

ACCUSED HERETIC — Bishop James Pike will hold a campus forum Friday followed by a series of lectures.

Bishop Pike Cometh

By VALERIE JONES
Campus Editor

Bishop James A. Pike, accused heretic and recently resigned Episcopal bishop of California, will arrive in Phoenix tomorrow night for a day-long campus visit Friday.

Bishop Pike will begin his schedule with a campus forum on the Mall from 8:30 a.m. to noon. He will answer students' questions between classes. Questions may be submitted in advance to the Religious Conference secretary in Danforth Chapel. Lectureship committee of the Religious Conference at the University is sponsoring the event.

AT NOON, "The University Professor as an Influence in the Decision Making Activity of Society," will be Bishop Pike's topic of discussion at a faculty luncheon in the MU ballroom. Attendance at the luncheon is open to students and the University community.

Reservations may be made at Danforth Chapel.

Bishop Pike will deliver a public lecture at 3 p.m. in Cosner Auditorium on "The Real Conflict Between Science and Religion."

"Rapid Cultural Change and the Crisis of the Church" will be the subject of another public lecture at 7:30 p.m. in Tempe Union High School Auditorium on Mill Ave. at Broadway.

AT 10:15 P.M., Bishop Pike will guest star on KAET-TV, "An Evening with Bishop Pike." Viewers are encouraged to call the station with questions they may wish to direct to Bishop Pike. The phone number is 966-3506.

Bishop Pike has been accused of heresy because of his views on the Christian doctrine. He says large portions of Christian doctrine have become antiquated in the light of modern scientific and secular culture.

The idea of the Trinity for example, a fifth century concept couched in terms of Greek philosophy, not only is largely incomprehensible to many in the present day, he said, but would have been equally incomprehensible to Jesus, St. Paul, and the apostles.

"WHAT WE need are fewer beliefs and more belief," he said.

Bishop Pike is presently working with the Center for the Study of Democratic Institutions in Santa Barbara, Calif.

Durham Cites ASU Needs; Money to Match Maturity

By DICK GAZI

President Durham said at a press conference yesterday the University needs funds to match its maturation.

"We're in the process of moving from an undergraduate uni-

versity to a highly complex undergraduate and graduate university," he said, illustrating with the statement that the University granted 52 doctorate degrees last year.

"We'll be among the top uni-

versities in the country in five years," said Dr. Durham. "The University is now among the 100 schools that confer 75 per cent of the degrees issued in this country."

HE ALSO said the library is the most important building on campus: "We've built the building, now we need the content." He added the student's will and determination plus the library's capacity will produce the superior student.

A survey by Dr. Alan Covey, University librarian, showed there were 26 books per student here in 1963-64. This was in contrast to the 91 per student at the

(Continued on page 6)

Fred Waring, His Pennsylvanians Perform Tomorrow at Gammage

Admirers of Fred Waring's music will have a chance to hear it presented by the showman - musician and his Pennsylvanians at Gammage Auditorium tomorrow.

A Celebrity Series event, the 8:15 p.m. program will feature an entertaining panorama of music and comedy. Tickets are on sale at the Gammage box office, 966-3437.

Conceived and produced by Waring, who currently is celebrating his 50th anniversary in show business, the performance will include solos, choral comedy, skits and orchestral numbers.

In his "first fifty years" as maestro of the Pennsylvanians, Waring has guided his singers

and musicians through a series of "firsts."

He was the first to present an orchestra and chorus in elaborate stage productions, the first to mix secular and sacred music in the same program. The Pennsylvanians were the first vocal group to have their own radio show, the first vocal group to be featured on records, and the first to record a rumba.

Featured in the first all-musical sound picture, "Synco-pation," the Pennsylvanians were also the first musical organization — full orchestra and chorus — to be televised, starting in an hour - long weekly Sunday night series.

Waring believes in keeping a finger on the popular pulse, giving people what they want. "I remember the rage for rag-time, boogie-woogie, be-bop," he says. "Now it's folk music, rock 'n' roll and novelty songs. We've run the gamut of every style. Sometimes we laugh it up, sometimes we play it straight. The main thing is to mix the moods and keep them changing fast to make for an exciting show."

