, education for people with disabilities, gerontology, social work, audiology and speech-language plus other areas.

STEM-OPT extension eligible: No

Degree requirements

33 credit hours including the required applied project course (MUE 586) and a written comprehensive exam, or
33 credit hours, a thesis and a written comprehensive exam, or
63 credit hours including the required applied project course (MUE 586) and a written comprehensive exam, or
63 credit hours, a thesis and a written comprehensive exam

The degree credit requirements for the two-year track are as follows:

Music therapy core (16 credit hours)
Other studies in music (8 credit hours)
Clinical cognate (9 credit hours)

Three-year track: In addition to the requirements stated above, the three-year track requires 30 credit hours of deficiency coursework for a total of 63 credit hours, including completion of an internship required for certification.

Additional Curriculum Requirements
Completion of diagnostic exams in musicology and music theory are required of all new graduate-level music students before enrolling in the School of Music, Dance and Theatre.

Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Graduates are eligible to sit for the music therapy certification examination given by the Certification Board for Music Therapists.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a U.S. bachelor's or master's degree in music or music therapy from a regionally accredited institution or the equivalent of a U.S. bachelor's or master's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application (https://admission.asu.edu/apply/graduate) and application fee
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission), including a resume and personal statement
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a minimum TOEFL iBT® score of 4, or 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

All applicants are required to perform a live audition or submit an audition recording (https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview). Auditions are scheduled

only after complete application materials have been received.

Applicants to the three-year track must complete the prerequisite courses listed below, which are not a part of the coursework for the MM program in music therapy (three-year track) but are required for eligibility to sit for the board certification exam (cbmt.org (http://www.cbmt.org)). These prerequisites may be taken during undergraduate study, at a community college or other university before beginning the MM program in music therapy (three-year track), during summer sessions at ASU, or online through an accredited institution recognized by ASU. An applicant is eligible to apply to the MM program in music therapy (three-year track) while completing these prerequisites and may finish these courses during the first year in the program, although this additional work may present a challanging workload. The prerequisite courses must be completed before a student begins the internship at the end of their first year of study at ASU, unless prior arrangements have been made. Completing the prerequisite courses before beginning the MM program in music therapy (three-year track) is highly recommended.

• Introduction to Psychology
• Abnormal Psychology
• Overview of Exceptional Children/Special Education

Applicants should visit the program website for more information on application deadlines. To ensure prompt processing of the application, applicants should email MDTAdmissions@asu.edu (mailto:MusicAdmissions@asu.edu) after submitting an application. An in-depth interview emphasizing the applicant's music therapy philosophy, research activities and clinical interests is scheduled after receipt of complete application materials. A phone interview may be arranged.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply advanced musicianship skills across voice, guitar, piano, percussion and technology related tools and instruments to facilitate therapeutic goals for clients.
Evaluate existing literature for gaps in research
Critically assess music therapists through clinical supervision.

Career opportunities

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

Career examples include:

arts administration
community arts advocate
music therapist
performing musician
public or community school teacher
university professor

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Performance (Collaborative Piano), MM (FACPIANOMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in performance with a concentration in collaborative piano gives you the opportunity to perform with all instrumental areas and voice, focusing on collaborative endeavors such as song recitals, instrumental duos, chamber music, and operatic and musical theatre productions, and participation in large ensembles.

You refine your pianistic technique while developing the specific knowledge and abilities necessary to be skilled and sensitive musical collaborators, preparing you for advanced careers in music. As a collaborative piano student, you have an impact on every area of the School of Music, Dance and Theatre through your work with opera and musical theatre singers, orchestral instrumentalists, choral and large ensembles, composers, theatre artists, and dance colleagues.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours and a written comprehensive exam

Required Core (4 credit hours)
MUP 527 Studio Instruction (4)

Concentration (14 credit hours)
MUP 511 Studio Instruction: Piano (4)
MUP 527 Studio Instruction: Collaborative Piano (4)
MUP 588 Collaborative Piano (2)
MUP 596 Solo Performance (2)
MUP 597 Solo Performance (2)

Electives (2-3 credit hours)

Other Studies in Music (11-12 credit hours)
Music history (6)
Music theory (5-6)

Culminating Experience (0 credit hours)
Written comprehensive exam (0)

Additional Curriculum Requirements
The Other Studies in Music requirement consists of six credit hours of MHL coursework and five to six credit hours of MTC coursework.

All new graduate music students are required to complete diagnostic exams in musicology and music theory before enrolling in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on requirements for this degree is available on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre application (https://musicdancetheatre.asu.edu/admission/graduate-music-admission) (including a resume, personal statement and repertoire list)
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Applicants must perform an audition for admission. Auditions are scheduled after complete application materials are received, including recommendation letters, transcripts and proof of English proficiency. Information about the audition may be found at the School of Music, Dance and Theatre website (https://musicdancetheatre.asu.edu/).

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should email MDTAdmissions@asu.edu for information on potential courses to complete. Additional courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed before starting required graduate-level courses in music history and music theory.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of their instrument.
Evaluate their instrument's repertoire and pedagogy to develop a unique musical style.
Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions

Career opportunities

School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors. They are welcomed in many professional areas, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. They thrive doing collaborative work in music-related fields such as media production, music business, publishing and marketing.

Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as a musician are all highly valued by a wide variety of companies and professions.

Career examples for collaborative pianists include:

performing as a collaborative pianist with singers, instrumentalists, choral ensembles or large instrumental ensembles
performing as a pianist for musical theatre or opera productions
performing as a pianist for music recording and studio work
teaching in a private studio or community music program
teaching as a university professor or staff pianist
working as a vocal coach

Performance (Conducting), MM (HIPERCOMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in performance with a concentration in conducting presents you as a conductor of orchestras, wind bands and vocal ensembles with the opportunity to improve your art, craft and scholarship in pursuit of both professional and academic career aspirations. This program is also beneficial if you are a public school teacher of choirs, orchestras and wind bands and want to strengthen your skills.

There are four tracks within this concentration.

Wind band track: In this track, you conduct study privately with the director of bands and have the opportunity to work closely with other members of the conducting faculty members, including the director of athletic bands. Time in front of an ensemble is essential; therefore, you have significant podium time and twice-weekly chamber winds classes. You learn conducting technique, rehearsal technique, leadership, interpretation, score study, audience development and outreach, and career development.

Orchestral track: Required courses are specific to orchestral conducting, and elective courses provide additional opportunities for further orchestral study.

Music direction track: The music direction track is designed to meet your needs as a musical director, focusing on musical theatre and opera conducting. Required courses focus on music theatre and opera rehearsal techniques, technical production and repertoire.

Choral track: The choral track prepares you for careers throughout the choral field by helping you develop and refine your individual artistic voice. You engage in a curriculum that explores culturally responsive applications, decolonial pedagogies, global score study and interdisciplinary framing of gesture. You receive substantial podium time and work closely with conducting faculty members.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours including a written comprehensive exam

Required Core (4 credit hours)
MUP 527 Studio Instruction (4)

Concentration (7 credit hours)
MUP 596 Solo Performance (1)
MUP 597 Solo Performance (1)

Students choose from the following, for a total of five credit hours:
MUE 564 Instrumental Music, Advanced Rehearsal Techniques (3)
MUP 540 Principles of Integrated Conducting (2)
MUP 551 Repertoire: Music Theatre Repertoire (2)
MUP 571 Music Theatre: Workshops (1)
MUP 573 Music Theatre: Performance (1)

Track (9 or 10 credit hours)

Other Studies in Music (11 or 12 credit hours)
Music history (6)
Music theory (5 or 6)

Culminating Experience (0 credit hours)
Written comprehensive exam (0)

Additional Curriculum Requirements
Students select a track from the following: choral, wind band, orchestral or music direction. Students should see the academic unit for specific concentration and track course requirements for each track.

The Other Studies in Music requirement includes six credit hours of MHL coursework and five or six credit hours of MTC coursework.

Track credit hours may include electives depending on course selections.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before they enroll in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on degree requirements is available on the curriculum checksheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

Performance (Performance Pedagogy), MM (FAPPEDMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Music program in performance with a concentration in performance pedagogy focuses on performing and teaching music, with an emphasis on pedagogy.

You work on your own performance skills while you develop the knowledge and abilities necessary to be an outstanding teacher in your area through pedagogy classes, observation, and teaching in private and group settings.

The opportunity to collaborate with music scholars, theorists, composers, educators, dancers and theatre artists provides you with a foundation for a career as a performer, teacher and musician of the highest level. You may also engage with local and state professional organizations and have the opportunity to present scholarly research or creative activities through workshops or publications.

STEM-OPT extension eligible: No

Degree requirements

32 credit hours and a written comprehensive exam

Required Core (4 credit hours)
MUP 527 Studio Instruction (4)

Concentration (6 credit hours)
MUP 527 Studio Instruction (4)
MUP 596 Solo Performance (1)

Performance (Voice, Music Theatre, Opera), MM (FAMUTPOMM)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

You refine your craft and prepare for a meaningful career in music in the Master of Music in performance with tracks in opera, music theatre and voice performance. This program provides you with hands-on training and performance experience to help you excel as an artist and professional.

You tailor your studies to fit your interests. After choosing one of three tracks, you have the opportunity to focus on one area or explore other disciplines, including those from other tracks. You can also choose to explore pedagogy, stage technology or entrepreneurship.

The program provides specialized training in voice, acting, dance, movement, audition techniques, career skills and vocal coaching. The courses bring all these skills together, giving you the tools and confidence needed to succeed as a professional musical artist.

The concentration in voice, music theatre and opera provides diverse training in performance styles. Each season features musicals and operas, along with student-led productions and new works. Collaborations with Arizona Opera and The Phoenix Theatre Company, plus annual music theatre showcases in New York City and Phoenix, give you exciting performance opportunities and professional experience.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply vocal performance practices and techniques in the context of diverse musical settings and genres, demonstrating familiarity with the literature and with different singing styles.
Evaluate vocal repertoire and pedagogy to develop a unique musical style.
Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions.

Career opportunities

The School of Music, Dance and Theatre graduate programs empower students to become creative leaders who transform society through music.

Musicians are in high demand in many industries because of their creativity, innovation and collaboration skills. Graduates are prepared to work in various professional and entrepreneurial capacities, performing as freelance soloists, stage performers or choral singers in numerous settings, including opera companies, Broadway and Off-Broadway productions, concert halls, regional theatre companies, touring productions, dinner theatres, cruise ships, resorts and theme parks, restaurants, concert halls and churches.

Graduates also find work in music-related fields, presenting school and community programs, recording in studios, and teaching privately or as part of a college or university program. Areas of employment include:

arts administration
media production
music business
music marketing
music publishing

The Art of Bespoke Tailoring, Certificate (HIBTGRCT)

College/School: Herberger Institute for Design and the Arts

Campus: Online

Program description

This microcertificate program in the art of bespoke tailoring immerses students in the sustainable craft of authentic= handmade bespoke tailoring, a centuries-old practice rooted in the traditions of Savile Row in London, ''Sartoria su= misura'' in Milan and ''Haute Couture'' in Paris. Emphasizing craftsmanship, artistry and sustainability, the program= explores bespoke as a form of wearable art that combines sculptural design, architectural precision and hand-worked= cloth construction.

Designed for professionals and graduates seeking to advance their technical expertise, the program focuses on the= historical and cultural origins of bespoke tailoring while developing industry-level, career-ready skills in design, pattern= drafting and garment construction. Through the creation of tailored blazers and trousers, students learn to select= appropriate fabrics, adapt and mark patterns, and master hand-stitching and molding techniques using the iron,= mirroring traditional Savile Row apprenticeship methods. This program distinguishes bespoke from ready-to-wear and= made-to-measure production, preparing graduates to uphold the values of sustainability, individuality and= craftsmanship in contemporary fashion design.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education= benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT extension eligible: No

Degree requirements

Theatre (Directing), MFA (FADIRMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Fine Arts program in theatre with a concentration in directing develops you as a director of live performance and helps you grow your artistry through deep study, experimentation and practical work. A high-engagement, mentor-student approach is emphasized with the intent of developing the skill, artistry and

communication skills required to be an excellent professional director.

You make bold new work in collaboration with playwrights as well as through ensemble-based devising. You are encouraged to tell contemporary, culturally specific stories as well as to reimagine well-known plays, all while nurturing your artistic curiosity. You learn about current practices, allowing you to thrive as a compassionate, inclusive and respectful artistic leader.

Additional Curriculum Information
Students should see their program advisor for a complete list of approved topics for THP 598.

Directing faculty members mentor all student projects. Academic and artistic progress is evaluated at the end of each semester by a faculty committee. Program continuation is contingent upon a successful review. A professional internship is required for each MFA director.

Additional information on degree requirements for this degree is available on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), including statement of purpose, current resume and a written directorial approach to a play selected by the reviewing committee
• three letters of reference from professionals familiar with the student's work
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A personal interview is required. Interviews via phone, video conference or campus visit are available by appointment.

• The MFA in theatre with a concentration in directing recruits every three years. The next round of applications will be accepted in January 2028 for fall 2028. Interested students should check back for updates.

Students should see the program website (https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission) for application deadlines and admission terms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply collaborative methods for making theatre, experiential events, and other forms of live performance.
Implement current best practices, such as approaches to theatrical intimacy and culturally competent theatre making, into directorial work.
Evaluate their directing technique, employing reflective practice toward continuous growth.

Career opportunities

Professionals with an MFA degree in directing have obtained a variety of creative roles within the arts, including directing professionally, working within established theatres and arts organizations, and building entrepreneurial ventures that bridge the arts with other sectors. Career examples include:

creating and producing original devised work for festivals or communities
founding new theatre companies with like-minded collaborators
joining the artistic staff of an established theatre company
teaching in a variety of contexts as a visiting faculty member, professor of practice or tenure-track professor
working as a freelance director

Theatre (Dramatic Writing), MFA (FADRWRTMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The concentration in dramatic writing under the Master of Fine Arts program in theatre includes coursework in playwriting, screenwriting, historical studies in theatre, and dramatic theory. You direct new work, study dramaturgy and literary management, and pursue related topics such as writing for solo performance, storytelling, devising and collaborative writing in a variety of genres such as comedy, horror, science fiction and fantasy.

The School of Music, Dance and Theatre supports the production of new plays and performance works written by its MFA students. Student-written work is showcased in annual Theatre Labs and is considered for main stage productions.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (THP 693)

Required Core (6 credit hours)
THE 504 Studies in Dramatic Theory and Criticism (3)
THE 520 Theatre History and Literature (3)

Concentration (21 credit hours)
THE 562 Dramaturgy Workshop (3)
THP 560 Dramatic Writer's Workshop (15)
THP 561 Scripts in Progress (3)

Other Requirements (6 credit hours)
THE 500 Research Methods (3)
THP 598 Special Topics (3)

Electives (21 credit hours)

Culminating Experience (6 credit hours)
THP 693 Applied Project (6)

Additional Curriculum Information
As part of the electives coursework, students have the option to complete an internship (THP 684) for three credit hours.

Students should see the academic unit for a complete list of approved electives. Additional information on degree requirements for this degree is available on the curriculum check sheet located on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

The applied project is the writing of a thesis play, to be developed as one of the following: a full production on the school's main stage, a staged reading or a workshop production.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in theatre or in creative writing from a regionally accredited institution. An applicant may have an undergraduate degree outside of theatre and may be admitted on the basis of excellent creative writing and academic work. Deficiencies in undergraduate preparation may be removed while pursuing the MFA degree.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), including a current resume, statement of career goals (including writing endeavors or interests), and a manuscript sample of either a full-length play (60 pages or more) or a series of one-act plays (30 pages minimum) or a screenplay or teleplay of similar length
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Create new dramatic works reflecting advanced knowledge of the dramatic writer's art and craft with each new work.
Able to critique dramatic works, employing knowledge of the history, theory and dramaturgy of the art form.
Able to teach in dramatic writing and in other related areas in dramatic analysis, storytelling or theater history.

Global opportunities

Global experience: Students are encouraged to apply to international conferences and fellowships such as the Fulbright Program (https://onsa.asu.edu/fulbright).

Career opportunities

Professionals with an MFA degree in dramatic writing regularly have their work produced at festivals, staged readings and theatres across the country. They have obtained highly competitive artist residencies and awards for their work. Many have had their plays published.

Career examples include:

presenting readings and full productions of work at theatre conferences and festivals
publishing plays

teaching in a variety of contexts: as adjunct faculty, visiting faculty or tenure-track professor
working at an established arts organization in a variety of roles
working as a teaching artist

Theatre (Interdisciplinary Digital Media), MFA (FATHEADMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

The Master of Fine Arts program in theatre with a concentration in interdisciplinary digital media looks at digital media as a lens for making art, telling stories and creating meaningful experiences.

Daily lives are often saturated with information from a multitude of sources, and people rely on an increasing number of digital tools and processes. Simultaneously, the nature of live experience is broadening with an ever-expanding set of new forms for immersion and interaction. The possibilities to tell stories and engage audiences seem limitless.

This program trains you as an artist, creative technologist, evaluator, designer and entrepreneur in the field of digital media for live experience, building on a foundation of core courses in theatre. Courses from across the school are combined with research activities to prepare you to become a leader in your chosen area of focus by providing an individualized pathway developed in conversation with mentors.

At the heart of the graduate program is a spirit of collaboration. Offered through the School of Music, Dance and Theatre in partnership with The GAME School, the program fosters a supportive and engaging community where you can learn and grow alongside your peers.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (THP 693)

Required Core (6 credit hours)
THE 504 Studies in Dramatic Theory and Criticism (3)
THE 520 Theatre History and Literature (3)

Concentration (33 credit hours)
AME courses (15)
THE and THP courses (18)

Other Requirements (3 credit hours)
THE 500 Research Methods (3)

Electives (12 credit hours)

Culminating Experience (6 credit hours)
THP 693 Applied Project (6)

Additional Curriculum Information
The coursework in AME and theatre will be selected in consultation with the faculty advisor to ensure a breadth of transdisciplinary knowledge.

Additional information on degree requirements for this degree is available on the Music, Dance and Theatre graduate degree page (https://musicdancetheatre.asu.edu/degree-programs/graduate).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), including current resume, statement of purpose, portfolio that supports the statement of purpose and an academic writing sample from a previous degree program, independent work or publication.
• three letters of recommendation from professionals familiar with the applicant's work
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should describe the applicant's background in theatre and interest in and suitability for work at the intersection of theatre and digital media.

Applicants should thoroughly review application deadlines and requirements (https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission); however, applicants should also note that for financial aid purposes, The GAME School deadline is February 1.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Create media applications for live performance that reflect advanced competency in media applications.

Assess media design options for specific live performance projects, reflecting the application of academic rigor and contemporary theoretical knowledge in the fields of media design and engineering.
Participate in cross-disciplinary collaborative processes at an advanced skill level.

Career opportunities

Graduates are prepared to become intentional developers, makers, evaluators and entrepreneurs of digital media. They work in a variety of settings and industries, including interactive and experience design, themed entertainment, virtual production, extended reality, higher education, event design, professional theatre companies and community arts organizations.

Alumni of the program design projections on Broadway, design immersive experiences and interactive environments, lead university programs in interactive media, direct media teams at significant institutions, and produce field-leading research and creative work.

Career examples include:

AR, VR or XR designer
digital media artist or designer
digital media arts educator or professor
digital media composer
interactive media designer
interactive performance artist
media technician
performance designer

Theatre (Performance), MFA (FAPERFMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Fine Arts program in theatre with a concentration in performance focuses on cultivating you as an actor-creator and fostering you as a conceptual thinker and collaborator. This is accomplished by teaching you to develop and create original devised works and enabling you to develop your skills as an artist entrepreneur. You learn innovative performance applications in multimedia and transdisciplinary collaboration, which are informed by artistic integrity and social responsibility.

The school offers multiple approaches to devising and new work development:

• Fitzmaurice voicework
• Lecoq training
• new play development
• performance technology
• rasaboxes
• solo and collaborative performance
• various devising methodologies

• viewpoints

In addition to core physical and vocal training, the program offers undergraduate-level teaching opportunities, funding for national and international conference travel, and career development internship opportunities.

During the third year of study, you conduct professional career development internships. In the past, students have completed internships at:

• Childsplay Theatre Company
• Cleveland Playhouse
• Dah Theatre, Belgrade, Serbia
• North Coast Rep
• One Yellow Rabbit
• SITI Company
• Synetic Theatre
• The Actor's Gang (Los Angeles)
• Theatre L'Homme Dieu
• Victory Gardens

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (THP 693)

This is a three-year program culminating in an applied project.

The first year is dedicated to intensive movement; acting and Fitzmaurice voice training; and ensemble-building and devising with a focus on Lecoq, rasaboxes, viewpoints and Meisner.

Second-year training provides opportunities for students to explore their work in a wide range of performance modalities such as community-embedded drama, solo performance, and performance and technology, and to devise original work. Performers collaborate with MFA designers, directors and playwrights to devise a new scripted performance for the mainstage season.

The third year culminates in an applied performance project, serving as a bridge between the educational and professional worlds and the communities they serve.

Academic and artistic progress is evaluated at the end of each semester by a faculty committee. Program continuation is contingent upon a successful review. A professional career development internship is required.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• current resume
• statement of purpose
• academic writing sample
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letters of recommendation should be from professionals familiar with the student's work.

Students are admitted to this program every three years, forming a cohort with their colleagues in the other MFA programs in theatre practice.

An interview, either on campus or at one of the university or resident theatre association sites, is required.

Students should see the program website for application deadlines and admission terms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply a variety of acting, movement, and voice methodologies and modalities to performance contexts.
Apply advanced knowledge of history and theory to collaboration, development, and devising of original work.
Synthesize one's skills towards substantial performance projects that integrate core specializations.

Career opportunities

Professionals with a MFA in performance have successfully obtained tenure-track jobs in movement, voice, acting and devising as well as postgraduate fellowships, visiting faculty positions and adjunct faculty positions at prestigious colleges and universities across the country.

The program builds skills for creating one's own theatre and theatre company, and several of the program's graduates have successfully created their own theatre companies. Several graduates have become professional actors working in regional and professional theatres, have joined established theatre companies or are working within an established theatre company as teaching artists, program coordinators and event curators.

Professional examples include:

creating and forming a theatre company
creating and producing original devised work
obtaining highly competitive local and national arts grants and arts residencies
obtaining tenure-track jobs in acting, voice and movement
obtaining visiting faculty and adjunct faculty positions
performing and touring with established theatre companies

presenting work at national and international conferences
publishing articles and books that impact the field
working within an established arts organization as a teaching artist, program coordinator or event curator

Theatre (Theatre and Performance of the Americas), PHD (FAPERAMPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

You examine the canon of theatre from diverse critical perspectives through coursework, seminars, research and study opportunities in the Doctor of Philosophy program in theatre with a concentration in theatre and performance of the Americas. You are encouraged to think beyond geographical and disciplinary borders, developing the skills required to challenge traditional narratives and expand the boundaries of theatre studies.

To accomplish this, you use a perspective that intervenes in traditionally narrated histories and theories of theatre. You also use cultural and performance studies methodologies to examine other forms of embodied expression that are related to, but distinct from, formal theatrical expression.

During the first year, you explore the theoretical and practical aspects of performance research in general, with a specific focus on performance modalities in the Americas. In the second year, you build on your research interests from the first year through specialized coursework and practical experiences.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a foreign language exam, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (24 credit hours)

Electives (42 credit hours)

Research (12 credit hours)
THE 792 Research (12)

Culminating Experience (12 credit hours)
THE 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

Two of the elective courses must come from outside the school, and they must be approved by the supervisory committee.

In meeting these requirements, students, with the advice of the supervisory committee, may select theatre courses in areas such as community-based theatre, dramaturgy, theatre for social change, theatre history, theatre theory and criticism, and related topics seminars.

Students also may take courses outside the School of Music, Dance and Theatre in areas such as critical and cultural studies, area studies, languages and literatures, and aesthetic theory. All activities are selected to help students meet the goals of the program and develop the capability to become leaders in the field.

Preliminary Reviews:
Reviews of the student's performance in courses and development of research skills, artistic skills and teaching competencies are conducted by the supervisory committee at the end of each semester.

Comprehensive Examinations:
Examinations comprise written and oral components centering on theatre history, literature and criticism, theatre and performance of the Americas and the research area.

Dissertation Requirements:
A dissertation based on original high-quality research work demonstrating proficiency in the student's special field is required.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in a relevant area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program and a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), including curriculum vitae, sample of scholarly writing and a statement of purpose
• three letters of recommendation from professionals familiar with the student's work
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should address the student's background and experiences as they relate to the student's reasons for pursuing the doctorate, and it should describe the student's research interests and indicate future career goals.

An interview is strongly recommended.

Students should review the program website (https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission) for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply doctoral level research methods and theory relevant to the student's area of focus in theatre.
Apply advanced analytical skills in the critical examination of theatre.
Synthesize research and analytical skills towards an in-depth written dissertation project.

Career opportunities

Many graduates of the doctoral degree in theatre and performance of the Americas go on to teaching and research positions in higher education, while some have chosen careers in arts and culture organizations where their expertise in curation and dramaturgical framing of artistic work finds expression. They may participate in postdoctoral fellowships from prestigious universities. There is also a strong record of article and book publication, representing significant contributions to the field.

Career examples include:

education director or program manager
tenure-track faculty member
visiting faculty member

Theatre (Theatre for Youth and Community), MFA (FAYOUTHMFA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

Program description

In the Master of Fine Arts program in theatre with a concentration in theatre for youth and community, you study with distinguished faculty; you engage in comprehensive coursework; and you participate in hands-on experiences in all areas of theatre-making with, by, and for young people and communities. You hone your skills and knowledge in artistry, facilitation and pedagogy in a challenging and supportive atmosphere, developing advanced artistry, engagement and teaching expertise.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (THP 693), a written comprehensive exam and an oral comprehensive exam

Required Core (6 credit hours)
THE 504 Studies in Dramatic Theory and Criticism (3)
THE 520 Theatre History and Literature (3)

Concentration (19 credit hours)
THE 524 Advanced Studies in Theatre for Youth (3)
THE 581 Methods of Teaching Theatre (4) or THP 511 Methods of Teaching Drama (4)
THP 513 Touring Theatre (3)
THP 514 Projects in Community-based Theatre (3)
THP 582 Theatre for Social Change (3)
THP 611 Sites of Inquiry in Performance (3) or THP 618 Theatre for Youth Practicum (3)

Other Requirements (12 credit hours)
THE 500 Research Methods (3)
THE 591 Seminar (3)
THE 598 Special Topics (3)
THP 684 Internship (3)

Electives (17 credit hours)

Culminating Experience (6 credit hours)
THP 693 Applied Project (6)

Additional Curriculum Information
THE 598 Special Topics and elective courses are taken in consultation with Theatre for Youth and Community faculty.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), along with a current curriculum vitae, statement of purpose and a work sample
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants should thoroughly review application deadlines and requirements on the department's website (https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission).

This highly competitive program accepts only a small number of students each year to provide highly individualized attention.

The statement of purpose should clearly explain the applicant's aesthetic and educational philosophies and future career goals. After reading the statement, the faculty should understand not only the applicant's current passions but also why the theatre for youth and community program at ASU would be an appropriate fit to meet the student's educational, practical and scholarly goals. The program accepts thoughtful, well-informed artists, scholars, educators and citizens.

The three letters of recommendation should be from professionals familiar with the applicant's work.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Create new performances, processes and solutions in their core areas of practice (including theatre for and with youth, education and curriculum design, community-based theatre, civic practice, applied theatre and theatre for social justice).
Apply relevant theoretical and critical frames for the assessment of theatre and drama for and with youth and communities in relevant contexts such as K-12 schools, universities, professional and amateur theatres, community centers and applied theatre contexts.
Apply key skills, discourses and organizational strategies of their chosen area of specialization to the creation of new projects or partnerships with existing organizations, such as schools, arts organizations, government entities or other relevant partners.

Career opportunities

Graduates are prepared to be engaged and innovative leaders in a variety of careers in diverse settings and industries, including:

arts entrepreneurship
community arts
elementary, secondary and tertiary education systems
professional theater
youth theater

Examples of careers include:

activist
director
facilitator
organizer
practitioner
specialist
teacher

Theatre (Theatre for Youth and Community), PHD (FAYOUTHPHD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

In this Doctor of Philosophy program in theatre with a concentration in theatre for youth and community, you develop a personalized course of study by participating in comprehensive coursework, developing advanced research skills, and connecting your research interests to contemporary trends and conversations in the field.

You receive individualized attention and focused mentorship in a challenging and supportive atmosphere designed to educate future leaders and researchers in the field.

STEM-OPT extension eligible: No

Degree requirements

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (30 credit hours)

Research (12 credit hours)
THE 792 Research (12)

Research Methodology (6 credit hours)

Electives (30 credit hours)

Culminating Experience (12 credit hours)
THE 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

In meeting these requirements, students, with the advice of the supervisory committee, may select theatre courses in areas such as community-based theatre, theatre education, theatre for social change, theatre history, theatre theory and criticism and tutorial courses.

Students also may take courses outside the School of Music, Dance and Theatre in areas such as aesthetic theory, area studies, children's literature, critical and cultural studies, educational theory and methodology, languages and literatures, arts education, policy research and democracy studies.

Research methodology coursework is chosen in consultation with the supervisory committee. Where appropriate, the supervisory committee may approve certification of literacy in a foreign language as meeting the research methodology requirement. This approval is granted only in those circumstances wherein fluency in that language is necessary for the dissertation research.

Additional Curricular Requirements:

• ongoing reviews of a student's performance in courses and development of research skills, artistic skills and teaching competencies conducted by the supervisory committee at the end of each semester
• comprehensive examinations consisting of written and oral components that center on theatre history, literature and criticism, theatre for youth and theatre education, and the research area
• dissertation developed from an approved prospectus, based on original research work of high quality, demonstrating proficiency in the student's special field and adding new knowledge

All activities are selected to help students meet the goals of the program and develop the capability of becoming leaders in the field.

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in theatre or education from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• curriculum vitae
• School of Music, Dance and Theatre Application (https://apply.mdt.asu.edu/), including a sample of scholarly writing and a statement of purpose
• three letters of recommendation
• proof of English proficiency

An interview is optional.

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

For the statement of purpose, applicants should cogently explain their research, educational philosophies and future career goals. After reading these statements, the doctoral faculty should understand not only their current passions, but also why the theatre for youth and community program at ASU would be an appropriate fit to meet their educational, philosophical and scholarly goals.

Three letters of recommendation from professionals familiar with the applicant's work should address specifically the applicant's potential for success in a doctoral program.

Applicants should thoroughly review application deadlines and requirements (https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Students will be able to create works of scholarship with the potential to build new knowledge in their chosen theatre for youth and community subfields (including: theatre for and with youth, education and curriculum design, community-based theatre, civic practice, applied theatre and theatre for social justice).
Students will be able to make an original contribution to field scholarship and research by implementing a long-form research and writing process (e.g., book-length or multi-year work).
Students will be able to effectively present research as is pertinent to their chosen subfields and subject areas.

Career opportunities

Graduates are prepared to be engaged and innovative leaders in a variety of careers in diverse settings and industries, including:

arts entrepreneurship
community arts
elementary, secondary and post-secondary education systems
professional theater
youth theater

Examples of careers include:

activist
director
facilitator
organizer
practitioner
specialist
teacher

Theatre, MA (FATHEAMA)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Arts program in theatre introduces you to graduate study in the field of theatre and performance studies and provides you with a broad base of knowledge in the areas of history, theory, dramaturgy, research methods and practice.

You have the opportunity to tailor your plan of study to specific research pathways and artistic subject areas, such as performance studies, history and historiography, theory, dramatic writing, theatre for youth, performance as research, technology in performance, drama for teaching and learning, dramaturgy, devising, directing, civic engagement and performance.

The program is for you if you wish to ultimately enter a doctoral program, if you are a K-12 educator seeking to expand and amplify your expertise, or if you are seeking to advance your knowledge of theatre and performance studies.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours, a thesis and a written comprehensive exam

Required Courses (15 credit hours)

Electives (9 credit hours)

Culminating Experience (6 credit hours)
THE 599 Thesis (6)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• current curriculum vitae
• sample of scholarly writing
• statement of purpose
• three letters of recommendation from professionals familiar with the applicant's work
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should address the applicant's background, experiences, research interests, and future career goals as they relate to their reasons for pursuing the degree program.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply graduate level research methods relevant to one's area of focus in theatre.
Apply advanced analytical skills in the critical examination of theatre histories, theories, & practices.
Synthesize advanced graduate research and analytical skills towards a long-range or large-scale project that integrates the customized research plan of study created by each graduate student.

Career opportunities

Professionals with a MA degree in theatre have been recruited to doctoral programs in theatre, have obtained jobs as teaching artists, and teach theatre in K-12 settings. Other career examples include:

creating and forming a theatre company
creating and producing original devised work
obtaining highly competitive local and national arts grants and arts residencies
working within an established arts organization as a teaching artist, program coordinator or event curator

Urban Design, MUD (ARMUDMUD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Urban Design program at The Design School is a transdisciplinary postprofessional graduate program that provides you with practical knowledge and skills to become a leader in designing healthy and resilient urban environments. You learn and apply newly emerging design knowledge from architecture, landscape architecture, creative placemaking and place-keeping, urban planning, community development, civil engineering, and real estate development. You also draw from critical works in nondesign disciplines, including climate science, social justice, sustainability science, urban ecology, urban climate, natural resources management, environmental psychology, anthropology, art, history and law.

The MUD program offers a three-semester curriculum built around the analysis and understanding of the dynamic urban systems specific to rapidly urbanizing regions of the world. The program leverages the Phoenix metro area as a learning laboratory to understand a number of challenges --- rapid growth and expansion, water scarcity, extreme heat, and the area's distinct ecological and cultural diversity --- toward the development of responsible and innovative design strategies necessary to build just, sustainable and resilient cities.

STEM-OPT extension eligible: No

Degree requirements

36 credit hours including the required applied project course (MUD 593)

Required Core (10 credit hours)
MUD 521 Advanced Urban Design Studio I (5)
MUD 522 Advanced Urban Design Studio II (5)

Electives (9 credit hours)

Other Requirements (12 credit hours)
DSC 598 Topic: Principles of Collaboration in Design (3)
LAP 598 Topic: Smart City Sustainability and the Environment (3)
MUD 598 Topic: Great Cities (3)
MUD 598 Topic: Urban Issues (3)

Culminating Experience (5 credit hours)
MUD 593 Applied Project (5)

Additional Curriculum Information
Students should see the academic unit for an approved design professional elective list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references must be submitted to SlideRoom in addition to the Graduate College application requirements.
https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants are required to express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

The portfolio should be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Applicants must submit contact information for two professional references. These can come from current and past faculty members, professional mentors, supervisors, or community leaders and elders.

Admission to the program is selective. Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they need to go through the entire application process again for the year for which they are applying.

Applicants who hold a studio-based four-year undergraduate design degree are considered for the one-year MUD program. This is a postprofessional program.

Applicants must hold an undergraduate or graduate degree from a college or university recognized by ASU in a studio-based design discipline.

Applicants may be admitted to the one-year program with additional required coursework if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. This additional coursework must be completed prior to taking the required courses, if necessary. This may cause the student to take longer than one year to complete the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared to work across a diverse spectrum of positions in the design field within public and private sectors and not-for-profit organizations. Potential areas of work include:

- climate change mitigation and adaptation
- community development
- creative placemaking and placekeeping
- environmental and climate justice
- low-impact development
- public health and cities
- smart cities
- sustainable cities
- transit-oriented design
- urban and community resilience

Visual Communication Design, MVCD (HIVCDMVCD)

College/School: Herberger Institute for Design and the Arts

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Visual Communication Design program at The Design School is a studio-based degree program. You work on strategic visual communication design projects with a focus on visual design communication proposals, as well as related practices that improve human experiences, enhance interaction with technology, increase business value and involve speculating critically about social issues. You engage in visual and theoretical research, ideation, visualization, prototyping and testing of creative solutions that address critical problems faced in the contemporary designed world.

You learn to work with principles of visual communication design, emotional intelligence, and systems thinking in problem identification and its appropriate contextual solutions.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required capstone course (GRA 622)

Required Core (43 credit hours)

Electives (6 credit hours)

Other Requirement (6 credit hours)
GRA 581 Internship in Teaching Design (3)
GRA 584 Internship (3)

Culminating Experience (5 credit hours)
GRA 622 Advanced Visual Communication Design Studio IV (5)

Additional Curriculum Information
The MVCD program includes sequential studio courses. Requirements involve an average of 14 credit hours per semester. A summer internship is required during the summer before the final year.

The three-plus-year program adds the following requirement to the plan of study: additional courses (42 credit hours).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution. Students should see below for information on the qualifications for a two-year or a three-plus-year program of study.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable

master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• portfolio
• contact information for two references
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The Design School requires that the letter of intent, portfolio, resume or CV, and contact information for professional references be submitted via SlideRoom in addition to the Graduate College application requirements. https://asudesign.slideroom.com/#/Login (https://asudesign.slideroom.com/#/Login)

In the letter of intent, applicants are required to express their intention to apply to the program, and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

The portfolio should be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise, they need to go through the entire application process again for the year for which they are applying.

Admission Requirements to the two-year program
All applicants must have earned a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing in visual communication design, graphic design or other design discipline, or have significant experience in design as demonstrated with a portfolio in which visualization and visual communication skills are presented.

Admission Requirements to the three-plus-year program
All applicants must have earned a bachelor's degree or equivalent in a field other than visual communication design or graphic design, or have no significant experience in visual communication or graphic design.

Applicants may be admitted to the two-year program with additional coursework if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Additional coursework must be completed before taking the required courses, if necessary. This may cause the student to take longer than two years to complete the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Synthesize iterative ideas and design fundamentals into final projects.
Investigate methodologies, strategies, and theories through critical thinking in their final design project
Develop designs for social issues, cultural representation, and sustainability including clear visual and verbal communication techniques.

Career opportunities

Graduates pursue professional practice in visual communication, experience design and strategic design, as well as positions in academia. Career opportunities include:

creative lead
design manager
design researcher
experience designer
interaction designer
senior visual communication designer
service designer
UX designer
visual design consultant
visual sense-maker

Engineering, Ira A. Fulton Schools of

Aerospace Engineering, MS (ESAEROSPMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Master of Science program in aerospace engineering, you build a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered to you in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mechanical Engineering, BSE

Aerospace Engineering (Astronautics), BSE

Mechanical Engineering (Energy and Environment), BSE

Aerospace Engineering (Autonomous Vehicle Systems), BSE

Mechanical Engineering (Computational Mechanics), BSE

Aerospace Engineering (Aeronautics), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (MAE 593)

Major Area of Emphasis (12 or 15 credit hours)

Technical Electives (6 or 9 credit hours)

Mathematics (6 credit hours)

Culminating Experience (0-6 credit hours)
MAE 593 Applied Project (3) or
MAE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
All students are admitted to the nonthesis option unless a faculty thesis advisor is secured, at which time the student can initiate a change to the thesis option.

The plan of study must be in accordance with university and program requirements. A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required throughout the program. Candidates for the program must complete a minimum of 30 credit hours of courses at the 500 level and higher, with a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") or higher.

Students completing a portfolio for the culminating experience must complete at least 15 credit hours of graduate MAE coursework (500 level and higher) for the major area of emphasis requirement. An additional three credit hours of elective coursework, for a total of nine credit hours, is also required.

Coursework for the major area of emphasis is restricted to MAE coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

Admission to the aerospace engineering graduate program is highly competitive.

Admission to the accelerated master's degree program requires an ASU GPA of 3.50 (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for doctoral study or industrial positions that specialize in research, project management and product innovation in aerospace engineering.

Professionals with a master's degree in aerospace engineering have strong opportunities at many levels in research, design and manufacturing at companies of all sizes as well as national laboratories (Department of Energy, Department of Defense, NASA). Analytical skills learned in aerospace engineering are also valued for nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- research engineer

Aerospace Engineering, PHD (ESAERSPPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in aerospace engineering emphasizes original research. You acquire a strong background for employment in academic institutions, government laboratories and industrial research laboratories with an aerospace engineering focus.

The program stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, you have access to a broad-based curriculum in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy. Modern computational and laboratory facilities are available to support timely research investigations.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

All students pursuing the doctorate are required to pass both a qualifying and a comprehensive examination administered by the program committee. In addition, the following are required:

coursework directly related to the research area (18)
mathematics (9)
graduate courses outside the major research area (9)
MAE 792 Research
MAE 799 Dissertation credit hours (12)

Students in the doctoral program who have not completed a Master of Science degree previously are eligible to apply for a Master of Science in Passing after successfully completing the comprehensive exams.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from an accredited U.S. or international institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Admission to the aerospace engineering doctoral program is highly competitive, and preferred applicants have an undergraduate or master's degree in aerospace engineering or mechanical engineering. The admission process considers all aspects of the student's application. The typical successful applicant has a cumulative GPA of at least 3.25 (scale is 4.00 = "A") in engineering and science coursework in a bachelor's or master's degree program, and high GRE and TOEFL scores.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Professionals with a PhD in aerospace engineering have strong opportunities at all levels in aerospace engineering in the areas of research, design and manufacturing at companies of all sizes and national laboratories (Department of Energy, Department of Defense, NASA). Analytical skills learned in aerospace engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Applied Ethics and the Professions (Ethics and Emerging Technologies), MA (LAAEPEETMA)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

In the Master of Arts program in applied ethics and the professions with a concentration in ethics and emerging technologies, you examine ethical challenges posed by emerging technologies, including nanotechnology, neurotechnology, biotechnology, robotics, and advanced information and communication technology. Not only are these technologies being developed at an unprecedented pace, but they also share several distinct characteristics, including system complexity, social embeddedness and the potential to converge with one another.

Emerging technologies are changing how humans live and work, and they have the potential to alter the very nature of human existence. Challenges you consider in courses in the program include regulation of emerging technologies through public policy, ethical responsibilities of professionals engaged in development of emerging technologies, the promises and perils of emerging technologies, and whether traditional ethical concepts and processes can and should be applied to emerging technologies.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (AEP 593)

Required Core (6 credit hours)

Concentration (3 credit hours)

Elective (15 credit hours)

Culminating Experience (6 credit hours)
AEP 593 Applied Project (6)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of interest in applied ethics and career goals
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency by meeting the Graduate College English proficiency requirements, regardless of their current residency.

Applicants who are required to demonstrate English proficiency and who are seeking a teaching assistantship must demonstrate proficiency in spoken English; a score of 55 or higher on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL is required.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Artificial Intelligence Engineering (Aerospace Engineering), MS (ESAIEAEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in artificial intelligence engineering with a concentration in aerospace engineering combines advanced study in AI approaches with deep domain expertise in aerospace engineering.

The use of AI approaches, including machine learning, natural language processing, computer vision, robotics and pattern recognition, is becoming widespread in aerospace engineering. Aerospace engineers increasingly rely on AI algorithms and machine learning models to design and optimize aircraft, to improve predictive maintenance and visual inspections, to optimize flight paths, and more. Similar approaches are being applied for spacecraft design and operations, raising demand for aerospace engineers with competencies in both AI tools and in core aerospace disciplines.

You learn how to develop and customize relevant AI approaches to aerospace engineering problems. A core curriculum in AI engineering foundations, AI systems and tools, AI ethics and social responsibility, and data collection and evaluation for AI systems is complemented by aerospace engineering-specific courses to ensure breadth and depth in AI and in aerospace engineering.

MAE coursework (6)

Electives (3, 6 or 9)

Culminating Experience (0, 3 or 6)
MAE 593 Applied Project (3)
MAE 599 Thesis (6)
portfolio (0)

Additional Curriculum Information
Any additional core classes taken will be treated as electives. No class can be taken to satisfy both a core requirement and a concentration requirement. Other available electives are listed in the attached file, and additional electives are decided by the Graduate Program Committee.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• letters of recommendation (optional)
• personal statement
• professional resume
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

The professional resume should specify familiarity with Matlab, Python, SQL, R or other relevant programming skills.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Aerospace engineers with a background in AI can pursue opportunities in a variety of fields to develop, customize and apply AI systems and tools while taking ethical and societal considerations into account. These skills can be applied to industries including:

- aircraft
- autonomous flying vehicles (drones)
- avionics
- rocket propulsion
- spacecraft

Artificial Intelligence Engineering (Chemical Engineering), MS (ESAIECEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Master of Science program in artificial intelligence engineering with a concentration in chemical engineering, you combine advanced study in AI approaches with deep domain expertise in chemical engineering.

The use of AI approaches, including machine learning, large language models, robotics and pattern recognition, is becoming widespread in chemical engineering. You can use such AI tools to develop new production processes, improved and more sustainable chemical products for human health, accelerated manufacturing, optimal nutritional profiles for bioprocesses, and many other applications.

You learn how to develop and customize relevant AI approaches to chemical engineering problems. A core curriculum in AI engineering foundations, AI systems and tools, AI ethics and social responsibility, and data collection and evaluation for AI systems is complemented by chemical engineering-specific courses to ensure breadth and depth in AI and in chemical engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (CHE 593)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (9 credit hours)
CHE 533 Transport Processes I (3)
CHE 543 Thermodynamics of Chemical Systems (3)
CHE 544 Chemical Reactor Engineering (3)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)
CHE 593 Applied Project (3)
CHE 599 Thesis (6)

Additional Curriculum Information
Students should see their program advisor for a complete list of approved courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• professional resume
• proof of English proficiency

Artificial Intelligence Engineering (Computing Sciences), MS (ESAIECSMS)

College/School: Ira A. Fulton Schools of Engineering

Campus:

ASU is not currently accepting applications for this program.

Program description

The Master of Science program in artificial intelligence engineering with a concentration in computing sciences combines advanced study in AI approaches with deep domain expertise in computing.

The use of AI approaches, including machine learning, natural language processing, computer vision, robotics and pattern recognition, is becoming widespread in many fields, including all engineering disciplines. Yet, the majority of engineering occupations require subject matter expertise beyond AI.

You learn how to develop and customize relevant AI approaches, such as those mentioned above, to engineering

computing problems. A core curriculum in AI engineering foundations, AI systems and tools, AI ethics and social responsibility, and data collection and evaluation for AI systems is complemented by computing-specific courses to ensure breadth and depth in AI and in computing.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (9 credit hours)
CSE 571 Artificial Intelligence (3)
CSE 500-level courses (6)

Electives (3, 6 or 9 credit hours)

Culminating Experience (0, 3 or 6 credit hours)
CSE 593 Applied Project (3)
CSE 599 Thesis (6)
portfolio (0)

Additional Curriculum Information
Students should see their program advisor for a complete list of approved course options.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 if taken before January 21, 2026; 7 on the IELTS or 115 on the Duolingo English test, regardless of current residency.

The resume should reflect familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Computer engineers with a background in AI can pursue opportunities in a variety of fields to develop, customize and apply AI systems and tools while taking ethical and societal considerations into account. These skills can be applied to industries including:

- cybersecurity
- database development and management
- software development
- software integration and product design

Artificial Intelligence Engineering (Manufacturing), MS (ESAIEMMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Master of Science program in artificial intelligence engineering with a concentration in manufacturing combines advanced study in AI approaches with deep domain expertise in manufacturing engineering.

You learn how to develop AI tools, including machine learning, computer vision and natural language processing, to make production processes more efficient. This can be done through leveraging a variety of manufacturing data (sales, throughput, videos, images, etc.) to improve productivity, including predictive maintenance. You learn from a core

curriculum spanning AI engineering foundations, AI systems and tools, data collection and evaluation for AI systems, as well as a required course on AI ethics and social responsibility. These classes are complemented by manufacturing-specific courses, such as manufacturing systems management, modern manufacturing methods, and metal additive manufacturing, to develop the advanced manufacturing systems essential to realize the promise of Industry 4.0.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Robotics and Autonomous Systems, BSE

Manufacturing Engineering, BS

Robotics and Autonomous Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (MFG 593)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (9 credit hours)
MFG 523 Artificial Intelligence for Smart Manufacturing (3)
MFG coursework (6)

Electives (3, 6 or 9 credit hours)

Culminating Experience (0, 3 or 6 credit hours)
MFG 593 Applied Project (3)
MFG 599 Thesis (6)
portfolio (0)

Additional Curriculum Information

Any additional core classes taken will be treated as electives. No class can be taken to satisfy both a core requirement and a concentration requirement. Additional electives are decided by the Graduate Program Committee.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, manufacturing or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• short-answer questions
• self-reported test scores
• unofficial transcripts
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Artificial Intelligence Engineering (Materials Science and Engineering), MS (ESAIEMSEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in artificial intelligence engineering with a concentration in materials science and engineering combines advanced study in AI approaches with deep domain expertise in materials science.

The use of AI approaches, including machine learning, natural language processing, computer vision, robotics and pattern recognition is becoming widespread in many fields, including all engineering disciplines. Yet, the majority of engineering occupations require subject matter expertise beyond AI.

You learn how to develop and customize relevant AI approaches, such as those mentioned above, to materials science problems. A core curriculum in AI engineering foundations, AI systems and tools, AI ethics and social responsibility, and data collection and evaluation for AI systems is complemented by materials science and engineering-specific courses to ensure breadth and depth in AI and in materials science and engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (MSE 593)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (12 credit hours)
MSE 551 Applied Machine Learning for Mechanical Engineers (3)
MSE coursework (9)

Electives (0 or 3 credit hours)

Culminating Experience (0 or 6 credit hours)
MSE 593 Applied Project (3)
MSE 599 Thesis (6)

Additional Curriculum Information
Students should see their program advisor for a complete list of approved courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, materials science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

Familiarity with Matlab, Python, SQL, R or other relevant programming skills must be present in the professional resume.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Materials scientists with a background in AI can pursue opportunities in a variety of fields to develop, customize and apply AI systems and tools while taking ethical and societal considerations into account. These skills can be applied to industries including:

- biomaterials
- energy conversion systems
- manufacturing
- materials development

Artificial Intelligence Engineering (Robotics), MS (ESAIERMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Master of Science program in artificial intelligence engineering with a concentration in robotics combines advanced study in applied AI with robotics engineering.

This program enables you not only to develop your core expertise in robotics and industrial automation, digital twins, data informatics and applications of generative AI and LLMs in robotics and industrial automation, but also to enhance your data science skills through interdisciplinary courses offered within and beyond engineering.

A core curriculum in robotics, articulated robots, aerial robots, human-robot teaming, robot learning, AI engineering foundations, AI systems and tools, AI ethics and social responsibility, and data collection and evaluation for AI systems is complemented by robotics engineering-specific courses to ensure you have a breadth and depth of understanding in AI and in robotics engineering. The main data science elements consist of data processing, data visualization, data mining and machine learning. Machine learning and deep learning, as well as their applications in robotics, are included to highlight the industrial use cases of data and AI.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Robotics and Autonomous Systems, BSE

Manufacturing Engineering, BS

Robotics and Autonomous Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (RAS 593)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (9 credit hours)
RAS 585 Machine Learning and Artificial Intelligence (3)
Students select two of the following:
RAS 507 Image Processing and Analysis (3)
RAS 545 Robotic Systems I (3)
RAS 546 Robotic Systems II (3)
RAS 550 Mechatronic Systems (3)
RAS 555 Mechatronics Device Innovation (3)
RAS 556 System Control and Optimization (3)
RAS 557 Foldable Robotics (3)

Electives (3, 6 or 9 credit hours)

Culminating Experience (0, 3 or 6 credit hours)
portfolio (0)
RAS 593 Applied Project (3)
RAS 599 Thesis (6)

Additional Curriculum Information
Students should see their program advisor for a complete list of the approved course options.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (SER 517)

Required Core (3 credit hours)
FSE 561 Artificial Intelligence Ethics and Social Responsibility (3)

AI Engineering Foundations (3 credit hours)

AI Systems and Tools (3 credit hours)

Data Collection and Evaluation for AI Systems (3 credit hours)

Concentration (9 credit hours)
SER 501 Advanced Data Structures and Algorithms (3)
SER 502 Emerging Languages and Programming Paradigms (3)
SER 515 Foundations of Software Engineering (3)
SER 531 Semantic Web Engineering (3)
SER 541 Data Science for Software Engineers (3)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)
SER 517 Software Factory Capstone (3) or
SER 599 Thesis (6)

Additional Curriculum Information
For concentration coursework, students select three courses from the list. Students should see their program advisor for a complete list of approved courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Before applying to the program, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. Completion of a discrete math course is also recommended prior to admission. Students from noncomputing backgrounds may also be eligible with the required math listed and at least six credit hours of computer programming or at least one year of software industry experience.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" or higher within two semesters of admission to the program. These courses may include:

SER 222 Design and Analysis of Data Structures and Algorithms or CSE 310 Data Structures and Algorithms
SER 334 Operating Systems and System Programming or CSE 330 Operating Systems

The applicant's undergraduate GPA and depth of preparation in computer science and software engineering are the primary factors affecting admission.

Familiarity with Matlab, Python, SQL, R, or other relevant programming skills must be present in the professional resume.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, construction, transportation or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.
Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Admission Information:

An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL® (iBT) or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.
The resume should reflect familiarity with Matlab, Python, SQL, R or other relevant programming skills.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Civil, environmental, sustainable and construction engineers, as well as construction managers, with a background in AI can pursue opportunities in a variety of fields to develop, customize and apply AI systems and tools while taking ethical and societal considerations into account. These skills can be applied to industries including:

- air and groundwater pollution modeling
- digital twins of buildings and other structures
- infrastructure construction
- transportation, including self-driving vehicles
- urban infrastructure monitoring

Artificial Intelligence and Machine Learning, Certificate (ESAIMLGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

AI and machine learning are transforming industries by enabling systems to learn, adapt and make data-driven= decisions. This graduate-level microcertificate program provides a rigorous foundation in the principles and= applications of AI and machine learning, preparing you to design and implement intelligent solutions for complex= problems.

The curriculum emphasizes both theoretical understanding and practical skills, covering topics such as supervised and= unsupervised learning, deep learning architectures, natural language processing, and predictive analytics. You gain= experience applying algorithms to real-world datasets, optimizing models for performance, and leveraging AI= techniques for emerging technologies.

You learn how to:

• apply AI techniques to areas such as computer vision, language processing and decision systems
• develop and deploy machine learning models for diverse applications
• evaluate and improve model accuracy, scalability and ethical considerations in AI

CSE 571 Artificial Intelligence (3)
CSE 575 Statistical Machine Learning (3)
CSE 579 Knowledge Representation and Reasoning (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, STEM or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/artificial-intelligence-machine-learning-certificate-online/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared for high-demand roles in AI and data-driven industries, including:

AI engineer
AI product manager
data scientist
deep learning specialist
machine learning engineer
natural language processing engineer
predictive analytics specialist

These roles are in demand across technology, health care, finance, manufacturing and government sectors.

Artificial Intelligence in Information Technology, MS (ESAIITMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Master of Science program in artificial intelligence in information technology prepares students to design and manage artificial intelligence systems within modern IT environments. Students learn how to integrate AI into data management, cybersecurity, software development and cloud infrastructures to improve efficiency, security and innovation.

The program emphasizes the principles of trustworthy AI, including transparency, fairness, privacy, safety and accountability. Through coursework and applied learning, students gain practical experience with machine learning, natural language processing, data engineering and intelligent automation.

Students are prepared to lead AI-driven initiatives across public and private sectors, advancing responsible and ethical adoption of emerging technologies that support business, government and community needs.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Information Technology, BS

Information Technology (Networking), BS

Information Technology (Cybersecurity), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours including the required applied project course (IFT 593)

Required Core (21 credit hours)
IFT 511 Analyzing Big Data (3)
IFT 512 Applied Machine Learning for Information Technology (3)
IFT 525 Introducing AI into Cybersecurity for Information Technology (3)
IFT 530 Advanced Database Management Systems (3)
IFT 533 Data Visualization and Reporting for IT (3)
IFT 540 Strategic Project Management (3)
IFT 561 Advanced Cloud Data Engineering (3)

Electives (6 or 9 credit hours)

Culminating Experience (0 or 3 credit hours)
IFT 593 Applied Project (3)
portfolio (0)

Additional Application Information
Students who complete the applied project take six credit hours of electives. Students who complete the portfolio take nine credit hours of electives.

All students have the opportunity to participate in experiential learning placements through the internship program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information technology, computer science, applied computing, computer engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current

residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

If the applicant does not meet the minimum GPA requirements, the application may still be considered.

In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

The applicant's undergraduate GPA and depth of preparation in information technology and computer science are the primary factors that affect admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the MS program in artificial intelligence in information technology are prepared for careers that integrate artificial intelligence with data management, cybersecurity and cloud computing. Common job titles include:

artificial intelligence engineer
automation engineer
business intelligence developer
cloud solutions architect
data engineer
data scientist
information security analyst
machine learning engineer

Artificial Intelligence, MS (ESAIMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in artificial intelligence prepares you for either professional practice or further graduate doctorate-level study in the rapidly growing field. The program helps you develop proficiency in both theoretical and practical AI research aimed at enabling you to independently analyze, evaluate and invent new concepts for designing efficient and reliable AI systems.

You have the opportunity to work with highly active faculty research groups, gaining expertise in the cutting-edge of AI while simultaneously developing the skills to invent and deploy novel AI algorithms and systems. The curriculum encompasses a core of foundational courses in AI, complemented by electives from three prominent AI streams: statistical learning; embodied AI, cognition and perception; and reasoning and decision making. Furthermore, you learn how to conduct original research, culminating in a research-oriented thesis that advances knowledge in AI, or you learn how to develop professional-grade systems founded on AI algorithms and systems thinking. You are able to develop new AI paradigms, applications and systems, and advance knowledge of the field itself.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

COURSE-BASED OPTION
Required Core (6 credit hours)
Students choose two of the following courses:
CSE 550 Combinatorial Algorithms and Intractability (3)
CSE 551 Foundations of Algorithms (3)
CSE 552 Randomized and Approximation Algorithms (3)
CSE 555 Theory of Computation (3)
CSE 571 Artificial Intelligence (3)

Statistical Learning Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 524 Machine Learning Acceleration (3)
CSE 569 Fundamentals of Statistical Learning and Pattern Recognition (3)
CSE 572 Data Mining (3)
CSE 573 Semantic Web Mining (3)
CSE 575 Statistical Machine Learning (3)

Embodied AI, Cognition and Perception Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 509 Digital Video Processing (3)
CSE 515 Multimedia and Web Databases (3)
CSE 522 Real-time Embedded Systems (3)
CSE 570 Advanced Computer Graphics I (3)
CSE 576 Topics in Natural Language Processing (3)

Reasoning and Decision Making Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 556 Game Theory and Application to Networks (3)
CSE 561 Modeling and Simulation Foundations for Digital Twins (3)
CSE 574 Planning and Learning Methods in AI (3)
CSE 579 Knowledge Representation and Reasoning (3)

Electives (15 credit hours)

OPTIONS WITH CULMINATING EXPERIENCE
Required Core (6 credit hours)
Students choose two of the following courses:
CSE 550 Combinatorial Algorithms and Intractability (3)
CSE 551 Foundations of Algorithms (3)
CSE 552 Randomized and Approximation Algorithms (3)
CSE 555 Theory of Computation (3)
CSE 571 Artificial Intelligence (3)

Statistical Learning Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 524 Machine Learning Acceleration (3)
CSE 569 Fundamentals of Statistical Learning and Pattern Recognition (3)
CSE 572 Data Mining (3)
CSE 573 Semantic Web Mining (3)
CSE 575 Statistical Machine Learning (3)

Embodied AI, Cognition and Perception Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 509 Digital Video Processing (3)
CSE 515 Multimedia and Web Databases (3)
CSE 522 Real-time Embedded Systems (3)
CSE 570 Advanced Computer Graphics I (3)
CSE 576 Topics in Natural Language Processing (3)

Reasoning and Decision Making Restricted Electives (3 credit hours)
Students choose one of the following courses:
CSE 556 Game Theory and Application to Networks (3)
CSE 561 Modeling and Simulation Foundations for Digital Twins (3)
CSE 574 Planning and Learning Methods in AI (3)
CSE 579 Knowledge Representation and Reasoning (3)

Electives (9 or 12 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3)
CSE 599 Thesis (6)

Additional Curriculum Information
This program offers a course-based option. A course-based master's option is best suited for students who want to deepen their knowledge and advance their professional skills through structured coursework rather than independent research. Students who enjoy solving real-world problems and applying practical skills in professional settings may be drawn to the applied project option. Students with a strong interest in research and a desire to contribute original knowledge to their field may be well-suited for the thesis option.

Students select one of the listed courses in each of the required core, statistical learning restricted electives, embodied AI, cognition and perception restricted electives, and reasoning and decision making restricted electives course areas. Courses should be selected in consultation with the program advisor.

Students who have not completed a formal AI course are strongly encouraged to complete CSE 571 as part of their core.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computational biology, computer engineering, computer science, electrical and electronics engineering, math, mechanical engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• written statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 if taken before January 21, 2026 in a testing center; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

The personal statement should be one to two pages, and focus on the candidates' intended area of research and their academic background.

If the student is assigned any additional foundational coursework upon admission, those classes must be completed with a grade of "B" (scale is 4.00 = "A") or higher within two semesters of admission to the program. These additional foundational courses do not apply to the total credit hours required to complete the degree program.

Applicants are expected to have foundational coursework in the following topics:

• CSE 310 Data Structures
• MAT 242 Elementary Linear Algebra or MAT 342 Linear Algebra or MAT 343 Applied Linear Algebra
• MAT 266 Calculus for Engineers II or MAT 271 Calculus with Analytic Geometry II

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with a master's degree in artificial intelligence are able to pursue a wide range of careers with roles such as:

AI consultant
AI engineer
AI researcher
machine learning researcher
machine learning or AI operations engineer
natural language processing specialist

robotics researcher

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
CSE 555 Theory of Computation (3)
CSE 571 Artificial Intelligence (3)

Other Requirements (12 credit hours)

Electives and Research (36 credit hours)

Research (18 credit hours)
CSE 792 Research (18)

Culminating Experience (12 credit hours)
CSE 799 Dissertation (12)

Additional Curriculum Information
Students complete two of the core courses for a total of six credit hours. Eighteen credit hours of CSE 792 Research are required, and up to 54 credit hours are allowed on the plan of study. Students with research credit hours in excess of 18 add these credit hours to their electives and research coursework. To obtain a complete list of coursework for the other requirements and the electives and research sections, students should consult their program advisors.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, mathematics, electrical engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS or 115 on the Duolingo English test, regardless of current residency.

The application does not require GRE scores, although they are considered if submitted. ASU does not accept the GRE® General Test at home edition.

The personal statement should be one to two pages, and focus on the candidates' intended area of research and their academic background.

At least two letters of recommendation should be from academic references.

If the student is assigned any additional foundational coursework upon admission, those classes must be completed

with a grade of "B" (scale is 4.00 = "A") or higher within two semesters of admission to the program. These additional foundational courses do not apply to the total credit hours required to complete the degree program.

Applicants are expected to have foundational coursework in the following topics:

• CSE 310 Data Structures
• MAT 242 Elementary Linear Algebra or MAT 342 Linear Algebra or MAT 343 Applied Linear Algebra
• MAT 266 Calculus for Engineers II or MAT 271 Calculus with Analytic Geometry II

Big Data, Certificate (ESBDTAGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

This microcertificate program in big data prepares you to bring data insights to organizations across all industries and= play a key role in driving business decisions. You discover data mining techniques and learn to apply mathematical= theory to big data analysis, classification, clustering and association rule mining. Through practical projects led by= expert faculty, you also gain a variety of skills in areas such as:

• data models and processing
• data visualization
• java and Python
• NoSQL databases and queries
• reinforcement learning
• spatial data

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT extension eligible: No

Degree requirements

9 credit hours

Required Core (9 credit hours)
CSE 511 Data Processing at Scale (3)
CSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
CSE 578 Data Visualization (3)

Additional Curriculum Information
Students select three of the listed courses. Courses should be selected in consultation with the program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL® (iBT) or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/data-analysis-skills/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared for roles that leverage data to drive business decisions and innovation. These skills are in high demand across industries like health care, finance, retail and technology, where professionals apply big data techniques to solve complex problems, optimize operations and uncover actionable insights. Career paths include positions such as:

big data engineer
business intelligence specialist
data analyst
data visualization expert

Biological Design, MS (ESBDEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Master of Science degree in biological design, you become an expert in the intersection of life and machinery by participating in a flexible training program. You take one program core course (Principles of Biological Design), one course from a suite of biotechnology courses, and one course from a suite of statistics courses.

The flexibility of this program, while maintaining key instructional structure, allows you --- whether you come from a traditional or nontraditional engineering background --- to have simultaneous access to training and mentoring in both engineering and technology with a biological focus. This gives you access to transdisciplinary education and training that you wouldn't have in traditional program settings.

As part of coursework and applied projects or theses, you read literature; identify critical problems related to energy, environment, human health, sustainability and security; and develop solutions to these problems using a synergy of technological and biological solutions, either in teams (course projects) or individually (thesis or applied project). You are mentored by faculty from different colleges and schools at ASU.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (BDE 593)

Required Core (3 credit hours)
BDE 502 Research Methods in Biological Design (3)

Statistics (3 credit hours)
CHE 598 Topic: Six Sigma Methodology/Engineering Experimentation (3)
IEE 572 Design Engineering Experiments (3)
IEE 578 Regression Analysis (3)
IEE 670 Mathematical Statistics (3)

Biotechnology (3 credit hours)
BME 598 Topic: Bioenergy and Microbial Biotechnology (3)
BME 598 Topic: Cellular and System Modeling (3)
BME 598 Topic: Chimeras and Recombinant Organisms in Medicine (3)
CEE 565 Advanced Environmental Biotechnology (3)
CEE 567 Environmental Health Microbiology (3)
CEE 598 Topic: Bio-inspired Design (3)
CHE 579 Microbial Bioprocess Engineering (3)
CHE 598 Topic: Nanobiotechnology (3)
CHE 598 Topic: Synthetic Biology and Metabolic Engineering (3)

Electives (12 or 15 credit hours)

Other Requirements (3 credit hours)
BDE 591 Seminar (3)

Culminating Experience (3 or 6 credit hours)
BDE 593 Applied Project (3)
BDE 599 Thesis (6)

Additional Curriculum Information
BDE 591 Seminar is a one credit hour course to be taken once per semester for three semesters. This course may be substituted with the academic unit's approval.

Students select electives in consultation with their advisor. Students who complete the applied project as their culminating experience must complete 15 credit hours of electives, while students completing the thesis option take 12 credit hours of electives.

Students must complete three credit hours for each requirement in statistics and in biotechnology from the courses listed. If approved by the academic unit, courses may be substituted with an appropriate alternative.

Coursework selected as part of the statistics or biotechnology requirements may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total credit hours of their plan of study are equal to 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering. Applicants must have earned a bachelor's or master's degree in a related field, including physical sciences, biological sciences, or engineering, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

The application process is very competitive, and candidates are strongly encouraged to adhere to all priority deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Opportunities for graduates include positions in the broader biotechnology industry, including biopharmaceutical processing, biomanufacturing, sustainable biotechnology, and food and agribusiness industries. Some graduates pursue careers in entrepreneurship (e.g., startup companies), law (e.g., patent law), regulatory affairs and medicine.

