

Gammage Lecture To Feature Author

Dr. Paul A. Schilpp, internationally known philosopher and lecturer, will be the featured speaker at the second annual Grady Gammage Memorial Lecture, Feb. 7 at 8 p.m. in the MU ballroom.

Former president of the American Philosophical Association and author of many books, Dr. Schilpp is professor of philosophy at Northwestern University. He will speak on "The Crisis in Science and Education."

The program will include a prelude by the ASU Symphonic Wind Ensemble; the invocation presented by the Rev. Victor G. Bucher, pastor of St. Mary's Church, Phoenix; greetings by Dr. G. Homer Durham, ASU president, followed by introduction of the speaker by Dr. James J. Jelinek, assistant dean of the College of Education.

Following Dr. Schilpp's address, the Symphonic Wind Ensemble will present the postlude.

The benediction by Rabbi Albert Plotkin of Temple Bethel Israel, Phoenix, will conclude the program.

The program is open to the public.

The Grady Gammage Memorial Lecture program is arranged annually by the faculty of the College of Education as a tribute to the late Dr. Grady Gammage, ASU president from 1933 to 1959.

Dr. Gammage, one of the nation's foremost educators, began his presidential career at Arizona State College in Flagstaff, where he served seven years.

In 1933, Gammage came to Arizona State Teachers College, now ASU, and began his 26-year term as president.

Under his leadership, the school grew in enrollment and academic programs. In 1958,

Arizona State Teachers College was renamed ASU.

Dr. Gammage is also remembered for his interest and active participation in community, civic and cultural affairs, in addition to his educational activities.

SCHILPP

Senate Studies Security

The Student Government Operations Committee will hold a public hearing at 3 p.m. tomorrow in the Senate chamber, MU 227, as its initial step in investigating the Department of Security.

The Student Senate voted Jan. 9 to conduct a thorough study of the activities and operations of the department after considering student grievances concerning alleged entry of student automobiles and "ticket fixing."

No. 33

Three Colleges Add Honors Program

The highly successful Honors Program of the College of Liberal Arts has been adopted by ASU's other three undergraduate colleges, effective next fall, it has been announced.

Expansion of the program has been approved by the Board of Regents, according to President G. Homer Durham.

The program, established in 1959, has grown from three initial students to 103 this fall.

CANDIDATES must pass batteries of tests and produce evidence of previous high academic achievement in order to qualify for the program, which is designed to give emphasis and special attention to superior students.

Chief architect of the program, which will be extended next fall to the Colleges of Engineering Sciences, Business Administration and Education, is Dr. Arnold Tilden, dean of the College of Liberal Arts.

AN HONORS Council in each college, such as the one in the Liberal Arts college, will administer the new program.

Honors programs give students the opportunity to work at their own speed in order to "close the gap between potential and performance," according to Dr. Ernest I. Stewart, assistant dean of Liberal Arts.

THE HONOR student has available direct and personal instruction, allowing him to bypass many beginning courses. He is confined to neither the usual curriculum nor to the campus; he may conduct approved independent study.

He can attend any course

taught by the college, without credit or additional cost. His course is virtually tailored to his abilities and needs.

The student must pass a comprehensive examination in his major area to graduate with honors. He must present to the Honors Council an acceptable thesis or a comparable creative project and, at the discretion of his department, he may be asked to defend it in an oral examination before a committee of the council.

THE HONORS Program is not a speed-up process, emphasizes Dean Tilden. It still takes a student four years to complete his degree requirements.

For students completing the Honors Program, the baccalaureate degree is conferred "summa cum laude" to those who maintain an academic average over 3.5, and "magna cum laude" to those whose grade index is between 3.2 (the minimum for continued participation in the program) and 3.49.

Stock Exchange Head To Speak

"Campus to Career" is the theme for the annual ASU Business Day today, featuring G. Keith Funston as keynote speaker.

TOPICS for the seminars are accounting, advertising, business education, economics, finance, government, law, management marketing, mechanized data processing, real estate,

secretarial and transportation.

There will be a luncheon meeting at 12:40 p.m. in the MU. Speaker will be Edward M. Carson, vice president and manager of the First National Bank of Arizona.

He will be introduced by Terrell Thomas, vice president of the Business Administration Student Council.

Sponsoring the Business Day is the BA Student Council and Delta Sigma Pi, international professional business fraternity.

FUNSTON earned a Master's degree at Harvard Graduate School, and was president of Trinity College from 1944-51. He currently is a trustee of that institution.

Vice president of the New York Chamber of Commerce, he also serves as director of the Council for Financial Aid to Education of Metropolitan Life Insurance Co.

He is also a trustee of Westover School, Greenwich County Day School and Beekman Downtown Hospital.

Newsman To Speak

Charles Stabler, managing editor of the West Coast edition of the Wall Street Journal, will address ASU Journalism students in AG 150 at 10:40 a.m. tomorrow, it was announced today.

Stabler's address is open to all interested ASU students and faculty members.

Giant Steps Of Science Mark Age Of Change, Speaker Says

"We are rapidly approaching the point where either nuclear power could, if she wants, annihilate the other."

Dr. Harrison Brown made this statement yesterday afternoon in his speech "Science and Foreign Policy" given in the MU ballroom.

Dr. Brown, professor of geochemistry at California Institute of Technology, is foreign secretary of the National Academy of Science and advisor to President Kennedy on such aspects of foreign policy as nuclear disarmament.

Dr. Brown emphasized the growing influence of science on foreign and military policies.

"The acceleration of tempo is one of the main differences between us today and our ancestors.

"**THE LEADERS** of ancient times had only to examine technology as status quo which would remain the same for their grandchildren. The pace of development was slow," he said.

"Today the rate of change is so remarkably fast that situa-

tions during government negotiations may change to the degree that the final agreement may be undesirable to the signing countries.

"Today the future will be determined by scientific and technological developments and decisions. Lawyers, diplomats and generals are no longer able to run the state by themselves.

"The importance of technology can be answered in the questions—what would the world be like today if we had known in 1946 that Russia would explode her first bomb in two or three years?"

"**WE LIVE** under what is called the stable-deterrent. We build shelters for today's bombs then someone builds a bomb to combat the shelter."

Dr. Brown said that scientists and technicians have placed in the hands of rulers weapons of mass destruction. "Hitler knew how to use these tools.

"Castro, I believe, knows how to use the weapons. The road to totalitarianism is a one way street. We may find ourselves an island in a sea of

totalitarianism."

Dr. Brown said that scientists are active on the international scene. There is a vast scale of international science meetings where scientists come to know each other and direct international scientific efforts.

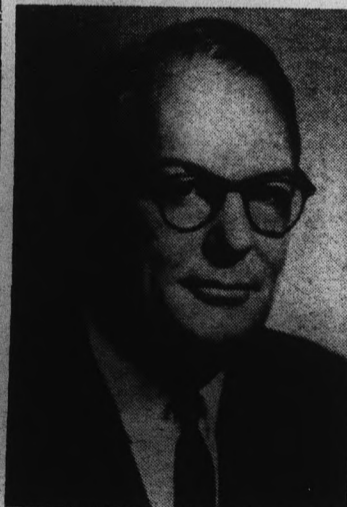

According to Dr. Brown this is the age of specialization, but a wide range of knowledge is needed to solve current problems. Scientists and engineers must be given broader training.

Everyone should have a curiosity and an awareness of the natural world about them.

DR. BROWN has written two books on the role of science in history — "The Challenge of Man's Future" and "Must Destruction Be Our Destiny?" and is joint author of a volume, "The Next Hundred Years."

Research in the composition and origin of meteorites qualified Dr. Brown to be named chairman of the advisory board of the Ninger Meteorite Collection housed at ASU.

His lecture was sponsored by Sigma Xi and the Political Science Department.

FUNSTON

Drop-Add Begins Today

The total number of drop-add actions taken by students usually equals the entire enrollment of the university, according to the Administration building information office.

Although many students don't drop or add courses, they say, others drop as many as four, and sometimes their entire course load.

Students wishing to go through drop-add should contact the departmental offices of courses involved for proper forms during the week of Feb. 6-11.

ASU Nurses—

Governor Proclaims State Nurse Week

Establishment of Arizona Nurse Week, Feb. 3-9, by Arizona's Governor Paul J. Fannin, will receive assistance and guidance from ASU's School of Nursing.

The program, designed to encourage college and high school students to investigate nursing, will be presented as a joint operation of various state medical institutions.

The Arizona State Nurses' Association has initiated information programs to take place during the week, according to Mrs. Loretta Hanner, director of the School of Nursing.

Such functions as an open house at the Ramada Inn in Phoenix featuring restorative nursing and a Saturday tour of facilities at ASU, Phoenix College and city hospitals, will highlight the week's activities.

These programs will emphasize the need for students of nursing, the variety of careers available, and the existing types of educational programs.

The School of Nursing, with an enrollment of 200 students, two of which are males, received

full accreditation by the National League of Nursing in May of 1961.

It offers a four year basic degree leading to a B.S. in Nursing, including Public Health Nursing.

Graduates of the ASU program are eligible to take the state board examination for a registered nurses' license.

Applicants to the School of Nursing must be at least 16 years of age and may be either male or female, married or single.

According to state statistics there are approximately 4,138 employed nurses in Arizona. Of this number, 1,069 are planning further professional nursing education in a baccalaureate program.

The remaining 362 nurses are planning further education in a Master's program. These nurses now hold the Bachelor's degree.

By 1970, Arizona will need 1,365 more nurses for a projected population of 2,135,000. These figures are based on the state need of 350 nurses per 100,000 population.

Seniors View Job Openings

Spring campus recruiting for post-graduation jobs get under way today with interviewing by representatives of a number of organizations.

General Electric, the Naval Ordnance Test Station at China Lake and the Naval Ordnance Lab at Corona will begin interviews today.

Denver Civil Service Region representatives will be here today and tomorrow to talk to students interested in federal employment.

Tomorrow the U.S. Geodetic Survey, Boeing, the U.S. Atomic Energy Commission and Montgomery Ward will interview students.

On-campus recruiting for teachers for the Garden Grove Elementary School District, California, and Tucson Public Schools also begins tomorrow.

Friday, the Adams Arapahoe School District of Aurora, California, will interview prospective teachers.

Also on Friday, Space Technics International and Space and Information Systems divisions of North American Aviation, will hold employment discussions.

Monday, local representatives of Ernst & Ernst, Peat, Marwick & Mitchell and Reynolds Metals will interview students interested in those companies.

Tuesday, recruiters from the Whiteriver Elementary School District, Whiteriver, Arizona, Haskins & Sells, National Aeronautics & Space Administration at Edwards AFB, Hercules Power Company, Sylvania, N.A.S.A. at Moffett Field and Sperry Rand Univac will be here.