DIAMOND JUBILEE —

Founders Dinner to Honor Veteran Regent O. D. Miller

O. D. Miller, member of the Board of Regents for eight years, will be honored at ASU's Founders Day Dinner Feb. 8, at 7:30 p.m. in the MU ballroom.

Miller will receive the University's Diamond of Distinction Award which honors distinguished achievement. A former state senator, he was appointed to his eight-year term on the Board of Regents in 1959 and retired at the end of 1966.

The award, presented by the ASU Alumni Association on behalf of the University, its faculty, students, and alumni, will cite Miller's outstanding service to higher education.

The dinner, to be held in the MU ballroom, will feature a speech by Jim Creasman, executive secretary of the Alumni Association. He has served the past two and a half years as chief of party for a Brazil Peace Corps project administered by ASU.

Creasman will speak about ASU's role in international education, with highlights of his Peace Corps service, illustrated with slides of the project people and area.

The event, which celebrates the 81st anniversary of the opening of classes, is open to alumni and the general public. Reservations may be made by contacting the Alumni House.

Scholastic Honorary Society Initiates New Members Here

Phi Kappa Phi, national honorary scholastic society, has initiated 68 new members on campus.

Phi Kappa Phi is similar to Phi Beta Kappa, differing in that all colleges are eligible, not just liberal arts colleges. Scholastic requirements are a 3.75 grade average for juniors, 3.5 for seniors and 3.5 in both graduate and undergraduate work for graduate students.

New inductees included juniors: Virginia M. Hyde, Nancy A. Kryder, Marjorie B. Neumann, Viola M. Seavy and Paul R. Willemsen.

Seniors: Jana L. Allred, Elvie D. Anderson, Robert F. Brunn, Gale R. Bryce, Susan

A. Burke, Susan E. Burke, Gay K. Burnidge, Ann E. Christoph, Darrit S. Cox, Mary E. Cromwell, Sue L. Daniel, Jon M. Engelhardt, Barbara K. Ferguson, John C. Fletcher, Barbara A. Forrest, Conrad F. Fritsch, Olive W. Gambrell, Helen Gries, Richard A. Hardin and Hiram F. Herrick.

Also, Janet L. Hooper, Arline M. Ivey, Roberta N. James, Jacqueline E. Jenks, James K. Kerley, Robert D. Kerwin, Reldykin J. Kreindler, Judy R. Lawrence, Paula A. Leahy, Barbara B. Lee, Kenneth A. Leusing, Hugh A. Lindsey, Paul E. McClellan, Louise B. McHenry, Roseann Mulli-

gan, Dennis R. Murphy, Stanley W. Perril, Thomas T. Phillips and Anne Pritsker.

Also, Robert J. Pultz, Ronald H. Rash, Judith L. Ravenscroft, Robert L. Riedenauer, Phillip E. Sanders, Janet M. Schwanke, Lois M. Shandor, Jimmie Frances Shearwood, Bonnie G. Sitek, Volker K. Sonntag, Nancy L. Thomas, Ronald L. Thomas, Charlotte A. Triplett, Patricia A. Valentine, Charlene Walrad, Gary J. Walter, William E. Whitehead, Charles R. Wise, Olga M. Wood and Doris E. Woods.

Faculty: Someshwar C. Gupta, Loretta A. Hanner, Idelle B. Lee and Elliot S. Palais.

Air of Phoenix Art Museum Adds To Weekly American Art Course

An opportunity to study American art in the appropriate atmosphere of the Phoenix Art Museum will be available this semester.

The Extension Division and the Phoenix Art Museum are sponsoring an undergraduate course in American art which will meet once a week at 6:15 p.m. in the museum auditorium, beginning today.

The class, which will enable students to increase their knowledge of both American art and the art museum, will be conducted by Jack Breckenridge, associate professor of art.

By successfully completing the course, a student may earn three semester hours of undergraduate credit, but the class is also open to those who are not interested in college credit and wish to "audit" the course. Registration will be held at

the first class meeting today. Fee for the course is \$36.

Complete details about the course may be obtained from the Extension Division or at the Phoenix Art Museum.

Guide Issued For Teachers

Dr. Joseph S. Littrell of the industrial education faculty is the author of a recently published book, "Guide to Industrial Arts Teaching."

The book, aimed at student teachers, "poses problem situations based on teaching principles and teaching techniques as they would apply to industrial education," said Dr. Littrell.

