FOREWORD

The Arizona Department of Public Safety is pleased to participate in and serve as the coordinating agency for the Arizona Uniform Crime Reporting Program.

The purpose of the 2004 "Crime in Arizona" report is to provide data regarding the nature and extent of crime throughout the State. This report does not draw conclusions as to the causes of crime. The report does provide the vital information necessary to assist law enforcement agencies, government, and the public in their approach to crime in our state.

This report is the culmination of a joint effort by our state's law enforcement agencies to collect and organize crime data. The information contained in this report should provide a valuable overview of the crime problem.

As usual, data concerning the nature and extent of bias (hate) crimes has been included. Again, this information does not draw conclusions as to the causes of crime committed due to bias, but it is an additional resource that can be utilized by the citizens of Arizona.

Sincere appreciation is expressed to all Arizona law enforcement agencies without whose cooperation this publication would not be possible.

THE ARIZONA UNIFORM CRIME REPORTING SYSTEM

Historical Background

The Uniform Crime Reporting (UCR) program provides a nationwide view of crime based on the voluntary submission of statistics by city, county, and state law enforcement agencies. This program was initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). That same year, the Federal Bureau of Investigation (FBI) was authorized by the United States Congress to serve as the national clearinghouse for statistical information on crime. The IACP continues to serve the Uniform Crime Reporting program in an advisory capacity and was joined in this responsibility by the Committee on Crime Records of the National Sheriff's Association (NSA) in 1966.

A variety of statistics could have been used to portray the crime problem in the United States, including penal, prosecutive, arrest, offense, and conviction data. But to best depict crime and provide meaningful data to the police agencies, it was determined that data dealing with known offenses and persons arrested would be collected. Initially, because of their seriousness and frequency of occurrence, seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. These offenses include the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard to local statutes, were formulated.

Arizona Program

The Arizona Uniform Crime Reporting program first began receiving voluntary crime statistics from local law enforcement agencies in January 1975. Prior to this date, agencies submitted their crime data directly to the Federal Bureau of Investigation. The Arizona Department of Public Safety is responsible for administering the UCR program for the state and providing necessary assistance and training to the contributing law enforcement agencies.

After the 1992 Arizona legislative session, participation in the UCR program became mandatory. Arizona Revised Statute 41-1750.A.2 directs that the Central State Repository of the Department of Public Safety shall:

"Collect information concerning the number and nature of offenses known to have been committed in this state and of the legal steps taken in connection with these offenses, such other information that is useful in the study of crime and in the administration of criminal justice and all other information deemed necessary to operate the statewide uniform crime reporting program and to cooperate with the federal government uniform crime reporting program."

Also, Arizona Revised Statute 41-1750.D directs that:

"The chief executive officers of law enforcement agencies of this state or its subdivisions shall provide to the central state repository such information as necessary to operate the statewide uniform crime reporting program and to cooperate with the federal government uniform crime reporting program."

Statistics are received from local police agencies, county sheriff's offices, college and university campus police, and state police agencies. Federal agencies and tribal police agencies do not report to the Arizona UCR program and are therefore not included in this publication.

The goal of this publication is to identify the nature and extent of criminal activity in this state. This information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

Crime Factors

Statistics are used to summarize information so that patterns or trends become clearer. Too often information of the type in this publication is used incorrectly to draw conclusions that the statistics simply do not support. Some of the factors which are known to affect the volume and type of crime occurring from place to place are:

- Population density and degree of urbanization.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway systems.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Citizens' attitudes toward crime.
- Crime reporting practices of the citizenry.

The Arizona Uniform Crime Reporting program gives a statewide view of crime based on statistics furnished by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data listed. The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment. (Crime in the United States, 1995, p. iv.)

Scoring of Offenses

Only the number of those offenses for Part I crimes and simple assault are scored (counted) under the Uniform Crime Reporting program. The method of scoring offenses varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, forcible rape, aggravated assault and simple assault, one offense is scored for each victim, regardless of the number of offenders involved. For example, two offenders could be involved in the murder of one victim and in this case only one murder would be scored.

For robbery and larceny-theft, one offense is scored for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if seven patrons in a bar are robbed, only one robbery would be counted. However, if the offender then leaves the bar and robs a passer-by, a second offense would be counted.

For burglary, one offense is scored for each structure which is illegally entered. For UCR purposes, a structure is generally defined as an enclosed, permanently occupied area. However, when the structure is an apartment complex, business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized. The illegal entry of those structures used for the housing of a transient population such as hotel rooms or boarding houses are scored as one burglary regardless of the number of rooms entered.

For motor vehicle theft, one offense is scored for each vehicle stolen. For UCR purposes, a motor vehicle is defined as a self-propelled vehicle that runs on land and not rails. For arson, one offense is scored for each occurrence even if a more serious offense occurred as the result of the arson. Additionally, any attempts to commit any of the above offenses are also counted under the appropriate offense category with the exception of attempted murder which is listed under aggravated assault.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. The exceptions are arson (which is always counted) and a combination of larceny-theft and motor vehicle theft (the motor vehicle theft will be counted). Part I offenses are ranked according to seriousness and appear in order from most serious to least serious under Offense Definitions. A Part II offense that occurs in conjunction with Part I offenses or by itself is not counted.

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender: Commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; when the victim refuses to prosecute; or another jurisdiction refuses to extradite the offender.

Clearances are counted as "adult" or "juvenile." A "juvenile" clearance is counted only when juveniles are exclusively involved in the commission and clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance only.

