INTRODUCTION

The Arizona Department of Corrections (Department) publishes the Operating Per Capita Cost Report annually to analyze expenditures for the incarceration of inmates sentenced to the Department including felons who have been released and are monitored under community supervision.

Operating Per Capita Cost Report History

The Department has provided average daily costs annually for state prisons since FY 1983 and included Private Prisons beginning in FY 1995. The report has been prepared annually by Department staff with the exception of FY 2005 through FY 2007 when it was prepared by a contracted vendor. Section V of the report contains historical information including average daily population (ADP), state, contracted and other per diem rates.

Cost Comparisons

The state and private per diem costs included in the report should not be used for state and private cost comparisons. Laws 2012, 2nd Regular Session, Chapter 302 (S.B. 1531) repealed A.R.S. 41-1609.01 (L) which required the Department to conduct a cost comparison. The cost comparison has been omitted due to this legislative change and because of the complexity in determining an objective report methodology. Section IV describes in more detail the limitations of the report and the complicating factors of making accurate cost comparisons between state and private prisons. For example, the Operating Per Capita Report continues to exclude capital construction costs for state constructed and operated buildings whereas capital construction and financing costs are included for private facilities except for ASP-Marana and ASP-Kingman.

In an effort to provide up-to-date annual expenditure and per diem costs the Department continues to publish the Operating Per Capita Cost Report. A.R.S. 41-1609.01 (G) requires that a proposal for new private beds shall not be accepted unless the proposal offers cost savings to this state. This particular statute is relevant in the evaluation of new private beds. When required by statute, the Operating Per Capita Cost Report provides a starting point for comparisons. However, other factors, such as construction and financing costs, must be analyzed and adjustments will be required to determine whether cost savings exist.

METHODOLOGY

Daily Per Capita Cost:

The "Operating Per Capita Cost Report" provides the total annual cost and average daily cost incurred by the Department to incarcerate inmates within state operated prisons, private prison beds, and to monitor parolees on community supervision. The report includes all Department costs, not just housing related costs.

The report includes information on the ADP of all inmates housed within the Department's state operated prisons, contracted prison beds and offenders in community supervision. The ADP does not include inmates sentenced to the Department that are pending transport to Department intake facilities, or other prison beds located in Arizona that house federal or other state(s) sentenced inmates. The ADP is developed using the grand total of inmates, which includes both inside and outside inmate counts obtained from the Department's daily "Institutional Capacity & Committed Population" reports. The ADP for FY 2017 began on July 1, 2016 and ended on June 30, 2017.

Financial information contained in this report was obtained from Department's expenditure data for appropriated funds as reported in Arizona Financial Information System (AFIS - the state's accounting system) for FY 2017 and includes administrative adjustments through October 31, 2017. Expenditures from non-appropriated funds are not included in the report. The costs used in the analysis include all elements of salary and employee related expenditures (including employee and employer pension costs and health insurance costs), all other operating expenses (including travel, utilities, inmate food, per diem payments for inmate health care and private prison operators, etc.), and equipment (capital and non-capital).

The process of allocating expenses is based on a combination of direct expenditures and a defined methodology of indirect expenditures (see chart in Section I). Actual direct expenses are identified for all state prison units, private prison units and community supervision. Expenditures that are not assigned directly to a prison unit through AFIS, such as divisional support functions, are analyzed and allocated as either direct or indirect expenditures. These allocations are calculated using the following criteria: ADP, FTE and vehicle fleet assignments.

Expenses for highly specialized units/functions, Certificate of Participation payments for State Prisons and ASP-Kingman, State building renewal costs, and those costs relating to inmates pending transport to ADC from county jails are excluded from the calculation of per diem costs and identified separately.

EXPENDITURE SUMMARY

Footnotes for Expenditure Summary

- ¹ The State prisons include all custody levels of inmates while contract prison beds include only minimum and/or medium custody levels. State prison costs also include expenses not incurred by contract prisons.
- ² Specialized units including Inmate Reception and Classification, Testing and High Level Mental Health Treatment.
- ³ A significant portion of the MRC was funded from non-appropriated funds which are not reflected in the report. Non-appropriated expenditures include \$137,844.09 from the Community Corrections Enhancement Fund (2395) and \$448,799.66 from the DOC Revolving Fund (2515). If non-appropriated expenditures were included the total cost would be \$2,317,832 and the per diem cost would be \$152.65. This cost is anticipated to be reduced in future years as the FY 2017 expenditures include one-time start-up costs and the ADP is anticipated to increase.
- ⁴ The Operating Per Capita Report excludes capital construction costs for state constructed and operated buildings and ASP-Kingman. The increase in FY 2017 is due to the addition of certificate of participation costs for ASP-Kingman in the amount of \$9,429,200. This amount is anticipated to increase to \$17,463,300 in FY 2018.

