SUMMER SESSION

July 12, 1963

No. 4

Second Session May Draw 5,000

Approximately 5,000 students are expected to register for the second term of summer school, July 22 through August 24, according to Dr. Roy C. Rice, dean of summer sessions.

7,200 enrolled for classes during the first term.

Students now attending classes may pick up registration materials for the second term between 9 a.m. and 1 p.m. in the patio of the Social Sciences building Tuesday, Wednesday and Thursday, July 16, 17 and 18.

STUDENTS planning to enroll for the first time this summer may obtain registration materials on the second-term registration day, July 22, in the gymnasium annex.

Class cards will be distributed in the Engineering Center for courses in the College of Engineering Sciences; in the Business Administration building for courses in the College of Business Administration; in the Memorial Union ballroom for courses in the College of Edu-

cation, and in the Social Sciences building for courses in the College of Liberal Arts.

NIGHT registration for afternoon and evening classes will be conducted from 6 to 8 p.m. July 22 and 23, and late registration will be held July 23 through 25. Students may pick up registration materials for night classes and for late registration in the Registrar's Office.

Reservations for accommodations in the residence halls must be made with the university housing office. Rooms will be available for the second session on Sunday (July 22). Dining facilities are available in the Memorial Union.

Schedule for the summer sessions is arranged so that courses offered during regular session are offered during the summer session. This enables students to obtain courses needed to meet graduation or certification requirements. Most classes are scheduled to meet daily from 7 a.m. to 1:10 p.m. A full academic load during the summer is six semester hours per term.

THE SECOND term of the ASU summer session closes with final examination August 23 and 24.

The ASU summer session will close with a post session of five engineering courses, including civil, electrical and industrial engineering, each offering two hours of graduate or undergraduate level college credit, and one course in education, offering three hours of credit.

Stop, Go Caution?

To conform to national color code standards, curb no parking and limited parking areas are being repainted, according to Lt. Tom Godbehere of Campus Security.

No parking sections of curbing which are now painted red or yellow will all be red. Yellow sections will be reserved as commercial loading zones. Limited parking, 10 and 30 minute zones, will all be green as at present.

The re-painting is scheduled to be finished before the beginning of the fall semester.

Three New Professors Added To ASU Faculty

Dr. G. Homer Durham has named three new professors to the ASU faculty this fall.

Donald E. Brown, a member of the University of Illinois faculty since 1947, will join the department of mass communications.

DR. BROWN has been news editor of radio station WHO, Des Moines, Iowa, and has worked for the International News Service, the Des Moines Register and the Oskaloosa, La., Herald.

He has also lectured at the International Center for the Advanced Training of Journalists at the University of Strasbourg in France.

DR. HERBERT A. Van Scoy, co-author of several books on the Spanish language, has been

named professor of Spanish.

Dr. Van Scoy, professor of Romance Languages at the University of Alabama since 1951, has also taught at the University of Wisconsin, Princeton University and the U.S. Naval Academy.

He received his doctor of philosophy degree from Wisconsin.

DR. EDWARD E. Grace, who will join the ASU faculty as professor of mathematics, has been associate professor of mathematics at the University of Georgia.

He received his bachelor of science and doctor of philosophy degrees at the University of North Carolina and was an assistant professor of mathematics at Emory University, Atlanta, Ga., from 1956 to 1961.

Souvenirs

JUST BACK from a trip to Pakistan, Mrs. Loretta Hanner, Director of the ASU School of Nursing, admires souvenirs from her trip.

Scoular Chosen Auditorium Head

David B. Scoular, professor of music and chairman of the ASU Concert and Lecture series, has been appointed manager of the Grady Gammage Memorial Auditorium by President G. Homer Durham.

"Mr. Scoular's contribution in the world of music, as a performer and a teacher, is known both here and abroad," the president said, "and his years of experience in booking artists of international stature for the Concert and Lecture series qualify him eminently for the post."

HIS RESPONSIBILITIES as manager of the \$3 million audi-

torium, which is scheduled for completion in mid-1964, will include the scheduling and supervision of the entire program for the building. He will be assisted by an advisory council appointed by the president.

DAVID B. SCOLAR

torium, which is scheduled for completion in mid-1964, will include the scheduling and supervision of the entire program for the building. He will be assisted by an advisory council appointed by the president.

"The auditorium and all its facilities will be university-oriented to serve the needs of the entire university commu-

ity," Scoular said, "but it will also become a focal point for the cultural and educational growth of the entire southwest." "WHEN THE new auditorium is dedicated," Scoular said, there will be many special events scheduled. With that thought in mind, we are planning next winter's Concert and Lecture series, including a Festival of Arts in February, so that it will build to a climax with the dedication of the new building."