Career examples include:

clinical laboratory technologist
environmental engineer
environmental scientist and specialist
epidemiologist
health and safety engineer
microbiologist

Biological Design, PHD (GCBDSPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in biological design seeks to develop a new type of scientist by training you in core disciplines related to biomedicine and biotechnology while simultaneously preparing you to participate successfully in the interdisciplinary research teams of the future.

The research emphasis is on projects that are use-inspired, contributing directly to solutions for important societal challenges. This is a highly mentored program of personalized study that provides you with significant interaction with the large and vibrant local research community.

The curriculum has three key distinguishing features: a personalized plan of study that enables you to explore the disciplinary and interdisciplinary areas of greatest interest; encouragement to choose a dissertation research project that is use-focused, contributes to solving a large-scale challenge, and promises rich transdisciplinary experiences; and opportunities to participate in a proseminar format to encourage broad research interactions and discuss problems and challenges in biological design research.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (3 credit hours)
BDE 702 Fundamentals of Biological Design II (3)

Other Requirements (2 credit hours)
BDE 598 Special Topics: Biological Design Seminar (1)
BDE 791 Seminar: Biological Design Proseminar (1)

Electives and Research (67 credit hours)

Culminating Experience (12 credit hours)
BDE 799 Dissertation (12)

Additional Curriculum Information
Courses listed under Other Requirements may be substituted with approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• personal statement

• resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Three letters of recommendation related to the candidate's academic career are required. The personal statement should reflect the candidate's career and educational goals, and explain why the candidate is interested in pursuing this degree. The resume should include prior research and employment experience, honors, awards, memberships held, publications, etc.

For additional admission requirements, including transcripts, fees and international application requirements, students should see the ASU Admission Services website.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are trained at the intersection of biological sciences, physical sciences and technology through innovation, design and production. They find career opportunities in health care, biotechnology, pharmaceutical discovery, biomanufacturing, security, environmental technologies and food agribusinesses.

Career examples include:

biochemist
biophysicist
clinical scientist
environmental engineer
health and safety engineer
medical engineer
medical scientist
microbiologist

Biomedical Engineering, MS (ESBIOENMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The School of Biological and Health Systems Engineering offers you a graduate program leading to the Master of Science in biomedical engineering.

You have the opportunity to study:

• biomaterials, biosensors, biomarkers and biomimetic materials

• biomedical imaging
• molecular, cellular and tissue engineering
• neural and rehabilitation engineering
• synthetic and systems biology

The biomedical engineering program offers an accelerated BSE/MS program in biomedical engineering if you are a student in the Bachelor of Science in Engineering program and have maintained a GPA of 3.25 (scale is 4.00 = "A") into your junior year. The program allows up to 15 credit hours of graduate-level coursework taken during the senior year to be applied toward both undergraduate and graduate degrees.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biomedical Engineering (Biological Devices), BSE

Biomedical Engineering (Biomedical Devices), BSE

Biomedical Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (BME 593)

COURSE-BASED OPTION

Required Core (3 credit hours)
BME 510 Biomechanics/Human Physical Capability (3)

Advanced Biomedical Fundamentals (15 credit hours)

General Electives (12 credit hours)

OPTIONS WITH CULMINATING EXPERIENCE

Required Core (3 credit hours)
BME 510 Biomechanics/Human Physical Capability (3)

Advanced Biomedical Fundamentals (12 credit hours)

Biomedical Engineering Seminar (2 or 3 credit hours)
BME 591 Topic: Bioengineering Sem (2 or 3)

General Electives (6 or 9 credit hours)

Culminating Experience (4 or 6 credit hours)
BME 593 Applied Project (4) or
BME 599 Thesis (6)

Additional Curriculum Information
The course-based option is ideal for students seeking a fast, flexible path to industry through advanced technical training, especially those with prior industry experience who are looking to supplement their skills. The applied project option is designed for students interested in solving real-world biomedical problems through a practical project. The thesis option is best suited for students pursuing research careers or doctoral study and offers in-depth experience in hypothesis-driven investigation.

All candidates pursuing a master's degree in biomedical engineering are required to complete an approved plan of study. Special course requirements for the different areas of study are established by the faculty.

A candidate whose undergraduate degree is in a field other than biomedical engineering may be required to complete more credit hours than those listed for the program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• a statement of purpose
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate quantitative problems in biomedical engineering through the application of statistical analysis, mathematical modeling, and image processing techniques relevant to the field.
Effectively communicate complex biomedical engineering concepts to an interdisciplinary audience.
Independently plan, develop and execute a research- or design-oriented project in biomedical engineering to advance study in the field.

Career opportunities

Professionals who specialize in biomedical engineering research areas are in high demand by local, national and international employers across sectors and industries, including business, academia, health care, government and research.

Career examples include:

biochemical engineer
bioinformatics scientist
biomedical engineer
geneticist
health sciences manager
medical scientist
molecular biologist
nanosystems engineer

Biomedical Engineering, PHD (ESBIOENPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The School of Biological and Health Systems Engineering faculty offer a program leading to the Doctor of Philosophy in biomedical engineering.

You get the opportunity to study:

• biomaterials, biosensors, biomarkers and biomimetic materials
• biomedical imaging
• molecular, cellular and tissue engineering
• neural and rehabilitation engineering
• synthetic and systems biology

The PhD in biomedical engineering is conferred upon evidence of excellence in research resulting in a scholarly dissertation that is a contribution to knowledge.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT

extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (3 credit hours)
BME 701 Fundamentals in Scientific Proposal Writing (3)

Required Bioengineering Courses (18 credit hours)
Doctoral students are required to complete six credit hours from each of the following three areas:
BME graduate courses (BME prefix) (6)
life science or biology graduate courses (6)
quantitative math or engineering (6)

Other Requirement (3 credit hours)
BME 780 Practicum (3)

Technical Electives (6 credit hours)

Research (37 credit hours)
BME 792 Research (37)

Seminar (5 credit hours)
BME 591 Seminar (5)

Culminating Experience (12 credit hours)
BME 799 Dissertation (12)

Additional Curriculum Information
Up to six credit hours of the required biomedical engineering courses and technical electives combined may be at the 400 level.

Courses used to satisfy the technical electives requirement must be selected from the list of 400- to 700-level courses that are not selected as required BME courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students should view the School of Biological and Health Systems admission checklist (https://sbhse.engineering.asu.edu/phd-biomedical-engineering/) for specific admission procedures and deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Ability to independently develop an approach for identifying problems, collecting, analyzing and interpreting data in the area of biomedical engineering
Develop ability to communicate original biomedical research as scholarly work or publication
Develop teaching practices under faculty supervision that are appropriate for biomedical engineering education within industry or academia

Career opportunities

Professionals who specialize in biomedical engineering research areas are in high demand across sectors and industries, including business, academia, hospitals, government agencies and research facilities. Graduates with the skill sets gained through the program are sought-after by local, national and international employers.

Career examples include:

bioinformatics scientist
biomedical engineer
geneticist
medical scientist
molecular biologist
professor

Chemical Engineering, MS (ESCHEMEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in chemical engineering offers you several areas of research emphasis, including atmospheric aerosols, biomolecular engineering, biosensors, chemical therapies for neurodegenerative diseases, electrochemistry, electronic materials processing, engineering education, flexible display technology, fuel cells, inorganic membranes, process design and operations, protein synthesis, transport phenomena in living systems, and water purification.

A graduate handbook detailing information on graduate studies in chemical engineering is available on the school's website. For additional details, you should contact the graduate advising office in the School for Engineering of Matter, Transport and Energy.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Chemical Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CHE 593)

Required Core (9 credit hours)
CHE 533 Transport Processes I (3)
CHE 543 Thermodynamics of Chemical Systems (3)
CHE 544 Chemical Reactor Engineering (3)

Technical Electives (12-18 credit hours)

Other Requirement (3 credit hours)
CHE 591 Seminar (3)

Culminating Experience (0-6 credit hours)
CHE 593 Applied Project (3)
CHE 599 Thesis (6)
portfolio (0)

Additional Curriculum Information

All students are admitted to the nonthesis option unless a faculty thesis advisor is secured, at which time the student can initiate a change to the thesis option.

The plan of study must be in accordance with university and program requirements. A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required throughout the program. Candidates for the program must complete a minimum of 30 credit hours of courses at the 500 level and above, with a cumulative GPA of 3.00 or above.

Students who complete a portfolio for the culminating experience must complete at least 18 credit hours of graduate CHE coursework (500 level and above) for the major area of emphasis requirement. An additional three credit hours of elective coursework, for a total of nine credit hours, is also required.

Coursework for the major area of emphasis is restricted to CHE coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

Admission to the accelerated master's degree program requires a 3.50 ASU GPA (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Demonstrate an understanding of key concepts of thermodynamics in the field and how to apply those concepts in their culmination event (Applied project or M.S. thesis).

Communicate the results of research performed related to chemical engineering concepts through written and oral presentations.
Demonstrate an understanding of key concepts of kinetics in the field and how to apply those concepts in their culmination event (e.g., Thesis).

Career opportunities

Professionals with an MS in chemical engineering have strong opportunities at all levels in research, design and manufacturing at companies; at national laboratories (e.g., Department of Energy, Department of Defense, NASA); and in academia. Analytical skills learned in chemical engineering are also valued in other nonengineering positions.

Career examples include:

engineer
engineering manager or director
engineering professor
lecturer
process engineer
research engineer

Additional Research or Electives (28 credit hours)

Culminating Experience (12 credit hours)
CHE 799 Dissertation (12)

Additional Curriculum Information
Technical electives are selected from within or outside the chemical engineering program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English is required to achieve a minimum score of 5, or 100 (taken at at testing center) if taken before January 21, 2026, on the TOEFL iBT® exam regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Demonstrate an understanding of key concepts of thermodynamics in the field and how to apply those concepts in their Ph.D. research.
Write creative engineering documents that show an understanding of their experimental research and appropriately records and analyzes their results.
Construct a research plan that provides detailed experimental procedures and provides a novel research approach.

Career opportunities

Professionals with a chemical engineering doctoral degree have strong opportunities at all levels in research, design and manufacturing at companies of all sizes; at national laboratories (Department of Energy, Department of Defense, NASA); and in academics. Analytical skills learned in chemical engineering are also valued in nonengineering positions.

Career examples include:

engineer
engineering manager or director
engineering professor
lecturer
process engineer
research engineer

Civil, Environmental and Sustainable Engineering, MS (ESCIVILMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in civil, environmental and sustainable engineering builds on the knowledge you gain in the undergraduate program by deepening your understanding and application of fundamental concepts in engineering, mathematics and the basic sciences.

The pattern of coursework can be tailored to you, although it must conform to the general guidelines for subject matter content for the program, as presented in this listing and on the program's website.

You are admitted to one of the following specialty areas in engineering:

• environmental
• geotechnical
• hydrosystems
• structural
• sustainable
• transportation

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil Engineering, BSE

Construction Engineering, BSE

Environmental Engineering, BSE

Civil Engineering (Sustainable Engineering), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours and a written comprehensive exam, or
30 credit hours including the required applied project course (CEE 593)

All candidates for the thesis option complete 24 credit hours of approved graduate coursework and a minimum of six credit hours of CEE 599 Thesis. The written thesis must be original research in nature. Additional courses may be assigned by the graduate supervisory committee, depending on the candidate's background. A final oral examination in defense of the thesis written work is required.

Candidates in the applied project option must complete 27 credit hours of approved graduate coursework and three credit hours of CEE 593 Applied Project.

Candidates in the comprehensive exam option must complete 30 credit hours of approved graduate coursework and complete a written comprehensive exam.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree with a major in engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program. Applicants with a lower GPA may be admitted provisionally at the discretion of the admission committee.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

The student's credentials for admission are evaluated by the graduate program chair and a committee chaired by the specialty area coordinator. A student whose undergraduate degree is not in civil engineering is required to take appropriate undergraduate courses to establish a base of knowledge in the discipline. The additional courses required for admission to the program are specified at the time of admission, and details can be obtained from the graduate studies section of the program's website.

Applicants are encouraged to submit a resume and personal statement.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared to be civil engineers who typically focus on large projects such as buildings, roads, bridges, subway systems, dams and water supply networks.

Civil, Environmental and Sustainable Engineering, PHD (ESCIVILPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

A wide variety of theoretical and experimental research programs have been established in civil and environmental engineering to prepare you for careers in professional practice and research. These programs are constantly evolving with the changes in society and the profession, and many are transdisciplinary in nature.

The pattern of coursework in the Doctor of Philosophy in civil, environmental and sustainable engineering program can be tailored for you, although it must conform to the general guidelines for subject matter content for the degree (as outlined here and in the program's graduate handbook).

You have the opportunity to study a specialty area within engineering:

• environmental
• geotechnical
• hydrosystems
• structural
• sustainable
• transportation

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

All candidates are required to complete 84 approved graduate credit hours; of these, 30 can be from the previously awarded master's degree. Additional graduate credit work may be assigned by the graduate supervisory committee, depending on the background of the candidate.

The graduate credit hours must include a minimum of 12 credit hours of research and 12 credit hours of dissertation work.

This program also requires written and oral comprehensive examinations and approval of the dissertation prospectus for the student to be eligible for doctoral candidacy.

After entering candidacy, the student completes the research and writes and successfully defends a dissertation.

A final oral examination in defense of the dissertation is required for all students.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a master's degree in engineering or a closely related master's degree program from a regionally accredited institution. Exceptionally qualified students with a bachelor's degree may be admitted to the doctoral program.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• GRE scores

• three letters of recommendation
• a resume
• a personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or higher on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

A student whose undergraduate or master's degree is not in civil engineering is required to take appropriate undergraduate or graduate courses in order to establish a base of knowledge in the discipline. The additional courses required for admission to the program are specified at the time of admission, and details can be obtained from the graduate studies section of the program's website.

Prospective students should note that GRE scores are used in the admission decision. The average scores for those admitted to the graduate programs over the last five years were 732 for MS or MSE and 751 for PhD (GRE General Test), and 157 for MS or MSE and 159 for PhD (GRE revised General Test) in the quantitative section. Average combined quantitative and verbal scores were 1203 for MS or MSE and 1239 for PhD (GRE General Test), and 308 for MS or MSE and 311 for PhD (GRE revised General Test). More information regarding how to send official GRE scores to Graduate Admission Services can be found on the FAQ page (https://admission.asu.edu/contact/faqs#graduate). ASU does not accept the GRE General Test at home edition.

Students' credentials for admission are evaluated by the graduate program chair and a committee chaired by the specialty area coordinator.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates in professional practice become civil engineers who typically focus on large projects such as buildings, bridges, subway systems, dams and water supply networks. Graduates also go into research and higher education.

Clean Energy Systems, MS (ESCESMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science program in clean energy systems, you not only develop sophisticated engineering technical skills in clean energy systems but also exercise the professional competencies of collaboration, communication, teamwork and adaptability. You study a variety of energy sources, including fuel cells, power electronics, batteries, automotive systems and renewable energy systems. In the applied courses within the program, you have exposure to different disciplines, including electrical and electronics engineering, mechanical engineering, chemical engineering, chemistry and physics.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Engineering (Electrical Systems), BSE

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Engineering (Clean Energy Systems), BSE

Engineering (Mechanical Engineering Systems), BSE

Manufacturing Engineering, BS

Robotics and Autonomous Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (EGR 593)

Required Core (9 credit hours)
EGR 520 Engineering Analysis I (3)
EGR 522 Statistics for Quality Control in Manufacturing (3)
EGR 530 Principles of Systems Engineering (3)

Electives (15-21 credit hours)

Culminating Experience (0-6 credit hours)
EGR 593 Applied Project (3)
EGR 599 Thesis (6)
portfolio (0)

Additional Curriculum Information
Students can complete six credit hours of a thesis, three credit hours of an applied project, or a portfolio. The portfolio option is a collection of accomplishments and reflects learning over time; it is a place to record, explore and reflect on the academic-professional journey, and it can serve many different audiences.

Elective coursework credit hours vary depending on the student's culminating experience. Students should contact the department for an approved list of elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in clean energy systems, engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• two letters of recommendation
• written statement
• proof of English proficiency

Additional Application Information:
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

In the written statement, the applicant must include an introduction, share goals and explain why they decided to pursue graduate education.

Letters of recommendation should come from professors, managers, supervisors or professional associates.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for opportunities in the diverse industries of alternative and renewable energy systems, power electronics and automotive technologies. They can work in large corporations and small businesses, conduct research at government agencies such as Oak Ridge National Laboratory and the National Renewable Energy Laboratory, or go on to graduate school to pursue advanced degrees.

Graduates are prepared to go into the fields of:

battery and fuel cell system design and integration
electric and autonomous vehicle design
renewable systems engineering --- design, integration
renewable systems or technologies engineering --- validation, operation and maintenance, evaluation, quality, testing
solar microinverter manufacturing engineering

With the emphasis on design and project-based learning of various clean energy systems, the program supports an entrepreneurial spirit, and some graduates start companies of their own.

Clean Energy Systems, PHD (ESCESPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Doctor of Philosophy program in clean energy systems is a research-driven program develops you to be a part of the next generation of leaders and innovators in the rapidly evolving clean energy systems sector around the world. This interdisciplinary program offers a distinct opportunity to address the world's most pressing energy challenges by focusing on sustainable, renewable and efficient energy solutions. You engage in advanced studies that combine engineering, environmental science and policy to create systems that reduce carbon footprints, enhance energy efficiency and promote global sustainability. You gain fundamental clean energy knowledge and problem-solving skills while participating in transformative research in technology and systems design. With access to state-of-the-art laboratories, industry partnerships and expert faculty, you complete coursework in solar photovoltaics, hydrogen, energy storage technologies, power electronics and connected and automated vehicles.

Whether your goal is to advance technological innovations or shape energy policies, the PhD program in clean energy systems prepares you to be a key player in the global transition to clean energy. You are equipped to excel in academic, government and private sectors, contributing to a cleaner, more sustainable future.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (9 credit hours)
EGR 602 Principles of Independent Research (3)
EGR 603 Advanced Clean Energy Systems (3)
EGR 604 Modeling and Simulation of Clean Energy Systems (3)

Restricted Electives (6 credit hours)

Foundations (3 credit hours)
ALT 515 Alternative Energy Reliability and Standards (3)
ALT 535 Applied Photovoltaics (3)
EGR 538 Batteries and Electric Vehicle Technologies (3)
EGR 560 Vehicle Dynamics and Control (3)
EGR 598 Special Topics (3)

Electives and Additional Research (42 credit hours)

Research (12 credit hours)
EGR 792 Research (12)

Culminating Experience (12 credit hours)
EGR 799 Dissertation (12)

Additional Curriculum Information
Restricted elective coursework must be approved by the research faculty supervisor and include one course from subjects ALT, EGR, EEE, RAS, MAE or CEE in the areas of energy conversion and storage, solar photovoltaics, power electronics or electric and autonomous vehicles. Approved EGR 598 Special Topics options for the restricted electives requirement are Alternative Energy and Power Electronics for Transportation Electrification.

Elective coursework should be based on the doctoral student's research area. These courses must be chosen in consultation with the research faculty supervisor and should be designed to develop a depth of expertise in the research area of interest.

Foundation coursework should be selected in consultation with the program advisor. The approved topics for EGR 598 include Alternative Energy, Energy Efficiency of Connected and Automated Vehicles, Microgrid Design and Operations, and Power Electronics for Transportation Electrification.

The plan of study can include up to 24 credit hours of research. Students with research hours in excess of 12 add these credit hours to the electives and additional research section of their plan of study.

When approved by the student's supervisory committee and the Graduate College, this program allows up to 30 credit hours from a previously awarded master's degree to be used toward the electives and additional research requirement for this degree. If students do not have a previously awarded master's degree, this coursework is made up of electives to reach the required 84 credit hours.

Students require an override to enroll in EGR 799 and must have successfully completed the comprehensive exam before enrollment in EGR 799 Dissertation credit hours. Consideration can be made for EGR 799 enrollment for students planning to complete the comprehensive examination in that term with faculty supervisor approval.

Submission of a written dissertation prospectus and its oral defense are required. It is expected that the submission of a written dissertation prospectus and its oral defense will take place no later than the end of the fourth year.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in clean energy systems, engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 ="A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee

• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Global Launch (https://globallaunch.asu.edu/) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

The statement of purpose should include the applicant's background and life experiences, as well as cultural, geographical and educational opportunities or challenges. Additionally, it should include the applicant's motivation for pursuing the graduate program at ASU and clearly identify personal and professional goals. It should also expand on research interests, intentions regarding the clean energy systems PhD, and the applicant's life beyond ASU.

Contact information for recommenders who are qualified to address the applicant's academic potential is needed. The program recommends selecting references who can speak to the applicant's research capabilities, and interest in and commitment to clean energy systems. References may include current or former instructors, advisors, mentors, supervisors and colleagues. The selected individuals should be able to effectively communicate the applicant's specific strengths, research capabilities and ability to succeed in the doctoral program.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Admission Services.

The clean energy systems program admits highly qualified candidates into the PhD degree program, which is designed to support and empower doctoral students to pursue rigorous, interdisciplinary and original research in the alternative and renewable energy systems, power electronics and automotive systems areas. The PhD in clean energy systems is typically earned in four years beyond the Master of Science program in engineering or other science disciplines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for opportunities in the diverse industries of alternative and renewable energy systems, power electronics and automotive technologies. They can work in large corporations, small businesses or various government agencies. Career examples within clean energy systems and technologies include:

bioenergy chemist
bioenergy engineer
fuel cell development engineer
mechanical engineer
power electronics engineer
power electronics systems integration research associate
solar microinverter manufacturing engineer
wind energy engineer

Cloud Security Architecture, Certificate (ESCLARGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The microcertificate program in cloud security architecture prepares you to implement and manage secure cloud-based IT systems. You gain practical experience in safeguarding digital assets, managing secure infrastructures and= ensuring compliance with industry and government regulations.

Through applied coursework, you develop advanced skills in IT architecture fundamentals, cloud automation, identity= and access management, encryption and security policy enforcement. The program emphasizes the integration of= cloud technologies with risk management and compliance frameworks such as NIST, ISO 27017 and CIS Benchmarks.

This microcertificate program supports you, as a working professional and lifelong learner, to your enhance technical= expertise in cloud security or advance toward leadership roles in cybersecurity and information assurance. You are= prepared to protect enterprise cloud environments, strengthen digital resilience, and address the increasing global= demand for skilled cloud security professionals.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education= benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT extension eligible: No

Degree requirements

9 credit hours

Required Core (9 credit hours)
IFT 543 Security Compliance for Information Technology (3)
IFT 560 Cloud Architecture for Information Technology (3)
IFT 562 Cloud Security and Operations for Information Technology (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information= technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL® (iBT) or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

In the written statement, the applicant must include an introduction, share goals and explain why they decided to pursue graduate education.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/online-cloud-security-architecture-certificate/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared for high-demand careers that focus on securing and managing cloud environments across public and private sectors. Professionals with this credential are positioned to design, implement and oversee secure cloud infrastructures that protect critical data and ensure compliance with national and international standards. Common job titles include:

cloud security architect
cloud solutions architect
cloud infrastructure engineer
DevSecOps engineer
information security analyst
security compliance specialist

Graduates gain a competitive advantage through their applied knowledge of cloud security architecture, risk management and regulatory compliance --- skills that are essential to advancing into leadership roles in cybersecurity, cloud engineering and information assurance.

Computer Engineering (Computer Systems), MS (ESCENCMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in computer engineering is a transdisciplinary offering that provides you with advanced training at the intersection of computer science and electrical engineering, preparing you to design and optimize state-of-the-art computing systems.

Building on strong foundations in computing, applied mathematics and the physical sciences, the program provides you with advanced expertise for designing and implementing state-of-the-art systems.

You benefit from coursework and projects that span the School of Computing and Augmented Intelligence and the School of Electrical, Computer and Energy Engineering, gaining exposure to core areas such as:

• computer architecture and systems design
• computer networks and distributed systems
• embedded and cyber-physical systems
• machine learning and AI for hardware and systems security and dependable computing
• VLSI and digital hardware design

The program is designed to deepen your technical knowledge beyond the bachelor's level and prepare you for careers in industrial R&D or doctoral research. You analyze and synthesize key theories and methods in computer engineering, while also generating and evaluating innovations that can advance the field. More specifically, you develop the skills to advance the design, system integration, testing, evaluation and deployment of state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science, BS

Computer Systems Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis

Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
EEE 554 Probability and Random Processes (3)

Electives (18 or 24 credit hours)

Culminating Experience (0 or 6 credit hours)
CEN 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
This program has a thesis and a nonthesis option for the culminating experience. Students in the nonthesis option take 24 credit hours of electives, and students in the thesis option take 18 credit hours to reach the 30 credit hour requirement. Electives are selected in consultation with the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or a master's degree from a regionally accredited college or university of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

The personal statement should indicate professional goals and reasons for applying the program.

Depending on prior academic preparation and accomplishments, it is recommended that some students consider taking the following courses to ensure adequate background preparation:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms*
EEE 203 Signals and Systems I
EEE 335 Analog and Digital Circuits
EEE 350 Random Signal Analysis
MAT 243 Discrete Mathematical Structures
MAT 265 Calculus for Engineers I

MAT 266 Calculus for Engineers II

*Note that completion of CSE 310 is required to be successful in this program. This course may be assigned as additional coursework upon admission. Students must complete this class with a grade of ''C'' or higher (scale is 4.00 = ''A'') within two semesters of admission to the program.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates have a distinct combination of computer science and electrical engineering skills, positioning them at the forefront of innovation in computing systems. These skills can be applied in high-demand growth areas such as autonomous systems and robotics; distributed, dependable and secure systems; and embedded systems for media processing and communications.

Graduates may work under the direction of scientists and engineers who hold doctorates in high-tech lab settings, assisting in developing innovative products and systems that require strong foundational knowledge in the underlying sciences and the ability to synthesize and analyze engineering principles as they relate to the development of new computer engineering technology.

Career examples include:

computer hardware engineer
computer systems engineer
systems software engineer

Computer Engineering (Computer Systems), PHD (ESCENCPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in computer engineering with a concentration in computer systems prepares you to conduct transformative research at the intersection of hardware and software, driving innovation in next-generation computing systems.

This transdisciplinary program encompasses computer science, electrical engineering, applied mathematics and the physical sciences. You may have the opportunity to conduct original research that advances the design, analysis and optimization of computing systems.

As a doctoral student, you work across two schools --- the School of Computing and Augmented Intelligence and the School of Electrical, Computer and Energy Engineering --- to gain deep expertise in both hardware and software foundations. The program provides rigorous preparation beyond the master's level, equipping you to independently

pursue creative and high-impact innovations.

You analyze and synthesize key theories and methods used in computer engineering, while generating and evaluating new theories, methods and designs that can advance the field. More specifically, you develop the skills to advance the design, system integration, testing, evaluation and deployment of the state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
EEE 554 Probability and Random Processes (3)

Concentration (9 credit hours)

Focus Area Electives (3 credit hours)

Technical Electives (30 credit hours)

Research (24 credit hours)
CEN 792 Research (24)

Culminating Experience (12 credit hours)
CEN 799 Dissertation (12)

Additional Curriculum Information
Concentration, focus area and technical elective courses are selected in consultation with the academic unit.

The concentration and focus area course lists are on the computer engineering program website, and students must complete at least nine credit hours of graduate-level coursework in computer engineering (CEN) or computer science (CSE), and at least three credit hours of graduate-level coursework in electrical engineering (EEE) or computer engineering.

This program requires a qualifying exam. Students should see the academic unit for information on timeline and satisfactory progress standards.

Students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral interactive plan of study with approval of the program and supervisory committee and the dean of the Graduate College.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's degree (or equivalent) or a graduate degree from a regionally accredited institution of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• personal statement
• three letters of recommendation
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Letters of recommendation are optional.

The personal statement should explain the applicant's professional goals and their reasons for applying to the program.

Depending on their prior academic preparation and accomplishments, it is recommended that some students consider taking the following courses to ensure adequate background preparation:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
EEE 203 Signals and Systems I
EEE 335 Analog and Digital Circuits
EEE 350 Random Signal Analysis
MAT 243 Discrete Mathematical Structures
MAT 265 Calculus for Engineers I
MAT 266 Calculus for Engineers II

Students should see the program website for application details.

Tuition information

Computer Engineering (Electrical Engineering), MS (ESCENEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Computer engineering is a transdisciplinary program that builds on the fundamentals of computer science, electrical engineering, applied mathematics and physical sciences. You can take courses and participate in projects through this transdisciplinary program that spans two schools and encompasses several core areas.

The Master of Science program in computer engineering with a concentration in electrical engineering deepens your knowledge beyond that provided at the bachelor's degree level. You prepare to design and implement state-of-the-art systems in industrial research and development positions, and you learn to analyze and synthesize key theories and methods used in the field of computer engineering.

The program is also gives you an opportunity gain experience in research and prepares you for future doctoral study.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis

Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
EEE 554 Probability and Random Processes (3)

Electives (18-24 credit hours)

Culminating Experience (0-6 credit hours)
CEN 599 Thesis (6) or
Portfolio (0)

Additional Curriculum Information
This program has a thesis option and a nonthesis option for the culminating experience. Students in the nonthesis option take 24 credit hours of electives, and students in the thesis option take 18 credit hours to reach the 30 credit hour requirement. Electives are selected in consultation with the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's degree (or equivalent) or a master's degree from a regionally accredited college or university of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• three letters of recommendation (optional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

The personal statement should indicate professional goals and reasons for applying to the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are able to apply new theories, methods and designs that can advance the field of computer engineering. More specifically, program graduates have the skills to advance the design, system integration, testing, evaluation and deployment of state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas, such as autonomous systems and robotics, and distributed, dependable and secure systems, as well as in embedded systems for media processing and communications.

Career examples include:

computer engineering professor
computer engineering researcher
computer hardware engineer
computer systems engineer
systems software engineer

Graduates may work in high-tech lab settings, assisting in developing innovative products and systems under the direction of scientists and engineers who hold doctorates. Such positions require strong foundational knowledge in the underlying sciences and the ability to synthesize and analyze engineering principles as they relate to the development of new computer engineering technology.

Admission deadlines (https://cen.engineering.asu.edu/admissions/)

Computer Engineering (Electrical Engineering), PHD (ESCENEPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in computer engineering is a transdisciplinary program that builds on the fundamentals of electrical engineering, computer science, applied mathematics and physical sciences. You are able to take courses and participate in projects across two schools and among the core areas.

If you have excellent ability in mathematics and physical science; are interested in gaining an in-depth knowledge of the foundational principles of engineering; and wish to pursue a career in academia, research or highly technical entrepreneurial innovation, then this program is for you.

This PhD program provides broader and more in-depth preparation than the Master of Science programs in anticipation of a demonstrated ability to independently pursue more creative and substantive innovation with higher impact.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
EEE 554 Probability and Random Processes (3)

Concentration (9 credit hours)

Focus Area Electives (3 credit hours)

Technical Electives (30 credit hours)

Research (24 credit hours)
CEN 792 Research (24)

Culminating Experience (12 credit hours)
CEN 799 Dissertation (12)

Additional Curriculum Information
Concentration, focus area and technical elective courses are selected in consultation with the academic unit.

The concentration and focus area course lists are on the computer engineering website and need to meet the following requirements: at least nine credit hours of graduate-level coursework in electrical engineering (EEE XXX) or computer engineering (CEN XXX), and at least three credit hours of graduate-level coursework in computer engineering or computer science (CSE XXX).

This program requires a qualifying exam. Students should see the academic unit for information on timeline and satisfactory progress standards.

Students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral interactive plan of study with approval of the program and supervisory committee and the dean of the Graduate College.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's degree (or equivalent) or a graduate degree from a regionally accredited institution of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum GPA of 3.50 (scale is 4.00 = "A") in the MS or MSE coursework for acceptance to the doctoral program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates from the doctoral program in computer engineering are able to analyze and synthesize key theories and methods used in the field of computer engineering. They can generate and evaluate new theories, methods and designs that can advance the field of computer engineering. More specifically, program graduates have the knowledge and skills they need to fundamentally advance and develop new paradigms for the design, system integration, testing, evaluation and deployment of the state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas, such as autonomous systems and robotics, as well as distributed, dependable and secure systems, and embedded systems for media processing and communications. Career examples include:

computer engineering professor
computer engineering researcher
computer hardware engineer
computer systems engineer
systems software engineer

Computer Science (Artificial Intelligence), MS (ESCSEAIMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in computer science with a concentration in artificial intelligence provides you with advanced training in the theory, methods and applications of AI. It combines strong theoretical foundations with flexible electives that reflect your research and career interests. This concentration balances required and elective coursework and offers both a course-only option and a culminating experience through a thesis or applied project.

You are equipped with the knowledge and research skills to advance the theory and practice of AI in academia, industry or government. If you are interested in further study, the program provides a great lead into the Doctor of Philosophy program in AI.

GI Bill® benefits
This new program isn't yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

COURSE-BASED OPTION
Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (12 credit hours)
CSE 571 Artificial Intelligence (3)
CSE 574 Planning and Learning Methods in AI (3)
CSE 575 Statistical Machine Learning (3)
CSE 576 Topics in Natural Language Processing (3)

Electives (9 credit hours)

OPTIONS WITH CULMINATING EXPERIENCE
Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (12 credit hours)
CSE 571 Artificial Intelligence (3)
CSE 574 Planning and Learning Methods in AI (3)
CSE 575 Statistical Machine Learning (3)
CSE 576 Topics in Natural Language Processing (3)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3)
CSE 599 Thesis (6)

Additional Curriculum Information
This master's degree offers a course-based option.

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

A course-based master's program is best suited for students who want to deepen their knowledge and advance their professional skills through structured coursework rather than independent research. Students may complete a thesis or an applied project as an optional culminating experience. Students who enjoy solving real-world problems and applying practical skills in professional settings may be drawn to the applied project option. Students with a strong interest in research and a desire to contribute original knowledge to their field may be well-suited for the thesis option.

Students who select the applied project as their culminating experience must complete their project at the direction of an approved computer science graduate faculty member and complete the project course with a "B" grade or higher.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study for the nonthesis options.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, software engineering, STEM-related programs or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• written statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Before applying to the MS program in computer science, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II. Discrete math is also recommended prior to admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. These courses may include:

• CSE 230 Computer Organization and Assembly Language Programming
• CSE 310 Data Structures and Algorithms
• CSE 330 Operating Systems

• CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Students who complete the MS program in computer science are able to analyze key theories, algorithms and software modules used in the field of computer science. Graduates are prepared to pursue careers in research and education, including academia, government and industry.

Career examples include:

computer network architect
computer system analyst
computer systems engineer
data scientist or engineer
machine learning, AI or computer vision engineer
software developer
software engineer

Computer Science (Big Data Systems), MCS (ESCSEBDMCS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

You develop the skills to design, implement and manage scalable data platforms in the online Master of Computer Science program with a concentration in big data systems, preparing you for careers in data science and engineering.

This concentration program provides you with advanced training in the architecture and management of large-scale data systems. Designed for professionals seeking expertise through hands-on experience, the program prepares you to meet the growing demand for data scientists and engineers who can build and optimize data-driven solutions.

You gain the knowledge and skills to design scalable systems --- parallel, distributed and real-time --- that acquire, store, process and access massive heterogeneous datasets. You also learn to apply analytical tools to extract insights and deploy the right data management, processing and analysis frameworks for structured and unstructured data across diverse domains.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
CSE 511 Data Processing at Scale (3)
CSE 575 Statistical Machine Learning (3)
CSE 578 Data Visualization (3)

Restricted Electives (6 credit hours)

Electives (6 credit hours)

Additional Curriculum Information
This is a course-based master's degree program. Students should see the academic unit for the list of courses approved for electives and each core area in applications, foundations and systems.

Coursework selected as part of the area core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30. The concentration coursework cannot be used as part of the area core on the same plan of study. Students must complete concentration course requirements as listed and complete different coursework for each of the core areas in applications, foundations and systems.

At least 24 of these hours must be CSE 5XX credits at ASU. A maximum of four CSE 598 courses may be allowed as elective coursework. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework. CSE 590 is not allowed as part of the MCS program plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before applying to the MCS program, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II with a grade of "C" (scale is 4.00 = "A") or higher. It is recommended that students complete a discrete math course before admission.

Students assigned any additional admission requirements courses upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Additional admission requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-big-data/) for program descriptions and to request more information.

Career opportunities

Graduates have the expertise to architect and manage end-to-end big data platforms, giving them a competitive edge in industry roles spanning data science, data engineering, and systems development.

Career examples include:

computer network architect
computer system analyst

computer systems engineer
data scientist or engineer
machine learning, artificial intelligence computer vision engineer
software developer
software engineer

Computer Science (Big Data Systems), MS (ESCSEBDMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The on-campus Master of Science program in computer science with a concentration in big data systems provides rigorous, research-focused training in scalable data platforms, preparing you to advance innovation in data science and engineering.

This concentration within the MS program provides you with advanced training and research opportunities in large-scale data management and analysis. Unlike the industry-focused Master of Computer Science program, the MS in computer science emphasizes fundamental and applied research, enabling you to contribute new knowledge and technologies in data-intensive computing.

You may choose either a thesis or nonthesis portfolio option as your culminating experience. You develop expertise in designing scalable systems --- parallel, distributed and real-time --- for acquiring, storing, processing and accessing massive heterogeneous datasets. You also learn to apply advanced analytical methods to mine knowledge from data and to evaluate and select the most appropriate data management, processing and analysis frameworks for both structured and unstructured data.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

Electives (0 or 3 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3) or
CSE 599 Thesis (6)

Additional Curriculum Information
The master's degree offers a course-based option.

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students may complete a thesis or an applied project as an optional culminating experience. All students must complete six credit hours from the restricted electives list. Students in the course-based option must also take six credit hours of electives. Students who enjoy solving real-world problems and applying practical skills in professional settings may be drawn to the applied project option. Applied project students must also take three credit hours of electives. Students with a strong interest in research and a desire to contribute original knowledge to their field may be well-suited for the thesis option.

Students who select the applied project as their culminating experience must complete their project at the direction of an approved computer science graduate faculty member and complete the project course with a grade of "B" (3.00) or higher.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study for the nonthesis options.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on

the Duolingo English test, regardless of current residency.

All international records must be submitted in the original language, accompanied by an official English translation. If the student has attended a U.S. institution, they must submit one set of official transcripts from every college and university attended, except ASU.

Before applying to the program, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. It is also recommended that students complete a discrete math course before admission.

Students who are assigned additional admission requirements courses upon admission must complete them with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission. Additional admission requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for research and development roles in industry and academia, with the skills to innovate in data science, data engineering and large-scale computing systems.

Career examples include:

- computer network architect
- computer system analyst
- computer systems engineer
- data scientist or engineer
- machine learning, artificial intelligence computer vision engineer
- software developer
- software engineer

Computer Science (Biomedical Informatics), MS (ESCSBIOIMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in computer science with a concentration in biomedical informatics prepares you to perform research in topics such as genomics and computational systems biology.

The concentration is transdisciplinary in nature, integrating technological expertise in the information sciences, computer science, biosciences and statistics with an understanding of the clinical environment of the health care professional. You learn about current issues in clinical practice as well as the use of information systems in health care settings.

Biomedical informatics has a key role to play in the transition to more effective and efficient health care through the use of knowledge and computer science principles.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
BMI 502 Foundations of Biomedical Informatics Methods I (3)
BMI 601 Fundamentals of Health Informatics (3)
Students select one course from the following:
BMI 505 Foundations of Biomedical Informatics Methods II (3)
BMI/CSE 507 Image Processing and Analysis (3)

BMI 517 Advanced Biostatistics for Biomedical Research and Health Care (3)
BMI 550 Translational Bioinformatics (3)
BMI 598 Topic: Knowledge Management and Engineering (3)
BMI 615 Human Factors Engineering for Biomedical Applications (3)
BMI 616 Clinical Decision Support and Evidence-based Medicine (3)

Electives or Research (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3)
CSE 599 Thesis (6)

Additional Curriculum Information
Students focus their research in one of the following areas: bioinformatics, biomedical informatics, clinical informatics, imaging informatics or public health informatics. Students complete nine credit hours of BMI concentration courses selected in consultation with the student's graduate advisor.

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students who select the applied project as their culminating experience must complete their project at the direction of an approved computer science faculty member and complete the project course with a "B" grade (scale is 4.00 = "A") or higher.

Students complete a minimum of 30 credit hours for the program. At least 21 of these credit hours must be 500-level CSE courses at ASU.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS or 115 on the Duolingo English test, regardless of current residency.

Before applying to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a "C" (scale is 4.00 = "A") or higher. Discrete math is also recommended before admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission to the program. These courses may include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are able to analyze and apply key theories, algorithms and software modules used in the field of computer science.

Career examples include:

- biomedical researcher
- computer network architect
- computer systems analyst
- computer systems engineer
- data scientist or engineer
- machine learning, artificial intelligence computer vision engineer
- software developer
- software engineer

Computer Science (Cybersecurity), MCS (ESCSEIMCS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

In the online Master of Computer Science program with a concentration in cybersecurity, you receive hands-on training in securing information systems as you prepare for technical leadership. This concentration within the MCS program equips you with applied expertise to defend modern computing environments.

The program emphasizes practical skills and covers areas such as applied cryptography, network and system security, computer forensics, information assurance and secure software engineering. You learn to analyze risks, design resilient

systems and create innovative methods to protect critical infrastructure. You become skilled in analyzing key theories, algorithms and software modules used in the field of computer science.

The information assurance courseware at Arizona State University is certified to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
CSE 543 Information Assurance and Security (3)
Students choose two:
CSE 539 Applied Cryptography (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Network Security (3)

Electives (12 credit hours)

Additional Curriculum Information
This is a course-based program; students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Coursework selected as part of the area core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total credit hours of their plan of study equal 30.

The concentration coursework cannot be used as part of the area core on the same plan of study. Students must complete concentration course requirements as listed and complete different coursework for each of the core areas in applications, foundations and systems.

The interactive plan of study must have a minimum of 30 credit hours of approved graduate-level work. At least 24 of these hours must be CSE 500-level credits at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework (including CSE 591). CSE 590 is not allowed as part of the MCS program plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before applying to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. It is also recommended that students complete a discrete math course before admission.

Students who are assigned additional admission requirements courses upon admission must complete them with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission. Additional admission requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/computer-science-cybersecurity-mcs/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared for research and development careers in industry and government, and to pursue doctoral study. They have a competitive advantage in securing employment.

Career examples include:

- computer network architect
- computer system security analyst
- computer systems engineer
- data scientist or engineer
- machine learning, artificial intelligence or computer vision engineer
- software developer
- software engineer

Computer Science (Cybersecurity), MS (ESCSEIAMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Master of Science program in computer science with a concentration in cybersecurity, you receive rigorous, research-oriented training in secure systems, and prepare for advanced study or research and development careers in cybersecurity.

The cybersecurity concentration offers you a thorough education in the science and engineering of cybersecurity. You may pursue a thesis or nonthesis portfolio option, gaining both advanced knowledge and research experience.

The program covers core areas including applied cryptography, network and system security, computer forensics, information assurance and secure software engineering. You learn to analyze risks, design resilient systems and create innovative methods to protect critical infrastructure. You are able to analyze and apply key theories, algorithms and software modules used in computer science, and advance them within the field.

The information assurance courseware at Arizona State University is certified to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

If you are a domestic student enrolled in the cybersecurity concentration, you are eligible for federal fellowship, such as the National Science Foundation CyberCorps: Scholarship for Service (https://ctf.asu.edu/education/scholarship/) program.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT

extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

COURSE-BASED OPTION

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
CSE 543 Information Assurance and Security (3)
Students choose two:
CSE 539 Applied Cryptography (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Network Security (3)

Electives (12 credit hours)

OPTIONS WITH CULMINATING EXPERIENCE

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)

CSE 543 Information Assurance and Security (3)
Students choose two:
CSE 539 Applied Cryptography (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Network Security (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3) or
CSE 599 Thesis (6)

Additional Curriculum Information
The program offers a course-based option.

Students should see the academic unit for the list of courses approved for each core area (applications, foundations and systems).

Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students may complete a thesis or applied project as an optional culminating experience. Regardless of the culminating experience chosen, all students must complete six credit hours from the approved list of electives. Students completing the course-based option take 12 credit hours of electives. Students who enjoy solving real-world problems and applying practical skills in professional settings may be drawn to the applied project option. Students in the applied project experience must also take nine credit hours of electives. Students who select the applied project as their culminating experience must complete their project under the direction of an approved computer science faculty member and complete the project course with a grade of "B" (scale is 4.00 = "A") or higher. Students with a strong interest in research and a desire to contribute original knowledge to their field may be well-suited for the thesis option. Students should see the academic unit for more information.

Students complete a minimum of 30 credit hours for the program; at least 24 of these must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply for the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before applying to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. It is also recommended that students complete a discrete math course before admission.

Students who are assigned additional requirements courses upon admission must complete them with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission. Additional requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Computer Science (Cybersecurity), PHD (ESCSEIAPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Doctor of Philosophy program in computer science with a concentration in cybersecurity, you conduct original research that advances the theory and practice of protecting computing systems and critical infrastructure.

This concentration in cybersecurity trains you to pursue fundamental and applied research in securing information systems. You develop advanced expertise in applied cryptography, system and network security, computer forensics, data and information assurance, and secure software and architectures.

The program emphasizes both theoretical depth and practical application, preparing you to design trustworthy, resilient and verifiable computing systems. Research opportunities include threat modeling, intrusion detection, privacy-preserving computation, and the design of protocols that ensure confidentiality, integrity, authentication, availability and nonrepudiation.

You are able to analyze, understand and apply key theories and algorithms used in the field of computer science. You also are able to generate and evaluate new theories, algorithms and software modules that can advance the field of computer science.

If you're a domestic student enrolled in the cybersecurity concentration, you're eligible for federal fellowship, such as the National Science Foundation CyberCorps: Scholarship for Service (https://ctf.asu.edu/education/scholarship/) program.

The information assurance courseware at Arizona State University is certified to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, a prospectus and a dissertation

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
CSE 543 Information Assurance and Security (3)
Students choose two:
CSE 539 Applied Cryptography (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Network Security (3)

Research (18 credit hours)
CSE 792 Research (18)

Electives and Additional Research (36 credit hours)

Culminating Experience (12 credit hours)

CSE 799 Dissertation (12)

Additional Curriculum Information
Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or higher is required for core courses.

Students must complete 18 credit hours of CSE 792 Research, and up to 54 credit hours are allowed on the plan of study. Students with more than 18 research credit hours may apply these additional hours toward electives and additional research.

Electives include:

• additional CSE 792 Research credit hours (up to 36 credit hours allowed beyond the required 18)
• computer science courses, of which up to 18 credit hours of CSE 590 and CSE 790: Reading and Conference are allowed
• up to six credit hours of interdisciplinary electives in other academic units that are subject to program chair approval

When approved by the academic unit and the Graduate College, up to 30 credit hours from a previously awarded master's degree can be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied on the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly to the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from every university attended
• three letters of recommendation
• statement of purpose
• curriculum vitae or resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency by scoring at least 4.5 in the Internet-based TOEFL iBT® or a score of 90 if taken before January 21, 2026 in a testing center, 7 on the IELTS or 115 on the Duolingo English test.

Submission of GRE scores is optional and not required as part of the application. Applicants taking the GRE test should note that ASU does not accept the GRE General Test at home edition.

Applicants must have two semesters or six credit hours of calculus, equivalent to Calculus I and II and discrete math with a grade of ''C'' or higher (scale if 4.00 = ''A'') prior to admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission. Additional courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for leadership roles in academia, government and advanced industry research, where they contribute transformative innovations in cybersecurity. They have a competitive advantage when it comes to securing employment.

Career examples include:

- computer science researcher
- computer science security professor
- data scientist engineer
- machine learning, AI or computer vision engineer
- machine learning, AI or computer vision scientist

Computer Science (Media Arts and Sciences), MS (ESAMECSMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in computer science with a concentration in media arts and sciences emphasizes research on the integration of the human physical experience with computation and digital media.

Media arts and sciences researchers produce experiential media systems and models that assist the disadvantaged, empower creativity, enhance scientific discovery, evolve human ability, facilitate learning and improve quality of life. Within these application areas, researchers explore experiential construction, interaction and feedback, knowledge creation, sensing, perception and modeling.

If you are a hybrid engineering-arts graduate who get your inspiration from the arts, and your methodology from computer science and engineering, the media arts and sciences concentration is designed for you. You can specialize in

transdisciplinary media development. More information about the media arts and sciences concentration can be found on The GAME School (https://thegameschool.asu.edu/) website.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Concentration (9 credit hours)
AME 511 Advanced Interactive Sound (3)
AME 515 Machine Vision and Pattern Recognition (3)
AME 520 Movement and Computing (3)
AME 532 Creating Interactive Media (3)
AME 534 Machine Learning for Media Arts (3)
AME 535 Mobile Development (3)
AME 551 Designing Extended-reality Experiences (3)
AME 570 Programming for Social and Interactive Media (3)

Electives or Research (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
AME 599 Thesis (2) and

CSE 599 Thesis (4) or
CSE 593 Applied Project (3)

Additional Curriculum Information
Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Students complete nine credit hours of media arts and sciences concentration courses selected in consultation with their graduate advisor. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students complete a thesis or an applied project for their culminating experience. Students completing the thesis must earn six credit hours of electives. Students who select the applied project must earn nine credit hours of electives, complete their project at the direction of an approved computer science faculty member and complete the project course with a "B" (3.00 on a 4.00 scale) or higher.

Students complete a minimum of 30 credit hours for the program. At least 19 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before applying to the MS program, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. Completion of a discrete math course is also recommended before admission.

The statement of purpose must address the transdisciplinary nature of the media arts and sciences program. Applicants should explain in a concise and persuasive manner how their educational, professional and personal experiences inform their research and creative interests, writing on any aspect of their background that supports their

candidacy. For further information on how this statement can be expanded upon by students interested in a research assistantship or an integrative graduate education and research traineeship within media arts and sciences, students should visit The GAME School (https://thegameschool.asu.edu/) website. Students should submit a curriculum vitae with the statement of purpose.

Students assigned any additional admission requirements courses upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Additional requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are well positioned to pursue career opportunities in the following areas:

- artificial intelligence, machine learning and statistical modeling
- big data and data mining
- computational biology
- computer design and architecture, including non-volatile memory computing
- computer system security, cybersecurity and cryptography
- cyber-physical systems and Internet of Things
- distributed computing and consensus protocols
- networking and computer systems
- novel computing paradigms (e.g., biocomputing, quantum computation)
- social computing
- theory and algorithms
- visualization and graphics

Computer Science (Media Arts and Sciences), PHD (ESAMECSPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Doctor of Philosophy program in computer science with a concentration in media arts and sciences, you research the integration of the human physical experience with computation and digital media. You are able to produce experiential media systems and models that assist the disadvantaged, empower creativity, enhance scientific discovery,

evolve human ability, facilitate learning and improve quality of life. Within these application areas, you can explore experiential construction, interaction and feedback, knowledge creation, sensing, perception and modeling. You specialize in transdisciplinary media development.

The program's purpose is to train hybrid engineering-arts students who get their inspiration from the arts and their methodology from computer science and engineering. More information about the media arts and sciences concentration can be found on The Game School (https://thegameschool.asu.edu/) website.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Depth (3 credit hours)
three additional credit hours in one core area (3)

Concentration (9 credit hours)
Select three courses from the following list:
AME 511 Advanced Interactive Sound (3)
AME 515 Machine Vision and Pattern Recognition (3)
AME 520 Movement and Computing (3)
AME 532 Creating Interactive Media (3)
AME 535 Mobile Development (3)
AME 570 Programming for Social and Interactive Media (3)

Research (18 credit hours)
AME 792 Research (6)
CSE 792 Research (12)

Electives (33 credit hours)

Culminating Experience (12 credit hours)
AME 799 Dissertation (6)
CSE 799 Dissertation (6)

Additional Curriculum Information
Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or higher is required for core courses.

Twelve credit hours of CSE 792 Research and six credit hours of AME 792 are required, and up to 51 credit hours are allowed on the plan of study. Students with more than 18 research credit hours add these credit hours to their

electives and additional research.

Electives include:

• additional CSE 792 Research credit hours (up to 33 credit hours allowed beyond the required 18)
• computer science courses, of which up to 18 credit hours of CSE 590 and CSE 790 Reading and Conference are allowed

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied to the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly to the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from every university attended
• three letters of recommendation
• a statement of purpose
• curriculum vitae or resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose must fulfill any requirements defined by the Graduate College and address the transdisciplinary nature of the media arts and sciences program. Applicants should explain in a concise and persuasive manner how their educational, professional and personal experiences inform their research and creative interests, writing on any aspect of their background that supports candidacy to the program. Further information on how this statement can be expanded upon by students interested in a research assistantship or an Integrative Graduate Education and Research Traineeship within media arts and sciences is available from the department. Students should submit a current curriculum vitae with the statement of purpose.

GRE scores are optional.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses commonly taken include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are able to analyze, understand and apply key theories and algorithms used in the field of computer science. They can also generate and evaluate new theories, algorithms and software modules that can advance the field of computer science.

Career examples include:

arts, media and engineering professor or researcher
computer science professor or researcher
data scientist or engineer
machine learning, AI or computer vision engineer or scientist

Computer Science, MCS (ESCOMSCMCS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

In the online Master of Computer Science program, you receive hands-on training in theory, systems and applications, enabling you to build a project portfolio and advance your career in industry.

The MCS program provides you, as a working professional and industry practitioner, with advanced training in computing, emphasizing hands-on learning and career development. Unlike the research-focused Master of Science program, the MCS broadens technical expertise through applied coursework and project-based learning.

You gain depth across key areas of modern computing, including:

• algorithms, theory and simulation modeling
• artificial intelligence and machine learning
• big data and data mining
• cloud and distributed systems
• computer security, cybersecurity and cryptography
• cyber-physical systems and Internet of Things
• visualization, imaging and graphics

You complete course projects that demonstrate advanced technical skills and position you for leadership and innovation in industry.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Electives (21 credit hours)

Additional Curriculum Information
This is a course-based program.

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Students choose 21 credit hours of elective coursework approved by their academic advisor. Coursework selected as part of the area core may not be used as elective coursework on the same plan of study.

At least 24 of these hours must be CSE 500-level credits at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework. CSE 590 cannot be included in the MCS program plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS or 115 on the Duolingo English test, regardless of current residency.

Before applying to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. Completion of a discrete math course is also recommended before admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission. Additional admission requirements courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/computer-science-mcs/) for program descriptions and to request more information.

Career opportunities

Graduates are able to analyze key theories, algorithms and software modules used in the field of computer science.

Career examples include:

computer network architect
computer system analyst
computer systems engineer
data scientist or engineer
machine learning, AI or computer vision engineer

software developer
software engineer

Computer Science, MS (ESCOMSCMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The on-campus Master of Science program in computer science provides rigorous, research-focused training in theory, systems and applications, preparing you to advance the frontiers of computing --- including artificial intelligence, cybersecurity, quantum computing and other novel paradigms.

Unlike the industry-oriented Master of Computer Science program, the MS program in computer science emphasizes fundamental and applied research. You are able to work closely with world-class faculty and contribute to discovery in computing and augmented intelligence.

You may pursue either a thesis or nonthesis option as your culminating experience and can explore advanced topics such as:

• AI, machine learning and statistical modeling
• big data and data mining
• computational biology
• computer design, architecture and compilers
• computer security, cybersecurity and cryptography
• computer systems, including networking and operating systems
• cyber-physical systems, Internet of Things and robotics
• distributed computing and consensus protocols
• novel computing paradigms, including biocomputing and quantum computation
• theory, algorithms and optimization
• visualization and graphics

This program is ideal if you wish to deepen your expertise, pursue doctoral studies, or engage in high-level research and development in industry or academia.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS

Computer Systems Engineering (Cybersecurity), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

COURSE-BASED OPTION

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Electives (21 credit hours)

OPTIONS WITH CULMINATING EXPERIENCE

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Electives (15 or 18 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE 593 Applied Project (3) or
CSE 599 Thesis (6)

Additional Curriculum Information
Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses selected as part of the core may not be used as other elective coursework on the same plan of study.

Students in the course-based option take 21 credit hours of electives. Students may complete a thesis or applied project as an optional culminating experience. Students with a strong interest in research and a desire to contribute original knowledge to their field may be well-suited for the thesis option. Students in the thesis option take 15 credit hours of electives. Electives must be courses in a chosen research area and approved by the student's academic advisor. Up to six credit hours can be independent study in CSE 590 Reading and Conference. Students who enjoy

solving real-world problems and applying practical skills in professional settings may be drawn to the applied project option. Applied project students take 18 credit hours of electives. Students should see the academic unit for additional information and requirements.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• a statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Before applying to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II. Completion of a discrete math course is also recommended before admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission. These courses may include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are able to analyze key theories, algorithms and software modules used in the field of computer science. They are prepared to pursue careers in research and education, including academia, government and industry.

Career examples include:

computer network architect
computer system analyst
computer systems engineer
data scientist or engineer
machine learning, AI or computer vision engineer
software developer
software engineer

Computer Science, PHD (ESCOMSCPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Doctor of Philosophy program in computer science, you conduct original research that advances the theories, algorithms and systems that define the future of computing.

This research-intensive program prepares you to advance the frontiers of computing through original, independent scholarship.

Working closely with world-class faculty, you pursue research across a wide variety of areas, including:

• artificial intelligence, machine learning and statistical modeling
• big data and data mining
• computational biology
• computer architecture and nonvolatile memory computing
• computer security, cybersecurity and cryptography
• cyber-physical systems, IoT and robotics
• distributed computing and consensus protocols
• networking and operating systems
• novel computing paradigms, including biocomputing and quantum computing
• social computing
• theory, algorithms and optimization
• visualization and graphics

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core Areas (9 credit hours)
applications (3)
foundations (3)
systems (3)

Depth (3 credit hours)
three additional credit hours in one core area (3)

Research (18 credit hours)
CSE 792 Research (18)

Electives and Additional Research (42 credit hours)

Culminating Experience (12 credit hours)
CSE 799 Dissertation (12)

Additional Curriculum Information
Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or higher is required for core courses.

Eighteen credit hours of CSE 792 Research are required, and up to 54 credit hours are allowed on the plan of study. Students with research credit hours in excess of 18 add these credit hours to their electives and additional research.

Electives include:

• additional CSE 792 Research credit hours (up to 36 credit hours allowed beyond the required 18)
• computer science courses, of which up to 18 credit hours of CSE 590 and CSE 790: Reading and Conference are allowed
• up to six credit hours of interdisciplinary electives in other academic units that are subject to program chair approval

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied to the plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly into the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

• graduate admission application and application fee
• official transcripts from every university attended
• three letters of recommendation
• a statement of purpose
• curriculum vitae or resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency by scoring at least 4.5 on the internet-based TOEFL iBT® or a score of 90 (taken in a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test.

Submission of GRE scores is optional and not required as part of the application. Students taking the GRE should note that ASU does not accept the GRE General Test at home edition.

Students must have two semesters or six credit hours of calculus, equivalent to Calculus I and II and discrete math with a grade of ''C'' or higher (scale is 4.00 = ''A'') prior to admission.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission to the program. Additional courses commonly taken include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared to lead cutting-edge research in academia, industry or government, and to contribute transformative innovations that shape the future of computing.

Career examples include:

computer science professor or researcher
data scientist or engineer
machine learning, AI or computer vision scientist or engineer

Construction Engineering, MSE (ESCONEMSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science in Engineering program in construction engineering is a transdisciplinary offering that encompasses the areas of geotechnical engineering, structural engineering, transportation engineering, construction engineering and management-related topics.

This focus on a combination of design and management prepares you for a career at the interface of design and construction. This program is a particularly good fit if you're interested in a career focused on infrastructure construction.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil Engineering, BSE

Construction Engineering, BSE

Civil Engineering (Sustainable Engineering), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's

Structures Core Area (3 credit hours)
CEE 521 Stress Analysis (3) or
CEE 536 Structural Dynamics for Civil Engineering (3)

Geotechnical Core Area (3 credit hours)
CEE 552 Soil Improvement (3) or
CEE 553 Advanced Soil Mechanics (3)

Transportation Core Area (3 credit hours)
CEE 511 Pavement Analysis and Design (3) or
CEE 512 Pavement Performance and Management (3) or
CEE 583 Topic: Highway Materials, Construction and Quality (3)

Electives (21 credit hours)

Additional Curriculum Information
This is a course-based master's degree program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering or other closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A student whose undergraduate degree is not in civil or construction engineering is required to take appropriate undergraduate courses to establish a base of knowledge in the discipline. These additional courses are specified at the time of admission, and details can be found in the graduate studies section of the program's website.

Applicants with an undergraduate GPA lower than 3.00 (scale is 4.00 = "A") may be provisionally admitted at the discretion of the admission committee.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

With a strong background in design and management, graduates are prepared to begin a career in the engineering and construction industry as a field engineer, project engineer or project designer. Potential employers include:

- construction companies
- design firms
- facility owners
- materials suppliers
- specialty subcontractors

Construction Management and Technology, MS (ESCONSTMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

If you have a bachelor's degree in construction or a related field such as architecture, business or engineering, the transdisciplinary Master of Science program in construction management and technology enables you to broaden and improve your professional capabilities in construction. This meets the growing need for professionals with advanced technical, management and applied research skills in the construction industry.

The program enables your plan of study to reflect individual interests and career goals. Courses are offered in several areas, so you have options to tailor your degree to your interests:

• commercial and residential areas
• construction management --- project, program and company
• facilities management --- maintenance, operation, renovation or decommissioning of existing facilities
• heavy construction --- infrastructure development
• specialty construction

This program is facilitated by the faculty of the Del E. Webb School of Construction.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Construction Management and Technology, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours and a written comprehensive exam, or
30 credit hours including the required applied project course (CON 593), or
30 credit hours including the required capstone course (CON 597)

Required Core (6 credit hours)

Project Management and Controls Core Area (3 credit hours)
CON 502 Front-end Planning (3)
CON 530 Facilities Operations and Maintenance (3)
CON 532 Facilities Project Management (3)
CON 534 Retrofit Construction (3)
CON 540 Construction Productivity (3)

CON 541 Public Works Capital Construction (3)
CON 545 Construction Project Management (3)
CON 548 Sustainable Construction (3)
CON 551 Project Delivery Methods (3)
CON 557 Principles of Leadership for Project Managers (3)
CON 567 Advanced Procurement Systems (3)
CON 589 Construction Company Financial Control (3)

Construction Technology Core Area (3 credit hours)
CON 508 Engineering and Construction Failures (3)
CON 509 Advanced Concrete Materials (3)
CON 510 Sustainable Bio-based Construction (3)
CON 531 Facility Management: Building Energy Management (3)
CON 554 Trenchless Construction Methods (3)
CON 570 Introduction to Advanced Technology Facilities (3)
CON 571 Construction of Advanced Technology Facilities (3)
CON 575 Information Technology in Construction (3)

Electives or Research (18-24 credit hours)

Culminating Experience (0-6 credit hours)
CON 593 Applied Project (3)
CON 597 Graduate Capstone in Construction (3)
CON 599 Thesis (6)
written comprehensive exam (0)

Additional Curriculum Information
Students choose one three-credit-hour course from each of the core areas listed above for a total of six credit hours. If a course is chosen as a core area course, it cannot be used as an elective course simultaneously.

The number of electives and research is adjusted depending on the culminating experience chosen by the student.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• current resume
• an evaluation of the student's academic and professional background
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency by meeting the Graduate College English proficiency requirements regardless of their current residency.

Applicants required to demonstrate English proficiency and seeking a teaching assistantship must demonstrate proficiency in spoken English, and a score of 55 or better on the Speaking Proficiency English Assessment Kit, or a score of 26 on the speaking portion of the TOEFL is required.

Applicants are expected to be competent in basic construction topics.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-construction-management/) for program descriptions and to request more information.

Career opportunities

Graduates of the construction management and technology program are well prepared for numerous types of careers, depending upon which subject area they focused their coursework:

commercial and residential --- real estate developers, commercial construction managers, managers and supervisors of health care and special industrial building projects or home production systems, and managers or supervisors of sustainable or green construction
construction management --- project managers, project engineers, estimators or schedulers who can eventually become principals of firms engaged in the construction of industrial, commercial or residential projects
facilities management --- managers who supervise the maintenance, operation, renovation or decommissioning of existing facilities
heavy construction --- supervisors of the construction and maintenance of public works such as highways, airports, bridges, utility systems, and water or waste treatment facilities
specialty construction --- organizers, leaders and managers of the building process at the subcontractor or contractor level working with mechanical and electrical systems, and in management at specialty contracting firms, such as those who do work in control systems, electrical distribution or HVAC systems for large and complex facilities such as data centers, health care organizations and semiconductor manufacturing plants as well as commercial facilities

Construction Management, PHD (ESCONPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Del E. Webb School of Construction has one of the top construction management doctoral programs in the United States. It provides a rigorous education and teaching environment as you seek an advanced degree.

The Doctor of Philosophy program in construction management requires novel, independent research that broadly contributes to the construction management body of knowledge. Transdisciplinary research is often required because of the nature of the topics studied. You can focus your elective coursework in emphasis areas such as heavy construction, commercial and residential construction, and specialty construction.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

The doctoral program in construction typically requires three to four years of full-time study and research beyond the master's degree. Generally, students are admitted to the doctoral program at or near the completion of their master's degree.

The program requires 84 credit hours post-bachelor's degree or 54 credit hours post-master's degree.

The program consists of:
• core construction courses
• elective courses
• a qualifying examination
• a written and oral comprehensive examination
• admission to candidacy
• successful defense of a dissertation prospectus and complete dissertation

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a master's degree in construction, civil engineering, architecture, business or a related field from a regionally accredited institution. Only exceptional students are admitted without a master's degree. At the discretion of the admission committee, students from other disciplines also may be eligible. In addition, applicants are expected to be competent in construction topics.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts

• official GRE scores
• a current resume
• an evaluation of the student's academic and professional background
• master's degree thesis abstract
• personal statement
• research interests
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who are required to demonstrate English proficiency and are seeking a teaching assistantship must demonstrate proficiency in spoken English; a score of 55 or higher on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL is required.

Applicants must take the GRE and have their official scores sent directly to ASU Graduate Admission Services. ASU does not accept the GRE® General Test at home edition. More information regarding how to send official GRE scores can be found on the Graduate Admission Services website.

The personal statement should describe the applicant's career goals and research objectives.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the doctoral program have careers in architecture; engineering and construction industries; academia; and local, state and federal government. The program provides a foundation for those who wish to pursue careers as project managers, project engineers, estimators or schedulers and eventually become principals of firms engaged in the construction of industrial, commercial or residential projects.

The heavy construction emphasis area prepares graduates for careers related to public works, such as highways, airports, bridges, utility systems, and water or waste treatment facilities.

The commercial and residential emphasis prepares graduates for careers in real estate development, home production systems, commercial construction, and health care and special industrial building projects, and to enter the sustainable or green construction market.

The specialty construction emphasis prepares graduates for organization, leadership and management of the building process at the subcontractor level and for careers as contractors working with mechanical and electrical systems. This emphasis also prepares graduates for careers in management at specialty contracting firms, such as those that deal with control systems; electrical distribution; or heating, ventilation and air conditioning systems for large and complex facilities, including data centers, health care organizations and semiconductor manufacturing plants, as well as commercial facilities.

