JANET NAPOLITANO, GOVERNOR

DEPARTMENT OF ADMINISTRATION

WILLIAM BELL, DIRECTOR

INVENTORY OF STATE-OWNED BUILDINGS

2006-2007

COMPILED BY:

GENERAL SERVICES DIVISION

BUILDING & PLANNING SERVICES

Preface

The State of Arizona oversees three separate building systems that include physical assets, resources, and structures within the Arizona Department of Administration (ADOA), the Arizona Board of Regents, and the Arizona Department of Transportation. The Inventory of State-Owned Buildings addresses the buildings and structures in the ADOA building system.

ADOA General Services Division revises this report annually for use by the ADOA Risk Management Section, the State Fire Marshal's Office, and other interested agencies and organizations. The state planner also uses this report for computing building renewal needs. The report contains the following information for the buildings and structures in the ADOA building system for FY 2009 and FY 2010: building renewal costs, building construction class, year built, and fire sprinkler system, as well as allied data and information.

Arizona Revised Statute §41-793 requires each building system to designate, subject to approval by the Joint Committee on Capital Review, an agency that is responsible for: (a) computing building renewal needs for the two ensuing fiscal years pursuant to the formula approved by the committee and (b) allocating appropriated building renewal monies within the building system.

During the mid-1980s, the Joint Committee on Capital Review adopted the Sherman-Dergis Formula, which was developed in 1981 at the University of Michigan for computing building renewal needs. The FY 2009 cost is determined by the Sherman-Dergis Formula, and the FY 2010 cost is obtained by adjusting the FY 2009 cost by the inflation factor determined by the Marshall Valuation Service. The Sherman-Dergis Building Renewal Formula and definition of terms are below:

$$\text{Annual Building Renewal Amount} = \frac{2}{3} \text{ Building Value (BV)} \times \text{Building Age (BA)} / 1275$$

Building Value (BV) is established by updating the previous year's cost -- or the original construction cost of the building and structure -- using the Marshall Valuation Service cost index. Building Value is multiplied by two-thirds in the formula on the assumption that renewal costs should not exceed two-thirds of the construction cost.

Marshall Valuation Service cost index is a recognized national building cost index used to assist in determining building value.

International Building Code (IBC)/Fire Sprinkler Systems: The report includes classification of buildings by type of construction according to the International Building Code (IBC). The report also indicates if a Fire Sprinkler System is present in the building.

Building Age (BA) is adjusted downward when any major renovation is completed in the building.

1275 is the age-weighting constant based on a fifty-year life cycle.