Section IV Operational Differences Between State & Private Prison Operations 27

Identifies and compares inmate management functions that may be provided by state and/or contract bed providers, as well as medical, mental health and dental contract exclusions and restrictions. The section also identifies other inmate placement limitations for contract prison bed providers. The information is provided to clarify the differences in inmate placement for contract beds, as opposed to state prisons, which cannot exclude inmates sentenced to the Department regardless of custody level, sentenced offense or health status.

INMATE MANAGEMENT FUNCTIONS

The following page contains a partial list of functions required to run a prison system. Each listed function has a "yes" or "no" to indicate whether it is provided by the state and/or contract bed providers. The functions that indicate "no" are typically due to statutory or contractual restrictions or limitations that are identified in this section.

¹ Per Arizona statutes, certain functions cannot be delegated. Other functions may be performed by Contractors, but only with ADC approval. (A.R.S. 41-1604, 41-1609.01, 41-1750, 36-3701 and 36-3702).

² In-state private contractors may release inmates eligible for discharge with final approval by ADC; however, discharge payments are made by ADC and are not included in contractors per diem rates.

³ All ADC's private contractors have contractual restrictions for M and MH services based either on an inmates M/MH score, or a medical cost cap, which result in lower costs for the contractors. ADC must provide services to all inmates regardless of their condition(s).

⁴ Contractors manage work programs as approved by ADC, however WIPP payments are paid by ADC and are not included in contractors per diem rates.

CRITERIA USED BY IN-STATE AND OUT-OF-STATE PRISON CONTRACTORS IN PROVIDING
MEDICAL, MENTAL HEALTH AND DENTAL TREATMENT SERVICES
MEDICAL AND MENTAL HEALTH SCORES DEFINITIONS

Exclusion criteria for medical, mental health and dental services are identified for each contract vendor on the following page. Medical and mental health scores are defined as:

Medical (M)

- M-5 Severely limited physical capacity and stamina; requires assistance with Activities of Daily Living; requires housing in inpatient or assisted living area.
- M-4 Limited physical capacity and stamina; severe physical illness or chronic condition.
- M-3 Restricted physical capacity; requires special housing or reasonable accommodations.
- M-2 Sustained physical capacity consistent with age; stable physical illness or chronic condition; no special requirements.
- M-1 Maximum sustained physical capacity consistent with age; no special requirements.

Mental Health (MH)

- MH-5 Inmates with mental health needs who are admitted to an inpatient psychiatric treatment program (Baker Ward and Flamenco Mental Health Unit).
- MH-4 Inmates who are admitted to a specialized mental health program outside of inpatient treatment areas.
- MH-3 Inmates with Mental Health needs, who require current outpatient treatment. Inmates meeting this criterion will be divided into five (5) categories:
 - Category A:** Inmates in acute distress who may require substantial intervention in order to remain stable. All inmates classified with Serious Mental Illness (SMI) in ADC and/or the community will remain a Category A.
 - Category B:** Inmates who may need regular intervention but are generally stable and participate with psychiatric and psychological interventions.
 - Category C:** Inmates who need infrequent intervention and have adequate coping skills to manage their mental illness effectively and independently.
 - Category D:** Inmates who have been recently taken off of psychotropic medications and require follow up to ensure stability over time. If the inmate demonstrates sufficient stability, the MH score may be changed to an MH-2.
 - Category E:** Inmates who are admitted through a reception center or as a parole violator when several conditions are met.
- MH-2 Inmates who do not currently have mental health needs and are not currently in treatment but have had treatment in the past.
- MH-1 Inmates who have no history of mental health issue or treatment.

COMPLEXITY OF OBJECTIVE COST EVALUATIONS

The state and private per diem costs included in the report should not be used for state and private cost comparisons. Due to the repeal of the legislative requirement to perform a cost comparison once every five years and the complexity in determining an objective report methodology the cost comparison section of the report has been omitted. Cost evaluations are inherently complex due to differences in inmate custody level and population requirements; capital construction & financing cost; overcrowding; service operation model; inmate management functions and programming; inmate health, medical, mental health, and dental care limitations and/or contract exclusions; and differences in the physical plants.

To further illustrate the impact of these factors in the overall per capita cost of a particular unit, consider the following:

- Capital Construction & Financing Cost

The differing treatment of the capital construction cost by private and state facilities complicates cost comparisons. Per A.R.S. 41-1609.01(I)(J), private bed contracts are for ten (10) years with two five (5) year renewal options after which the state owns the facility. Use of these contractual arrangements allows the state to fund the capital construction cost of new facilities over time and avoids the burden of direct financing or up-front construction costs. As a result, per diem rates for private prisons (except for ASP-Kingman and ASP-Marana) include the cost of the physical plant and financing while state constructed and operated buildings do not.