Leonard Writes

T. James Leonard, assistant professor of political science, is co-author of a bibliography of the British Commonwealth titled "Federalism in the Commonwealth."

Regents Announce 3 ASU Decisions

Architects for the new library, a new formula for determining the number of state aid scholarships and the reorganization of the College of Liberal Arts were some of the items decided by the Board of Regents in a recent Tucson meeting.

Weaver and Drowed, Phoenix architects, were appointed to develop plans for the new \$3.392 million library. Construction is contingent upon appropriation of funds by the state legislature.

Each state university and college is authorized to award, on the basis of merit and need, academic scholarships not to exceed five per cent of its full-time undergraduate enrollment.

The new policy, as it applies to ASU, will be announced at a later date by President G. Homer Durham.

The Regents approved the reorganization of the College of Liberal Arts into 23 departments. Divisional offices, general physical sciences and humanities departments have been eliminated. Anthropology and sociology are now two separate departments.

Transfer of the School of Nursing from the College of Liberal Arts was approved. The Director of the School of Nursing hereafter will report to the academic vice president.

Leaves of absence for further

study were extended to Dr. Marvin H. Alisky, chairman of the department of Mass Communications; Mervin W. Britton, assistant professor of Music, and T. Alexander Votichenko, assistant professor of Philosophy. Dr. Harry Wood, professor and chairman of the department of Art, received an extension of a sabbatical leave.

Library Cards Need Renewal

Students will need to renew first semester library cards to use Matthews Library during this semester, according to Frank Schneider, associate librarian.

First semester cards can be stamped by the library loan department upon presentation of the new cashier's receipt.

Copies of the library new floor plan explaining changes that took place during the semester break, are available at each desk.

Important Notice!

Refund Period Will Be Over

Saturday, February 16th

No Refunds or Exchanges can be made after this date. We will, however, be buying used books on a limited basis only.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
FLIGHT RESEARCH CENTER
 EDWARDS, CALIFORNIA

Invites Applications from Students majoring, or with advanced degrees in:

- ★ PHYSICS
- ★ AERONAUTICAL ENGINEERING
- ★ ELECTRICAL ENGINEERING
- ★ MECHANICAL ENGINEERING
- ★ MATHEMATICS

TO PARTICIPATE IN AERODYNAMICS AND SPACE-ORIENTED FLIGHT RESEARCH, AND INSTRUMENTATION DEVELOPMENT PROGRAMS SUCH AS X-15, LUNAR LANDING, SUPERSONIC TRANSPORTS and X-20 (DYNA SOAR) FRC Representative will be ON CAMPUS for interviews **FEBRUARY 12**

Positions above are in the Career Civil Service.
 Positions are filled in accordance with Aero Space Technology Announcement 252 B.
 All qualified applicants will receive consideration regardless of race, color, creed or national origin.

WAA To Present Awards To 61 Actives Tonight

The Women's Athletic Association will present awards to 61 active members tonight at 5:15 in the MU upper lounge.

Awards will be given for attaining intramural points in the 100, 500, 800, 1000 and 2000-point scores.

Juanita Brown and Annis Skousen, juniors, having earned 1,000 points, will be awarded black marble desk sets.

With 800-point awards, full membership in the "A" Club and a blazer will go to Barbara Maldonado, Mary Ann Wahl, Pat Janis and Shirley Ward.

WAA RINGS will be received by Judy Sherman, Connie Crumb, Sally Rudolph, Mary Woodriddle, Shan Worsley and Barbara Logan for 500-point awards.

The 100-point winners, receiving active WAA member-

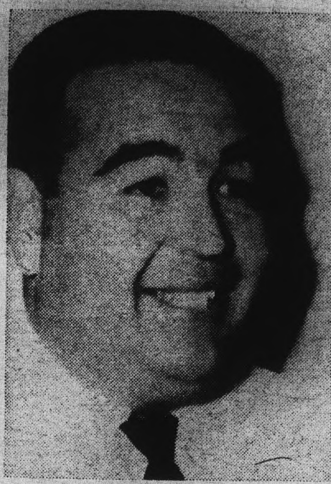

ship and membership pins, will be Gracie Contreras, Carolyn Nobles, Carolyn Moore, Pam Dwyer, Judy Sherman, Marylin Linton and Dottie Cooley.

Also Judy Cowley, Connie Crumb, Judy Davenport, Nancy Davidson, Lynda Diedrich, Carolyn Diestler, Carol Grosser, Mae Hashimoto, Jeanette Jensen, Kasol Johnson and Ellen Kiedaisch.

ALSO NANCY LANE, Carol Lee, Ginger Liebman, Kathy Mangano, Jan Reed, Linda Salisbury, Judy Severance, Martha Smith and Linda Sullivan.

Also Karen Vollmer, Gay Valberg, Martha Worklan, Karen Keuhneman, Lynn Shahan, Pam Dunn, Sandy Ruffin, Marie Walker and Mickey Alden.

Also Carolyn Curry, Lynn Snyder, Karen Morehouse, Barbara Elliott, Susan Straub, Lynn Chewning, Pat North, Paula Whisholm, Martha Craig, Phyllis Hammond, Toni Lorenz, Barbara Beard and Kathy Erickson.

Alumni Group Elects Guerrero As President

Fernando Guerrero was recently elected president of the Phoenix chapter of the ASU Alumni Association. Guerrero, who will serve for the 1963 calendar year, succeeds Tom Bailey as head of the alumni group.

Charles A. Peabody was elected vice president, and Ben Butler was elected secretary-treasurer.

The alumni chapter meets regularly throughout the year, sponsoring luncheons of general interest to alumni and friends of ASU.

The Phoenix chapter is one of 17 Arizona chapters and 35 chapters throughout the world.

Bikes Are Subject To Traffic Laws

Traffic laws concerning bicycles are the same as those for automobiles, Lt. Tom Godbehere, Campus Security, emphasized in an interview Wednesday.

According to the Arizona Revised Code, Title 28, bicycles must be equipped with a headlight, which can be seen for 500 feet, and a reflector mounted on the rear of the bicycle.

Lt. Godbehere said that no traffic citations have been issued to bicycle riders in the past year.

He urges students to register their bicycles with the City

of Tempe in view of the number of bicycle thefts this semester.

A permanent license and registration can be obtained at the fire station on Sixth street, between 2-7 p.m. daily, for 50 cents.

Registration is on a voluntary basis for quick recovery in case the bicycle is stolen. It is not a city ordinance that bicycles be licensed, according to the Tempe Police department.

Computer Plays 'Blackjack' With 21 Every Time

A blackjack playing digital computer programmed to play against human partners will be one of the displays at the engineering center's open house tomorrow from 3 to 9 p.m.

The computer is co-featured by the electrical engineers with a traffic problem on an analogue computer.

The open house will include the entire engineering complex and is sponsored by the Joint Council of Engineering Societies in conjunction with various campus engineering groups.

The industrial engineering department will present a "force platform" and a railroad switching layout.

In the civil engineering section will be a soil experiment and a display on materials and hydrodynamics.

The mechanical engineers will present displays of engineering measurements and heat transfer.

A solvent extraction column and display on electro dialysis will be presented by the chemical engineering department.

The displays are all open to the public.

I Cover College Avenue

By MARY GORMAN

"You kiddin' me?"

"No, I'm not kiddin' you. \$2.50 is all you'll get for your lit book."

"But I paid \$7 for it just four months ago. It hasn't depreciated that much — matter of fact, I only used it twice this semester, at mid-term and final week."

"Sorry, that's all we can give you. Interested in selling or not?"

"Forget it." . . .

SOUND FAMILIAR? It should if you passed the book buyer at the University Bookstore this past week. It seems that some students feel they are being cheated when they sell their books back to the bookstore every semester.

Before condemning the outfit completely, however, there are a few things that should be known about the bookstore.

1. The bookstore is university owned and operated.
2. The policy of the bookstore is to pay the student 50 per cent of the list price of the book. It is then re-sold for 25 per cent less than the list price.
3. Many professors on this campus request the bookstore to order books which they fail to use.

THIS LEAVES the bookstore with a basement full of books. This underground cache of textbooks could be avoided if the professors made up their minds in advance.

For example: A student pays \$6 for a book and can sell it back to the bookstore for \$3. It is then put back on the book shelves with a \$4.50 price tag on it.

All this is well and good, but many students have marched themselves up to the book buyer and been offered \$2 for a book that was originally purchased for \$8.

SOME STUDENTS have been offered a blanket price for six or eight books which did not even amount to 25 per cent of the original price they paid just several months before.

Since everybody feels cheated, we ask what's the answer.

One suggestion would be to establish a well-organized book exchange where students could sell their books for more than the book store offers, yet less than for what the bookstore resells them.

A quarter would cover the handling charges.

SUCH AN EXCHANGE has been tried before, and was considered quite successful by those who took advantage of it. But it suffered from lack of publicity, not being offered on a large enough scale, no convenient space to hold it, etc.

It would be hard to complain about an exchange such as this. However, it must be well-organized at first so that no problems would occur later in the game.

Maybe some all-time candidate for a student government office could use it as part of his "if I am elected" promises.

Meanwhile, let's get something going. This constant griping about policies is not gaining us anything. Matter of fact, we're losing more money every semester. "And I'm not kiddin' you."

Here We Go Again....Good Luck

A welcome back to the old students and just plain welcome to the new. A new semester, new classes, new books, professors and faces in class. A chance to start fresh and make the grades.

Also a new State Press staff. Same paper, just new people at the desks. We don't plan any radical changes here; we do hope to put out as good a paper as past staffs and will use our first column to outline a few aims and objectives.

Editorially we will try to present things in a positive manner. When something on campus rates a compliment we'll give one. When we think a situation needs improvement we will suggest one.

GUEST editorials are welcomed and will be used if they have something to say. It will be understood that these editorials are our opinion and they will usually be labeled as such.

When we try our hand at humor on these pages it's not for any pseudo-philosophical connotations like maintaining the ability to laugh at ourselves, though this is important. It's just because we feel like being funny.

AS A PAPER for a university community we will try to keep the State Press on a university level; that is, somewhat above the eleventh grade mean of general circulation publications.

We will try to report all the events which concern ASU students. We will need help here, though. We can't be everywhere and know everything. When your group has something scheduled let us know about it. We can't guarantee publication of everything, but we'll try. Information should be in our office by Monday afternoon for the Wednesday edition and Wednesday afternoon for the Friday edition.

LETTERS to the editor are welcome and as many as possible will be printed. All letters should bear the name and address of the writer and if the name is to be withheld, this should be indicated. We will feel free to comment on any letter we receive and these, too, should be submitted by the times mentioned above.