Dr. Littrell feels his book is unique because most of the material in it consists of problems encountered by industrial arts instructors in Arizona.

Army Chief Commends Detachment

The chief of staff of the U. S. Army has commended the department of military science on campus for its support of the officer training program.

In a letter of commendation addressed to Col. Coy L. Curtis, professor of military science, Gen. Harold K. Johnson states:

"The high percentage of your last year's graduates who decided to enter the military profession, which is more than three times the national average, indicates an outstanding performance of duty by your detachment. I commend you for a job well done.

"THE CADETS were obviously inspired by the exceptional professional competence of the officers and enlisted men of your detachment as well as by

their satisfaction in a public service career."

Commenting, Gen. Paul L. Freeman Jr., commander of the U. S. Continental Army Command, Ft. Monroe, Va., has notified Col. Curtis that "it is a pleasure to note the complimentary remarks contained in Gen. Johnson's letter. My appreciation is added for the outstanding performance which merited this recognition."

"Highly pleased to note the complimentary remarks," Lt. Gen. J. L. Richardson, commander of the Sixth U. S. Army, Presidio, San Francisco, has added "my appreciation for the outstanding performance of duty which merited this recognition to you and the members of your detachment."

COL. CURTIS, who served as a battalion commander and division artillery commander in Europe during World War II and as executive officer of an infantry division in Korea in 1954, was the professor of military science here when the first unit was organized on campus in 1948.

"This commendation," said Col. Curtis, "is indicative of the warm support given to the Army ROTC program at ASU by the students and faculty of the University and the community as well as the performance of our staff."

University Awarded Grants; Funds

The University has been awarded \$659,484.20 in contracts, grants, scholarship funds and miscellaneous gifts since Dec. 17, says President Durham.

The total includes \$565,997 in grants; \$13,830 in contracts; \$12,674.98 in scholarship funds; and gifts of \$66,982.22.

Largest of the grants are construction awards of \$98,091 for a home economics structure and \$329,300 for an education building, both from the U. S. Office of Education, under provisions of the Higher Education Facilities Act.

With the exception of a \$41,300 grant from the National Science

Foundation supporting a summer institute in mathematics for high school teachers, directed by Dr. Lehi T. Smith, associate professor of mathematics, the grants support a variety of research projects including:

National Institute of Mental Health investigation, \$24,135, conducted by Dr. Thom Verhave, professor of psychology; National Institutes of Health project, \$30,949, Dr. George R.

Pettit, professor of chemistry; NSF, \$18,400, with Dr. Theodore M. Brown, assistant professor of chemistry, as chief investigator; and an NIH investigation of "Conditional Cardiovascular Responses," \$16,110, directed by Dr. Eugene M. Taylor, assistant professor of psychology.

A \$12,965 contract with the National Aeronautics and Space Administration supports a project, "Experimental Measure-

ments Using the Laser Doppler Velocity Instrument," conducted by Dr. Earl Logan Jr., associate professor of mechanical engineering, and a \$7,722 grant from the Atomic Energy Commission is for the acquisition of equipment for teaching in nuclear technology as applied to engineering, under the direction of Dr. John F. Bregar, associate professor of mechanical engineering.

Physics Doctors Attending Meet

Three University assistant professors of physics are participating in meetings of the American Physical Society in New York this week.

Dr. Richard J. Jacob, Dr. Akbar Ahmadzadeh and Dr. Pao Lu are attending the sessions which began Monday and end tomorrow.

The physicists will present two papers.

HOUSMAN . . . MOSTLY
'tis Jeeling, dancing, drinking
Spins the heavy world around
If young hearts were
not so clever,
They'd be young forever
Think no more; 'tis thinking
That brings youth to ground
The thoughts of others
Were light and fleeting
Of lovers meeting
or luck or fame;
Mine were of trouble
And mine were steady,
So I was ready
When trouble came.

DEFENDOR!
WATCH FOR THE WORD

What kind of engineer will you be... preliminary design, design, development? At AiResearch Phoenix, you work as all three before you decide.

Your future as an engineer is strongly influenced by your first assignment. What that assignment will be, should be, is an important decision.

At Garrett you control that decision. During an eight-month orientation program, you work with experienced engineers on a variety of assignments in different areas. Your permanent assignment depends on your own aptitude and interest.

