Forward

The purpose of this publication is to expose the nature and extent of crime in Arizona and to guide the criminal justice system in its effort to combat crime. This report does not draw conclusions regarding the causes of crime. It does attempt to bring together information to assist public and private agencies in their approach to the crime problem.

The Arizona Uniform Crime Report 1985, is the result of a combined effort by our State's law enforcement agencies to collect and organize data covering crime in this state. The statistics presented in this report reveal the nature and extent of crime. By making use of all the statistics available, we believe this report can provide a valuable overview of the crime problem.

With gratitude to all who have contributed to its publication, I present Arizona Uniform Crime Report 1985, to the people of Arizona.

A handwritten signature in black ink, reading "Ralph T. Milstead". The signature is written in a cursive style with a large initial "R" and a long, sweeping underline.

Ralph T. Milstead
Director

**The Arizona Uniform
Crime Reporting System**

HISTORY OF UNIFORM CRIME REPORTING

The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1927 to initiate a national program for collecting crime information. This Committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a Congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity, and has been joined in this responsibility by the Committee on Crime Records of the National Sheriff's Association (NSA) in 1966.

The Arizona Uniform Crime Reporting (AUCR) Section first began receiving voluntary crime information from Arizona law enforcement agencies in January 1975. Prior to this date these agencies submitted their crime data directly to the FBI. At the close of calendar year 1985, all 90 eligible law enforcement agencies were contributing crime data to the AUCR unit.

OBJECTIVES OF ARIZONA UCR

Because increasing attention has been focused on the problem of crime in our communities in recent years, many segments of our population need more complete information for a variety of reasons.

Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The goal of the *Arizona Uniform Crime Report* is to identify the nature and extent of criminal activity in this state and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

The objectives of the *Arizona Uniform Crime Report* are: (1) To identify the nature and extent of crime in our state; (2) To provide the management information needed by the law enforcement community to augment their ability to attack the crime problem; (3) To provide our citizens with the most complete information available; (4) To provide legislators with the information necessary to formulate laws which address the crime problems, and (5) To provide sufficient detailed data for researchers and planners.

CONSIDERATIONS FOR INTERPRETATION

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often information of the type in this report is used incorrectly to draw conclusions that the statistics simply do not support. We ask that great care be taken in analysis and interpretation.

The following factors have a major influence on the statistics presented in this report:

1. Crime figures are police statistics as distinguished from the findings of a court, coroner, jury or decision of a prosecutor.
2. Density and size of community population.
3. Variations in composition of the population, particularly age structure.
4. Stability of population with respect to transient factors.
5. Economic conditions, including job availability.
6. Climate.
7. Effective strength of law enforcement agencies; some police jurisdictions overlap.
8. Attitudes of citizenry toward crime.
9. Crime reporting practices of citizenry.
10. Crime rates are based on census-fixed residential populations of police jurisdictions.
11. Crimes committed on Indian reservations are not counted in the AUCR program, although their population is included in the state's population figures.

Apart from the crimes on Indian reservations not being counted, there were four reporting agencies which were unable to provide complete data to the AUCR in 1985. Also, there were two new reporting agencies which began submitting reports in the latter half of the year. Of these six agencies, two are located in Greenlee County, two in Maricopa County, one in Mohave County, and one in Navajo County. The statistics from these six agencies are not included in this report.

To obtain accurate information from many different agencies, the national UCR program had to precisely define the methods for collecting such information as the number of offenses, arrests, clearances and value of stolen or recovered property.

Classification of Offenses

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each.

Part I offenses include:

Violent Crimes

1. Criminal Homicide
2. Forcible Rape
3. Robbery
4. Aggravated Assault

Property Crimes

5. Burglary
6. Larceny-Theft
7. Motor Vehicle Theft
8. Arson

Part II offenses include:

9. Other Assaults-simple
10. Forgery and Counterfeiting
11. Fraud
12. Embezzlement
13. Stolen Property: Buying, Receiving, Possessing, Etc.
14. Vandalism
15. Weapons: Carrying, Possessing, Etc.
16. Prostitution
17. Sex Offenses (Except forcible rape and prostitution)
18. Narcotic Drug Laws
19. Gambling
20. Offenses Against Family and Children
21. Driving Under the Influence
22. Liquor Laws
23. Drunkenness (not reported in Arizona)
24. Disorderly Conduct
25. Vagrancy
26. All Other Offenses (except traffic)
27. Suspicion (not reported in Arizona)
28. Curfew and Loitering Law Violations (Juveniles)
29. Runaways (Juveniles)

Note: Only arrests are counted for Part II offenses.