In line with our efforts to keep the State Press on a university level will be a new feature this semester, a Book of the Week review. These books will be on various subjects and all will be available at, or can be ordered from, the University Bookstore.

Also on the semester agenda is a series of feature articles on the various colleges and departments making up our university. Through these features it is hoped the student can become acquainted with parts of the university outside his own realm.

AGAIN—As a student newspaper, your newspaper, suggestions and criticisms are always welcome. You are even welcome. If you want to help, come on up to the office. Another pair of hands is always needed. Or if you just want to look around, come up anyway; we promise not to shanghai you.

Teacher Translation

(ACP)—Many college professors seem to have an unerring talent for not saying exactly what they intend to say. The Daily Universe, Brigham Young University, Provo, Utah, therefore offers the following translations:

What the professor says	What the professor means
The textbook for this course will be one you will want to keep all your life.	The book costs \$15.95, and they won't be buying it back next semester.
My philosophy of teaching embodies the principles of certain academic disciplines.	I'm a bear!
I appreciate your remarks. Unfortunately we don't have time to pursue that line of thought.	Quit interrupting my lecture!
Of course, you all know that the honor system is in effect in this classroom.	You'll notice I've passed out alternate tests, and I'll monitor the classroom.
I know you would enjoy delving more deeply into this interesting subject.	You'll be expected to hand in at least two research papers this term.
The final grades will be determined on a rigid curve.	I plan to give one "A" in this class.
It might be well for me to cite one or two concrete examples of this principle.	Prepare to hear the history of my life.
The final exam will be nothing more than a brief review.	Memorize the textbook.

Watch out, however. There are some cagey professors who actually say what they mean.

LITTLE MAN ON CAMPUS

Kappa Delta Pi Meeting Planned

Kappa Delta Pi, educational honorary, will meet on Tuesday, Feb. 12 at 7:30 p.m. in room 104 of the Education building.

Carol Davidson will speak on the topic, "Sweden." Miss Davidson, a student at ASU, spent her junior year studying in Sweden.

Kappa Delta Pi has followed the theme of "Education on an International Level" this year and has already sponsored five meetings featuring speakers and topics related to foreign countries.

Officers Exams Scheduled

The first step to becoming an officer in the advance course of the ASU ROTC program will be the RQ 6 examination being offered this week through Feb. 28, on the third floor of Old Main from 7:30 a.m. to 4 p.m.

The test is a required part of the basic course, but all males from 14 to 24 years of age may qualify for the exam.

S/Sgt. Frank McPeck, Army ROTC Cadre, is in charge of the test.

Six ASU Professors Are Accredited With Authorship Of Publications

Six ASU professors have recently been accredited with partial or full authorship of publications and another instructor has been honored in the field of psychology.

Allyn and Bacon Publishing Co., Boston, Mass., has contracted with Dr. Kenneth Hoover, associate professor of educational foundations at ASU, for the publication of a general methods of teaching textbook.

It is designed as a methods textbook for college students who are preparing for careers in teaching and for experienced teachers who desire to improve their instructional techniques.

Dr. Hoover is co-author of two other current textbooks: "Scientific Foundations of Education" and "Psychological Foundations of Education."

Dr. Keith Davis, professor of management, and chairman of the department of management

of the College of Business Administration, is consulting editor of two management books published this January.

"The Theory and Management of Systems" is the first academic book published in systems management. It covers the management of all types of systems, including manufacturing, office, and weapons systems.

Professor Louis Taylor from the English department has recently had a book published on the story of the American saddle horse.

"The Horse America

Made," was published in September by Harper and Brothers.

Dr. Taylor has written articles for the American Saddle Horse Breeders Association and for several other periodicals.

Assistant professor of political science T. James Leonard is one of the authors of a bibliography of the British Commonwealth to be published in London early this year.

AN ANNOTATED BIBLIOGRAPHY the book will be titled "Federalism in the Commonwealth." Dr. Leonard wrote the chapter on India.

Lieutenants Bars Given To Army ROTC Cadets

Eight graduating ASU Army R.O.T.C. cadets received promotions to Regular Army rank last month, Lt. Col. Theodore Wycoff, head of the department of Military Science, announced recently.

Receiving their commissions from Brig. Gen.

Charles W. Fernald, commanding general of the 258th Infantry Brigade (separate) of the Arizona National Guard, were Gerry Bailey, Charles Clouse, Walter Gaebler and John Ruggles.

Also receiving their gold bars were Thomas Keating, David Grim, John Fecher and John Holdsworth.

The new officers are awaiting assignment orders.

Second Lt. Bailly graduated with a B.S. in accounting; 2nd Lt. Keating a B.S. in accounting with a minor in electrical engineering. Gaebler also received a B.S. in accounting.

Physical Education majors were Clouse and 2nd Lt. Holdsworth.

Ruggles received his B.S. in

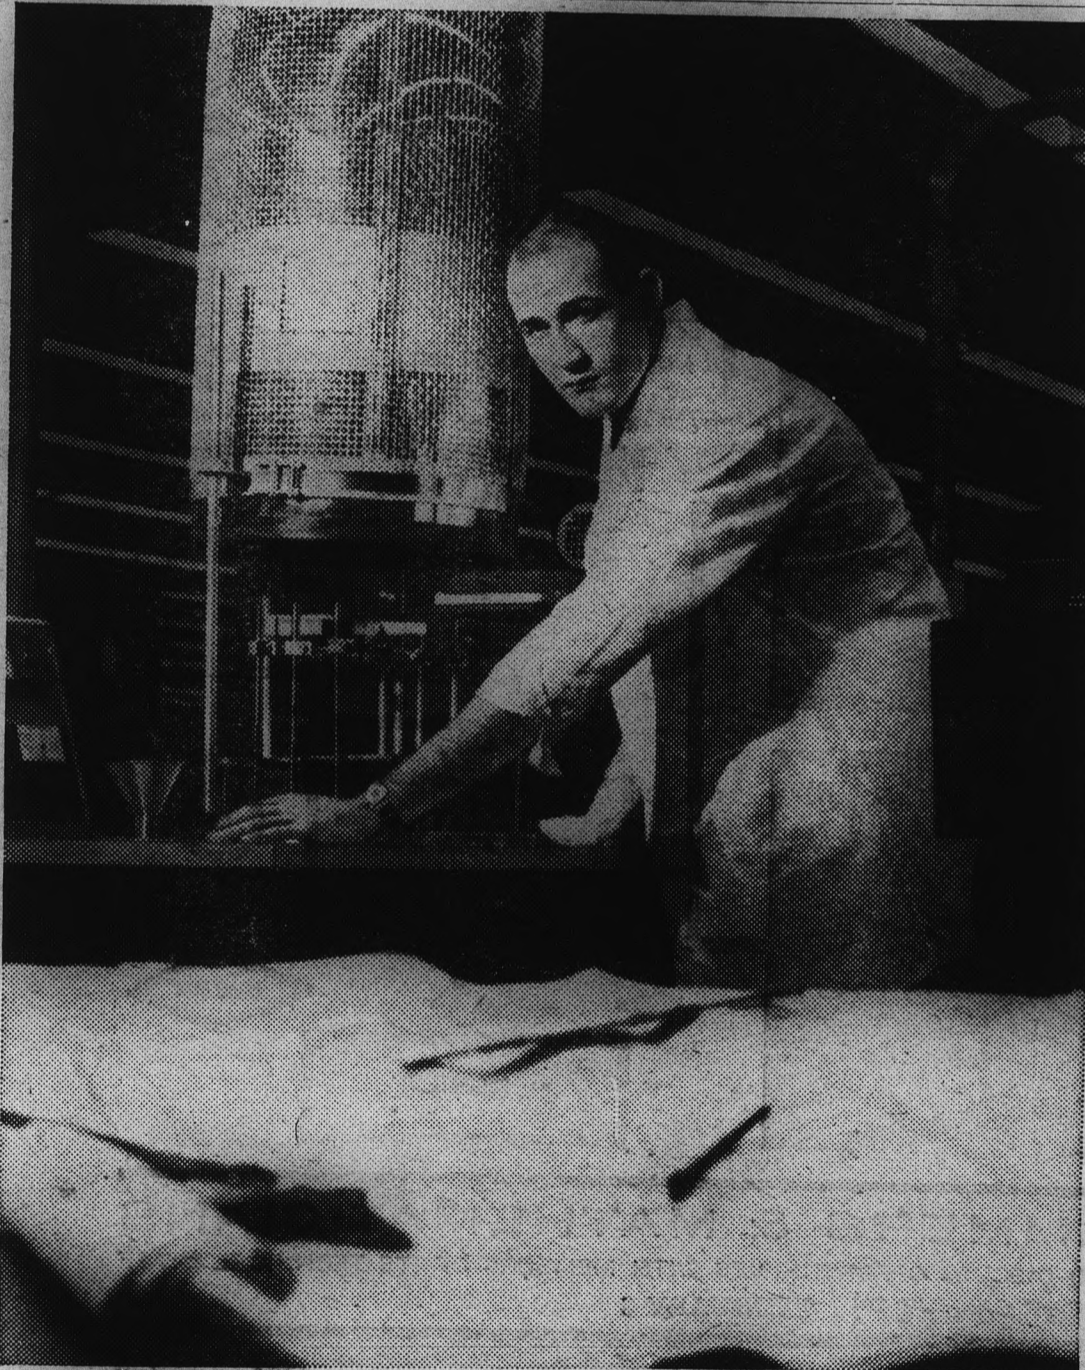

civil engineering and plans to work on his masters in the same field.

Second Lt. Grimm graduated with a B.S. in business management while Fecher received his electrical engineering degree at graduation last month.

Parking Lots

The department of security has opened five new parking lots for off-campus students on McAllister Road between Orange Street and Apache Boulevard said security officials this week.

The lots, numbered 48, 50, 51, 52 and 53 are open to use. Another lot on Van Ness is under construction.

"What responsibilities will you start with at W. E.?"

Exciting ones. With plenty of room for your professional development. Western Electric's business depends on new ideas. And new engineers take responsible, immediate part in projects that implement the entire art of telephony — including electronic telephone offices, computer-controlled production techniques and microwave transmission. On many of these exciting advances in communications, Western's engineers work closely with engineers from our research team-mate, Bell Telephone Laboratories. For Western Electric to maintain the Bell System's ultra-high quality standards, extraordinary manufacturing, process and testing

techniques are required. Opportunities for fast-moving careers exist now for electrical, mechanical and industrial engineers, and also for physical science, liberal arts and business majors.

For more detailed information, get your copy of the Western Electric career opportunities booklet from your Placement Officer. Or write College Relations Coordinator, Western Electric Company, Room 6306, 222 Broadway, New York 38, New York. And be sure to arrange for a personal interview when the Bell System recruiting team comes to visit your campus this year—or during your senior year.