He has been an editor of choral music for major music companies, and is a member of Phi Mu Alpha and of Pi Kappa Lambda, both national music fraternities.

Two Professors Earn Doctorates

Two professors in the College of Engineering Sciences have earned Ph.D. degrees from institutions in California and Wisconsin this summer.

Donald A. Gyorgog, who joined the faculty in 1962, is an associate professor of engineering. He earned the doctorate from the University of Wisconsin.

Ronald Watson, who will join the faculty in the fall of this year, is an associate professor of engineering, who received his Ph.D. degree from the Cali-

Traineeship Meet Calls ASU Nurse

Mrs. Loretta Hanner, Director of the ASU School of Nursing, will participate in the Professional Traineeship Program in Washington, D.C., July 17-19.

The conference, called by Surgeon General Luther L. Terry of the U.S. Public Health Service, is designed to determine the effectiveness of the program in meeting the need for administrators, supervisors and teachers in nursing by providing financial aid.

Some 50 authorities on nursing, medicine, health and education will also consider modifications, limitations or extensions required to increase the programs effectiveness.

The program was established by Congress in 1956 and applies to nurses undertaking full-time academic study to prepare for leadership positions.

Since 1957, 287 nurses in Arizona have benefited from the program.

Meteor Samples Sent Worldwide

Researchers throughout the United States will soon receive samples from the world-famous Nininger Meteorite Collection at ASU.

Under an improved program supported by a two-year grant of \$28,978 from the National Aeronautics and Space Administration, samples of the largest meteorite in the world will be sent to researchers working on related NASA programs.

According to Dr. Carleton Moore, assistant professor of chemistry and collection director, "Meteorite samples are sent to many people working on NASA programs to provide better classifications and a better understanding of the fundamental properties of meteorites.

A researcher's work is only as good as the specimens he has to analyze," said Dr. Moore.

The Nininger collection, largest in the world, is used primarily as a research collection. Meteorites are of immediate interest because they have travelled from outer space through our atmosphere and their morphology and material properties are important in planning artificial vehicles to do the same thing.

ASU is eager to buy or trade for meteorite material. Ordinary meteorites, rocks from outer space, are worth about \$4 a pound.

Library Cards

Library cards can be issued only with a registration cashier's receipt, according to Frank A. Schneider, associate librarian.

Games Must Stop Says Author-Critic

By BOB REILLY

Allen (Advise and Consent) Drury told the audience in the MU ballroom Tuesday night that the childish and fatal game of "let's pretend" must come to an abrupt end, or, we as a free nation will perish.

"We have failed to look eye ball to eye ball with today's problems. We have surrendered to the optimistic view. Some believe that if we pretend long enough the reality of the world will be rosy instead of real. Our enemies aren't playing 'let's pretend' — they are playing for real," said the Pulitzer Prize winning author.

THE OUTSPOKEN critic said that he wasn't putting the blame entirely on the Kennedy Administration but on Americans as a whole. Too often, he said, the individuals who categorize our foreign policy in terms of war and peace have set the course of action.

But he, as an observer, believes there are other alternatives. Our greatest deterrent from all out war, he said, would come from a position of strength, not weakness.

To clarify his position Drury cited the Cuban situation. He said that when the United States acted from a position of strength last October it gained the respect of the world, including the Russians.

BUT ONCE AGAIN the prognosticators of the war or peace theory stepped in and the United States stopped short of its on sight inspection demand.

Drury pointed out that the only way we can be sure that all the missiles have been re-

moved from the Red infested island is to have on sight inspections. However, once again we have resigned ourselves to the optimistic, rose colored view.

The veteran political observer said that we must resort to our past actions when brave and noble men guided their countries destiny.

"WE SHOULD NEVER give an inch because the enemy will take a mile. We don't have to act from weakness. They (the Russians) don't want war anymore than we do."

Drury is preparing his third and fourth books of his projected tetralogy — "Capable of Honor" and "Preserve and Protect." The former will concern conventions and campaigns, and the latter will be about the opening days of the new administration.

Coconino Alums Honor Durhams

Dr. and Mrs. G. Homer Durham will be honored by the Coconino County chapter of the ASU alumni association during a "Meet the President" dinner at 7 p.m. Saturday at the Americana Hotel in Flagstaff.

President Durham will deliver an address on "The State of the University." Jim Creasman, executive secretary of the alumni association, will exhibit colored slides of campus scenes.