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily be identical to Criminal Code definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

Counting of Offenses

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and nonnegligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is counted for each victim, regardless of the number of offenders involved.

For robbery and larceny-theft, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses.

For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

Note: Attempts to commit any of the above are also counted as offenses, except that attempts to kill and assaults to kill are counted as aggravated assaults.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. In cases when an arson occurs in conjunction with other Part I crimes, both are reported. Part I offenses are ranked according to seriousness and appear in order from most serious to least serious under "Classification of Offenses."

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved.

Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender.

Clearances are counted as "adult" and "juvenile." A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

Property Stolen and Recovered

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore, recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or reco-

vered property is reported only for Part I offenses and does not include such Part II offenses as fraud, forgery or embezzlement.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all offenders arrested for each offense, and clearance totals count only the offenses for which an arrest (s) or exceptional clearances have occurred.

Reporting Variations and Procedures

Arizona now receives Uniform Crime Reports from all eligible 90 law enforcement agencies. One must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented in this report. Offense totals vary from the actual number of offenses that occur because UCR statistics are based on crimes that are reported to law enforcement agencies and many crimes are not reported.

Each contributing law enforcement agency is responsible for compiling its own monthly reports. An FBI UCR handbook is supplied to all contributors outlining reporting procedures in detail and is also complete with examples and illustrations. Each agency is supplied with twelve sets of monthly report forms which are used by the agencies to submit their reports.

POPULATION GROUPING

The crime statistics reported by an individual agency indicates what is happening in one particular area. AUCR groups jurisdictions on the basis of population size and reports crime rates among these groups. The cities, towns and counties within the state have been divided into seven groups according to population size. The seventh group (ungrouped) is provided for identification of volume and type of crime to account for total offenses. This population grouping factor has some influence on the volume and type of crime presented in this report. For use in interpreting this report, the UCR grouping is listed below:

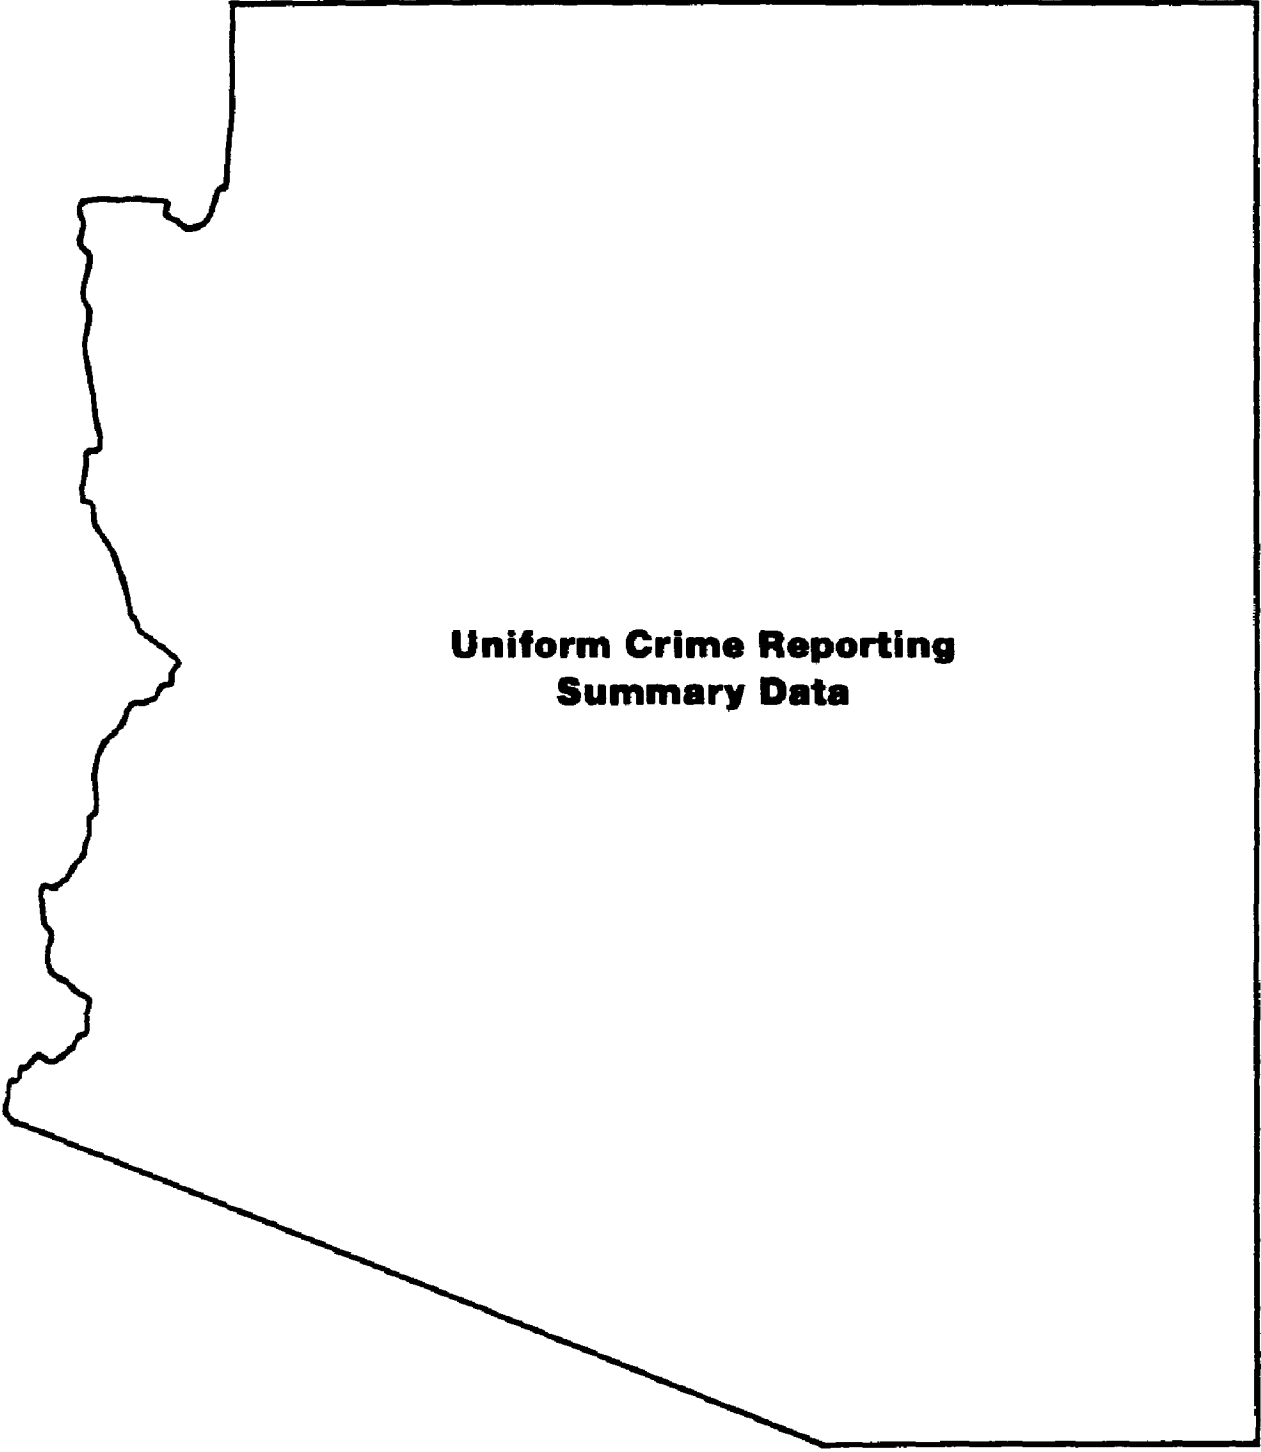

Group No.

1. Over 250,000 population. There are two (2) cities that fall within this group.
2. 100,001 to 250,000 population. There are five (5) cities and counties that fall within this group.
3. 50,001 to 100,000 population. There are two (2) cities that fall within this group.
4. 25,001 to 50,000 population. There are ten (10) cities and counties that fall within this group.
5. 10,001 to 25,000 population. There are twelve (12) cities, towns, or counties that fall within this group.
6. 10,000 or less population. There are fifty-one (51) cities, towns, or counties that fall within this group.
7. Ungrouped. There are eight (8) reporting agencies. These are Educational Institutions and the Department of Public Safety, that by definition do not have measurable population. For purposes of this report, they are combined for the crimes by population distribution.

The following is a listing by population group of law enforcement agencies submitting crime data to the Uniform Crime Reporting Section.

AGENCY	POPULATION GROUP NO.	AGENCY	POPULATION GROUP NO.