New ASU Farm Provides 320 Acre Research Facility

The new ASU Farm is located approximately six miles southeast of campus at the corner of Price and Elliot roads. It consists of 320 acres of land and livestock enterprises including beef cattle, sheep, swine, dairy and poultry, together with horticultural facilities and a farm machinery center.

THE LAND was acquired through the help of friends in the ASU Foundation who purchased the property and leased it to ASU until money was appropriated by the legislature for its purchase.

In addition to the \$350,000 land purchase the legislature also appropriated approximately \$400,000 for the development of the land and the building of livestock facilities. The building program will be largely complete in the early part of 1963.

ASU's FARM functions as a laboratory for training students and as a center for experiments and research by advanced students and the faculty. The scope of the farm's program and an appreciation of the facilities available can best be understood by considering each enterprise separately.

FIELD CROPS: The south 200 acres of the farm is divided into four fields devoted to field crop studies. At the present time studies in agronomy (science of crop production) practices, soil fertility and plant nutrition are in process. The field crops program is operated in conjunction with the farm machinery center where a variety of equipment is available.

HORTICULTURE: The new horticulture facilities are designed primarily for work with ornamental and landscape plants.

SHEEP: There are two breeds of sheep at the ASU farm; Rambouillets, a white faced fine wool breed and Suffolk, a black faced breed with medium texture wool.

The farm facilities permit

students to get acquainted with production and management problems related to the sheep industry.

BEEF: The farm has foundation herds of Hereford and Aberdeen Angus cattle which provide students an opportunity to work with fine stock. Performance testing (measuring pounds of feed per pound of gain) is being conducted on animals in individual pens.

Facilities to accommodate about 300 head of feeder cattle are nearing completion. This stock will be used for feeding and management experiments related to Arizona's beef production industry.

SWINE: Two breeds of swine are presently found at the farm: Yorkshire and Hampshire. In addition to laboratory and project work, research is planned in swine nutrition,

performance and carcass quality.

POULTRY: The new poultry farm consists of three units:

1. The Random Sample Test House: This building which is finished and already in use was constructed for the Arizona Random Sample Egg Laying Tests which now begins its eighth year. Total capacity is 1,000 birds.

2. Commercial Layer House: This house contains 4 pens with a total capacity of 2,800 layers. It provides facilities to teach students all phases of modern poultry management.

3. The Brooder Grower House: This is basically a house with two large pens where electric hovers will brood 1,500 baby chicks in each pen at one time. The purpose of this building is to raise replacements, or broiler birds.

Architect's Photos Shown In Chronological Study

Photographs of the work of Ludwig Mies van der Rohe, internationally famed architect, will be on exhibition through Feb. 28 at the School of Architecture on the 3rd floor of the Engineering Center.

Presenting a chronological study of his developments of more than 30 years, the exhibition has been arranged by the architect himself. It is sponsored by the American Insti-

tute of Architects in Washington and circulated by the Smithsonian Institute Traveling Exhibit Service.

Mies van der Rohe was selected as the award winner of the AIA's 1960 Gold Medal, the highest honor bestowed by that group.

The architect was born in Aachen, Germany. He worked first in the offices of Peter Behrens in Berlin.

PROGRAMMERS & MATHEMATICIANS

STL INVITES YOU TO DISCUSS OPPORTUNITIES WITH MEMBERS OF ITS TECHNICAL STAFF WHEN THEY VISIT YOUR CAMPUS ON **FEBRUARY 8**

Investigate careers at the Computation and Data Reduction Center in STL's new ultra-modern Space Technology Center, Redondo Beach, California, near Los Angeles International Airport.

Here, over 300 programmers, scientists and technicians are daily performing space mission analysis, flight test support, flight simulation, flight performance evaluation, and manufacturing test support for such programs as OGO, MERCURY, GEMINI, RANGER, MARINER, RELAY, ATLAS, TITAN, MINUTEMAN, and a new series of classified spacecraft for Air Force—ARPA. CDRC equipment

includes two IBM 7090 and six 1401 computers and peripheral equipment, a format converter that processes digital and analog telemetry data, an analog-to-digital converter which automatically converts telemetry data into binary information, and a wave analyzer for frequency analysis of data.

Please make arrangements with your Placement Office for interview appointment. Or you may write to: College Relations, Space Technology Laboratories, Inc., One Space Park, Redondo Beach, California. STL is an equal opportunity employer.

SPACE TECHNOLOGY LABORATORIES, INC.
a subsidiary of Thompson Ramo Wooldridge Inc.

Small Business Managers To Hold Annual Seminar

ASU's 17th Small Business Management Seminar will be held from Feb. 12 to April 2 to enable small business owners and managers to examine modern management principles and techniques.

The seminar will consist of eight lectures and discussion periods held each Tuesday from 7-9:30 p.m. in the Business Administration building.

Dr. Ralph C. Hook, Jr., director of the Bureau of Business Services, is the chairman.

Dr. Robert L. Blomstrom, assistant professor of management, will discuss "The Role of Management in Small Business" at the first two sessions Feb. 12, and "Effective Personnel Administration and Human Relations" on Feb. 19.

Piano Recital Set Tonight

Dr. Donald Isaak, assistant professor of music, will present a faculty piano recital in Cosner Auditorium tonight at 8:15.

Dr. Isaak will present "Sonata in C Major, K. 309" by Mozart, "Sonata in A Major, Op. 2 No. 2" by Beethoven, and "Sonata in E-flat Major, Op. 122" by Schubert.

The recital is open to the public.

TV Courses Get Approval For Credit This Semester

Five television credit courses will be offered for the spring semester over KAET, Channel 8, ASU's television station, according to Sheldon P. Siegel, KAET station manager.

The telecourses can be seen either at home or in campus viewing rooms.

They include:

The Physical Universe PL110, a four hour course, at 9:40-10:30 a.m. and 9:15-10:00 p.m. on Monday, Tuesday, Wednesday and Friday, instructed by Dr. Francis Yale.

The Living World BI100, a four hour course, at 10:40-11:30 a.m. and 8:40-9:30 p.m. on Monday, Tuesday, Wednesday and Friday, instructed by Dr. Herbert Stahnke

Introduction to Business GB 101, a three hour course, at 8:40-9:30 a.m. and 7:15-8:00 p.m. on Monday, Wednesday and Friday, instructed by Mr. Glenn Wilt.

Social Studies in the Elementary Schools BE 355, a three hour course, at 11:40-12:30 p.m. and 5:15-6:00 p.m. on Monday, Wednesday and Friday, instructed by Mrs. Beulah Crouch.

State and Local Government PS 212, a three hour course, at 12:40-1:30 p.m. and 6:30-7:15 p.m. on Monday, Wednesday and Friday, instructed by Dr. Raymond Uhl.