Cybersecurity, Certificate (ESCYSCGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

The microcertificate program in cybersecurity equips you with practical skills in cryptography, network security and software security, preparing you to address real-world cyber threats. You develop critical, hands-on cybersecurity expertise to protect and secure modern information systems.

You choose three graduate-level courses from a diverse set of topics. Through these courses, you build a strong foundation in both theory and application. You learn how to:

• apply cryptographic principles
• design and evaluate secure systems
• implement cyber defense strategies
• manage risk and compliance
• secure information systems

Upon completion, you are prepared to tackle evolving cybersecurity challenges and strengthen organizational resilience against cyber threats.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT extension eligible: No

Degree requirements

9 credit hours

Required Core (9 credit hours)
CSE 531 Distributed and Multiprocessor Operating Systems (3)
CSE 539 Applied Cryptography (3)
CSE 543 Information Assurance and Security (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Networking Security (3)

Additional Curriculum Information
Students select three of the courses listed. Courses should be selected in consultation with the program advisor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing or a STEM-related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL® (iBT) or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/online-cybersecurity-certificate/) for program descriptions and to request more information.

Career opportunities

This microcertificate program in cybersecurity is an excellent pathway to advance or transition into the high-demand cybersecurity field. Graduates are equipped for roles such as:

application security engineer
compliance and security officer
cybersecurity analyst
information assurance specialist
information security specialist
IT risk analyst
network security engineer
systems security administrator

Data Science, Analytics and Engineering (Bayesian Machine Learning), MS (ESDSEBMLMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

This concentration in Bayesian machine learning within the Master of Science program in data science, analytics and engineering is offered in partnership with the School of Mathematical and Statistical Sciences. With its programs in statistics, applied mathematics and theoretical mathematics, the school is distinctly positioned to enable you to

understand the statistical, probability and mathematical bases for the technical tools and emerging concepts in statistical and probabilistic machine learning and data science. The school also supports your ability to collect, maintain, analyze, model and decide based on heterogeneous, time-dependent, noisy, biased, hierarchical and potentially large data sets.

Bayesian thinking is particularly suited to addressing the difficult issues associated with these high-dimension complex modeling challenges. Bayesian learning, decision-making and computation have made a significant impact on many areas of data science. Hierarchical modeling, time series analysis, ensemble modeling, spatial modeling and causal modeling are among the various areas of expertise covered by this program. You can apply these tools in a variety of domains, including engineering, physics, biology, social sciences, economics and finance.

You perform Bayesian data analysis, modeling, remodeling, and decision-making in data-enriched environments. The curriculum includes the exploratory analysis of massive and complex data streams, Bayesian modeling and computing, data management, causal modeling, and inference and decision under uncertainty using Bayesian trees, neural networks and text modeling popular in industry and academia.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Data Science, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (FSE 570)

Required Core (9 credit hours)
Students choose one:
DSE 501 Statistics for Data Analysts (3)
EEE 554 Probability and Random Processes (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
STP 501 Theory of Statistics I: Distribution Theory 3 (3)

Students choose one:
CSE 511 Data Processing at Scale (3)
CSE 512 Distributed Database Systems (3)
IFT 530 Advanced Database Management Systems (3)

Students choose one:
CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)

EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)
STP 502 Theory of Statistics II: Inference (3)
STP 505 Bayesian Statistics (3)
STP 540 Computational Statistics (3)
STP 551 Time Series Analysis (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
FSE 570 Data Science Capstone (3)
STP 599 Thesis (6)

Additional Curriculum Information
For concentration coursework, students select three courses from the list. Students should consult the academic unit for a list of approved electives.

Courses selected for the required core or concentration may not be used as elective coursework on the same plan of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills (in the professional resume)
• undergraduate linear algebra (e.g., MAT 343 Applied Linear Algebra)
• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)

Completion of an undergraduate linear algebra course (e.g. MAT 343 Applied Linear Algebra) before applying is a firm requirement for this concentration.

In addition, applicants who do not have an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

• AWS-certified cloud practitioner
• Google data analytics certificate
• Google IT support certificate

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Statistician and data scientist are consistently ranked among the top jobs in the U.S. Applied statisticians with a strong background in Bayesian learning and decision can pursue opportunities in a variety of fields to collect and curate large and complex data sets related to business plans, model and communicate findings, and support rational decision-making. Professionals with data science skills are needed in financial markets and at central banks; in the pharmaceutical, semiconductor, communications, energy, and power systems sectors; and at institutions such as the National Institutes of Health, the Centers for Disease Control and Prevention, and the National Oceanic and Atmospheric Administration.

Data Science, Analytics and Engineering (Computational Mathematics and Data), MS (ESDSECMDMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Data scientist is consistently ranked among the top jobs in the U.S., and there's an increasing need for applied mathematicians to make use of data science tools such as statistics, machine learning, artificial neural networks and artificial intelligence. Beyond the application of these tools, the fast-moving field of data science requires an understanding of the mathematical background of the algorithms behind these tools and the mathematical concepts that make these tools useful.

The Master of Science program in data science, analytics and engineering with a concentration in computational mathematics and data provides you with an advanced education in high-demand data science and computational mathematical modeling. The program brings you a focus on computational skills in optimization, machine learning, stochastic processes and dynamical systems that is enhanced by mathematical modeling in all application areas that use large-scale data, including social sciences, astronomy, neuroscience, biosciences, engineering and epidemiology.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

FSE 570 Data Science Capstone (3) or MAT 599 Thesis (6)

Additional Curriculum Information
Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for the required core or concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills (indicated in the professional resume)
• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)
• undergraduate upper-division linear algebra (e.g., MAT 343 Applied Linear Algebra)

In addition, applicants who do not have an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

• AWS-certified cloud practitioner
• Google data analytics certificate
• Google IT support certificate

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Applied mathematicians with a background in data science can pursue opportunities in a variety of fields to model, analyze and control dynamical processes that generate large data sets. These professionals are needed in the energy and power systems sector and in pharmaceutical, semiconductor and communications industries, among others. Graduates also may work in government laboratories, such as those in the Centers for Disease Control and Prevention, the National Institutes of Health, and the National Oceanic and Atmospheric Administration.

Data Science, Analytics and Engineering (Computing and Decision Analytics), MS (ESDSECDAMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Data scientist is consistently ranked among the top jobs in the U.S., and there is an increasing need for all engineers to make use of data science tools such as statistics, machine learning, artificial neural networks and artificial intelligence. Yet the majority of engineering occupations require subject matter expertise beyond data science.

The computing and decision analytics concentration in the Master of Science program in data science, analytics and engineering provides you with an advanced education in high-demand data science, as well as computing and industrial engineering. A focus on probability and statistics, machine learning, data mining and data engineering is complemented by computing and industrial engineering-specific courses to ensure you have a breadth and depth across data science and these engineering disciplines.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (12 credit hours)
Students complete one course in each of the following areas:
data analysis (3)
data assurance and security (3)
machine learning (3)
optimization (3)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)
CSE, IEE or SER 599 Thesis (6)
FSE 570 Data Science Capstone (3)

Additional Curriculum Information
Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for the required core or concentration may not be used as elective coursework for the same plan of study. Students should consult with their academic advisor to ensure that the total number of credit hours in their plan of study equals 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Before applying to the MS program, students are required to have completed three semesters or nine credit hours of Calculus I, II and III, and it is recommended that students complete a discrete mathematics course.

Students assigned any additional admission requirements upon admission must complete those courses with a grade of "B" (scale is 4.00 = "A") or higher within two semesters of entering the program. Additional admission requirements courses include:

• CSE 310 Data Structures and Algorithms
• IEE 380 Probability and Statistics for Engineering Problem Solving
• MAT 242 Elementary Linear Algebra

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Computing and industrial engineers with a background in data science can pursue opportunities in a variety of fields to manage and analyze data, and extract knowledge from large data sets for decision-making, including in the following industries:

consulting
data and analytics management
data engineering
information systems
manufacturing

Data Science, Analytics and Engineering (Electrical Engineering), MS (ESDSEEEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

Data scientist is consistently ranked among the top jobs in the U.S., and there's an increasing need for all engineers to make use of data science tools such as statistics, machine learning, artificial neural networks and artificial intelligence. However, the majority of engineering occupations require subject matter expertise beyond data science.

The Master of Science program in data science, analytics and engineering with a concentration in electrical engineering provides you with an advanced education in high-demand data science and electrical engineering. A focus on probability and statistics, machine learning, data mining and data engineering is complemented by electrical engineering-specific courses to ensure you have breadth and depth in data science and electrical engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (FSE 570)

Required Core (9 credit hours)
Students choose one from the following:
DSE 501 Statistics for Data Analysts (3)
EEE 554 Probability and Random Processes (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
STP 501 Theory of Statistics I: Distribution Theory 3 (3)

Students choose one from the following:
CSE 511 Data Processing at Scale (3)
CSE 512 Distributed Database Systems (3)
IFT 530 Advanced Database Management Systems (3)

Students choose one from the following:
CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)
Students choose three courses of the following:
EEE 506 Digital Spectral Analysis (3)
EEE 508 Digital Image and Video Processing and Compression (3)
EEE 509 DSP Algorithms and Software (3)
EEE 510 Multimedia Signal Processing (3)
EEE 511 Artificial Neural Computation (3)
EEE 515 Machine Vision and Pattern Recognition (3)
EEE 516 Physics-Based Computer Vision (3)
EEE 551 Information Theory (3)
EEE 554 Probability and Random Processes (3)
EEE 556 Detection and Estimation Theory (3)
EEE 559 Wireless Networks (3)
EEE 560 Mathematical Foundations of Machine Learning (3)
EEE 585 Security and Privacy in Networked Systems (3)
EEE 598 Deep Learning: Foundations and Applications (3)
EEE 598 Optimization for Engineers (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
EEE 599 Thesis (6)
FSE 570 Data Science Capstone (3)

Additional Curriculum Information
Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for required core or concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency by scoring at least 4 on the Internet-based TOEFL iBT® or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• familiarity with MATLAB, Python, SQL, R, or other relevant programming skills (in the professional resume)
• undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

• AWS-certified cloud practitioner
• Google data analytics certificate
• Google IT support certificate

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Electrical engineers with a background in data science can pursue opportunities in a variety of fields to manage, analyze and extract data from large data sets, including in the following industries:

circuit design
energy and power systems

semiconductor fabrication
signal processing
telecommunications

Data Science, Analytics and Engineering (Human Centered Applications), MS (ESDSEHCAMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

There is an increasing need for all engineers to make use of data science tools such as statistics, machine learning, artificial neural networks and AI. Yet, the majority of engineering occupations require subject matter expertise beyond data science.

In the Master of Science program in data science, analytics and engineering with a concentration in human-centered applications, you receive an advanced education in high-demand data science and gain an understanding of human systems. A focus on probability and statistics, machine learning, data mining and data engineering is complemented by courses that focus on human capabilities and understanding human bias to ensure increased breadth and depth in data science applications. You learn how to address problems such as biases in machine learning that are due to select input data and how to determine useful human feedback for interactive machine learning. The program also covers ethical issues in machine learning applications, and the use of AI to support human weaknesses without hindering human strengths. In interdisciplinary courses, you can work with colleagues on client-driven data science problems, developing solutions that address human needs and capabilities.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Human Systems Engineering, BS

Information Technology, BS

Human Systems Engineering (User Experience), BS

Data Science, BS

Information Technology (Networking), BS

Information Technology (Cybersecurity), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (FSE 570)

Required Core (9 credit hours)
Students choose one:
DSE 501 Statistics for Data Analysts (3)
EEE 554 Probability and Random Processes (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
STP 501 Theory of Statistics I: Distribution Theory 3 (3)

Students choose one:
CSE 511 Data Processing at Scale (3)
CSE 512 Distributed Database Systems (3)
IFT 530 Advanced Database Management Systems (3)

Students choose one:
CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
FSE 570 Data Science Capstone (3)
HSE 599 Thesis (6)

Additional Curriculum Information
For concentration coursework, students select three courses for a total of nine credit hours.

Courses selected for the required core or concentration may not be used as elective coursework on the same plan of study. Students should consult with their academic advisor to ensure that the total number of credit hours in their plan of study equals 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills (in the professional resume)
• undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

• AWS-certified cloud practitioner
• Google IT support certificate
• Google data analytics certificate

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Data scientist is consistently listed among the top jobs in the U.S. Human-centered engineers with a background in data science can pursue opportunities in a variety of industries to manage and analyze data and extract knowledge from large data sets for decision-making. Career opportunities include:

clinical data manager
computer and information research scientist
human factors engineer and ergonomist
statistician

Data Science, Analytics and Engineering (Mechanical and Aerospace Engineering), MS (ESDSEMAEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

There's an increasing need for all engineers to make use of data science tools such as statistics, machine learning, artificial neural networks and artificial intelligence. Yet the majority of engineering occupations require subject matter expertise beyond data science. For mechanical and aerospace engineering, the need for data science, including machine learning, is felt in all subdisciplines, including controls, energy systems, aeronautics, astronautics and mechanics.

The mechanical and aerospace engineering concentration in the Master of Science program in data science, analytics

and engineering provides you with an advanced education that combines high-demand data science and mechanical and aerospace engineering. The program offers you a focus on probability and statistics, machine learning and data engineering that is complemented by mechanical and aerospace engineering-specific courses to ensure breadth and depth in both data science and mechanical and aerospace engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (MAE 593), or
30 credit hours including the required capstone course (FSE 570)

Required Core (9 credit hours)
Students choose one:
DSE 501 Statistics for Data Analysts (3)
EEE 554 Probability and Random Processes (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
STP 501 Theory of Statistics I: Distribution Theory 3 (3)

Students choose one:

CSE 512 Distributed Database Systems (3)
IFT 530 Advanced Database Management Systems (3)

Students choose one:
CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
FSE 570 Data Capstone (3)
MAE 593 Applied Project (3)
MAE 599 Thesis (6)

Additional Curriculum Information
Concentration and elective coursework should be selected in consultation with the program advisor. Coursework selected for the required core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours in their plan of study equals 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirement of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in mechanical engineering, aerospace engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills (in the professional resume)
• undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving; STP 420 Introductory Applied Statistics; STP 421 Probability; EEE 350 Random Signal Analysis)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

• AWS certified cloud practitioner
• Google data analytics certificate
• Google IT support certificate

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

30 credit hours including the required capstone course (FSE 570)

Required Core (9 credit hours)
Students choose one:
DSE 501 Statistics for Data Analysts (3)
EEE 554 Probability and Random Processes (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
STP 501 Theory of Statistics I: Distribution Theory 3 (3)

Students choose one:
CSE 511 Data Processing at Scale (3)
CSE 512 Distributed Database Systems (3)
IFT 530 Advanced Database Management Systems (3)

Students choose one:
CSE 572 Data Mining (3) or DSE 572 Data Mining (3)
CSE 575 Statistical Machine Learning (3)
EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 or 12 credit hours)
CEE 501 Artificial Intelligence for Civil Engineers (3)
two or three additional courses from an approved list

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)
CEE/CON/EVE 599 Thesis (6)
FSE 570 Data Science Capstone (3)

Additional Curriculum Information
Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for the required core or concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours in their plan of study is equal to 30.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS or 105 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

• undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)
• undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
• familiarity with MATLAB, Python, SQL, or R, or other relevant programming skills (in the professional resume)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in their professional resume) of at least one of the following certifications or equivalent experience:

• AWS certified cloud practitioner
• Google data analytics certificate
• Google IT support certificate

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Civil, environmental, sustainable or construction management engineers with a background in data science can pursue opportunities in a variety of fields. They manage and analyze data and extract knowledge from large data sets for decision-making in industries that include:

building
construction
environmental remediation
transportation
water treatment

Data Science, Analytics and Engineering, PHD (ESDSEPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in data science, analytics and engineering engages you in fundamental and applied research.

The program's educational objective is to develop your ability to conduct original research in the design and application of data-driven methods to address major societal problems. This includes the ability to identify research needs, adapt existing methods and create new methods as needed --- accomplished through a rigorous education that integrates research and learning experiences.

You complete a foundational core that covers database management, information assurance, statistical learning and

statistical theory before focusing on your choice of data analytics or data engineering. The program culminates in the production of a dissertation.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (12 credit hours)
CSE 511 Data Processing at Scale (3)
CSE 543 Information Assurance and Security (3)
CSE 572 Data Mining (3) or EEE 549 Statistical Machine Learning: From Theory to Practice (3) or IEE 520 Statistical Learning for Data Mining (3)
EEE 554 Probability and Random Processes (3) or IEE 670 Mathematical Statistics (3) or STP 502 Theory of Statistics II: Inference (3)

Electives and Additional Research (39 credit hours)

Research (12 credit hours)
DSE 792 Research (12)

Other Requirements (9 credit hours)
data engineering coursework or
data analytics coursework

Culminating Experience (12 credit hours)
DSE 799 Dissertation (12)

Additional Curriculum Information
All students must take qualifying exams covering the required core courses within one year of entering the program.

The dissertation prospectus should be submitted and its oral defense completed no later than one year following completion of the 60th credit hour and also no later than the fourth year in the program.

Students must select coursework from either the data engineering or the data analytics requirements. Students should see the academic unit for the approved course list.

Students cannot use a data engineering or data analytics course to meet an elective requirement at the same time; they must take a different elective course to reach the number of credit hours required for the program. Other coursework may be used with the approval of the academic unit to fulfill these requirements.

Twelve credit hours of DSE 792 Research are required, and up to 24 credit hours are allowed on the plan of study. Students with more than 12 research credit hours will apply the excess credit hours to their electives and additional research.

Electives include:

• additional DSE 792 Research credit hours (up to 12 credit hours allowed beyond the required 12)
• approved elective courses, of which up to three credit hours of DSE 790: Reading and Conference are permitted, with approval

When approved by the student's supervisory committee and the Graduate College, 30 credit hours from a previously awarded master's degree can be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework are to be made up of electives to reach the required 84 credit hours.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, computer science, mathematics, statistics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• two letters of recommendation
• letter of intent or written statement
• GRE scores
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at at testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before they apply to the program, students must have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. It is also recommended that students complete a discrete math course before admission.

ASU does not accept the GRE® General Test at home edition.

Students assigned any additional courses upon admission must complete them with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of entering the program. Additional admission requirements courses include:

CSE 310 Data Structures and Algorithms
IEE 380 Probability and Statistics for Engineering Problem Solving
MAT 242 Elementary Linear Algebra or MAT 342 Linear Algebra or MAT 343 Applied Linear Algebra
MAT 267 Calculus for Engineers III

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the tools and methods from industrial statistics, operations research, machine learning, computer science and computer engineering on solving data analytic problems.
Manage large, heterogeneous data sets for knowledge discovery.
Conduct research resulting in an original contribution to knowledge in data sciences.

Career opportunities

Graduates demonstrate proficiency with existing methodology and significant achievement in advancing the state of the art in their chosen area, preparing them for careers in the following fields:

advanced research
business
government
industry
teaching

Electrical Engineering (Media Arts and Sciences), MS (ESAMEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

This concentration in media arts and sciences in the Master of Science program in electrical engineering is a collaboration between the School of Electrical, Computer and Energy Engineering and the Herberger Institute for Design and the Arts. You take two-thirds of your course, research and thesis credits from the electrical engineering program, and one-third from the media arts and sciences program.

As an electrical engineering student in the media arts and sciences concentration, you undergo training toward integrating principles of digital signal processing, pattern recognition, computer vision and multimedia computing with transdisciplinary objectives, with the goal of enabling new paradigms of human-machine experience that directly address societal needs and facilitate knowledge. Examples include media-based intelligent systems for health care and well-being, and promotion of environmentally sustainable practices.

For more information on current research projects and initiatives, you should see the school's research page (https://thegameschool.asu.edu/research).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Electrical Engineering (Electric Power and Energy Systems), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis

This program requires 30 credit hours of coursework.

Thesis students complete eight courses for the program, typically five from EEE and three from AME. In addition, six credit hours of thesis are required, typically four credit hours from EEE and two from AME.

Portfolio students complete 10 courses for the program, typically six from EEE and four from AME.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Students from ABET-accredited undergraduate programs who wish to be considered for a master's degree program must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last two years of undergraduate coursework. Students from undergraduate programs that are not accredited by ABET must have a minimum GPA of 3.50 (scale is 4.00 = "A") in the last two years of undergraduate coursework or have graduated first class with distinction.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International applicants seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at least 26 on the speaking portion of the internet-based TOEFL or 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

Applicants should submit materials that reflect the hybrid nature of the arts and engineering degree, including a statement of purpose and curriculum vitae demonstrating interest and relevant experience in the area. Applicants have the opportunity to upload their curriculum vitae and statement of purpose when completing the online application. Additionally, the media arts and sciences program requires three letters of recommendation from individuals familiar with the applicant's ability to succeed in a transdisciplinary research environment.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are able to apply new ideas, theories and systems related to the intersection of media arts and electrical engineering. The transdisciplinary nature of this program enables media arts and sciences graduates to connect electrical engineering signals and systems constructs to multimedia computing, digital communication, immersive augmented reality and virtual reality experiences, and data visualization.

Career examples include:

- augmented and virtual reality researcher
- computer systems engineer
- electrical engineering professor
- systems software engineer

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

The program requires the following:
• a comprehensive examination
• the dissertation defense
• a qualifying examination
• 10 courses, typically seven from EEE and three from AME
• 12 credit hours of dissertation, typically eight credits from EEE and four from AME
• 12 credit hours of research, typically eight credits from EEE and four from AME

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants with a master's degree who wish to be considered for the doctoral program must have a minimum GPA of 3.50 (scale is 4.00 = "A") in their master's degree program. Applicants without a master's degree must have a minimum GPA of 3.60 (scale is 4.00 = "A") in the last two years of undergraduate coursework and have graduated from an ABET-accredited undergraduate program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Electrical Engineering, MS (ESEEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

All students seeking a master's degree in electrical engineering must apply to the MSE in electrical engineering program.

Program description

This program doesn't accept Master of Science applications directly. If you are interested in the MS program, you should apply to the Master of Science in Engineering program and, once admitted, consult with the MSE program advisors.

The electrical engineering faculty in the Ira A. Fulton Schools of Engineering offer you a research program leading to the MS degree in electrical engineering.

Graduate courses and programs are offered to you in the following areas of specialization:

• control systems
• electric power and energy systems
• electromagnetics, antennas and microwave circuits
• electronic and mixed-signal circuit design
• physical electronics and photonics
• signal processing and communications

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Electrical Engineering (Electric Power and Energy Systems), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis

The credits earned toward this research degree must include a minimum of eight courses (24 credit hours minimum) and six credit hours of EEE 599 Thesis. At least two of the eight courses should be outside the area of specialization.

Requirements include:
at least four EEE courses
at least two courses outside the area of specialization
at most two 400-level courses
at least three EEE 500-level courses
at most one EEE 590 Reading and Conference or FSE course
exam

A final oral examination in defense of the thesis completes the master's degree requirements.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee

• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students who wish to pursue the MS in electrical engineering must initially apply to the MSE program in electrical engineering. Students who later obtain a research advisor may transfer to the MS program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates have an advanced understanding of electrical engineering concepts and theories. They are able to develop and contribute to these concepts and theories and apply them to their specialization.

Career examples include:

- computer hardware engineer
- computer and information research scientist
- computer network architect
- director of engineering
- electrical engineer
- electrical engineering researcher
- energy engineer

Electrical Engineering Program | GWC 209
https://ecee.engineering.asu.edu/
askee@asu.edu
480-965-3424

Electrical Engineering, MSE (ESEEMSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

The electrical engineering faculty in the Ira A. Fulton Schools of Engineering offer a professional program leading to the Master of Science in Engineering degree in electrical engineering.

Graduate courses and programs are offered in six areas of specialization:

• control systems (not an option for the online program but available to on-campus students)
• electric power and energy systems
• electromagnetics, antennas and microwave circuits
• electronic and mixed-signal circuit design
• physical electronics and photonics
• signal processing and communications

A concurrent degree, the MBA/MSE in electrical engineering, is available as an online option. For more information,

students should visit the W. P. Carey School of Business page on concurrent degrees (https://wpcarey.asu.edu/mba-programs/online/concurrent-degrees).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

W. P. Carey MBA - Online Program

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Electrical Engineering (Electric Power and Energy Systems), BSE

Earth and Space Exploration (Exploration Systems Design), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio

This is a professional degree program that requires a minimum of 30 credit hours of coursework (a minimum of 10 classes) and a portfolio based on attendance and review of seminars hosted by the School of Electrical, Computer and Energy Engineering.

Requirements include:

at least five EEE courses
at least three EEE 500-level courses
at least two courses outside the area of specialization
at most one EEE 590 Reading and Conference or FSE course
at most two 400-level courses

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

The decision to admit a student who has earned a bachelor's degree from a program accredited by ABET to a master's degree program in electrical engineering is based on a number of factors. A minimum requirement is an undergraduate GPA of 3.00 (scale is 4.00 = "A") in the student's last two years of undergraduate work.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who are seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at least 26 on the speaking portion of the TOEFL iBT® (taken in a testing center) or 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

Admission to electrical engineering graduate programs is highly competitive. Preferred applicants have an undergraduate degree in electrical engineering.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering-electrical-engineering/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply fundamental concepts of electrical engineering, specifically in the areas of analog circuits and mixed signal design.
Demonstrate critical thinking and problem-solving skills in the design and analysis of digital systems.
Effectively communicate technical information

Career opportunities

Graduates of the MSE program in electrical engineering have an advanced understanding of electrical engineering concepts and theories.

Career examples include:

computer hardware engineer
computer and information research scientist
computer network architect
director of engineering
electrical engineer
energy engineer

Electrical Engineering, PHD (ESEEPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in electrical engineering prepares you to make contributions to the field of electrical engineering. The program focuses on research, enabling you to develop a personalized area of expertise.

Graduate courses and programs are offered in the following six areas of specialization:

• control systems
• electric power and energy systems
• electromagnetics, antennas and microwave circuits
• electronic and mixed-signal circuit design
• physical electronics and photonics
• signal processing and communications

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Doctoral students are required to complete 84 credit hours of academic credit beyond the bachelor's degree. The following summarizes the degree course requirements:

Master's degree (30 credit hours)
From any accredited institution

Electives 500 level or above (18 credit hours)
At least nine credit hours of EEE courses

Research Class or Omnibus Courses (12 credit hours)
Can be 400-level and above or
EEE 792 Research (12)

Dissertation (12 credit hours)
EEE 799 Dissertation (12)

Additional Curriculum Information
The 84 credit hours include 30 credit hours from the master's degree, a required 18 credit hours of doctoral coursework, 12 credit hours of research (EEE 792) and 12 credit hours (and only 12 credit hours) of dissertation (EEE 799).

The additional 12 credit hours can be more hours of research (EEE 792) or can be coursework as determined by the supervisory committee. At least nine of the minimum 18 required credit hours of doctoral coursework must be in electrical engineering. EEE 790 Reading and Conference can be used for no more than three credit hours toward the required 18 but does not count toward the nine hours of 500-level EEE classes required.

All courses counting toward the required 18 credit hour minimum must be at the 500 level or higher. (Note: All courses with the prefix EEE 591 count as 400-level courses.) No more than one three-hour reading and conference course (EEE 790) may be taken as part of the 18 credit hour requirement. The content of any proposed reading and conference course must be reviewed and approved by the electrical engineering graduate program chair before a student registers for the course.

A qualifying examination, a comprehensive exam and the dissertation defense are required. Additional information on the program can be found in the Blue Student Guide published and available on the program's website.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

In general, a student must have a minimum GPA of 3.00 (scale is 4.00 = "A") in all undergraduate coursework and a minimum GPA of 3.50 (scale is 4.00 = "A") in all graduate coursework for admission to the doctoral program. A student usually must hold a master's degree before being admitted to the doctoral program. Direct doctoral admission is available for students graduating from an ABET-accredited electrical engineering program with a GPA of 3.60 (scale is 4.00 = "A") or higher.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at

least 26 on the speaking portion of the internet-based TOEFL or a score of 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

A student whose master's degree is not from a U.S. ABET-accredited institution must score 156 or higher on the quantitative section of the GRE General Test. A good score on the writing portion is considered desirable.

ASU does not accept the GRE® General Test at home edition.

A student whose undergraduate degree is not in electrical engineering may need to take appropriate undergraduate courses to establish a baseline of knowledge in the discipline.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates demonstrate an advanced understanding of electrical engineering and apply that knowledge to advance in their careers, in both academia and industry.

Career examples include:

- computer hardware engineer
- computer and information research scientist
- computer network architect
- director of engineering
- electrical engineer
- electrical engineering researcher
- energy engineer

Engineering Education Systems and Design, PHD (ESEESDPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Doctor of Philosophy program in engineering education systems and design, you prepare to conduct engineering education research related to your scholarly interests using a systems and design approach.

You have a passion for developing skills as an engineering education researcher and are committed to contributing to the engineering education community. Your learning is driven by engagement with faculty and peers through coursework, research and programmatic events.

You may enter the program with a bachelor's or master's degree in an engineering or related discipline. Areas of research may include workforce adaptability, culturally responsive education, education policy, accessibility,

broadening participation in engineering, engineering classroom practices, studies of marginalized groups, student persistence, graduate education, online education and empathy.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (21 credit hours)
EGR 535 Innovation and Design of Engineering Academic Settings (IDEAS) (3)
EGR 565 Qualitative Methods for Engineering Education Research (3)
EGR 572 Quantitative Methods for Engineering Education Research (3)
EGR 574 Engineering Education Systems in Context (3)
EGR 576 From Then Until Now: Examining Inequities in STEM (3)
EGR 671 Applications of Qualitative Methods for Engineering Education Research (3)
EGR 673 Applications of Quantitative Methods for Engineering Education Research (3)

Electives and Research (48 credit hours)
electives (36)
research (12)

Other Requirement (3 credit hours)
EGR 594 Topic: EESD Seminar (3)

Culminating Experience (12 credit hours)
EGR 799 Dissertation (12)

Additional Curriculum Information
Students may be allowed to apply up to 30 credit hours from a previously awarded master's degree to their doctoral program as approved by the academic unit and the Graduate College. If students do not have a master's degree, the remaining 30 credit hours must consist of at least 18 graduate-level credit hours in a particular engineering discipline and at most nine credit hours in support of the student's dissertation research area.

Students are allowed up to six credit hours of 400-level coursework on the student plan of study with appropriate faculty advisor and program chair approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in

engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• CV or resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch (https://globallaunch.asu.edu/learn-english) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Applicants can opt to note faculty members (the current endorsed list of faculty is available on the Polytechnic campus website (https://poly.engineering.asu.edu/engineering/phd/eesd-faculty/)) they've spoken to or are interested in working with if they matriculate at ASU.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Synthesize the engineering education ecosystem by examining its past and exploring its future through course projects.
Conduct engineering education research using quantitative methods.
Address the need for social justice, equity, diversity, and inclusion within engineering education initiatives.
Conduct engineering education research using qualitative methods.

Career opportunities

Graduates are equipped for competitive positions in top-tier research institutions as exemplary scholars and teachers or to serve as leaders in engineering education in a variety of settings, including:

education startups
government agencies

industry
policy-setting institutions
science centers and museums
think tanks
universities

Engineering Science (Software Engineering), MSE (ESSFEMSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

The Master of Science in Engineering program in engineering science with a software engineering concentration offers you specialized courses founded on the fundamentals and principles of software engineering. You gain the knowledge and skills needed to become a software engineer or software task leader on large and small projects that require either agile methodologies or formal capability maturity model integration approaches.

The program addresses major software development methodologies, techniques, tools and processes for developing and managing software projects. The curriculum is based on the Software Engineering Body of Knowledge under the leadership of the IEEE Computer Society. Each course emphasizes applied assignments and projects related to your workplace.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours and a portfolio, or
30 credit hours including the required applied project course (CSE 593)

Required Core (6 credit hours)
CSE 565 Software Verification, Validation and Testing (3)
CSE 566 Software Project, Process and Quality Management (3)

Concentration (3 credit hours)
CSE 591 Topic: Software Engineering Principles and Concepts (3)

Restricted Electives (18 or 21 credit hours)

Culminating Experience (0 or 3 credit hours)
CSE 593 Applied Project (3)
portfolio (0)

Additional Curriculum Information
For an approved list of restricted electives, students should see the academic unit.

Students select five or six elective courses: five for the applied project option or six for the portfolio option.

Two 400-level courses approved by a faculty member may also be selected for the restricted electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in computer engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") for the last 12 units of the postbaccalaureate transcript.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must provide evidence of demonstrated expertise in the area of object-oriented programming, advanced data structures, algorithm design and algorithm analysis; maturity in high-level programming; and successful completion of Calculus I (a minimum requirement).

Graduates of non-U.S. institutions must satisfy admission requirements established by the ASU Graduate College.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering-engineering-science-concentration-software/) for program descriptions and to request more information.

Career opportunities

Software engineers solve a wide variety of disciplinary and transdisciplinary problems and apply new technologies to improve quality of life. Graduates of this program are prepared for advanced study in computing and engineering, and to become leaders of software engineering development projects and teams. Graduates have experience using the software development life cycle and tools to solve complex practical problems.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in the number of employment opportunities. Some software engineering jobs may include:

> developing software to manage new regulatory requirements in industries such as health care, and administering existing policies digitally

identifying requirements and developing testing plans for computer systems being built into consumer electronics
leading software development teams and projects for organizations of various sizes and complexities

Engineering, DEng (ESEGRDENG)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

Even engineers with master's degrees can find that they don't have all the skills needed to advance to the next level. Future engineering leaders require research experience, in-depth technical knowledge, leadership, project management, communication, storytelling and other nontechnical skills to be truly effective.

The Doctor of Engineering program enables you to continue your education without leaving your current position by providing advanced, doctoral-level coursework and an innovative applied project experience. Required core classes in project management, leadership, statistical analysis and communication are complemented by focus area-specific courses, followed by an applied project of your choice to ensure both breadth and depth of knowledge in your chosen engineering discipline.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (IEE793)

Required Core (12 credit hours)
CON 532 Facilities Project Management (3) or
CON 545 Construction Project Management (3) or
IEE 558 Engineering Project Management (3)

IEE 541 Engineering Administration (3) or
OGL 550 Leading Organizational Change (3) or
OGL 552 Leading Diverse Teams (3)

IEE 520 Statistical Learning for Data Mining (3) or
IEE 572 Design Engineering Experiments (3) or
IEE 578 Regression Analysis (3) or
IEE 582 Response Surfaces/Process Opt (3)

COM 504 Theories and Models in Communication (3) or
COM 514 Communication and Gender (3) or
COM 515 Communication in the Workplace (3) or
COM 530 Training and Development (3)

Engineering Management Electives (21 credit hours)

Electives (15 credit hours)

Other Requirements (3 credit hours)
IEE 701 Applied Doctoral Project Initiation (3)

Culminating Experience (9 credit hours)
IEE 793 Applied Project (9)

Additional Curriculum Information
Electives must be selected from an approved list.

The applied project addresses advanced, complex and practical engineering management problems with design through the development of innovative solutions in consideration of public health, safety, sustainability and welfare, as well as global, cultural, social, environmental and economic factors. The project includes independent applied research with industry sponsorship and faculty committee mentorship culminating in a final project report and examination for the DEng degree.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in engineering, computing, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• one letter of recommendation
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

All applicants must upload their professional resume or curriculum vitae for full consideration. A resume should include a prior degree, work experience, career progression in leadership, conference presentations and past research. Applicants with only a bachelor's degree must have five years of work experience and career progression in leadership, while applicants with a master's degree must have two years of work experience and career progression in leadership. This experience should be demonstrated in the professional resume or curriculum vitae.

The letter of intent should include a purpose for completing the DEng program, basic qualifications, interest in ASU, academic journey and accomplishments, and professional career journey and accomplishments. Applicants should also describe their proposed idea for the applied project and indicate any faculty members with whom they would be

interested in working.

The letter of recommendation should be submitted by a supervisor, colleague or former academic professor sharing their understanding of the applicant's motivations and capabilities for completing a doctoral-level engineering degree. Supervisors should also state their support for the student during the student's doctoral program and applied project.

At the time of application, all applicants must have successfully completed a minimum of six credit hours of Calculus I and II with a grade of "C" or higher (scale is 4.00 = "A").

Additional coursework assigned at the time of admission, determined by the student's gap analysis, must be completed with a grade of "B" or higher (scale is 4.00 = "A") within two semesters of admission to the program. Courses include:

• CSE 110 Principles of Programming
• IEE 380 Probability and Statistics for Engineering Problem Solving
• MAT 242 Elementary Linear Algebra

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/doctor-engineering/) for program descriptions and to request more information.

Career opportunities

Engineering professionals with the technical and nontechnical skills developed through this program can pursue opportunities in a variety of fields to manage projects, lead engineering teams, develop new products and more. These skills can be applied to industries including:

consulting
information technologies
manufacturing
product development

Engineering, MEng (ESENGRMENG)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

You have the opportunity to gain valuable experience applicable to your chosen industry while gaining an advanced degree.

The Master of Engineering program is designed to meet your specific needs as a professional engineer and is delivered

entirely online. In this practice-oriented program, you can customize your learning experience by selecting a curriculum that addresses your academic and professional goals.

Multiple emphasis areas are available in the program. Within each area of study are specific course requirements, in addition to the general program requirements. You can select one of several areas of study available, including engineering management, quality, reliability and statistical engineering, and systems engineering. A computing and technology area of study has been developed to support ASU's global initiatives.

Convenience and flexibility are key advantages of this program. The MEng is a 30 credit hour program that doesn't require GRE results, a thesis or on-campus attendance; it's only available through distance learning. The program is supported through online courses available from the Ira A. Fulton Schools of Engineering.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a written comprehensive exam, or
30 credit hours and an oral comprehensive exam, or
30 credit hours including the required applied project course (CSE 593 or IEE 585 or IEE 593)

Students must complete 30 credit hours equaling 10 courses to earn a MEng. Half of all coursework, excluding the practice-oriented project, must be in engineering.

Students must complete three credit hours of applied engineering mathematics and three credit hours of engineering management or business.

A culminating event is required and is identified by the student's advisory committee. It could be a final written or oral examination, portfolio, or the final report of a practice-oriented project. Some academic units and emphasis areas of the MEng program may have additional requirements.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in the desired field of study from a regionally accredited institution.

Applicants must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from all institutions attended
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/) for program descriptions and to request more information.

Career opportunities

Engineers approach a wide variety of disciplinary and transdisciplinary opportunities by applying new approaches and technologies to solve problems, innovate and create value.

The interdisciplinary MEng program prepares engineering, science and technology majors with more advanced technical, management and practical skills that enhance their marketability to potential employers. The program is designed for people who are already employed in engineering or technical roles, or who are interested in expanding their skill set before entering a technical organization as a manager or individual contributor.

According to the Bureau of Labor Statistics, engineers are highly paid, and there is significant growth in the number of employment opportunities. Graduates of this program are able to fill these roles in the following career paths:

> Engineering managers hold leadership positions in the management of projects, processes and people, combining engineering competency with managerial skills to support the efficient development of new technology and products.
> Quality and reliability engineers use engineering principles to make business and production processes and products more efficient and dependable. They may also look for ways to seek efficiencies while maintaining reliable products and production methods.
> Systems engineers may become technical managers who develop the technical design of complex systems and manage them by building on their interdisciplinary expertise, systems engineering principles and practical experience.

Engineering, MS (TSEGRMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science program in engineering, you develop applied analytical expertise across disciplinary boundaries, with direct applications of advanced design principles to system design, management and control.

Your expertise, developed through the core curriculum, is reinforced with the flexibility of focus area options that include alternative energy, mechanical engineering and electrical engineering.

The culminating experience options are flexible, allowing you to tailor the program to your specific career goals while you become a problem-solver who can shape the future.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Engineering (Electrical Systems), BSE

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Engineering (Clean Energy Systems), BSE

Engineering (Mechanical Engineering Systems), BSE

Manufacturing Engineering, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (EGR 593)

Required Core (6 credit hours)
EGR 520 Engineering Analysis I (3)
EGR 530 Principles of Systems Engineering (3)

Focus Area (15 credit hours)

Electives (3, 6 or 9 credit hours)

Culminating Experience (0, 3 or 6 credit hours)
EGR 593 Applied Project (3) or
EGR 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Students should see the academic unit for a list of approved electives.

The elective credit hours required are dependent on the chosen culminating experience option. Completion of 30 credit hours of coursework is required for all culminating experience options.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree in engineering, physical sciences, mathematics or a similar field from an international institution that is officially recognized in that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, aptitude demonstrated through professional experience or additional postbaccalaureate education will be considered.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Engineers collaborate on interdisciplinary teams to design, manufacture and deliver innovative technological products and services. Program graduates have not only sophisticated engineering technical skills but also the important professional skills of communication, teamwork and collaboration, and the adaptability that many employers seek.

Graduates are prepared to work in large corporations, government agencies and small businesses, as well as to pursue a doctorate degree. Because of the emphasis on design and project-based learning, the program supports an entrepreneurial spirit, and some graduates start companies of their own.

Environmental Engineering, MS (ESEVEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

If you have a background in agricultural, biological, chemical, civil or natural sciences such as chemistry, ecology or geology related fields, the Master of Science program in environmental engineering is designed for you.

You gain advanced knowledge that can be applied when addressing grand challenges facing society, such as how to supply clean water and safe food, design a future without pollution, recover valuable resources from waste, and create healthy and smart cities.

As an environmental engineer, you study nanotechnology, biotechnology and sustainable engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil Engineering, BSE

Environmental Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (EVE 593)

COURSE-BASED OPTION

Required Core (12 credit hours)
CEE 561 Physical-chemical Treatment of Water (3)
CEE 562 Biological Wastewater Treatment (3)
CEE 563 Environmental Engineering Chemistry (3)
CEE 567 Environmental Health Microbiology (3)

Electives or Research (12 credit hours)

Other Requirements (6 credit hours)
CEE 560 Soil and Groundwater Remediation (3)
CEE 564 Contaminant Fate and Transport (3)
EVE 568 Environmental Risk Assessment (3)
EVE 571 Advanced Water Quality Modeling and Treatment (3)

OPTIONS WITH CULMINATING EXPERIENCE

Required Core (12 credit hours)
CEE 561 Physical-chemical Treatment of Water (3)
CEE 562 Biological Wastewater Treatment (3)
CEE 563 Environmental Engineering Chemistry (3)
CEE 567 Environmental Health Microbiology (3)

Electives or Research (6 or 9 credit hours)

Other Requirements (6 credit hours)
CEE 560 Soil and Groundwater Remediation (3)
CEE 564 Contaminant Fate and Transport (3)
EVE 568 Environmental Risk Assessment (3)
EVE 571 Advanced Water Quality Modeling and Treatment (3)

Culminating Experience (3 or 6 credit hours)
EVE 593 Applied Project (3) or
EVE 599 Thesis (6)

Additional Curriculum Information
The master's degree offers a course-based option that is recommended for students seeking a broader exposure to topics through coursework. Students seeking specialization and research experience would complete a thesis. Students wanting exposure to research methods, such as data collection, would complete an applied project.

Regardless of the culminating experience chosen, all students in the program complete six credit hours from the Other Requirements course list; courses on this list may be substituted with approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply if they have earned a bachelor's or master's degree in environmental engineering, chemical engineering, civil engineering, agricultural engineering, biological engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or higher on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

The student's credentials for admission are evaluated by the graduate program chair. A student whose undergraduate degree is not in environmental engineering or a related field is required to take appropriate undergraduate courses to establish a base of knowledge in the discipline. These additional courses required for admission to the graduate degree program are specified at the time of admission.

Applicants are strongly encouraged to submit a professional resume and personal statement.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with a master's degree in environmental engineering are employed in engineering consulting companies, private industry, local and federal government, and nongovernmental organizations.

Environmental Engineering, PHD (ESEVEPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in environmental engineering prepares you to conduct original, use-inspired research that advances the field and addresses society's most pressing environmental challenges. You work with leading faculty to develop specialized expertise in areas such as water and wastewater treatment, air quality management, pollution control and sustainable infrastructure.

Through advanced coursework and extensive research experience, you gain deep technical knowledge and proficiency in environmental chemistry, microbiology, data analytics and systems modeling. The program emphasizes innovation, interdisciplinary collaboration and the use of emerging technologies to design resilient, sustainable solutions that protect human and ecosystem health.

Upon graduation, you will be prepared for leadership roles in academia, industry, government and nongovernmental organizations, where you advance research and solutions of public value.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus, and a dissertation

Required Core (9 credit hours)
CEE 561 Physical-chemical Treatment of Water (3)
CEE 563 Environmental Engineering Chemistry (3)
CEE 567 Environmental Health Microbiology (3)

Other Requirements (6 credit hours)
EVE 591 Seminar (4)
EVE 780 Practicum (2)

Electives (30 credit hours)

Electives or Research (15 credit hours)

Culminating Experience (12 credit hours)
EVE 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to count as elective credit. If the master's degree has not been completed, a maximum of 12 credit hours of graduate work may be applied with program approval.

Students entering the program with a bachelor's degree are required to complete 30 credit hours of elective coursework. Graduate elective courses may be selected from any graduate courses in EVE and CEE, as well as from elective courses in related disciplines, subject to approval by the faculty advisor. EVE 790 can be used for elective credit, with a limit of 12 credit hours.

EVE 591 is a one-credit-hour course to be taken in four semesters.

EVE 780 is a one-credit-hour course to be taken over two semesters to develop knowledge, skills and teaching experience.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, natural and earth sciences, biological sciences and physical and chemical sciences or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

The personal statement should describe the applicant's academic background, research interests and career goals, with particular emphasis on how their interests align with environmental engineering and the faculty expertise within the program. Applicants should also explain their motivation for pursuing doctoral study, relevant research or professional experiences, and their readiness to engage in independent, interdisciplinary research on complex environmental challenges.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates pursue careers as researchers, faculty and technical leaders in:

academic institutions and research organizations
engineering consulting firms
local, state and federal government agencies
private industry and technology development

In these roles, graduates develop innovative solutions to complex environmental challenges and advance sustainable technologies with global impact.

Environmental and Resource Management (Water Management), MS (ESERMWTMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

If you have a background in the sciences, engineering, management, natural resources management, environmental health and safety or other affiliated areas, you gain the regulatory and technical background you need to mitigate the environmental impact of industrial sources of pollution, ensure compliance with environmental regulations, and

manage and preserve engineered and natural ecosystems through the Master of Science program in environmental and resource management.

The concentration in water management focuses on issues of water quality, supply, treatment, reclamation and conservation, as well as augmentation strategies. This program is especially appropriate if you work in municipal, state, federal and tribal water and environmental agencies; with water providers to urban and agricultural users; and in manufacturing and mining industries. It's also an excellent fit if you are interested in sustainable development in this country and around the world.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Environmental and Resource Management, BS

Environmental Science, BS

Environmental Studies, BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours and a written comprehensive exam, or
30 credit hours including the required applied project course (ERM 593)

Required Core (6 credit hours)
ERM 502 Regulatory Framework for Toxic and Hazardous Substances (3) or ERM 527 Environmental/Resources Regulations Concepts (3)
ERM 503 Principles of Toxicology (3) or ERM 506 Chemistry of Hazardous Materials (3)

Concentration (9 credit hours)
ERM 523 Soils and Groundwater Contamination (3)
ERM 533 Water and Wastewater Treatment Technologies (3)
ERM 535 Water Law and Policy (3)

Electives or Research (9, 12 or 15 credit hours)

Culminating Experience (0, 3 or 6 credit hours)
ERM 593 Applied Project (3)
ERM 599 Thesis (6)
portfolio (0)

written comprehensive exam (0)

Additional Curriculum Information
Students choose one of the culminating experiences listed above. Thesis students take nine credit hours of electives or research; applied project students take 12 credit hours of electives or research; and portfolio and written comprehensive exam students take 15 credit hours of electives or research.

Students should see the academic unit for the approved course list for electives or research. Other coursework may be used with the approval of the academic unit.

The thesis and applied project options require an oral defense.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country in engineering, physical sciences, mathematics or a similar field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative minimum GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply sustainable development practices and trends to water management systems
Apply legal principles and concepts as described in environmental laws and regulations in order to manage engineered, industrial and natural water systems
Apply management, scientific and technical solutions to address water management challenges and problems

Career opportunities

Graduates are employed by industrial operations such as manufacturing and mining industries; federal, state and local environmental and water agencies; environmental firms; utilities; international agencies such as the United Nations and the World Bank; and nongovernmental organizations.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Foundations of Computing, Certificate (ESFOCGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

This program is offered for Mandarin-speaking students in China. Instruction is offered entirely in Mandarin.

Program description

The foundations of computing microcertificate program offers you a rigorous curriculum that builds a strong= theoretical and practical understanding of the core principles that drive modern computing.

If you do not have a background in science, technology, engineering or mathematics, the program prepares you for= professional roles that require a solid understanding of computing. It also prepares you to apply to Ira A. Fulton= Schools of Engineering's computing-focused graduate degree programs.

You develop proficiency in key areas such as logic, proof strategies, combinatorics, algorithm analysis, discrete= structures (including sets, relations and trees), and the fundamentals of finite automata. You learn about foundations= of engineering mathematics, multivariable calculus, differential equations and optimization, probability and statistics as= well as programming paradigms.

In addition to theoretical foundations, the microcertificate program emphasizes hands-on experience in computer= programming. You engage with multiple programming paradigms and programming language design, and you gain the= skills necessary to design and implement robust, object-oriented and service-oriented software systems.

STEM-OPT extension eligible: No

Degree requirements

9 credit hours

Required Core (9 credit hours)
FSE 598 Topic: Emerging Computing Technologies (3)
FSE 598 Topic: Foundations of Engineering Mathematics (3)
FSE 598 Topic: Programming Languages and Paradigms (3)

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• professional resume
• proof of English proficiency

Additional Admission Information
Eligibility is strictly limited to Mandarin-speaking applicants from China. Applicants who hold a Benke Graduation Certificate or Zhuanke without a bachelor's degree equivalent are eligible to apply.

The professional resume should include all degrees earned and professional work experience.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

Career opportunities

Graduates of the foundations of computing microcertificate program have strengthened technical and analytical skills that are valuable in computing and related fields. This credential can open doors to roles that require computing fluency or prepare students for graduate study.

Potential career opportunities include:

business or systems analyst
project coordinator for tech or engineering projects
software support specialist or application specialist
STEM educator or trainer (with computing emphasis)
technical analyst or data analyst

This credential also boosts employability in non-STEM fields where digital literacy, problem-solving and programming skills are increasingly expected (e.g., finance, health care, consulting, government and education).

Graphic Information Technology, MS (ESGITMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The Master of Science program in graphic information technology is a course-based master's program that provides you with the opportunity to study various areas of graphics and cross-media design. Through the courses offered, you gain a working knowledge of the technology and management required in the diverse graphic industries. Possible course tracks include cross-media design, user experience and user interface, front-end web design and development, and the business of design.

You are prepared to become an industry leader who develops and manages content across numerous communication and distribution modes. You are empowered to think critically, creatively and collaboratively in an environment that promotes project-based learning. You practice building client- and audience-centered design solutions, address client and user needs, and focus on industry outcomes.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Applied Science (Internet and Web Development), BAS

Graphic Information Technology, BS

Graphic Information Technology (Full-Stack Web Development), BS

Applied Science (Graphic Information Technology), BAS

Graphic Information Technology (User Experience), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours - course-based master's

Required Core (6 credit hours)
GIT 537 Current Issues in Cross Media Production (3)
GIT 540 Cross-Media Design Solutions (3)

Electives (21 credit hours)

Other Requirement (3 credit hours)
GIT 500 Research Methods (3)

Additional Curriculum Information
Students should see their program advisor for a complete list of approved elective coursework. This course-based, professional graduate degree is structured to allow students an additional elective in place of a culminating experience, providing more hands-on, project-based learning aligned with professional outcomes.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's degree or master's degree from a regionally accredited institution in a related field such as graphic design, web design and development, photography, videography, motion graphics and visual effects, or user experience design.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• writing sample
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch at ASU (https://globallaunch.asu.edu/learn-english/asu-admission) offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/graphic-information-technology-ms/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze current cross-media research to determine appropriate standards for application to proposed solutions.
Build client- and audience-centered design solutions through the synthesis of best practices and research data.
Conduct industry-relevant research and communicate results effectively to diverse audiences.

Career opportunities

Creative and comfortable with complex digital technology, graduates are innovative problem-solvers. They are prepared for leading roles and management positions in the rapidly evolving and diverse graphic technology industries. Career opportunities include these positions:

art director
creative director
cross-media designer
digital asset manager
digital media artist
front-end designer or developer
motion graphics artist

Human Systems Engineering (Aviation Human Factors), MS (ESHSEAHFMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science program in human systems engineering with a concentration in aviation human factors, you acquire a deep understanding of the science of human performance and gain experience in the aerospace and aviation industries.

You participate in courses that focus on methods and tools in applied cognitive science, foundations of human systems engineering, uses of simulation, aviation physiology, and crew resource management, among other topics. You gain an

understanding of cognitive science and human systems concepts and tools, enabling you to effectively analyze, design and develop aerospace and aviation products, workspaces, operations and training programs.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (HSE 593)

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Concentration (6 credit hours)
AMT 533 Aviation Systems and Psychology (3)
AMT 565 Safety in Complex Systems (3)

Electives and Research (6 or 12 credit hours)

Culminating Experience (0 or 6 credit hours)
HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Regarding electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students who choose a portfolio for the culminating experience must complete 12 credit hours of electives and research coursework, while students who choose an applied project or thesis must complete six credit hours of electives and research coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in engineering, aeronautical management, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• curriculum vitae or professional resume
• professional statement
• research summary
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Global Launch at ASU (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

The letters of recommendation should be from college professors, employers (in a human factors or aviation-related field) or a combination of academic and professional references.

Applicants to this program generally have completed an undergraduate course in statistics.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Choose the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & run the analysis using SPSS.
Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
Conduct independent research to address problems in the space of aviation systems and human performance in those systems.

Career opportunities

Graduates of this program are prepared for management, research and training positions in aerospace and aircraft manufacturing, with airlines, in flight training environments and in government.

Human Systems Engineering (Health Systems), MS (ESHSEHSMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Health care is one of the biggest and fastest-growing parts of the U.S. economy. In 2023, it made up about 17.6% of the nation's total spending, and experts predict it could reach around 20% by 2033. As health costs rise, hospitals and clinics are under pressure to deliver better care more efficiently. To do this, they use new technologies to track treatment results, patient satisfaction, and how well systems and staff are working together. These efforts require a good understanding of how people and systems interact. That's where human systems engineering comes in --- it focuses on improving how people, tools and processes work together to make care safer and more effective.

The Master of Science program in human systems engineering with a concentration in health systems provides you with the technical expertise you need to lead efficient health care systems.

You learn to identify needs through system modeling, field research and analytics to improve existing systems. This concentration enables you to perform research and develop innovative approaches to transform health care from reactive to proactive systems, reflecting National Institutes of Health initiatives.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (HSE 593)

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Concentration (6 credit hours)
BMI 601 Fundamentals of Health Informatics (3)
BMI 605 Health Information Systems and Applications (3)
BMI 613 Workflow Analysis and Redesign in Health Systems Engineering (3)
BMI 615 Human Factors Engineering for Biomedical Applications (3)
BMI 616 Clinical Decision Support and Evidence-based Medicine (3)
BST 515 Applied Biostatistics in Medicine and Informatics (3)
BST 517 Advanced Biostatistics for Biomedical Research and Health Care (3)
HCA 503 Diversity in Aging (3)
HCD 502 Foundations of U.S. Health Systems and Design (3)

HCD 570 Process Engineering (3)
HCD 575 Health Care Transformation and Leadership (3)
HCI 550 Health Care Policy and Innovation (3)

Electives and Research (0 or 9 credit hours)

Other Requirements (3 credit hours)
HSE 525 Health and Human Systems Engineering (3)

Culminating Experience (0 or 6 credit hours)
HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
For concentration coursework, students select two courses from the list. For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students who choose a portfolio for the culminating experience must complete nine credit hours of electives and research coursework.

Other Requirements course HSE 525 is required for all students but in some situations may be substituted with academic unit approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, health, nutrition, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• curriculum vitae or professional resume
• professional statement
• research summary
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current

residency.

Global Launch at ASU (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS.
Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
Conduct independent research to address problems in the space of human performance in healthcare systems.

Career opportunities

Jobs in this human systems engineering are growing quickly. The Bureau of Labor Statistics expects industrial engineering jobs --- which include many human systems engineers --- to grow by 11% between 2024 and 2034, much faster than most other careers. This growth shows how important these skills are becoming in health care and beyond.

Human Systems Engineering (Intelligent Systems), MS (ESHSEISMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Intelligent technologies have grown rapidly over the last decade. These technologies are now seen within public sector areas, such as the military and space exploration; private sectors, such as medical manufacturing; and the education sector. The rise of learning engineering focuses on interactive e-learning environments and the use of learning technology within classrooms and training settings. The real change will be the way humans can interact with the new robotic and AI assistant technologies.

In the Master of Science program in human systems engineering with a concentration in intelligent systems, you gain a deep understanding of the science of human performance and experience as applied to the engineering of intelligent systems, robotics and autonomous systems.

Courses focus on methods and tools in applied cognitive science and foundations of human systems engineering, such as uses of simulation and robotics, among other topics.

You are prepared to facilitate the future of work --- when humans will work closely with technology in the military and in space exploration, education, manufacturing, medicine and agriculture.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Information Technology, BS

Engineering (Robotics), BSE

Information Technology (Networking), BS

Information Technology (Cybersecurity), BS

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (HSE 593)

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Concentration (9 credit hours)

Electives and Research (3 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)
HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students who choose a portfolio for the culminating experience must complete nine credit hours of electives and research coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, robotics engineering, mathematics or a related field from a regionally accredited institution. Students must have sufficient mathematics background for this concentration, including up to calculus III and linear algebra.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• curriculum vitae or professional resume
• professional statement
• research summary
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch at ASU (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

The letters of recommendation should be from college professors, employers (in a human factors- or intelligent systems-related field), or a combination of academic and professional references.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS to answer Intelligent Systems-based questions.
Apply the methods of human systems engineering create hypothesis or solve an applied problem related to Intelligent Systems.
Conduct independent research to address problems in the space of intelligent systems

Career opportunities

Graduates have gained skills in human interactions with robots, AI agents and autonomous systems. They are equipped to design interactions between humans and intelligent systems and decide what tasks to allocate to AI through their understanding of human capabilities and limitations. Through work on multidisciplinary teams of human and nonhuman agents that interact safely and effectively to ensure that human considerations are accounted for, graduates can make a positive impact on society and human well-being.

Human Systems Engineering (User Experience Research), MS (ESHSEUERMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Master of Science program in human systems engineering with a concentration in user experience research focuses on how to conduct human-centered and experimental research to produce products that are useful, usable, desirable and efficient, with functionality that's easy to learn and remember. In the program, you focus on the research, design and validation of system components that an end user interacts with, including software user interfaces, documentation, help systems, user support, aesthetics and communication.

You may complement your education with courses in graphic information technology, technical communication and entrepreneurship to strengthen your skills in information architecture, visual design and user interface prototyping. Additionally, hands-on user experience projects in these classes help you build portfolios necessary for entry-level positions.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Human Systems Engineering (User Experience), BS

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (HSE 593)

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Concentration (9 credit hours)
HSE 521 Methods and Tools in Human Systems Engineering (3)
HSE 525 Health and Human Systems Engineering (3)
TWC 511 Principles of Visual Communication (3)
TWC 514 Visualizing Data and Information (3)
TWC 544 User Experience (3)

Electives or Research (3 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)
HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students who choose a portfolio for the culminating experience must complete nine credit hours of electives or research coursework; students who choose an applied project or thesis must complete three credit hours of electives or research coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, user experience, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• curriculum vitae or professional resume
• professional statement
• research summary
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Admission Services.

The letters of recommendation should be from college professors, employers in a human factors-related field or a combination of academic and professional references.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS to answer User Experience Research based questions.
Apply the methods of human systems engineering create hypothesis or solve an applied problem related to User Experience Research.
Conduct an independent evaluation to address problems in the space of human performance in User Experience Research.

Career opportunities

Program graduates are prepared for industry and government careers in positions such as:

game designer
human factors engineer
human systems integrator
information systems designer
interface designer
military scientist
usability engineer
user experience designer

Graduates have found employment in user experience design and user experience research at companies such as Apple, Hulu, Slack, HP, GoDaddy and Intel.

Human Systems Engineering, MS (ECAPSYCHMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science program in human systems engineering, you gain a deep understanding of the science of human performance and experience.

You learn to use methods and tools that enable you to apply this understanding as you design and problem-solve in a wide variety of domains, including product usability, learning design, sports performance, cybersecurity, human-robot teaming, and workplace and patient safety.

Many professions need experts in human factors to work on problems that involve an understanding of human performance. You gain practical experience through projects that examine contemporary issues, such as cell phones as a source of driver distraction, detection of improvised explosive devices, process optimization in health care, and control of unmanned vehicles.

Interest areas include user experience, aviation human factors, cognitive performance, consumer psychology, transportation human factors, patient safety, effective teamwork, human-robot teaming, health psychology, learning optimization, social cognition, threat detection and sports psychology.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Human Systems Engineering, BS

Human Systems Engineering (User Experience), BS

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (HSE 593)

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Electives and Research (12 or 18 credit hours)

Culminating Experience (0 or 6 credit hours)
HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
For the culminating experience, students have the option of completing a thesis (with industry guidance), an applied project to develop and demonstrate professional knowledge and skills, or a portfolio.

Students who select the thesis option work on the thesis, under faculty supervision, for at least one calendar year. The first three thesis credit hours are devoted to developing an idea and preparing a proposal for approval by a faculty committee. The next three credit hours involve preparing the details of research design and data collection for the thesis (materials, computer programs, experimental test beds, questionnaires, etc.). The final six credit hours are devoted to collecting and analyzing data, and writing and revising the thesis under the direction of the student's committee chair. Students defend the thesis in an oral examination.

If the student is engaged in a project initiated by industry, they may opt for the applied project. Students carry out the applied project, under faculty supervision and guided by industry, in a calendar year in which the 12 credit hours outside the core are allocated to a combination of research, applied project and report writing appropriate to the goals of the student and the industry partner. In all cases, the project culminates in a substantial written report followed by a comprehensive oral examination that covers the project and other materials from required courses.

The portfolio should demonstrate a high level of mastery of the principles and practice of human systems engineering through a compilation of work that the student has completed over the course of their graduate study. The specific details depend on the student's specialization, but all portfolios must describe three notable projects completed or academic accomplishments over the course of graduate study; the evolution and advancement of the student's technical expertise and mastery of the field of human systems engineering should be illustrated. Submitted with the portfolio is a written document comprising an overview of graduate experience and descriptions of the projects presented in the portfolio.

Applied project students take 12 elective credit hours, thesis students take nine elective credit hours plus three credit hours of HSE 592 Research, and portfolio students take 18 elective credit hours.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in psychology or a related field (including engineering, computer science or business) from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose describing professional and academic aspirations
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letters of recommendation should be from college professors, employers (in a human factors-related field) or a combination of academic and professional references.

Applicants to this program generally have completed an undergraduate course in statistics.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
Conduct independent research to address problems in the space of Human Systems Engineering.
Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & run the analysis using SPSS.

Career opportunities

Graduates are prepared for industry and government careers in positions such as:

game designer
human factors engineer
human systems integrator
information systems designer
interface designer
military scientist
usability engineer
user experience designer

Graduates may work as a member of a design team for a product or system.

Recent graduates are working at Intel, Boeing, GoDaddy, Mayo Clinic, PayPal, Motorola, Google and the Air Force Research Laboratory, among other employers. Others have gone on to pursue doctoral degrees at ASU and other prestigious institutions.

Human Systems Engineering, PHD (TSSMACSPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Human systems engineering is a growing transdisciplinary field that consists of the disciplines of psychological sciences and engineering. This field explores how people interact with technological and social systems in contexts that include transportation, medicine, military, computing and other complex systems. The Doctor of Philosophy program in human systems engineering is designed to ensure that you are well-grounded and skilled in the methods of human systems engineering.

The program broadly pulls from the areas of human factors and cognitive science. The human factors curriculum provides you with training in the foundation for the application of psychological and physiological principles to the engineering and design of products, processes and systems. The cognitive science curriculum provides you with the foundation necessary for integrating human capabilities and limitations into complex sociotechnical systems (i.e., the practice of cognitive engineering), and the application of cognitive science relies heavily on human systems engineering techniques.

A large domain exists in which the combination of human factors and applied cognitive science with a systems approach is imperative for the design of complex sociotechnical systems. Examples include:

• the design and evaluation of learning settings and technology (learning engineering)
• development of intelligent agents that work well with humans
• driving simulators for research on driver distraction
• dynamical systems models of team interaction
• gaming simulators for studying business decision-making
• human-in-the-loop simulation studies of cybersecurity analysis
• medical simulations for health care research
• models of cognitive states and processes of sociocultural systems
• nuclear control room simulations for improved human system integration
• pilot training research using aircraft simulators
• simulations of consumer behavior
• tests of future airspace control concepts using air traffic control simulators

You receive transdisciplinary, research-driven training in computing, engineering, technology, applied cognitive science and human systems integration.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (12 credit hours)
HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 521 Methods and Tools in Human Systems Engineering (3)
HSE 540 Foundations of Applied Cognitive Science (3)
HSE 542 Foundations of Human Systems Engineering (3)

Foundations (6 credit hours)

Methods and Tools (3 credit hours)

Applications (9 credit hours)

Electives (36 credit hours)

Research (6 credit hours)
HSE 792 Research (6) or additional electives as selected by the PhD committee

Culminating Experience (12 credit hours)
HSE 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework are made up of electives.

Electives are identified by the supervisory committee and approved by the HSE Executive Committee.

No more than six credit hours of 400-level coursework can be included on a graduate plan of study.

Students may petition the HSE Executive Committee to allow HSE-relevant or dissertation-relevant courses to be included as HSE elective courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's degree in psychology, engineering, cognitive science, computer science or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

• graduate admission application and application fee
• official transcripts from each college or university attended
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Global Launch at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, their application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Graduates with a PhD in human systems engineering will synthesizing research in human systems engineering into a literature review.
Graduates with a PhD in human systems engineering will be able to answer research questions using the methods and tools of human systems engineering area.
Graduates with a PhD in human systems engineering will be able to independently design an approach for addressing the questions, collecting, analyzing and interpreting data in the area of human systems engineering.

Career opportunities

Graduates have a solid grounding in cognitive science and are skilled in its methods and applications. Employers (e.g., Department of Defense, Federal Aviation Administration, Nuclear Regulatory Commission, hospitals) have an ever-increasing demand for personnel who can bridge the gap between rigorous science and creation of solutions to contemporary problems. Graduates are prepared for industry, academic and government careers in positions such as:

human factors engineer
human systems integrator
information systems designer
interface designer
military scientist
usability engineer
user experience designer

Graduates may work as a member of a design team for a product or system.