**Uniform Crime Reporting
Summary Data**

STATE CRIME SUMMARY

OFFENSES

- There were 216,488 Crime Index Offenses reported. Of these offenses, 22 percent were cleared.
- A total of 18,460 violent crimes were reported to law enforcement agencies.
- A total of 198,028 property crimes were reported statewide.
- The value of property stolen amounted to \$154,570,435. The value of property recovered was \$38,911,254 for a recovery rate of 25 percent.
- In 1985, law enforcement agencies reported 251 murders. Handguns were used in 45 percent of all murders.
- In 1985, 1,384 rapes were reported. Of these, 1,013 were forcible rapes and 371 were attempts to commit.
- Robberies accounted for 4,533 Crime Index Offenses. Bank robberies accounted for the largest dollar loss per robbery, \$3,845.
- Aggravated assaults accounted for 12,292 Crime Index Offenses. Of these, 28 percent were committed by the use of firearms.
- Burglary accounted for a substantial value of property loss amounting to \$59,390,842. Residential burglaries accounted for 70 percent of all burglaries reported. Of these, 39 percent were committed during the day.
- Larceny-Theft represented the largest number of the Crime Index Offenses. The 127,224 offenses accounted for 59 percent of the State Crime Index.
- In 1985, 11,637 motor vehicles were stolen with a property value of \$47,672,952. There were 8,723 vehicles recovered with a reported value of \$30,293,592.
- A total of 1,841 arsons were reported in 1985. The reported total value of property damaged due to arson was \$14,974,499.

ARRESTS

- During 1985, there were 172,164 persons arrested for all Criminal Acts. Of those arrested, 77 percent were adults and 23 percent were juveniles.
- There were 45,717 arrests for the Part I offenses. Larceny-Theft represented the largest number of arrests with 30,306.
- Part II offenses accounted for 126,447 arrests. The largest single category of arrests was for driving under the influence with a total of 25,924.

CLEARANCES

- A total of 47,691 clearances of Part I offenses were reported in 1985. Juveniles represented 26 percent of this total.

Part I Index Crimes

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION & SUMMARY

The willful nonnegligent killing of one person by another. Excludes attempts or assault to kill (classified as aggravated assault), suicide and accidental deaths.

Murder in Arizona increased by 8 percent over the number reported in 1984. A total of 251 individuals were murdered in 1985, which represents 1.4 percent of all reported violent crimes. The largest number of murders reported in one month was 27 in February.

Because murder is such a serious crime, detailed information is collected concerning victims, offenders, weapons used, and the circumstances in which the offense

took place. Handguns were used in the majority of killings, 45 percent of the time. The relationship between the victims and offenders was undeterminable in 85 murders or 34 percent. Acquaintance was the next most frequent relationship with 45 or 18 percent. Homicides occurred most frequently on both Saturday and Monday with 47 on each day or 19 percent. The most frequent time was between 6:01 p.m. and 2:00 a.m., with 109 or 43 percent.

MURDER BY TYPE OF WEAPON USED

RAPE

DEFINITION & SUMMARY

The carnal knowledge of a female through the use of force or threat of force. Assaults or attempts to commit forcible rape are also included; however, statutory rape (without force) and other sex offenses are not counted in this category.

Rapes reported in Arizona increased 11 percent over the number reported in 1984. A total of 1,384 rapes were reported, which represents 7.5 percent of all reported violent crimes.

Of the total rapes, forcible accounted for 73 percent or 1,013 and attempted 27 percent or 371. The largest number of forcible rapes, 169, was reported in August, followed by 138 in July.

RAPE BY MONTH

RAPE BY POPULATION GROUP

	1	2	3	4	5	6	7

ROBBERY

DEFINITION & SUMMARY

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/ or by putting the victim in fear.

A total of 4,533 robberies were reported in 1985, an increase of 16 percent over 1984. Robbery represents 24.5 percent of the reported violent crimes.

Robberies occurring on highways (streets, alleys and sidewalks) were the most frequent type of robbery reported, 2,277 or 50 percent of all robberies. This same category also had the highest total dollar loss, \$1,152,081.

Bank robberies had the lowest number of reported robberies, but the largest loss per robbery, \$3,845.

Firearm was the weapon used in 39 percent of the robberies and strong-arm (hands, fists, feet, etc.) was used 38 percent of the time.

AGGRAVATED ASSAULT

DEFINITION & SUMMARY

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm.

Law enforcement agencies reported a total of 34,006 assaults, 17.2 percent more than in 1984. Of these, 12,292 were aggravated and 21,714 were simple. Simple assault is primarily differentiated from aggravated assault by the seriousness of the injury and the weapon used. Simple assault is not a Crime Index offense but is reported here for the purpose of showing the total assault violence. Aggravated assault increased 25.8 percent from 1984 and simple assault increased 12.9 percent. Aggravated assault represents 66.6 percent of violent crimes.

