

MUSIC CAMP . . . piano class prepares for the busy recital schedule planned for the campers. Tonight's recital will feature solo performances at 8 o'clock in the MU Ballroom. Sunday, the Girls' Vocal Ensemble and the Honors Band will present an evening concert in Encanto Park. Also next week, the annual talent show is set for Wednesday, 7:30 p.m., in the MU Ballroom; and two ensemble recitals will be held Wednesday and Friday evenings at 7:30, also in the Ballroom.

Tour To Taliesin Planned Thursday

A second tour of Taliesin West, the architectural school of the late Frank Lloyd Wright, is scheduled Thursday, at 4 p.m.

Tickets for the tour are 50c and are available at the MU Information Desk. Transporta-

Star Gazers View Skies Wednesday

"Star gazing" through a telescope will be the star attraction at the new Sun Devil Stadium, Wednesday at 9 p.m.

Dr. T. W. Munch, associate professor of Science Education, who will preside at the telescopic viewing, said that the time originally announced was changed to allow for improved visibility.

Two telescopes will be available to view the moon, Jupiter and its moons, and Saturn and its rings. The constellations and bright stars will be identified during the evening's gaze.

Dr. Munch suggested that binoculars would be helpful in some of the viewing. He also said that a star guide would be helpful and suggested "The Astrorama" which is available in the College Bookstore.

In the event of overcast skies, the "star gazing" will be postponed until July 5.

The viewing will be open to all ASU students, faculty, staff, and their families.

tion may also be secured there.

Although Mr. Wright designed several homes in the Phoenix area, this is the only building open to the public. Taliesin, which is northeast of Scottsdale, reflects his belief that a building should be a part of the land which surrounds it.

Taliesin West was the winter establishment for Mr. Wright and his proteges. The summer headquarters for the eminent architect was Taliesin East in his native Wisconsin.

A second building open for public view, which would be the first truly public building by Mr. Wright in the state, may be built on the ASU campus. Last month, the Board of Regents tentatively approved the plans for an auditorium which he had been working on at the time of his death.

Architects from the Wright Foundation will complete the plans for the structure which would be constructed near the curve of Mill Ave. and Apache Blvd., as a part of a Fine Arts Center.

Dancers 'Square Off' Thursday For Square Dance Family Night

Squares will circle the MU Ballroom Thursday night at 7:30 during "Square Dance Family Night" sponsored by the MU summer program.

It is an evening planned for all ages, according to Mrs. Richard Bell, assistant director of the Memorial Union. Families

National Science Foundation

Sponsors Institutes

Ninety-eight college and high school teachers, and their families, will arrive Sunday to participate in two institutes sponsored by the National Science Foundation.

Thirty-eight college biology teachers from 23 states and the District of Columbia will attend an institute on desert biology starting Monday until August 6. All have had at least three years experience teaching in junior colleges, colleges or universities.

They will study the factors affecting plant and animal life in the desert regions and the adaptations of the organisms to these factors. The institute will include lectures, laboratories, group discussions and personal conferences. Two or three short field trips will be taken each week, and two or more trips of several days' duration are part of the schedule.

Participants will come from Arizona, Utah, North Carolina, Nevada, Pennsylvania, Illinois, Maryland, California, Ohio,

Georgia, Iowa, Texas, New York, Arkansas, West Virginia, Vermont, Colorado, Kentucky, South Carolina, New Hampshire, Florida, Minnesota, Oregon and Washington, D.C.

Dr. Gordon L. Bender, Professor of Zoology, is director of the institute.

A summer institute for senior and junior high school teachers of chemistry and physics begins Monday also and will continue until August 20.

The institute's objectives are to refresh, review and bring up-to-date the training of the sixty participants in the fields of Chemistry and Physics, and to give them sufficient background and knowledge that they can integrate the two fields in their teaching and also correlate the recent advances in Chemistry and Physics with the changes currently taking place in the world today.

The core course of the program will be History of the Physical Sciences. In addition thirty of the participants will

attend a Chemistry seminar which will include atomic theory, laws of chemistry, gases, solids, liquids, electrochemistry and related topics. The other group of thirty will attend a physics seminar which will cover fundamental particles of nature, the language of physics, portions of classical and modern physics.

There will also be lectures by experts in their fields on methods of problem solving, inorganic chemistry, electronics, solid state phenomena, nuclear physics and chemistry, and selected topics of current interest.

Dr. Alan T. Wager, chairman of the Department of Physics, will direct the institute.