Industrial Engineering, MS (ESINDENMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Master of Science program in industrial engineering, you prepare to provide practical and economically efficient solutions to applicable, complex problems --- solutions that require a system-level approach. Examples include challenges that arise in health care delivery, food and energy systems, and strategic planning of manufacturing, logistics operations and service industries. Statistics, optimization, computer simulation and advanced analytics are some of the tools you use to address these problems.

The industrial engineering program is immersed in the innovative environment that permeates Arizona State University, and its faculty members are internationally recognized for their innovative research projects funded by both government and industry. This program, consistently ranked among the top 20 graduate programs in the U.S., is recognized for its high-impact, agile, interdisciplinary, results-oriented research.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

W. P. Carey MBA - Online Program

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Engineering Management, BSE

Industrial Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis

Required Core (9 credit hours)
IEE 545 Advanced Simulating Stochastic Systems (3) or IEE 561 Production Systems (3)
IEE 572 Design Engineering Experiments (3) or IEE 573 Reliability Engineering (3) or IEE 578 Regression Analysis (3)
IEE 574 Applied Deterministic Operations Research (3) or IEE 575 Applied Stochastic Operations Research Models (3)

Electives (15 or 21 credit hours)

Culminating Experience (0 or 6 credit hours)
IEE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
The MS in industrial engineering is a 30 credit hour program with a thesis track and a nonthesis track. The thesis track requires 24 credit hours of coursework, six credit hours of thesis, a written thesis and a final oral examination. The nonthesis track requires 30 credit hours of coursework and a portfolio. The thesis track includes 15 credit hours of electives, and the nonthesis track includes 21 credit hours of electives. Electives include IEE 500-level coursework and should be selected in consultation with the program advisor.

At the time of admission, students' applications are considered primarily for the nonthesis track. After enrolling at ASU, a student may consult with and receive approval from the industrial engineering faculty to pursue the thesis track.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from all institutions attended
• a statement of purpose
• proof of English language proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

At the time they apply, all applicants must have successfully completed a minimum of nine credit hours of calculus (Calculus I, II, III) with a grade of "C" (scale is 4.00 = "A") or higher.

A student with any additional assigned coursework must complete each course with a grade of "B" or higher (scale is 4.00 = "A") within two semesters of admission to the program. These courses include:

CSE 205 Object-oriented Programming and Data Structures

IEE 376 Operations Research Deterministic Techniques/Applications
IEE 380 Probability and Statistics for Engineering Problem Solving
IEE 470 Stochastic Operations Research

The applicant's undergraduate GPA and depth of preparation in engineering are the primary factors in admission consideration.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-industrial-engineering/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Conduct advanced modeling from the fields of operations research and management information systems through the use of analysis tools at the MS level
Apply key theories and methods used in the field of industrial engineering to develop solutions.
Integrate learning to deliver an organized description of an industrial engineering solution.

Career opportunities

Industrial engineers integrate people, processes, equipment, information and systems to do things better. Industrial engineering graduates develop, implement and improve processes, operations and systems in industries for manufacturing, services, communications, agriculture and many other fields.

Graduates of this program are well suited for careers in logistics, finance, defense, travel and health care.

Industrial Engineering, PHD (ESINDENPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in industrial engineering engages you in fundamental and applied research. The overall educational objective of graduate study in industrial engineering is to improve your ability to identify, define and solve problems and perform original research in order to address the underlying causes of those problems. You develop qualitative and quantitative abilities to guide the design and operation of sustainable organizations and systems.

You are provided with rigorous educational and research experiences. You have many opportunities to participate in highly impactful research projects and interact with the leaders in the subfield in which you choose to specialize. You

may have the opportunity to be involved in applied research projects supported by government or private funding.

The industrial engineering program at ASU is consistently ranked among the top 20 graduate programs in the United States. The program's faculty members are internationally recognized for their innovative research projects funded by government and industry. Many students graduate with significant accomplishments resulting from the work they performed during the course of their doctoral study.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

85 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (15 credit hours)
IEE 605 Foundations of Information Systems Engineering (3)
IEE 620 Optimization I (3)
IEE 622 Optimization II (3)
IEE 640 Probability and Stochastic Processes (3)
IEE 670 Mathematical Statistics (3)

Electives (42 credit hours)

Research and Internship Required Coursework (16 credit hours)
IEE 594 Conference and Workshop (1)
IEE 700 Research Methods (1)
IEE 784 Teaching Internship (1)
IEE 790 Reading and Conference (1) or IEE 584 Internship (1)
IEE 792 Research (12)

Culminating Experience (12 credit hours)
IEE 799 Dissertation (12)

Additional Curriculum Information
Students are required to complete five core courses within the first year of full-time enrollment in the doctoral program. To continue in the program after completing the core courses, the student must successfully pass a qualifying exam on three of the five core courses.

A written and an oral comprehensive examination are required no later than the semester following completion of 57 credit hours of coursework in the plan of study. The student must also successfully defend the dissertation prospectus and the dissertation research.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• a statement of purpose
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before January 21, 2026; 7 on the IELTS or 115 on the Duolingo English test, regardless of current residency.

GRE® scores are optional, and they do not need to submitted with the application. ASU does not accept the GRE® General Test at home edition.

At the time of application, all applicants must have successfully completed a minimum of nine credit hours of calculus (Calculus I, II, III) with a grade of "C" or higher (scale is 4.00 = "A").

Students assigned any additional admission requirements courses upon admission must complete those classes with a grade of "B" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Additional admission requirements courses include:

CSE 205 Object-oriented Programming and Data Structures
IEE 376 Operations Research Deterministic Techniques/Applications
IEE 380 Probability and Statistics for Engineering Problem Solving
IEE 470 Stochastic Operations Research

The applicant's undergraduate and graduate (if applicable) GPA and depth of preparation in engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Produce novel scholarly research that makes a unique contribution to the field of industrial engineering.
Develop advanced modeling to solve problems and issues in the field of industrial engineering.
Develop innovative methodology, algorithms and tools to solve a complex systems problem.

Career opportunities

Graduates are prepared for careers in academia, government and industry. In these fields, graduates are qualified to teach, conduct advanced research, and develop and make use of advanced techniques for the operation of their

businesses.

Information Technology, DIT (ESIFTDIT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Doctor of Information Technology program prepares you to be a innovative leader and improve your knowledge and skills in the technology innovations that are key to leading and influencing organizations. The program takes a multidisciplinary approach that leverages multiple courses for building competencies, enabling you to innovate reliable, effective and secure communications networks; design and implement secure systems for employees and customers; and leverage data models and architecture to support business decisions using data analytics.

You develop the engineering skills and professional competencies of collaboration, communication, agility and teamwork to advance your leadership career. You use leading technologies, including cloud computing, artificial intelligence, cybersecurity and data science.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

60 credit hours including the required applied project course (IFT 793)

Required Core (12 credit hours)
IFT 601 Applied Cybersecurity Systems Analysis (3)
IFT 602 Data Science Programming and Optimization (3)
IFT 603 Technology Strategic Leadership and Ethics (3)
IFT 604 Applied Research and Development Solutions (3)

Restricted Electives (15 credit hours)

Electives or Research (21 credit hours)

Other Requirements (3 credit hours)
IFT 701 Applied Doctoral Project Initiation (3)

Culminating Experience (9 credit hours)
IFT 793 Applied Project (9)

Additional Curriculum Information
Students should consult with advising for recommended 500- and 600-level electives.

When approved by the student's supervisory committee and the Graduate College, 15 credit hours from a previously awarded master's degree can be applied to this program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a master's degree in information technology, information sciences, cybersecurity, computer science, computer systems engineering, computer engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The resume should list education, work experience and community service. There are no minimum requirements for the resume; its purpose is to give the committee an opportunity to learn more about the candidate's interests.

Letters of recommendation should come from professors, managers or supervisors, or professional associates.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Program graduates have the skills necessary to pursue senior IT leadership positions in multiple industries and settings, such as corporations, governmental organizations, industrial research centers and businesses of all sizes.

They have acquired expertise in a wide variety of industry-specific areas, including:

cloud and distributed computing
computer systems design and architecture
data analytics and big data
database information management
information security

- natural language processing

Information Technology, MS (TSIFTMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

The Master of Science program in information technology is a transdisciplinary offering that prepares you to be an industry leader in the public and private sectors.

You gain the technical competencies you need to design and develop IT projects that interconnect people, process and technology to meet the needs of stakeholders and users.

The coursework emphasizes core technologies, and you select from two areas of focus: information technology security or information systems management.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/information-technology-ms/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Integrate theories and concepts of information technology in their master applied technology research and industry careers.
Build client-centered technology solution through the synthesis of best practices and transdisciplinary research.
Conduct industry relevant research and communicate results effectively to diverse audiences.

Career opportunities

Graduates of this program, which couples technical skills with the business knowledge needed to manage technical functions, are well qualified for careers in the management of IT departments. Some graduates pursue careers as technical support staff based on the focus area and secondary skills they gain. Graduates also have the ability to manage technical professionals within their focus areas.

Innovations in Medical and Patient Care Technologies, MS (ESIMPCTMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in innovations in medical and patient care technologies, or IMPACT, is designed to deepen your expertise as an engineer in the rapidly evolving field of health care innovation. This program focuses on the entire biodesign process, equipping you with the skills to develop needs-based solutions and successfully implement innovations into applicable practice. You gain a comprehensive understanding of how to navigate the complexities of medical technology development, from concept to execution, preparing you to drive impactful advancements in health care.

Coursework is primarily delivered in person, providing you with valuable clinical experience and direct interaction with Mayo Clinic's renowned clinical providers. Throughout the program, you develop the ability to identify critical health care needs, assess which challenges are most feasible to address, and invent and implement solutions, all while understanding the regulatory and business frameworks that govern product development. You also have the opportunity to engage with local industry experts, Mayo Clinic faculty and leading biodesign educators, gaining insights that bridge theory with practical application.

You complete a clinical immersion, which enables you to pursue a credit-bearing certificate in biomedical innovation through Mayo Clinic.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biomedical Engineering (Biological Devices), BSE

Biomedical Engineering (Biomedical Devices), BSE

Biomedical Engineering, BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (BME 543)

Required Core (17 credit hours)
BME 531 Biomedical Innovation I: Clinical Needs Assessment (3)
BME 532 Biomedical Innovation II: Product Design and Prototyping (3)
BME 533 Biomedical Innovation III: Product Development and Commercialization (3)
BME 541 Clinical Innovation I: Clinical Immersion Experience (4)
BME 542 Clinical Innovation II: Product Design Experience (4)

Other Requirements (3 credit hours)
BME 591 Seminar (3)

Electives (6 credit hours)

Culminating Experience (4 credit hours)
BME 543 Clinical Innovation III: Product Development Experience (4)

Additional Curriculum Information
Students complete 30 credit hours for this degree. They complete coursework leading up to the capstone culminating experience throughout the program in distinct phases: Clinical Innovation (Needs Assessment/Prototyping) and Biomedical Innovation (Product Development). During the Clinical Innovation II and III phases, the student works on their culminating experience, which involves prototyping, producing and implementing their product.

Students should see their academic advisor for a complete list of electives.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biodesign, biomedical engineering, engineering, medical technologies or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• personal statement
• professional resume
• short answer question
• two letters of recommendation
• official transcripts
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

For the personal statement (no more than two pages), applicants should explain their professional goals in pursuing a master's degree, what they will contribute to the program and potential design team members, and other information relevant to their application. Applicants should also describe their educational background and how it will contribute to their success in the IMPACT program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

The IMPACT program provides a strong foundation for further academic pursuits, such as doctoral degree programs, or leadership in any professional role that involves driving health care entrepreneurship and innovation. Participants are equipped with the skills to innovate in health care technology, from ideation to commercialization. Graduates are prepared to pursue careers in medical device design, entrepreneurship, health care consulting and more.

Career opportunities include:

biomedical product manager
clinical researcher
health care med-tech consultant
hospital C-suite executive
innovation officer
investor in med-tech startups
medical device engineer
regulatory affairs specialist
startup founder
venture associate

Graduates may be research and development scientists or engineers in the following areas:

- business development
- policy advisor for health innovation
- product development
- project management

Lean Six Sigma Black Belt, Certificate (ESLSSBGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

If you are an engineer or manager who oversees tactical and strategic projects as well as various operational functions= in your organization, the Lean Six Sigma Black Belt graduate certificate program is designed for you.

You learn a set of contemporary tools to produce measurable improvements in business processes and gain an in-depth understanding of the Six Sigma control process and the tools used to define, measure, analyze, and improve= effective process and product improvement. You develop the leadership and team-building skills necessary for= overseeing continuous improvement projects with many stakeholders, and you understand how lean principles and= design for Six Sigma fit into the overall task of product and process improvement.

The culminating experience is in line with the black belt certification requirements used nationwide in similar= certification programs.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours including the required capstone course (IEE 585)

Required Core (6 credit hours)
IEE 570 Advanced Quality Control (3)
IEE 581 Six Sigma Methodology (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)
IEE 585 Six Sigma Capstone (3)

Additional Curriculum Information
For electives, students should see the academic unit for the approved course list.

A minimum grade of "B" is required for capstone course IEE 585.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Required Prerequisite Courses:
CSE 110 Principles of Programming, or equivalent
IEE 380 Probability and Statistics for Engineering Problem Solving, or equivalent
MAT 267 Calculus for Engineers III, or equivalent

No more than 40% of coursework toward the requirements of a graduate certificate may be completed before admission to the certificate program.

This certificate is also available through the Pathways for the Future program (https://pff.asu.edu/).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/lean-six-sigma-black-belt-graduate-certificate/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply the appropriate analytical and statistical methods when managing Lean Six Sigma projects.
Apply the Lean Six Sigma methodology to the design and improvement of processes, products, and services.

Career opportunities

Six Sigma is a proven systematic approach to continuous improvement of critical processes in a wide variety of industrial environments such as banks, manufacturing facilities and hospitals. The American Society of Quality defines the certified Six Sigma Black Belt as a professional who can explain Six Sigma philosophies and principles, including supporting systems and tools.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Learning Engineering, Certificate (ESLEGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The graduate certificate program in learning engineering fuses knowledge from the science of learning and skills from a= variety of disciplines --- such as human-centered design, usability, evaluation and systems design --- to address= challenges that arise within training and educational organizations or systems. You are prepared to work in= interdisciplinary teams to solve problems. Through lectures, discussion and hands-on courses, you gain a grasp of= learning engineering methods and can apply them within professional settings.

In this certificate program, you are part of the Learning Engineering Research Network, which enables you to connect= with industry professionals and academic researchers within the field of learning engineering.

Disciplines connected to the learning engineering field include:

• computer science
• data analytics and evaluation
• design sciences
• learning sciences
• systems engineering

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (6 credit hours)
HSE 543 Foundations of Learning Engineering (3)
HSE 544 Learning Engineering Seminar (3)

Learning and Instruction (3 credit hours)

Research and Analysis (3 credit hours)

Systems and Design (3 credit hours)

Additional Curriculum Information

Students select one course from each curricular section: learning and instruction, research and analysis or systems and design. Students should consult their program advisor for a complete list of approved coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with training in learning engineering are able to effectively improve learning and training in a variety of roles, such as:

- data scientist
- educational technologist
- human factors specialist
- learning designer or instructional designer in higher education and K-12 ecosystems
- learning engineer
- workplace development specialist

Management of Technology, MS (ESMGMTCHMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic, Online

Program description

In the Master of Science program in management of technology, you gain a detailed understanding of the impact of technology in enterprise environments with your STEM background.

Through a curriculum that emphasizes innovation strategy, data-driven decision-making and an entrepreneurial mindset, you develop leadership and management skills to complement your technical expertise and compete in future economies. Flexible elective options enable you to pursue interests tailored to your professional and technology leadership goals and to gain new capabilities; by integrating disciplines, you learn to transform industries.

You choose classes in your areas of interest that mix hard and soft skills in critical areas of interdisciplinary data science; sustainable enterprises; social, entrepreneurial and disruptive innovation; enterprise logistics and operations; or advanced technologies such as smart manufacturing and engineering, artificial intelligence or blockchain technology industries.

The program helps you progress and broaden your STEM career in your respective industry.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Aeronautical Management Technology (Professional Flight), BS

Engineering (Electrical Systems), BSE

Technological Entrepreneurship and Management, BS

Biomedical Engineering (Biological Devices), BSE

Biomedical Engineering (Biomedical Devices), BSE

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Aeronautical Management Technology (Air Traffic Management), BS

Engineering (Clean Energy Systems), BSE

Aeronautical Management Technology (Air Transportation Management), BS

Aeronautical Management Technology (Unmanned Aerial Systems), BS

Biomedical Engineering, BSE

Engineering (Mechanical Engineering Systems), BSE

Global Management, BGM

Technological Leadership, BS

International Trade, BS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours including the required applied project course (TMC 593)

Required Core (15 credit hours)
FSE 501 Technology Entrepreneurship (3), OMT 598 Topic: Intrapreneurship in Industrial HR Management (3) or TEM 501 Technological Innovation and Entrepreneurship (3)
OMT 520 Strategic Management of Technology (3)
OMT 570 Advanced Project Management (3)
TEM 505 Data-driven Decision Making (3)
TEM 531 Disruptive Innovation and Technological Evolution (3)

Restricted Electives (3 or 6 credit hours)
OMT 504 Ethical Issues in Technology (3)
OMT 548 Statistical Methods for Research (3)
TEM 507 Venture Digital Data Analytics (3)
TEM 508 Crowdfunding, Currency and Blockchain Innovations (3)
TEM 530 Statistics Bootcamp for Industry (3)
TEM 598 Special Topics (3)
TMC 510 Advanced Enterprise Operations with AI (3)
TMC 584 Internship (3)
TMC 590 Reading and Conference (3)

Electives or Research (9 credit hours)

Culminating Experience (0 or 3 credit hours)
portfolio (0)
TMC 593 Applied Project (3)

Additional Curriculum Information
For their culminating experience, students complete an applied project or a portfolio. The supervised applied project should demonstrate the student's ability to apply research skills in practice. The portfolio highlights three major accomplishments in the program and may include projects, papers, ventures and research. The portfolio includes a resume, written reflection and self-assessment of graduate program accomplishments, with the supporting assignments and projects included. Portfolio submissions are reviewed by the student's faculty advisor and program chair for consistency in grading.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in engineering, engineering technology, hard science,

mathematics, computer science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The personal statement should describe the student's background and professional goals, and explain how the program will help them achieve those goals. The statement should also demonstrate good communication skills in English.

Applicants should have one to three years of industry experience in a technology-driven business; experience in entrepreneurship, product development, marketing and intrapreneurship is a plus.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/technology-management-masters/) for program descriptions and to request more information.

Global opportunities

Global experience: Students have international internship and embedded learning opportunities with a welcoming group of professionals and colleagues from a wide variety of backgrounds. International students have secured internships within the U.S., based on market conditions in the Phoenix metropolitan area, and in other states during the summer session. On a competitive basis, the program offers embedded learning for select courses with either a technology focus or a social entrepreneurship focus; participating companies include Honeywell, Intel, NXP and United Way. Study abroad opportunities include summer programs in Japan and Ireland through the Global Education Office (https://goglobal.asu.edu/).

Career opportunities

Graduates of this program are well positioned to move into innovation decision-making, management or executive roles, or to develop their own ventures. They are prepared to pursue careers in technology-based companies in the U.S. and around the world. Opportunities include these positions:

artificial intelligence machine manager or learning integration manager
business development and operations manager
chief innovation officer
chief technology officer
data business analyst
director or vice president of product innovation
founder or chief executive officer

manufacturing director
market research analyst
production manager
supply chain manager

Manufacturing Engineering, MS (TSMEGRMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

Modern manufacturing is central to global innovation, integrating advanced materials, intelligent systems, and digital technologies to shape the products and infrastructure of future factories. The Master of Science program in manufacturing engineering program prepares you to excel in this evolving field by combining expertise in manufacturing processes, for example on how materials are transformed through additive, subtractive and hybrid techniques, with knowledge of manufacturing systems and management, including the design and optimization of factories, supply chains and digital ecosystems.

The program provides you with a rigorous foundation in manufacturing fundamentals and systems engineering, while offering opportunities for deeper specialization in areas such as advanced manufacturing processes, factory operations management, and smart manufacturing systems. You benefit from course offerings that draw on faculty expertise in automation, industrial robotics, additive and subtractive methods, data-driven modeling and simulation, microelectronics manufacturing, and smart manufacturing systems.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mechanical Engineering, BSE

Engineering (Electrical Systems), BSE

Robotics and Autonomous Systems, BSE

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Engineering (Mechanical Engineering Systems), BSE

Manufacturing Engineering, BS

Robotics and Autonomous Systems, BS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (MFG 593)

Required Core (9 credit hours)
EGR 520 Engineering Analysis I (3)
EGR 522 Statistics for Quality Control in Manufacturing (3)
MFG 510 Manufacturing Systems Management (3)

Electives (15-21 credit hours)

Culminating Experience (0-6 credit hours)
MFG 593 Applied Project (3) or
MFG 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Students should see the academic unit for a complete list of approved electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a minimum of a bachelor's or master's degree in engineering, physical sciences, mathematics or similar from a regionally accredited U.S. institution, or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that institution's country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch at ASU (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the MS program in manufacturing engineering find opportunities in both large and small corporations and government agencies, and within startup enterprises, where they play a critical role. Graduates are equipped to advance their careers, contribute to innovation in industry, and enhance the competitiveness of modern manufacturing enterprises.

Typical job responsibilities include manufacturing process design, manufacturing process management, and quality control and assurance. Graduates with advanced degrees have opportunities to participate in and lead research teams that are developing the next generation of advanced manufacturing technologies.

ASU manufacturing engineering graduates are well placed and command top salaries in their engineering careers, some of which include:

- additive manufacturing
- automation and robotics
- engineering economics
- logistics and supply chain management
- manufacturing operations
- project management
- quality management and reliability

Manufacturing Engineering, PHD (ESMFGPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Doctor of Philosophy program in manufacturing engineering, you acquire the knowledge, skills and abilities to meet the most difficult challenges of modern manufacturing industries on a global scale. The program involves faculty and industry members together with a hands-on approach to education and research, providing you with various career development opportunities (e.g., internships and exchange experiences).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
EGR 520 Engineering Analysis I (3)
MFG 602 Principles of Independent Research (3)

Other Requirements (9 credit hours)
MFG 691 Seminar (3 semesters of 1 credit) (3)
Students choose two courses related to their research area.
Examples include:
MFG 522 Intermediate Engineering Statistics (3)
MFG 523 Artificial Intelligence for Smart Manufacturing (3)
MFG 574 Polymer Science and Additive Manufacturing (3)
MFG 575 Design for Additive Manufacturing (3)
MFG 581 Simulating Manufacturing Systems (3)
MFG 582 Metal Additive Manufacturing (3)

Research (12 credit hours)
MFG 792 Research (12)

Electives or Research (45 credit hours)

Culminating Experience (12 credit hours)
MFG 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used toward this degree. If students do not have a previously awarded master's degree, the 30 credit hours of coursework are made up of electives to reach the 84 credit hours.

Students are required to take 12 credits of MFG 792 as part of their research coursework.

Elective coursework should be directly in support of the student's research as advised by the supervisory committee.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a minimum of a bachelor's or master's degree in manufacturing engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• curriculum vitae or professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose requirement is a 300- to 500-word statement describing the applicant's motivation and rationale for obtaining a doctorate in manufacturing engineering at Arizona State University and how it relates to their long-term career goals.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates typically seek research-oriented academic appointments or industrial research and development positions.

Professionals with a doctorate in manufacturing engineering have substantial opportunities at all levels in manufacturing engineering in research and development at companies, research institutes and national laboratories (e.g., Department of Defense, Department of Energy, NASA). Relevant careers and related titles include:

- industrial engineer
- manufacturing engineer
- materials engineer
- materials scientist
- mechanical engineer
- mechatronics engineer

Materials Science and Engineering, MS (ESMATEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

In the Master of Science program in materials science and engineering, you build a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered to you in thermodynamics, structures and mechanical properties; kinetics; optical and magnetic properties; materials characterization; and energy production and storage.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mechanical Engineering, BSE

Chemistry, BS

Mechanical Engineering (Energy and Environment), BSE

Chemical Engineering, BSE

Materials Science and Engineering, BSE

Physics, BS

Mechanical Engineering (Computational Mechanics), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (MSE 593)

Required Core (6 credit hours)
MSE 503 Concepts in Materials Science (3)
MSE 523 Structural and Mechanical Properties of Materials (3)
MSE 524 Advanced Thermodynamics (3)
MSE 525 Fundamentals of Electrical, Optical and Magnetic Materials and Device Applications (3)
MSE 550 Advanced Materials Characterization (3)
MSE 560 Nanomaterials in Energy Production and Storage (3)
MSE 561 Phase Transformations, Kinetics and Diffusion in Solids (3)

Technical Electives (18 or 24 credit hours)

Culminating Experience (0-6 credit hours)
MSE 593 Applied Project (3) or
MSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
The materials science and engineering MS program has two options: thesis and nonthesis.

All students are admitted to the nonthesis option, which requires a portfolio. During the last semester of their program, students in this option submit a portfolio that contains at least two projects from previous materials science and engineering coursework, along with a paper explaining the projects. Students must successfully complete the portfolio requirements to pass the culminating experience. Students who complete a portfolio must also take an extra six credit hours of elective coursework to reach the required 30 credit hours for the program.

Students in the applied project option write a report in consultation with their faculty chair and present it at the end-of-semester poster symposium.

If students wish to change to the thesis option, a faculty advisor must be secured, and then a petition may be submitted to request the change to the thesis option. Students in the thesis option must complete a thesis and pass the thesis defense examination.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Admission to the program is highly competitive. All applicants must submit:
• graduate admission application and application fee
• official transcripts from all institutions attended
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The applicant is expected to have a TOEFL iBT score of 4, or a score of 80 if taken before January 21, 2026, in a testing center; 6.5 on the IELTS; 105 on the Duolingo English test; or the applicant must have a passing score in the English for Graduate Admission online course through ASU Global Launch.

Admission to the accelerated master's degree program requires an ASU GPA of 3.50 (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-materials-science-and-engineering/) for program descriptions and to request more information.

Career opportunities

The program prepares engineers for doctoral study or for industrial positions that specialize in research, project management and product innovation in materials science and engineering.

Professionals with a materials science and engineering master's degree have strong opportunities at all levels in material design, selection, synthesis and characterization for a wide variety of applications, including electro-optical-magnetic systems, environmental systems, energy conversion and storage, manufacturing and construction. Materials jobs are available at high-tech and manufacturing companies of all sizes, as well as national laboratories (Department of Energy, Department of Defense, NASA) and universities. Analytical skills learned in materials engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Materials Science and Engineering, PHD (ESENMATPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Doctor of Philosophy program in materials science and engineering draws on a fundamental base of knowledge, with underpinnings in physics, chemistry and engineering. The program extends that knowledge to help you address a wide variety of materials-driven challenges, such as energy efficiency, sustainability, functional nanostructures, electronic materials, biomaterials and polymers.

Interdisciplinary in nature, the curriculum offers you required courses in four core subjects:

- advanced thermodynamics
- kinetics and phase transformations
- physics of materials
- structure and properties of materials

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (12 credit hours)
MSE 523 Structural and Mechanical Properties of Materials (3)
MSE 524 Advanced Thermodynamics (3)
MSE 525 Fundamentals of Electrical, Optical and Magnetic Materials and Device Applications (3)
MSE 561 Phase Transformations, Kinetics and Diffusion in Solids (3)

Electives (3-18 credit hours)

Research (24-39 credit hours)
MSE 792 Research

Other Requirement (3 credit hours)
MSE 591 Seminar (3)

Culminating Experience (12 credit hours)
MSE 799 Dissertation (12)

Additional Curriculum Information
Students entering the program with a bachelor's degree are required to complete a minimum of 18 credit hours of elective coursework. Graduate elective courses may be selected from any of the graduate courses in the materials science and engineering curriculum as well as elective courses from related disciplines (e.g., chemistry, physics, electrical engineering), subject to approval by the faculty advisor. These courses should comprise a focused plan of study with emphasis in a particular area of materials science, organized in consultation with faculty supervisory committee.

Students entering the doctoral program with a master's degree need to complete 24 credit hours of research (MSE 792). Students entering with a bachelor's degree are required to complete 39 credit hours of research (MSE 792).

MSE 591 is a one credit hour course to be taken in three semesters. The seminar course consists of a series of seminars presented by invited speakers and graduate students. Doctoral students are required to give a seminar presentation once during the academic year after they have begun their research.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework comprise electives and research coursework as specified by the academic unit. If the master's degree has not been completed, a maximum of 12 credit hours of graduate work may be applied with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited U.S. or international institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 in an applicable master's degree program.

Admission to the materials science and engineering doctoral program is highly competitive. All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Once the application file is complete, the file is forwarded to the faculty admission committee for evaluation and recommendation.

The admission process considers all aspects of the student's application. The typical successful applicant has, at minimum, a cumulative GPA of 3.25 (scale is 4.00 = "A") in engineering and science coursework in a bachelor's or master's degree program and high TOEFL scores, if applicable.

Financial aid is available to highly qualified students. The most common type of financial aid is teaching and research assistantships, which are accompanied by tuition waivers and major medical insurance benefits. Other types of financial aid include Ira A. Fulton Schools of Engineering fellowships and Science Foundation Arizona fellowships.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for professional careers in materials science and engineering and related fields in industry, government and educational institutions.

Professionals with a materials science and engineering doctoral degree have strong opportunities at all levels in material design, selection, synthesis and characterization for a wide variety of applications, including electro-optical-magnetic systems, environmental systems, energy conversion and storage, manufacturing and construction. Materials jobs are available at a large number of high-tech and manufacturing companies of all sizes, as well as national laboratories (Department of Energy, Department of Defense, NASA) and universities. Analytical skills learned in materials engineering are also valued in other nonengineering positions.

Career examples include:

engineer
engineering manager or director
engineering professor
research engineer

Mechanical Engineering, MS (ESMEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The Master of Science program in mechanical engineering provides you with a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered to you in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mechanical Engineering, BSE

Aerospace Engineering (Astronautics), BSE

Mechanical Engineering (Energy and Environment), BSE

Aerospace Engineering (Autonomous Vehicle Systems), BSE

Mechanical Engineering (Computational Mechanics), BSE

Aerospace Engineering (Aeronautics), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (MAE 593)

Major Area of Emphasis (12 or 15 credit hours)

Technical Electives (6 or 9 credit hours)

Mathematics (6 credit hours)

Culminating Experience (0-6 credit hours)
MAE 593 Applied Project (3) or
MAE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
All students are admitted to the nonthesis option unless a faculty thesis advisor is secured, at which time the student can initiate a change to the thesis option.

The plan of study must be in accordance with university and program requirements. A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required throughout the program. Candidates for the program must complete a minimum of 30 credit hours of approved courses at the 500 level and higher, with a minimum cumulative GPA of 3.00 or higher.

Coursework for the major area of emphasis is restricted to MAE coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

Admission to the program is highly competitive; preferred applicants have an undergraduate degree in aerospace engineering or mechanical engineering.

Admission to the accelerated master's degree program requires an ASU GPA of 3.50 (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for doctoral study or industrial positions that specialize in research, project management and product innovation in mechanical engineering.

Professionals with a mechanical engineering master's degree have strong opportunities at most levels in mechanical engineering in research, design and manufacturing at companies of all sizes as well as national laboratories (Department of Energy, Department of Defense, NASA). Analytical skills learned in mechanical engineering are also valued for other nonengineering positions.

Career examples include:

engineer
engineering manager or director
research engineer

Medical Engineering, MS (ESMEDENMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Downtown Phoenix, Tempe

Program description

The Master of Science program in medical engineering offers a unique multidisciplinary approach to tackling complex challenges in health care. At the intersection of engineering and clinical medicine, this program prepares you to use engineering principles and artificial intelligence to understand physiological systems, analyze current diagnostic tools and treatments, and drive innovation in health care delivery systems.

You learn to reverse-engineer physiological systems to better understand fundamental mechanistic concepts in medicine and apply an engineering approach to analyze the impact and limitations of current technologies. The curriculum is be accessible to a wide variety of STEM backgrounds, with a foundational, qualitative approach that becomes more computational as you delve deeper into digital health technologies. Immersive experiences in industry or the clinic empower you to become adept at identifying problems and designing solutions that comply with regulatory and user constraints. You work collaboratively, leveraging your diverse expertise to innovate and translate new technologies from concept to clinic.

This program prepares you to become a leader in developing transformative diagnostic tools, designing therapeutic strategies, and delivering impactful solutions for the future of health care.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following:

Medicine, MD

Degree requirements

30 credit hours including the required capstone course (BME 528) - Engineering Student Option, or
30 credit hours including the required capstone course (BME 528) - Medical Student Option

Required Core (15 credit hours)
BME 501 Applied Signals and Systems for the Clinic (2)
BME 502 Fundamentals of AI for Medical Applications (2)
BME 503 Applications in Medical Engineering I (4)
BME 504 Applications in Medical Engineering II (4)
BME 515 Research in a Medically Integrated Experience: ReMIX (2)
BME 519 Medical Engineering Design Principles (1)

Engineering Student Option Coursework (5 credit hours)
BME 511 Foundations in Medicine for Engineers I (1)
BME 512 Foundations in Medicine for Engineers II (1)
BME 513 Foundations in Medicine for Engineers III (1)
BME 514 Foundations in Medicine for Engineers IV (1)
BME 516 Clinical Immersion for Engineers (1)

Medical Student Option Coursework (2 credit hours)
BME 518 Medical Engineering Design Methodology (2)

Other Requirements (6 or 9 credit hours)
BME 528 Capstone Research I: Design (4)
BME 591 Seminar (2 or 5)

Culminating Experience (4 credit hours)
BME 529 Capstone Research II: Implementation (4)

Additional Curriculum Information
Engineering students will complete five credit hours of engineering student option coursework and six credit hours of other requirements courses. Medical students will complete two credit hours of medical student option coursework and nine credit hours of other requirement courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, medicine or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

• graduate admissions application and application fee
• official transcripts
• professional resume
• two letters of recommendation
• written statement
• proof of English proficiency

Additional Admissions Information
An applicant whose native language is not English must provide proof of English proficiency by scoring at least 90 on the internet-based TOEFL (iBT) taken in a testing center, a 7 on the IELTS, or a 115 on the Duolingo English test.

MD students will be automatically admitted to the MS in Medical Engineering concurrently with their acceptance to the John Shufeldt School of Medicine and Medical Engineering. A separate application to the MS in Medical Engineering is not required.

Concurrent applicants to the John Shufeldt School of Medicine and Medical Engineering can also submit their MCAT score, but this is not required.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Engineers with a background in medicine, and medical doctors with a background in engineering, can pursue opportunities in a variety of fields to develop and apply medical technologies. These skills can be applied to industries including:

biomedical devices
digital health innovation
health care artificial intelligence applications
medical robotics
patient monitoring systems

Modern Energy Production and Sustainable Use, MS (ESMEPSUMS)

College/School: Ira A. Fulton Schools of Engineering
Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the Master of Science program in modern energy production and sustainable use, you are provided with the skills and knowledge you need to address the challenges associated with the different modalities in energy production and storage. You are encouraged to work with instructors in the program who are conducting research.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Mechanical Engineering, BSE

Mechanical Engineering (Energy and Environment), BSE

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio

Required Core (6 credit hours)
Students choose two courses:
ALT 535 Applied Photovoltaics (3)
CHE 573 Fuel Cells and Biofuel Cells (3)
CHE 578 Biomass Energy Conversion Technology (3)
EEE 563 Nuclear Reactor System Dynamics and Diagnostics (3)
MAE 576 Energy Efficiency (3)
MAE 579 Wind Energy (3)
MAE 582 Renewable Energy: Mechanical Systems (3)
MSE 503 Concepts in Materials Science (3)
MSE 560 Nanomaterials in Energy Production and Storage (3)

Mathematics Elective (3 credit hours)

Sustainability Electives (6 credit hours)

Technical Electives (15 credit hours)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information
The modern energy production and sustainable use program requires a nonthesis portfolio.

Students should see the academic unit for a list of approved elective coursework. Other coursework may be used with approval of the academic unit.

During the last semester of their program, students submit a portfolio that contains at least two projects from previous engineering coursework, along with a paper explaining the projects. Students must successfully complete the portfolio requirements to pass the culminating experience.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any engineering, physical science or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• professional resume
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026, in a testing center, 6.5 on the IELTS, 60 on the Pearson Test of English (PTE), or 105 on the Duolingo English test.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Differentiate key concepts within energy storage and demonstrate their understanding of those concepts on the written exam.
Differentiate key concepts of energy generation and sustainable energy use within energy-centric engineering and demonstrate their understanding of those concepts on written exams and presentations.
Demonstrate problem-solving skills in an engineering-related field.

Career opportunities

This program prepares students for professional careers in transdisciplinary areas of renewable energy generation and storage, energy-saving materials, manufacturing, sustainable transportation and related fields in industry, government and educational institutions.

Professionals with a modern energy production and sustainable master's degree have strong opportunities at all levels in various energy-related technologies with private and government entities. The skills learned in this degree program prepare graduates for a career as a practicing engineer.

Career examples include:

development engineer
process engineer

- product engineer

Molecular, Cellular, Tissue, and Biomaterials Engineering, Certificate (ESMCTBGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

This program is not accepting applications at this time.

Program description

Engineers are constantly improving in their capability to manipulate the components of biological systems. Approaches= to localized delivery of drugs, genetic manipulations of cells, and the building of tissue scaffolds are changing rapidly.

The certificate program in molecular, cellular, tissue and biomaterials engineering exposes you to many of the= principles and techniques that are central to the field. When you complete the program, you have a set of skills that= enables you to participate in engineering biological systems at levels ranging from molecular to tissue.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (3 credit hours)
BME 567 Tissue Engineering and Regenerative Medicine (3)

Electives (12 credit hours)

Additional Curriculum Information
Students should see the academic unit for an approved list of elective courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally= accredited institution. Applicants can see more information below.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's= degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students must have a BS or BSE in biomedical engineering; or a BS or BSE in engineering plus advanced (postbaccalaureate) training in medicine, physiology or related fields; or a BS in a science discipline plus additional background work in biology, thermodynamics, fluids, transport, and additional work in medicine, physiology or related fields. Specifically, applicants need to demonstrate equivalent proficiency in at least four of the following five areas:

• biomaterials
• electrical networks or circuits
• engineering mechanics
• fluid mechanics or engineering transport
• thermodynamics or physical chemistry

Admission examinations are not required.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply advanced biological concepts and principles at the cellular and molecular level to biomedical engineering solutions.
- Generalize advanced techniques and concepts from the cellular and molecular level to tissue engineering to address biomedical questions
- Apply biomaterials knowledge to solve biomedical engineering problems at the graduate level.

Career opportunities

Professionals who specialize in molecular, cellular, tissue and biomaterials engineering are in high demand. They are= sought after by local, national and international employers across sectors and industries, including business, academia,= health care, government and research.

Neural Engineering, Certificate (ESNENGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

ASU is not currently accepting applications for this program.

Program description

Technologies for ameliorating neural disorders, such as epilepsy, paralysis and those caused by stroke, are developing rapidly. Understanding and deploying these technologies require specialized skills in neurophysiology, bioelectricity and neural-electronic interfaces.

The certificate program in neural engineering prepares you, as a clinical, industrial or academic practitioner, with these skills through courses in areas of knowledge in neurophysiology, neuroanatomy and neuropathology. You then learn the state-of-the-art neurotechnologies applied to current neural disorders as well as the biophysics that these devices exploit.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (6 credit hours)
BME 526 Introduction to Neural Engineering (3)
BME 561 Clinical Neuroscience (3)

Electives (9 credit hours)

Additional Curriculum Information
For electives, students should see the academic unit for the approved course list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Applicants can see below for more information.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The English proficiency requirement is equivalent to the ASU Graduate College policy: TOEFL iBT score of at least 4, or 80 (taken at a testing center) if taken before January 21, 2026; or an IELTS overall band score of 6.5.

Applicants must have earned a BS or BSE or master's degree in biomedical engineering; or have earned a BS or BSE in engineering and have advanced (postbaccalaureate) training in medicine, physiology or related fields; or a BS in a science discipline plus additional background work in thermodynamics, fluids and transport, and additional work in medicine, physiology or related fields. Specifically, applicants need to demonstrate equivalent proficiency in at least four of the following six areas:

• biomaterials
• electrical networks or circuits
• engineering mechanics
• fluid mechanics or engineering transport
• signals and systems or control systems
• thermodynamics or physical chemistry

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply advanced neural engineering concepts and principles to biomedical engineering solutions at the graduate level.
- Apply advanced neurorehabilitation principles to biomedical engineering solutions at the graduate level.

Nuclear Power Generation, Certificate (ESNPGGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

The nuclear power generation graduate certificate program is a transdisciplinary professional option within the Ira A.= Fulton Schools of Engineering.

You begin with the study of nuclear science and engineering fundamentals. Subsequent core courses focus on nuclear= power plant dynamics and diagnostics, nuclear power plant operations and safety, and nuclear reactor theory and= design.

Elective courses enable you to tailor your remaining studies toward facilitating your career goals and to focus on

studies tied to your academic interests. Example elective courses include nuclear power engineering, health physics and electrical power plants.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (9 credit hours)
EEE 562 Nuclear Reactor Theory and Design (3)
EEE 563 Nuclear Reactor System Dynamics and Diagnostics (3)
EEE 564 Interdisciplinary Nuclear Power Operations (3)

Electives (6 credit hours)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's degree in an engineering or science discipline, such as physics, chemistry or mathematics, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• statement of career and educational goals
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Transcripts should be submitted for all undergraduate and graduate coursework taken.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-nuclear-power-generation/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply electrical engineering theory to solve nuclear reactor electrical system problems.
Analyze nuclear power plant electrical systems and reactor dynamics for operation and diagnostics.

Career opportunities

Students and professionals from a variety of engineering and scientific disciplines are prepared to work effectively in the nuclear energy industry. Career options include positions in nuclear power plants, government regulatory agencies and national laboratories.

Robotics and Autonomous Systems (Artificial Intelligence), MS (ESRASAIMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

The concentration in artificial intelligence is one of four concentrations in the multidisciplinary Master of Science program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, AI and related fields. This concentration is appropriate for you if you wish to emphasize applications in AI and computer science.

You receive a solid theoretical and practical background in a variety of topics that facilitate the study of intelligent agents --- that is, any robotic system that perceives its environment and takes actions that maximize its chance of achieving its goals. Thus, you are exposed to the frontiers of the general topics in AI, including statistical machine learning, computer vision, natural language processing, knowledge retrieval and reasoning, and formal methods of planning. As compared with the other concentrations, the AI concentration focuses more on the algorithmic aspects of robotics.

This concentration program is offered by the School of Computing and Augmented Intelligence.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Computer Science, BS

Computer Systems Engineering, BSE

Informatics, BS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (CSE 593)

Required Core (6 credit hours)
MAE 501 Linear Algebra in Engineering (3) or RAS 501 Applied Linear Algebra for Engineers (3)
MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12-18 credit hours)

Culminating Experience (0-6 credit hours)
CSE 593 Applied Project (3) or
CSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Students select one of the approved culminating experiences for the concentration.

A defense is required for the thesis option. The portfolio is a compilation of two projects that are completed in the required concentration courses. Students write a portfolio report that includes the highlights of the two projects. The applied project is a written report and oral presentation on research related to the student's coursework and interests.

Students should see the academic unit for the approved concentration coursework as well as the available elective and research courses. Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics or others approved by the graduate program committee.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in engineering, science, mathematics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee

• official transcripts
• letter of intent or written statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Applicants to the artificial intelligence concentration are expected to have basic knowledge in key relevant areas (e.g., programming languages, discrete mathematics, data structures and algorithms, or similar topics). Indicative ASU courses include MAT 242 Elementary Linear Algebra; MAT 243 Discrete Mathematical Structures or MAT 300 Mathematical Structures; MAT 265 Calculus for Engineers I; MAT 266 Calculus for Engineers II; MAT 267 Calculus for Engineers III; PHY 121 University Physics I: Mechanics; CSE 220 Programming for Computer Engineering or CSE 240 Introduction to Programming Languages; and CSE 310 Data Structures and Algorithms.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for doctoral study and for industrial positions in industries as varied as manufacturing, transportation, aerospace, defense and health care.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Analyze and apply key sensing, signal processing, and control theories and methods used in this field.
Differentiate key concepts within electrical engineering, demonstrate their understanding of those concepts on their portfolio or thesis at the end of their program, and demonstrate the ability to critically think and synthesize information.
Understand and apply skills needed in order to select and secure professional employment in an electrical engineering related field by practicing the skills they have learned in their courses and showing they have the ability to work successfully within the electrical engineering field applying concepts from their academic experience, synthesizing knowledge, self-assessment on the student's part, and teamwork/communication to address societal needs.

Career opportunities

Graduates are prepared for doctoral study and for industrial positions in numerous and varied industries, including:

aerospace
defense
health care
manufacturing
transportation

Robotics and Autonomous Systems (Mechatronics and Automation), PHD (ESRASMAPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The mechatronics and automation concentration of the Doctor of Philosophy program in robotics and autonomous systems provides you with the opportunity for in-depth independent research in a highly focused problem domain approved by your advisory committee. This program is ideal if you have a desire to develop expertise in a particular and focused problem in the field of robotics and autonomous systems, including both traditional and advanced robotics and autonomous systems technologies, systems integration and data-fusion techniques, and modeling and simulation development.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (12 credit hours)

Concentration (6 credit hours)
RAS 546 Robotic Systems II (3)
RAS 550 Mechatronic Systems (3)

Other Requirements (6 credit hours)
MFG 602 Principles of Independent Research (3)
RAS 545 Robotic Systems I (3)

Electives or Additional Research (36 credit hours)

Research (12 credit hours)

Culminating Experience (12 credit hours)
RAS 799 Dissertation

Additional Curriculum Information
For elective courses, up to six credits of MAE, EEE, MFG, EGR, CSE, AME or RAS 590 Reading and Conference are allowed.

The classes listed under the core requirements can also be taken as electives, if not already counted toward the core requirements.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a master's degree in robotics and autonomous systems or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates with a doctorate in robotics and autonomous systems typically seek research-oriented academic appointments or industrial research and development positions. As trained researchers and scientists, graduates perform analysis, evaluation and synthesis for a wide variety of problems related to the design, implementation and efficient operation of robotics and autonomous systems. These professionals have substantial opportunities at all levels in manufacturing engineering in research and development at companies, research institutes and national laboratories (e.g., Department of Defense, Department of Energy, NASA). Relevant careers and related titles include:

electronics engineer
industrial engineer
manufacturing engineer
mechanical engineer
mechatronics engineer
robotics engineer

Admission deadlines (https://msn.engineering.asu.edu/degrees/graduate/)

Robotics and Autonomous Systems (Systems Engineering), MS (ESRASSEMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

This advanced degree program emphasizes system-level competency in the rapidly growing fields of robotics and autonomous systems.

The systems engineering concentration is one of the concentration options in the multidisciplinary Master of Science program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields.

This concentration is appropriate for you if you wish to focus on applications in systems engineering.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Engineering (Electrical Systems), BSE

Robotics and Autonomous Systems, BSE

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Engineering (Mechanical Engineering Systems), BSE

Manufacturing Engineering, BS

Robotics and Autonomous Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (RAS 593)

Required Core (6 credit hours)
MAE 501 Linear Algebra in Engineering (3) or RAS 501 Applied Linear Algebra for Engineers (3)
MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12-18 credit hours)

Culminating Experience (0-6 credit hours)
RAS 593 Applied Project (3) or
RAS 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Students are required to select one of the approved culminating experiences for the concentration.

A defense is required for the thesis option. The applied project requires a written report and an oral presentation. The portfolio includes a summary of the graduate program and a report highlighting three projects from the program.

Students should see the academic unit for the approved concentration coursework as well as the available elective and research courses. Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics, or others approved by the graduate program committee. Three credit hours of internship may be included among the electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in engineering, physical sciences, mathematics or a similar field from a regionally accredited U.S. institution or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that institution's country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts from each college or university attended
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Global Launch (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain

cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for industry careers in positions such as:

- automation engineer
- controls engineer
- machine learning engineer
- robotics engineer
- systems engineer

Semiconductor Processing, Certificate (ESSCPRGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

This semiconductor processing certificate program provides a series of courses in semiconductor processing,= packaging and characterization that prepares you for careers in the industry or for graduate studies. You select from a= set of core courses and technical electives.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (9 credit hours)
EEE 530 Microelectronics Manufacturing (3)
IEE 572 Design Engineering Experiments (3)
MSE 550 Advanced Materials Characterization (3)

Electives or Research (6 credit hours)

Additional Curriculum Information
Students should see the academic unit for available elective and research coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply and be accepted into a graduate degree program before being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/semiconductor-processing-graduate-certificate/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Demonstrate an understanding of key film materials characterization in the field and how to apply those concepts in their culmination event (portfolio).
Demonstrate an understanding of key concepts of thin film processing in the field and how to apply those concepts in their culmination event (portfolio).

Career opportunities

Professionals with a semiconductor processing certificate can find employment with semiconductor device manufacturers and semiconductor processing equipment manufacturers at all levels. Graduates are prepared with the skills needed for a career as a practicing engineer.

Career examples include:

development engineer
process engineer

- product engineer

Sensor Signal and Information Processing, Certificate (ESSSIPGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe

Program description

In the graduate certificate program in sensor signal and information processing, you receive background and= application-oriented training in processing and interpreting signals acquired from sensors. The focus is on building= knowledge and skills in several sensor network applications.

You complete courses on signal and data processing for sensor systems, covering topics such as digital signal= processing, random signal theory, detection and estimation, sensor systems, big data and machine learning. The= program may be completed with on-campus coursework and iCourses.

STEM-OPT extension eligible: No

Degree requirements

16 credit hours

Required Core (7 credit hours)
EEE 517 Sensors and Machine Learning (1)
EEE 554 Probability and Random Processes (3)
EEE 556 Detection and Estimation Theory (3) or
EEE 596 Adaptive Signal Processing (3) or
EEE 607 Speech Comprehension and Recognition (3)

Electives (5 or 6 credit hours)

Other Requirements (3 or 4 credit hours)
EEE 509 DSP Algorithms and Software (3) or EEE 591 Seminar: Digital Signal Process (4)

Additional Curriculum Information
For the required core, students choose either EEE 556, EEE 606 or EEE 607. Additionally, students complete either EEE= 591 Seminar: Digital Signal Process and five credit hours of electives, or EEE 509 and six credit hours of electives.

For electives, students should see the academic unit for the approved course list. Other coursework may be used with= the approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in an engineering or science discipline, such as physics, mathematics or computer science, from an accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa need to be accepted to a graduate degree program before they can be considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Regular admission is granted to applicants who have at least a GPA of 3.00 or equivalent (scale is 4.00 = "A") and are competitive in the applicant pool. All prerequisites for the sensor signal and information processing certificate required courses must be in place (EEE 203 and EEE 350 from ASU, or signals and systems, and random signals course equivalents from other universities).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply electrical engineering theory in the sensor and signal processing field at an advanced level.
Apply electrical engineering theory in the communications field at an advanced level.

Career opportunities

Graduates of this program have numerous professional opportunities. The area of sensor information extraction and interpretation has applications in various professional fields, including:

communications
health
media
security
sustainability

Software Engineering (Cybersecurity), MS (ESSERCSMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Master of Science program in software engineering with a concentration in cybersecurity equips you with advanced knowledge and skills in designing and developing secure and resilient software systems. This concentration integrates cybersecurity principles with software engineering methodologies, enabling you to build robust applications that defend against cyber threats and ensure data integrity.

The program emphasizes the engineering discipline of secure software development, covering key areas such as secure coding practices, risk assessment, encryption techniques, network security, and threat modeling. You gain hands-on experience through engaging projects and real-world case studies, preparing you to develop and maintain software that meets modern security challenges.

Additionally, the program fosters professional growth and research opportunities, enabling you to explore innovative solutions to the problems bisecting software engineering and cybersecurity. You are well-prepared for careers in secure software development, cybersecurity engineering, penetration testing, cloud security, and cyber defense architecture across industries that demand advanced security solutions.

GI Bill® benefits
This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (SER 517)

Required core (9 credit hours)
SER 501 Advanced Data Structures and Algorithms (3)
SER 502 Emerging Languages and Programming Paradigms (3)
SER 515 Foundations of Software Engineering (3)

Concentration (9 credit hours)
CSE 543 Information Assurance and Security (3)

Students select two courses:

CSE 539 Applied Cryptography (3)
CSE 545 Software Security (3)
CSE 548 Advanced Computer Network Security (3)

Restricted Electives (6 credit hours)
CSE 545 Software Security (3)
CSE 546 Cloud Computing (3)
CSE 563 Software Requirements and Specification (3)
CSE 565 Software Verification, Validation and Testing (3)
SER 516 Software Agility (3)
SER 574 Advanced Software Design (3)

Electives (0 or 3 credit hours)

Culminating Experience (3 or 6 credit hours)
SER 517 Software Factory Capstone (3)
SER 599 Thesis (6)

Additional Curriculum Information
For restricted electives coursework, students select two of the courses on the list. Courses should be selected in consultation with the program advisor.

Students in the capstone option take three credit hours of electives, while students in the thesis option do not take elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science engineering, data science engineering, industrial engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = ''A'') in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• personal statement
• professional resume or CV (optional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS; or 105 on the Duolingo English test.

Before applying to the MS program, students are required to have completed two semesters or six credit hours of

calculus, equivalent to Calculus I and II, with a grade of ''C'' (scale is 4.0 = ''A'') or higher. Completion of discrete math is also recommended prior to admission. Students from noncomputing backgrounds may also be eligible with the required math listed and at least six credit hours of computer programming or at least one year of software industry experience.

Students assigned any additional coursework upon admission must complete those classes with a grade of ''C'' (scale is 4.00 = ''A'') or higher within two semesters of admission to the program. Courses include:
SER 222 Design and Analysis of Data Structures and Algorithms or CSE 310 Data Structures and Algorithms
SER 334 Operating Systems and System Programming or CSE 330 Operating Systems

The applicant's undergraduate GPA and depth of preparation in computer science and software engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the MS program in software engineering with a concentration in cybersecurity have a wide range of career opportunities across industries. With the increasing demand for cybersecurity expertise, graduates can find roles in technology firms, financial services, health care, government agencies, critical infrastructure, cloud computing and more.

Career examples include:

- application security engineer
- cloud security engineer
- cyber defense analyst
- cybersecurity engineer
- DevSecOps engineer
- secure software developer
- network security engineer
- penetration tester (ethical hacker)
- security architect

Software Engineering, Certificate (ESSERGRCT)

College/School: Ira A. Fulton Schools of Engineering

Campus: Tempe, Online

Program description

Software engineering integrates principles of engineering, computing, project leadership and software construction to= create reliable, scalable and maintainable systems. This project-based microcertificate program emphasizes practical= experience, enabling you to design and deliver high-quality software solutions that meet industry standards.

Throughout the program, you gain expertise in applying software development concepts to emerging technologies,= such as blockchain; conducting software testing to validate the sustainability of smart mobile applications; and= practicing software architecture and design principles to build robust systems. You also learn to predict software= reliability using operational profiles, ensuring that applications perform consistently under real-world conditions.

Upon completion, you possess a versatile set of skills valued across industries and be prepared for roles in software

development, quality assurance and systems design.

Software Engineering, MS (TSSERMS)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science program in software engineering, you develop advanced knowledge and abilities in the design and application of software.

This innovative program involves the application of engineering principles to software development, including design methodologies, operation principles, and maintenance and testing approaches. You learn to solve problems and address issues through engaging projects, commonly as a member of a development team. You develop professional skills in the discipline and have opportunities to engage in research.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Software Engineering, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (SER 517)

Required Core (9 credit hours)
SER 501 Advanced Data Structures and Algorithms (3)
SER 502 Emerging Languages and Programming Paradigms (3)
SER 515 Foundations of Software Engineering (3)

Electives (15 or 18 credit hours)

Culminating Experience (3 or 6 credit hours)
SER 517 Software Factory Capstone (3) or
SER 599 Thesis (6)

Additional Curriculum Information
Students should see the academic unit for a list of approved electives.

For the culminating experience, students can choose to complete the capstone course (SER 517) or a thesis (SER 599). Completion of 30 credit hours of coursework is required for all culminating experience options.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's or master's degree in information technology, computer science, applied computing, engineering or a closely related field from a regionally accredited institution (or international equivalent).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or CV
• proof of English language proficiency

Additional Application Information
An applicant whose native language is not English must demonstrate proficiency in the English language with a TOEFL iBT® score of 4.5, or 90 (taken at a testing center) if taken before Jan. 21, 2026; 7 on the IELTS; or 115 on the Duolingo English test, regardless of current residency.

Before applying to the program, students are required to have completed two semesters or six credit hours of calculus, equivalent to Calculus I and II, with a grade of "C" (scale is 4.00 = "A") or higher. Completion of a discrete math course is also recommended prior to admission. Students from noncomputing backgrounds may also be eligible with the required math listed and at least six credit hours of computer programming or at least one year of software industry experience.

Students assigned any additional coursework upon admission must complete those classes with a grade of "C" or

higher within two semesters of admission to the program. These courses may include:

SER 222 Design and Analysis of Data Structures and Algorithms or CSE 310 Data Structures and Algorithms
SER 334 Operating Systems and System Programming or CSE 330 Operating Systems

The applicant's undergraduate GPA and depth of preparation in computer science and software engineering are the primary factors affecting admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Develop advanced knowledge and abilities in the design and application of software. (Design)
Apply engineering principles to software projects, including design methodologies, evolutionary development and requirements-driven improvement. (Technical competence)
Demonstrate professionalism in engineering situations and apply software engineering perspective for producing quality software systems. (Professionalism and perspective)

Career opportunities

Graduates are able to design and engineer innovative systems, such as those that include mechanical and electrical components that interact with software. They are prepared for advanced study in computing or in an allied field, or to enter the computing profession, most commonly as an application software engineer.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in employment opportunities. Software engineering jobs may include:

creating applications for mobile devices
creating web applications
designing, creating and validating software for avionics, robotics and similar systems fields

Sustainable Engineering, MSE (ESSUEMSE)

College/School: Ira A. Fulton Schools of Engineering

Campus: Online

Program description

The Master of Science in Engineering program in sustainable engineering is a multidisciplinary graduate program ideal if you are a professional or graduate-level student with an engineering and physical science background and wish to design a flexible, individualized plan of study.

You explore sustainable engineering topic areas such as energy systems and alternative energy production; water, transportation or earth systems engineering; industrial ecology; life cycle assessment; environmental technologies; green construction practices; and sustainable technology systems.

The goal of sustainable engineering is to enable long-lasting improvement of the human condition. With sustainable engineering, you are able to transcends traditional engineering education by integrating considerations of complex social, environmental, political and economic factors into engineering theory and practice to achieve more economically, technically, environmentally, institutionally and socially efficient and robust solutions.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours and a thesis, or
30 credit hours and a written comprehensive exam, or
30 credit hours including the required applied project course (CEE 593)

Required Core (9 credit hours)

Infrastructure Systems Track (9 credit hours) or
Green Buildings and Construction Practices Track (9 credit hours) or
Earth Systems Engineering and Industrial Ecology Track (9 credit hours) or
Global Technology and Policy Track (9 credit hours)

Electives (6-12 credit hours)

Culminating Experience (0-6 credit hours)
comprehensive exam (0) or
applied project (3) or
thesis (6)

Additional Curriculum Information
All students are initially admitted to the comprehensive exam option. To pursue the applied project or thesis option, students must have a faculty member willing to oversee them.

Students complete nine credit hours in one selected track. Available track options are infrastructure systems, green buildings and construction practices, earth systems engineering and industrial ecology, and global technology and policy. Students should see the academic unit for an approved course list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a bachelor's degree or master's degree in engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letters of recommendation

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students who have a degree in civil engineering, environmental engineering, construction engineering or mechanical engineering, or who have an engineering degree other than those listed may be admitted with deficiencies as identified by the sustainable engineering faculty. If the applicant does not have an undergraduate degree in any of these programs, additional requirements may be necessary based on the applicant's background, such as sufficient courses in mathematics that include calculus, differential equations and linear algebra. A faculty committee determines which required courses are needed on a case-by-case basis.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering/) for program descriptions and to request more information.

Career opportunities

Sustainable engineering graduates can pursue careers as:

corporate social responsibility sustainability professionals
sustainability consultants
sustainability managers
water engineering specialists

Systems Engineering, PHD (ESSYSPHD)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

The Doctor of Philosophy program in systems engineering is a transdisciplinary graduate program offered by the School of Manufacturing Systems and Networks.

The program is aimed at advancing the understanding of complex engineering systems and where these systems are inclusive of technological aspects, as well as social, cultural, environmental and other interacting components that impact the input, output and interactions within a system. The program prepares you to identify, model, analyze, interpret, optimize and manage the multidimensional interactions of the ever-increasing complexity of modern technological and societal challenges.

A typical incoming student in this program has a master's degree in engineering or related discipline. Applicants with a

strong research background may be admissible directly from a bachelor's degree program in engineering or a related discipline. The core curriculum provides the foundation for systems thinking, systems identification, systems modeling, and systems design and analysis using diverse disciplinary methodological approaches. You use your capacity to evaluate complex systems and a depth of mathematical maturity to study problems whose complexity is impeding progress toward solutions.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (9 credit hours)
EGR 608 Advanced Simulation (3)
EGR 611 Complex Engineering Systems (3)
MFG 602 Principles of Independent Research (3)

Technical Electives (3 credit hours)

Electives and Research (60 credit hours)

Culminating Experience (12 credit hours)
MFG 799 Dissertation (12)

Additional Curriculum Information
When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used toward this degree. If students do not have a previously awarded master's degree, the 30 credit hours of coursework are made up of electives to reach the required 84 credit hours.

Students are required to take 12 credit hours of MFG 792 or RAS 792 as part of their research coursework.

Elective coursework should be directly in support of the student's research as advised by the supervisory committee.

Students with a Bachelor of Science who are entering the doctoral program in systems engineering must complete at least nine credit hours of approved mathematics courses after the completion of their bachelor's degree. Students select appropriate elective courses in consultation with the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants must have earned a minimum of a bachelor's or master's degree in engineering from a regionally accredited institution, or the equivalent of a U.S. bachelor's degree in engineering, physical sciences, mathematics or a similar field from an international institution that is officially recognized by that institution's country.

Applicants without a master's degree in engineering or a closely related field must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, coupled with a record of research or leadership accomplishments (or both). Applicants with a master's degree in engineering or a closely related field must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program. Exceptional undergraduates are encouraged to apply after they earn a BS degree.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from each college or university attended
• two letters of recommendation
• statement of purpose
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch (https://globallaunch.asu.edu/learn-english/asu-admission) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the doctoral program in systems engineering are prepared for industry careers in areas such as:

automotive systems
energy systems, including alternative energy and grids
manufacturing
robotics

Technology (Aviation Management and Human Factors), MSTech (TSHFMSTECH)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

Program description

In the Master of Science in Technology program with a concentration in aviation management and human factors, you gain professional skills and be exposed to educational theory and practice for use in leadership positions in the aviation industry. Management and leadership positions at airports of all sizes require skills in labor management and policy, economics and analysis, national aerospace structure and aviation law, as well as an awareness of unmanned systems and flight operations. If you're interested in the human systems and safety area, you find exceptional use of educational discussions on human performance and the human limitations and capabilities as they relate to working within a complex system.

Courses are offered at ASU's Polytechnic campus, with some offered as iCourses.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Aeronautical Management Technology (Professional Flight), BS

Aeronautical Management Technology (Air Traffic Management), BS

Aeronautical Management Technology (Air Transportation Management), BS

Aeronautical Management Technology (Unmanned Aerial Systems), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (AMT 593)

Required Core (3 credit hours)
OMT 570 Advanced Project Management (3)

Concentration (6 credit hours)
AMT 533 Aviation Systems and Psychology (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)

Track Coursework (12 or 15 credit hours)

Restricted Electives (3 or 6 credit hours)

Culminating Experience (0 or 3 or 6 credit hours)
AMT 593 Applied Project (3) or
AMT 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
The student and the supervisory committee chair and committee members are responsible for the detailed design of the student's program requirements and the selection of required courses.

Students have the opportunity to enroll in human systems engineering (prefix HSE) and technological entrepreneurship and management (prefix TEM) graduate courses. Students may focus their study on courses that best prepare them for their career or for the next step in their education.

Applied project students complete 15 credit hours (five track courses), and thesis students complete 12 credit hours (four track courses) selected in consultation with an advisor. In addition, three credit hours of AMT elective coursework are chosen in conjunction with the student's advisor or committee. Students who do not select a track must complete 15 or 18 credit hours from the restricted electives list or other courses approved by their supervisory committee. All students in the aviation management and human factors concentration must take at least five AMT graduate courses.

Students who choose the portfolio option must demonstrate a high level of mastery of the principles and practice of aviation management and human factors through a compilation of work completed during the course of their graduate study. While the specific details depend on the student's specialization, all portfolios must describe three notable projects or academic accomplishments that illustrate the evolution and advancement of the student's technical expertise and mastery of the field of aviation management and human factors. The submission must include a written document with an overview of the graduate experience and descriptions of projects presented in the portfolio.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

To be considered for admission to the program, applicants must have earned a bachelor's or master's degree in a STEM field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine credit hours of graduate coursework from a U.S. institution or an applicable conferred master's degree program.

Applicants must submit:
• graduate admission application and application fee
• official transcript from each college or university attended
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, aptitude demonstrated through professional experience or additional postbaccalaureate education is considered.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates are prepared for a career in the aviation industry and have the foundation needed for further advanced study. They also have the technical and professional skills necessary for leadership positions in the aviation industry.

Technology (Management of Technology), MSTech (TSMRMSTECH)

College/School: Ira A. Fulton Schools of Engineering

Campus: Polytechnic

ASU is no longer accepting new students to this program. Interested students should apply to the Management of Technology, MS program.

Program description

As the nature of work continues to change, the world needs new kinds of leaders who can balance the demands of business, technology and innovation. The Master of Science in Technology program with a concentration in management of technology was created for this purpose.

In this program, you develop a foundation in business and develop insights into the implications and impact of technology. The flexibility in course options enables you to gain new capabilities, and by integrating these disciplines, you learn to transform industries.

You also acquire a foundation in leadership and managerial skills to complement your existing technical skills. The program then adds innovation strategy, data-driven decision-making, and entrepreneurial skills that companies need to compete in future economies.