In *preliminary design* you may work on gas turbine engines, jet engine starters, or advanced power systems for space vehicles. Analysis is the key—and the emphasis is on thermodynamics, fluids, vibration, heat transfer, and math to solve today's problems.

As a *design engineer*, you see your solution to a product design problem take shape on the drawing board and in fabrication. You

may work on controls systems for turbine drives, engine fuel systems, or a laboratory test system. Mechanics is the theme—statics and dynamics, materials and processes, and graphics are your tools.

In *development*, you'll test designs before they go into production. Manufacturing processes are examined and production techniques are explored. Everything from nuts and bolts to complete power systems are tested, and your lab work and practical judgement will pay off in this area.

Your career at AiResearch Phoenix can be stimulating and

rewarding. You can work in all three important areas of engineering on diverse aerospace products. You can use your total education, learn more on top of it, and take part in a wide variety of advanced engineering.

At AiResearch Phoenix, the product lines include gas turbines for auxiliary power, turboprop engines for business and military aircraft, secondary power equipment for aircraft, advanced space vehicle nuclear power systems, pneumatic and hydraulic control systems, as well as a variety of related equipment for aerospace, ground, and undersea applications.

Find out the whole story in our new booklet, *Your Future at Garrett*. Get it from your campus placement office, or write AiResearch Manufacturing Division, 402 South 36th Street, Phoenix, Arizona 85034.

SOS REPORT TEXT

This is the second part of a serialization of the text of the blue ribbon Student Organization Study Committee which was appointed by President Durham to study student academic freedom at ASU. The report has been forward to the president by the Faculty Senate with its "general approval of the substance and direction" of the report.

III. Student Affairs

In student affairs, certain standards must be maintained if the academic freedom of students is to be preserved.

A. Freedom from Arbitrary Discrimination. The University should be open to all students who are academically qualified. Its facilities and services should be open to all students, and the institution should use its influence to secure equal access for all students to public facilities in the local community.

B. Student Participation in Institutional Government. As constituents of the academic community, students should be free, individually and collectively, to express their views on issues of institutional policy and on matters of general interest to the student body. The student body should have clearly defined means to participate in the formulation and application of regulations affecting student affairs. Student government should be protected from arbitrary intervention.

C. Student Publications. Student publications and the student press are valuable aids in establishing and maintaining an atmosphere of free and responsible discussion and of intellectual exploration on the campus. They are a means of bringing student concerns to the attention of the faculty and the institutional authorities and of formulating student opinion on various issues on the campus and in the world at large. They also represent the institution to the public.

1. The student press should be free of censorship or advance approval of copy, and its editors and managers should be free to develop their own editorial policies and news coverage.

2. The integrity and responsibility of student publications should be encouraged by arrangements which permit financial autonomy or, ideally, complete financial independence. Implicit in this statement is the assumption that a student publication, as any publication, has a responsibility to those who provide its financial support.

3. In the academic community where libel, indecency, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo are especially inappropriate, editors and managers have a special responsibility to be governed by canons of responsible journalism. At the same time, they should be protected from arbitrary suspension and removal because of student, faculty, administrative, or public disapproval of editorial policy or content. Only for proper and stated causes should editors and managers be subject to removal and then by orderly and prescribed procedures.

IV. Standards In Disciplinary Proceedings

The disciplinary powers of educational institutions are inherent in their responsibility to protect their educational purpose through the regulation of the use of their facilities and through the setting of standards of conduct and scholarship for the students who attend them. In developing responsible student conduct, disciplinary proceedings play a role substantially secondary to counseling, guidance, admonition, and example. In the exceptional circumstances when these preferred means fail to resolve problems of student conduct, proper procedural safeguards should be observed to protect the student from the unfair imposition of serious penalties.

A. Standards of Conduct Expected of Students. The institution has an obligation to define these standards of behavior which it considers essential to its educational mission and its community life. These general behavioral expectations and the resultant regulations which delineate specific codes of conduct should serve a valid interest of the institution. They should represent a reasonable control over the student who should be as free as possible from imposed limitations which have no direct relevance to his education. Offenses should be as clearly defined as possible, and such vague phrases as "standards of conduct generally accepted

in an academic community," "undesirable conduct," or "conduct injurious to the best interests of the institution" should be avoided. Disciplinary proceedings should be instituted only for violations of standards of conduct defined in advance and published through such means as a student handbook or a generally available body of university regulations.