Participants in both institutes and their families will occupy Palo Verde hall. Two wings and the cafeteria will be open for their use. Mrs. Alice Martiny will be recreation director and will coordinate recreation for the families staying in the hall.

SUMMER SESSION

June 24, 1960

No. 2

Dramatic Presentation Given Tuesday By Miss Roadman

Betty Roadman, actress, lecturer and impersonator, will present "Democracy in Action," a dramatic presentation, Tuesday night at 8 p.m. in the

Memorial Union Ballroom. The program, second in the summer Concert and Lecture series, will feature monologues, one-act plays, character sket-

ches, poems and human interest stories performed by Miss Roadman.

During more than thirty years in Hollywood, Miss Roadman has played many character roles in motion pictures and on the legitimate stage. She toured America recently with Charlotte Greenwood, playing one of the Norwegian-American sisters in "I Remember Mama."

Her lecture on democracy is based largely on her personal experiences in many parts of the world.

According to Anna L. Keaton, dean of women at Illinois State Normal University, "Miss Roadman has that rare gift of combining interesting human observations of her experiences with an interpretation of those experiences which gives meaning to them. She brings a philosophy of life and a positive and wholesome appreciation of the country in which we live."

Additional Student Parking Area Announced By Campus Security

The south half of the Staff lot "H" will be open for student parking only, from 6:30 a.m. to 12:30 p.m., Monday through Friday, according to Gayle Shuman, director of Campus Security.

This is the portion of the lot which is bordered on the north by 9th St. and on the south by the Engineering Center.

In discussing other student parking areas, Mr. Shuman not-

ed, "Most students will find that they will save considerable time if they will park in the Palo Verde parking area and walk to their classes, rather than trying to find a vacant space in the smaller lots on campus.

He also commented on the limited parking area in the vicinity of Victory Village, MO Best, and Hayden halls. He suggested that students having classes in that part of campus, park their cars in the lot at Orange and Van Ness or the lots south and east of Palo Verde.

The theatre party, scheduled tonight, has been cancelled since the Ella Fitzgerald concert was called off. Miss Fitzgerald, just returned from a foreign tour, did not feel able to attempt another series of concerts immediately.

'On Stage-1960' Is Talk Subject

"On Stage — 1960" is the title of the second Views and Previews talk, Monday at 8 p.m. in the MU upper lounge.

Dr. James Yeater, instructor in Speech and Drama will discuss actors and modern methods of acting.

"Death of a Salesman" will be shown free tonight at 7:30 in Cosner Auditorium. The play was written by Arthur Miller and the movie stars Frederic March.

Broadcast Has Summer Rerun

A summertime schedule of The Best of Western Business Roundup programs will be run from June 14 through Sept. 20, over Radio Station KOY, Phoenix, and the stations of the Arizona Network.

The broadcasts are set for each Tuesday evening at 9.35.

Dr. Ralph Hook, director of ASU's bureau of business services, is moderator for the panel programs.

A tradition of growth — A commitment to quality.

EDITOR-IN-CHIEF ANNE LAROCCA Official campus newspaper of Arizona State University. Published each Wednesday and Friday throughout the school year, excepting holidays, and entered as second-class matter in the Post Office at Tempe, Arizona, under the Acts of March 3, 1879, and August 24, 1912. Subscription price, \$3.00 per sch. ol. year. Member: Arizona Newspapers Association, Associated Collegiate Press, and Rocky Mountain Intercollegiate Press Association.

Guest Editorial

Tool or Tyrant?

The thought of thirty million healthy red-blooded Americans simultaneously sitting motionless, staring at pictures that flit across the face of an electronic piece of furniture is an awesome vision to contemplate.

Yet this occurs quite regularly today as television has become a firmly established part of life in these United States. Ranking third only to working and sleeping as the activity to which the average American devotes his time, television has been condemned as a time-waster, and hailed as the salvation of the American home.

It could be said of television, as Stephen Vincent Benet of the industrial revolution.

"And while the prophets shudder or adore Before the flame, hoping it will give ear, If you at last must have a word to say, Say neither, in their way, 'It is a deadly magic and accursed,' Nor 'It is blest,' but only 'It is here.' "

Television is here. But it is neither good nor bad. Television itself is neutral. It is a device, a medium which can tyrannize us with a deluge of mediocrity, manipulation, and mass "sitzitus," or which can be used as a tool in meeting the problem of our complex world.

In an age dominated by television and other mass media, the need for individual thinking and discrimination is greater than ever before. Each person — child or adult — must learn to accept the flood of communication which he receives daily, attempt to sift this conflicting information and arrive at his own conclusions.