Finally, you choose classes in your areas of interest that mix hard and soft skills in critical areas of interdisciplinary data science; sustainable enterprises; social, entrepreneurial and disruptive innovation; enterprise logistics and operations; or advanced technologies such as smart manufacturing and engineering, artificial intelligence or blockchain technology industries.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Engineering (Electrical Systems), BSE

Technological Entrepreneurship and Management, BS

Engineering (Robotics), BSE

Engineering (Automotive Systems), BSE

Engineering (Mechanical Engineering Systems), BSE

Global Management, BGM

Technological Leadership, BS

International Trade, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a portfolio, or
30 credit hours including the required applied project course (TMC 593)

Required Core (3 credit hours)
OMT 570 Advanced Project Management (3)

Concentration (12 credit hours)
OMT 520 Strategic Management of Technology (3)
TEM 501 Technological Innovation and Entrepreneurship (3) or FSE 501 Technology Entrepreneurship (3)
TEM 505 Data-driven Decision Making (3)
TEM 531 Disruptive Innovation and Technological Evolution (3)

Electives (12 or 15 credit hours)

Culminating Experience (0 or 3 credit hours)
portfolio (0)
TMC 593 Applied Project (3)

Additional Curriculum Information
Graduate courses from other majors may be selected with approval from the student's graduate advisory committee; these additional courses are selected to support the student's individual career goals and perceived needs. To ensure that all courses taken fit into the plan of study, all students are expected to discuss their tentative plan with their program advisors before registering for their first class, and they must have an approved plan of study on file by the completion of nine credit hours toward the degree.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a STEM field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution or in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:
• graduate admission application and application fee
• official transcripts from each college or university attended
• personal statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Global Launch (https://globallaunch.asu.edu/learn-english/online-english/english-for-admission) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Demonstrate the ability to analyze, design and implement solutions to management of technology problems through applied practice
Demonstrate an ability to communicate complex management of technology solutions effectively
Demonstrate ability to work as an integral team to identify, plan and execute technology-based projects

Career opportunities

The MSTech program with a concentration in management of technology is tailored to individual professional goals, ensuring that each graduate not only obtains basic leadership and management skills, but also is ready to excel in an array of tech leadership roles. Program alumni currently work in fields such as:

artificial intelligence data analytics
manufacturing
marketing
operations management
product management
project management

QA
startup founding

Global Futures, Rob Walton College of

Applied Ethics and the Professions (Biomedical and Health Ethics), MA (LAAEPMEMA)

College/School: Rob Walton College of Global Futures

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

Medicine is infused with moral values and is deeply embedded in a variety of social and cultural contexts, which significantly determine the effectiveness of medical care in achieving healthy outcomes for patients and populations. The objective of the biomedical and health ethics concentration in the Master of Arts program in applied ethics and the professions is to integrate academic and clinical dimensions of moral issues with medical practice and biomedical research.

You are exposed to the internal and external logics of medicine, health care and biotechnology, and you gain substantive understanding of ethical, cultural and societal issues in a variety of domains through coursework and other experiences. You deliberate individually and collectively about a wide range of issues and problems in contemporary medicine and the history of medicine; develop advanced critical normative reasoning and judgment capacities; and cultivate effective communication skills for academic, clinical and policy contexts.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (AEP 593)

Required Core (3 credit hours)
AEP 501 Practical and Professional Ethics (3)

Concentration (3 credit hours)
BIO 516 Foundations of Bioethics (3)

Concentration Electives (18 credit hours)

Culminating Experience (6 credit hours)
AEP 593 Applied Project (6)

Additional Curriculum Information
Electives are related to the concentration study. Students must request approval from the chairperson of the degree program prior to selecting elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a

regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement of interest and qualification
• resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Applied Ethics and the Professions (Science, Technology and Ethics), MA (LAAEPSEEMA)

College/School: Rob Walton College of Global Futures

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The science, technology and ethics concentration of the Master of Arts program in applied ethics and the professions focuses on the ethical issues that arise from the multiple challenges involved in balancing economic, technological, environmental, social and cultural development in a world increasingly affected by science and technology. The program provides you with a general background in ethics and ethical systems, with an emphasis on ethical issues in science and technology. You also be exposed to new challenges posed by rapidly evolving sociotechnical systems in such areas as:

• energy, environment and development
• genetic engineering and biotechnology
• information and communication technology
• nanotechnology
• risk assessment
• technology and security

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (AEP 593)

Required Core (3 credit hours)
AEP 501 Practical and Professional Ethics (3)

Concentration (3 credit hours)
HSD 598 Special Topics (3)

Concentration Electives (18 credit hours)

Culminating Experience (6 credit hours)
AEP 593 Applied Project (6)

Additional Curriculum Information
Electives are related to the concentration study. Students must request approval from the chairperson of the degree program before selecting elective coursework. Students should consult their advisor regarding the approved topic for HSD 598.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• personal statement of interest and qualification
• two letters of recommendation
• proof of English language proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Applied Mathematics for the Life and Social Sciences, PHD (LAAMLPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Doctor of Philosophy program in applied mathematics for the life and social sciences focuses giving you the training needed to analyze and more definitively answer questions about underlying patterns hidden within human health, behaviors and experiences --- and to teach others to do the same.

Under the transdisciplinary instruction of national experts from five schools at ASU, you learn new applications for tools such as agent-based models, evolutionary computing, geographical information systems, machine learning, multi-objective optimization, nonlinear dynamical systems and stochastic processes. In doing so, you not only reveal new categories and ways of understanding the material, but also highlight the need for scientists and professionals quantitatively trained in the life and social sciences.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
AML 610 Topics in Applied Mathematics for the Life and Social Sciences (3)
AML 612 Applied Mathematics for the Life and Social Sciences Modeling Seminar (3)

Other Requirements (15 credit hours)
ASM, AML or BIO: courses in evolution, ecology or social sciences (400 level or above) (3)*
one graduate-level course in biostatistics (3)*
one graduate-level School of Mathematical and Statistical Sciences course approved by graduate chair (3)
APM, AML, MAT 590 or 790 Reading and Conference (6)

*Substitution courses may be acceptable with approval of director.

Electives (39 credit hours)

Research (12 credit hours)
AML 592 or 792 Research (12)

Culminating Experience (12 credit hours)
AML 799 Dissertation (12)

Additional Curriculum Information
Electives must include six credit hours of life sciences and six credit hours of social sciences.

Once the 15 credit hour requirement in the Other Requirements section has been fulfilled, other courses from that category may be taken as electives.

Students must register for research credit (AML 592 or 792) supported by their participation in one of two summer programs, Mathematical and Theoretical Biology Institute or J. Bustoz Math-Science Honors Program, sponsored by the Simon A. Levin Mathematical, Computational and Modeling Sciences Center. Up to three credit hours of research per summer may be applied based on hours and level of participation with approval from the graduate chair and the summer program director.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework are made up of electives to reach the required 84 credit hours.

All students must maintain an average GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution. A master's degree in the social sciences (e.g., anthropology, gender studies, geography, sociology), life sciences or related fields (e.g., biology, ecology, genomics), applied mathematics, mathematics or statistics is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement outlining educational and professional goals
• current curriculum vitae or resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants may submit an optional scholarly writing sample, not to exceed 30 double-spaced pages, to be included with their application materials.

Before admission, students should have completed, at the undergraduate junior or senior level, a minimum of the following:

• 15 credit hours of mathematics or statistics
• nine credit hours of life sciences and social sciences coursework at the senior or graduate studies level
• no fewer than three credit hours each of life sciences and social sciences coursework

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

The need for scientists and professionals with expertise in the life and social sciences is strong in Arizona and the nation. The skills emphasized in this program --- applied use of mathematics, modeling, statistics and simulation methodologies --- are in high demand, and graduates are well positioned to pursue opportunities as academics and professionals.

Graduates are prepared to enter the environmental, life, health, mathematical and social science fields. They have the quantitative, scientific and analytical skills that are critical for professionals working in these areas.

This program creates entirely new opportunities, while building on mathematical foundations and in-demand career paths long established in fields such as:

- bioinformatics
- computational sciences
- data mining
- ecology
- genomics
- mathematical analysis
- mathematical epidemiology
- nonlinear dynamics
- population dynamics
- social science

Biomimicry, Certificate (LABMYGRCT)

College/School: Rob Walton College of Global Futures

Campus: Online

Program description

The graduate certificate in biomimicry, the practice of emulating nature's strategies for human designs, is offered in conjunction with The Biomimicry Center (https://globalfutures.asu.edu/biomimicry-center/) in cooperation with Biomimicry 3.8, the internationally recognized leader in the field.

If you have an established career and wish to integrate biomimicry into your profession, the program is well-suited for you.

The program enables you to delve into the core fundamentals of biomimicry, such as Biomimicry Thinking and Life's Principles, with the intention to apply the knowledge and tools to your specific interests or discipline. You have the opportunity to explore the application of these core fundamentals in your discipline, field or area of interest during the biomimicry Virtual Design Lab as your culminating project.

You have the ability to work toward innovative and sustainable solutions within your discipline by emulating nature's time-tested sustainable solutions evolved over the last 3.8 billion years.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (13 credit hours)
BMY 501 Essentials of Biomimicry (1)
BMY 502 Life's Principles (4)
BMY 503 Biology Taught Functionally (4)
BMY 504 Biomimicry Thinking (4)

Other Requirement (2 credit hours)
BMY 530 Virtual Design Lab Practicum (2)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program

Applicants must submit the following:
• graduate admission application and application fee
• official transcripts
• a completed and uploaded questionnaire
• curriculum vitae or resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-biomimicry/) for program descriptions and to request more information.

Global opportunities

Global experience: The biomimicry program offers a distinct global network of participants (approximately 30% are international students). In addition to multiple collaboration opportunities across the program with a diverse set of peers, students can custom design one or more of their practicum courses to include study abroad.

Study abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Professionals can help bring about positive change with the specialized knowledge and skills acquired in the biomimicry program.

Graduates complete the program having gained a biomimicry specialty, enhancing their graduate degree and improving their career prospects. The program also expands graduates' existing professional experience. The certificate can complement virtually any career path, including business, technology, science, education or government, enabling graduates to stand out in a sea of job applicants.

Biomimicry, MS (LABMYMS)

College/School: Rob Walton College of Global Futures

Campus: Online

Program description

The world's only Master of Science program in biomimicry is offered in conjunction with The Biomimicry Center (https://globalfutures.asu.edu/biomimicry-center/), in cooperation with Biomimicry 3.8, the internationally recognized leader in the field.

Biomimicry, the practice of emulating nature's strategies for human designs, empowers change agents passionate about a world mentored by life's genius to work toward innovative and sustainable solutions to pressing global challenges. It involves exploring the way business is conducted, buildings and products are designed, governments operate, health care is provided, goods are manufactured and how future generations is educated --- all inspired by nature's time-tested sustainable solutions developed over the last 3.8 billion years.

Through the program's curriculum, you focus on this emerging field, with a sustainability emphasis. You complete core content and elective courses, and you also gain biomimicry experience in biome-based applications, business case studies and biological strategy research; in addition, you complete a self-designed biomimicry project in your chosen career field.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours and a portfolio

Required Core (14 credit hours)
BMY 501 Essentials of Biomimicry (1)
BMY 502 Life's Principles (4)
BMY 503 Biology Taught Functionally (4)
BMY 504 Biomimicry Thinking (4)
BMY 505 The Ethos of Biomimicry: A Pathway from Practice to Philosophy (1)

Electives or Research (10 credit hours)

Other Requirements (6 credit hours; choose 3)
BMY 530 Virtual Design Lab Practicum (2)
BMY 580 Topic: BioBrainstorm Practicum (2)
BMY 580 Topic: Biomimicry Case Study Practicum (2)
BMY 580 Topic: Biomimicry Genius of Biome Practicum (2)

Culminating Experience
portfolio

Additional Curriculum Information
For electives or research, students should contact the academic unit for the approved course list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Training in biomimicry offers a toolkit of transferable skills that enhance work in any field, especially STEM, design, business and sustainability. Graduates engage and lead others within their organization or communities by practicing and demonstrating world-class biomimicry. Opportunities include leading research groups focused on biomimicry thinking, developing in-house training and biomimicry tools for companies, becoming a biologist at the design table, directing sustainability efforts, and leading public engagement initiatives for communities seeking sustainable

solutions. Graduates are prepared to facilitate the practice of biomimicry across corporate, government, education and nongovernmental organization sectors.

The knowledge and skills gained can also lead to initiating or transforming a consulting practice into the field of biomimicry. Biomimicry helps set professionals apart, brings about positive change and complements any career path.

Biomimicry is a transdisciplinary, transformative field, and the unprecedented challenges the world faces today demand new thinking, perspectives, tools and solutions. Training in biomimicry distinctly positions one for careers and opportunities that don't yet exist but that the world is demanding.

Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Coastal and Marine Science and Management, MS (GFCMSMMS)

College/School: Rob Walton College of Global Futures

Campus: Online

The accelerated master's option is anticipated to be available starting in the 2027-28 academic year.

Program description

The Master of Science program in coastal and marine science and management provides you with core knowledge and professional skills needed to ensure success as part of the next generation of scientists, resource managers, community leaders, policymakers, innovators, researchers and educators prepared to support and sustain resilient coastal and marine ecosystems for the future.

The program prepares you with skills in context-specific and solutions-oriented research, geospatial and statistical data analysis, and written and oral communications, which are needed to lead your communities and organizations, locally and globally, in the stewardship of coastal and marine resources. Through program coursework and the culminating experience, you have the option to conduct use-inspired research and work within communities and both government and nongovernmental agencies on solutions-based projects focusing on coastal and marine science and management, in turn supporting societal needs and the university's mission.

One of the benefits of the program is the opportunity for you to gain additional experience through offerings at the ASU Bermuda Institute of Ocean Sciences (https://bios.asu.edu/) and Center for Global Discovery and Conservation Science (https://globalfutures.asu.edu/gdcs/) in Hawai'i.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Ocean Futures, BS

Ocean Futures (Coastal and Marine Science), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required capstone course (SEA 597)

Required Core (6 credit hours)
SEA 505 Current Topics in Ocean Futures (3)
SEA 585 Graduate Ocean Futures Workshop (3)

Electives and Research (18 credit hours)
electives (15)
quantitative electives (3)

Other Requirements (0 or 3 credit hours)
SEA 596 Ocean Futures Capstone Prep (3)

Culminating Experience (3 or 6 credit hours)
SEA 597 Graduate Ocean Futures Capstone (3) or
SEA 599 Thesis (6)

Additional Curriculum Information
Students choose one of two culminating experience options, the thesis or the capstone. Most students in the program will pursue the capstone and will need to take three credit hours of SEA 596 in preparation for the capstone course. Students who would like to pursue the thesis will need to have an approved faculty advisor upon entry into the program or very early in the program, and they will need to gain the support of two additional faculty members to be part of their supervisory committee. For electives, students should see the academic unit for approved coursework that supports their educational and career objectives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in biological sciences, ecology, environmental sciences, environmental studies, geography, marine science, natural resource management, oceanography, sustainability, urban planning, geography or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• two letters of recommendation
• written statement
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The written statement should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from two people who can attest to the applicant's academic and professional achievements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/coastal-marine-science-management) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply appropriate quantitative methods in their research and data analysis and develop a final culminating experience that designs solutions in support of the advancement of healthy coastal communities and marine systems.
- Write a decision analysis, resulting in a final report with recommendations for action and additional research to support solutions to coastal and marine management issues.
- Communicate the value for solutions to coastal and marine sciences management when communicating with stakeholders/rights holders.

Global opportunities

Global experience: Study abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Beyond these, students in the MS program in coastal and marine science and management have special opportunities to enhance their learning in locations like Bermuda and Hawai'i.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

With the increasing recognition that global oceans and coastal communities play a critical role in protecting future well-being, marine professionals are in high demand across many sectors and industries, including county, state and federal agencies, as well as nongovernmental and community organizations. Those with expertise in areas such as coastal and marine ecosystem science, social and economic system science, natural resource policy and management, land-sea interactions, marine tourism, community-based stewardship, fisheries science and coral reef restoration are valuable to businesses and institutions looking for the next generation of leaders to steward coastal and marine resources.

Career paths include:

- community planner
- conservation manager
- educator
- environmental consultant
- environmental scientist
- marine scientist
- natural resource manager
- researcher

Complex Adaptive Systems Science, Certificate (SUCASGRCT)

College/School: Rob Walton College of Global Futures

Campus: Downtown Phoenix, Polytechnic, Tempe

Program description

Complex adaptive systems science is the study of interactive and dynamic systems that change over time, producing= their own emergent properties. The complex adaptive systems science graduate certificate can be pursued along with= any doctoral degree program at Arizona State University. You pursue your chosen field of study while addressing= intricate global challenges.

Complex adaptive system concepts and methods provide a common language that enables the interdisciplinary= collaborations required for coming to grips with the intellectual and societal challenges of today's world. The program= trains you to be a part of the next generation of scientists researching advanced concepts and methods that are= necessary for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with= diverse, ongoing university-wide research on complex adaptive system science at ASU and emphasizes the value of a= complex adaptive systems perspective to give science better insight and a more active role in seeking solutions to a= broad array of critical issues facing society today. You become fluent in the common language of complexity while also= receiving a solid foundation in the domain knowledge of existing academic disciplines.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (3 credit hours)
CAS 570 Fundamentals of CAS Science (3)

Electives (12 credit hours)
approved course on methods for complex adaptive system science (3)
approved course on mathematics for complex adaptive system science (3)
approved course on applying complex adaptive systems science in the student's field of study (3)
research or dissertation applying complex adaptive system science approaches in the student's doctoral research electives (3)

Additional Curriculum Information
Students should contact the academic unit about appropriate coursework. Students pursuing the certificate must have a complex adaptive systems science faculty member on their supervisory committee. They must also take three research hours in their doctoral discipline with a complex adaptive systems science faculty member.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they are either enrolled in or accepted into an ASU doctoral degree program and they must be in good standing within the program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• letter of support from an ASU faculty member (for existing ASU students) or other faculty member (for incoming students)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Career opportunities

A complex systems approach to the program means graduates possess the ability to understand the interconnections within and between technological, economic, societal, biomedical and environmental systems and have developed advanced digital skills like modeling and network science. This gives them an edge in diverse careers in science, technology and data analytics, especially compared with peers in their field of study who lack such expertise.

Graduates who hold this certificate can apply the skills learned to any field or profession, although advanced degrees or certifications may be required. Career area examples include:

- business intelligence analytics
- consulting
- corporate social responsibility and sustainability
- data and microsystem engineering
- data science
- education
- military intelligence systems
- nongovernmental and nonprofit work
- policymaking in government and regulatory agencies
- research and development

Complex Adaptive Systems Science, PHD (GFCASPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

Complex adaptive systems science serves as a common language to fuse different intellectual disciplines and promote the transdisciplinary collaborations needed to confront the intellectual and societal challenges of the modern world. Rather than focus on specialized understanding of a limited suite of phenomena, as is common in most academic disciplines, complex adaptive systems science emphasizes the multidimensional interconnections among phenomena comprising dynamic, evolving systems. Many of the systems most critical to human life and society can be understood and studied in this way, including cells, organisms, populations, ecosystems, societies and technologies.

The Doctor of Philosophy program in complex adaptive systems science prepares you to be fluent in the language, concepts and methods of complexity needed to enable this innovative and valuable approach to the complexly coupled human and natural world. By embracing this complex systems perspective on human and natural systems --- and,

importantly, the multidimensional interconnections between them --- you become an advocate for and global leader of a new kind of science that has the potential to fundamentally transform science, scholarship and society.

ASU is an international leader in complex adaptive systems science. The first of its kind, the School of Complex Adaptive Systems represents the world's leading concentration of researchers in the field --- with more than 100 participating ASU faculty across more than 10 academic units; a growing constellation of research centers; its partner institution, the Santa Fe Institute, with its resident and external faculty; as well as the collaboration with Decision Theater (https://dt.asu.edu/) at ASU.

Together with Decision Theater, the School of Complex Adaptive Systems is pioneering dynamic decision environments that simulate, visualize and analyze real-world complexity with digital twins and data-driven decision-support tools. This partnership provides you with hands-on learning, transdisciplinary teamwork and real-world impact in areas such as workforce transformation, health equity and resilient development under the guidance of world-class faculty.

The collective faculty and partnerships inside and outside ASU offer you a new, advanced doctoral degree program that is distinct in both its scope and level of expertise. You benefit from the knowledge of this large group of researchers, with its distinct combination of theoretical foundations, advanced methods and practical applications in complex adaptive systems science.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)
CAS 570 Fundamentals of CAS Science (3)
CAS 571 Applications of Complex Adaptive Systems (3)

Focus Area (6 credit hours)

Electives (48 credit hours)

Research (12 credit hours)
CAS 792 Research (12)

Culminating Experience (12 credit hours)
CAS 799 Dissertation (12)

Additional Curriculum Information
All doctoral students receive rigorous, advanced training in complex adaptive systems science concepts and methods. The program offers two educational and career pathways.

Domain science focus area: Students enhance complex adaptive science education with in-depth training in a social, life or physical science field or engineering field. This enables them to make significant contributions to their chosen domain science field from the perspective of complex adaptive systems science.

Transdisciplinary bridging focus area: Students enhance their complex adaptive systems science education with knowledge of two or more social, life, or physical science fields or engineering fields. They also may augment this with advanced training in computer science and data science. The goal of this focus is to enable students to use a complex adaptive systems science perspective and framework as a bridge to intellectual fusion across multiple disciplines by applying advanced knowledge of complex adaptive systems science theory, data science and information technology.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• writing sample
• three letters of recommendation
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, note how completion of the degree will support their long-term career goals, and explain why they are applying to the Rob Walton College of Global Futures --- and, more specifically, the doctoral program in complex adaptive systems science. The statement of intent should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Applicants need to provide a writing sample that demonstrates graduate- or professional-level writing.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Study abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites include information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Graduates with knowledge and skills in complexity science have a solid foundation for understanding risk and security. They can help develop solutions to complicated challenges in fields such as sustainability, finance, social and ecological sciences, life sciences, biomedical sciences, geophysical sciences and computer science.

Complex Systems Science, MS (GFCMPXSSMS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

Most systems are complex. This means that through the interaction between their parts, these systems exhibit emergent properties and unintended consequences.

The curriculum in the Master of Science program in complex systems science focuses on developing skills in theoretical foundations, modeling, problem-solving, critical thinking, and the importance of direct experience through research or related activities. You cultivate the ability to approach complex problems through analysis and modeling and by identifying issues, asking questions and collaborating with others to create effective solutions.

Knowledge and skills you gain in the program include:

• business enabler skills such as project management, decision-making, visualization and data communication
• digital building block skills such as artificial intelligence and data analytics, big data and data management, software development and information security
• domain knowledge in areas such as strategy, economics, marketing, communications and public relations, talent development and human resources, research and design, and product development
• human skills such as critical thinking, creativity, analytical reasoning, communication and collaboration

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work

authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours including the required applied project course (CAS 593)

Required Core (15 credit hours)
CAS 501 Fundamentals of Complex Systems Science: Evolution (3)
CAS 502 Fundamentals of Complex Systems Science: Computation (3)
CAS 503 Fundamentals of Complex Systems Science: Collectives (3)

Students choose two:
CAS 520 Agent Based Modeling (3)
CAS 521 Methods for Complex Systems Science: Network Analysis (3)
CAS 522 Methods for Complex Systems Science: Dynamical Systems (3)
CAS 523 Methods for Complex Systems Science: Statistics and Dimensionality Reduction (3)

Electives (9 credit hours)

Culminating Experience (6 credit hours)
CAS 593 Applied Project (6)

Additional Curriculum Information
The applied project is a modeling and research project in any of the applied or foundational areas of complex systems science. Students define this project with a faculty mentor and apply a selection of methods covered in the methods courses to a dataset. The applied project also involves the creation of a portfolio of student accomplishments.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• written statement
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/complex-system-science-masters/) for program descriptions and to request more information.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Complex adaptive system concepts and methods serve as bridges between disciplines, providing a common language that enables the interdisciplinary collaborations necessary to come to grips with today's intellectual and societal challenges.

A complex systems approach gives graduates the ability to understand the interconnections within and between technological, economic, societal, biomedical and environmental systems. Graduates have gained advanced digital skills, such as modeling and network science. They are fluent in the language of complexity and have a solid foundation in the domain knowledge of existing academic disciplines. All of this gives them an edge in diverse careers in science, technology and data analytics, especially compared with peers in their field of study who lack such expertise.

Graduates in complex systems science can apply their skills in many areas and professions, and make a difference through innovative and creative methods. Possible career areas include:

- business intelligence analytics and data science
- consulting
- corporate social responsibility and sustainability
- data and microsystem engineering
- education
- environmental systems
- natural or health science management
- nongovernmental and nonprofit work
- policy-making in government and regulatory agencies

- research and development

Energy and Sustainability, Certificate (SUERGSGRCT)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The global energy system is a complex sociotechnical system. Leaders in sustainable energy must have a= transdisciplinary perspective that combines technical, economic, social and policy dimensions of energy systems.

If you are in a graduate level, energy-related field, even with an unrelated academic background, the certificate= program in energy and sustainability trains you to see beyond the boundaries of traditional methodologies and= disciplinary viewpoints, enabling you to integrate technological knowledge with societal insights.

As a graduate of the certificate program, you'll have a basic understanding of sustainable energy technology and= systems, as well as social dimensions, such as markets and policies. You'll understand energy transitions as a dynamic= sociotechnical process; and you'll be able to perform analyses of energy generation, consumption and costs, and how= these metrics can be utilized in policy discussions.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (6 credit hours)
SOS 572 Sustainable Energy Transitions (3)
SOS 574 Data Analytics for Sustainable Energy (3)

Electives (9 credit hours)
technical fundamentals of energy systems elective (3)
policy and governance of energy systems elective (3)
restricted elective (3)

Additional Curriculum Information
Students should contact the academic unit for the most recent approved elective coursework. Other coursework may= be used with approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

Future energy challenges will be addressed by leaders who understand the complexity and dynamics of global energy systems and can communicate with diverse stakeholders to implement adaptive solutions. Graduates with this certificate are competitive for employment opportunities in academia, industry or government.

Career examples include:

- policy analyst
- project manager
- regulatory affairs specialist
- renewable energy engineer
- strategy consultant

Environmental and Sustainability Economics, Certificate (SUESECGRCT)

College/School: Rob Walton College of Global Futures

Campus: Downtown Phoenix, Polytechnic, Tempe

Program description

The graduate certificate program in environmental and sustainability economics provides you training in the economic= theory and quantitative modeling approaches of environmental and resource economics. Environmental and resource= economics offers an approach for evaluating the consequences and social benefits and costs of changes to markets= and environmental policies.

You are able to identify and evaluate the economic assumptions embedded in policy analyses and recommendations.= You are also able to critically evaluate the validity of publications in environmental and resource economics, apply= economic modeling approaches to real-world cases, utilize econometric techniques to evaluate causal claims and= generate predictions, and test hypotheses using applied economic models.

You may be interested in this certificate if you are a current master's and doctoral student in a field with a= sustainability, environmental science, or policy focus --- including sustainability, public affairs, biology, environmental= social science, applied mathematics and agribusiness --- in which training in environmental and resource economics= may be complementary to research interests or career development. To pursue this certificate, you must be= concurrently enrolled in a graduate degree-granting program.

STEM-OPT extension eligible: No

Degree requirements

17 credit hours

Required Core (5 credit hours)
SOS 512 Environmental and Resource Economics (3)
SOS 529 Research Seminar in Environmental and Sustainability Economics (1)

Electives (12 credit hours)

Additional Curriculum Information
SOS 529 is taken twice to meet the five credit hours required.

Students choose one elective course in each of the following categories: microeconomic theory, statistical and= econometric modeling, environmental and resource economics, and modeling and empirical methods. Students should= see the academic unit for a list of approved electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

There is no prerequisite coursework; however, it is strongly recommended that students have at least one semester of calculus or the equivalent such as MAT 251 Calculus for Life Sciences, MAT 265 Calculus for Engineers I or SOS 211 Calculus and Probability for the Life and Social Sciences.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Food Policy and Sustainability Leadership, Certificate (SUFPSLGRCT)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

The certificate program in food policy and sustainability leadership trains you in food policy, including understanding= policymaking and developing specific, master-level skills that enable you to effectively navigate legislative, budgetary= and administrative governmental processes. You're empowered to grapple with modern food system complexities and= become an effective agent of change.

You are exposed to contemporary food policy issues, and choose an issue to specialize in with faculty assistance. You= participate in research projects and professional presentations that contribute to food policy knowledge among= sustainable food system advocates.

The program includes two weeklong experiences to engage in food systems, the first of which is in Arizona. You have= the opportunity to talk with and learn from farmers, ranchers and supply chain businesses about how food and= agriculture policies and programs impact their operations. The second is a seminar in Washington, D.C. You gain= knowledge of leadership theories, develop leadership skills, and engage in conversation with influential food policy= leaders from a variety of sectors.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours including the required capstone course (SFS 565)

Required Core (12 credit hours)
SFS 560 Tools and Tactics for Food Policy Change (3)
SFS 561 Food and Farm Immersion Experience (2)
SFS 562 Managing Natural Resources for Food Production (3)
SFS 563 Applied Food Policy Immersion Experience (2)
SFS 564 American Agriculture in the Global Context (2)

Culminating Experience (3 credit hours)
SFS 565 Research Methods and Analysis (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• two letters of recommendation
• professional resume
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa must apply to and be accepted into a graduate program before they will be considered for admission to the certificate program. International students who are residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for this certificate program.

The personal statement should not exceed 1,500 words, and it should describe a food policy issue of interest to the applicant and explain why the applicant thinks that engaging in policy is important as it relates to this issue.

Applicants should have a minimum of two years of professional or organizational experience in food and agriculture.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

Futures and Design, MS (GFFDMS)

College/School: Rob Walton College of Global Futures

Campus: ASU at Mesa City Center

ASU is not currently accepting applications for this program

Program description

The Master of Science program in futures and design combines future-focused theories and practices, including speculative design, science fiction and foresight studies, to investigate and craft alternative futures. You learn a range of future-oriented theories and methods used by organizations today and invent the theories and methods of tomorrow. You explore a variety of epistemological perspectives and experiential processes to systematically define complex problems and explore robust strategies of change. In doing so, you diversify your critical thinking and problem-solving skills.

Drawing from social theory, innovation studies and design science, the program develops your capacity to envision new futures across scales of complexity, including objects, platforms, services, organizations and systems. You work in transdisciplinary teams with professional partners from industry and the community to produce compelling visions of that future in diverse media.

The MS program in futures and design is offered by the transdisciplinary School of Innovation Futures. One of the benefits of this program is the opportunity to learn within the Media and Immersive eXperience Center (https://herbergerinstitute.asu.edu/degree-programs/mix-center-graduate-degrees), which offers emerging media technologies and collaborative engagement with the community.

STEM-OPT extension eligible: No

Degree requirements

33 credit hours including the required applied project course (HSD 593)

Required Core (15 credit hours)
HDA 581 Emerging Media Colloquium (3)
HSD 550 Prototyping Futures (3)
HSD 551 Future-Focused Research Methods (3)
HSD 552 Worldbuilding and Imagination (3)
HSD 555 Strategic Design Futures (3)

Electives (9 credit hours)

Other Requirements (3 credit hours)
DSC 584 Internship (3)
DSC 590 Reading and Conference (3)
DSC 592 Research (3)
HDA 580 Practicum (3)
HSD 584 Internship (3)
HSD 590 Reading and Conference (3)
HSD 592 Research (3)

Culminating Experience (6 credit hours)
HSD 593 Applied Project (6)

Additional Curriculum Information
Students take the one credit hour course HDA 581 Emerging Media Colloquium three times to attain a total of three credits for the course.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirement of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures Study Abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

There is an increasing demand for professionals who are trained in navigating uncertainty, design thinking and strategic coping with disruptive change --- key skills that graduates of this program are equipped with. In fact, one of the core methods covered in the program --- scenario planning --- was listed by Bain and Company as one of the top 25 management tools in 2023 (https://www.bain.com/insights/management-tools-scenario-and-contingency-planning/). Harvard Business School has identified anticipation as an essential skill of a strategic leader.

Some career examples include:

- director of futures strategy
- futurist
- global trends manager
- growth strategist
- ideation leader
- issues manager
- principal foresight researcher
- strategic planner

Global Development and Innovation, Certificate (FIGDIGRCT)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

The graduate certificate program in global development and innovation responds to the gap in knowledge and skills= that development practitioners around the world often struggle with. It provides current and critical perspectives as= well as analytical and practical skills for addressing some of today's most pressing global challenges, including

inequality, sustainability and poverty.

You acquire an understanding of the main debates in global development, and you learn how to engage in informed and critical ways with professionals from a variety of development backgrounds to challenge development orthodoxies. You learn how to approach development problems with creativity and confidence, and work collaboratively to address current global issues.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (3 credit hours)
GTD 511 Development Policy and Practices (3)

Electives (12 credit hours)

Additional Curriculum Information
Students complete 12 credit hours of electives: six credit hours of courses focused on global development and six credit hours of other elective courses that are relevant to the certificate. No more than three one-credit courses may count toward the 12. The electives can change over time as needed with unit director approval. For a current and complete list of approved electives, students should see their academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution or the equivalent from an international institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• personal statement
• resume
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Acceptable proof consists of a TOEFL iBT® score of at least 4, or a score of 80 (taken at a testing center) if taken before January 21, 2026; an IELTS overall band score of at least 6.5 with no band below 6.0; or a Pearson Test of English score of at least 60.

International students who need an F-1 or J-1 visa first need to apply to and be accepted to a master's degree or doctoral degree program before being considered for the certificate program. International students residing in the

U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/global-development-and-innovation-graduate-certificate/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify and analyze competing theories and practices on global development and innovation.
- Communicate global development policies, the practice of development, and actual outcomes.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

This certificate program may be paired with graduate degree programs, enabling graduates to pursue a variety of careers. Professionals with an understanding of the main debates in development are in high demand across a wide range of global development agencies, including nongovernmental organizations, civil society, foundations, industries and philanthropic organizations.

Career examples include:

- data analyst
- development field researcher
- development planner
- development program associate
- gender specialist in nongovernmental organizations
- organizational consultant
- organizational development specialist
- poverty policy analyst
- social entrepreneur

Global Technology and Development (Applied International Development), MS (FIGTDAIDMS)

College/School: Rob Walton College of Global Futures

Campus: Online

This program is no longer offering the business specialization option.

Program description

The Master of Science program in global technology and development with a concentration in applied international development is a program focused on policies and practices in the development field and includes specializations provided by other units across the university.

The program offers an interdisciplinary social science curriculum and trains you with diverse undergraduate degrees, backgrounds and experiences. Highly customizable, the program allows you, at any stage in your career, to develop and enhance your skills in planning, management, analysis and evaluation in development practice.

You select an area to specialize in, such as education, sustainability, health, management, public policy or community development, where you can directly apply your knowledge to a relevant sector. Learning outcomes emphasize the utilization of skills and experience that you already possess, and enhanced abilities in analysis, critical thinking and the application of knowledge to development-related challenges. Through a wide variety of research, policy and special topics courses, you are prepared to finish the degree program with an applied project of your choosing that explores a critical aspect of global development and an applied solution for impact.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (GTD 593)

Required Core (3 credit hours)
GTD 511 Development Policy and Practices (3)

Concentration (9 credit hours)
GTD 501 Global Technology and Development (3)
GTD 503 Technology and the International Political System (3)
GTD 504 Technology and Development in Zones of Conflict (3)
GTD 505 Social Science Inquiry for Global Development (3)
GTD 506 Applied Project Methods in Global Development (3)
GTD 508 Technology and Development in Latin America (3)
NLM 520 Financial and Resource Management (3)
NLM 530 Program Evaluation and Information Management (3)

Specialization Electives (15 credit hours)

Culminating Experience (3 credit hours)
GTD 593 Applied Project (3)

Additional Curriculum Information
Students select three courses from the concentration list for a total of nine credit hours.

Students may take elective courses in an area of interest from a variety of academic programs such as education, sustainability, health, management, public policy and community development. Students should see the academic unit for available specializations and approved course list.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in global development, education, business, health, management, community development or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent or written statement
• resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A statement of purpose of one to two pages is required for admission. While the GRE is not required, the statement of purpose is a significant factor in the application process, and it should address the background and capabilities of the applicant as well as the applicant's interest in the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/global-technology-development-applied-international-development-ms/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Identify and articulate a current problem in global development and create relevant and focused applied research project or an applied solution.
- Identify and critique global technology and development concepts and current challenges.

- Identify current priorities in global development and critique how discourse, institutions and policies shape development outcomes.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Graduates pursue impactful and rewarding careers in international development across all sectors, working for government agencies, nongovernmental organizations, nonprofits, educational institutions, private businesses and corporations. Students learn skills that include research, writing, analysis and the ability to understand the complexity of diverse cultural, social and political contexts. These skills and abilities transfer to a myriad of career pathways, since they are in demand from organizations across industries. Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Career examples include:

- analyst (research, project, technical, data)
- consultant (fundraising, marketing, information technology)
- coordinator (environmental, health, safety, operations)
- educator (instructional design, teacher, instructor)
- manager (product, project, security, business, program, information technology)
- project lead (humanitarian missions, information communication technology for development projects, smart city initiatives)
- researcher (higher education, government, nonprofit)

Global Technology and Development, MS (LSGTDMS)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

The Master of Science program in global technology and development is a program in international development that examines social, economic and political development and is concerned with the global disparity in wealth and access to resources between and among countries around the world.

Global in scope, the program highlights the variables of technology and innovation in these development dynamics with explicit goals to seek equity and justice and ease human suffering. The program offers you an interdisciplinary social science curriculum and trains you with diverse undergraduate degrees, backgrounds and experiences.

You have the opportunity to pursue a customized program to address social, economic and political challenges anywhere in the world. Through a wide variety of theoretical, research, policy and special topics courses, you are prepared to finish the degree program with an applied project of your choosing that explores theoretical aspects of global development or applied solutions for impact.

You develop skills in research, writing, analysis and gain the ability to understand the complexity of diverse cultural, social and political contexts. These in-demand skills and abilities transfer to a myriad of career pathways.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Technological Entrepreneurship and Management, BS

Innovation in Society, BA

Innovation in Society, BS

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (GTD 593)

Required Core (3 credit hours)
GTD 511 Development Policies and Practices (3)

Other Requirements (12 credit hours)
GTD 501 Global Technology and Development (3)
GTD 503 Technology and the International Political System (3)
GTD 505 Social Science Inquiry for Global Development (3)
GTD 506 Applied Project Methods in Global Development (3)

Restricted Electives (12 credit hours)

Culminating Experience (3 credit hours)
GTD 593 Applied Project (3)

Additional Curriculum Information
For the approved electives course list, students should contact the academic unit. Other requirement courses may be substituted with approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree from a regionally accredited college or university recognized by ASU in a related field such as political science, international relations, sociology, anthropology, economics, business, education, technology, engineering, life sciences, foreign languages or literature (i.e., topics related to global development, culture or socioeconomic institutions).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume
• proof of English language proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Letters of recommendation are optional and are not required to complete the application process.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-global-technology-development/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Identify, articulate and critique main theories of global technology and development.
Identify a current problem in global development, and create relevant and focused research questions, followed by a research design, and completed research or applied solution.
Identify current priorities in global development, and critique how discourse, institutions and policies shape development outcomes.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Human and Social Dimensions of Science and Technology, PHD (GCHSDSTPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Doctor of Philosophy program in human and social dimensions of science and technology is an intellectually rigorous program with problem-oriented research. It prepares you to teach and conduct research using humanistic and social science methods on the social, historical, philosophical and policy foundations of science and technology, as well as on their current and future interactions with society.

The curriculum responds to growing demand for transdisciplinary research in the humanities, information sciences and social sciences that can provide insights into the dynamic relationship between science, technology and society.

The program is flexible, combining a strong, integrated first-year experience with substantial freedom for you to design carefully crafted plans of study relevant to your own areas of specialization and expertise, in conjunction with your

advisors. Distinct from programs of this kind in the nation, you also learn to communicate and work with scientists, engineers, policymakers, business and community officials, or the public in conducting and applying research.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (8 credit hours)
HSD 601 HSD I: Human Dimensions of Science and Technology (4)
HSD 602 HSD II: Science, Power and Politics (4)

Electives and Research (64 credit hours)

Culminating Experience (12 credit hours)
HSD 799 Dissertation (12)

Additional Curriculum Information
This is a research degree, culminating in a dissertation, which must draw on multiple disciplinary perspectives.

Students may apply up to 30 credit hours from a prior master's degree toward the total hour requirement, upon approval of the steering committee. Each student, with his or her supervisory committee, develops a distinct plan of study, which the student's supervisory committee approves.

Each student completes a yearlong core seminar, a second-year research project, two major fields, one minor field, methods training, electives and research. Students also regularly attend the program colloquia. There are no foreign language or statistics requirements, except as needed for a particular student's selected dissertation project.

Comprehensive Examination
The written dissertation prospectus and its oral defense constitute the written and oral comprehensive examinations required by the Graduate College for advancement to candidacy. Each student develops a written dissertation prospectus, including a bibliography and discussion of relevant research skills. The student makes an oral defense of the dissertation prospectus to the supervisory committee, which must approve the prospectus. Students normally complete the dissertation prospectus and its defense in the fifth semester.

Dissertation
The dissertation represents an original body of research that contributes to existing knowledge in a significant way.

Final Examination
Upon completing the dissertation, the student makes an oral defense of the dissertation to the supervisory committee, which must approve the dissertation. The doctorate is granted upon successful completion of the oral defense and any revisions to the dissertation required by committee members.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• HSD academic record form
• a curriculum vitae or resume
• a personal statement
• a writing sample
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. In order to meet English proficiency, students must have an IELTS overall band score of at least 6.5 with no band below 6.0; or Pearson Test of English score of at least 60; or a TOEFL iBT® score of at least 4, or a score of 80 (taken at a testing center) if taken before January 21, 2026. ASU's institutional code is 4007. ASU only accepts electronic copies of the TOEFL score report.

Preference is given to students with demonstrated interest and competence in relevant areas of intellectual work.

The personal statement should be one or two single-spaced pages. It must be a statement of proposed research that clearly explains why the student feels ASU is the appropriate place to pursue their doctorate, identifies at least one faculty member whose interest or work is relevant to the student's proposed research, and describes the goals for pursuing the degree.

The writing sample should be a 10- to 25-page sample of academic writing, such as a course paper, an undergraduate thesis, or an excerpt from a master's thesis.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate foundational theories and existing literature in humanistic and social studies of science and technology and identify gaps and opportunities for future research.
Design a comprehensive research proposal to critique, analyze and explore a key issue or theme in the human and social dimensions of science and technology.
Communicate, orally and in writing, a well-developed research agenda in the human and social dimensions of science and technology.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Professionals with expertise in the human and societal dimensions of science, technology and innovation are in high demand across many sectors. Students can explore alumni employment data on theRob Walton College of Global Futures employment data page.

Most graduates have careers in academia, but a number also work in nonprofits, think tanks and government. Skills in foresight, technology assessment, implications and values of innovation, and science policy are critical for guiding businesses, institutions, governments and societies in considering and shaping the role of science, technology and innovation in their futures.

Career examples include:

director of operations
energy social scientist
executive director
information security manager
professor
research and development associate
research strategist

Innovation in Global Development, PHD (FIIGDPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Doctor of Philosophy program in innovation in global development emphasizes critical and diverse perspectives on global development and innovative policies and practices that challenge the status quo. This research-based program is both rigorous and flexible, designed to meet your needs as a student committed to a vision of development that values context, inclusivity and equity, and is socially, culturally and ecologically sensitive.

You emerge from this program equipped with the comprehensive research capabilities, critical-thinking skills, leadership skills and global perspectives that are needed to navigate complex development challenges in a way that reduces inequalities and builds a more sustainable and inclusive future.

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Global Leadership and Management, DPP

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (14 credit hours)
IGD 601 Re-Thinking Global Development (4)
IGD 602 Innovation for Inclusive Development (4)
IGD 603 Methods for Research in Global Development (4)
IGD 604 Colloquium in Innovation in Global Development (2)

Reading and Conference (3 credit hours)

Electives or Research (55 credit hours)

Culminating Experience (12 credit hours)
IGD 799 Dissertation (12)

Additional Curriculum Information
Students are required to take IGD 604 once for two credits as a core course requirement. They may take it one additional time for two more credits that can be used toward electives.

For the Reading and Conference requirement, students must enroll in IGD 790 Topic: Dissertation Prospectus.

Elective courses are chosen based on the student's area of interest and approval from their committee. Other electives may be used with approval of the academic unit.

When approved by the student's supervisory committee and the Graduate College, this program may allow up to 30 credit hours from a previously awarded master's degree to be used for this program. If students do not have a previously awarded master's degree, the remaining coursework is made up of electives and research.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in anthropology, natural resource management, agriculture development, political science, development studies, economics, development management, rural development, technology and development, sociology, science and technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• statement of research interest
• professional resume or CV
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Communicate, orally and in writing, a well-developed research agenda that includes development themes, theories, policies and practices; methodology and analysis; and conclusions for positive changes in global development.
> Identify and articulate the main theories, concepts and challenges in the field of global development in their historical and contemporary contexts, and apply them in an equitable and sustainable manner.
> Design a comprehensive research proposal, synthesize a literature review, and analyze datasets using appropriate methodology.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

The new generation of development scholars are competent in dealing with global development challenges with foresight and imagination that promote well-being and an equitable future for all. Professionals with expertise in global development are in high demand across a wide range of development agencies such as the World Bank, specialized

agencies of the United Nations, Asian Development Bank, African Development Bank, United States Agency for International Development and nongovernmental organizations.

Scholars with training in theories, concepts and debates in the field of global development are also in high demand by research institutions, think tanks, universities, development studies centers, multinational companies, foundations and governments.

Career examples include:

- development researcher
- global development consultant
- global development specialist
- government official
- leader in civil society organizations
- organization official
- poverty alleviation advocate
- professor
- program officer

Nonfiction Writing and Publishing, Certificate (LANWPGRCT)

College/School: Rob Walton College of Global Futures

Campus: Downtown Phoenix, Polytechnic, Tempe, West Valley

ASU is not currently accepting applications for this program.

Program description

The graduate certificate program in nonfiction writing and publishing teaches you the art of telling true stories. The= program is based on the belief that work done within the university is most impactful when it can be shared in a clear= and compelling way with audiences beyond your chosen fields of research.

In this interdisciplinary program, you read, study and write narrative nonfiction, including literary journalism, op-ed= pieces, explanatory essays and memoirs. You learn how to analyze the craft and stylistic decisions of professional and= literary nonfiction writers and utilize these skills in your own work.

Award-winning faculty teach you to produce vivid writing that connects with a larger public; they also teach the most= effective ways to get your writing out into the world, be it through blogs, online or print publications, trade books, or= film and television.

This program is open if you are a graduate student who wants to write eloquently, persuasively and memorably about= your research or life experiences.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (6 credit hours)
HSD/HPS/HST 520 Masters of Nonfiction (3)
HSD 521 Writing True Stories that Matter (3)

Electives (9 credit hours)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. Applicants who attended school outside of the U.S. must hold a bachelor's degree, graduate degree or equivalent from an institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours or 90 quarter hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• writing sample
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Applicants are encouraged to enroll in a graduate degree program in conjunction with this certificate but are not required to do so.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Read, analyze, and synthesize works of journalistic or literary nonfiction and create individual works based on key concepts.
> Demonstrate an understanding of nonfiction writing and publishing conventions and the ability to write for diverse nonacademic audiences.

Career opportunities

According to Forbes, storytelling is the most important skill in today's job market. Of the many sources of information in the world, people who write compelling stories are best heard.

Graduates with this skill are more attractive to employers both in academia and the private sector. Expertise in writing and storytelling are in demand in many fields, including business, media, entertainment, politics and community organizations. Strong writers and vivid storytellers are particularly valuable to businesses and institutions relying on narrative-based strategies to engage and grow audiences online.

Graduates may pair the certificate with other degrees to create stronger career opportunities.

Career examples include:

communications specialist
content strategist
editor
public relations manager or specialist
screenwriter
social media manager
video game designer

Ocean Futures, PHD (GFSEAPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Doctor of Philosophy program in ocean futures offers advanced doctoral training focused on comprehensively understanding intricate processes that govern the planet's global ocean, including threats to ecosystems and the human populations it supports. You have the opportunity to learn from and work with leading scientists and conduct use-inspired research that works toward culturally appropriate solutions for local to global stewardship for the future ocean.

The adaptable nature of the curriculum enables you to customize your electives based on your academic and professional goals. The flexibility enables you to leverage research and training opportunities by collaborating with scientific, professional and local communities, as well as stakeholders and rights holders. You build skills in context-specific and solutions-oriented research, data analysis, and communication, in turn supporting societal needs and the university's mission to enhance local impact and social embeddedness.

One of the benefits of the program is the opportunity for you to gain additional experience through course offerings and engagement opportunities at the Bermuda Institute of Ocean Sciences (https://bios.asu.edu/) and the Center for Global Discovery and Conservation Science (https://globalfutures.asu.edu/gdcs/) in Hawai'i.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
SEA 501 Exploring Ocean Futures (3)
SEA 585 Graduate Ocean Futures Workshop (3)

Electives (54 credit hours)

Research (12 credit hours)
SEA 792 Research (12)

Culminating Experience (12 credit hours)
SEA 799 Dissertation (12)

Additional Curriculum Information
Students complete 54 credit hours of electives, nine of which are 500- and 600-level SEA courses and three of which are quantitative and modeling coursework. Most students will enroll in more than 12 credit hours of research, which can be used toward the elective requirement. Electives should be selected in consultation with the student's faculty advisor (https://graduateapps.asu.edu/graduate-faculty/degree/GFSEAPHD).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in biological sciences, ecology, environmental sciences, environmental studies, geography, marine science, natural resource management, oceanography, sustainability, urban planning, geography or a related discipline or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• professional resume
• three letters of recommendation
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The personal statement should not exceed 600 words and should describe how the applicant's research and other background will contribute to success in the program and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the program, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design a research methodology that analyzes and interprets data in their research dissertation advancing the health of coastal communities and ocean systems.
Conduct a major independent research project that makes a unique contribution to the field presenting their findings in a written dissertation.
Communicate knowledge during their dissertation oral defense demonstrating the ability to explain discipline-specific concepts to multiple stakeholders.

Global opportunities

Global experience: Students in the doctorate program have opportunities to develop their research with faculty members who are working in a diverse range of locations, both locally and internationally. In particular, long-standing ASU research centers in Bermuda and Hawai'i offer faculty and logistical support for research projects in the Atlantic and Pacific regions.

Students can find additional internships and short course programs specific to their interests on the Rob Walton College of Global Futures study abroad (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/) webpage, and additional opportunities and information on the ASU Global Education Office (https://goglobal.asu.edu/) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through the Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

With the increasing recognition that global oceans and coastal communities play a critical role in protecting future human and planetary well-being, graduates of the program find employment in universities, industry, and governmental and nongovernmental organizations that require a marine science background and relevant research experience.

Career possibilities for program graduates include:

community development director
environmental consultant
marine biologist
policy advisor
professor
program manager or director
research scientist

Public Interest Technology, MS (FIPITCHMS)

College/School: Rob Walton College of Global Futures

Campus: Online

Program description

The Master of Science program in public interest technology asks this fundamental question: How can technology be used for good? When studying the public interest, it is vital to understand how new technologies pose new challenges and opportunities for society.

You acquire the ability to work in cross-disciplinary teams and gain a fluency that permeates technology and society issues and solutions. You learn to think analytically and to design new systems and processes, and you gain exposure to emerging technologies that can make a difference in how government agencies, nongovernmental organizations, nonprofits and private companies emphasize social impact. Professionals who work in this space ask communities what their needs are and apply a co-design approach to innovation, centering cultural awareness and community values.

Public interest technology expertise is relevant when you seek to embed the goals of technology assessment, fairness, sustainability and environmental justice in your products and processes.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Innovation in Society, BA

Innovation in Society, BS

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (PIT 593)

Required Core (12 credit hours)
PIT 501 Principles of Public Interest Technology (3)
PIT 502 Co-designing the Future (3)
PIT 503 Technology Impact Assessments (3)
PIT 504 Public Engagement Strategies (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)
PIT 593 Applied Project (3)

Additional Curriculum Information
Students should see the academic unit for the current elective course list. The elective list may change over time as new courses become available. To register for a course, students must meet any prerequisites or receive permission from the MS in public interest technology degree program chair and the course instructor.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, public administration, engineering, business, marketing, science, social science, humanities or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• written statement
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/public-interest-technology-masters/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Think critically and evaluate the success or failure of existing sociotechnical systems and make recommendations on how to overcome systemic problems related to justice, equity, diversity, inclusion and fairness, among other human rights dimensions.

- Create and disseminate the results of their public engagements using different forms of communication such as professional report writing and oral communications, employing creative strategies through traditional and emerging online platforms.
- Apply a transdisciplinary approach in the creation of a public interest technology design or development process, and analyze existing public interest technology solutions by applying fundamental principles, theoretical and conceptual frameworks (e.g., codesign) to practical cases.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Graduates have the ability to enact change within their workplace and to develop ideas for nonprofit and for-profit startups that are user-centric, collective and community driven. They are public interest technologists, an emerging domain of expertise.

Generally, graduates become:

- advisors (solutions, technology impact)
- analysts (policy, data privacy, systems)
- assessors (public interest technology, public health)
- consultants (content strategy, business, safety, user experience)
- coordinators (advocacy, standards)
- managers (data governance, cybersecurity, data privacy, environmental affairs, executive)
- policymakers (human rights, emerging technology)

Other career fields include telecommunications, information technology, biotechnology, government, education,= energy, transport, health care and medicine, standard-setting, accountability, oversight and ombudsperson service.

Responsible Innovation in Science, Engineering and Society, Certificate (GCRSESGRCT)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

If you are a scientist, engineer, social scientist, creative, research manager, technology officer, public administrator or policy official who seeks to advance or use science and technology to improve societal outcomes and develop creative solutions to the fundamental global challenges of today's world, the certificate program in responsible innovation in science, engineering and society is designed for you.

The program provides you with knowledge, skills and methods for analyzing innovation and technological systems, and it addresses knowledge and uncertainty in decision-making; the regulation and governance of science and technology; the uptake of science and technology in complex societal settings; and interactions between science, technology and the public.

You can pursue this certificate whether you are a professional in industry or government, or you are pursuing other ASU graduate degrees.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours including the required capstone course (HSD 580)

Required Core (3 credit hours)
HSD 540 Responsible Innovation and Research (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)
HSD 580 Practicum (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Acceptable proof of English proficiency is an IELTS overall band score of at least 6.5 with no band below 6.0 (no institutional code needed); or a Pearson Test of English score of at least 60; or a TOEFL iBT® score of at least 4, or a score of 80 (taken at a testing center) if taken before January 21, 2026. ASU's institutional code is 4007. ASU only accepts electronic copies of the TOEFL score report.

International students who need an F-1 or J-1 visa first need to apply to and be accepted into a master's or doctoral program before being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

An interview with the program chair is required.

Applicants should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design a responsible innovation approach to a specific science, technology, or innovation context.
Communicate current theories, approaches, and trends in responsible innovation.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. These sites include additional information about applying for funding to support global travel.

Career opportunities

Recent graduates of this program have paired the certificate with technical graduate degrees to make themselves competitive for science policy jobs in the public sector. State legislatures, courts and agencies seek employees with the perspective and ability to understand and analyze how science and technology fit into social, political, environmental and economic contexts.

Career examples include:

analyst
environmental assessor
federal agency staff
government liaison
law clerk
legislative staff

product designer
science and technology communication specialist
writer

Science and Technology Policy, MSTP (LAHSDPSM)

College/School: Rob Walton College of Global Futures

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The Master of Science and Technology Policy program prepares you to have a distinct impact in today's science and technology decision-making. The program trains you to be a future leader, policymaker or analyst who tackles diverse and complex policy issues such as climate change and artificial intelligence in ways that are socially responsible and that contribute to a more just and vibrant future.

This cohort-based program attracts students of the highest caliber and can be completed in one year or over an extended period on a part-time basis. Students come from a wide range of backgrounds.

It's well-suited if you are interested in a career in which you work to ensure, through responsive and effective policy development and implementation, that science and technology serve society.

The program provides you with knowledge and tools to analyze and answer complex questions around science and technology policy issues, including:

• How are science and technology influenced by the policy process?
• What is the rightful place of scientific expertise in public policymaking?
• What values and assumptions underlie society's current understanding of science and technology?
• Who should make decisions about science and technology policy? Only experts? Or should laypeople also have a voice?
• How should policymakers deal with the risks and uncertainties that come from new science and technology (e.g., biotechnology, nanotechnology, geoengineering, information technology)?
• How can policymakers balance concerns about science and technology while maintaining innovation and international competitiveness?

You work on topics as varied as responsible innovation, technological convergence, social and environmental sustainability, health and well-being, energy, equity, security, data privacy, infrastructure, democracy, STEM education, the role of science, and space exploration and policy. You are able to describe the historical, social and institutional foundations of science and technology policy; discuss the complexities of science and technology policy decisions, decision-making under uncertainty and the role of experts; employ effective policy communications skills and techniques; and work collaboratively and effectively with experts from different backgrounds, including scientists, engineers and elected officials.

You are able to apply critical skills and methods to science and technology policy analysis, apply advanced approaches to ensure socially responsive and responsible technology innovation, and contribute to developing and implementing creative solutions to many of today's most complex challenges.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Justice Studies, BS

Justice Studies, BA

Innovation in Society, BA

Innovation in Society, BS

African and African American Studies, BA

Gender, Women and Sexuality Studies, BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (HSD 593)

Required Core (6 credit hours)
HSD 501 Science and Technology Policy (3)
HSD 502 Advanced Science and Technology Policy (3)

Electives (9 credit hours)

Restricted Electives (9 credit hours)

Other Requirements (3 credit hours)
HSD 591 Topic: MSTP Professional Development Seminar Series (3)

Culminating Experience (3 credit hours)
HSD 593 Applied Project (3)

Additional Curriculum Information
Restricted electives are from a list provided by the program chair.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing. Students are strongly encouraged to have prior relevant education, training or experience in science and technology policy; management of science, technology or innovation; or science, technology and society.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three letters of recommendation
• resume
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students should see the program website for application deadlines.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

> Students will be able to identify and analyze science and technology policy challenges, apply policy frameworks, and develop policy insights and recommendations.
> Students will be able to communicate science and technology policy challenges, issues and options to diverse audiences.
> Students will be able to research and analyze the history of a public law related to science, technology or innovation, and use professional writing formats to explain how the law was implemented.

Global opportunities

Global experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities available, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

More information on available programs can be found on the Global Education Office website (https://goglobal.asu.edu/students/graduate-students) and the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/).

Career opportunities

Science and technology policy professionals are in high demand across sectors and industries, including businesses, think tanks, nongovernmental organizations, international organizations, academic institutions, as well as local, state and federal government. Skills in policy analysis and the policymaking process are valuable to businesses and institutions that deal with science and technology policy issues.

From the School of Innovation Futures' 2021 alumni employment survey, 100% of master's degree program respondents are either employed or pursuing continuing education. Of those respondents employed, 62% have jobs

directly related to their degree.

Some career examples include:

editor of a science and technology-focused magazine or journal
environmental protection specialist
government program administrator
information technology specialist in the federal government and private sector
intelligence analyst on science and technology threats
official at U.S. Patent and Trademark Office
regulatory policy analyst
science and technology research analyst, program or policy analyst, or legislative analyst
science, technology or health care policy advisor
smart cities program manager

Sustainability (Complex Adaptive Systems Science), PHD (SUSUSTCPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Effective Spring 2027, ASU is no longer accepting new students to this program. Students interested in this program should explore earning the PhD in sustainability with a graduate certificate in complex adaptive systems science, or the PhD in complex adaptive systems science with a graduate certificate in sustainability. The two certificates can be added to almost any PhD program.

Program description

Complex adaptive systems science is the study of interactive and dynamic systems that change over time.

The complex adaptive systems science concentration program under the Doctor of Philosophy in sustainability prepares you to be a part of the next generation of scientists, training you in advanced concepts and methods needed for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with varied, ongoing, university-wide research on complex adaptive systems science at ASU and emphasizes the value of a complex adaptive systems science perspective for better insight and an active role in seeking solutions to a broad array of critical issues facing society today. You become fluent in the common language of complexity while also receiving a solid foundation in the domain knowledge of existing academic disciplines.

By broadly embedding an understanding of complex adaptive system-relevant approaches into the practice of normal science, you gain the ability to transform science. The program promotes the development and testing of more robust theories and sophisticated methods in a wider array of research settings needed to develop a deeper understanding of the nature and aspects of complex adaptive systems, which are grounded in concrete examples and applications.

The program prepares you to become a scientist and leader in research and to investigate the urgent sustainability challenges of this century. You gain an understanding of the need for a transdisciplinary approach to solving sustainability challenges; the ability to communicate your work to professionals in other disciplines, to policymakers and to the general public; and the breadth of vision to recognize the interconnectedness of social, economic, environmental and technical systems. The critical thinking skills you gain enable you to approach sustainability challenges from a systems perspective; you also gain the skills needed to work effectively in interdisciplinary teams and the technical skills to formulate and solve problems at the appropriate scale.

In addition to the common learning outcomes, you learn how to conduct research on particular sustainability challenges using standard skills, including the capacity to identify problems; to formulate and test hypotheses; to use statistical, econometric and geographical information system techniques to construct and analyze datasets; and to build and apply models. You prepare to lead others in the analysis and design of the built environment and institutions' policies, regulations and technologies to support sustainable development and lead others in applying these concepts and methods to the development of sustainable strategies for water, land, air and urban management at the local and global levels. You learn to understand the concepts and methods of a number of critical disciplines bearing on the sustainability of systems at different spatial and temporal scales.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

86 credit hours, a written comprehensive exam, a prospectus and a dissertation

Required Core (8 credit hours)
SOS 510 Perspectives on Sustainability (3)
SOS 520 Research Design and Methods for Sustainability (3)
SOS 589 Community of Graduate Student Scholars (2)

Solutions Workshop Electives (6 credit hours)

Open Electives (36 credit hours)

Concentration (12 credit hours)
CASS fundamentals (3)
mathematics of CASS (3)
modeling CASS (3)
application of CASS approaches (3)

Research (12 credit hours)
SOS 792 Research (12)

Culminating Experience (12 credit hours)
SOS 799 Dissertation (12)

Additional Curriculum Information
For open electives and concentration coursework, students should see the academic unit for the approved course list. Students should note that only six credit hours of 400-level coursework can be included on the plan of study.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the remaining coursework is made up of appropriate electives.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• three letters of recommendation
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, describe how completion of the degree will support the applicant's long-term career goals, and explain why the applicant is applying to the Rob Walton College of Global Futures and, more specifically, the doctoral program with a complex adaptive systems science concentration. The statement of intent should elaborate on key research questions the applicant wishes to address or problems they wish to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Professionals with expertise in complex adaptive systems science are in high demand across sectors and industries, including business, government and academia. Experts in complexity, who can serve as a bridge between disciplines and scholars, are essential to solving a variety of sustainability challenges.

From the School of Sustainability's 2022 alumni employment survey, 100% of doctoral program respondents are employed. Of those respondents employed, 100% have jobs directly related to sustainability.

Career examples include:

- chief sustainability officer
- energy engineer
- environmental economist
- environmental restoration planner
- environmental sciences professor
- industrial ecology
- natural science manager
- professor
- program director
- research scientist
- sustainability consultant

Sustainability, Certificate (SUSUSGRCT)

College/School: Rob Walton College of Global Futures

Campus: Downtown Phoenix, Polytechnic, Tempe, West Valley, Online

Program description

The development and implementation of sustainable solutions depends on the development of core sustainability= competencies, effective collaboration and inspiring leadership. The graduate certificate program in sustainability= provides you with the foundational knowledge required to promote sustainable solutions in any professional field.

The skills developed in this program, like systems thinking and futures thinking, are essential to addressing= sustainability challenges across many kinds of organizations. You learn to communicate and collaborate with= colleagues from varied backgrounds, preparing you to lead teams in the future.

Courses introduce you to the foundations of sustainability through a disciplinary overview and problem-solving= methodology. With electives, you can explore specific areas that are of greatest interest to you.

In the online graduate certificate program, you can take courses from the Master of Sustainability Leadership degree.= Classes in that program focus on leadership, communication, sustainability strategy and enterprise sustainability.

This program is designed to be taken independently or as a supplement to another graduate degree program. If done independently, a graduate certificate doesn't meet the requirements for a student visa.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (6 credit hours)
SOS 508 Pathways to Sustainability (3)
SOS 509 Leading Sustainability Transitions (3)

Electives (9 credit hours)

Additional Curriculum Information
Students select six credit hours of sustainability-focused electives from EMS, SFS and SOS course prefixes. Other coursework may be used with approval of the sustainability graduate committee. In addition, students take three credit hours of other elective coursework related to sustainability.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/graduate-sustainability-certificate/) for program descriptions and to request more information.

Global opportunities

Global experience: Study abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

Graduates of this program can pair the certificate with a range of graduate degrees to enhance their expertise and career prospects related to sustainability.

Because many organizations seek to implement greener initiatives, knowledge of sustainability may be valuable across many areas, including business, engineering, government, nonprofit and education sectors. Graduates can use their skills to bring sustainable initiatives to organizations in a variety of industries.

Career examples include the following. Additional advanced degrees or certifications may be required for some roles.

- chief sustainability officer
- civil engineer
- economist
- energy engineer
- environmental economist
- environmental restoration planner
- industrial ecologist
- project coordinator
- sustainability specialist
- urban planner
- water resource specialist

Sustainability Leadership, EMSL (SUEMSLEMSL)

College/School: Rob Walton College of Global Futures

Campus: Online

ASU is not currently accepting applications for this program.

Program description

A sustainable future requires leaders who are able to integrate sustainability into existing institutions and new enterprises. A particular knowledge base and skill set is required to drive this kind of transformational change. Professionals with tools and skills learned in the sustainability leadership program, as opposed to other degree programs, are in a prime position to establish sustainability practices in any type of organization.

The Executive Master of Sustainability Leadership program prepares you to advance social, economic and environmental responsibility. Designed to be completed in 12 continuous months, the program is created and delivered by people who have worked in and with companies making sustainability transitions and those who continue to be on the forefront of global sustainability leadership.

The curriculum offers you coursework in the following synergistic thematic areas:

• communications and change management
• global context of sustainability
• leadership for sustainability
• sustainability and strategy

The program also includes opportunities for you to add elective coursework that's related to your specific area of interest. In addition to the coursework, you also have monthly individual coaching sessions with program faculty to help with career planning and professional development.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required capstone courses (EMS 515 and EMS 516)

Required Core (18 credit hours)
EMS 522 Mastering the Global Sustainability Context (3)
EMS 523 Strategic Sustainability and Leadership (3)
EMS 524 Sustainability Storytelling and Communications (3)
EMS 525 Essentials for Transformative Leadership in Sustainability (3)
SOS 508 Pathways to Sustainability (3)
SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Culminating Experience (6 credit hours)
EMS 515 EMSL Capstone Course I (3)
EMS 516 EMSL Capstone Course II (3)

Additional Curriculum Information
Students are encouraged to attend one in-person session in a major metropolitan city in the United States. Students who cannot attend should contact the college for an alternative option.

Elective courses must be at the 500 level or above.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants to the program should be interested in and passionate about advancing sustainability in their organizations, either directly or indirectly. Successful candidates are expected to draw from and apply solutions to actual professional challenges and opportunities.

Because this is an executive master's degree for experienced professionals, work and life experience may be taken into account in lieu of additional coursework from past bachelor's degree program experience. Applicants with GPAs lower than 3.00 (scale is 4.00 = "A") may be admitted on a provisional status. Applicants should contact the program for more details if their GPA falls below the 3.00 requirement.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/executive-sustainability-leadership/) for program descriptions and to request more information.