B. Investigation of Student Conduct.

1. Except under emergency circumstances, premises occupied by students and the personal possessions of students should not be searched unless appropriate authorization has been obtained.

(Continued on page 8)

New Aviation Center In School's Future?

The feasibility of an aviation training center partially located at the University was the subject of a conference of aircraft company executives on the campus recently.

They discussed the possibility of having such a center co-sited here, at the Litchfield Naval Air Facility and at a section of the Gila River Indian Reservation near Chandler.

THROUGH private aircraft company subsidies, the sites would be established to provide academic and technical training of pilots and mechanics.

Walter F. Burdette, professor of industrial education, said, "If an aviation training center is established as a result of the feasibility study, it is hoped that a computer-aided learning program would permit the training of a greater number of students more efficiently within a fixed period than is possible with current methods and facilities."

Mayor George Nadar of Chandler said that city plans

to offer the University an 80-acre section of land one and one-half miles from the proposed Indian reservation site for a satellite campus serving eastern Maricopa County.

"SUCH A satellite campus could be used for the academic program of the aviation center, but this is immaterial to the offer," said Nadar.

Since the 580-square-mile Indian reservation site is an Economic Development Administration development area, Nadar said, "It seems a good place to invest money on new, modern equipment."

The Lone Butte Industrial Development Corp., headed by Nadar, is working to strengthen the economy of the reservation.

'Fashion '67' Slated Saturday

Styles ranging from sports and campus wear through more formal attire will highlight "Fashion '67," a spring fashion show to be presented Saturday at 3 p.m. by the pledge class of Chi Omega sorority.

Miss Claudia Brooks will comment on the spring fashions modeled in the tea room at Diamond's in Thomas Mall.

A \$1 donation will be charged for the event open to students, alumnae and the public. Refreshments will be served.

STATE PRESS is published by Arizona State University as the official campus newspaper every Tuesday through Friday during the school year, except holidays and examination periods, and is entered as second class matter at Tempe, Arizona, 85281.

Taylor Will Give 1st Return Report On Vietnam Here

"Vietnam in Perspective," the first public address by Gen. Maxwell D. Taylor following his return from a special mission in South Vietnam for Pres. Johnson, will be presented Feb. 10 at Gammage Auditorium.

The lecture will begin at 8:15 p.m. General admission tickets are available at Gammage box office or may be purchased the

General Taylor

night of the address. Tickets are \$1.

Gen. Taylor, who served under Pres. Kennedy as White House adviser in 1961, also served as chairman of the Joint Chiefs of Staff and as ambassador to South Vietnam. Prior to this, he was director of the Lincoln Center for the Performing Arts in New York.

His mission in Vietnam involved assessing the progress of the war for Pres. Johnson.

Fraternity Rushees' Rush Week Scheduled by IFC

Fraternity Spring Rush has been scheduled for February 11 through February 17, announced Interfraternity Council Rush Chairman, Jerry Whitted.

Students planning to participate in Spring Rush can sign up in the IFC office, MU 225, or at either of the campus booths, located on the Mall in front of the Social Sciences Building and on the Administration Building lawn. A \$3 fee will be charged.

KICKING OFF the rush will be a Rushee Orientation Assembly in room 203 of the Business Administration Building, Feb. 11 at 10 a.m. All rushees are required to attend. Afterwards, the rushees will go to the Adelphi Drive and off-campus

open houses from noon until 6 p.m. The following day, the Alpha Drive fraternities will open their houses to the group.

The remainder of rush week is unstructured, leaving the rushee free to go to smokers and preference parties with no restricting time limits.

Final preference parties will be Wednesday and Thursday nights, with the rushees picking up their final pledge bid cards Feb. 17 in the IFC office from 1 to 5 p.m.

Today Clubs

10 a.m. Young Americans for Reagan press conference will be held at the Saratoga Room, Hotel Westward Ho.

7:30 p.m. La Liga Panamerican will meet in MU 213 to discuss Feb. 24 dance.

8 p.m. Snow Devils will hold a business meeting at the Tempe Village Inn.