YAF Chapter Recognition In Final Stage

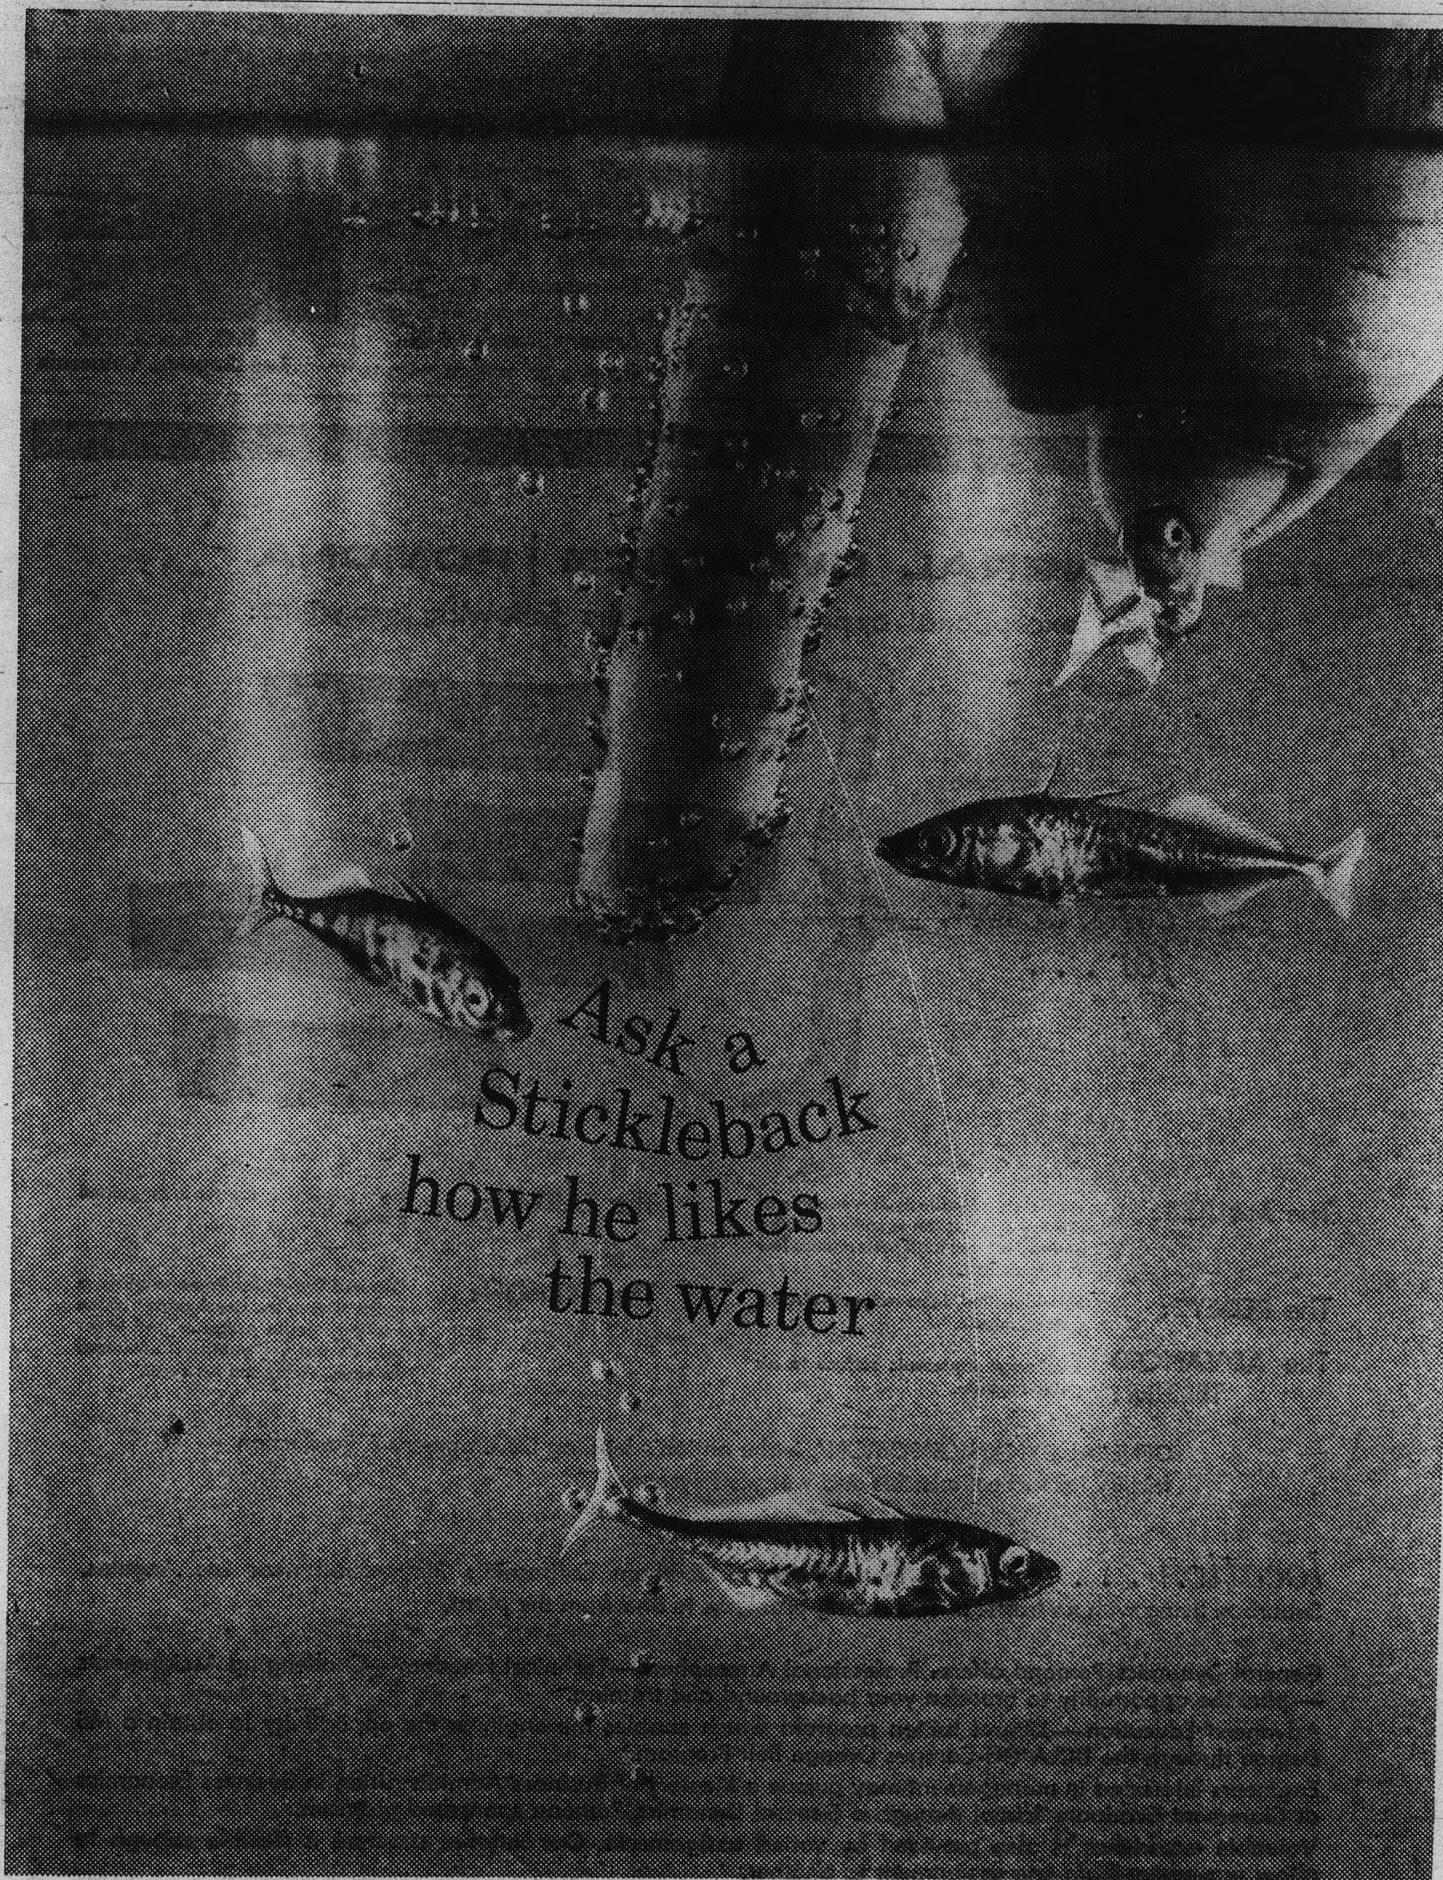

The ASU chapter of Young Americans for Freedom is in the final stages of obtaining university recognition, it was announced by Dean Helland, chairman.

Tentative speakers for meetings during the next semester are W. P. Shofstall, dean of men, Evan Mecham, candidate for U.S. Senate, and Rep. John Rhodes (R-Ariz)

Officers of the organization are Dean Helland, chairman, Lee Althouse, vice chairman, Sue Stiles, recording secretary, Suzanne Guilbert, corresponding secretary, and Jim Goldman, treasurer.

Recipient Named

Jerry Van Norman, junior engineering student, was awarded a scholarship covering registration fees for the second semester by the Central Arizona Chapter of the American Institute of Industrial Engineers.

Ask a Stickleback how he likes the water

Who knows water better than a fish?

The fish we employ as water experts are tiny Sticklebacks. We pay them liberally in brine-shrimp, no salary deductions.

It's all because we use millions of gallons of water daily in our refineries. After use, it is treated with algae, bacteria, chemicals, sunshine and oxygen, to make sure the water is clean and pure when we return it to stream or sea.

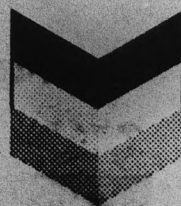

As an ultimate safeguard, we let our Sticklebacks test the water, before it is released. If they like it, we know it will be happy water for any fish.

The object is to keep our streams and coastal waters pollution-free with abundant fish to nibble your hooks, and clean playgrounds for your water sports.

Many other industries which depend upon water are equally careful. Our common concern is to protect a priceless heritage.

Planning ahead to serve you better

STANDARD OIL COMPANY OF CALIFORNIA

Film Spectacular Depicts Historical D-Day Invasion

By JERRY REILLY

Darryl F. Zanuck's epic film, "The Longest Day," re-enacts one of the greatest historical events of all times, the Allied invasion of France in WWII.

D-Day is presented as a cross-section of the famous invasion and battle. The film depicts the part played by the individual as well as by the troops as a whole in a massive act of courage. The cold reality and brutality of war is so vividly portrayed in three hours that

MU Now Hosting Road Exhibition Of Art Collection

Fourteen paintings from the UofA's Gallagher Memorial Collection are currently on exhibit in the MU lower lounge, according to the cultural affairs department.

The Gallagher collection of 83 paintings and sculptures is the first in Arizona containing major contemporary European works.

It was established by Edward J. Gallagher, Jr., in memory of his son.

The art works are the first "traveling display" to be shown in the lower lounge.

The exhibit will be open Monday through Thursday, 8 a.m.—10 p.m.; Friday and Saturday, 8 a.m. to midnight; and Sunday from noon to 10 p.m. The collection will be on exhibit through March 1.

Psychologists Write Articles

Dr. Lee Meyerson and Dr. Jack Michael of ASU's Psychology department have written an article published in a special issue of the Harvard Educational Review entitled "Guidance — An Examination."

The article, "A Behavioral Approach to Counseling and Guidance," was written by invitation of the editors of the special edition.

The purpose of the article is to explain the effect of the behavioral approach in creating new behavior patterns and eliminating or altering the undesirable ones.

As a part of a highly technical system, the behavioral approach seems to be especially effective in teaching a specific technical trade to the "slow" or mentally retarded person and in guiding the "problem" student or worker.

the intermission is a welcome relief.

Producer Zanuck's D-Day re-enactment is so staggering, it's hard to imagine any staged picture showing more. One scene shows thousands of ships gathered off the Normandy coast. Another scene utilized thousands of extras as the Allies began their assault on Omaha and Utah beaches.

A huge cast of 42 stars keeps popping up on somebody's side. There's the usual American "good guys," John Wayne, Robert Mitchum and Robert Ryan. Some fine foreign actors give excellent performances as the "other guys." Richard Burton, Kenneth More, Irina Demich, Curt Jurgens and Christian Marquand are a few other stars.

Again there are scenes, many

on the actual invasion sites, that only a motion picture could do justice. The photography and sound are spellbinding, especially the opening scene with its thundering drum-roll.

The reality of war and its effect on both sides is presented as objectively as possible. The picture is a human study of both sides and the feelings they develop in battle.

Forget your stereotyped war movie; there isn't any false heroism or stupid dialogue in this version.

Visit the snack bar before the movie starts because you won't leave your seat until intermission. Exhausting, man, exhausting, those sub-titles keep you hopping.

Marksmen Arm And Aim For Upcoming Rifle Meets

Sharpshooters from the Starfires, the ASU rifle team, will have a busy schedule ahead of them this semester in small bore and high power competition.

The Starfires travel to the Air Force Academy later this month to revenge a loss to the academy earlier this year.

The 14th annual small bore competition in El Paso, Texas will have the Starfires in a four day match from Feb. 27 to March 2.

Arizona's state-wide indoor championship is a little closer to home according to Sgt/1st Class Harold Acres, Army ROTC Detachment. The competition will be in the National Guard Armory March 23-24.

A high power match is set

for Feb. 24 at Papago Range on McDowell Road.

The Starfires will be firing against Williams and Luke Air Force Base Teams and the Phoenix Rod and Gun Club for the next three Tuesday evenings at 7:30 in Goodwin Stadium.

The National Rifle Association has selected the Starfires to sponsor the annual Junior Sectional Rifle Matches for Arizona, Sgt/1st Class Acres added.

The junior competition will be March 9-10.

Opera Star—

Senior Girl Takes Third At Opera Auditions

Senior Suzanne Williams won third place honors and \$100 in competition for the Western Regional Metropolitan Opera auditions in Los Angeles Jan. 31, Feb. 2-3.

A mezzo soprano, Miss Williams has been studying voice at ASU under former opera star Josephine Antoine.

She will continue her studies next summer at Chautauqua, New York, and hopes to sing with the Metropolitan Opera.

Miss Williams has sung leads in several university musical productions.