- Overcrowding

The relative level of overcrowding within a particular unit is one factor that can significantly impact an individual unit's per diem cost or a prison unit comparison. Temporary beds are beds added to augment permanent beds such as Quonset huts, tents, or double bunking. Temporary beds are not part of the physical design of a unit and result in overcrowding; impact staff and inmate safety; and create a strain on the physical plant such as water, sewage, and electric capabilities. However, a prison unit with a higher level of overcrowding results in a lower per diem cost than a comparison unit as fixed costs are spread over a higher number of inmates.

- Complex Model

The statewide centralized service operation (Central Office) provides services to all ten (10) state prison complexes. In addition, each prison complex has a centralized complex service operation that provides services to all prison units within the complex such as inmate health services, inmate programming, business office, procurement, complex maintenance, etc. This structure eliminates duplication of effort, creates economies of scale, maximizes resources, utilizes best practices, and ensures standardization among all state-run prisons. Similar to the impact of overcrowding, complexes that accommodate a larger inmate population and utilize a complex model of operations are able to gain efficiencies by spreading fixed overhead costs over a larger inmate population.

COMPLEXITY OF OBJECTIVE COST EVALUATIONS (Continued)

- Inmate Management Functions and Programming

A.R.S. §41-1609.01(P) prohibits private prisons from carrying out certain essential functions that must remain with the Department, including calculating inmate release dates; calculating and awarding sentence credits; approving the type of work inmates may perform and the wages or sentence credits which may be given to inmates engaging in the work; granting, denying or revoking sentence credits; placing an inmate under less restrictive custody or more restrictive custody; and taking any disciplinary actions. Since these functions cannot be delegated to private prisons, the Department must provide these services. Private prisons also operate under the constraints of unique and individualized contracts that delineate the specific responsibilities and requirements for the private prison including size, bed capacity, custody level, inmate population type, inmate treatment and programming, and inmate health needs.

- Inmate Health Care Limitations and/or Contract Exclusions

Both state and private-run prison units have differences in the types of inmates that can be housed based on inmate medical, mental health and dental needs. State-run prisons house a higher percentage of inmates with higher medical and mental health needs than private prison units. To achieve cost containment, ADC places higher need inmates in "corridor" state facilities that have locally available off-site treatment and resources as opposed to facilities that do not have such services locally. All private-run prison units are considered "corridor" facilities although inmate placement is generally restricted to lower medical and mental health needs than state-run facilities. Two private contracts have a \$10,000 cap per inmate on health care services. When the health care cost of a single inmate exceeds this cap, the inmate is returned to a state-run prison unit and the state assumes all further medical treatment costs associated with the inmate. Both state and private "corridor" facilities are identified in this section as well as other detailed information in regard to inmate placement criteria.

- Physical Plant Differences

A more efficient facility design and newer infrastructure also directly impacts the required staffing, maintenance needs, utility cost, and other factors. Therefore, newer, more efficiently designed facilities typically result in lower operating costs.

These factors introduce complexity and, potentially, subjectivity into the methodology for completing cost comparisons. For this reason and due to the repeal of A.R.S. 41-1609.01 (L) and (M) the per diem calculations within the report should not be used to make cost comparisons between state and private prisons.

¹ The Operating Per Capita Report continues to exclude capital construction costs for state constructed and operated buildings.

² The increase in FY 2017 is due to the addition of certificate of participation costs for ASP-Kingman in the amount of \$9,429,200. This amount is anticipated to increase to \$17,463,300 in FY 2018.

³ One-Time costs were not appropriately identified prior to FY 2008.

⁴ The ADP for County Jails pending intake is not included in the total ADP for the Department, but is provided for informational purposes only. Prior to the FY 2010 Operating Per Capita Cost report the expenses for inmates pending intake to the ADC for reception and processing were allocated to the costs of housing all ADC state and contracted prison vendors based on ADP. Beginning with the FY 2010 Operating Per Capita Cost report these expenses have been excluded to improve the cost comparison analysis between state housed inmates and contracted prison bed providers.

¹ Does not include costs for units excluded for cost comparison purposes.

² For cost comparison purposes an Adjusted Per Capita Cost was provided and depreciation of state prison buildings was added as an expense to the daily prison bed costs for FY's 2008, 2009 and 2010. The Fiftieth Legislature, Second Regular Session repealed the cost comparison report. See Section One for further information.
The depreciation factor is not an actual expense incurred by ADC but was included for a more accurate comparison. The FY 2008 and FY 2009 Per Capita Cost reports have not been republished to adjust for this in the history section; however, they have been adjusted on this page.

Prior to the FY 2010 Operating Per Capita Cost report the expenses for inmates pending intake to the ADC for reception and processing were allocated to the costs of housing all ADC state and contracted prison vendors based on ADP. Beginning with the FY 2010 Operating Per Capita Cost report these expenses have been excluded to improve the cost comparison analysis between state housed inmates and contracted prison bed providers.