Sports

Bowling Tournament continues in MU games room.

Fine Arts

8:15 p.m. The Faculty Chamber Music Society will present a program in the MU ballroom. Students and faculty are invited. Tickets may be obtained at the door.

Young Singers of professional calibre may now enter the 1967 San Francisco opera auditions. Applications may be obtained from Evelyn E. Taylor, 923 W. Catalina Dr., Phoenix. The auditions are open to women between the ages of 20 and 32 and men between 22 and 34.

Students may exchange their Celebrity Series coupons for tickets to the hit Broadway comedy "Luv" today through Feb. 10. The play will be presented in Gammage Auditorium Feb. 17.

Students holding Celebrity

Series coupons get first preference for available seats. After Feb. 10, tickets will go on general sale.

Television

9 p.m. KAET (Channel 8) "In My Opinion" will feature Arthur Krock, one of America's most outstanding newspapermen. Krock recently retired after more than 50 years in newspaper work. He won the Pulitzer Prize in 1935 for his interpretive articles on the Washington scene and for his exclusive and revealing interview with President Franklin D. Roosevelt in 1938.

9:30 p.m. KAET, (Channel 8) "Your Dollar's Worth," a consumer's report, will include the testing of new cars on a race track in Lime Rock, Conn., and the Lawrence E. Crooks Automotive Center.

Chief automotive consultant of Consumer's Union, Bob Knoll, discusses evaluations of 10 automobiles. The cars involved are Pontiac Catalina, Buick Special, Ford, Galaxy, Chevrolet Impala and Chevelle, American Motors Ambassador and Rambler Rebel.

10 p.m. KAET (Channel 8) Hospital wards, classrooms and laboratories are visited on "Face of Excellence."

The documentary on the "Spectrum" series takes a seaching look at the education of a doctor.

Viewers will see teacher-scientists who are charged with the responsibility of preparing their students to be good scientists, intellectually curious, and to pursue scientific truth at the same time they are making moral decisions.

The film was produced by

Harvard Medical School and edited by N.E.T. for television.

Tomorrow Sports

Bowling Tournament continues in MU games room.

Entry forms for WRA Co-rec Volleyball are available in the WRA office and are due today. The events are open to both male and female students.

Lectures

Bishop James A. Pike will be on campus between classes in the morning hours to respond to questions. Questions may be submitted in writing to the Religious Conference secretary in Danforth Chapel.

A public lecture will be conducted at 3 p.m. by Bishop Pike in Cosner Auditorium, and an-

other at 7:30 p.m. at Tempe Union High School, Mill Ave. at Broadway in Tempe.

At 10:15 KAET Channel 8 will present "An Evening With Bishop Pike."

Clubs

11:30 a.m. IEEE will meet in EC C150 for a film, "The USA EPG Story," and to hear a speaker from Fort Huachuca.

LECTURES

7:30 p.m. Clarence Robison, track coach from Brigham Young University, will speak at the L.D.S. Institute of Religion, 947 McAllister. He will discuss "The Word of Wisdom and Athletics."

In the late 1940's, Robison set Skyline Conference records in the mile and the two mile run. His own track career was climaxed with a berth on the 1948 Olympic Team.

BILL OLDAKOWSKI

(B.S. Industrial Admin.) of the Bethlehem Steel Loop Course knows where the action is. He's on the move at our big, bustling Lackawanna Plant, near Buffalo, N.Y.

Join the action. First step: pick up a copy of "Careers with Bethlehem Steel and the Loop Course" at your placement office. Then sign up for a campus interview. Our 1967 Loop Class has openings for technical and non-technical graduates (and post-grads) for careers in steel operations, research, sales, mining, accounting, and other activities.

An Equal Opportunity Employer in the Plans for Progress Program

A better idea never came out of a crystal ball

At Ford Motor Company we're always looking for better ideas. But not with a crystal ball.

We do it with background and brain.

We do it by seeking answers for down-to-earth questions such as: Should a profitable central city dealership be relocated to a growing suburban location? What's the sales potential for a new personal car?

And we do it by trying to solve problems that haven't been faced till now. Problems such as: Is an electric car the answer to city traffic? How will people travel in the year 2000?