Survey Reports Pay Increases For Graduates

College seniors graduating this year can expect higher pay, according to the College Placement Council's Salary Survey just released by Dr. Robert F. Menke, director of placement.

The University is participating in the council's 1962-63 salary survey.

The survey is based on data from placement offices at 91 selected colleges from coast to coast.

Statistics compiled by the survey include the average dollar value of more than 2,000 offers made to male candidates in 11 major fields by 16 of the most active employer groups.

The report covers offers from the beginning of the fall recruiting season to Dec. 14.

Offers to bachelors degree candidates in both technical and non-technical fields showed an average monthly increase of \$30 since December, 1961.

Technical offers rose to an average \$592 monthly, a 5.3 per cent increase, while non-technical offers went up to \$493, a 6.5 per cent gain.

Engineering categories continued to show substantial increases in offers made with industrial engineers up \$35 a month and electrical engineers up \$33 a month.

The College Placement Council is conducting the survey for the fourth year in the United States and Canada.

Queen And Prizes To Highlight Ball

Military Ball committee members are putting the final touches on this year's dance which is to feature "changes in military uniforms" in the "Through the Years" theme.

The annual Army and Air Force ball is set for Friday, Feb. 15 in the Men's Gym. Carl Ritter's dance band will provide music from 8:30 p.m. to midnight.

Candidates for the Military Ball Queen title will be selected tomorrow morning by the ROTC cadets.

The queen will be chosen from a court of four Kaydettes, the Army's ROTC women's auxiliary and the Angel Flight, the

Air Force ROTC women's auxiliary.

A trophy will be awarded to the winners of the Waltz contest and a door prize will be drawn from ticket stubs.

Admission for the ball is \$3.00 a couple.

Cadets may buy tickets by signing a waiver which will be deducted from the ROTC deposit.

Project To Begin

Dr. Bertram Zaslow, associate professor of chemistry, will direct carbohydrate research under a 1963 grant to ASU from Corn Industries Research Foundation, Inc., of Washington, D.C.

Dr. Zaslow will investigate the structure of the large amylose helix, a carbohydrate com-

pound. Research techniques will include the use of an iron X-ray target tube and a high resolution powder camera.

The new grant was recently approved by Foundation trustees at their annual meeting in New York, said Dr. John T. Goodwin, Jr., vice president for research.

How far can your ideas take you in the new world of opportunity in data processing at IBM?

Growth and discovery: The development and application of data processing at IBM open a new world of exciting opportunities for individual career growth. Data processing is producing some of the most far-reaching developments of our age. Each basic advance in technology and application requires new concepts. Ideas—new thinking and new ways to approach problems—are needed. For the individual who likes to discard conventional solutions and find new ideas, there's room to grow in IBM.

IBM offers graduates with Bachelor's or advanced degrees in Engineering, the Sciences, Business Administration, Economics, or Liberal Arts challenging assignments in the marketing of information systems and equipment. These opportunities increase with each new system that is designed to meet the growing needs of business, industry, government, research, education, and space. Each technological advance and each new application can enlarge the scope of your own career at IBM.

A wide range of positions: Rewarding opportunities will exist in more than 190 IBM Sales and Service Offices, located in major cities throughout the United States. Positions open include:

Marketing-Sales: The IBM Data Processing Representative is a consultant to his customers. He calls on customer executives, giving timely information, presentations, and demonstrations for better business management and controls through data processing.

Systems Engineering: IBM Data Processing Systems Engineers are men and women who study customer requirements in depth, devise the best approach, define a preferred machine and operational solution, and assist in the implementation of this solution.

Customer Engineering: The IBM Customer Engineer is a specialist in precision data processing machines and systems. He is responsible for the installation, maintenance, and functioning of IBM's vast line of electronic and electromechanical equipment.

Opportunities for advancement: IBM offers you extensive initial training, both in the classroom and on the job, in the area of your special interest. This training continues as you advance along a planned career path leading to professional or managerial positions. IBM also offers company-sponsored education programs to keep you abreast of developments in your field, and a tuition-refund plan to give you financial assistance for graduate study.

Company-paid employee benefit plans are comprehensive, and include life insurance, family hospitalization and major-medical coverage, sickness and accident pay, and retirement benefits, to name but a few.

See your college placement director to determine when IBM will interview on campus, and make an appointment to see our representative. We will be glad to discuss openings and opportunities at IBM, including our training and education programs, financial rewards, and company benefits. IBM is an Equal Opportunity Employer.

For information on career opportunities, write or call: C. H. Woolf, Br. Mgr., IBM Corp., 3424 N. Central Ave., Phoenix 12, Ariz. CR 7-2661.

Mary Peterson

Secretary Claimed To Be Officer's 'Right Hand'

By PHIL OSBORNE

Every four years when the professors of Air Science in ASU's Air Force ROTC detachment are replaced, the transition is made smoothly largely through the efforts of a woman, Mary F. Peterson.

Mrs. Peterson, the only woman in the department, is secretary to Lt. Col. Jack R. Armstrong, department chairman.

In a department where almost all personnel is replaced at the end of each four years, Mrs. Peterson is the link which ties the preceding staff with the new staff.

"Mary ties things down while the change is taking place," according to M/Sgt. Murlon F. Wade. "The detachment revolves around her because of her knowledge of what has been going on in the past," he added.

MRS. PETERSON, in the department since 1954, was born Mary F. Holloway in Medford, Ore.

She met Franklin D. Roosevelt, former President of the United States, at Warm Springs, Ga. and there established a lifelong friendship with Mr. and Mrs. Roosevelt.

"MARY IS dedicated to her job and possesses a technical competence rarely seen. Her cheerful attitude and depth of knowledge and experience are irreplaceable to us," said Col.

Armstrong. "She is the right-hand 'man' of the detachment," according to M/Sgt. Wade.

As Mrs. Peterson continues to work in the Air Force ROTC department, she bears out the fact that even military life is not curtailed to man's world.

AWS Convention Planned For PC

This year's state convention of Associated Women Students is scheduled Feb. 8-9 at Phoenix College.

The theme, "The Higher the Mountain, the Broader the View," will invite discussion from AWS participants coming from New Mexico as well as Arizona.

Any ASU girl interested in going to the assembly is urged by the AWS general council to contact either her hall president or AWS office for further information. The \$6 registration fee will cover the Friday night dinner and other activities.

Senior Honorary To Begin Drive

Pleiades, senior women's honorary, will sponsor their annual AWS Scholarship Drive from Feb. 10 to March 10.

The drive is to provide funds for a scholarship for an incoming freshman and an upper class woman.

Women's dormitories and organizations including Phrateres and Off-Campus Women will participate in the drive.

A trophy, awarded on AWS Women's Day April 25, will be given to the resident hall or organization that demonstrates the most originality in raising money.

Participation and the amount of money raised in proportion to the number of residents or members will also be considered.

Former money-raising ideas have included selling the head resident, shoeshines, variety shows and white elephant sales.

Last year, Wilson Hall won with a "Twist Party."

Trips On Calendar

Members of Alpha Delta Sigma, men's professional advertising fraternity, are planning several activities for the second semester.

Attendance at two advertising conventions, one in Los Angeles and one in New York City,

is planned, as well as several money raising projects and initiation of pledges.

Pledges to be initiated are Bruce Johannes, Mell Jett, Paul Ripps, Dick Natiello, Frank Fafara, Bob Jacobsen, Bill Osborn and Larry Popkin.

"Where Originality Is a Tradition"

Combined Departments Present Menotti's Opera

For the first time the Music and Drama departments will combine to present the University Players' next production, Gian-Carlo Menotti's opera, "The Consul" February 14, 15, 16, 21, 22 and 23 at 8:30 p.m. in the Lyceum.

Menotti himself refers to "The Consul" which is sung in English, as a musical drama rather than an opera, because of its tense emotional appeal.

"The Consul" revolves around a young woman trying to leave a European country to join her husband. Her futile attempts to obtain a visa and passport from the consul create a powerfully, suspenseful drama.

According to University Players director Don Doyle, "Some of the University's finest voices will be heard in the production." Wally Hornbrook is the musical director for the production.

THE CAST INCLUDES Betty Heisley, portraying Magda; Dennis Phillips as John; Ed Humphrey as the police agent; Jack Cathey as Nika Magadoff; Cathy Harris as the foreign woman and John Morrison as Mr. Kofner.

Also included in the cast are

Pat Tarpey as Vera Bornel, Dick Panzica as the first policeman, Elnora Moody as the mother, Pat Spencer as the secretary and Carol Richard as Anna Gomez.

Admission charge to students with an activity card and faculty is \$1 and general admission is \$1.50.

STUDENTS MAY obtain free tickets for the opening night performance, Feb. 14. Reservations must be made in advance and student ID cards are required to obtain tickets.

Rodeo Clubbers Ignore Casts, Ride Anyway

Rain, nor sleet, nor broken legs can keep Janeice Johnson and Louis Taylor from their horses for the Usery Mountain trail ride Saturday.

ASU sophomore Janeice and Sun Devil Rodeo Club member, broke her leg while calf roping.

Dr. Taylor, ASU professor and advisor to the club, broke his leg when he dismounted in rough country during a lion hunt.

Both plan to take the Saturday ride sponsored by the County Parks department and the Arizona State Horsemen's Association.

Groups Install New Members And Executives

Phi Kappa Phi

Phi Kappa Phi, national scholastic honor society, initiated 24 members at a recent banquet in the MU.

The new members include Jesse Weaver Abbott Jr., Roger Browning Baymiller, Linda Joan Brodersen, Sharon Ann Brosseau, Lucy Joy Fuller, Irene Carol Grady, David J. Havlik, David Charles Heinz, Phyllis Ann Hoffman, Charline Robinson Kvapil and Corinne Louise Milton.

Also initiated were John Michael Nolte, Marion E. Parrish, Arlene Przewski, Peter Shepherd Rose, Arthur E. Sanera, Kathleen Spieles, Marilyn Joan Spittler, David Neil Stein, Frances Karen Terry, Phyllis Toomey Terry and Roberta Frances Turner.

Faculty members initiated were Lola Beasley Dawkins and Martin T. Ferris.

Faculty Club

The ASU faculty club has elected new officers for the coming year.

New president will be Lt. Col. Theodore Wyckoff, professor of military science.

Vice president is Dr. Victor Miller, professor of horticulture; secretary, Dr. Richard G. Landini, assistant professor of English, and treasurer, Harold Fry, associate professor of engineering.

Alpha Pi Mu

Alpha Pi Mu, industrial engineering honor society, elected new officers at a recent meeting.

New officers are Harold L. Moyer, president; Kenneth L. Jones, vice president; Jerry Lee Van Norman, corresponding secretary; Lester Luther, recording secretary; and Keith Adams, treasurer.

