Synopsis of Federal Regulations Applicable to Migratory Bird Hunting

Federal regulations regarding bird hunting are described in the Code of Federal Regulations (CFR). These can be found at www.gpoaccess.gov/cfr/index.html. The regulations below can be found at 50 CFR 20.21 unless otherwise noted. An electronic version of these regulations can be found by downloading this booklet as a PDF at www.azgfd.gov/rules.

WEAPON – Migratory game birds may be taken only with a 10 gauge or smaller shotgun capable of holding not more than three shells unless it is plugged with a one-piece filler, incapable of removal without disassembling the gun, so the gun's total capacity does not exceed three shells. Birds may also be taken by falconry, bow and arrow, or crossbow.

MOTOR-VEHICLE RESTRICTIONS – No person may take migratory game birds from or by means, aid, or use of any motor vehicle, motor-driven land conveyance, or aircraft of any kind. Special regulations govern handicapped hunters.

WATERCRAFT RESTRICTIONS – Migratory game birds may not be taken from or by means of any watercraft or other craft having a motor attached, or any sailboat, unless the motor has been completely shut off and/or the sails furled, and its progress there from has ceased. A watercraft under power may be used to retrieve dead or crippled birds but no shooting is permitted while the watercraft is underway. No person shall take migratory game birds by means or aid of any motor driven land, water, or air conveyance, or any sailboat used for the purpose of or resulting in the concentrating, driving, rallying, or stirring up of any migratory bird.

DECOYS, CALLS AND BAITING – Migratory game birds may not be taken by the use or aid of live decoys, recorded or electronically amplified bird calls or recorded or electrically amplified imitations of bird calls or sounds. It is illegal to take birds by the aid of baiting, or on or over any baited area, where a person knows or reasonably should know that the area is or has been baited. An area is considered baited for 10 days after the complete removal of all bait. It is legal to take migratory game birds, except waterfowl, coots and cranes, on or over lands or areas that are not otherwise baited areas, and where grain or other feed has been distributed or scattered solely as the result of manipulation of an agricultural crop or other feed on the land where grown, or solely as the result of a normal agricultural operation.

RETRIEVAL AND TAGGING – No person shall kill or cripple any migratory game bird without making a reasonable effort

to retrieve the bird and retain it in his actual custody while in the field. Crippled birds must be killed immediately. Any birds given to or left with another person must be tagged by the hunter with a tag showing his signature, address, the number and species of birds, and the dates they were killed. Packages in which migratory game birds are shipped must show the names and addresses of the sender and receiver, and the number and species of birds contained in the parcel. (50 CFR 20.25, 20.36, 20.44)

BAG LIMIT – No person may, during any one day, take more than one daily bag limit or possess more than one daily bag limit in the field, or while returning to the car, hunting camp or home. (50 CFR 20.24, 20.35)

IMPORTATION – For information regarding the importation of migratory game birds killed in another country, hunters should consult federal regulations. One fully feathered wing must remain attached to all migratory game birds being transported between the port of entry and the hunter's home or to a migratory bird preservation facility. No person shall import any migratory game birds from any country except Canada unless such birds are dressed, drawn and the head and feet are removed. Special regulations govern consignment to an approved and licensed taxidermist. No person shall import migratory game birds belonging to another person. (50 CFR 20.61 through 20.66)

SEASON AND HOURS – No person may take migratory game birds during the closed season. Migratory game birds may be taken only during hours open to hunting. (50 CFR 20.22, 20.23)

ONE FEATHERED WING – Sportsmen should note that one feathered wing (or head for sandhill crane only) must be left attached to all migratory game birds until they reach their final destination.

NON-TOXIC SHOT – No person may take ducks, geese (including brant), or coots while possessing shot (either in shotshells or as loose shot for muzzleloading) other than approved non-toxic shot. For a list of approved non-toxic shot, see www.fws.gov/migratorybirds/currentbirdissues/nontoxic.htm.

Waterfowl Hunters – Arizona Bald Eagles Need Your Help

Annually on Dec. 1, land management agencies enact seasonal closures at sensitive bald eagle breeding areas along Arizona's rivers and lakes. These closures restrict human activity within the nest area so the resident bald eagles will have the opportunity to successfully breed. We are asking for your assistance to avoid bald eagle breeding areas while you are hunting waterfowl, as your presence and the noise from discharging your firearm may cause a disturbance to the breeding pair. The bald eagles are laying eggs during the later part of the waterfowl season and are very sensitive to human activity.

The bald eagle is protected by the Bald and Golden Eagle Protection Act, the Migratory Bird Treaty Act and various other state and federal laws.

You can find the full list of Bald Eagle Breeding Area Closures at www.swbmc.org/closures.html. Or contact the local U.S. Forest Service Ranger District office or Arizona Game and Fish Regional Office where you plan to hunt.

Funds from the stamp have been used towards the purchase of wetlands throughout the state resulting in amazing resting grounds for wintering sandhill cranes, geese and waterfowl. The Arizona Waterfowl Stamp is a great example of how hunters are leaders in wildlife conservation, benefiting all citizens who enjoy seeing waterfowl as well as other birds such as rails, shorebirds, herons, Ibis and many other spectacular wetland-associated birds.