The largest number of aggravated assaults for one month occurred during August, with the next highest month being June.

BURGLARY

DEFINITION & SUMMARY

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. A structure is considered to include the following, but not limited to: dwelling houses, apartments, public buildings, offices, barns, cabins, etc. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

During 1985, there were 57,326 burglaries reported in Arizona, an increase of 15.6 percent from 1984. Burglary represents 29 percent of the property crimes.

The largest number of burglaries occurred during August with 5,199 and the next highest month was December with 5,131. Forcible entry was used in 65 percent of the burglaries. Residential burglaries

accounted for 70 percent of the burglaries. Of those residential burglaries, 39 percent occurred during the day.

A reported value of \$59,390,842 was lost to all burglaries during 1985. The largest dollar loss occurred during residential burglaries, \$41,429,157.

LARCENY-THEFT

DEFINITION & SUMMARY

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This crime category does not include embezzlement, fraud, and worthless checks.

Arizona law enforcement agencies reported 127,224 larcenies in 1985, an increase of 14.2 percent over 1984. Larceny-theft accounted for 64 percent of the property crimes.

The greatest number of larcenies occurred during August with 11,362. The second highest month was December with 11,257.

The value range of dollar loss with the largest number of larcenies, was under \$50. The value range of \$200 and over had the largest reported dollar loss, \$41,174,993 which was 89 percent of all larceny loss.

In 1985, theft from motor vehicles and theft of motor vehicle parts and accessories accounted for 32 percent of all larcenies. Pocket-picking and purse snatching were the least reported type of larcenies.

MOTOR VEHICLE THEFT

DEFINITION & SUMMARY

The unlawful taking or stealing of a motor vehicle including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

Arizona law enforcement agencies reported 11,637 motor vehicle thefts, a 4.1 percent increase over 1984. Motor vehicle theft accounted for 6 percent of the property crime.

August had the largest total of reported vehicle thefts with 1,111 and January had the lowest with 862. Of the motor vehicles stolen, 8,723 were recovered or 75 percent.

Motor vehicle thefts accounted for a reported dollar loss of \$47,672,952. Of that amount, \$30,293,592 was recovered. The recovered amount reflects the value of the vehicle when recovered and may be lower than the value when stolen because of parts missing or damaged.

ARSON

DEFINITION & SUMMARY

Arson is defined by the national Uniform Crime Reporting Program to include any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

There were 1,841 arson offenses reported to law enforcement agencies in 1985, an increase of 26.2 percent over 1984. Structural arson accounted for 821 offenses or 45 percent of all reported arsons. Mobile units represented 576 offenses or 31 percent and all other had 444 offenses or 24 percent.

Motor vehicles was the largest category of reported arson with 518, while Industrial/ Manufacturing was the lowest with 6 offenses. Single residences had the largest reported dollar loss, \$3,858,033, 30 percent of all structural loss.

PART I CRIMES CLEARED

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several offenders may have been involved.

An offense can also be considered cleared "exceptionally" if all the questions below can be answered "yes."

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

A total of 47,691 offenses were cleared in 1985. The chart below indicates clearance rates of the Part I Index Crimes. Both adults and juveniles are included in these totals.

*Motor vehicles that were stolen in conjunction with a more "serious" index offense such as robbery or burglary are not included in this count. This count represents only those instances in which motor vehicle theft was the only or most "serious" offense committed. The total value shown here reflects the value of all property stolen during the commission of the offense (i.e., not just the value of each vehicle)

**Part I And Part II
Arrest Data**

PERSONS ARRESTED

The number of arrests are primarily a measure of law enforcement activity. The number of arrests also provides a useful indicator of criminal involvement of perpetrators by age, sex and race, particularly for those crimes which have a high solution rate. The reporting procedures used in the UCR program require that an arrest be counted on each separate occasion a person is taken into custody, summoned or cited, except for traffic violators other than DWI. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when law enforcement or other official action beyond a mere interview, warning or admonishment is taken.

Arizona law enforcement officers arrested a total of 172,164 persons in 1985. This is 15,325, or 10 percent more than in 1984. There were 45,717 persons arrested for Part I offenses. This is an increase of 14 percent over the 40,053 persons arrested in 1984.

Adults accounted for 77 percent of the total arrests and Juveniles 23 percent. Male arrests accounted for 139,622, or 81 percent and females 32,542, or 19 percent.

Of the 40,191 Juveniles arrested in 1985, 22,587, or 56 percent were 15 years or younger.