Honorary Pledges Muster; Stand Guard At Dormitory

Lipstick, shaving cream, hair spray and kisses were the weapons of distraction used by ASU dormitory women recently at the annual Pershing Rifle pledge dormitory guard.

The 29 men participating in the dorm guard were required to come to attention and present arms each time a young lady came in front of them, and also to open the doors for them.

THEY ALSO were required to answer any questions and obey, within reason, any orders given by the women.

In order to entice the pledges to smile and break attention, the girls at East Hall applied shaving cream, hair spray and lipstick to the pledges. At West Hall, the pledges were made to sing, and at Gammage, they twisted.

The purpose of guarding the dorms was to help the pledges learn to take and follow or-

ders. This was also a part of the pledges' "Hell Week," which involves tests and inspections to determine which pledges will go active.

TO GO ACTIVE the pledges must have a 2.0 accumulative index and a 3.0 average in Military science.

Those who became active during this initiation were Roger S. Andersen, Gary Giroux, William R. Koeneman, Albert L. Lowenstein, Edward C. McCarthy.

Also, Leroy L. Midtun, Harry H. Rhodes, Russell Shedd, Richard C. Wieburg, Dennis Burges and Tom Tirella.

We're looking forward to meeting you

We'll be on the campus on the dates listed below, ready to give engineering and science seniors information on space-age careers in a dynamic industry.

If you are looking for a company offering assignments on programs of unique interest and career potential, you'll be interested in the advantages Boeing can offer you.

Boeing, for instance, is a major contractor on such advanced programs as the Saturn S-IC first-stage rocket booster, the X-20 Dyna-Soar manned space glider, the solid-fuel Minuteman ICBM, and the Bomarc defense missile system. Boeing is also the world's foremost designer and builder of multi-jet aircraft, including the eight-jet B-52H missile bomber, the KC-135 tanker-transport, the C-135 cargo-jet, and the famous Boeing 707, 720 and 727 jetliners. In addition, Boeing's Vertol Division is one of America's leading designers and builders of helicopters.

Research projects at Boeing are under way in such advanced fields as celestial mechanics, solid state physics, nuclear and plasma physics, flight sciences, space flight and propulsion.

Expanding Boeing programs offer exceptional opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. Assignments are available in Washington, Pennsylvania, Kansas, Louisiana, Alabama, California and Florida.

You'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

Drop in to your Placement Office and arrange for an interview. We're looking forward to meeting you!

Thursday and Friday — February 7 and 8

Little Sisters Plan Display Of New Styles

Little Sisters of Minerva, the women's auxiliary of Sigma Alpha Epsilon, is presenting "Spring College Fashions" on Sunday, Feb. 10, at 3 p.m.

The fashion show will be at the SAE House, 706 Alpha Drive. There will be door prizes for men and women and refreshments will be served.

Fashions will be from the Mademoiselle Shops and The Americana Shop.

Female models for the fashion show will be Windy Boucher, Natalie Freedman, Kathy Erickson, Vivianne Taylor, Kathy Bunch, Dee Stouffer and Donna Shaw.

Male models will be Mike Terry, Tom Tipton, Bill Finn, Tom Bailey, Toby Johnson and Bill Hoee.

Pete Meyer will narrate. There will be a \$1.00 donation.

Honorary Proclaims Senior As Executive

Eleanor Hoover, ASU senior, was recently elected president of the Tau Gamma Chapter of Sigma Tau Delta, English honorary.

Other officers elected were Jim Lindell, vice president and Bruce Spence, secretary-treasurer.

Objectives of the fraternity are to assist students in forming a basis for literary evaluation, to provide the exchange of ideas between students interested in literature and to supplement students' understanding of world literature.

Dr. Richard Landini of the English department was the main speaker of the evening. His topic dealt with the second part of "The Wasteland," a poem by T. S. Eliot.

Active membership in the club is open to full-time students at ASU who are English majors or minors. However, anyone in-

terested in the club may belong as an associate member.

Mrs. Marjorie Henshaw and Dr. Nicholas Salerno are sponsors of the club, which has a membership of 40.

Students Planning Careers Through Navy ROTC Plan

Uncle Sam's Navy is sailing to the Arizona desert for three ASU students who plan careers as naval officers.

Leslie Arnold, Charles Piper and Harold Waits, members of the Seabee Reserve, want to enter the navy after graduation.

Arnold, a junior civil engineering major, plans to attend Officer Candidate School to become an officer in the Construction Battalion.

Sophomore Charles Piper is a mass communications major and will attend O.C.S. to become a public relations expert.

Waits, a senior, participated in the Navy's Reserve Officer Corps. He has completed training at Newport, R.I.

His first eight weeks of training, taken between his sophomore and junior years, consisted of training with naval weapons and studying their tactical use.

The second period of training stressed naval operations. He will be commissioned an ensign in the U.S. Naval Reserve upon graduation.

For O.C.S. training there are no marital restrictions and all

applicants must hold at least a bachelor's degree.

All line, supply and civil engineering applicants must be between the ages of 19 and 27 and all other applicants must be under 33 years. Physical requirements vary according to the program.

The Seabee Naval Reserve is particularly interested in students who are working toward their bachelor of science or liberal arts degree.

Training for both the Reserve Officer Corps and O.C.S. is taken at Newport, R.I.

During the summer the participant takes Navy subjects. While in training, he is paid, his uniforms are furnished and he also receives travel pay.

Interested students should call Lt. G. Guthrie, at WI 4-3293 or 272-6538.

"The Place Where Old Friends Meet"

If you have trouble saying it...

Say it with a Parker

If you're a little shy and have difficulty saying "I love you" or even "I like you very much"—say it with a Parker.

The new Parker Arrow makes a beautifully expressive gift and looks as if you paid a small fortune for it. It only costs \$3.95, however, which should leave you with enough date money for an impressive presentation ceremony in romantic surroundings such as the second booth from the back in your local drugstore.

The new Parker Arrow comes in black,

dark blue, light blue, light gray, and bright red, with a choice of four instantly replaceable solid 14K gold points. Gift-boxed with five free cartridges.

P. S. To girls: a Parker Arrow—besides being a very romantic gift—comes in one size (the right one), should last at least ten times longer than a scarf or a tie, and should bring in a harvest of correspondence you'll cherish the rest of your life.

Cougars, Redskins Fall; Devils Lose To Cowboys

By JOHN NADEL

After hosting the UofA Wildcats Saturday night, Feb. 9, the Sun Devil basketball team will play four tough league games in the next two weeks.

The first pair of these games is on the road, Feb. 15 and 16 against Utah and BYU. The Devils defeated both of these opponents in January in Tempe.

Earlier the Devils faced a spunky Utah Redskin quintet. The Utes, paced by hustling Bo Crain, made a real game of it for 30 minutes. But the Sun Devils, paced by Art Becker and Gary Senitza, ran away with the game in the last ten minutes to score an 80-65 victory.

BECKER, with 22 points, and Senitza, with 21, paced the Devil scoring.

ASU knocked off BYU's Cougars in their opening conference game by an 89-84 count. The Devils were led by Art Becker with 29 points and Joe Caldwell with 25. Sophomore guard Jerry Dahlman led the Cougars with 34 points, spearheading a late comeback that fell short.

The Cougars, behind by 10 to 15 points throughout most of the game, gave the Devils a scare as they fought to within four points before finally succumbing.

These two teams should be very tough for the Devils and both of them will have the home court advantage when they meet the Devils.

The Devils then return home Feb. 22-23 for meetings with Wyoming and New Mexico.

Frosh Bury Monsters

Sporting a new look, the ASU freshman basketball team got back on the winning track Monday night with a 107-82 blitz over Eastern Arizona JC.

Saturday, Feb. 2, the Sun Imps lost a 76-69 decision to Kerr Sporting Goods.

With four men sidelined by scholastic difficulties for the second semester, Coach Bill Mann went with a lineup Monday consisting of two inside men and three guards. The result was the Imps' largest point output of the season.

JOHN MYERS led the scoring Monday with 22 points. He was followed by Dennis Hamilton and Jim Whitehead with 19 each, Don Holmes with 17 and Rich Coppola and Bobby Griego with 11 apiece. Griego scored his 11 in the second half.

Against Kerr, Hamilton had 17 and Charles Robinson added 13.

The Imps, now 8-2, meet UofA Wildkittens Saturday, beginning at 6:30 p.m. in Sun Devil Gym.

The four Imps ineligible for second semester competition are Robinson, Jim Holloway, Chris Richmond and Paul Meany. A technicality occurred when Meany who passed enough hours to be considered a sophomore and cannot see further frosh action.

Friday night the Devils meet their only conquerors in league play thus far, the Wyoming Cowpokes. The tall Cowpokes, one of the few teams to out-rebound the Devils thus far are led by high scoring sophomore guard, Flynn Robinson.

ROBINSON, although connecting with only nine out of 26 shots, led the Cowpoke scoring when they faced the Devils with 25 points.

Possibly a bigger star for Wyoming was 6-4 sophomore jumping jack Randy Richardson, who scored 11 points and came down with 23 rebounds, a school record.

The Sun Devils, with all five starters scoring in double figures, were led by Becker with 19.

IN NEW MEXICO, the Devils will meet a defensive, ball control-minded team. When the

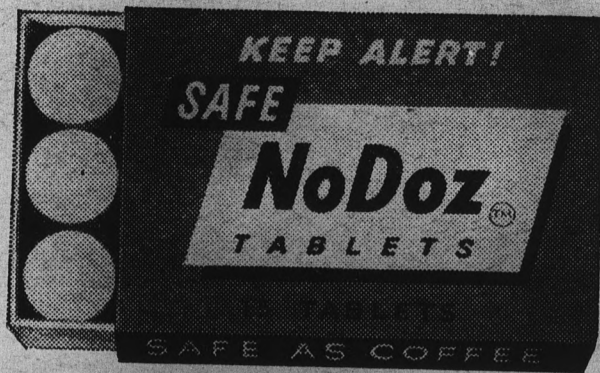

two teams met in Albuquerque in January, the Devils, although winning 59-47, were held to their lowest point total of the year. It was another hard-fought game in which the Devils pulled away in the second half to win.

Art Becker was Sun Devil scoring leader with 23 points, including many key markers in the second half. Ira (The Large) Harge led the Lobos with 18 points.

These league games could hold the key to Sun Devil post-season chances, as they must win the league championship to advance into the NCAA play-offs.

Sun Devil Facts

Norman Ray, with 12 points, led the ASU basketball team to victory over Flagstaff 28-27 according to the Feb. 22, 1946 State Press.