Property Stolen and Recovered

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore, recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods.

Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part I offenses and does not include such Part II offenses as fraud, forgery or embezzlement.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex, race, and ethnic origin of the offender. It is not possible, however, to correlate race or ethnic origin with the sex of the offender or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all the offenders who have been arrested even if several were involved in the commission of a single offense. Therefore, arrest and clearance totals will only be equal by coincidence.

It should be kept in mind that arrest totals do not indicate the number of different offenders involved in the commission of a crime. A total of four arrests may represent the arrest of four different offenders or the arrest of the same offender on four different occasions. Also, arrest totals do not indicate the number of charges placed against an offender at the time of the arrest.

Offense Definitions

Offenses in the Uniform Crime Reporting program are divided into two groupings, Part I and Part II. Information on the number of Part I offenses known to law enforcement, the number of clearances, and the number of persons arrested is reported each month. Only arrest data is reported for Part II offenses.

NATIONAL INCIDENT-BASED REPORTING SYSTEM

National Incident-Based Reporting System

In the 1920s, the Committee on Uniform Crime Records of the International Association of Chiefs of Police developed and initiated the voluntary crime data collection effort. During the more than 60 years since its inception, the UCR program has served as a means to measure crime in America. Expanding in scope, importance, and size over the years, the Program now encompasses over 16,000 federal, state and local law enforcement agencies nationwide which contribute crime statistics. In the 1980s, a study with the objective of revising UCR to meet law enforcement needs in the 21st century resulted in the creation of the National Incident-Based Reporting System (NIBRS).

Incident-Based Reporting, or IBR, views a crime and all its components as an “incident”. In order to obtain important data, facts recorded about the incident are organized into specific segments. The means used in recording these facts is a “data element”. Data elements, given proper data values, provide information about crime and its involvement with victims, offenders, property, arrestees, etc.

Implementation of NIBRS is occurring at a pace in relation to the resources, abilities, and limitations of the contributing law enforcement agencies. To date, the Federal Bureau of Investigation has certified more than 20 state-level programs for NIBRS participation.

In 2003, Arizona began moving from summary-based reporting to Incident-Based Reporting by obtaining a State-level NIBRS repository.

The State obtained full NIBRS certification with the Federal Bureau of Investigation in August 2004. Two local agencies were certified by the State in 2004 as meeting all requirements for NIBRS certification and are now submitting NIBRS data only. Additional agencies have begun testing.

NIBRS Benefits

An indispensable tool in the war against crime is the ability to identify with precision when and where crime takes place, what form it takes, and the characteristics of its victims and perpetrators. Armed with such information, law enforcement agencies can better acquire resources to fight crime and use them in the most efficient and effective manner. NIBRS provides such a tool because it is capable of producing more detailed, accurate, and meaningful data than produced by the summary UCR program.

NIBRS allows common denominator links among agencies which enables them to identify common issues so they can work together to develop possible solutions .

NIBRS has the capability of furnishing information on nearly every major criminal justice issue facing law enforcement today, including terrorism, white collar crime, weapons offenses, missing children where criminality is involved, drug/narcotics offenses, drug involvement in all offenses, hate crimes, spouse abuse, elderly abuse, child abuse, domestic violence, juvenile crime/gangs, parental kidnapping, organized crime, pornography, driving under the influence, and alcohol-related offenses.

NIBRS data can be further utilized to identify and focus on victim groups, detect and forecast crime trends, and identify weapons used in various crimes.

NIBRS improves crime classification processes and provides substantial investigative benefits, including better crime analysis and crime mapping.

Participation of local law enforcement agencies in NIBRS is important for producing a highly accurate representation of crime. Crime data accuracy and completeness provide important snapshots of crime at all levels of law enforcement: local, regional, county, state and national. The crucial starting point of this crime reporting process is at the local level.

NIBRS Offenses

NIBRS is an incident-based reporting system designed to collect data on each single crime occurrence and on each incident and arrest within the occurrence. The most significant difference between NIBRS and the traditional UCR system is the degree of detail in reporting. Unlike the current, or summary, UCR system that collects only eight Part I crimes, NIBRS collects 22 crime categories made up of 46 specific crimes called Group A offenses. In addition to the Group A offenses, there are 11 Group B categories for which only arrest data are reported.

BIAS CRIMES DATA

BIAS (HATE) CRIME DATA COLLECTION

BACKGROUND

The collection of bias (hate) crime statistics is the latest addition to the Uniform Crime Reporting program. It reflects a growing concern on both a federal and state level to the problem of crimes being committed due to bias or hate.

The collection of these statistics began with the passage of Public Law 101-275, known as the Hate Crime Statistics Act, in April 1990. The Act required the Attorney General to establish guidelines and collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, including where appropriate the crimes of murder, non-negligent manslaughter; forcible rape; aggravated assault, simple assault, intimidation; arson; and destruction, damage or vandalism of property."

In Arizona, legislation mandating the collection of bias (hate) crime statistics was passed in 1991. Arizona Revised Statutes 41-1750 was amended in part to read that the criminal identification section within the Department of Public Safety shall "Collect information concerning criminal offenses that manifest evidence of prejudice based on race, color, religion, national origin, sexual orientation, gender or disability."

Effective January 1, 1997, disability bias, either physical or mental, was added to the national Bias Crime Statistical Program. This addition was due to the Violent Crime Control and Law Enforcement Act.

Statewide collection began January 1992. Statistics received from Arizona law enforcement agencies for 2004 are listed on the following pages.