Career opportunities

Graduates of this program advance their leadership skills with practical, actionable tools and can accelerate sustainability throughout their organizations.

An EMSL degree enhances career opportunities in a variety of sectors, including business, technology, science, education and government. Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Typical careers include:

business organization manager
chief executive officer
chief sustainability officer
consultant
director of strategic initiatives
sustainability analyst
sustainability coordinator
sustainability director
sustainability manager
training manager

Sustainability Leadership, MSL (SUSUSLMSL)

College/School: Rob Walton College of Global Futures

Campus: Online

Program description

A sustainable future requires leaders who can integrate sustainability into existing institutions and new enterprises. A particular knowledge base and skill set is required to drive this kind of transformational change. Professionals with tools and skills learned in sustainability leadership specifically are in a prime position to establish sustainability practices in any type of organization.

In the Master of Sustainability Leadership program, you are prepared to advance social, economic and environmental responsibility. The program is designed and delivered by people who have worked in and with companies making sustainability transitions and who continue to be at the forefront of global sustainability leadership. You can complete the program in one to three years.

The curriculum includes four synergistic thematic areas:

• communications and change management
• global context of sustainability
• leadership for sustainability
• sustainability and strategy

The program includes opportunities for you to take electives related to your specific area of interest. Elective courses are offered that focus on organizational sustainability assessment, cities, climate, food systems and other thematic areas. You may choose to go on an approved study abroad trip (https://goglobal.asu.edu/students/asu-online-students) to fulfill elective credits.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (EMS 593)

Required Core (21 credit hours)
EMS 522 Mastering the Global Sustainability Context (3)
EMS 523 Strategic Sustainability and Leadership (3)
EMS 524 Sustainability Storytelling and Communications (3)
EMS 525 Essentials for Transformative Leadership in Sustainability (3)

Sustainability Solutions, MSUS (SUSUSOMSUS)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Master of Sustainability Solutions program teaches you how to analyze and solve sustainability challenges in organizations and communities. You learn how to apply sustainability principles and approaches. You focus on developing solutions in concert with real-world stakeholders.

You benefit from both flexibility and guidance in your course selection. You can choose elective courses from faculty-curated lists that align with employment in private, public and nonprofit sectors. If you are unsure which sector is of greatest interest, courses in sustainability analytics are available to prepare you for careers across all sectors.

A distinguishing element of the program is its applied approach. You begin the program with a foundation in sustainability frameworks and methods, then you take electives in an area of interest and ultimately use this knowledge to develop solutions to actual sustainability challenges in real time.

Final courses include learning how to manage and carry-out sustainability projects. In the capstone experience, you collaborate with a company, a government agency, a community or a nongovernmental organization to develop a practical solution to a sustainability challenge. In lieu of a thesis, the capstone provides you with practical experience and a portfolio piece that positions you for today's competitive, knowledge- and skills-intensive job market.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Public Policy, MPP

Mass Communication, MMC

Urban and Environmental Planning, MUEP

Public Administration, MPA

Legal Studies, MLS

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Sustainability, BS

Sustainability, BA

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (SOS 593)

Required Core (6 credit hours)
SOS 508 Pathways to Sustainability (3) or SOS 510 Perspectives on Sustainability (3)
SOS 509 Leading Sustainability Transitions or SOS 511 Advanced Sustainability Problem Solving (3)

Other Requirements (15 credit hours)
SOS 582 Project Management for Sustainability (3)
competency mastery courses (6)
methods courses (6)

Focus Area Electives (6 credit hours)

Culminating Experience (3 credit hours)
SOS 593 Applied Project (3)

Additional Curriculum Information

MSUS students specialize in a focus area and take six credit hours of elective coursework related to that area with approval by their academic advisor.

For a list of approved courses that may fulfill the methods and competency mastery requirements, students should see the academic unit. No more than six credit hours of 400-level coursework can be included in the plan of study.

The Graduate College policies and procedures for fulfillment of degree requirements must also be met.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• three letters of recommendation
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

The statement of intent should not exceed 600 words and should explain the goals the applicant intends to achieve through the plan of study, describe how the applicant's background will contribute to success in the program, explain how completion of the degree will support long-term career goals, and elaborate on project ideas the applicant wishes to pursue as part of the program of study.

In order to promote access, students may submit a GPA petition if they don't meet the 3.00 GPA requirement for admission. More information can be found on the School of Sustainability graduate admission website (https://schoolofsustainability.asu.edu/admissions/application-process/graduate-admissions/).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Sustainability and Enterprise, Certificate (GFSEGRCT)

College/School: Rob Walton College of Global Futures

Campus: Tempe, Online

Program description

Organizations are increasingly aware of the need to address sustainability challenges. The CEOs of large private sector= companies and leaders in the public and nonprofit sectors agree that sustainability is critical to the future success of= their enterprises. New types of enterprise models, including hybrids, mission-driven enterprises, benefit corporations= and cooperatives are emerging; and there's an increased demand for professionals who can guide enterprises to

include sustainability principles in their operating strategies.

The graduate certificate program in sustainability and enterprise prepares you to advance sustainability practices and communicate sustainability as a means for transformational change, organizational success and innovation. It equips you to develop the sustainable enterprises of the future and employ sustainability as a strategy for enterprise success.

Skills you develop in this program include:

• applying personal collaborative strengths to work in teams to assess sustainability opportunities and strategies
• applying sustainability competencies to develop and implement enterprise improvement proposals
• communicating sustainable enterprise approaches, challenges, risks and opportunities
• critically assessing enterprises against a comprehensive set of sustainability criteria
• identifying opportunities that exist for enterprises that address sustainability problems

This graduate certificate in sustainability and enterprise may be paired with a graduate degree at ASU or completed on its own. If done independently, a graduate certificate doesn't meet the requirements for federal financial aid or a student visa.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (9 credit hours)
EMS 523 Strategic Sustainability and Leadership (3)
SOS 508 Pathways to Sustainability (3)
SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Additional Curriculum Information
Students should see their program advisor for an approved list of electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in sustainability, business or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency regardless of current residency. The School of Sustainability requires a TOEFL iBT® score of at least 5, or a score of 100 (taken in a testing center) if taken before January 21, 2026.

Applicants are not required to be currently enrolled in a graduate program at Arizona State University.

At this time, only applications for fall and spring session A are being accepted due to the availability of the core classes SOS 508 and SOS 509 in fall and spring session A only.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/sustainability-enterprise/) for program descriptions and to request more information.

Global opportunities

Global experience: Study abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Career opportunities

Career examples include the following roles. Additional advanced degrees or certifications may be required for some careers.

- chief sustainability officer
- environmental scientist or specialist
- management analyst
- project manager
- sustainability consultant
- sustainability specialist

Sustainability, MA (SUSUSTMA)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Master of Arts in sustainability is a research-oriented degree program that culminates with writing either a thesis or publishable scientific paper. If you're inclined toward transdisciplinary science, humanities, planning or related fields and are interested in a career in research or academia, this program is for you.

The program focuses on knowledge generation and investigating potential solutions to sustainability challenges and prepares you to design and conduct transdisciplinary research. The MA program emphasizes the integration of a broad range of expertise.

You learn how different disciplines view and approach the challenges of sustainability in theory, research and practice. You develop academic and technical skills as well as ethical insights that can help you understand, research and provide solutions to complex sustainability challenges at the local, regional, national and global levels.

You understand the need for a transdisciplinary approach to solving sustainability challenges; can communicate your work to professionals in other disciplines, to policymakers and to the general public; and have the breadth of vision to incorporate the interconnectedness of social, economic, environmental and technical systems into your research. You have the critical thinking skills necessary to approach sustainability challenges from a systems perspective, the ability to work effectively in interdisciplinary teams, and the technical skills to formulate and solve problems at the appropriate scale.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

32 credit hours and a thesis, or
32 credit hours including the required capstone course (SOS 596)

Required Core (11 credit hours)
SOS 510 Perspectives on Sustainability (3)
SOS 520 Research Design and Methods for Sustainability (3)
SOS 525 Social-Ecological-Technical Systems: Domains and Interfaces (3)
SOS 589 Community of Graduate Student Scholars (2)

Electives (15 credit hours)
methods (3)
normative dimensions of sustainability (3)
general electives (9)

Culminating Experience (6 credit hours)
SOS 596 Capstone: Scientific Paper (6) or
SOS 599 Thesis (6)

Additional Curriculum Information
The taught-course element of the program is evaluated through course-specific examinations, research papers or applied projects and is considered successfully completed if the student obtains a GPA of 3.25 or higher. Graduate

College policies and procedures for fulfillment of degree requirements must also be met.

SOS 589 is a one-credit-hour course that students take twice for two credit hours total.

Approved general elective subjects include the following: SOS, ASB, ART, PAF, SGS, POS, SOC, PSB, PHI, COM, CPP, CRD, ESS, NTR, MCO, GCU, SCM, HPS, HST, JHR, JMC, JUS, LAW, LES, PUP, SBS, STS, TDM and URB.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• three letters of recommendation
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields

of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Professionals with expertise in sustainability frameworks and interdisciplinary research skills are in high demand across industries, including business, academia and government. Skills in critical thinking, teamwork, sustainability problem-solving and research are valuable to businesses and institutions burdened by sustainability problems.

Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Career opportunities for graduates of this program include:

chief sustainability officer
conservation program lead
disaster relief manager
environmental restoration planner
program director or manager
research associate
sustainability communications specialist
sustainability instructor or teacher
sustainability specialist
zero waste consultant

Sustainability, PHD (SUSUSTPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

The Doctor of Philosophy program in sustainability prepares you to become a scientist and leader in research who investigates the urgent sustainability challenges of this century. The flexible, transdisciplinary nature of the program allows you to focus on problems of interest to you, drawing upon relevant knowledge from sustainability science and a variety of disciplines. This full-time program includes a high degree of faculty interaction and collaboration.

As a sustainability doctoral student, you gain a better understanding of the need for a transdisciplinary approach to solving sustainability challenges as well as the ability to communicate your research effectively to academic and nonacademic audiences alike.

In addition to the common learning outcomes, you are able to conduct research on particular sustainability challenges using theoretical lenses and methods from sustainability science and a range of complementary disciplines. You learn to translate sustainability challenges to tractable research questions, develop a portfolio of quantitative and qualitative research methods to address these research questions, formulate and test hypotheses, utilize rigorous elicitation methods to gather qualitative and quantitative datasets, learn to engage with stakeholders to coproduce knowledge, use statistical and other analytic techniques to analyze data, and build and apply models of social-ecological systems.

You develop expertise in the analysis of institutional policies and regulations, as well as the design of the built environment and technologies, to support sustainable development. You also develop the foundational knowledge of concepts and methods required to conduct interdisciplinary and transdisciplinary research and effectively communicate your findings across academic disciplines, as well as to policymakers and the general public.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

86 credit hours, a written comprehensive exam, a prospectus and a dissertation

Required Core (11 credit hours)
SOS 510 Perspectives on Sustainability (3)
SOS 520 Research Design and Methods for Sustainability (3)
SOS 525 Social-Ecological-Technical Systems (SETS): Domains and Interfaces (3)
SOS 589 Community of Graduate Student Scholars (2)

Solutions Workshop Electives (6 credit hours)

Open Electives (45 credit hours)

Research (12 credit hours)
SOS 792 Research (12)

Culminating Experience (12 credit hours)
SOS 799 Dissertation (12)

Additional Curriculum Information
Students take SOS 589 twice for one credit hour. For electives, students should see the academic unit for the approved course list. Other coursework may be used with the approval of the academic unit. Only six credit hours of 400-level coursework can be included in the plan of study.

When approved by the student's supervisory committee and the Graduate College, this program allows up to 30 credit hours from a previously awarded master's degree to be used for this program. If students do not have a previously awarded master's degree, the remaining coursework is to be made up of appropriate electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• three letters of recommendation
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, describe how completion of the degree will support long-term career goals, elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

Graduates acquire an advanced understanding of sustainability frameworks, the dynamics of coupled social-ecological-technical systems, and research methods for qualitative and quantitative data. They use this knowledge to conduct original interdisciplinary research to address urgent sustainability challenges. They are equipped to lead others in the development of sustainable strategies at the local, national and global levels.

Professionals with expertise in sustainability science, interdisciplinary research methods, and analytic tools are in high demand across industries, including business, academia and government. Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Career possibilities for program graduates include:

- chief sustainability officer

data analyst
environmental scientist
geographic information systems coordinator
professor
program manager or director
research scientist
sustainability consultant
sustainability policy advisor
sustainability specialist

Sustainable Energy, PHD (SUSUEPHD)

College/School: Rob Walton College of Global Futures

Campus: Tempe

Program description

Society is in the midst of a transition toward sustainable energy.

Because the global energy system is a complex, sociotechnical system, the transition toward sustainable energy requires the next generation of leaders to possess a transdisciplinary perspective comprising both technical and societal dimensions of energy. The Doctor of Philosophy degree in sustainable energy integrates these perspectives in preparing you to address the challenges in energy transitions. You can enter the program whether you have a background in engineering, planning, business, policy, and natural and social sciences.

The core classes provide you with interdisciplinary expertise and skills related to current and emerging energy technologies and systems, economic analysis of energy systems, and social and policy dynamics of energy transitions. Elective classes allow you to develop more specialized methodological skills, technical expertise and topical knowledge.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (17 credit hours)
SOS 571 Sustainable Energy Technologies and Systems (3)
SOS 572 Sustainable Energy Transitions (3)
SOS 573 Sustainable Energy Policy (3)
SOS 574 Data Analytics for Sustainable Energy (3)

SOS 575 Sustainable Energy Research Seminar (4)
SOS 589 Community of Graduate Student Scholars (1)

Electives or Research (42 credit hours)

Other Requirement (13 credit hours)
SOS 792 Research (13)

Culminating Experience (12 credit hours)
SOS 799 Dissertation (12)

Additional Curriculum Information
Students take SOS 575 in four different semester terms for 1 credit hour each term.

Electives can be chosen from applicable courses in the following areas based on the student's area of interest and approval from the committee:

• engineering of matter, transport and energy
• future of innovation in society
• geographical sciences and urban planning
• life sciences
• molecular sciences
• physics
• sustainability
• sustainable engineering and the built environment

Other electives may be used with approval from the academic unit. Student electives are customizable based on the student's area of research.

Doctoral students are expected to include higher level courses (600 and 700 levels) as part of the elective and research coursework.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 credit hours of coursework is made up of electives and research.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts

• resume or curriculum vitae
• statement of intent
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The school encourages applicants with diverse educational backgrounds and experiences. Sample related fields include engineering, geography, urban planning, environmental science, physics, chemistry, or planning for future innovations and societal changes.

All applicants must upload a statement of intent as part of the application process. In no more than 600 words, applicants must explain the goals they intend to achieve through their program of study at the Rob Walton College of Global Futures. Applicants should describe how their background will contribute to their success in the program and how completion of their degree will support their long-term career goals. Finally, applicants should elaborate on key research questions they wish to address or problems they wish to solve as part of their program of study and identify potential faculty advisors.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Sustainable Food Systems, MS (SUSUSFSMS)

College/School: Rob Walton College of Global Futures

Campus: Online

Program description

The Master of Science in sustainable food systems is a research-oriented degree program in which you develop an understanding of present-day health, agriculture and environmental policy; develop strategies to lead policy discussions; interact with a network of food and agriculture policy leaders and mentors; and apply your knowledge and skills to address problems related to food and food systems.

The program includes two week-long experiences for you to engage in food systems. The first is in Arizona. There, you have the opportunity to talk with and learn from farmers, ranchers and supply chain businesses about how food and agriculture policies and programs impact their operations. The second is a seminar in Washington, D.C, where you gain knowledge of leadership theories, develop leadership skills and engage in conversation with influential food policy leaders from a variety of sectors.

As a graduate of the program, you'll be able to employ solutions-based thinking and a dynamic systems framework to create the inclusive, diverse and resilient food systems of the future.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Sustainable Food Systems, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (SFS 596)

Required Core (21 credit hours)
SFS 560 Tools and Tactics for Food Policy Change (3)
SFS 561 Food and Farm Immersion Experience (2)
SFS 562 Managing Natural Resources for Food Production (3)
SFS 563 Applied Food Policy Immersion Experience (2)
SFS 564 American Agriculture in the Global Context (2)
SFS 565 Research Methods and Analysis (3)
SFS 566 Applied Research Project (3)
SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)
SFS 596 Capstone (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Rob Walton College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• two letters of recommendation
• professional resume
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of intent should not exceed 600 words and applicants must explain the goals they intend to achieve through their plan of study at the Rob Walton College of Global Futures, specifically in the field of sustainable food systems. Applicants should elaborate on key research questions they wish to address or problems they wish to solve as part of their plan of study. Finally, applicants should describe how their background will contribute to their success in the program.

Letters of recommendation must be from two people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/masters-sustainable-food-systems/) for program descriptions and to request more information.

Global opportunities

Global experience: Studying abroad is encouraged for graduate students. Nearly all of the Rob Walton College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the Rob Walton College of Global Futures study abroad webpage (https://collegeofglobalfutures.asu.edu/student-life/study-abroad/), and additional opportunities and information on the ASU Global Education Office website (https://goglobal.asu.edu/). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (https://onsa.asu.edu/).

Career opportunities

The MS program is designed to prepare future leaders in food policy. Its affiliation with the Swette Center for Sustainable Food Systems connects students and graduates to networks in the public, private and nonprofit sectors. Students can explore alumni employment data for career insights on theRob Walton College of Global Futures employment data page.

Graduates can use their training in sustainable food systems to advance their career in the food and agriculture sector. Career opportunities include:

- chief sustainability officer
- food policy analyst
- policy director
- senior advisor for sustainable food systems
- sustainability manager

Applied Leadership and Management, MALM (TBALMMALM)

College/School: Thunderbird School of Global Management

Campus: Online

ASU is no longer accepting new students to this program. Interested students should apply to the Leadership and Management MLM program.

Program description

In the Master of Applied Leadership and Management program, you expand your management and leadership repertoire while sharpening your business skills, earning a unique graduate degree with classes taught online by Thunderbird's world-class professors. The program provides you, as a manager or executive in a transnational organization, mastery of modern practices from a global perspective, delivering the highest quality graduate education in a flexible online format.

This in-depth, professional degree program features applicable training in the nuances of managing a global business, government agency or nonprofit organization.

The MALM program combines cutting-edge management coursework with a truly global curriculum, cross-cultural

communication and negotiation training, personal development and leadership components to prepare you to thrive as a decision-maker in enterprises that operate across borders.

Designed to empower you with well-rounded, future-ready skill sets, this transformational master's degree provides a strategically choreographed progression through every facet of international management, with courses spanning the gamut of Thunderbird's online offerings, including accounting, data-driven decision making, global finance and marketing. You also receive hands-on, experiential learning opportunities in practical, relevant situations through elective courses that allow you to apply the full range of professional skills you've acquired during your studies.

The program is designed specifically for students from around the world. The MALM allows you to work at your own pace to earn your degree in as few as 12 months. The program allows you to join the globally connected Thunderbird alumni network that opens doors and opportunities all over the planet. More information is available on the Thunderbird alumni website (https://thunderbird.asu.edu/alumni?action).

Specializations
The MALM degree offers optional specializations, one delivered in English and three delivered in Mandarin. You should see the Thunderbird website for details.

The global and public affairs specialization is delivered in English, and more information is available on the program website (https://thunderbird.asu.edu/degree/graduate/master-leadership-and-management).

The data analytics, financial management and global business specializations are delivered in Mandarin. More information on these specialization areas are available on the ASU Online website (https://www.asuonline.cn/mlm/).

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Technological Entrepreneurship and Management, BS

Global Management, BGM

International Trade, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (TAM 542)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or TGM 506 Communicating and Negotiating Across Cultures (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)
TAM 542 Global Leadership and Personal Development (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• professional resume or CV
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The English proficiency requirements are the same as the Graduate College requirements.

Two years of work experience is preferred but not required.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Students in the MALM program have the unique opportunity to apply their learning in an international setting. Some options include:

Global Field Seminars --- During this course, students experience an intensive one-week immersion in-country. Students enjoy a hands-on learning experience in a focused region of the world, comprising company site visits, high-level meetings and presentations with business, government and cultural leaders as well as Thunderbird alumni. Through these interactions, students learn the challenges and opportunities that make doing business in the region unique.

Thunderbird Global Challenge Laboratories (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) --- This client-facing, project-based course involves a one-week immersion in-country. Projects are tailored to the business needs of the client and provide sophisticated data and market analysis; strategy recommendations; and practical, effective plans for sustained growth.

The program fee for one Global Field Seminar or Global Challenge Lab experience is included in the tuition and fees for the MALM degree. Airfare and incidental expenses are extra.

Career opportunities

More than ever, today's global organizations need versatile leaders and managers with creative problem-solving skills who can elevate diverse teams across cultures in multiple markets around the world. The MALM program prepares graduates to lead in all sectors: government, private enterprise, NGOs and nonprofits.

Career examples include:

- compensation and benefits manager
- financial analyst
- human resources manager
- logistics analyst
- logistics manager
- management analyst
- marketing manager
- sales manager
- supply chain manager

Global Affairs and Management (Executive), MA (TBGAMEMA)

College/School: Thunderbird School of Global Management

Campus: ASU at Washington

Program description

The executive Master of Arts program in global affairs and management prepares you with a digital global mindset and a distinct combination of hard and soft skills for leading systems and new enterprises, managing complexity, disruptive innovation, digital transformation, collaborative problem-solving and creating sustainable global futures across geographies, cultures and sectors. The program also includes an intensive focus on how to manage the systemic hazards facing the business and policy worlds.

Based in Washington, D.C., this hybrid program is tailored for mid-career professionals in all sectors.

The blend of in-person weekend and online classes with a cohort and faculty members enables you to collaborate on team assignments and coursework to achieve the curriculum milestones together. The flexible schedule enables you to continue working while earning your degree.

Earning this leading-edge executive master's degree prepares you for executive leadership positions within your existing organization or to switch industries entirely. The program allows you to earn a master's degree from a top global leadership and management school in one year, so that you can immediately put your newly acquired skills to work and leverage Thunderbird's global alumni network to advance your career goals.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required capstone course (TGM 545)

Required Core (3 credit hours)
TGM 575 Global Affairs (3)

Electives (15 credit hours)

Other Requirements (9 credit hours)
TGM 506 Communicating and Negotiating Across Cultures (3)
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 557 Global Marketing and Data Analytics (3)

Culminating Experience (3 credit hours)
TGM 545 Global Leadership and Strategy (3)

Additional Curriculum Information
Students focus their elective courses in a specific area approved by the academic unit. Other requirement courses may be substituted with approval of the academic unit.

Coursework on complex systems provides a framework for insights into how many social, economic and ecological systems actually work, and --- despite the inherent uncertainties in such systems --- how to manage them, using a much larger toolkit than the standard tools of policy and business analysis.

A key element of managing complexity and uncertainty is the engagement of a wide range of stakeholders in decision-making. Multiple required courses and elective courses cover techniques for facilitating productive multi-stakeholder engagement in the context of complex global systems. For example, in the core course on the craft of global networks in global affairs, students learn how and why to build resilient collaborations across borders and sectors in areas as varied as health, human rights, war, economic renewal, the environment and terrorism.

The program culminates in the global leadership and strategy capstone course, which enables students to apply the new form of leadership needed to manage complex systems through a deep dive into addressing a specific problem. Thus, the course pulls together the full set of capabilities required to excel at the top of a global organization.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

Global Leadership and Management, DPP (TBGLMDPP)

College/School: Thunderbird School of Global Management

Campus: ASU Sync

Program description

The Doctor of Professional Practice program in global leadership and management prepares you to meet the growing challenges of leadership in an increasingly complex, digital and interconnected world. This advanced professional doctorate equips you to elevate your leadership and management capabilities to drive organizational transformation across industries and sectors.

Through a distinctive blend of engagement and high-tech delivery, you develop models, strategies and networks that enable you to design effective solutions to global challenges spanning the public, private and nonprofit spheres.

Delivered synchronously online in dynamic, interactive sessions, the program offers maximum flexibility for you as a working professional while preserving the immediacy and collaboration of live instruction with Thunderbird's world-class faculty. The result is a transformative doctoral experience that empowers you to innovate, influence and create lasting global impact.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

ASU Sync
Students on F-1 or J-1 immigration status are not permitted to complete courses via ASU Sync.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill. (https://www.benefits.va.gov/gibill)

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Innovation in Global Development, PhD

Degree requirements

60 credit hours including the required applied project course (TGM 793)

Required Core (15 credit hours)
TGM 705 Philosophies, Theories and Methods of Research (3)
TGM 710 Shaping the Future: Digital Transformation in a Global Economy (3)
TGM 720 Qualitative Analysis for Systems Thinkers: Learning from the Field (3)
TGM 740 Leading and Managing Global Organizations: Advanced Topics (3)
TGM 745 Data Analysis for Global Leaders (3)

Restricted Electives (3 credit hours)
TGM 715 The Dynamics of Global Markets and Policy (3) or
TGM 730 Systems Change and Transformation (3)

Electives (24 credit hours)

Research (15 credit hours)
TGM 790 Reading and Conference (3)
TGM 792 Research (12)

Culminating Experience (3 credit hours)

TGM 793 Applied Project (3)

Additional Curriculum Information
With approval from the student's supervisory committee and the Graduate College, 15 credit hours from a previously awarded master's degree can be used for this degree.

Students should consult with the academic unit for selection of open electives and restricted electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and Thunderbird School of Global Management.

Applicants must have earned a master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• written statement
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Preferred applicants have eight years of senior-level work experience. This information should be reflected in the applicant's professional resume.

The applicant's written statement should demonstrate a global perspective and desire for an applied focus in their program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Thunderbird's regional network from Los Angeles to Tokyo, and Amsterdam to Nairobi provides a truly global presence that facilitates academic offerings in major commercial centers around the world, connecting and engaging its worldwide alumni network and supporting international research and employment opportunities.

Career opportunities

Graduates of this program have gained knowledge and skills and developed their leadership and management capabilities to manage the rapid disruptions happening now in traditional business and industry processes. They can

advance and transform their careers through practical, research-based approaches and apply them to globally oriented public, private, governmental or nonprofit organizations.

Career examples include:

- chief executive officer
- chief operating officer
- director
- financial manager
- general manager
- government official
- public policy analyst
- senior organization consultant
- supply chain manager
- sustainability officer

Global Leadership and Strategy, MGLS (TBGLSXMGLS)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

ASU is not currently accepting applications for this program.

Program description

Thunderbird School of Global Management's Master of Global Leadership and Strategy program with an executive focus delivers an immersive training experience that takes you inside the boardrooms of businesses and governments around the world. As an executive, you gain actionable insights into the strategy and leadership nuances at play in today's complex and constantly changing global economy.

Through an integrated curriculum that follows a thematic pattern mirroring executive decision-making realities, you engage in online courses and on-site experiential learning opportunities that develop your global mindset and bring you face-to-face with leaders of transnational enterprises who shape policy and industry.

The program consists of six rigorous courses of five credits each --- deep dives led by eminent professors and practitioners into topics such as global business megatrends, building sustainable enterprises, and tapping into emerging markets. The six on-site modules are delivered in key global locations, taking you on a transformative journey that includes in-person learning experiences in Los Angeles, Geneva, Nairobi, Mumbai, Shanghai and São Paulo. These travel-training adventures feature powerful professional development experiences, such as attending exclusive business and government roundtables and taking part in targeted site visits that offer you inside access to regional business. All in-person instruction follows a schedule designed for working professionals and is supplemented by sophisticated online coursework.

The MGLS program breaks free of the traditional, lockstep curriculum of other graduate business programs. You are immersed in hands-on, culturally complex leadership situations that build your analysis and decision-making capabilities, enhance your executive presence and accelerate your career advancement.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal

Global Leadership and Strategy, MGLS (TBGLSMGLS)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

ASU is not currently accepting applications for this program.

Program description

The Master of Global Leadership and Strategy is a global cohort executive leadership and strategy program that centers on development of your advanced capabilities to conceptualize and deliver profitable growth, along with the competencies to lead strategy execution efforts in a complex and constantly changing global environment. This innovative program closely patterns executive decision realities by orienting around key themes that naturally flow --- from the macro to the micro, global to local, public to private --- interweaving relevant disciplines to address the pressing issues that executives face. It's transdisciplinary in both approach and execution.

The MGLS program combines thematically anchored content with field-deployed experiential learning projects (alternating between developed and emerging markets) that enable you to interact firsthand with leaders who shape policy and industry and to demonstrate executive acumen through action and response simulation, sprint consultancy engagement, and innovation challenge delivery. The result is a deeply innovative, action-oriented, global executive education experience.

STEM-OPT extension eligible: No

Global Management (Creative Industries and Design Thinking), MGM (TBGMCIDMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

This program is not accepting applications at this time.

Program description

In the creative industries and design thinking concentration within the Master of Global Management program, offered in collaboration with the Herberger Institute for Design and the Arts (https://herbergerinstitute.asu.edu/), you acquire critical skills with an interdisciplinary focus to meet a current need in the globally expanding field of creative industries. Additionally, you gain an entrepreneurial skill set that strengthens your ability to connect interdisciplinary knowledge of the cultural industries with design thinking methodology, building on management skills and the ability to apply entrepreneurial vision to the globally interconnected sector of art and design.

You are exposed to design-thinking pedagogy as you increase your capacity for interpersonal communication, public communication, opportunity recognition, network and systems thinking, problem recognition and creativity. You also gain skills in cultural leadership as well as knowledge about the creative industries, distribution of creative products, the creative process, and management of innovation in the creative industries.

This concentration empowers you to advance innovation in the cultural sector, support creative work and careers, harness social capital, and design public and private enterprises that will strengthen arts and design in the future. The program prepares you to understand the complex economic, legal, political and social contexts that surround any innovation or enterprise.

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

49 credit hours, a foreign language exam, including the required capstone course (TGM 597)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (6 credit hours)
HDA 513 Applied Creative Research and Evaluation Methods (3)
HDA 521 Counting Arts and Culture: Reasoning with Empirical Evidence (3)

Restricted Electives (6 credit hours)
GRA 501 Creative Environment and Collaborative Leadership (3)
HDA 522 Media Literacy and Distribution (3)
creative enterprise development elective (3)
leadership elective (3)

Open Electives (12 credit hours)

Other Requirements (21 credit hours)
foreign language
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
For restricted electives, students choose two of the following, for a total of six credit hours: HDA 522, GRA 501, a creative enterprise development elective, a leadership elective.

Open electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, courses from the Other Requirements list may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the MGM program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants must have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to attend an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Career examples include these positions:

- intelligence analyst
- instructional designer or technologist
- management analyst
- marketing manager
- market research analyst or marketing specialist
- sales manager
- social or community services manager

Global Management (Data Science), MGM (TBGMDSCMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

This STEM-designated data science concentration within the Master of Global Management program --- developed in partnership with the School of Computing and Augmented Intelligence (https://scai.engineering.asu.edu/) in the Ira A. Fulton Schools of Engineering --- equips you with the dual expertise of global management and advanced data analytics. This powerful combination prepares you to excel in multinational corporations, international nonprofits, and governmental and nongovernmental organizations around the world.

As organizations increasingly rely on data to inform strategic decisions, leaders must be able to interpret complex information and translate it into actionable insight. In this concentration, you develop the analytical, technical and managerial skills needed to harness data for innovation and competitive advantage in the global marketplace.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Global Management (Digital Audience Strategy), MGM (TBGMDASMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The digital audience strategy concentration within the Master of Global Management program empowers you to merge creative digital skills with global business acumen. Designed for aspiring leaders in marketing, design and product

innovation, the program blends strategic management training with hands-on learning experiences --- including field-based projects and real-world consulting challenges.

Offered in collaboration with the Walter Cronkite School of Journalism and Mass Communication (https://cronkite.asu.edu/), this unique program bridges the worlds of media, marketing and management. You learn to research, engage and grow audiences using both traditional and innovative methods --- such as social media analytics, SEO, focus groups, surveys and competitive analysis. You emerge ready to craft data-driven strategies and lead global teams that connect brands with audiences worldwide.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to attend an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Career examples include these positions:

- instructional designer or technologist
- intelligence analyst
- management analyst
- marketing manager
- market research analyst or marketing specialist
- sales manager
- social media manager
- UX designer

Global Management, MGM (TBTGMXMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

Thunderbird School of Global Management's Master of Global Management program with an executive focus provides a way for you as a busy professionals to earn a top-ranked management degree in just 12 months. Integrating next-generation leadership coursework with cross-cultural insight and regional expertise, the program prepares you to lead multinational corporations, nonprofits and government organizations in an increasingly interconnected world.

You learn to manage projects, lead teams and navigate complex business environments across borders and industries. Going beyond a traditional executive degree, the executive MGM blends business, public policy and international affairs to build globally fluent leaders with a deep understanding of international markets, negotiations and political economies.

Anchored in Thunderbird's transdisciplinary approach, the curriculum emphasizes experiential learning and real-world application. The program begins with orientation at Thunderbird's state-of-the-art Downtown Phoenix campus and continues with in-person and online weekend sessions led by Thunderbird faculty. It culminates in a transformative Global Field Seminar, where you experience the power of the international Thunderbird network through business and cultural visits, guest speakers and alumni events.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT extension eligible: No

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

49 credit hours, a foreign language exam, including the required capstone course (TGM 597)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)

Electives (12 credit hours)

Other Requirements (21 credit hours)
foreign language
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
For concentration coursework, students choose four courses from an approved list, for a total of 12 credit hours. Students should contact the academic unit for the approved course list.

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, courses on the Other Requirements list may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM program. Students whose native language is not English who meet the admission requirements for the master's degree program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants must have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design strategic solutions to complex global business challenges.
Apply cultural dimension theories to diagnose cross-cultural communication challenges.
Evaluate global affairs theories in international contexts.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve

practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Graduates are prepared to take on management and executive positions in government agencies such as the U.S. Department of Commerce, the State Department and the Treasury Department, or similar roles in the government of a student's home country. The global affairs concentration also positions graduates for leadership roles in international organizations, such as the World Bank or the World Trade Organization, and in major companies that require analysts to monitor policy trends, managers to oversee global supply chains, and representatives to advance global business interests to governments, both domestic and foreign.

Career examples include:

- business continuity planner
- diplomat
- intelligence analyst
- political scientist
- regulatory affairs specialist
- social and community service manager

Global Management (Global Business), MGM (TBGMGBMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The STEM-designated global business concentration within the Master of Global Management program allows you to specialize in the various pathways in global business, such as global finance, global marketing, supply chain or management consulting. By developing your skills --- such as cross-cultural competency, social and emotional intelligence, and creative and adaptive thinking --- this program helps sharpen your global mindset, along with leadership and management skills, preparing you for a boundless career.

Effective global leadership demands a deep understanding of international dynamics, the ability to distill and communicate complex ideas, and a cosmopolitan perspective on the world. Together, these form the foundation of global intellectual capital, which is a vital hallmark of Thunderbird graduates. Within the MGM program, you build this capital through a next-generation international business curriculum, complemented by immersive, field-based projects that translate classroom learning into real-world impact.

The global business concentration prepares you to navigate complexity, drive innovation and lead with cultural fluency in organizations spanning industries and continents.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Artificial Intelligence in Business, MS

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Religious Studies (Religion, Culture and Public Life), BA

Asia Studies (East Asia), BA

Global Management (Global Digital Transformation), MGM (TBGMGDTMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

If you are interested in augmenting your digital skills in the areas of management consulting, marketing, design and product development, the STEM-designated global digital transformation concentration within the Master of Global Management program is designed for you.

You can tailor this next-generation academic concentration to fit your specific learning goals. Through collaborative courses offered in partnership with other ASU colleges, you may combine the global management skills gained in the MGM with digital expertise to create a dual specialization that will continue to be in high demand throughout the global economy.

In this concentration, you expand your electives, fuse technological skills with managerial skills, and combine the global management skills of the MGM with digital expertise by specializing in the various pathways of global digital transformation through program coursework and applied learning projects guided by faculty experts.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Artificial Intelligence in Business, MS

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Religious Studies (Religion, Culture and Public Life), BA

Asia Studies (East Asia), BA

Religious Studies (Religion, Politics and Global Affairs), BA

Economics, BS

Business (Tourism), BA

Philosophy (Morality, Politics and Law), BA

Biological Sciences (Neurobiology, Physiology and Behavior), BS

Business (Technology), BA

Global Health, BA

Liberal Studies, BA

Philosophy, BA

Business (Applied Supply Chains), BA

Biological Sciences (Genetics, Cell and Developmental Biology), BS

Business (Language and Culture), BA

Business (Global Politics), BA

Marketing (Digital), BS

Biological Sciences (Biology and Society), BS

Business (Statistics), BA

Sustainability, BA

Business (Sports Business), BA

Business (Communication), BA

Business Data Analytics, BS

Engineering Management, BSE

Microbiology, BS

Business (Business Administration), BA

Jewish Studies, BA

Business (Information Security), BA

Business (Law), BA

Industrial Design, BSD

Marketing (Professional Sales), BS

Business (Health Care), BA

Marketing, BS

Informatics, BS

Business (Sustainability), BA

Business Entrepreneurship, BS

Biological Sciences, BS

Management, BS

Supply Chain Management, BS

Global Management, BGM

Business (Food Industry Management), BA

Finance, BS

Business (Public Service and Public Policy), BA

Industrial Engineering, BSE

International Trade, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

49 credit hours, a foreign language exam, including the required capstone course (TGM 597)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)

Electives (12 credit hours)

Other Requirements (21 credit hours)
foreign language
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, courses on the Other Requirements list may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English and who meet the admission requirements for the program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants must have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design strategic solutions to complex global business challenges.
Apply cultural dimension theories to diagnose cross-cultural communication challenges.
Evaluate methodologies for addressing global digital transformation challenges.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Career examples include:

intelligence analyst
logistics analyst
management analyst

marketing manager
market research analyst or marketing specialist

Global Management (Global Health Care Delivery), MGM (TBGMGHDMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

You gain practical skills and hands-on experience in both global management and health care delivery through the global health care delivery concentration within the Master of Global Management program.

Offered in collaboration with the College of Health Solutions (https://chs.asu.edu/), this concentration enables you to meet the growing need for skilled health care managers who have a solid foundation of international business skills and a global mindset. It's designed for you as a current or aspiring executive and manager in health care to hone your leadership and business skills for a career leading health care organizations around the world. You may also find this degree helpful as a health care practitioner, such as a nurse and doctor, to move from clinical practice into management roles.

You master core and advanced skills in designing systems, processes and mechanisms used to optimize health care delivery anywhere in the world. In addition, you integrate evidence-based financial principles geared toward improved individual and population health outcomes, such as leadership strategies in change management.

Global Management (Global Health Care Innovation), MGM (TBTGMHCMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The global health care innovation concentration within the Master of Global Management program prepares you to assume leadership and managerial responsibilities in global health care organizations.

You design, apply knowledge to, implement and create innovative solutions that can transform health care ecosystems. You learn how to create and sustain cultures of innovation in health care from multiple perspectives. These perspectives may include personal competence for innovation, use of evidence in decision-making, reframing system infrastructures, financing, cross-cultural communication, entrepreneurship, technology and policymaking. You develop competence in the design, application and testing of innovative processes and products.

Offered in collaboration with the Edson College of Nursing and Health Innovation (https://nursingandhealth.asu.edu/), this concentration prepares you to lead processes of health care innovation and transformation globally.

STEM-OPT extension eligible: No

Global Management (Global Legal Studies), MGM (TBGMGLSMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

If you desire to work in areas that require knowledge of global legal issues but do not want to be a lawyer, the global legal studies concentration within the Master of Global Management program is for you. You may also use this concentration as an introduction to legal studies before pursuing law school.

Offered in collaboration with the Sandra Day O'Connor College of Law (https://law.asu.edu/), this program provides you with transdisciplinary global management and legal expertise that opens doors in multiple sectors within organizations operating around the world.

The first step in understanding and applying laws is developing an understanding of basic legal principles and then using those principles to identify and analyze relevant legal issues. Through the foundational courses of the MGM program with a concentration in global legal studies, you master relevant legal principles while gaining legal analysis skills, mainly through case briefings; examples include identifying a particular case's legal issue, articulating the legal rule, discussing the court's analysis, and concluding. These legal analysis skills are tested on final exams in the foundational courses through hypothetical fact scenarios. You gain a strong understanding of legal principles --- the

basis of legal analysis --- and the ability to apply them in your field of interest.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. Industrial Engineering, BSE

International Trade, BS
Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

49 credit hours, a foreign language exam, including the required capstone course (TGM 597)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)

Electives (12 credit hours)

Other Requirements (21 credit hours)

foreign language
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, Other Requirements courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the MGM program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants must have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Career examples include:

- compensation and benefits manager
- compliance manager
- human resources manager
- intelligence analyst
- regulatory affairs manager
- urban and regional planner

Global Management (Nonprofit Leadership and Management), MGM (TBGMNLMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The nonprofit leadership and management concentration within the Master of Global Management program provides you with a deep understanding of the nonprofit sector's role in the global economy, and with the knowledge and skills to lead and manage transnational nonprofit organizations. Through a collaboration with Watts College of Public Service and Community Solutions (https://publicservice.asu.edu/), you take courses in nonprofit leadership and management.

You learn to evaluate and articulate the historical and philosophical context of nonprofit organizations in society, and the theory and practice of philanthropy while mastering next-generation financial management practices.

Because the lines between the functions of nonprofit and for-profit organizations are increasingly blurry, Thunderbird's renowned faculty have designed a cross-sectoral and transdisciplinary curriculum that's tailored for you if you aspire to leadership roles in global nonprofit institutions in which you can leverage your business and global management expertise in your work.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. Global Management (Public Policy), MGM (TBGMPPMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The public policy concentration within the Master of Global Management program prepares you to work in cross-sector roles within public and nonprofit institutions around the world. You may also use this program as a springboard into jobs in the private sector that have significant overlap with public agencies. In short, you prepare in both global management and public policy to meet the demands of an increasingly interwoven economy.

The curriculum equips you with the skills needed to analyze policy environments, assess the effectiveness of various strategies, and craft innovative approaches to address challenges in the global policy landscape.

Offered in collaboration with the Watts College of Public Service and Community Solutions (https://publicservice.asu.edu/), this program enables you to apply analytical techniques and conceptual frameworks to understand policy issues and to identify potential solutions to real-world challenges.

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

49 credit hours including a foreign language exam and the required capstone course (TGM 597)

Required Core (3 credit hours)
TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)
SOS 508 Pathways to Sustainability (3)
SOS 509 Leading Sustainability Transitions (3)

Students choose two courses from the following list, for a total of six credit hours:
EMS 522 Mastering the Global Sustainability Context (3)
EMS 523 Strategic Sustainability and Leadership (3)
EMS 524 Sustainability Storytelling and Communications (3)
EMS 525 Essentials for Transformative Leadership in Sustainability (3)
SOS 514 Human Dimensions of Sustainability (3)
SOS 545 Creating Sustainable Organizations (3)
SOS 548 Transformational Sustainability Entrepreneurship (3)
TGM 585 Corporate Social Responsibility in a Global Context (1-3)
TGM 598 Topic: Circular Economy (3)
TGM 598 Topic: Smart and Resilient Communities (3)

Electives (12 credit hours)

Other Requirements (21 credit hours)
foreign language

TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
For concentration coursework, SOS 508 and 509 are required. The remaining six credit hours required for the student's concentration are to be selected from the approved course list, available from the academic unit.

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, Other Requirements courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the MGM program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply if they have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Governments, companies and individuals are increasingly recognizing the importance of sustainability. This has led the United Nations to outline Sustainable Development Goals for 2030, an effort that many multinational corporations, nonprofit organizations and state entities have pledged to join.

As sustainability gains more traction, knowledge and management expertise in this area will become increasingly attractive to employers. Graduates of the sustainability solutions concentration are prepared for these new organizational norms and to capitalize on the need for expert leadership in this rapidly growing profession.

Career examples include:

- business continuity planner
- environmental economist
- environmental restoration planner
- quality control systems manager
- sustainability specialist
- urban and regional planner
- water resource specialist

Global Management (Sustainable Tourism), MGM (TBGMSTMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

The sustainable tourism concentration within the Master of Global Management program prepares you for management and executive-level positions in the tourism industry globally. Offered in collaboration with ASU's Watts College of Public Service and Community Solutions (https://publicservice.asu.edu/), this program addresses the distinct character of the sustainability revolution, preparing you to transform the sustainability practices of global enterprises in tourism development and management.

if you are interested in working in sustainable tourism, hospitality, travel and related fields, the concentration opens up a world of opportunities. You can take courses in sustainable tourism from Watts College at ASU's Downtown Phoenix campus, located in the heart of the state capital's thriving business district.

You specialize in sustainable tourism management, mastering the principles and practices of successful sustainable development in the tourism field. Together with a diverse cohort, you learn to integrate economic, social and environmental aspects of sustainability as it relates to tourism; conduct sustainability audits for destinations and businesses; evaluate community impacts of tourism; innovate and evaluate sustainable tourism practices; and perform business planning and management. You receive specialized hands-on training in international business, cross-cultural relations, global political economy and regional business environments.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT extension eligible: No

Global Management (Space Leadership, Business and Policy), MGM (TBGMSBPMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

Thunderbird School of Global Management's executive Master of Global Management program with a concentration in space leadership, business and policy prepares you to pursue a career in commercial spaceflight, defense and civil aerospace, artificial intelligence and big data, or next-generation manufacturing. Designed and taught by industry-leading faculty members and experts, this 12-month program prioritizes industry immersion and focuses on modern practices, principles and case studies for corporate, startup, nonprofit and governmental organizations operating in space.

You access a wealth of opportunities across the aerospace and technology sectors. To build cross-disciplinary skills, you take coursework featuring renowned practitioners and scholars from ASU's School of Earth and Space Exploration (https://sese.asu.edu/).

Substantial opportunities are available for hands-on learning and networking with leaders in government, private industry and global nonprofits, including a workshop and networking session and facility visits to NASA and commercial space companies.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. Global Management, MGM (TBTGMMGM)

College/School: Thunderbird School of Global Management

Campus: Downtown Phoenix

Program description

If you are a professional seeking a career with leading global organizations, Thunderbird School of Global Management's Master of Global Management is an innovative leadership and entrepreneurship degree for you. The program builds on a strong foundation in business administration and integrates essential skills such as digital transformation, sustainability, diversity and inclusion, and innovation. Through immersive, cross-cultural learning and hands-on experience, you gain a deep understanding of the complexities of international management. The MGM prepares you with a balanced combination of strategic, analytical and interpersonal skills to inspire, influence and lead effectively across borders. You further globalize your mindset and career potential through specialized concentration areas, foreign language study, consulting collaborations with corporate partners, internships, real-world simulations, and study abroad experiences.

Programs start in August or January with a 16- or 21-month track.

The accelerated MGM (https://thunderbird.asu.edu/degree/accelerated/accelerated-master-global-management)

enables you to earn both a bachelor's and master's degree in as few as five years. This cost-effective option enables you, with the guidance of your undergraduate academic advisor, to take 12 credit hours of core master's degree classes during your senior year.

You choose one of the 16 concentration areas or design your own concentration. This program features three concentration options for STEM specializations that meet F-1 student visa status requirements, starred below.

Thunderbird concentrations:

• global affairs
• global business*
• global digital transformation*
• global entrepreneurship

Concentrations offered in partnership with other ASU schools and colleges:

• creative industries and design thinking
• data science*
• digital audience strategy
• global development and innovation
• global health care delivery
• global health care innovation
• global legal studies
• nonprofit leadership and management
• public administration
• public policy
• sustainability solutions
• sustainable tourism

You complete rigorous core courses in global management, international political economy and cross-cultural engagement, with electives spanning the university's offerings. The result is a flexible, multidisciplinary curriculum featuring a rich variety of coursework in international business and management, social sciences, and humanities.

Moving from theory to practical experience, you gain skills by taking on projects for major corporations and other global organizations, including nonprofits and government agencies.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded and eager to develop and advance their career in leadership and management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Health Care Administration and Policy, MS

Artificial Intelligence in Business, MS

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

TGM 506 Communicating and Negotiating Across Cultures (3)

Other Requirements (21 credit hours)
TGM 515 Navigating Global and Regional Business Environments (3)
TGM 517 Global Accounting and Financial Management (3)
TGM 545 Global Leadership and Strategy (3)
TGM 557 Global Marketing and Data Analytics (3)
TGM 586 Global Entrepreneurship and Sustainable Business (3)
TGM 596 Thunderbird Experiential Practicum (6)

Electives (24 credit hours)

Culminating Experience (1 credit hour)
TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information
Proficiency in a second language is required for the MGM degree. Students whose native language is not English who meet the admission requirements for this program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework.

For electives coursework, students should see the academic unit for approved courses.

For other requirements coursework, other courses may be used with approval from the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution. The program is open to candidates from any undergraduate major.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• essay response to application question
• one professional or academic reference
• interview
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Design strategic solutions to complex global business challenges.
Apply cultural dimension theories to diagnose cross-cultural communication challenges.
Formulate a personal leadership development plan to support their professional growth as global leaders.

Global opportunities

Global experience: Global Challenge Lab
Students in Thunderbird's MGM program have distinct opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve practical challenges by collaborating with the school's corporate partners around the world.

The Global Challenge Lab (https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab) is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the client's business needs and

challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are practical and effective.

Career opportunities

Thunderbird prepares graduates to enter the complex and exciting global economy with specialized, hands-on training in international business, cross-cultural relations, global political economy and regional business environments. With their global mindset, core professional skills, mastery of management principles and practices, and multicultural outlook, Thunderbird graduates are prepared for leadership roles in organizations with a global scope.

Career examples for graduates include positions as:

financial managers
general and operations managers
intelligence analysts
logistics managers
management analysts
marketing managers
market research analysts and marketing specialists
social and community services managers
supply chain managers
sustainability specialists

Leadership and Management (Global Creative Industries), MLM (TBLDMGCMLM)

College/School: Thunderbird School of Global Management

Campus: ASU at Los Angeles

ASU is not currently accepting applications for this program.

Program description

The Master of Leadership and Management program with a concentration in global creative industries program offers you leadership and management fundamentals for success across sectors in the global creative industries, as well as a digital global mindset and a holistic approach to the global creative industries.

In this program, you gain the hard and soft skills needed to navigate and thrive in today's interconnected world (e.g., finance, accounting, marketing, data analytics, negotiation, cross-cultural communication and emerging digital technologies) and gain a deeper understanding of the creative process. You attain a comprehensive set of practices that foster generative and sustainable innovation and implementation geared towards opportunity recognition within tomorrow's increasingly cross-border and trans-industry marketplace. The program prioritizes industry immersion in every class and focuses on the nexus of art and commerce, emphasizing creativity for managers and management for creatives.

About Thunderbird
Thunderbird School of Global Management has produced world-class leaders for nearly 80 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their career in leadership and

management within the global and digital landscape of today's interconnected world. After completing this program, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Leadership and Management, MLM (TBLDMGMLM)

College/School: Thunderbird School of Global Management

Campus: ASU Sync , Online

Program description

The Master of Leadership and Management program is designed to deliver mastery in modern leadership and management principles and practices in just 12 months. It prepares you to take on additional managerial responsibilities in global organizations or to make a career change across industries or sectors.

Built to empower you with a future-ready, cross-disciplinary skill set, the MLM program delivers a strategically choreographed journey through every dimension of international management. Coursework spans Thunderbird's renowned online portfolio, including accounting, data-driven decision-making, global finance, marketing and

organizational leadership.

You gain hands-on, experiential learning through electives that connect theory to real-world challenges, applying your skills across sectors including government, private enterprise, nongovernmental organizations and nonprofits. The result is a transformational leadership experience that positions you to lead confidently in an interconnected world.

Specializations
Thunderbird's MLM degree program offers optional specializations. You can focus your coursework in artificial intelligence, analytics and financial technology innovation delivered in English, and global business delivered in Mandarin.

Format option
This program is also offered via ASU Sync. ASU Sync enables you to attend live classes remotely via Zoom. Classes are designed to foster active collaboration and discussion in real time with faculty members and peers.

Students on F-1 or J-1 immigration status aren't permitted to complete courses via ASU Sync.

If you are seeking to use GI Bill® benefits for ASU Sync programs, you should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available on the official U.S. government website at www.benefits.va.gov/gibill (https://www.benefits.va.gov/gibill).

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Two years of work experience is preferred but not required.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/leadership-management-masters/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply strategies for adaptive leadership to drive change in diverse organizations.
Apply global strategy frameworks to assess international market environments.
Apply data analytics to inform strategic decisions in global organizations.

Global opportunities

Global experience: Students in the MLM program have the opportunity to apply their learning in an international setting through a Global Field Seminar. During this course, students experience an intensive one-week immersion in-

country. Students enjoy a hands-on learning experience in a focused region of the world, comprising of company site visits and high-level meetings and presentations with business, government and cultural leaders as well as Thunderbird alumni. Through these interactions, students learn the challenges and opportunities that make doing business in the region distinct.

Career opportunities

More than ever, today's global organizations need versatile leaders and managers with creative problem-solving skills who can elevate diverse teams across cultures in multiple markets around the world. The MLM program prepares graduates to lead in all sectors: government, private enterprise, NGOs and nonprofits.

Career examples include:

- compensation and benefits manager
- financial analyst
- human resources manager
- logistics analyst
- logistics manager
- management analyst
- marketing manager
- sales manager
- supply chain manager

Graduate College

Advanced Studies, MAS (GCADVSTMAS)

College/School: Graduate College

Campus: Downtown Phoenix, Polytechnic, Tempe, West Valley, Online

Program description

The Master of Advanced Studies program allows you to focus your studies on two advanced knowledge areas by enrolling in official ASU graduate certificates to earn a master's degree. This individualized learning experience provides you with the opportunity to complete your master's degree incrementally and offers flexibility to complete your program in stages to advance your skills for the workplace. You have the opportunity to acquire specific knowledge and advanced skills from multiple knowledge areas, based on your chosen certificates.

Key benefits
Flexible learning pathway: Completing a master's degree in manageable steps allows you to earn valuable academic credentials along the way.

Customizable curriculum: Select two graduate certificates to tailor a master's program that aligns with your professional aspirations.

Enhanced career readiness: You gain specialized knowledge and skills in multiple disciplines, making you a more versatile candidate in the job market.

Personalized education: Creating a degree program that reflects your individual interests and career goals ensures your education is both relevant and engaging.

Academic excellence: You can benefit from ASU's renowned faculty and resources, receiving a high-quality education that prepares you for advanced professional opportunities.

Certificates
Based on your individual needs, you select one main and one stackable ASU graduate certificate (each consisting of 15 or more credit hours), using ASU Degree Search (https://degrees.apps.asu.edu/masters-phd/major-list/keyword/certificate). The academic college offering the main certificate provides academic advising and awards the master's degree.

STEM-OPT extension eligible: No

Degree requirements
Main Certificate Coursework
Stackable Certificate Coursework

Additional curriculum information
The minimum total credit hours for the program is 30. Students must complete all coursework required for both certificates.

Students are required to select one main and one stackable graduate certificate to be a candidate for the MAS program.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

The MAS program does not have an application through the standard graduate application process. Interested students must submit a standard graduate application for each graduate certificate.

Graduate certificates are eligible if they consist of 15 or more unique credit hours and were completed within seven years of admission to the MAS.

Students who are interested in the MAS program or have specific questions should contact advising in the academic unit that administers their main certificate.

Graduate certificates typically do not allow for financial aid. There are a select few graduate certificates approved to qualify for aid. Questions regarding financial aid for specific certificates can be directed to the Financial Aid Office (https://tuition.asu.edu/financial-aid).

International student questions can be directed to the International Students and Scholars Center (https://issc.asu.edu/).

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

Career opportunities

The MAS program is a flexible, tailored degree customized to the differing interests and needs of students and working professionals. Participating in the stackable MAS program can provide students with opportunities to advance their careers through targeted credentials.

Contact information

Graduate College
https://graduate.asu.edu/advanced-studies-mas

Health Solutions, College of

Audiology, AuD (LAAUDAUDD)

College/School: College of Health Solutions

Campus: Tempe

ASU is not currently accepting applications for this program.

Program description

The three-year course of study for the Doctor of Audiology degree consists of basic science coursework, professional knowledge coursework and clinical practicum experiences. Full-time commitment is critical because graduate courses are offered once per academic year. In addition, course content and the sequence of courses are closely tied to clinical practicum assignments. Moreover, full-time enrollment ensures timely completion of the program.

You have the option of graduating after the completion of the three-year program of study or enrolling in a clinical externship during your fourth year for up to an additional three credit hours of clinical training. A minimum of 850 hours of clinical training is required for graduation and is obtained during the first three years of training. Additional practicum hours toward the 1,820 hours required for the Certificate of Clinical Competence in Audiology, also known as CCC-A, by the American Speech-Language-Hearing Association can be met during completion of the fourth year externship under the supervision of an ASHA-certified audiologist. The remaining clinical clock hours for ASHA certification can also be met after graduation. However, you should be aware of state licensure requirements when making the determination of whether or not to complete an externship. Initial licensure in some states may require the completion of the externship.

STEM-OPT extension eligible: No

Degree requirements

88 credit hours, a written comprehensive exam and an oral comprehensive exam

Required Core (58 credit hours)
SHS 502 Basic Audiometry (4)
SHS 504 Amplification I (4)
SHS 505 Sign Language for Audiologists and Speech Pathologists (2)
SHS 508 Pediatric Audiology (3)
SHS 510 Amplification II (3)
SHS 511 Auditory Perception by the Hearing Impaired (3)
SHS 513 Auditory Neuroscience (3)
SHS 516 Auditory Evoked Potentials (4)
SHS 517 Balance Assessment (4)
SHS 518 Rehabilitative Audiology (3)
SHS 520 Auditory Pathologies/Disorders and Otoneurologic Applications (4)
SHS 522 Tinnitus/Advanced Audiometry (3)
SHS 523 Central Auditory Processing Disorders (4)
SHS 524 Counseling in Communication Disorders (2)
SHS 525 Audiology Practice Management (3)
SHS 526 Launch to Clinical Methods in Audiology (1)
SHS 552 Physiological Measures of Auditory Function (4)
SHS 555 Cochlear Implants (4)

Other Requirements (27-30 credit hours)
SHS 500 Research Methods (3)
SHS 580 Clinical Practicum (8)

SHS 584 Clinical Internship (12)
SHS 589 Audiology Grand Rounds (4)
SHS 590 Reading and Conference (Audiology Clerkship) (0-3)
American Speech-Language-Hearing Association Praxis national certification examination in audiology (0)

Electives and Research (3 credit hours)

Culminating Experience
written and oral comprehensive exam

Additional Curriculum Information
Students have the option to continue enrollment in SHS 590 at one credit hour per semester for up to three semesters for the additional training experience and to complete the externship requirements of the ASHA certification if desired. These extra hours of clinical experience allow students to apply for ASHA certification upon graduation or for state licensure for certain states. Students should maintain continuous enrollment and not apply for graduation until they have completed the additional clinical hours for the certification.

Because certification and licensure requirements vary by profession and from state to state, the College of Health Solutions recommends that students visit the ASU licensure website (https://admission.asu.edu/academics/licensure) to determine if their program meets the requirements of individual state licensures or national certifications, as applicable. The decision to complete an externship or not is an individual decision based on career objectives and desired state of licensure among other factors.

In addition to the Graduate College requirements, eligibility for graduation is based on the following:

Formative Exam (Year 1)
Students must pass a formative exam given at the end of the first academic year of the program. This is a 100-question multiple-choice test covering the content of the courses taken during the fall and spring semesters. Students who receive scores of less than 70% are given one opportunity to retake the exam.

Summative Exam (Year 3)
Students must pass a summative exam in the fall of the third academic year of the program. This is a comprehensive written and oral exam pertaining to clinical case diagnosis and management. One retake is allowed if the student does not pass on the initial attempt.

National Certification Exam (Praxis)
All students pursuing the Doctor of Audiology degree must pass the praxis examination in audiology as a graduation requirement. There are no credit hours tied to it. For the graduation approval to be processed, the praxis exam result must be sent directly from the Education Testing Service to the ASU audiology program office.

Clinical Clock Hours
Students must successfully complete 850 hours of supervised clinical clock hours as accrued between on-campus clinic, off-campus internship sites and possible simulation opportunities.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in speech and hearing science or

another related discipline from a regionally accredited institution. Applicants with degrees in related fields, such as nursing, education and any of the biological sciences may apply; although, they may be admitted as leveling students and must complete at least one year of prerequisite courses in speech and hearing science at the undergraduate level.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Upon receipt of the application, a timed writing statement is administered as part of the first stage of the admission process. Applicants meeting the first-stage admission criteria are notified and invited to provide additional information to complete the second stage of the admission process. All other applicants are denied admission.

Invited applicants who wish to continue the application process must provide a seven- to 10-minute video introducing themselves and answering several questions from the admission committee. The same questions are given to all applicants, along with instructions about format and submission. Applicants who do not submit a video and writing sample are denied admission. The committee may ask to schedule an interview to ascertain additional information from applicants after reviewing the recorded video and will make final decisions regarding admission. Space is available for a total of 15 students. Invitations are sent by the beginning of February, with a deadline for video submission in mid-February.

The personal statement should not exceed 300 words and should describe the reasons for pursuing graduate study in audiology; successful applicants submit statements that are free of grammatical errors and demonstrate proficiency in written communication.

Letters of recommendation should outline the applicant's potential success for graduate-level coursework. Letters from faculty members are most useful. A standard form is not used; letters should be submitted on letterhead from the recommender's institution.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Students graduating from the AuD program will be able to understand and apply the foundations of clinical practice that provide the building blocks for professional, evidence-based practice of audiology.
- Students graduating from the AuD program will be able to analyze and evaluate clinical information by graduation.
- Students graduating from the AuD program will meet eligibility criteria for certification or licensure in audiology.

Career opportunities

A career as an audiologist offers fulfilling work with an exceptional work-life balance. Graduates who complete the Doctor of Audiology degree find rewarding careers in hospitals, physician's offices, audiology clinics, school districts and industry. Careers associated with a doctoral degree in audiology and areas of specialization include:

- audiologist
- cochlear implant audiologist
- cochlear implant manufacturer representative
- educational audiologist
- hearing aid manufacturer representative
- intraoperative monitoring
- manufacturer representative
- pediatric audiologist
- research audiologist
- vestibular audiologist

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Auditory and Language Neuroscience, MS (NHALNEUMS)

College/School: College of Health Solutions

Campus: Tempe

Program description

The Master of Science program in auditory and language neuroscience trains you in basic and applied research to prepare you for doctoral-level graduate studies and for positions in science, health care and industry.

In addition to innovative coursework in neuroscience, this program includes hands-on training in instrumentation, such as neuroimaging, neurophysiology and clinical research applications. You develop a strong foundation that enables you to conduct impactful neuroscience research related to auditory and language processing and human communication.

In the program, you receive guided mentorship from faculty as you learn to support and conduct impactful and innovative neuroscience research.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Speech and Hearing Science, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

31 credit hours and a thesis, or
31 credit hours including the required applied project course (SHS 593)

Required Core (6 credit hours)
BST 501 Biostatistics for Research and Practice (3), PSY 530 Intermed Statistics (4) or STP 530 Applied Regression Analysis (3)
SHS 542 Applied Research Methods in Auditory and Language Neuroscience (3)

Neuroscience Courses (6 credit hours)
SHS 513 Auditory Neuroscience (3)
SHS 598 Topic: Language and Communication Neuroscience (3)
SHS 598 Topic: Speech Neuroscience (3)

Restricted Electives (6 credit hours)

Research (6 credit hours)
SHS 592 Research (6)

Other Requirement (1 credit hour)
SHS 590 Topic: Research Integrity and Conduct in ALN (1)

Culminating Experience (6 credit hours)
SHS 593 Applied Project (6) or
SHS 599 Thesis (6)

Additional Curriculum Information
Students should contact the academic unit for a list of approved elective courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

• graduate admission application and application fee
• official transcripts
• three references (academic or professional)
• letter of intent
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

In the letter of intent, applicants should indicate potential research mentors with whom they are interested in working, previous experiences that have prepared them for success in the program, and career plans.

Contact information for three references is required. References are contacted via email to respond to a series of questions about the applicant and may submit an optional letter of recommendation. References should be instructors, research mentors or clinical supervisors who can speak to the applicant's aptitude for research and master's-level coursework.

Applicants are encouraged to submit a writing sample, such as an honors thesis, conference abstract, article or chapter.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Demonstrate the ability to critically analyze and synthesize knowledge from the neuroscience research literature related to language and hearing
- Demonstrate competence in experimental design, data collection, data analysis and interpretation of neuroscience research related to language and hearing
- Demonstrate the ability to identify and describe principles and concepts related to the responsible conduct of research

Career opportunities

The experience that graduates acquire through clinical and medical applications and the skills they gain in lab rotations give them increased marketability and enable them to be competitive for jobs in technology or for further doctoral-level training.

Employment opportunities for graduates include working in team settings in clinical research centers and hospitals; with manufacturers of hearing aids, cochlear implants and EEG systems or augmentative and alternative communication applications; and with software development companies working with speech recognition programs and brain-computer interfaces.

Career examples include:

- data analyst
- educator
- laboratory technician or manager
- product developer
- public relations specialist or spokesperson for a research institute or device manufacturer
- research scientist

- speech analyst for a tech company

Behavioral Health (Clinical), DBH (NHBVHCDBH)

College/School: College of Health Solutions

Campus: Online

Program description

The Doctor of Behavioral Health with a clinical concentration is a global, interdisciplinary degree program, open to you whether you are a domestic or international student. This program offers you an innovative curriculum and an applied research project based on implementation science.

Integrated health care is a team-based, coordinated approach that addresses medical, behavioral and lifestyle issues with the goal of promoting positive behavioral changes. If you have completed clinical training and have supervised clinical experience, the clinical concentration is tailored for you. You practice within the scope of your state-issued clinical license in this concentration.

The curriculum addresses:

• barriers to patient access
• the problem of poor health outcomes
• rising health care costs

Your learning experience offers innovative courses led by experienced faculty, collaborative interactions with peers, and written assignments that reflect the style of clinical and business proposals. The culminating project focuses on clinical quality improvements in an integrated care setting. The project addresses components such as a primary care clinic's clinical, operational and financial challenges by applying the quality improvement model taught in the program to solve key problems.

As a graduate of the clinical concentration, you are positioned to achieve the Quintuple Aim in health care:

• cost savings
• health equity
• improved health care team experience
• improved patient experience of care
• population health management

This program of study does not provide a pathway to licensure.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (IBC 793)

Required Core (15 credit hours)
HCD 501 Population Health Data Management and Analysis (3)
HSC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)

HSC 686 Academic Writing for Health Sciences (3)
HSC 720 Entrepreneurship and Interdisciplinary Health Systems (3)
IBC 611 Population-based Integrated Health Management (3)

Concentration (12 credit hours)
IBC 601 Models of Health Care (3)
IBC 603 Brief Interventions in Integrated Health Care (3)
IBC 604 Clinical Medicine/Pathophysiology (3)
IBC 608 Psychopharmacology for the Health Care Providers (3)

Electives or Research (27 credit hours)

Culminating Experience (6 credit hours)
IBC 793 Applied Project (6)

Additional Curriculum Information
Students who enter the doctoral program with a master's degree in a related discipline may count up to 15 credit hours from the master's degree toward the total credit hours, with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• acknowledgment of program policies
• copy of the applicant's license or license eligibility
• one reference (professional)
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who have a master's degree in counseling, family therapy, nursing, PA/NP, occupational health or social work, among others, are encouraged to apply. Students in the clinical concentration are required to be licensed or license-eligible to practice in a clinical field. The most competitive candidates are master's degree-level professionals who are either currently employed or have direct patient care experience in a clinical capacity in an integrated health care organization.