THE SAFE WAY to stay alert without harmful stimulants

Never take chances with dangerous "pep pills." Instead, take proven safe NoDoz. Keeps you mentally alert with the same safe refresher found in coffee. Yet NoDoz is faster, handier, more reliable. Absolu-

tely not habit-forming. Next time monotony makes you feel drowsy while driving, working or studying, do as millions do... perk up with safe, effective NoDoz. Another fine product of Grove Laboratories.

Wrestlers Win A Pair In Colorado

A spunky ASU wrestling team rolled through a Colorado road trip last weekend picking up two wins and a draw to run its record to 7-1-1.

Saturday, Colorado Mines fell, 26-8, as four Sun Devils pinned their opponents and on Friday, ASU netted a 16-16 tie with national powerhouse Colorado State College plus dumping Denver University, 22-8.

Against Colorado Mines, Manuel Aragon, Pete Russo, John Hagan and Sonny McCullough earned pins for ASU.

Russo, Hagan and Buzz Hays decisioned their CSC opponents while Dave Greer was pinning his and Rick Jackson was battling to a draw.

Greer gained the only pin against Denver while Aragon, Russo, Hays, Jackson, McCullough and Cary Lewis all were awarded decisions.

Just before semester exams ASU crushed both intrastate rivals, routing University of Arizona on Jan. 18, 39-2, and defeating Arizona State College the following night, 27-3.

Coach Ted Bredehoft's Devils hit the road again this weekend, heading for Utah and a Friday dual meet with Brigham Young and with Utah University on Saturday.

Gymnasts Smash Denver

A depth-laden performance that garnered eight first and six second places sparked ASU's gymnastics team to an 87-40 rout of Brigham Young University Saturday in the ASU gym annex.

Team captain Jerry Stansbury led the Sun Devils to their first dual meet victory of the season with firsts in side horse, long horse and parallel bars plus high point honors at 23. The Devils now are 1-1.

Jim Nelson trailed Stansbury with two firsts and 16 points. Skip Johnson netted 12 and Dennis Sullivan 10. Stan Dunn topped BYU with 10 points. The results: floor exercise, Jim Nelson, 84.5; parallel bars, Jerry Stansbury, 92.5; trampoline, Dennis Sullivan, 85.5; still rings, Chris Evans, 88; side horse, Jerry Stansbury, 86; horizontal bar, Norm Cox, 79.5; long horse, Jerry Stansbury, 93.5; tumbling, Jim Nelson, 92.5.

Stay bright. Fight drowsiness and be at your brilliant best with Very® continuous action alertness capsules. Effective, safe, not habit-forming.

Off The Cuff

By BOB JACOBSEN
Sports Editor

Although winning their last two outings, the Sun Devils still remained fifth on the latest UPI ratings.

The Devils dropped to only eight points ahead of sixth place Georgia Tech (16-1) and dropped to 62 points behind fourth-ranked Illinois (13-2).

CINCINNATI (18-0) continued to lead the poll with a perfect score of 350 points and Loyola of Chicago (20-0) remained second with 305 points.

Duke's Blue Devils (15-2) held third, while Illinois, ASU and Georgia Tech followed.

Colorado (12-3), who the Devils smashed early in the season (7-53), jumped to seventh while Stanford (12-4) climbed to eighth.

Mississippi (14-4) and Oregon State (14-4) round out the top ten.

ASU WAS well represented at the 14th annual Arizona Sports Award Dinner last night as six Sun Devil celebrities were candidates for coach and Amateur Athlete of the Year.

Head coaches Ned Wulk, Baldy Castillo and Dick Smith were all nominees for coach and performers Roger Locke, Larry Armstrong and Ullis Williams were candidates for amateur athlete.

Also Carol Sorenson, Barbara McAlister and Vickie Palmer received special awards.

UPCOMING events this weekend include:
Friday, Feb. 8

Wrestling: Brigham Young at Provo

Gymnastics: San Jose State at Tempe

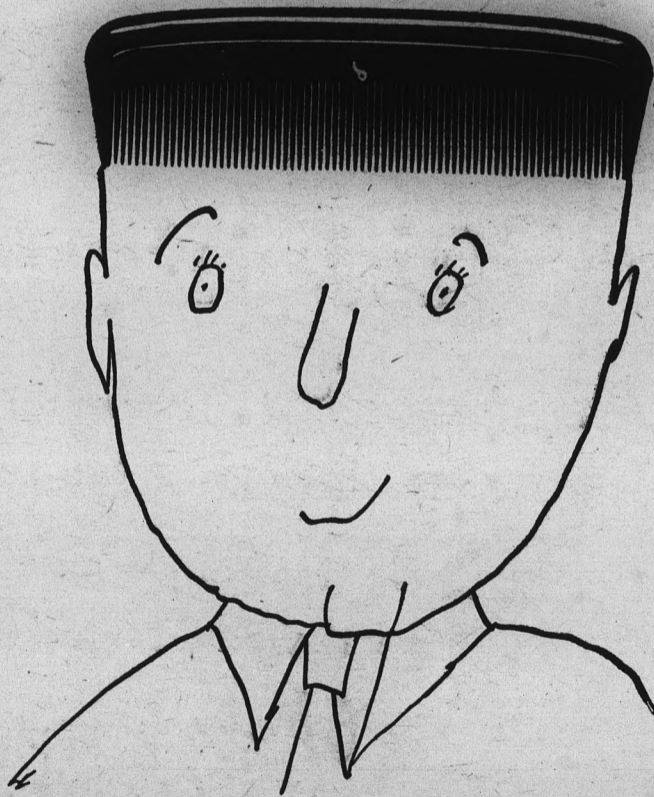

Saturday, Feb. 9

Basketball: Arizona (Frosh vs. Wildkittens) at Tempe

Wrestling: Utah at Salt Lake City

Track: Los Angeles Times Indoor Invitational

Swimming: Arizona and New Mexico at Tucson

Becker Paces Conference In Scoring, Floor Percentage

Art Becker, Sun Devil 6-8 Junior center, leads the Western Athletic Conference in three statistical categories according to the latest WAC release.

The ASU star leads the league in scoring, with a 23.3 average, field goal percentage with a scorching .593 and free throw shooting, with 23 of 26 charity tosses for an .885 percentage.

BECKER is also tied for third in rebounding, with 12.3 grabs per game.

Meanwhile Fred Collins, a 6-8 senior forward from Wyoming, has taken the rebounding lead with a 14.0 per game record. He is followed by teammate Randy Richardson with 12.7. Tied for third along with Becker are Sun Devil Tony Cerkvenik, plus Ira Harge of New Mexico and Bruce Burton of BYU.

Other scoring leaders are Burton and Flynn Robinson of Wyoming with a 21.7 average, Collins with a 21.5 average and rounding out the top five is Harge with 20.7.

SUN DEVILS Joe Caldwell and Dennis Dairman are sixth and eighth respectively with 15.8 and 12.8 averages.

Teamwise, BYU wrestled the

team offense lead away from ASU, and is now averaging 78.3 in three outings to the Devils' 77.3 in four.

JC Transfers Enroll At ASU

The football picture at ASU brightened today with the announcement that five prospects from California junior colleges have accepted athletic scholarships.

Assistant coach Gene Felker announced that the five athletes were: Frank Davidson, tackle, 6-5, 255, East Los Angeles City College; John Torok, quarterback, 6-1, 190, El Camino Junior College; Joe McDonald, end, 6-2, 205, Bakersfield Junior College; Frank Mitacek, tackle, 6-1, 235, Bakersfield Junior College; and Bill James, tackle, 6-1, 230, Long Beach City College.

DRIVING LAY-UP — Alan Schmelz, who enjoyed his finest night as a Sun Devil Monday night scoring 16 points on eight field goal attempts, is driving in for two of his total while New Mexico State Aggie Don Wiese tries to halt him. The Devils thrashed the Aggies, 89-62, to bring their record to 17-2. ASU hosts UofA Saturday at Sun Devil gym.

Photo by Larry Ward — State Press Photo

Devils Bash Aggies; Edge TWC Miners

By JOE HEATH

The ASU basketball team was as hot as its Sun Devil nickname Monday night as it trounced New Mexico State, 89-62.

The race horse type game was slowed somewhat by the 36 fouls called, 19 on the Devils.

THE HOME TEAM'S 61 per cent on floor shots in the first half gave them a 51-32 half-time advantage. The Aggies hit only 34 per cent for the first 20 minutes.

With 4:51 elapsed in the game, New Mexico had only managed one field goal against the pressuring Devil defense.

Much of the contest was played with reserves. Ten of the 11 Devils contributed to the 89 total points.

WITH LESS than five seconds gone off the clock, Joe Caldwell brought the crowd to its feet with a two-handed dunk shot.

For his next trick, Jumpin' Joe jammed another, followed by an encore of five blocked shots as the Aggies had to shoot and duck.

Four Devils hit the double figure column led by Art Becker's 19, 14 of these coming in the first half.

CALDWELL had 13 at the end of 20 minutes and ended the game with 17.

Denny Dairman was the other starter to rack the double fig-

ures, canning five field goals and a charity toss.

Alan Schmelz set the crowd on fire with a hot hand that burned the nets with eight field goals. The 16 point effort was his best single night performance of the season.

WILLIE BOOKER and David Brown led the Aggie scorers with 21 and 14 points respectively.

The victory marked the 200th career win for coach Ned Wulk and kept the Devils in the number five position on the United Press Poll.

The loss was number 13 in 15 attempts by the Aggies.

SATURDAY night ASU survived a last minute Texas Western rally to notch a 63-60 win.

With only 4:09 left in the game, Tony Cerkvnik's two free throws gave the Devils what appeared to be a comfortable 60-48 lead.

However, during the next four minutes, grey hairs were added to the brow of Ned Wulk as he saw the Miners outscore his club 10-2, and close the margin, 62-60.

BOBBY HOWARD'S one pointer with five seconds left ended the evening's scoring.

Western's 6-8 Jim Barnes lived on the foul line and led a good life, too, hitting 11 of 12 attempts. Eight field goals to go gave him high point hon-

ors for both teams with 27 points.

Becker led the Devils with 19 followed by Caldwell's 17.

It was the seventh time running that ASU has downed the Texans, the last victory coming by the same 63-60 score.

The Sun Devils now have a 17-2 record and have won 43 in a row at home. Saturday night they finish the first round of league action when they entertain the UofA.

Bufs Pick Four Devils On Team

Four ASU football players were picked on the all-opponent team just released at West Texas State College.

They were end Roger Locke, quarterback John Jacobs, half-back Charley Taylor and full-back Dornel Nelson.

The Sun Devils bowed to West Texas, 15-14, Oct. 13 at Tempe.

Sun Devil Facts

Two ASU spring sports open this weekend as part of the Devil track team will journey to Los Angeles for the L.A. Indoor Invitational while the swimming team opens in Tucson against the UofA and New Mexico.