Among the special guests at the dinner will be Gilbert L. Cady, vice president for business affairs, and Tilman Crance, comptroller, ASU alumni.

Reservations for the dinner, which will be preceded by a social hour at 6:30 p.m., may be made with Mrs. James Babbitt, 516 W. Piute Rd., Flagstaff.

Journal To Publish Work By Montague

A paper by Dr. Gene B. Montague, ASU associate professor of English, has been selected for national publication in the October issue of "The

DR. MONTAGUE

Journal of the Conference on College Composition and Communication."

Entitled "The New Rhetoric of Literary Criticism," the paper was presented at the 1963 convention of the Conference on College Composition and Communication last March in Los Angeles.

It is one of seven chosen for national publication from over 100 papers delivered at the convention.

Dr. Montague is chairman of the Honors Council of the ASU College of Liberal Arts, and is author of numerous articles and two books, "Colloquium" and "Literature and Expression."

Music Camp Will End Saturday; Events Planned

A final-day program of dance recital, baton twirling, concerts, and art and craft display is scheduled Saturday by the 18th annual Arizona All-State High School Music Camp at ASU.

The program, to which all parents, friends, scholarship donors and the public are invited, will open at 1:30 p.m. with a dance performance and baton twirling exhibition in the Memorial Union ballroom.

A display of all the paintings, drawings, crafts and ceramics created by students may be viewed at 2:30 p.m. in room 218 of the Memorial Union.

A concert featuring the honors ensembles will be held at 3:15 p.m. in the ballroom, followed by dinner at Sahuaro

Hall from 5 to 6 p.m.

The final evening concert by band, orchestra and chorus will be at 7:30 p.m. in the Tempe Union High School auditorium. All camp awards and scholarships will be announced during the program.

Directors of the three week music camp are Mr. and Mrs. Miles A. Dresskell of the ASU music department faculty.

Researcher Wins Fourth Valley Fever Study Grant

The National Institutes of Health have renewed a grant for the fourth year of the study of valley fever, by ASU associate professor of microbiology Dr. William T. Northey.

The grant, valued at \$10,600 for the current year, is part of a five-year program of NIH grants valued at \$49,297.

Dr. Northey, whose field is immunology, has undertaken a five-year research program on valley fever, or coccidioidomycosis, to investigate the possibility of preparing a vaccine which would effectively prevent infections from coccidioides immitis, the causative organism in valley fever.

DR. NORTHEY'S research this year will expand into physiological studies, and will also incorporate the use of ASU's new electron microscope.

Until the past few years, the immunological aspects of combating the disease have been

virtually ignored, Dr. Northey says. He is studying the infection-causing organism as it occurs in two phases, the arthrospore or air borne stage outside the body, and the spherule stage which occurs inside the body. This conversion from arthrospore to spherule phase is reproduced in a laboratory jar, which is a tricky process.

While confined to a comparatively small part of the country (the lower Sonoran life zone of Arizona, California, New Mexico and Texas) valley fever is a major problem where it does occur.

MOST PERSONS who live in this region have had and recovered from valley fever; usually they just thought it was a chest cold or nagging cough, or felt terribly tired for a few weeks for no apparent reason.

Evidence shows that people who have once had the disease generally develop a solid immunity against it, indicating that a successful vaccine may be prepared which would immunize effectively.

First Session Finals Slow Down Events

The list of scheduled activities that have filled nearly every afternoon and evening during the past four weeks simmers down to only two events next week in cooperation with final exams Friday and Saturday.

A visit to the Arizona Maytag Zoo is planned Tuesday. Reservations must be made before noon on Monday at the MU information desk.

Admission charges will be \$1 for adults; children with adults free; and children alone 25 cents. Those participating are asked to meet at the information desk at 3 p.m. Tuesday.

Thursday at 7 p.m. there will be a trip to the American Heritage Wax Museum in Scottsdale, to see true life wax figures of the men and women who made this nation great.

Reservations must be made by noon on Wednesday at the

information desk. Group rates for the tour will be 90 cents for adults and 35 cents for children. Children under six will be admitted free.

Newman Dance

Newman Clubs of ASU and Phoenix College will sponsor a record dance Sunday from 8 p.m. to midnight in Stovall Hall at College Avenue and Eighth Street.

The party will be open to all students. Admission will be 50 cents and refreshments will be on sale.

Workshop

Dr. Ralph C. Hook, Jr., ASU professor of marketing and director of the Bureau of Business Services, is participating in a three-week workshop in research methods at Dartmouth College.

The workshop, which starts Monday is for university research administrators in business and economics. It is conducted by the University of Illinois Bureau of Economic and Business Research.