This poses a challenge to the educator, the parent, and the broadcaster. If television is to be a tool, it must be used creatively and intelligently, both by the producer and the consumer of the programs that enter our homes.

Especially concerned is the educational broadcaster. The personnel of the 45 educational television stations now on the air, and the educators doing programs over commercial stations, gradually are providing a fourth network — an alternative system of broadcasting, based on educational need rather than economic criteria of advertising and sales.

Arizona State University will join this growing group of non-commercial stations in September, when Channel 8 goes on the air. Licensed to the Board of Regents, operated by the Radio-TV Bureau, KAET will provide educational programming for all age levels throughout Central Arizona.

With intelligent viewing, vocal public opinion, conscientious commercial broadcasters, and the new ETV stations, television can become one of the most powerful devices for public enlightenment and education. It can strengthen, rather than weaken, individual initiative and originality.

Television has the potential to be a tool or a tyrant. One thing is certain — it will be what we make it.

—RICHARD H. BELL, Director, Radio-TV Bureau

New Athletic Conference Would Be Formed Slowly

A new sports conference couldn't become a complete reality for three to five years, Richard Stitt, director of Sports Publicity, predicts.

Athletic directors and faculty representatives however, have returned to their eight western campuses this week from a meeting in San Francisco with a recommendation for their Board of Regents and presidents, that such a conference be started.

The schools which would participate in the program, if approved, are ASU, UofA, Brigham Young University,

University of New Mexico, University of Oregon, Oregon State University, Washington State University, and University of Utah.

Three of these schools are on ASU's 1960 football schedule; UofA, Washington State and BYU.

All but one of the schools, Mr. Stitt said, are state supported schools and have approximately the same enrollment with comparable athletic programs. They all have about the same financial future.

If the conference is approved by the schools this summer, it "could conceivably begin during '61-'62 in all other sports but football," Mr. Stitt commented.

It would be a much better rounded conference than the Border Conference is now, he said, since the schools involved support teams in most of the sports. In the Border Conference, at present, while all have football and basketball teams, only two participate in track, three in baseball, and one in tennis.

The still unnamed, proposed conference would be a tremendous basketball conference,

The State Press extension for summer session is 203. News items may be left under the door of the State Press office in the MU basement or at the MU Information Desk.

Second Session Activities Now Being Planned

Final planning for the MU activity program during second summer session is now in progress.

"The staff would welcome any suggestions from the people participating in the summer sessions," Mrs. David Scoular, director of the Memorial Union, said.

"Students who have ideas which would augment the program being planned may bring them to the Information Desk," she continued.

Next Wednesday is the deadline for the receipt of new ideas in order for them to be included, according to Mrs. Scoular.

News Of World Given In Brief In MU Lobby

Summer session students will be able to glance at the news on their way through the Memorial Union lobby.

The "World and Campus Today", a new feature of the Union, boasts the day's top news stories (international, national and local), the weather, baseball standings, perhaps a well written editorial or an interesting feature, and Peanuts.

Mrs. Phillip Nelson, assistant director of the MU, said that in preparing this news capsule, they are trying to "take the cream out of the paper."

A student employee at the Information Desk goes through the morning newspaper, selects the stories and places them on the bulletin board near the main entrance by 8 a.m.

ASASU Publicity Service is open for the summer. Orders for posters may be left at the MU Information Desk. Phone calls may be made to either Ext. 203 or 253.

FOR RENT Attractively furnished apartments. Scottsdale location. Refrigeration, pool, summer rates. WH 6-5819

Mr. Stitt predicted. The interested schools all have good teams which often achieve national ranking.

The three northwest schools are cast-offs from the now disbanded Coast League. BYU, New Mexico, and Utah would come to it from the Skyline Conference. The two Arizona schools would be leaving the Border Conference; they have outgrown it, Mr. Stitt said.

Bowling Lanes' Leagues Active

Three full leagues, with a fourth soon to be formed, keep the MU Bowling Lanes busy thoroughfares Mondays, Tuesdays and Wednesdays at 7 p.m.

Both the Tuesday and Wednesday leagues are foursomes. Student, faculty and staff couples make up the six teams in each league.

The Monday night league is all male.

An additional league may begin play next Friday according to Mr. Jim Way, director of the Games Room and Bowling Lanes.

A children's league may be added to those listed above. Composed of children from 8 to 12, it would bowl on Tuesdays and Thursdays from 1-4 p.m.