"Licensed" and "license-eligible" are terms defining a license to practice that is issued by a state licensing board (e.g.,

Arizona Board of Behavioral Health Examiners, Arizona Board of Occupational Therapy Examiners, Arizona Board of Physician Assistants). Examples include license-eligible master's degree-level behavioral clinician, licensed master's degree-level behavioral clinician, and master's degree-level licensed medical or ancillary health care provider (nurse, nurse practitioner, dietitian, occupational therapist). The DBH program does not offer any pathway to licensure.

The personal statement should indicate the applicant's interest in the program, their career goals and how the degree program aligns with those goals, how the applicant believes medical and behavioral providers can work collaboratively in an integrated health care system, and how the applicant plans to navigate the academic rigor required in a doctoral-level program.

Contact information of at least one reference is required. The reference is contacted via email to respond to a series of questions about the applicant. Examples of appropriate references include:

• a supervisor who can assess the applicant's clinical or professional performance (preferred)
• a faculty member from the applicant's master's degree program who is well-acquainted with the applicant's professional practice or academic achievement
• other professional (who is not a relative), such as a licensed behavioral health clinician, medical provider or other health care provider

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/doctor-behavioral-health-clinical/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Employ evidence-based medical and behavioral health practices to design interventions for conditions that have a high impact on primary care practice.
- Collaboratively demonstrate how primary care organizations can initiate changes leading to substantial improvements in access, patient and provider satisfaction and quality of clinical care.
- Design and execute a quality improvement project in an integrated care setting.

Career opportunities

Graduates of the clinical concentration program have the skills to move into clinical leadership and management positions across health care settings. They are well prepared to develop and manage programs related to integrated behavioral health care.

Potential job titles include:

- behavioral health provider, consultant or specialist in primary care and other medical settings
- CEO of integrated care
- clinical team manager
- director of clinical services or operations
- health and wellness manager
- integrated care clinical provider
- integrated care manager or consultant
- integrated health care manager or specialist

- wellness program administrator

Behavioral Health (Management), DBH (NHBVHMDBH)

College/School: College of Health Solutions

Campus: Online

Program description

The Doctor of Behavioral Health program with a concentration in management is a global, interdisciplinary degree program open whether you are a domestic or international student. This program offers you an innovative curriculum and an applied research project based on implementation science.

Integrated health care is a team-based, coordinated approach that addresses medical, behavioral and lifestyle issues with the goal of promoting positive behavioral changes. The management concentration enables you to adapt innovative management practices to the specific geography and culture of your local health systems.

The curriculum focuses on:

• accountable care organization models
• business entrepreneurship
• health technologies such as electronic health records, mobile health applications and wearable health monitoring devices
• integrated behavioral health program design
• integrated health management in primary and specialty care, especially in the patient-centered medical home
• quality and performance measurement

Upon graduation, you are positioned to achieve the Quintuple Aim in health care:

• cost savings
• health equity
• improved health care team experience
• improved patient experience of care
• population health management

You learn to apply entrepreneurial concepts and skills to promote integrated health programs with key stakeholders, such as medical directors and chief executive officers.

This program of study does not provide a pathway to licensure.

STEM-OPT extension eligible: No

Degree requirements

60 credit hours including the required applied project course (IBC 793)

Required Core (15 credit hours)
HCD 501 Population Health Data Management and Analysis (3)
HSC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)

HSC 686 Academic Writing for Health Sciences (3)
HSC 720 Entrepreneurship and Interdisciplinary Health Systems (3)
IBC 611 Population-based Integrated Health Management (3)

Concentration (15 credit hours)
HCD 602 Health Informatics for Health Care Professionals (3)
HSC 626 Interdisciplinary Health Care Management (3)
HSC 630 Financial Management of Health Care (3)
HSC 660 Legal, Ethical and Professional Issues in Interdisciplinary Health Systems (3)
IBC 601 Models of Health Care (3)

Electives or Research (24 credit hours)

Culminating Experience (6 credit hours)
IBC 793 Applied Project (6)

Additional Curriculum Information
Students who enter the doctoral program with a master's degree in a related discipline may count up to 15 credits from that degree toward the total credit hours, with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• acknowledgment of program policies
• one reference (professional)
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants with a master's degree in business administration, public health, nursing, counseling, behavioral health, health care administration or social work, among others, are encouraged to apply. Applicants must be master's degree-level professionals interested in a future health care management position.

The personal statement should indicate the applicant's interest in the program, their career goals, how the degree program aligns with those goals, how the applicant believes medical and behavioral providers can work collaboratively in an integrated health care system, and how the applicant plans to navigate the academic rigor required in a doctoral-

level program.

Contact information for at least one reference is required. The reference is contacted via email to respond to a series of questions about the applicant. Examples of appropriate references include:

• a supervisor who can assess the applicant's clinical or professional performance (preferred)
• a faculty member from the applicant's master's degree who is well-acquainted with the applicant's professional practice or academic achievement

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/doctor-behavioral-health-management/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Collaboratively demonstrate how primary care organizations can initiate changes leading to substantial improvements in access, patient and provider satisfaction, quality of clinical care, and increased revenue.
- Develop a sustainable business case for integration including return on investment and medical cost offsetting.
- Design and execute a quality improvement project in an integrated care setting.

Career opportunities

Graduates of the management concentration have the organizational understanding and management skills required to move into leadership and management positions across health care settings. They are well prepared to develop and manage programs related to integrated behavioral health care. Graduates often choose careers in integrated care practice management; leadership positions in integrated care delivery systems, health plans and managed care organizations; and positions as integrated care industry consultants.

Potential job titles include:

- behavioral health staff coordinator
- CEO or director of an integrated care practice or organization
- director of physician relations
- health and wellness director
- integrated care manager
- member services director
- operational care manager or team leader
- practice manager and facilitator
- quality improvement manager
- site administrator
- wellness program administrator

Biomedical Diagnostics, MS (NHBMDMS)

College/School: College of Health Solutions

Campus: Online

Program description

In the Master of Science in biomedical diagnostics, you gain insights into a growing industry that's at the center of health care innovation and personalized medicine.

The biomedical diagnostics program has been designed by expert faculty with significant experience in the business, legal and technical aspects of diagnostics.

You progress through the five foundational areas:

• application of diagnostics
• business of diagnostics
• policy of diagnostics
• science of diagnostics
• technology of diagnostics

You complete a culminating experience in which you work with fellow students on a team-based project with diagnostics industry leaders on a topic driven by practical needs in the field.

STEM-OPT extension eligible: No

Degree requirements

31 credit hours including the required applied project course (BMD 593)

Required Core (19 credit hours)
BMD 502 Foundations of Biomedical Informatics Methods I (3)
BMD 510 Current Perspectives in Biomedical Diagnostics (3)
BMD 513 Principles of Diagnostic Technology: Immunoassays (4)
BMD 514 Principles of Diagnostic Technology: Molecular Diagnostics (3)
BMD 667 Regulation of Medical Diagnostics (3)
HCD 511 Health Economics and Policy (3)

Electives (6 credit hours)

Research (3 credit hours)
BMD 592 Research (3)

Culminating Experience (3 credit hours)
BMD 593 Applied Project (3)

Additional Curricular Information
Students should see the academic unit for a list of approved elective courses. BMD 592 and BMD 593 are contiguous courses and cannot be taken in different academic years.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Prior degrees in health, engineering, science, supply chain management, or a related field are preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• one reference (academic or professional)
• resume or curriculum vitae
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The one- to two-page statement of purpose should include the applicant's interest in the program, what they expect to learn from the program, their professional goals, and a short description of their background in the sciences.

Contact information for one reference is required. The reference is contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-biomedical-diagnostics/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Execute a team-based research project and show effective teamwork skills.
- Evaluate regulatory models for medical devices, with an emphasis on the regulation of biomedical diagnostics.
- Synthesize public and private health care finance and reimbursement, and the impacts to the diagnostics industry

Career opportunities

Professional opportunities are broad and depend on the graduate's educational and work backgrounds and personal interests. They can pursue diverse options such as executive leadership, competitive intelligence, research and

development, laboratory management or entrance to professional school. The following career examples are just a small portion of the possibilities:

Analysts

- clinical research
- competitive intelligence
- laboratory research
- quality assurance

Department and organizational leadership

- diagnostics
- laboratory
- regulatory compliance
- research and development

Managers

- accounts
- clinical research
- marketing and sales
- medical and health services
- product
- quality control
- program and project management

Laboratorians and technologists

- clinical lab
- research lab

Biomedical Informatics and Data Science, MS (ESBIOINFMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Master of Science program in biomedical informatics and data science offers you the opportunity to become a professional who uses biomedical data, information and knowledge to improve human health.

You learn problem-solving, theory and the methodologies underlying the field of biomedical informatics, taking courses in areas such as knowledge representation, clinical environments, imaging, bioinformatics and data science. Core courses provide a background in clinical informatics, while electives allow specialization in areas such as data science, mobile health or artificial intelligence.

Biomedical informatics and data science fosters collaborations among academic researchers, clinical practitioners and regional health care providers to apply new developments in informatics theory to clinical practice. You gain the informatics and data science knowledge and skills that enable you to:

• detect disease early
• improve the patient hospital experience
• improve the precision of diagnosis
• improve the quality of patient health care and reduce its cost
• minimize hospital visits

Biomedical informatics has a key role to play in the transition to more effective and efficient health care through the use of knowledge and information technology.

You should note that some courses and faculty offices are located at the Health Futures Center (https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEA111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10) in North Phoenix.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Biomedical Informatics and Data Science, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

32 credit hours including the required applied project course (BMI 593)

Required Core (17 credit hours)
BMI 502 Foundations of Biomedical Informatics Methods I (3)
BMI 505 Foundations of Biomedical Informatics Methods II (3)
BMI 540 Problem Solving in Biomedical Informatics (3)
BMI 570 BMI Symposium (2)
BMI 601 Fundamentals of Health Informatics (3)
BST 515 Applied Biostatistics in Medicine and Informatics (3)

Other Requirements (3 credit hours)
BMI 404 Clinical Environments (3) or
BMI 504 Introduction to Clinical Environments (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)
BMI 593 Applied Project (3)

Additional Curriculum Information
BMI 570 is a one credit hour course. Students take BMI 570 twice for a total of two credit hours.

BMI 404 and BMI 504 require in-person observations within local health clinics. To conduct clinical observations, students must meet additional requirements prior to course enrollment, which typically include proof of vaccination, fingerprint clearance and background check, and a drug test.

Students should contact the academic unit for a list of approved elective courses. Electives must include at least six credit hours of BMI coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biology, computer science, engineering, nursing or statistics from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• resume or curriculum vitae
• two references (academic or professional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who have earned degrees in other unrelated fields with appropriate academic backgrounds or postbaccalaureate training also are considered.

All applicants must have basic competencies in general biology (BIO 181 or equivalent), statistics (HCD 300 or STP 226 or equivalent) and computer programming (BMI 110 or CSE 110 or equivalent).

A one- to two-page statement of purpose is required. Students must explain why they are interested in the program, outline their background, describe expected outcomes from the program, identify potential faculty advisors and areas of research, and elaborate on how the degree will support their goals. To accommodate applicants' diverse backgrounds, the statement must include at least one paragraph that describes the applicant's educational and professional background in the following three areas: computer science; statistics and mathematics; and biological sciences and health sciences.

Contact information for two references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Synthesize the history and values of biomedical informatics and its relationship to other fields while demonstrating an ability to read, interpret and critique the core literature and be prepared to be successful in the biomedical informatics workforce.
- Apply and evaluate approaches in the context of biomedical problems, including imaging and signal analysis; information documentation, storage and retrieval; machine learning and data mining; networking, security and databases; natural language processing and semantic technologies; representation of logical and probabilistic knowledge and reasoning; simulation and modeling; and software engineering.
- Apply knowledge in design, evaluation, behavioral and organizational sciences, ethical and legal issues, and economic and social context of biomedical research, pharmaceutical and biotechnology industries, medical instrumentation, health care and public health.

Career opportunities

Professionals with advanced training in biomedical informatics and data science are in high demand across a variety of sectors and industries, including academic institutions, not-for-profit research institutes, government and public health agencies, and health care organizations, as well as information technology, biotech and pharmaceutical industries. Graduates can also pursue admission to medical school.

Career examples include:

- analyst
- bioinformatics scientist
- data scientist
- product manager
- research scientist

Biomedical Informatics and Data Science, PHD (ESBMIPHD)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Doctor of Philosophy program in biomedical informatics and data science enables you to develop expertise in areas such as bioinformatics, clinical informatics, population health management, imaging and biomedical data science.

This program fosters collaboration among academic researchers, health care providers and industry partners and allows you to apply new developments in informatics theory to clinical practice, biomedical research and public health. You may also explore cross-cutting areas such as artificial intelligence and digital health.

You learn at the leading edge of the field through specialized coursework in an area of focus and independent research. The program fosters strong collaborative relationships with a variety of health care organizations, the bioscience industry and governmental agencies, providing an unparalleled opportunity for you to explore and contribute to advances in biomedical informatics and data science

You should note that some courses and faculty offices are located at the Health Futures Center (https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEA111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10) in North Phoenix.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (22 credit hours)
BMI 502 Foundations of Biomedical Informatics Methods I (3)
BMI 504 Introduction to Clinical Environments (3)
BMI 505 Foundations of Biomedical Informatics Methods II (3)
BMI 540 Problem Solving in Biomedical Informatics (3)
BMI 560 Teaching in Biomedical Informatics (2)
BMI 570 BMI Symposium (2)
BMI 601 Fundamentals of Health Informatics (3)
BST 515 Applied Biostatistics in Medicine and Informatics (3)

Electives (32 credit hours)

Research (18 credit hours)
BMI 792 Research (18)

Culminating Experience (12 credit hours)
BMI 799 Dissertation (12)

Additional Curriculum Information
Students entering the doctoral program with a master's degree in a related discipline may count up to 30 credit hours from the master's degree toward the total credit hours, with program approval.

BMI 504 requires in-person observations within local health clinics. To conduct clinical observations, students must meet additional requirements prior to course enrollment, which typically include proof of vaccination, fingerprint clearance and background check, and a drug test.

BMI 560 and BMI 570 should be taken twice for one credit hour each time.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• educational background essay
• resume or curriculum vitae
• three references (academic or professional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Prior bachelor's or master's degrees in biology, computer science, engineering or statistics, or postbaccalaureate training as a health professional in medicine, nursing or pharmacy is preferred. Applicants who have earned degrees in other unrelated fields with appropriate academic backgrounds are also considered.

All applicants must have basic competencies in general biology (BIO 181 or equivalent), statistics (HCD 300 or STP 226 or equivalent) and computer programming (BMI 110 or CSE 110 or equivalent).

The statement of purpose should be one to two pages and indicate the applicant's interest in the program, knowledge of the field and career plans. Applicants are encouraged to connect with program faculty who could be potential research mentors and include this information in their statement if it is available at the time of application.

To accommodate students' diverse backgrounds, the applicant is asked to describe their educational and professional background in the following areas: computer science, decision sciences, artificial intelligence, statistics and mathematics, biological sciences and health sciences. This essay should be no longer than one page.

Contact information of three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Generate designs to solve biomedical informatics and data science problems.

- Apply theories, typology, frameworks, representations, methods and processes used in different contexts of biomedical informatics and data science.
- Create new knowledge, including theories, typologies, frameworks, representations, methods and processes, to address biomedical informatics and data science problems.

Career opportunities

Professionals with advanced training in biomedical informatics and data science are in high demand across a variety of sectors and industries, including academic institutions, not-for-profit research institutes, and governmental and public health agencies and health care organizations, as well as the information technology, biotech and pharmaceutical industries.

Career examples include:

- bioinformatics scientist
- biostatistician
- data scientist
- deep learning engineer
- public health informatics scientist
- research scientist
- senior analyst
- software engineer
- university faculty

Biostatistics, MS (NHBSTMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

The Master of Science program in biostatistics provides you with training in applied biostatistical methodology and its applications to solve practical problems in health-related sciences. You develop the expertise necessary to design, implement, evaluate and disseminate research and translate information into improved health outcomes for individuals, systems and populations.

You learn fundamental biostatistics skills and gain the knowledge necessary for effective collaboration with health researchers, including how to design randomized, controlled clinical trials and intervention studies to guarantee data quality and make valid causal inferences.

An applied research focus and mentorship approach aids you as you work to solve a practical health-related research problem to complete your program.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Health Care Administration and Policy, BS

Applied Mathematics, BS

Statistics, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (BST 693)

Required Core (18 credit hours)
BST 601 Biostatistical Theory and Inference (3)
BST 602 Applied Multi-level and Longitudinal Data Analysis (3)
BST 604 Computational Biostatistics (3)
BST 605 Biostatistical Data Analysis (3)
BST 606 Applied Clinical Trial Design and Analysis (3)
BST 609 Categorical Data Analysis in the Health Sciences (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)
BST 693 Applied Project (3)

Additional Curriculum Information
Elective coursework should be selected in consultation with the program advisor.

The applied project depends on the student's background and goals for after graduation.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in biomedical informatics, demography, mathematics, public or population health, social sciences, or statistics from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

All applicants should have completed and passed an undergraduate statistics course (e.g., HCD 300, STP 226, ECN 221 or PSY 230), a linear algebra course (e.g., MAT 242, MAT 342 or MAT 343), and a calculus course (e.g. MAT 210, MAT 251 or MAT 270) before admission. If the requisite coursework is not completed before admission, it must be completed before matriculating.

The statement of purpose should be one to two pages and indicate the applicant's interest in the program, knowledge of the field, and career plans. Applicants are encouraged to connect with program faculty who could be potential research mentors, and include this information in their statement, if available at the time of application.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/biostatistics-ms/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Solve a real-world biostatistical problem while selecting the appropriate theory and method
- Conduct biostatistical computations and analysis using statistical software
- Communicate biostatistical concepts and analysis results to health practitioners and general audiences

Career opportunities

Graduates are employed in academic institutions, government agencies and health-related industries, and they are well positioned to support public health needs. Career opportunities include these positions:

- biostatistician
- data scientist
- professor
- senior data analyst
- statistician

These positions are all classified as "Bright Outlook occupations" by the Bureau of Labor Statistics; these are officially defined as occupations expected to grow rapidly in the next several years, with large numbers of job openings. They are new and emerging occupations with potentially high salaries.

Biostatistics, PHD (NHBSTPHD)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Doctor of Philosophy program in biostatistics offers a comprehensive and specialized education in the novel development and application of biostatistical methods to the health and biomedical sciences. This innovative program equips you with advanced skills in designing research studies, analyzing data and implementing biostatistical solutions to address applicable health challenges. Collaborating closely with health researchers and professionals from various disciplines, you develop expertise in crafting impactful strategies for improving health outcomes and advancing medical research.

Emphasis is placed on designing and analyzing randomized controlled clinical trials, intervention studies and biostatistical models. Collaborations within ASU's College of Health Solutions foster a dynamic environment for cross-disciplinary learning and research. You're encouraged to engage with a wide spectrum of health-related fields, including behavioral science, biomedical informatics, kinesiology, nutrition and population health.

By working closely with health researchers, you gain valuable hands-on experience in problem-solving, data analysis and collaborative research. This approach not only enhances your technical skills but also cultivates effective communication and teamwork abilities, which are vital for thriving in diverse health care environments.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a qualifying exam, a written comprehensive exam, a prospectus and a dissertation

Required Core (18 credit hours)
BST 601 Biostatistical Theory and Inference (3)
BST 602 Applied Multi-level and Longitudinal Data Analysis (3)
BST 603 Survival Data Analysis (3)
BST 606 Applied Clinical Trial Design and Analysis (3)
BST 608 Applied Meta-analysis (3)
BST 609 Categorical Data Analysis in Health Sciences (3)

Electives (42 credit hours)

Research (12 credit hours)
BST 792 Research (12)

Culminating Experience (12 credit hours)
BST 799 Dissertation (12)

Additional Curriculum Information
Elective coursework should be selected in consultation with the program advisor. Students may also work with their program director to identify suitable elective alternatives.

This program requires a qualifying exam and a written comprehensive exam. Submission of a written dissertation prospectus and its oral defense are required. It is expected that the prospectus and defense be completed no later than the end of the fourth year.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in applied statistics, applied mathematics, quantitative psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• two references (academic or professional)
• statement of purpose
• writing sample (six to 10 pages)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

All applicants must have completed and passed an undergraduate statistics course (e.g., HCD 300, STP 226, ECN 221, PSY 230), a linear algebra course (e.g., MAT 242, MAT 342, MAT 343), and a calculus course (e.g., MAT 210, MAT 251, MAT 270) before admission. If the requisite coursework is not completed before admission, it must be completed before matriculating.

Contact information of two references is required. References are contacted via email to submit a letter of recommendation. Letters of recommendation preferably are written by instructors, research mentors or supervisors who can speak to the applicant's aptitude for research and graduate-level coursework.

The statement of purpose should be one to two pages and indicate the applicant's interest in the program, knowledge of the field and career plans. Applicants are encouraged to connect with program faculty who are potential research mentors and include this information in their statement, if available at the time of application.

Preference is given to students with extensive quantitative background and computation skills, and health-related experience.

An oral interview with the program faculty is required. Strong applicants are contacted to schedule an interview in person or via videoconference before acceptance.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply fundamental biostatistical theory and methods to solve health-related applications
- Conduct advanced data analysis using biostatistical methods in clinical trials and public health intervention studies
- Conduct independent original research to solve a health-related challenge and present their findings in a written dissertation and oral defense

Career opportunities

Graduates with a doctorate in biostatistics can be employed in academic institutions, government agencies and industries as:

- biostatisticians
- data scientists
- professors
- senior data analysts
- statisticians

These positions are all classified as "Bright Outlook occupations" from the Bureau of Labor Statistics, which defines them as the occupations expected to grow rapidly in the next several years with large numbers of job openings. They are new and emerging occupations with potentially high salaries.

Clinical Exercise Physiology, MS (NHCEPMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

In the Master of Science program in clinical exercise physiology, you learn how to use primary and secondary prevention strategies to improve, maintain or abate declines in fitness and health in populations of various age groups.

You learn to collaborate with medical professionals to guide exercise and rehabilitation programs for at-risk clients and those with chronic diseases. The program offers personalized mentorship and hands-on experience with expert faculty in research and clinical settings.

You obtain the knowledge, clinical experience and skills needed to successfully complete the examination for the registered clinical exercise physiologist certification offered by the American College of Sports Medicine, https://www.acsm.org/ (https://www.acsm.org/).

This program is accredited through the Commission on Accreditation of Allied Health Education Programs endorsed by the American College of Sports Medicine, https://www.caahep.org/ (https://www.caahep.org/).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Clinical Exercise Science, BS

Kinesiology, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

31 credit hours and a written comprehensive exam, or
31 credit hours, a thesis and a written comprehensive exam

Required Core (21 credit hours)
BST 501 Biostatistics for Research and Practice (3)
EXW 535 Advanced Exercise Assessment and Prescription (3)
EXW 542 Health Promotion (3)
EXW 560 Cardiopulmonary Rehabilitation (3)
EXW 565 Cardiovascular and Pulmonary Physiology (3)
EXW 568 Management and Treatment of Chronic Disease for the Clinical Exercise Physiologist (3)
KIN 547 ECG Interpretation (3)

Seminar (1 credit hour)
EXW 591 Seminar: Clinical Exercise Physiology (1)

Other Requirement (3 or 9 credit hours)
EXW 515 Advanced Exercise Physiology (3) and EXW 584 Internship (6) or
NTR 500 Research Methods (3)

Culminating Experience (0 or 6 credit hours)
written comprehensive exam (0) or
EXW 599 Thesis (6)

Additional Curriculum Information
This program has a thesis option and a nonthesis option. Students in the thesis option must take NTR 500 Research Methods before EXW 599 Thesis. Students who select the nonthesis option must complete a clinical internship of six credit hours of EXW 584 Internship and take three credit hours of EXW 515 Advanced Exercise Physiology.

All students must pass a written comprehensive exam. Thesis students must also pass an oral defense.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in exercise science, exercise physiology, kinesiology or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• letter of intent
• three references (academic or professional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who do not have credit for basic courses from their undergraduate degree must complete the courses before beginning the application process or before beginning graduate coursework. The corresponding ASU course is in parentheses:

• Exercise Prescription (EXW 425)
• Exercise Testing with Laboratory (EXW 420)
• Functional Anatomy and Kinesiology (KIN 334)
• Human Nutrition (NTR 241)
• Human Anatomy and Physiology with laboratories (BIO 201 and BIO 202)
• Physiological Foundations of Movement Exercise Physiology (KIN 340)
• Psychology (PSY 101)
• Statistics (STP 226 or similar)

The letter of intent should be 600 words or less and address the applicant's area of professional or scholarly interest, career and professional goals, and relevant background, experience and training.

Contact information of three references is required. References are contacted via email to respond to a series of questions about the applicant. At least two references must be academic (such as prior instructors) with at least one from the applicant's major. The third reference may be from an academic or related professional source.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Synthesize the current literature and guidelines on the epidemiology, pathophysiology, progression, risk factors, key clinical findings, and treatments of chronic diseases.
- Create exercise training interventions for patients with chronic disease.
- Analyze patient status changes through continuous monitoring of exercise interventions while incorporating behavior modification models that support active patient engagement.

Career opportunities

Clinical exercise physiology, in which exercise is used to help clients manage or reduce their risk of chronic disease, is an exciting and growing profession in the health care realm. It has recently been organized on the national level and is now recognized by the federal government and defined as an occupation.

The American College of Sports Medicine is the national association that establishes guidelines and recommendations for exercise testing and prescription as well as evaluation of research for both healthy populations and those with chronic disease. Graduates are prepared to sit for ACSM certification, the organization's most prestigious credential for clinical professionals.

This unique and vital profession will grow as certifications and licensures support the value of clinical exercise physiology. Career opportunities are available in:

- hospital-based clinical research facilities
- hospitals
- outpatient clinics
- physician offices
- university and research laboratories
- worksite wellness centers

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Clinical Molecular Diagnostics, Certificate (NHCMDGRCT)

College/School: College of Health Solutions

Campus: Online

Program description

The graduate certificate program in clinical molecular diagnostics allows you to take your undergraduate degree and= upskill in the area of molecular diagnostics without completing a second degree. In this certificate program, you obtain a

skill set that is in demand by health care organizations, the biotechnology industry and the public health arena.

You learn the skills and knowledge needed to work in clinical laboratories while making a positive impact on health outcomes. The program provides a foundation in clinical molecular diagnostic theory and genetic principles, prepares you for clinical laboratory work by connecting theory with application, and engages you in a hands-on practicum experience.

You obtain the knowledge, clinical experience and skills you need to successfully complete the professional examination to become a certified technologist in molecular biology offered through the American Society for Clinical Pathology. Additionally, if you're interested in furthering your education, you may request to apply credits earned from this certificate to the Master of Science program in biomedical diagnostics with the approval of the academic unit and the Graduate College.

The program is seeking initial accreditation through the National Accrediting Agency for Clinical Laboratory Sciences: https://naacls.org/ (https://naacls.org/); 5600 N River Rd, Des Plaines, IL 60018; (773) 714-8880. Refer to the college webpage for additional accreditation information (https://chs.asu.edu/degree-programs/additional-program-information).

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (13 credit hours)
BMD 510 Current Perspectives in Biomedical Diagnostics (3)
BMD 513 Principles of Diagnostic Technology: Immunoassays (4)
BMD 514 Principles of Diagnostic Technology: Molecular Diagnostics (3)
MDL 570 Applications of Molecular Diagnostics in the Clinical Laboratory (3)

Other Requirements (2 credit hours)
MDL 580 Practicum (2)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biomedical informatics, biology, life sciences, chemistry, biochemistry, engineering, biomedical engineering, health sciences, medical studies, or medical and clinical laboratory science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admissions application and application fee
• official transcripts
• one reference (academic or professional)
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Prior to starting the program, all students must have coursework in the following areas as evidenced in their transcript:

• cell biology
• genetics
• microbiology
• organic chemistry or biochemistry

A personal statement must be submitted that explains what the applicant's career aspirations are, how the program will help the applicant achieve their goals, and what interests the applicant in this program.

Contact information of one reference is required. The reference is contacted via email to submit a letter of recommendation. The reference must be an academic or professional source; friends and relatives are not accepted.

Applicants may provide a resume or curriculum vitae to support their application, though this is not required for admission consideration.

Applicants are strongly encouraged to have current employment in a laboratory setting where they may complete the required in-person practicum, though it is not required for admission consideration. Students are responsible for finding their practicum site and are encouraged to connect with the unit early to discuss the process for securing a practicum site if needed.

International students who are admitted to this program are required to complete an in-person practicum located in the United States. International applicants should consult with the International Students and Scholars Center (https://issc.asu.edu/) to check their eligibility requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/clinical-molecular-diagnostics-certificate/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared to sit for the certified technologist in molecular biology exam offered through the American Society for Clinical Pathology, and they gain a competitive advantage for careers in diagnostic molecular and cellular biology. Obtaining certification credentials through a national certification examination is not required to graduate from the certificate program.

Career opportunities in the field of molecular diagnostics include:

cytogenetics
genetics
immunology
industry development and sales
laboratory management

Graduates may work as a:

- medical laboratory scientist
- molecular diagnostics technologist
- molecular laboratory scientist
- molecular specialist
- research technologist

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential= licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for= licensure or certification in another state. Communication Disorders in Multilingual/Multicultural Populations, Certificate (NHCDMPGRCT)

College/School: College of Health Solutions

Campus: Tempe

Program description

If you are a student in the Master of Science program in communication disorders, the certificate program in= communication disorders in multilingual/multicultural populations is designed for you. The program provides you with= expanded coursework in issues related to culturally and linguistically diverse populations.

In addition to specialized academic courses, the program offers you clinical experience in community-based settings and= engagement in community-centered, interprofessional projects.

You gain the knowledge and practical experience to effectively address the needs of culturally and linguistically diverse= adults, children and families. Knowledge of another language is not required.

STEM-OPT extension eligible: No

Degree requirements

17 credit hours including the required applied project course (SHS 593)

Required Core (10 credit hours)
SHS 524 Counseling in Communication Disorders (2)
SHS 570 Communication Disorders and Multicultural Populations (2)
SHS 586 Language Essentials for Teaching Reading (2)
SHS 588 Bilingual Language Acquisition (2)
SHS 597 Bilingual Speech-Language Pathology (2)

Other Requirement (5 credit hours)
SHS 584 Clinical Internship (5)

Culminating Experience (2 credit hours)

SHS 593 Applied Project (2)

Additional Curriculum Information
The culminating experience is an applied, community-based project that builds depth of knowledge.

Students who wish to obtain a bilingual endorsement must complete the Arizona Classroom Teacher Spanish Proficiency Examination administered by the School of International Letters and Cultures.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must be enrolled in the MS program in communication disorders at ASU.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who are currently enrolled in the MS program in communication disorders are encouraged to connect early with their graduate advisor regarding the recommended timeline for applying to this certificate program.

Applicants who are not yet admitted to the MS program in communication disorders may apply to that program and this certificate program at the same time (separate applications are required). Acceptance to the certificate program is not granted if the applicant is not accepted to the MS program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Adapt communication, assessment, and treatment to meet the cultural and linguistic diversity of the clients they serve.
Prepared to use evidence-based practices to serve clients who are culturally and linguistically diverse.
Practice as a speech-language pathology clinician and evaluate appropriate resources, including mentorship, in settings that have culturally and linguistically diverse populations.

Career opportunities

Employers in many settings value professionals who are equipped to work with diverse populations. A graduate with this certificate can advance their career options as a certified and licensed speech-language pathologist. The certificate demonstrates that the graduate has undertaken the specialized training required to work with clients who are from diverse linguistic or cultural backgrounds.

Communication Disorders, MS (LACOMDISMS)

College/School: College of Health Solutions

Campus: Tempe

Program description

The Master of Science program in communication disorders prepares you to become a certified speech-language pathologist. You can complete this full-time residential program in 20 months.

In the first year of the program, you'll take a series of courses to develop knowledge of and skills in assessment and intervention approaches for communication disorders across the lifespan. You'll also gain hands-on experience providing services to actual clients in on-campus clinics, guided by clinical faculty educators.

In the second year, you'll take required and elective courses to further develop your knowledge in selected topic areas and to acquire additional clinical skills in supervised external placements in the community.

This program offers you research and clinical opportunities in many diverse settings, including:

• early intervention programs and private practice clinics
• inpatient and outpatient medical sites
• public schools

A part-time employment program is available for speech-language pathology assistants in public schools. If seeking specialized training, you can pursue a certificate in multilingual and multicultural services along with this program. If you are interested in research, you have the opportunity to work in labs and complete a master's thesis.

You may have the option of completing some second-year courses via ASU Sync, with program approval. ASU Sync enables you to attend live classes remotely via Zoom, and classes are designed to foster your active collaboration and discussion in real time with faculty and peers.

If you have F-1 or J-1 immigration status, you should verify that you meet the minimum in-person credit hour and total credit hour enrollment requirements before requesting permission to enroll in courses via ASU Sync.

If you seek to use GI Bill® benefits for this ASU Sync program, you should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. See the official U.S. government website for more information about education benefits offered by VA at www.benefits.va.gov/gibill/ (https://www.benefits.va.gov/gibill/).

This program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing

Association. https://www.asha.org/ (https://www.asha.org/) Refer to the college webpage for additional accreditation information (https://chs.asu.edu/degree-programs/additional-program-information).

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and a thesis, or
60 credit hours and a written comprehensive exam

Required Core (34 credit hours)
SHS 538 Clinical Methods and Simulation in Speech-Language Pathology (4)
SHS 539 Professional Issues in Speech-Language Pathology (2)
SHS 567 Neural Bases of Communication Disorders (2)
SHS 570 Communication Disorders and Multicultural Populations (2) or SHS 597 Bilingual Speech-Language Pathology (2)
SHS 571 Augmentative Communication and Language Programming (2)
SHS 572 Language Assessment and Intervention in Infants and Toddlers (2)
SHS 573 Language Assessment and Intervention with School-Age Populations (2)
SHS 574 Management of Feeding and Swallowing Disorders (2)
SHS 575 Aphasia and Related Neurogenic Language Disorders (2)
SHS 577 Current Assessment, Intervention and Research in Autism (2)
SHS 578 Fluency Disorders (2)
SHS 579 Voice and Resonance Disorders (2)
SHS 581 Traumatic Brain Injury and Cognitive Linguistic Disorders (2)
SHS 582 Differential Diagnosis of Communication Disorders (2)
SHS 585 Articulation and Phonology: Assessment and Intervention (2)
SHS 587 Language Assessment and Intervention with Preschool Populations (2)

Electives (0 or 6 credit hours)

Other Requirements (20 credit hours)
SHS 500 Research Methods (1)
SHS 580 Clinical Practicum (9)
SHS 584 Clinical Internship (10)
American Speech-Language-Hearing Association Praxis national exam in speech language pathology (0)

Culminating Experience (0 or 6 credit hours)
written comprehensive exam (0) or
SHS 599 Thesis (6)

Additional Curriculum Information
SHS 538 and SHS 539 should each be taken twice across consecutive fall and spring semesters. Students should repeat SHS 580 and SHS 584 until they have completed nine credits of SHS 580 and 10 credits of SHS 584. Students who choose the written comprehensive examination as their culminating experience must take six credit hours of electives. Students should see their academic unit for a list of approved elective courses.

All students must take the American Speech-Language-Hearing Association Praxis national exam and have their scores reported to the program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in speech and hearing science or a related field from a regionally accredited institution and completed prerequisite coursework in speech and hearing.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• personal statement, not to exceed 300 words
• three references (academic or professional)
• CASPER Situational Judgment Test (optional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

All applicants must complete competencies in the following areas before matriculation (ASU-related coursework is included in parentheses):

• biological sciences (BIO 160, BIO 181 or BIO 201 recommended)
• physics or chemistry (PHY 101 or CHM 101)
• statistics, not speech and hearing science related (HCD 300, STP 226 or PSY 230)
• psychology, sociology, anthropology or public health (PSY 101 or SOC 101 recommended)

Applicants who have earned a bachelor's degree in an area other than speech and hearing sciences must complete additional competencies in speech and hearing sciences before admission. Competencies include the following (ASU-related coursework is included in parentheses):

• Introduction to Phonetics (SHS 250)
• Anatomical and Physiological Bases of Speech (SHS 310)
• Hearing Science (SHS 311)
• Language Science (SHS 367)
• Speech Science (SHS 375)
• Introduction to Audiology (SHS 401)
• Clinical Methods and Treatment of Communication Disorders (SHS 402)
• Speech and Language Acquisition (SHS 465 or 565)
• Aural Rehabilitation (SHS 496 or 596)

Applicants who are in the process of completing prerequisite coursework are encouraged to submit their application after final grades for relevant fall term courses have been posted to their transcript and before the priority deadline. The admission committee begins reviewing complete applications after the priority deadline. Applications are considered complete when all materials, including letters of reference, have been received.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. It is recommended that the applicant submit two references from faculty in speech and hearing or a related field; the third may be professional.

CASPER is a proctored, online situational judgment test. Examinees can take the exam anywhere with an internet connection. The test takes 65-85 minutes to complete. For more information, see https://acuityinsights.app/ (https://acuityinsights.app/). The CASPER exam is not required for admission.

An interview may be required in person or via teleconference.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate evidence-based resources using scientific foundation principles to justify an approach to service provision as a speech-language pathologist.
Generate recommendations for clients by synthesizing in-depth knowledge of communication and swallowing processes including etiologies, characteristics, anatomical, physiological, acoustic, psychological, developmental, linguistic and cultural correlates.
Formulate prevention, assessment and treatment options for clients with communication and swallowing disorders.
Demonstrate skill-based competency in evaluating and treating people across the lifespan who have communication, speech, language, literacy, cognition and swallowing difficulties.
Effectively function in their role as a speech-language pathologist including active utilization of interprofessional collaboration, interpersonal skills, counseling skills, supervision and advocation for individuals who need services as well as the ability to act in accordance with the ethical, legal and philosophical principles of the speech-language pathology profession and the American Speech-Language-Hearing Association.

Career opportunities

Speech-language pathologists evaluate speech, language, cognitive, hearing, feeding and swallowing functions, integrating medical history and background information to diagnose disorders and plan treatment. Graduates have many opportunities to work with culturally and linguistically diverse populations.

Speech-language pathologists are in high demand. Employment rates are extremely high across all settings, including:

all school levels, including elementary, middle and high school
early intervention settings, including home health
inpatient and acute care hospitals
neonatal intensive care units
outpatient rehabilitation
pediatric outpatient centers
private practice

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Cytology, MS (NHCYTOLMS)

College/School: College of Health Solutions

Campus: Online

Program description

If you're seeking to advance your current career in the clinical laboratory by becoming a specialist in minimally invasive diagnostic methods, the Master of Science program in cytology is for you. This program's focus on early disease detection and diagnosis is based on the visual analysis of microscopic cellular findings and connecting those findings with the patient's clinical history.

Through virtual labs and didactic coursework, you build your knowledge in anatomy, pathophysiology, histology and cytopathology across every organ system. You integrate this knowledge with microscopic screening and diagnostic skills to identify cancers, infectious diseases and other clinically significant microscopic changes. The curriculum incorporates current advanced diagnostic technologies, including molecular diagnostics, immunohistochemical biomarkers and digital pathology. You prepare for day-to-day quality assurance activities as well as principles of laboratory operations and management.

A required in-person clinical practicum experience allows you to refine your skills in a cytology clinical laboratory setting under the supervision of practicing cytologists and pathologists.

Emphasizing technical expertise, critical thinking and ethical standards essential for health professional practice, you are prepared to excel in a broad range of clinical environments, addressing critical health care needs with precision and innovation.

Pending program accreditation, completion of this program qualifies you to take the American Society of Clinical Pathology Board of Certification examination in cytology. Certification is required for full clinical practice as a cytologist.

STEM-OPT extension eligible: No

Degree requirements

44 credit hours and a portfolio

Required Core (37 credit hours)
BMD 510 Current Perspectives in Biomedical Diagnostics (3)
BMD 513 Principles of Diagnostic Technology: Immunoassays (4)
BMD 514 Principles of Diagnostic Technology: Molecular Diagnostics (3)
BMD 570 General Principles of Cytology and Pathology (3)
BMD 571 Microscopic Evaluation (3)
BMD 572 Laboratory Operations and Preparation (3)
BMD 601 Fine Needle Aspiration Cytology (3)
BMD 602 Effusion and Cerebrospinal Fluid Cytology (3)
BMD 603 Gastrointestinal Cytology (3)
BMD 604 Gynecologic Cytology (3)
BMD 605 Pulmonary Cytology (3)
BMD 606 Urinary Cytology (3)

Other Requirements (7 credit hours)
BMD 500 Research Methods (2)
BMD 580 Practicum (5)

Culminating Experience (0 credit hours)
portfolio

Additional Curriculum Information
The BMD 580 Practicum is a required, in-person, hands-on experience to be conducted at a clinical laboratory under the guidance of an approved supervisor. Students are responsible for finding their practicum site (likely their place of employment) and are encouraged to connect with the unit early to discuss the process for securing a practicum site, if needed.

The program culminates in a noncredit-bearing portfolio where students synthesize their cytology theory and clinical experience. This reflective and integrative portfolio showcases student proficiency and serves as a valuable tool for future career advancement and professional development.

Technical standards: Color blindness makes it challenging for some individuals to differentiate between some colors, shades of colors or see color brightness, and it may diminish observational skills required for laboratory testing. Individuals with color blindness can be trained to differentiate and characterize the colors of stains, reagents, microscopic cells, labels, biologic devices or any device or printout used in diagnostic laboratory procedures. Students can view a complete listing of technical and essential functions required at https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:ecbfedf8-7c11-375e-b8bb-bf32376a422b (https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:ecbfedf8-7c11-375e-b8bb-bf32376a422b).

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirement of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in health, STEM or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• professional resume
• one reference (academic or professional)
• statement of purpose
• proof of employment in a clinical laboratory setting
• statement of employer support
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Applicants must be currently employed in a lab setting performing clinical laboratory procedures. Proof of employment in a clinical laboratory setting and employer support to perform practicum assignments in the lab must be demonstrated at the time of application.

The one- to two-page statement of purpose should include the applicant's interest in the program, what they expect to learn from the program, their professional goals, and a short description of their background in the sciences.

Contact information for one reference is required. The reference is contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. The reference must be a current or former laboratory supervisor or manager, or a former professor or instructor.

Strong applicants are contacted to schedule an interview via teleconference prior to acceptance.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/cytology-ms/) for program descriptions and to request more information.

Career opportunities

Graduates are prepared to become certified cytologists who are competent in the cognitive (knowledge), psychomotor (skills) and affective (behavior) learning domains necessary to enter the profession. They additionally are prepared for a variety of career opportunities in clinical and research settings.

Sample job titles include:

biomedical scientist
clinical laboratory manager
clinical research coordinator
cytologist or cytotechnologist
laboratory operations manager
molecular diagnostics technologist
quality control specialist
research scientist

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Exercise and Nutritional Sciences, PHD (ECNUTRIPHD)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

Within integrated disciplinary contexts, the Doctor of Philosophy program in exercise and nutritional sciences curriculum trains you to be a scholar and leader who conducts high-impact, interdisciplinary and translational research in exercise and nutritional sciences.

You and faculty members conduct high-quality, use-inspired research in exercise, nutrition and health promotion that's intended to reduce the physical, social and economic costs of unhealthy living. You engage in research at every stage of the program through:

• dissertation research
• participation in research practicums
• preclinical research and clinical trials
• research seminars and colloquia
• translational research teams

You work collaboratively with an approved mentor throughout the program and focus your research on one of three primary areas of interest: translational metabolism and physiology, behavioral and community health sciences, or biomechanics and motor control.

If you've earned a master's degree, you can complete the program in four years of full-time study. The program also accepts part-time students.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (6 credit hours)
BST 515 Applied Biostatistics in Medicine and Informatics (3)
EXW 645 Advanced Applied Methods and Data Analysis (3)

Required Research (16 credit hours)
CHS 600 Research Methods: Translational Science (3)
CHS 791 Seminar: Exercise and Nutrition Journal Club (1)
EXW 700 Research Methods (3)
EXW 701 Scientific Grant Writing (3)
EXW 780 or NTR 780 Practicum (6)

Elective Research (12 credit hours)

Professional Development (5 credit hours)
CHS 791 Seminar: Early Career Professional Development (3)
CHS 791 Seminar: Evidence-based Teaching Practices (2)

Focus Area (9 credit hours)

Electives (24 credit hours)

Culminating Experience (12 credit hours)
EXW 799 or NTR 799 Dissertation (12)

Additional Curriculum Information
Students tailor a course of study in one of three focus areas: behavioral and community health sciences, biomechanics and motor control, or translational metabolism and physiology. Courses in the focus area are determined in collaboration with the student's supervisory committee.

The program integrates professional development through a teaching seminar (CHS 791: Evidence-based Teaching Practices) and a three-semester seminar (CHS 791 Seminar: Early Career Professional Development) that addresses career opportunities and preparation for faculty or professional positions in the nutrition, exercise and health promotion fields.

Students entering the doctoral program with a master's degree in a related discipline may count up to 24 credit hours from the master's degree toward the total credit hours, with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in nutrition, exercise science, kinesiology or a related field from a regionally accredited institution. Completion of a data-based research thesis is preferred for applicants entering with a master's degree.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program and a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• resume or curriculum vitae
• three references (academic or professional)
• writing sample (four to eight pages, double-spaced)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of intent should indicate research or scholarly interest and primary program area and include a statement of career goals and the name of a potential faculty mentor from the list of approved faculty mentors.

Students admitted to the program are expected to have documented academic training and a strong interest in nutrition science, exercise science, biomechanics or health promotion. Thus, depending on their academic training, background, scholarly interests and focus area, a student may be asked to take undergraduate courses as deficiencies before or during graduate course enrollment.

Applicants with a bachelor's degree only must have completed coursework in the following areas before matriculation:

• anatomy and physiology
• biochemistry or exercise physiology
• nutrition
• research methods or evidence-based inquiry
• statistics

Applicants with a master's degree in a related area (nutrition, exercise science, kinesiology or related field) must have complete coursework in the following competencies before matriculation:

• research methods (graduate level)
• statistics (graduate level)

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Strong applicants are contacted to schedule an interview via teleconference before acceptance.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply appropriate advanced research methodology in the design and evaluation of research studies in exercise and nutritional sciences.
Apply appropriate statistical analyses to evaluate research and data relevant to exercise and nutritional sciences.
Communicate research findings to scientific audiences, including peer-reviewed literature and presentations at scientific conferences and to lay audiences.
Create a grant proposal that clearly demonstrates significance, innovation and a scientifically justified approach to address a novel research question.

Career opportunities

Graduates are prepared for research careers in research-intensive universities, government agencies and health-related research positions in private industry. Students are strongly encouraged to pursue postdoctoral research opportunities upon graduation to further enhance career opportunities.

Career examples include:

consultant
entrepreneur
exercise physiologist
dietician or nutritionist
health, research or sports scientist
postsecondary biomechanics, exercise science or nutrition teacher
professor
public health professional
scientist in pharmaceutical, food science and other related industry

Genetic Counseling, MS (NHGCOMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Master of Science program in genetic counseling prepares you for a successful career as a genetic counselor. You apply your knowledge and distinct skill set to advance the understanding of genetics and genomic-related conditions in the communities where you work and live.

This two-year, full-time program is taught by genetic counselors and medical geneticists. You participate in fieldwork experiences throughout Phoenix and engage in a comprehensive curriculum covering:

• advanced genetic counseling techniques
• clinical genetics and genomics
• cultural competencies in genetics
• fundamentals of genetic counseling
• the role of genetic counselors in laboratories and research
• social and ethical dimensions of genetic counseling and decision-making

You gain the knowledge and experience necessary to pass the American Board of Genetic Counseling certification exam and find employment that fits your skill set.

This program is classified as Accredited by the Accreditation Council for Genetic Counseling, https://www.gceducation.org/ (https://www.gceducation.org/). You should refer to the college webpage (https://chs.asu.edu/degree-programs/additional-program-information) for additional accreditation information.

You should note that some courses and faculty offices are located at the Health Futures Center (https://gis.m.asu.edu/asucampus/?campus=downtown&building=UCENT&marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C%2C&markert111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=15) in North Phoenix.

STEM-OPT extension eligible: No

Degree requirements

71 credit hours and a thesis, or
71 credit hours including the required applied project course (GCO 593)

Required Core (46 credit hours)
BMD 562 Bioethical Issues in Applied Biomedicine (3)
GCO 510 Fieldwork Preparatory (1)
GCO 530 Genetic Counseling Fundamentals (3)
GCO 540 Foundations of Medical Genetics (3)
GCO 560 Practice of Genetic Counseling (3)
GCO 570 Clinical Genetics I (3)
GCO 571 Clinical Genetics II (3)
GCO 610 Laboratory Fundamentals and Population Screening (3)

GCO 620 Genetic Counseling Techniques (3)
GCO 625 Cultural, Ethical and Legal Aspects of Genetics (3)
GCO 630 Advanced Genetic Counseling Techniques (3)
GCO 650 Cancer, Cardiac Genomics and Precision Medicine (3)
GCO 659 Embryology and Genetics (3)
GCO 660 Professional Issues for Genetic Counselors (3)
HCD 501 Population Health Data Management and Analysis (3)
HCD 520 Population Health (3)

Fieldwork (15 credit hours)
GCO 583 or GCO 683 Fieldwork (15)

Other Requirements (4 credit hours)
GCO 691 Topic: Journal Club I (1)
GCO 691 Topic: Journal Club II (1)
GCO 691 Topic: Journal Club III (1)
GCO 691 Topic: Journal Club IV (1)

Culminating Experience (6 credit hours)
GCO 593 Applied Project (6) or
GCO 599 Thesis (6)

Additional Curriculum Information
GCO 691 Journal Club topics are taken consecutively for one credit hour in each term of the program.

To meet the fieldwork requirement, students complete GCO 583/683 Fieldwork for a total of 15 credit hours. In most cases, students take a combination of the two courses and repeat each course. Students must have a minimum of 50 participatory cases during their fieldwork experiences with individuals who are being evaluated in the specialty areas of prenatal, pediatric, cancer and other adult conditions, with no one specialty dominating. All 50 participatory cases must be supervised by an experienced genetic counselor with certification from the American Board of Genetic Counseling, the American Board of Medical Genetics and Genomics or the Canadian Association of Genetic Counsellors. Students are placed in fieldwork sites by the program.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• resume or curriculum vitae
• three references (academic or professional)

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must register with National Matching Services Inc. before applying to ASU to be considered for this program (https://natmatch.com/gcadmissions (https://natmatch.com/gcadmissions/)). The ID code for the MS program in genetic counseling at ASU is 15710. Applications are reviewed by the admission committee after all materials have been received, and the applicant has registered with Match.

All applicants must have coursework in the following areas, as evidenced in their transcript:

• biochemistry (one course)
• biology (two courses)
• chemistry (one course)
• genetics (one course)
• psychology, sociology or public health (two courses)
• statistics (one course)

The letter of intent (single-spaced, one to two pages) should include experience and knowledge in the field of genetic counseling and articulate what makes the applicant a good candidate for this program.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation. Academic and professional recommendations are strongly encouraged. If possible, candidates are encouraged to include at least one letter of recommendation from a genetic counselor.

All applicants are strongly encouraged to interview genetic counselors and observe genetic counseling sessions when possible. It is also highly recommended that applicants have experience working in a health care setting; experience volunteering or working with individuals who have special needs; advocacy experience; or experience providing crisis counseling.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Apply knowledge of genetics, including genomics principles, genetic conditions, and testing technologies to the practice of genetic counseling.
Evaluate personalized genetic risk through a comprehensive analysis of multiple factors.
Apply understanding of psychosocial needs and client-centered decision-making to genetic counseling interactions.
Communicate genetics and genomics information to clients, colleagues, and other community partners.
Illustrate how genetic counselors fit within the larger healthcare system.
Synthesize the evidence based literature relevant to genetic counseling.

Career opportunities

Graduates of the program are prepared for a position as a genetic counselor in a clinical care, research or laboratory setting or as an industry-based genetic counselor. Genetic counselors have a distinct skill set that enables them to work in a variety of medical, scientific or research-based settings, as well as in private practice and academia.

The Bureau of Labor Statistics predicts a growth rate of 9% for genetic counseling positions between 2024 and 2034, which is much faster than average.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Health Care Administration and Policy, MS (NHSHCDMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix, Online

Program description

The Master of Science program in health care administration and policy focuses on the study and design of systems, processes, leadership and management approaches used to optimize health care delivery and health outcomes for all.

The curriculum is centered on achieving high-value care through leadership, population health, informatics, systems engineering, health care management, health economics, equity, bioethics and policy.

You customize your elective coursework to your interests and goals. Courses are offered in three focus areas:

• health policy and advocacy
• health systems management
• performance improvement in health care

The program challenges you to work on innovative solutions to improve the U.S. health care system by simultaneously improving the health of populations, enhancing the patient experience and reducing per capita cost of care.

You work in a cohort through the program and are able to complete the program in as few as nine months. You are also paired with leading health care delivery organizations and leaders to complete an applied capstone project during the program.

STEM-OPT extension eligible: No

Concurrent program options

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.
This degree is also offered as a concurrent program with the following:

Global Management, MGM

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Health Care Administration and Policy, BS

Medical Studies, BS

Health Sciences, BS

Speech and Hearing Science, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required capstone course (HCD 550)

Required Core (18 credit hours)
HCD 501 Population Health Data Management and Analysis (3)
HCD 502 Foundation of U.S. Health Systems and Design (3)
HCD 510 Patient-centered Care and Analysis (3)
HCD 511 Health Economics and Policy (3)
HCD 521 Health Policy and Equity (3)
HCD 575 Health Care Transformation and Leadership (3)

Focus Area Courses (9 credit hours)

Research (2 credit hours)
HCD 592 Research: Part One (1)
HCD 592 Research: Part Two (1)

Culminating Experience (1 credit hour)
HCD 550 Capstone (1)

Additional Curriculum Information
Students select coursework from any of three focus areas: health systems management, performance improvement in health care, or health policy and advocacy. Students should contact the academic unit regarding course selection for the focus area.

The research requirement is taken in preparation for the capstone course. Students complete HCD 592 for one credit hour twice in consecutive terms before taking HCD 550.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree from a regionally accredited college or university in a related field such as biology, chemistry, biochemistry, nursing, public health, pharmacy, biomedical informatics, social work, premedical, prehealth, nutrition, health promotion or business.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• one reference (academic or professional)
• personal statement
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Contact information for one reference is required. The reference is contacted via email to submit a letter of recommendation. The reference must be academic or professional; friends or relatives are not accepted.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after they earn the degree, how the program will help the applicant achieve their goals, what the applicant's career aspirations are, and what interested the applicant in this program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-science-health-care-delivery/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Integrate leadership and management skills and principles to facilitate the interdisciplinary delivery of patient-centered health care.
Create a comprehensive plan to redesign care delivery to address a current health care delivery systems challenge.
Develop quantitative and qualitative methodologies for applied research as a means to analyze health care problems, interpret data, and develop evidence-based solutions.

Career opportunities

Graduates are trained for a career in the health care industry --- particularly leadership, management and administration. Professionals with knowledge about innovations and improvements for health care delivery are in demand across the health care industry. This flexible degree program is also ideal for gap-year students who are pursuing entrance to medical and professional school before beginning careers in health and health care.

Career examples for program graduates include:

health care providers
hospital administrators
policy experts
program managers

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Health Informatics, MAS (GCHLHINMAS)

College/School: College of Health Solutions

Campus: Online

Program description

The Master of Advanced Study program in health informatics is a flexible offering designed to meet your needs as a working professional, and options are available for you to continue your education on your own time.

Core courses provide a foundation in health informatics principles, health communication, health care data and databases, and health care leadership. Electives enable you to specialize in various areas of health informatics, such as biostatistics, clinical informatics, population health and health care artificial intelligence. Other program areas include clinical workflow, telehealth and telemedicine, and human-computer interactions in health care.

Course topics include:

• bioethical issues in applied biomedicine
• biostatistics in medicine and informatics
• clinical decision support systems and evidence-based medicine
• imaging informatics and diagnostics
• population health
• telehealth and telemedicine
• translational bioinformatics
• workflow analysis and redesign in health systems engineering

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (BMI 593)

Required Core (15 credit hours)
BMI 601 Fundamentals of Health Informatics (3)
BMI 603 Health Informatics Database Modeling and Applications (3)
BMI 604 Health Information Communication (3)
BMI 614 Current Perspectives in Health Informatics (3)
HCD 575 Health Care Transformation and Leadership (3)

Electives (12 credit hours)

Culminating Experience (3 credit hours)
BMI 593 Applied Project (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in a related field, such as biology, computer science, medicine, nursing, pharmacy or public health, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• one reference (academic or professional)
• statement of purpose
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. TOEFL iBT® or IELTS scores must be from tests taken no more than two years before the applicant's anticipated start date at ASU.

The statement of purpose should be a maximum of 500 words and describe the applicant's background, their interest in the program, what they hope to learn and accomplish, and their career goals.

Contact information for one reference is required. The reference is contacted via email to submit a letter of recommendation. Examples of appropriate references include:

• a direct supervisor who can assess the applicant's professional performance
• a faculty member from the applicant's prior degree program who is well acquainted with the applicant's professional practice or academic achievement
• another professional (not a relative), such as an industry professional whom the applicant has worked closely with and who can speak to the applicant's readiness for graduate study

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-

programs/graduate/master-advanced-study-health-informatics/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop a clinical information system to improve healthcare.
- Critically appraise evidence-based medicine related to health informatics.
- Communicate health informatics solutions to address healthcare challenges.

Career opportunities

Graduates are prepared with skills for careers in a wide variety of health care settings. Professionals from fields outside health and health care can also develop the skills needed to transition into careers in this rapidly expanding field.

Career opportunities include these positions:

- chief health informatics officer (a medical doctorate may be required)
- clinical application developer
- clinical informatics manager
- director of clinical informatics or health informatics
- director of health information management or health IT
- electronic health record application specialist
- health care informatics consultant or manager
- health care IT project manager
- health care or clinical informatics data analyst
- health data resource manager or clinical data manager
- health informatics director

Integrated Behavioral Health - Clinical, Certificate (NHIBHCGRCT)

College/School: College of Health Solutions

Campus: Online

Program description

The integrated behavioral health clinical certificate meets the growing demand for integration of behavioral health= clinicians into primary care or other traditional medical settings.

The curriculum offers you a deeper understanding of models of primary care behavioral health as well as training on= evidence-based approaches to behavioral health care. Program courses focus on various aspects of behavioral health= care, including models, clinical medicine and pathophysiology, clinical interventions and population health.

It's ideal for if you aspire for a career in, or already are working in, integrated primary care behavioral health. You may= complete the program:

• as a stand-alone program

• to complement your graduate degree program of study
• to supplement your existing clinical skills or your current practice within an integrated team-based health care setting

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (12 credit hours)
IBC 601 Models of Health Care (3)
IBC 603 Brief Interventions in Integrated Health Care (3)
IBC 604 Clinical Medicine/Pathophysiology (3)
IBC 611 Population-based Integrated Health Management (3)

Electives (3 credit hours)

Additional Curriculum Information
Students should see the academic unit for the approved course list of electives. Other coursework may be used with the approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a master's degree in a related field --- such as social work, counseling, family therapy, clinical psychology or nursing --- from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of intent
• one reference (professional)
• resume or curriculum vitae
• submission of licensure form and copy of license
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who have a master's degree in counseling, family therapy, nursing, PA/NP, occupational health or social work, among others, are encouraged to apply. Students in the clinical concentration are required to be licensed or license-eligible to practice in a clinical field. The most competitive candidates are master's degree-level professionals who are either currently employed or have direct patient care experience in a clinical capacity in an integrated health care organization.

"Licensed" and "license-eligible" are terms defining a license to practice issued by a state licensing board (e.g., Arizona Board of Behavioral Health Examiners, Arizona Board of Occupational Therapy Examiners, Arizona Board of Physician Assistants). Examples include license-eligible master's degree-level behavioral clinician, licensed master's degree-level behavioral clinician, and master's degree-level licensed medical or ancillary health care provider (physician assistant, nurse, nurse practitioner, dietitian, occupational therapist). This certificate program does not offer any pathway toward licensure.

Contact information for at least one reference is required. The reference is contacted via email to respond to a series of questions about the applicant. Examples of appropriate references include:

• A supervisor who can assess the applicant's clinical or professional performance (preferred)
• a faculty member from the applicant's master's degree program who is well-acquainted with the applicant's professional practice or academic achievement
• other professional (not relative), such as a licensed behavioral health clinician, medical provider, or other health care provider

Applicants are asked to respond to the following prompt for the statement of intent:

The integrated behavioral health (clinical) certificate program focuses on evidence-based techniques for integrated primary care (e.g., behavioral interventions that incorporate a therapeutic lifestyle change or incorporate a patient's medical condition). Clearly articulate the specific career goals and the detailed ways in which an IBH (clinical) certificate will help you accomplish those goals. Please be sure to incorporate information from the program description and required courses.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/integrated-behavioral-health-clinical-graduate-certificate/) for program descriptions and to request more information.

Career opportunities

Graduates who have combined the certificate in clinical integrated behavioral health with their major program of study, license or practice within integrated team-based health care settings may gain an edge in a competitive job market.

Completion of this innovative program, in conjunction with a clinical degree, can help a graduate launch their career as:

- a behavioral health case manager
- a behavioral health provider
- a counselor of behavioral health
- an integrated behavioral health care supervisor
- a program coordinator

Integrated Behavioral Health - Management, Certificate (NHIBHMGRCT)

College/School: College of Health Solutions

Campus: Online

Program description

The integrated behavioral health management certificate meets the growing demand for health care managers of programs that integrate behavioral health into primary care and other traditional medical settings.

You are trained to manage and contain health care costs while working to obtain a return on investment through revenue management in various health care financial models.

You learn to develop management strategies that address the needs of populations with evidence-based practices and team-based care that are focused on quality, leveraging technology and cost-effectiveness.

The program is ideal if you aspire to work in integrated primary care behavioral health. The program may be completed:

• as a stand-alone offering
• to complement your graduate degree program of study
• to supplement your existing clinical skills or your current practice within an integrated team-based health care setting

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (12 credit hours)
HSC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)
HSC 626 Interdisciplinary Health Care Management (3)
HSC 630 Financial Management of Health Care (3)
IBC 601 Models of Health Care (3)

Electives (3 credit hours)

Additional Curriculum Information
Students should see the academic unit for the approved list of elective courses. Other coursework may be used with the approval of the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

• a faculty member from the applicant's master's degree program who is well-acquainted with the applicant's professional practice or academic achievement
• other professional (not a relative), such as a licensed behavioral health clinician, medical provider or other health care provider

Applicants are asked to respond to the following prompt for the statement of intent:

The integrated behavioral health (management) certificate focuses on management of organizations that offer integrated behavioral health services (e.g., using quality improvement strategies, cost containment and control). Clearly articulate your specific career goals and the detailed ways in which an integrated behavioral health (management) certificate will help you accomplish those goals. Please be sure to incorporate information from the program description and required courses.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/integrated-behavioral-health-management-grad-certificate/) for program descriptions and to request more information.

Career opportunities

Graduates who have combined the certificate in integrated behavioral health management with their graduate degree program, license or practice within integrated team-based health care settings may gain an edge in a competitive job market. This management-focused certificate provides refined learning in integrated care, quality and performance interventions, financial management, and behavioral health management skill-building for integrated health care.

Completion of this innovative program in conjunction with other degrees and training can help graduates launch their career as a:

behavioral health case manager
behavioral health manager
behavioral health quality improvement manager
integrated care leader
program coordinator
program supervisor

International Health Management, MIHM (NHIHMIHM)

College/School: College of Health Solutions

Campus: Online

ASU is not currently accepting applications to this program. Interested students should apply to the MS in Health Care Administration and Policy.

Program description

The Master of International Health Management degree program is offered by Arizona State University in partnership with the University of New South Wales in Sydney, Australia.

Ideal if you're seeking a career in international health systems management, this program advances the core principles of the PLuS Alliance to develop solutions to global challenges and generate social impact in health and health care.

The collaborative and international nature of the program provides you access to global academic networks and industry partners. You build knowledge in leadership and management, including in policy, economics, finance, quality and safety --- from the combined expertise of faculty at two world-renowned research universities.

After completing courses in health care management, finance and comparative health systems, you choose an area of focus in health economics, health informatics, hospital management or quality improvement in health care.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required capstone course (HCD 550)

Required Core (6 credit hours)
HCD 532 Health Care Management and Finance (3)
HCD 537 Comparative Heath Care Systems (3)

Track Courses (12 credit hours)

Electives (9 credit hours)

Research (2 credit hours)
HCD 592 Research (2)

Culminating Experience (1 credit hour)
HCD 550 Capstone (1)

Additional Curriculum Information
Coursework taken for this program is provided through ASU and the University of New South Wales; students should see the academic unit for guidance on enrollment in UNSW courses.

Students select from tracks in health economics, health informatics, hospital management or quality improvement in health care. Courses may not count toward both the track and the elective areas. Students should see the academic unit for an approved list of track and elective courses.

The research requirement is taken in preparation for the capstone course. Students complete HCD 592 for one credit hour twice in consecutive terms prior to HCD 550.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or master's degree from a regionally accredited college or university in a related field, such as biology, chemistry, biochemistry, nursing, public health, pharmacy, biomedical informatics, social work, premed, prehealth, nutrition or health promotion.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• three references (academic or professional)
• personal statement
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after obtaining the degree, how the program will help the applicant achieve their goals, what the applicant's career aspirations are, and what interested the applicant in this degree program.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation. References must be academic or related professional sources. Three letters of recommendation from either academic or professional sources are required; reference letters from friends and relatives are not accepted. Letters demonstrating involvement in health care, community service or leadership are encouraged.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/international-health-management-mihm/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Articulate the influence of international health systems design for individual and population health outcomes.
- Communicate the value of person- and population-centered health care in a changing global health care environment.
- Integrate evidence-based financial principles when evaluating individual and population health outcomes.

Career opportunities

There is a significant growth market for graduates with skills in international health management, given aging populations and the need for a health care workforce competent in informatics, leadership and finance.

Major sites of employment for graduates include:

- hospital systems
- nursing homes and similar facilities
- outpatient clinics

Medical Nutrition, Certificate (NHMNTRGRCT)

College/School: College of Health Solutions
College of Health Solutions

Campus: Online

Program description

The certificate program in medical nutrition enables you, as a working health care professional, to acquire practical= nutrition knowledge that can be immediately implemented in practice.

You learn to discuss diet therapies, supplement use and nutritional concepts with your patients and clients. You also= gain in-depth knowledge of evidence-based nutrition research and the role of nutrition in managing chronic disease.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (15 credit hours)
NTR 510 Food and Nutrition Across the Lifespan (3)
NTR 511 Medical Nutrition in the Care and Prevention of Disease (3)
NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)=
NTR 525 Complementary Nutrition (3)
NTR 535 Nutrigenomics (3)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in health, science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• professional resume or curriculum vitae
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Before starting the program, applicants are expected to have completed courses in introductory nutrition (NTR 100 or NTR 241 or equivalent) and physiology (BIO 160 or BIO 202 or equivalent).

The personal statement (one or two pages) should address the applicant's interest in the program and how the program will impact their professional goals, and describe the applicant's strengths and weaknesses that may influence their performance in the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/medical-nutrition-graduate-certificate/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Create evidence-based nutrition plans to support patient care.
Interpret nutrition research evidence to address patient health conditions.

Career opportunities

This program is designed for current practitioners or to supplement another field of study in health-related disciplines. Graduates obtain an edge in a competitive job market with a certification in a growing area of health care. This program may be of interest to:

chiropractors

nurse practitioners
physical therapists
physician assistants
physicians

Medical Nutrition, MS (NHMNTRMS)

College/School: College of Health Solutions

Campus: Online

Program description

In the Master of Science program in medical nutrition, you learn how nutritional knowledge can be applied to health maintenance, the treatment of disease and disease prevention. Coursework and culminating experiences provide you with an overview of the components of therapeutic diets and the role of qualified health care providers in diet prescription.

This master's degree is ideal if you are a:

• current or future health care professional, including a gap-year student
• current medical student, resident, fellow or practitioner who seeks to develop a strong knowledge base in the nutritional sciences and your application in the health care field
• student who has completed a bachelor's degree but has not yet secured admission to medical, veterinary, dental, osteopathic, physician assistant or similar schools

The program emphasizes self-directed learning with immersion in current nutrition research. You develop foundational knowledge of nutritional assessment techniques used by health care providers in clinical practice and become well-versed in making recommendations grounded in evidence-based practice.

This nonthesis program supports you focusing on the health professions, particularly if you're a preprofessional student in your gap year or if you want to expand your education after completion of a didactic program in dietetics or earning registered dietitian nutritionist licensure. You take intensive, clinically oriented nutrition introductory courses, detailed courses on body systems, and courses that cover emerging health and health care topics.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Applied Nutrition and Health, BS

Health Sciences (Healthy Lifestyles and Fitness Science), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours including the required applied project course (NTR 593), or
30 credit hours including the required applied project course (NTR 593) - Dietetics Track

Required Core (15 credit hours)
BST 501 Biostatistics for Research and Practice (3) or HCD 501 Population Health Data Analysis (3)
NTR 503 Designing Health Behavior Change Interventions or NTR 533 Food Systems, Ethics and the American Diet (3)
NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)
NTR 525 Complementary Nutrition (3)
NTR 535 Nutrigenomics (3)

Other Requirements (3 or 9 credit hours)
NTR 500 Research Methods (3)
NTR 510 Food and Nutrition Across the Lifespan (3)
NTR 511 Medical Nutrition in the Care and Prevention of Disease (3)

Electives or Track Coursework (3 or 9 credit hours)

Culminating Experience (3 credit hours)
NTR 593 Topic: Medical Nutrition (3)

Additional Curriculum Information
Students should contact the academic unit regarding course selection for the elective requirement.

To pursue the program's dietetics track, students must either be a registered dietitian nutritionist or have completed an accredited didactic program in dietetics. Students in the dietetics track complete NTR 500 for three credit hours to satisfy the other requirements. Students in this track complete nine credit hours of track coursework instead of elective coursework.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution. A previous bachelor's or master's degree in nutrition, public health, biology, chemistry or related field is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• one reference (academic or professional)
• personal statement
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Before starting the program, applicants are expected to have completed courses in introductory nutrition (NTR 100 or NTR 241 or equivalent) and physiology (BIO 160 or BIO 202 or equivalent).

Applicants who wish to be considered for the dietetics track must be registered dietitian nutritionists (RDN credential) or have completed an accredited didactic program in dietetics (frequently termed a DPD). Applicants interested in the dietetics track should submit their RDN credential verification or DPD verification statement through the program application process. To obtain proof of registered dietitian status, the applicant should complete the verification process on the Commission on Dietetic Registration website (cdrnet.org (https://www.cdrnet.org)).

The personal statement should be one to two pages (typed and double-spaced) and address the following:

- significant professional responsibilities the applicant has held
- professional goals and reasons for desiring to enroll in this program
- strengths that will help the applicant succeed in this program and reach their professional goals
- their personal interests in research, including, if applicable, studies involving the practice of dietetics

Contact information for one reference is required. The reference is contacted via email to respond to a series of questions about the applicant. The reference should be academic, such as a professor or instructor, or professional, such as a current or former supervisor.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/medical-nutrition-ms/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Graduates will be able to create evidence-based nutrition plans to support patient care.
Graduates will be able to evaluate evidence to address a nutrition research question.
Students will be able to compose written and oral presentations geared toward lay and professional audiences in the nutrition field.

Career opportunities

A medical nutrition degree complements a variety of pursuits across health and health care fields. Career opportunities for those who have completed this program are vast and include:

dentist
medical doctor
nurse
pharmacist
physical therapist
physician assistant

This program is not a pathway tobecome a registered dietitian.

Nutritional Science (Dietetics), MS (ECNTRDMS)

College/School: College of Health Solutions

Campus: Online

ASU is no longer accepting applications to this program. Interested students should apply to the Medical Nutrition, MS program.

Program description

The Master of Science program in nutritional science with a concentration in dietetics is a nonthesis option if you are a registered dietitian nutritionist, or have a verification statement from a didactic program in dietetics and are seeking to continue your education and advance your skills as a practitioner.

The program emphasizes the scientific foundations of nutrition and prepares you to have interpretive expertise, problem-solving skills, strong writing skills and computer literacy.

Designed with working professionals' and your learning preferences in mind, the program is completely online and can be completed either full time or part time. It's an ideal option if you have a busy schedule, with multiple start dates each year and course lengths of 7.5 weeks.

STEM-OPT extension eligible: No

Degree requirements

30 credit hours including the required applied project course (NTR 593)

Required Core (6 credit hours)
BST 501 Biostatistics for Research and Practice (3)
NTR 527 Nutrition Policy (3)

Concentration (9 credit hours)
NTR 501 Survey Research Methods (3)
NTR 503 Designing Health Behavior Change Interventions (3)
NTR 519 Nutrition Therapies for Eating Disorders and Addictions (3)
NTR 520 Nutrition-Focused Physical Assessment (3)
NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)
NTR 525 Complementary Nutrition (3)
NTR 529 Pediatric Nutrition (3)
NTR 533 Food Systems, Ethics and the American Diet (3)
NTR 535 Nutrigenomics (3)
NTR 537 Evidence-based Nutrition (3)
NTR 551 Geriatric Nutrition (3)
NTR 555 Nutrition and the Athlete (3)
NTR 598 Special Topics (3)

Research (3 credit hours)
NTR 500 Research Methods (3)

Open Electives (6 credit hours)

Culminating Experience (6 credit hours)
NTR 593 Applied Project (6)

Additional Curriculum Information
Students may take three additional courses from the concentration area to fulfill the open electives requirement. Other graduate courses may be applied toward open electives with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must be a registered dietitian nutritionist or have completed an accredited didactic program in dietetics, and provide either a copy of the RDN credential or the DPD verification statement with their application.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of registered dietitian status or DPD verification statement
• resume or curriculum vitae
• personal statement
• two references (one professional, one academic or professional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants with RDN certification need to submit proof of registered dietitian status by accessing the Commission on Dietetic Registration's website (https://www.cdrnet.org (https://www.cdrnet.org)) and complete the verification process using the online credential verification search. Applicants have who completed an accredited DPD need to provide a DPD verification statement with their application.

A personal statement of one or two pages (typed, double spaced) is required and must address the following:
• significant professional responsibilities the applicant has held
• professional goals and reasons for desiring to enroll in this program
• strengths that will help the applicant succeed in this program and in reaching their professional goals
• personal interests in research, including, if applicable, studies involving the practice of dietetics

Contact information for the two references is required. References are contacted via email to respond to a series of questions about the applicant. At least one reference must be an employer or supervisor.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-science-nutritional-science-dietetics/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Students will be able to evaluate scientific research using appropriate design and ethical principles.
Graduates will be able to create public health recommendations on health and disease for populations and individuals, using evidence-based nutrition research.
Graduates will be able to analyze data using statistical software to test a research hypothesis.

Career opportunities

Nutritional science is a vital, growing profession with many career possibilities. In this field, graduates share their knowledge of food and nutrition to help people make healthful food choices.

Settings in which food and nutrition careers can be found include:

community and public health organizations
corporations
food manufacturing industries
government agencies
hospitals and other medical facilities
long-term care facilities
nonprofit organizations
schools

Nutritional Science, MS (ECHNUTMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

In the Master of Science program in nutritional science, you prepare to translate nutritional science into practice for human health and wellness. Partnered with accomplished faculty, you immerse yourself in the latest nutrition topics and research as you develop practical understanding through internship experiences and your own guided research.

Building on the scientific foundations of human nutrition, you learn strong writing and problem-solving skills and increase your interpretive expertise. The program offers two specialized focus area options: sports nutrition and maternal-child health. You can also customize the focus area to your specific interests in nutrition under the guidance of faculty.

The sports nutrition focus enables you to specialize in exercise science and the nutritional needs of athletes. If you're following this focus area, you complete classes that cover topics such as exercise physiology, hydration, electrolyte regulation and evaluation of sports supplements.

In the maternal-child health focus, you tailor your learning to promote the health and well-being of women and children. This focus area includes courses on policy and advocacy, communication and ethics, leadership development, and medical nutrition therapy.

If you've completed an accredited didactic program in dietetics, you may also elect to apply to the ASU dietetic internship program (https://chs.asu.edu/current-students/internships/dietetic-internship) to meet the requirements to become a registered dietitian nutritionist (https://chs.asu.edu/degree-programs/registered-dietitian).

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Dietetics, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (NTR 593)

Required Core (6 credit hours)
BST 501 Biostatistics for Research and Practice (3)
NTR 527 Nutrition Policy (3)

Focus Area Courses (15 credit hours)

Research (3 credit hours)
NTR 500 Research Methods (3)

Culminating Experience (6 credit hours)
NTR 593 Applied Project (6) or
NTR 599 Thesis (6)

Additional Curriculum Information
The program offers focus areas in sports nutrition and maternal-child health. Students may additionally customize focus area coursework to their academic interests or career goals under the guidance of faculty.

This degree program may be pursued concurrently with the Arizona State University Dietetic Internship (https://chs.asu.edu/current-students/internships/dietetic-internship) (MS-DI or MS-VA). Students must apply and be accepted to both the MS program and the internship program. Students who pursue the Veterans Affairs (MS-VA) Dietetic Internship must complete an applied project as their culminating experience.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree (nutrition or science is recommended) from a regionally accredited institution. Students who are pursuing the MS in nutritional science need to complete the following prerequisites: anatomy and physiology, biochemistry, general chemistry with lab, general nutrition for majors, organic chemistry with lab and statistics.

If an applicant has completed a didactic program in dietetics (frequently termed a DPD), these prerequisites are considered complete. Prerequisite courses can be in progress when the student submits the application; however, if the student is accepted to the MS program, all prerequisites must be completed before the program begins in the fall semester.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume or curriculum vitae
• personal statement
• one reference (academic or professional)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The personal statement should include the following:
• a description of the applicant's significant professional responsibilities
• the applicant's professional goals and the reasons they wish to enroll in ASU's program
• the applicant's strengths that will enable their success in the program and in reaching their professional goals
• the applicant's personal research interests, described as specifically as possible and including any previous research experience, along with indication of any interest in pursuing a focus in sports nutrition or maternal-child health

Contact information for one reference is required. The reference is contacted via email to submit a letter of recommendation, and must be an instructor at the applicant's undergraduate institution.

Finalists may be invited by the program to an interview.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Integrate knowledge of research design that incorporates ethical conduct in nutrition research studies.
Apply statistical methodology in nutrition research.
Interpret an emerging issue as it relates to advanced practice nutrition science.

Career opportunities

Nutritional science applies the principles of food and nutrition to health. It is a vital, growing profession with many career possibilities. In this field, graduates share their knowledge of food and nutrition to help people make healthful food choices.

Graduates have gone on to:

apply to medical and professional school to become medical doctors, physician assistants, pharmacists, dentists and other medical professionals
become registered dietitian nutritionists
pursue academic doctorates

Graduates can pursue careers in a number of settings, including:

community and public health organizations
corporations
food manufacturing industries
government agencies
hospitals and other medical facilities
long-term care facilities
nonprofit organizations
schools

Population Health, MS (NHPOPHLMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

This program is no longer accepting applications. Interested students are recommended to apply to the MS in Health Care Administration and Policy, the MS in Public Health Technology or the MPH in Public Health (Public Health Technology).

Program description

The Master of Science program in population health combines multiple disciplines to prepare you to understand the complex factors that affect the health and well-being of populations. You learn how to analyze complicated systems through advanced research methods and develop leadership skills to improve health outcomes.

The program addresses the interaction between health systems and other sectors of society to affect population health outcomes, including governmental, nonprofit and nongovernmental organizations; media; and academia.

The curriculum includes a strong repertoire of systems science, quantitative and qualitative research methods, epidemiology and biostatistics, and ethics courses, together with applied experience.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a portfolio, or
30 credit hours and a thesis, or
30 credit hours including the required applied project course (POP 593)

Required Core (15 credit hours)
BST 515 Applied Biostatistics in Medicine and Informatics (3)
POP 575 Social Determinants of Population Health (3)
POP 605 Population Health Systems Science and Theory (3)
POP 633 Population Health Ethics (3) or TPH 557 Public Health Technology Ethics, Policy and Law (3)
POP 644 Epidemiology in Population Health (3)

Research (3 credit hours)
POP 641 Qualitative Research Methods (3)

Other Requirements (0 or 3 credit hours)
POP 584 Internship (3)

Electives (6 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)
POP 593 Applied Project (3) or
POP 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
This program has three culminating experience options: a thesis, an applied project or a portfolio with the completion of an internship. Students who select the thesis option enroll in POP 599 for six credit hours and complete six credit hours of electives. Students who select the applied project option enroll in POP 593 for three credit hours and complete nine credit hours of electives. Students who select the portfolio with internship option must identify an internship site and complete three credits of POP 584, prepare a portfolio and complete nine credits of electives. Electives should be selected in consultation with program faculty.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a relevant health or related field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• two references (academic or professional)
• personal statement
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Before starting the program, applicants are expected to have completed a statistics course (e.g., HCD 300, STP 226 or PSY 230).

A personal statement (one to two pages, single-spaced) must be submitted describing the applicant's knowledge, skills, experience and goals related to the population health field.

Contact information of two references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be professional and academic sources familiar with the applicant's potential to be successful in the field of population health.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate relationships between systems (e.g., public health and health care) that impact population health outcomes.
Employ analytical skills to interpret research and data relevant to population health.
Judge social, environmental and policy determinants of health that result in disparities in population health outcomes.

Career opportunities

The population health master's degree prepares graduates for careers in:

county and state health departments
national governmental health organizations
nongovernmental organizations
nonprofits

In these roles, graduates are especially well-suited to conduct assessments and data-driven analyses to contribute to policy-making or strategic planning affecting entire populations. Potential positions include:

director of population health
lead population health analyst, including informatics or data analysis
lecturer in schools of public or population health

manager of wellness strategy, communications or integration
population, public, environmental or behavioral health program director, manager, coordinator or specialist
public health program coordinator or manager

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Graduates from this program are eligible to sit for the Certified in Public Health exam upon graduation and completion of three years of relevant work experience. More information on the credential is available on the National Board of Public Health website. https://www.nbphe.org/certified-in-public-health/cph-eligibility-requirements/ (https://www.nbphe.org/certified-in-public-health/cph-eligibility-requirements/)

Population Health, PHD (NHPOPHLPHD)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

The Doctor of Philosophy program in population health brings together multiple disciplines, illustrating the complex underlying factors that affect the health and well-being of populations.

The program addresses the interaction between public health and health care systems and other sectors of society --- including the private sector, government, nonprofit and academia --- to affect the health outcomes of entire populations.

You personalize your program of study by completing courses from one of five tracks:

Complex adaptive systems
You learn to apply systems thinking and methodological approaches to better address the inherent complexity of population health challenges. You gain experience using key systems science methods and learn to identify structural root causes and leverage optimal points for interventions with more robust improvements in population health outcomes.

Dissemination and implementation science
You train to identify, translate, disseminate and implement research findings into the real-world settings to help bridge the gap between research and practice. You develop theoretical knowledge and methodological expertise to promote the adoption and integration of evidence-based interventions into health care and public health settings to improve the impacts on population health.

Health equity
You learn to conduct impactful, community-embedded and theory-driven research to analyze multi-dimensional influences that produce health disparities. You collaborate with the local communities and key stakeholder groups to identify and develop strategies and interventions to address social determinants of health and increase health equity.

Health services research and policy
You develop a robust knowledge base and methodological skills to analyze access to and use of health care services and their associated costs, as well as quality and safety of care. You focus on methodologies and tools to analyze policy impacts on health care delivery, organization, financing and associated health care outcomes.

Urban environments for health
You focus on analyzing and addressing health challenges facing city-dwelling populations, including new and re-emerging infectious diseases, chronic illnesses and behavioral health conditions. You prepare to analyze and develop strategies to address those challenges through the focus on the broader environmental conditions, along with the integration of transdisciplinary perspectives and methodologies.

Required courses reinforce a strong repertoire of systems science, quantitative and qualitative research methods, ethics, epidemiology and biostatistics. The program offers applied experience through a practicum as well as opportunities to engage in novel research on population health through a dissertation.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Complex Adaptive Systems Track, or
84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Dissemination and Implementation Science Track, or
84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Health Equity Track, or
84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Health Services Research and Policy Track, or
84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Urban Environments for Health Track

Required Core (15 credit hours)
BST 515 Applied Biostatistics in Medicine and Informatics (3)
EXW 645 Advanced Applied Methods and Data Analysis (3)
POP 605 Population Health Systems Science and Theory (3)
POP 633 Population Health Ethics (3)
POP 641 Qualitative Research Methods (3)

Track (15 credit hours)

Electives (30 credit hours)

Research (6 credit hours)
EXW 700 Research Methods (3)
EXW 701 Scientific Grant Writing (3)

Other Requirement (6 credit hours)
POP 591 Seminar: Evaluating the Population Health Literature (3)
POP 780 Practicum (3)

Culminating Experience (12 credit hours)
POP 799 Dissertation (12)

Additional Curriculum Information
Students select from tracks in complex adaptive systems, dissemination and implementation science, health equity, health services research and policy or urban environments for health.

Students entering the doctoral program with a master's degree in a related discipline may count up to 30 credit hours from the master's degree toward the total credit hours, with program approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or a master's degree in any field from a regionally accredited institution. Preference is given to applicants who completed a data-based research thesis during their master's degree program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• resume or curriculum vitae
• three references (academic or professional)
• writing sample (six to ten pages)
• oral interview (via videoconference)
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

All applicants must have completed an undergraduate or graduate-level course in epidemiology (e.g., EXW 642, HEP 444 or NTR 557) and a graduate-level research statistics course (e.g., EXW 501 or NTR 502).

It is expected that students admitted to the program have documented academic training and a strong interest in public health, health care or population health. Thus, depending on the student's academic training, background, scholarly interests and focus area, they may be asked to take additional courses prior to or concurrently with graduate course enrollment.

The personal statement should indicate research or scholarly interest, primary program area, statement of career goals and the name of one or more potential faculty mentors from within the program. Applicants are strongly encouraged to contact one or more possible mentors to discuss their research interests prior to submitting their application.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References must be academic or professional sources who are familiar with the applicant's potential to be successful in the field of population health.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Conduct an in-depth analysis and evaluation of complex systems that impact population health outcomes.
- Employ diverse analytical approaches to evaluate research and data relevant to population health.
- Conduct an in-depth evaluation of determinants of health that impact population health outcomes.
- Evaluate factors, structures, and functions in communities that can affect population health.

Career opportunities

Students are strongly encouraged to pursue postdoctoral research opportunities upon graduation.

Graduates of this interdisciplinary program are prepared to become:

- executives or analysts in private industry, such as health IT startups or medical device, biotechnology, health insurance or health care delivery organizations
- faculty at research-intensive universities in schools of population health, public health, medicine or health sciences
- leaders and directors of health in local, state and federal government agencies
- program directors and officers for global health organizations, such as the World Health Organization or the World Bank
- program directors and officers of local and national nongovernmental foundations such as the American Cancer Society or the American Diabetes Association
- research or policy analysts at federal health agencies, such as the National Institutes of Health or the Centers for Disease Control and Prevention

Career examples include:

- entrepreneur
- epidemiologist
- global health professional
- health information manager or director
- health scientist
- population health analyst or manager

Science of Health Care Delivery, Certificate (NHHCDGRCT)

College/School: College of Health Solutions

Campus: Online

Program description

In the online, self-paced certificate program in science of health care delivery, you acquire a foundation in the functions= and features of health care systems, enabling you to address the current and future needs of the workforce in the

health care industry.

You can choose coursework from three focus areas:

• health policy and advocacy
• health systems management
• performance improvement in health care

Credits earned from this certificate program may be applied to the Master of Science program in health care administration and policy (https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHCDMS/science-of-health-care-delivery-ms) if you are interested in furthering your knowledge in this field.

STEM-OPT extension eligible: No

Degree requirements

15 credit hours

Required Core (9 credit hours)
HCD 502 Foundations of U.S. Health Systems and Design (3)
HCD 511 Health Economics and Policy (3)
HCD 575 Health Care Transformation and Leadership (3)

Focus Area (6 credit hours)

Additional Curriculum Information
Students select two courses (six credit hours) from any of the following focus areas: health policy and advocacy, health systems management, and performance improvement in health care. Students should contact the academic unit for a list of approved focus area courses.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution. The following disciplines are preferred: business or law (health care and business administration, economics, finance or law); engineering (biomedical engineering); general science (biology or physiology); a health-related field (nursing, health policy or public health); or math or computer science (statistics or computer science).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• proof of English language prociency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current

residency.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after obtaining the certificate, how the program will help them achieve their goals, what their career aspirations are, and what interested the applicant in the program.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-science-health-care-delivery/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Integrate leadership and management skills and principles to facilitate the interdisciplinary delivery of patient-centered health care.
Create a comprehensive plan to redesign care delivery to address a current health care delivery systems challenge.

Career opportunities

Graduates who complete this program have specialized knowledge in a competitive industry, giving them an edge in the job market.

The skills and knowledge gained in this innovative certificate program are relevant to:

C-suite executives and administrators
frontline staff (respiratory therapists, occupational therapists, physical therapists and dietitians)
health care providers (physicians, physician assistants, nurse practitioners and nurses)
students in health-related disciplines

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Speech and Hearing Science (Auditory and Language Neuroscience), PHD (NHSHSALPHD)

College/School: College of Health Solutions

Campus: Tempe

Program description

In the Doctor of Philosophy program in speech and hearing science with a concentration in auditory and language neuroscience, you develop a strong foundation in basic and applied neuroscience, conduct impactful research related to healthy auditory and language abilities, and explore the neural bases of communication disorders. This program's expert faculty are in a distinct position to provide an integrated training experience because of their focus on innovative, next-generation approaches to the field of speech, language and hearing science, such as neuroimaging techniques and neuromodulation.

Faculty backgrounds include engineering, neuroscience and psychology. Within ASU, rich collaborations exist between the College of Health Solutions, the School of Life Sciences, the Ira A. Fulton Schools of Engineering, the Biodesign Institute and the Department of Psychology, enabling you to take advantage of faculty mastery in each area. ASU maintains strong research and clinical relationships with Barrow Neurological Institute, Mayo Clinic and Banner Alzheimer's Institute, supporting faculty expertise in speech-language pathology and auditory neural prosthetics.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (2 credit hours)
SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)
SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Concentration (6 credit hours)
SHS 513 Auditory Neuroscience (3)
SHS 598 Topic: Speech Neuroscience (3)
SHS 598 Topic: Language and Communication Neuroscience (3)

Other Requirements (12 credit hours)
professional seminars (12)
preliminary exam (0)
comprehensive exams (0)

Restricted Elective (3 credit hours)

Electives or Additional Research (28 credit hours)

Research (21 credit hours)
SHS 792 Research (12)
research methods and statistics (9)

Culminating Experience (12 credit hours)
SHS 799 Dissertation (12)

Additional Curriculum Information
Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours

from the master's degree toward the total credit hours for this degree, with program approval.

In collaboration with faculty, students select an elective from a restricted list that focuses on issues related to auditory and language neuroscience, particularly the molecular, structural and anatomical aspects.

The preliminary exam research project must be within the field of auditory or language neuroscience. This formal research experience during the first three semesters of the program provides students with a jump start into research, preparing them for their subsequent dissertation research.

Before beginning dissertation research, the student must pass written and oral comprehensive examinations covering their field of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in a related field and do not wish to earn a clinical master's degree, or if they have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts for undergraduate and graduate study
• personal statement
• three references (academic or professional)
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The personal statement, typically one to two double-spaced pages, should address the student's motivation to pursue the PhD, include evidence of potential to succeed in a research-intensive doctoral program, and describe goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests. The statement should also identify a specific faculty member with whom the student would like to work.

An optional writing sample (six to 10 pages) may be submitted with the program application. Writing samples include publications, research manuscripts or a piece of academic writing.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to at least one of the following: the applicant's academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. References are typically faculty members or clinical or research supervisors. If the applicant has spent some time away from a research or academic environment, it is still

recommended that they include references from those previous experiences, in addition to a more recent clinical or research supervisor.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will be able to develop curriculum and instruct in key knowledge areas within the fields of auditory and language neuroscience.
Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will engage with scholars in academic and professional settings.
Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will master the key concepts related to research in the field at an advanced level.

Career opportunities

Doctoral-level scientists in the field of speech and hearing science are well situated to pursue opportunities in which they can lead independent research programs as university professors or research scientists in the private or public sector.

There is a particular need for doctorate-prepared individuals with speech-language pathology or audiology backgrounds in tenure-track academic positions.

Career examples include:

medical science liaison
professor or community college teaching faculty
program officer in a nonprofit or government agency
research scientist in a for-profit or nonprofit entity

Speech and Hearing Science (Translational Genetics of Communication Abilities), PHD (NHSHSTGPHD)

College/School: College of Health Solutions

Campus: Tempe

Program description

The Doctor of Philosophy program in speech and hearing science with a concentration in translational genetics of communication abilities provides you with training in an innovative approach to the clinical sciences that has been pioneered at ASU. In this approach, the concepts of precision medicine are applied to all disciplines within communication sciences and disorders.

You receive training in molecular genetics and bioinformatics, which equips you to investigate the interactions among genetic, brain-based and behavioral traits. Prior training in genetics isn't required. Knowledge of genotype-phenotype associations provides the foundation for the translational components of this program:

• early identification and intervention
• individualized management
• interprofessional approaches

You have the option to focus primarily on basic sciences aspects or clinical translations, or to explore both.

This program leverages strong research and clinical expertise at the College of Health Solutions across clinical linguistics, as well as the college's expertise in the biosciences and translational clinical sciences. Collaborating units at ASU include the Biodesign Institute, the School of Life Sciences and many subspecialty areas, such as bioinformatics and psychology.

In this doctoral program, you learn the skills to discover and understand networks of genotype-phenotype associations and to contribute to more effective clinical management of communication disorders using preventive, targeted and interprofessional methods.

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (2 credit hours)
SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)
SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Concentration (9 credit hours)

Research (21 credit hours)
SHS 792 Research (12)
research methods and statistics (9)

Electives or Additional Research (28 credit hours)

Other Requirements (12 credit hours)
professional seminars (12)
preliminary exam (0)
comprehensive exams (0)

Culminating Experience (12 credit hours)
SHS 799 Dissertation (12)

Additional Curriculum Information
Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours from the master's degree toward the total credit hours, with program approval.

Concentration coursework focuses on issues related to translational genetics and is selected in collaboration with faculty. All doctoral graduates with this concentration are required to have foundational knowledge in genetics. Students must fulfill teaching, grant writing, presentation and career development competencies through the professional seminars requirement.

The preliminary exam research project must be within the field of translational genetics of communication abilities. This formal research experience during the first three semesters of the program enables students to jump-start their

research, preparing them for their subsequent dissertation.

Before the student begins their dissertation research, they must pass written and oral comprehensive examinations covering their field of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in a related field and do not wish to earn a clinical master's degree, or if they have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• three references (academic or professional)
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The personal statement, typically one to two double-spaced pages, should include an explanation of the student's motivation to pursue a PhD, evidence of potential to succeed in a research-intensive doctoral program, and goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests. The statement should also identify a specific faculty mentor with whom the student would like to work.

An optional writing sample (six to 10 pages) may be submitted with the program application. Writing samples include a publication, research manuscript or piece of academic writing.

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to one or more of the following: academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. They are typically faculty, clinical or research supervisors. If the applicant has spent some time away from research or academia, it is still recommended that they include references from experiences that preceded their absence, in addition to a more recent clinical or research supervisor.

Speech and Hearing Science, PHD (LAHEARPHD)

College/School: College of Health Solutions

Campus: Tempe

Program description

The Doctor of Philosophy program in speech and hearing science is an interdisciplinary offering that trains you in basic and applied research in the fields of speech, language, literacy and hearing sciences.

You develop a strong foundation to conduct impactful research by pursuing an individualized program with the unifying theme of human communication and disorders.

The program faculty members are in a distinct position to provide integrated training experience, given their innovative approaches to the field. Faculty members' backgrounds include expertise in speech-language pathology and auditory neural prosthetics, with distinctions in education, psychology, engineering, neuroscience and health care.

You may tailor your courses to your specific interests under the guidance of your faculty committee. This doctoral program is also available with concentrations in auditory and language neuroscience (https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHSALPHD/speech-and-hearing-science-auditory-and-language-neuroscience-phd) and translational genetics of communication abilities (https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHSTGPHD/speech-and-hearing-science-translational-genetics-of-communication-abilities-phd).

STEM-OPT extension eligible: No

Degree requirements

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation

Required Core (2 credit hours)
SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)
SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Focused Electives (9 credit hours)

Research (21 credit hours)

SHS 792 Research (12)
research methods and statistics (9)

Electives or Additional Research (28 credit hours)

Other Requirements (12 credit hours)
professional seminars (12)
preliminary exam (0)
comprehensive exams (0)

Culminating Experience (12 credit hours)
SHS 799 Dissertation (12)

Additional Curriculum Information
Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours from the master's degree toward the total credit hours, with program approval.

Under guidance of a faculty mentor and supervisory committee, students complete 12 credit hours of restricted elective content-area coursework within speech and hearing science and other disciplines that can be tailored to the student's research interests. Students must fulfill teaching, grant writing, presentations and career development competencies through the professional seminars requirement.

The preliminary exam research project is completed during the first three semesters of the program and provides students with a jump start into research to prepare them for the dissertation.

Before commencing dissertation research, the student must pass written and oral comprehensive examinations covering their field of study.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's degree in a related field and must not wish to earn a clinical master's degree. Applicants could also have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts for undergraduate and graduate study
• personal statement
• three references (academic or professional)
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current

residency.

The personal statement, typically one to two double-spaced pages, should address the student's motivation to pursue a PhD and include evidence of potential to succeed in a research-intensive doctoral program, as well as goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests. The statement should also identify a specific faculty mentor with whom the student would like to work.

There is an optional writing sample (six to 10 pages), which may be substituted with a publication, research manuscript or piece of academic writing.

Contact information of three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to one or more of the following: the applicant's academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. References are typically faculty members, or clinical or research supervisors. If the applicant has spent some time away from a research or academic environment, they may still include references from experiences that preceded the absence, in addition to a more recent clinical or research supervisor.

Strength and Conditioning, MS (NHSTRCDMS)

College/School: College of Health Solutions

Campus: Downtown Phoenix

Program description

In the Master of Science program in strength and conditioning, you focus on specialized knowledge of human physiology and movement mechanics to optimize the physical abilities of active groups, including athletic and tactical populations, and to prevent injury-related problems.

Required courses address advances in health and performance monitoring, how to design successful exercise and recovery programs for maximum physical performance, and coaching strategies that motivate increased individual effort in sport or tactical work.

You gain practical experience that hones your coaching skills and refines your ability to motivate individuals to achieve the increased workloads that are necessary for performance improvement.

This program is currently seeking accreditation from the Council on Accreditation of Strength and Conditioning Education.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Degree requirements

30 credit hours and a written comprehensive exam

Required Core (24 credit hours)
KIN 520 Applied Sport Psychology (3)
KIN 530 Exercise and Sport Physiology (3)
KIN 540 Sport Biomechanics (3)
NTR 555 Nutrition and the Athlete (3)
SSP 501 Data Collection, Analysis and Interpretation in Strength and Conditioning (3)
SSP 530 Advanced Performance Programming (3)
SSP 534 Measurement and Monitoring in Sport and Fitness (3)
SSP 560 Performance Sports Coaching (3)

Other Requirements (6 credit hours)
SSP 584 Internship (6)

Culminating Experience (0 credit hours)
written comprehensive exam (0)

Additional Curriculum Information
The written comprehensive exam covers the three coaching application courses SSP 530, SSP 534 and SSP 560.

The internship is a fully immersive experience during which the student works under a certified strength and conditioning specialist. Hours are spent learning all aspects of the job, including best practices for improving athletic performance.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must have earned a bachelor's or master's degree in exercise science, kinesiology, sports science, exercise physiology, human movement, physical education or a related field from a regionally accredited institution. Applicants with a bachelor's degree in another area may apply and be considered if they can demonstrate experience in strength and conditioning.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• two references (academic or professional)
• letter of intent
• resume or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

If an applicant does not have a bachelor's degree in one of the areas listed above but has strength and conditioning experience, evidence must be included in either the professional resume or the letter of intent.

All applicants must have basic competencies in human anatomy and physiology with laboratories (BIO 201 and BIO 202), exercise and sport physiology (SSP 315 and SSP 316), and applied anatomy and biomechanics of sport and movement (SSP 325).

The letter of intent should address the applicant's area of professional or scholarly interest; their professional goals; their philosophy of strength and conditioning; and relevant experience, background and training.

Contact information for two references is required. References are contacted via email to respond to a series of questions about the applicant. At least one reference should be from an academic source. One reference may be from an employer in a related field or from a coach if the applicant was previously a student-athlete.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Evaluate the skills and abilities needed of an athlete to perform in a specific sport/activity.
Create advanced strength and conditioning programs for sport or tactical (police, military, firefighter) populations to enhance performance and reduce participant's risk of injury.
Apply the appropriate coaching intervention based on their evaluation of the participant and their desired performance outcomes.

Career opportunities

Students are prepared to sit for certification examinations offered through the National Strength and Conditioning Association to become certified strength and conditioning specialists, tactical strength and conditioning facilitators, or certified performance sports scientists.

Graduates have acquired the fundamental skills to become a strength and conditioning coach, sports scientist, tactical performance professional or specialist who works with individuals in high-activity occupations (e.g., members of the military, police officers, firefighters, emergency medical technicians).

Career opportunities include these positions:

athletic trainer
exercise physiologist
fitness or wellness coordinator
fitness trainer or aerobics instructor
sports performance coach or scout
sports scientist
strength and conditioning coach

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.

Integrative Sciences and Arts, College of

Applied Biological Sciences, MS (TSAPBIOSMS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

Program description

The Master of Science program in applied biological sciences offers you advanced instruction in the ecology and sustainable management of natural and urban ecosystems. Through rigorous coursework combining fieldwork and laboratory studies, you apply ecological and biological principles to address critical challenges in species and ecosystem conservation. The program concludes with a student-selected culminating experience: conducting a research-based thesis, developing an applied project, or completing a capstone integrating program competencies.

The program is supported by faculty members with backgrounds in:

• desert horticulture
• ecological restoration
• environmental microbiology
• environmental stress physiology
• plant-fungal ecology
• plant systematics
• riparian and stream ecology
• wildlife biology

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Applied Biological Sciences, BS

Applied Biological Sciences (Preveterinary Medicine), BS

Applied Biological Sciences (Natural Resource Ecology), BS

Applied Biological Sciences (Secondary Education in Biology), BS

Applied Biological Sciences (Sustainable Horticulture), BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (ABS 592 and ABS 593), or
30 credit hours including the required capstone course (ABS 597)

Required Core (3 credit hours)
ABS 500 Research Methods (3) or
ABS 550 Vegetation Dynamics (3) or
ABS 555 Wildlife Dynamics (3)

Electives or Research (21 or 24 credit hours)

Culminating Experience (3 or 6 credit hours)
ABS 592 Research (3) and ABS 593 Applied Project (3) or
ABS 597 Applied Biological Sciences Capstone (3)
ABS 599 Thesis (6)

Additional Curriculum Information
Students choose elective coursework that supports their educational objectives.

Students choose one of the three culminating experience options listed above. The number of elective credit hours depends on the culminating experience chosen. All students complete 30 credit hours to earn the degree.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants must have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• resume
• statement of intent
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants are expected to have completed 18 credit hours in biological sciences and closely related courses. Certain fields of study may have specific expectations regarding courses taken at the undergraduate level. Applicants who do not meet these course requirements may be considered for admission with additional coursework.

The statement of intent should be no longer than 600 words and explain the applicant's interest in environmental resources, and their academic background and educational objectives.

The letters of recommendation should be from references who are qualified to comment on the applicant's potential in the selected area of study.

Department faculty evaluate the applications and supporting materials and recommend to ASU Admission Services whether the applicant should be granted admission, either regular or provisional, or denied admission. If admission is provisional, the Graduate College specifies in its letter of admission the provisions that must be met for the student to gain regular status. The school informs successful applicants of the procedures for enrollment.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Professionals with expertise in the study of evolution, natural history, and the conservation of plants and animals are increasingly sought-after across various sectors, including governmental organizations at the county and state levels, as well as in community management roles. Those who have skills in laboratory techniques, field research and data analysis are particularly valuable to businesses and institutions that aim to forge strong connections within leading scientific and technological industries. These professionals contribute to the development of innovative solutions for complex global challenges in a technology-driven landscape.

A background in biology can facilitate a diverse array of career paths, encompassing research, education, health care and policy development. As the demand for knowledgeable individuals in these areas continues to grow, the relevance of biological expertise in addressing contemporary issues becomes more evident.

Career examples include:

- animal scientist
- biologist
- fish and wildlife biologist
- medical scientist
- natural science manager
- postsecondary biological science teacher

Counseling (School Counseling), MC (LSCOUNSCMC)

College/School: College of Integrative Sciences and Arts

Campus: Tempe

Program description

The mission of the school counseling concentration within the Master of Counseling program is to prepare you to work with school-age youth in K-12 settings as a school counselor. The program emphasizes addressing academic and socioemotional concerns and prepares you to become a licensed professional counselor in Arizona and other states with comparable licensure requirements.

Upon completion of the program, you may apply for a School Counselor, PreK-12 Certificate issued by the Arizona Department of Education and you are also eligible to pursue a license in mental health counseling through the Arizona

Board of Behavioral Health Examiners.

You can expect the program completion time to be a minimum of three years, and you work with your faculty advisor on time frame and course scheduling.

STEM-OPT extension eligible: No

Degree requirements

66 credit hours and a written comprehensive exam

Required Core (39 credit hours)
CED 501 Research Evaluation and Data Analysis (3)
CED 522 Theories of Counseling and Psychotherapy (3)
CED 523 Psychological Tests (3)
CED 529 Lifespan Human Development (3)
CED 534 Occupations and Careers (3)
CED 545 Assessment and Diagnosis (3)
CED 567 Group Dynamics and Counseling (3)
CED 576 Foundations of Counseling (Counseling Skills I) (3)
CED 577 Foundations of Counseling (Counseling Skills II) (3)
CED 645 Professional Issues and Ethics (3)
CED 671 Multicultural Counseling (3)
CED 672 Couple and Family Counseling (3)
CPY 673 Trauma in Counseling (3)

Concentration (9 credit hours)
CED 510 Introduction to School Counseling (3)
CED 511 Career Development and Advanced Educational Planning (3)
CPY 691 Topic: Counseling Children and Adolescents (3)

Electives (3 credit hours)

Other Requirements (15 credit hours)
CED 680 Practicum: Clinic (3)
CED 684 Internship: Counseling I (3)
CED 684 Internship: Counseling II (3)
CED 684 Internship: Internship in School Counseling (6)

Culminating Experience (0 credit hours)
written comprehensive exam (0)

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's

degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• personal statement
• video submission
• two or three letters of recommendation
• resume
• unofficial transcripts
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A video submission is required as part of the review process; applicants should see the program website for submission instructions.

Nonacademic, professional or life experiences: Applicants are required to submit a two- to three-page personal statement (12 pt. Times New Roman font with 1-inch margin, double-spaced) that indicates their qualifications (e.g., professional experiences and personal attributes) and interest in the program. Specifically, applicants are asked to describe their education, training, and volunteer and professional experiences, and explain why they want to pursue the Master of Counseling degree. They also should outline how the program will help them meet their goals. Applicants are expected to discuss their ability to work with and be sensitive to the needs of a multicultural and diverse society, including members of diverse racial and ethnic groups and sexual minority individuals.

If an applicant's cumulative GPA is lower than 3.00 (scale is 4.00 = "A"), the program recommends that the applicant explain in the personal statement how their prior academic difficulties would be overcome in graduate school.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply reflective counseling skills in clinical mental health treatment practice through mock sessions and supervised site experience.
- Apply multicultural and diversity concepts to therapeutic client practice through case studies and supervised site experience.
- Implement school-based programming through an assessment project in culminating portfolio.

Career opportunities

Graduates work in a variety of school systems (public, private and charter schools) and can provide consultation and counseling services to school systems. This degree can also lead to school-based administrative positions. This concentration enables graduates to use their skill sets in both counseling and administration, preparing them for employment in a variety of settings --- schools, mental health agencies and practices, and consultant agencies --- and in varied professional roles.

Career examples include:

- mental health clinician
- mental health counselor

- school counselor

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.This program leads to professional licensure in mental health counseling and a School Counselor, PreK-12 Certificate.

Graduates of the program meet the requirements for licensure as a professional counselor with the Arizona Board of Behavioral Health Examiners. Because requirements vary by state, students should consult the licensing requirements for the state in which they intend to reside.

Counseling Psychology, PHD (EDCPSYPHD)

College/School: College of Integrative Sciences and Arts

Campus: Tempe

Program description

This American Psychological Association-accredited Doctor of Philosophy program in counseling psychology adheres closely to the scientist-practitioner training model to prepare you for employment in academic and clinical settings.

Although faculty interests are diverse, there's a common emphasis on using empirical data as the basis for culturally responsive professional practice. The program boasts a strong commitment to diversity, equity and inclusion as evidenced in course offerings, clinical training, professional development activities and research foci.

Faculty research foci include:

• colonialism and decolonization
• LGBTQ+ mental health, trans and nonbinary minority stress and resilience
• migration, acculturation and acculturative stress
• psychotherapy process and outcome
• racial and ethnic minority psychology
• racism and microaggressions
• retention in graduate education
• social and personal relationships
• socioeconomic status and financial stress

You enjoy exceptional clinical opportunities, including placement in local hospitals, university and college counseling centers, community agencies, and assessment sites. The program's state-of-the-art Counselor Training Center provides practicum experiences with campus and community clients as well as clinical supervision experiences. The center supports three complementary functions: clinical service provision, high-quality training, and innovative process and outcome research.

STEM-OPT extension eligible: No

Degree requirements

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)

International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• personal statement
• completed biographical information form
• writing sample
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The personal statement should be single-spaced and roughly 600-800 words, and should describe the applicant's history, academic and professional goals, and reasons for selecting this program.

Applicants must submit a sample of their expository writing (e.g., taken from a paper prepared for a course or a report on a project the applicant has completed in this field), not to exceed 1MB.

At least two of the recommendation letters must be from individuals who are familiar with the applicant's academic work.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Design and conduct independent research in counseling psychology.
- Apply ethical and culturally responsive clinical skills across the areas of assessment and diagnosis and counseling and helping relationships.
- Teach counseling psychology knowledge to undergraduate student audiences in their role as a teaching assistant.

Career opportunities

Graduates provide clinical services in a variety of settings, such as community agencies, hospitals, private practice and university counseling centers. They are also well positioned to pursue academic positions within higher education.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Graduates of the counseling psychology doctoral program meet the licensure requirements of most states. Because requirements vary by state, it is recommend that students consult the licensing requirements for the state where they intend to reside.

Counseling, MC (EDCOUNMC)

College/School: College of Integrative Sciences and Arts

Campus: Tempe, Online

Program description

In the Master of Counseling program, with its strong focus on counseling across cultures, identity and human development, you learn to promote the health of individuals, families, groups and organizations in a multicultural society.

This 60 credit hour program prepares you to become a licensed professional counselor in Arizona and other states with comparable licensure requirements.

This program is approved by the Arizona Board of Behavioral Health Examiners. https://bbhe.az.gov/applying-licensure/accredited-or-approved-programs (https://bbhe.az.gov/applying-licensure/accredited-or-approved-programs)

Faculty research and clinical foci include:

- advocacy
- children and adolescents
- counseling process and outcome
- couple and family relationships
- crisis assessment
- culturally responsive treatment
- mental health disparities
- nonbinary stress and resilience
- play therapy

The program instills in you the importance of research in advancing the counseling profession. The crucial link between science and practice is evident in the three complementary functions of the program's state-of-the-art Counselor Training Center: clinical service provision, high-quality training, and innovative process and outcome research.

The MC program endorses the American Counseling Association's Code of Ethics and the following American Counseling Association competencies: ALGBTIC Competencies for Counseling LGBQIQA Individuals (2012), Competencies for Counseling the Multiracial Population (2015), Multicultural and Social Justice Counseling Competencies (2015), Competencies for Addressing Spiritual and Religious Issues in Counseling (2009) and Multicultural Career Counseling Competencies (2009).

STEM-OPT extension eligible: No

Degree requirements

60 credit hours and a thesis, or
60 credit hours and a written comprehensive exam

Required Core (39 credit hours)
CED 501 Research Evaluation and Data Analysis (3)
CED 522 Theories of Counseling and Psychotherapy (3)
CED 523 Psychological Tests (3)
CED 529 Lifespan Human Development (3)
CED 534 Occupations and Careers (3)
CED 545 Assessment and Diagnosis (3)
CED 567 Group Dynamics and Counseling (3)
CED 576 Foundations of Counseling (Counseling Skills I) (3)
CED 577 Foundations of Counseling (Counseling Skills II) (3)
CED 645 Professional Issues and Ethics (3)
CED 671 Multicultural Counseling (3)
CED 672 Couple and Family Counseling (3)
CPY 673 Trauma in Counseling (3)

Electives or Research (6 or 12 credit hours)

Other Requirements (9 credit hours)
CED 680 Practicum: Clinic (3)
CED 684 Internship: Counseling I (3)
CED 684 Internship: Counseling II (3)

Culminating Experience (0 or 6 credit hours)
CED 599 Thesis (6) or
written comprehensive exam (0)

Additional Curriculum Information
Students choose either a thesis or a written comprehensive exam. The thesis option, available only to on-campus students, is for those whose program is focused on research; they take six credit hours of research coursework and six credit hours of thesis. The written comprehensive exam is for both on-campus and online students in the practitioner pathway; they take 12 credit hours of elective coursework.

The clinical portion of the program comprises CED 680 Practicum: Clinic and CED 684 Internship: Counseling I and CED 684 Internship: Counseling II. These are required for all students. CPY 691 Topic: Counseling in Spanish is also offered as a clinical elective option. CED 580 Practicum Clinic and CED 584 Internship may be taken by students who need to log required clinical hours after they have completed CED 680 and both topics of CED 684. CED 580 and CED 584 are not required unless additional clinical hours are needed.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• personal statement
• video submission
• two or three letters of recommendation
• resume
• unofficial or official transcripts
• proof of English proficiency

Additional Admission Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A video submission is required, in addition to the application materials; applicants should see the program website for submission instructions.

Nonacademic, professional or life experiences: Applicants are required to submit a two- to three-page personal statement (12 pt. Times New Roman font with one-inch margin, double-spaced) that indicates their qualifications (e.g., professional experiences and personal attributes) and interest in the MC program. Specifically, applicants are asked to describe how their education, training, and volunteer and professional experiences have influenced their decision to pursue the MC degree. They also should outline how the program will help them meet their goals. Applicants are expected to discuss their ability to work with and be sensitive to the needs of a multicultural society, including members of diverse racial and ethnic groups and sexual minority individuals.

If the applicant's cumulative GPA is lower than 3.00 (scale is 4.00 = "A"), the program recommends that the applicant explain in the personal statement how their prior academic difficulties would be overcome in graduate school.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-counseling) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Apply theory and frameworks in clinical mental health counseling in the culminating experience as required by the Master's in Psychology and Counseling Accreditation Council (MPCAC) accrediting standards. (Practitioner track)
- Conduct independent research in mental health counseling. (Research track)
- Employ competent clinical skills across the areas of assessment, diagnosis, and counseling/helping relationships in service delivery associated with a counseling placement site.
- Examine the major cultural and diversity influences on human behavior in multimedia course projects.

Career opportunities

Graduates provide clinical services in a variety of settings, such as community agencies, hospitals, private practice and university counseling centers. They are also well prepared to pursue doctoral-level studies.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Graduates of the MC program meet the requirements for licensure as a professional counselor with the Arizona Board of Behavioral Health Examiners. Because requirements vary by state, students should consult the licensing requirements for the state in which they intend to reside.

Integrative Social Science, MS (LSISSMS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic

ASU is not currently accepting applications for this program.

Program description

In a rapidly evolving world, the complexities of societal issues require innovative and multifaceted solutions. If you are a forward-thinking individual ready to take on complex challenges, the Master of Science program in integrative social science is designed you. This advanced degree program merges various social science disciplines, equipping you with the skills and knowledge to address pressing global issues, such as climate change, social injustice and poverty.

Unlike traditional programs that focus on single disciplines, this program takes a holistic approach, recognizing that problems are interconnected, and diverse perspectives are required to pursue solutions. You explore the foundations of sociology, economics and policy analysis, fostering an expansive analytical skill set.

The curriculum emphasizes both theoretical analysis and practical problem-solving. You learn to approach issues through a multifaceted lens, integrating strategies from various fields to devise effective solutions.

You join a vibrant community of learners from various backgrounds. The faculty brings multiple perspectives and global expertise, creating a learning environment that supports students from all backgrounds and experiences.

You benefit from exploring:

• creative problem-solving: developing innovative solutions by combining insights from different social sciences
• multidisciplinary perspectives: analyzing problems through the lens of multiple disciplines to gain a comprehensive understanding
• research and analysis: gaining expertise in researching complex social issues and communicating findings effectively

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Political Science, BS

Science, Technology and Society, BS

Integrative Social Science, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

30 credit hours and a thesis, or
30 credit hours including the required applied project course (ISS 593)

Required Core (9 credit hours)
ISS 501 Advanced Integrated Social Research Methods (3)
ISS 502 Advanced Seminar in Integrated Social Science (3)
ISS 505 Multivariate Methodologies of Social Science (3)

Electives or Research (15 or 18 credit hours)

Culminating Experience (3 or 6 credit hours)
ISS 593 Applied Project (3) or
ISS 599 Thesis (6)

Additional Curriculum Information
Students choose either the thesis or the applied project option.

For elective coursework, students choose from a list of preapproved courses for a total of 15 to 18 credit hours. Other courses may be used with approval from the academic unit.

Students are highly encouraged to participate in an internship for elective coursework. An internship is a structured practical experience that follows a contract or plan supervised by faculty and practitioners. Students should contact the academic unit for a list of possible elective courses and internship opportunities.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants must have earned a bachelor's or master's degree in any social science or interdisciplinary field, such as political science, sociology, philosophy, economics, psychology, public policy administration or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Career opportunities

Graduates of the program are distinctly positioned for success in various fields, including policy development, social research and community organization, as well as for academic pursuits. Graduates have the tools to make a meaningful impact in society, whether they enter the workforce or continue their education in a doctoral program.

Liberal Studies, MLSt (LAMLSMLS)

College/School: College of Integrative Sciences and Arts

Campus: Downtown Phoenix, Polytechnic, Online

Program description

The Master of Liberal Studies program is an advanced degree offering that situates knowledge and know-how at the intersection of culture, community and profession. Its emphasis on integrative, applied knowledge and cross-disciplinary approach cultivates your capacity to see and understand the complex reality of societal problems and navigate challenges across cultural, professional and personal contexts. Communication, holistic analysis, perspective-taking and research are featured aspects of all core courses.

A distinct aspect of the program is the customization of learning. Working closely with faculty advisors, you build the majority of your program by choosing from a wide-ranging list of elective courses that best meet your interests and needs. With courses from across the humanities, social sciences, arts and natural sciences, this program prepares you to become a master learner and problem-solver. The program culminates in an applied learning experience under the guidance of a seasoned faculty member.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• a letter of interest in the program
• a resume, biographical statement or curriculum vitae
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-liberal-studies/) for program descriptions and to request more information.

Career opportunities

Professionals with excellent critical problem-solving and communication skills are in high demand across sectors and industries, including business, media, entertainment, politics and community organizations. Skills in communication, creative practice, and the collection and critical analysis of data for the development of impactful content are valuable to businesses, nonprofit organizations and institutions that rely on relevant strategies to engage and serve diverse audiences.

Career examples include:

- archivist
- business manager for artists, performers and athletes
- market research analyst
- public relations specialist
- writer or creative writer

ENG 590 Reading and Conference (1-12)
ENG 598 Special Topics (1-4)

Culminating Experience (3 credit hours)
ENG 597 Graduate Capstone Seminar (3)

Additional Curriculum Information
Students choose five courses from a restricted list for a total of 15 credit hours. Other courses (ENG, COM, FMS, HST or appropriate field) may be used for up to six credit hours with approval from the academic unit.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or master's degree from a regionally accredited college or university in a related field such as English or any humanities discipline.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• written letter of intent that includes a detailed statement of purpose
• portfolio of at least three documents
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The portfolio must include at least three documents that demonstrate the applicant's ability to write in multiple genres and should include both academic and professional writing for a variety of audiences and purposes. At least one of the documents must be a sample of academic writing. One of the documents can be a sample of creative writing. The portfolio should be 15 to 30 total pages in length. The writing samples are evaluated using a rubric that considers several criteria, including intellectual focus, strength of argument and documentation, awareness of audience, organization, clarity, mechanical soundness and overall effectiveness.

The letters of recommendation should be either academic or professional and speak to the applicant's background and capabilities.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Compose effective visual and multimodal narratives.
- Evaluate narratives, focusing on narrative structures, literary techniques, and cultural significance.
- Compose an original narrative-based applied project that incorporates creative thinking principles.

Career opportunities

Graduates are equally prepared to become candidates for further academic studies, advance their careers as area educators in the language arts, and step into one of the many professions that value creativity, critical thinking and highly skilled communication --- including teaching, writing, online publishing and editing.

Professionals with expertise in narrative are in high demand in many sectors and industries, including publishing, media, entertainment, marketing and politics. Skills in crafting and interpreting narratives are valuable to businesses and institutions that communicate, entertain and educate.

Career examples include:

- copy writer
- creative writer
- editor
- freelance writer
- high school teacher

Organizational Leadership, MS (LSORGLMS)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Tempe, Online

Program description

The Master of Science program in organizational leadership is a flexible and forward-thinking program designed to help you strengthen your leadership capacity across diverse sectors.

This program offers a rigorous, research-informed foundation in organizational theory and practice. You gain insight into strategic change, institutional dynamics, collaborative governance, conflict mediation, and the challenges of leading diverse teams. Emphasis is placed on actionable knowledge --- translating theory into effective leadership practice.

You also develop advanced skills in research methods and data analysis, positioning you to assess organizational effectiveness and drive evidence-based decision-making.

A wide variety of leadership-focused electives --- such as nonprofit leadership, intercultural leadership, emotional intelligence and ethical decision-making --- enable you to tailor your coursework to your personal goals and career aspirations. You are prepared to lead with insight and integrity, guided by expert faculty.

STEM-OPT extension eligible: No

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

English, BA

Liberal Studies, BA

Organizational Leadership (Project Management), BA

History, BA

Interdisciplinary Studies, BA

Interdisciplinary Studies (Organizational Studies), BA

Organizational Leadership, BA

Technological Leadership, BS

Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (https://acceleratedmasters.asu.edu/how-apply).

Degree requirements

33 credit hours and a thesis, or
33 credit hours including the required applied project course (OGL 593)

Required Core (12 credit hours)
OGL 510 Advanced Theories of Organizational Leadership (3)
OGL 520 Organizational Leadership: Social Psychological Perspectives (3)
OGL 530 Critical Perspectives in Leadership Theory (3)
OGL 540 Evidence-based Inquiry in Organizational Leadership (3)

Required Methods Courses (3 or 6 credit hours)
OGL 570 Analyzing Organizations (3) or
OGL 574 Qualitative Data Analysis in Leadership Research (3) and OGL 575 Quantitative Data Analysis in Leadership Research (3)

Restricted Electives (9 or 15 credit hours)

Culminating Experience (3 or 6 credit hours)
OGL 593 Applied Project (3)
OGL 599 Thesis (6)

Additional Curriculum Information
Students complete either an applied project or thesis for the culminating experience.

For the required methods coursework, applied project students complete OGL 570, and thesis students complete OGL 574 and 575.

Depending on their chosen culminating experience, students select three or five courses from an approved restricted elective list, which is available from the academic unit.

Other courses may be used for the methods and elective coursework with the academic unit's approval.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any area or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• professional resume
• two letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT)®, or a score of 80 if taken before January 21, 2026 in a

testing center; 6.5 on the IELTS; 105 on the Duolingo English test; or the applicant must have a passing score in the English for Graduate Admission online course through ASU Global Launch.

All applicants must submit a letter of intent that includes a detailed statement of purpose addressing how the program goals align with their personal and professional objectives. The essay should be a maximum of 500 words and is evaluated on the basis of content, presentation and evidence of graduate-level writing ability.

The professional resume or curriculum vitae is limited to two pages.

Applicants must submit two letters of reference that focus on their ability to do academic work. Friends and family members are not appropriate recommenders.

All applications are reviewed holistically, taking into account all application materials, including GPA, letters of recommendation, personal statement and work experience. Applicants should note that meeting any single requirement does not guarantee admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Critically evaluate leadership literature in the disciplinary fields of psychology and sociology.
- Evaluate appropriate quantitative and qualitative assessment methods of data analysis
- Create an original scholarly project or thesis in the field of organizational leadership.

Career opportunities

Professionals with skills and expertise in critical thinking, organizational social psychology, teamwork, strategic change and leadership theory are in high demand across global industries. Government agencies, Fortune 500 companies, nonprofit organizations and other employers need professionals with the variety of skills that are developed and refined throughout the program.

Career examples include:

- CEO
- college professor
- human resources manager
- market research analyst
- training and development manager

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Analyze project practices using theories and methods from diverse project contexts.
- Assess the impact of a given project as it relates to sustainability.

Global opportunities

Global experience: Experience studying and interning abroad can be one of the most valuable tools for project management students. Global Education programs (https://goglobal.asu.edu/) enable students to develop valuable intercultural communication and project management skills that can give them an advantage in the workforce.

Career opportunities

The graduate certificate in project management equips students with the skills needed for roles as project managers across various sectors, including public, private and nonprofit organizations. Graduates are prepared for a variety of careers such as:

- director of project management
- portfolio or project manager
- senior project manager
- technical project manager

Graduates are well prepared to pursue key industry certifications, including Certified Associate in Project Management, Green Project Management and Project Management Professional Certification. For more information, students should visit theschool website.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students who earn this graduate certificate may be eligible for the following:

Certified Associate in Project Management (https://www.pmi.org/certifications/certified-associate-capm) through the Project Management Institute
Students must have 23 hours of project management education and a secondary degree (high school diploma, associate degree or the global equivalent) to test; the 23 hours are contact hours (not credit hours). Students are eligible to sit for the CAPM following completion of this graduate certificate program. Green Project Management (https://gpm.org/)
PMG 503 Sustainability in Project Management prepares learners for PMI®-GPM's Certified Sustainable Project Professional certificate, covering topics such as GPM-Global's® PRiSM structured approach that integrates a P5 impact analysis and sustainability management plan. Project Management Professional (https://www.pmi.org/certifications/project-management-pmp)
This certification requires either a four-year degree and 36 months of experience leading projects within the last eight years, or a secondary education diploma (high school diploma, associate degree or the global equivalent) with 36 months of experience leading projects within the past eight years. In addition, applicants must have 35 hours of project management training to sit for this test.

Project Management, MPM (LSPMGMPM)

College/School: College of Integrative Sciences and Arts

Campus: Polytechnic, Tempe, Online

Program description

In the Master of Project Management program, you learn to plan and execute complex projects by applying advanced project management models and methods, whether you are a recent graduate or a working professional. The program emphasizes scope, risk, quality, scheduling, cost, procurement, communication, stakeholder engagement and integration. You employ project management approaches, processes, structures and techniques, effectively contributing to development and deployment of project management methodologies that achieve organizational goals, solve complex problems and effect change around the globe. You gain advanced knowledge in leadership, conflict resolution and collaboration while experimenting with emerging technologies, and you get hands-on experience in classes taught by knowledgeable experts from across industries. You acquire expertise in budgeting, scheduling, communication and risk management.

This program was first in the nation to partner with Green Project Management, infusing curriculum with sustainability practices and helping to lead change.

This program prepares you to pursue a number of project management certifications and credentials, and specifically meets one of the requirements for taking the Professional Project Management certification exam.

STEM-OPT for International Students on F-1 Visas
This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (https://issc.asu.edu/f-1j-1-students/employment/stem) at ASU's International Students and Scholars Center website.
The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

STEM-OPT extension eligible: Yes

Accelerated program options

This program also allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants must have earned a bachelor's or master's degree in any area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• letter of intent
• professional resume
• two letters of recommendation

• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency by scoring at least 4 on the Internet-based TOEFL (iBT) or a score of 80 if taken before January 21, 2026 in a testing center; 6.5 on the IELTS, 105 on the Duolingo English test; or completion of the appropriate course through ASU Global Launch.

All applicants must submit a written letter of intent, including a detailed statement of purpose that addresses how the program goals coincide with the student's personal and professional objectives. The essay is evaluated based on content, presentation and evidence of graduate-level writing ability (the limit is 500 words).

The professional resume or curriculum vitae is limited to two pages.

Applicants must provide two references who complete a series of questions serving as letters of recommendation. These should specifically address the applicant's academic abilities. Recommendations from friends or family members are not accepted.

All applications are reviewed holistically, taking into account all application materials, including previous GPA, references, personal statement and work experience. Note that meeting any single requirement does not guarantee admission.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (https://asuonline.asu.edu/online-degree-programs/graduate/master-project-management/) for program descriptions and to request more information.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

- Develop solutions to complex problems in managing projects.
- Evaluate the role of ethical literacy, civil discourse and sustainable development as applied to civic institutions.
- Model leadership skills when collaborating on projects.
- Assess the impact of a given project as it relates to sustainability.

Career opportunities

Graduates have the expertise and knowledge needed for advanced positions as project managers and project leaders in a wide variety of public, private and nonprofit sectors.

They are prepared for positions as project managers, portfolio managers, program managers, IT project managers, quality managers and general managers. They are in a strong position to pursue work in government, engineering, construction, information technology, performing arts, health care and human services.

Professional licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (https://admission.asu.edu/academics/licensure) webpage.Students who complete this program may be eligible for the

following:

Certified Associate in Project Management through the Project Management Institute (https://www.pmi.org/certifications/certified-associate-capm (https://www.pmi.org/certifications/certified-associate-capm))
Students must have 23 hours of project management education and a secondary degree (high school diploma, associate degree or the global equivalent) to test; the 23 hours are contact hours (not credit hours). Students are eligible to sit for the CAPM following completion of this program. Green Project Management (https://gpm.org/ (https://gpm.org/))
PMG 503 Sustainability in Project Management prepares learners for PMI®-GPM's Certified Sustainable Project Professional certificate, covering topics such as GPM-Global's® PRiSM structured approach that integrates a P5 impact analysis and sustainability management plan. Project Management Professional (https://www.pmi.org/certifications/project-management-pmp (https://www.pmi.org/certifications/project-management-pmp))
This certification requires either a four-year degree and 36 months of experience leading projects within the last eight years, or a secondary education diploma (high school diploma, associate degree or the global equivalent) with 36 months of experience leading projects within the past eight years. In addition, applicants must have 35 hours of project management training to sit for this test.

Admission requirements

General university admission requirements:
All students are required to meet general university admission requirements.
U.S. applicants (https://admission.asu.edu/apply/graduate/admission)
International applicants (https://admission.asu.edu/apply/international/graduate)
English proficiency (https://admission.asu.edu/apply/international/graduate/english-proficiency)

Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants must have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:
• graduate admission application and application fee
• official transcripts
• statement of purpose
• portfolio
• three letters of recommendation
• proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current

residency. Because this program requires a high degree of proficiency in English, an applicant whose native language is not English is expected to have a TOEFL iBT® score of at least 5 on the new scale, or a score of 100 on the TOEFL iBT® taken in a testing center before January 21, 2026.

All applicants must submit a written letter of application that includes a detailed statement of purpose and a portfolio of at least three documents that demonstrate the applicant's ability to write in a variety of genres. Portfolio documents can include both academic and professional writing for a variety of audiences and purposes and do not have to be in the area of technical communication. The portfolio should be 15 to 30 pages. The writing samples in the portfolio are evaluated using a rubric that considers several criteria, including a demonstration of the ability to focus on a specific purpose, to meet audience needs, and to show organization, clarity, mechanical soundness and overall effectiveness.

All applicants must submit three letters of reference, either academic or professional, that speak to the background and capabilities of the applicant.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about ASU tuition and financial aid (https://admission.asu.edu/cost-aid) options to find out which will work best for them.

Attend online

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program's learning outcomes include the following:

Communicate complex information clearly, ethically, and persuasively to diverse audiences.
Employ research methods to improve potential impact of technical content.
Create visual communication products for diverse audiences and purposes.

Career opportunities

Professionals with expertise in technical communication are in high demand across sectors and industries, including technology, business, entertainment, education and community organizations. Graduates are prepared for positions in the private, public and nonprofit sectors, with plenty of professional opportunities for career advancement.

Professionals who have the skills to analyze users and data, write and create visuals, and manage online content are highly valuable to businesses and institutions. Maintaining rhetorical awareness and understanding of complex information is critical to impactful management and presentation of specialized content to broad audiences. Graduates of this program are accomplished writers, editors, designers, project managers and researchers who can respond effectively to a variety of audiences, issues and communication situations.

Career examples include:

instructional designer
interface designer
IT project manager
public relations manager
social media manager
technical writer
user experience specialist
web administrator