In short, our better ideas come from better people. And we take extra steps to get them. Ford Motor Company has a College Graduate Program

which provides immediate opportunities for individual development. In our rotational assignment system graduates are assured broad training and constant visibility to management. Right now, new products, new marketing programs, new subsidiary operations here and abroad are creating new jobs. One could be yours.

For more information, write our College Recruiting Department. Or better yet, schedule an appointment through your placement office to talk with our representative. He'll be on campus soon—looking for better people with better ideas.

THE AMERICAN ROAD • DEARBORN, MICHIGAN • AN EQUAL OPPORTUNITY EMPLOYER

ASU's Needs

(Continued from page 1)

University of Oregon, 56 at the UofA, 89 at the University of Iowa and 58 at the University of Georgia.

Dr. Durham said the University has asked the legislature for an operational budget of \$15 million, an increase of \$3.7 million over last year. Operational expenses—faculty salaries, lighting and heating expenses among others — thus would average \$814 per full-time student.

In comparison, the full-time student operations appropriation at the University of California is \$2,649 and at the University of New Mexico \$1,017.

Champs from 20 Universities to Vie In Games Room

The MU games room will host competition between 20 universities as players battle for regional honors in six events of the Association of College Unions - International Regional Games Tournament, Feb. 9-11.

Several hundred contestants are expected to vie in chess, bridge, table tennis, billiards, bowling and straight pool.

Representing ASU in bridge will be Bill Vaughn, Ron Thompson, Stewart Higley and Al Hrich. Chess champs are John Wallace, Richard Mann, John Lentini and Gary Faupel.

One of the individual duels will be ASU's Ferenc Mercz, reigning Phoenix table tennis champ, against state champion Norm Schwartz from the University of Arizona.

The winner could be in a good position for future Olympic consideration, according to Jack Rogoff, spokesman for the games room.

ASU's three-cushion billiard champ is George Laibe with Scott C. Smith tops in straight pool.

The campus bowling tournament is now underway and the results will not be known until tomorrow night. ASU's top five men and women bowlers will be chosen on the basis of a final three game series.

HE HAS also asked for \$8.7 million to cover building expenses. Dr. Durham said this would cover eight building projects and the additional acquisition of land.

Anticipated projects include a psychology and anthropology building, a botany and zoology building, two lecture halls, 25-ton refrigeration increase, remodeling of the Fine Arts Building and Matthews Center, extension of the Mall and the first phase of the physical education facility.

Gold-Silver Set for Gala Faculty Ball

The Gold and Silver Ball, sponsored by the Faculty Wives Club for the faculty wives, their husbands and guests will be Saturday at Mountain Shadows, Scottsdale.

Committee members, headed by Mrs. Francis G. Yale, chairman, are formulating plans and making decorations.

The decor will be carried out in the gold table linens, gold uniforms of the waiters and waitresses, and gold lame-draped head table, graced with ornate silver candelabra.

Sorority Rush Application Ready

Women students interested in joining the sorority this spring may pick up applications in the office of the associate dean of women.

Mary Thompson, rush chairman for Panhellenic Council, encourages all women students enrolled in the University to sign up if they meet the requirement of a 2.2 grade average from the last semester. No registration fee will be charged. Informal rush will begin immediately and end the last of April.

"It is beneficial for girls to go through informal rush, because they become better acquainted with the sororities and the sorority women within them," said Miss Thompson.

Split Vote Drops SDS Charges Concerning 'Olaf' Distribution

Charges against two members of Students for a Democratic Society for distribution of an e. e. cummings poem were dismissed Jan. 6 by a split vote of the Disciplinary Committee.

Charges had been brought against John Livingston and John Dillon for distribution of "i sing of Olaf," by e. e. cummings against the advisement of Dean of Students George Hamm. The committee dismissed the charges with the proviso that their action "should not be construed as the endorsement" of the distributor.

Livingston and Dillon had been charged with violation of rule eight of the General Catalogue of the University.

"This is a two-fold problem. First, it concerns the involvement of distributing literature

on campus without following established procedure.

"Secondly, it involves the questionable judgment of those concerned in terms of the type of material distributed. When the dean of students receives numerous complaints regarding any alleged violation of University policy, it is our responsibility to refer the matter to the appropriate University committee for their consideration. This has been done."

CAREERS IN STEEL

Our representative will be on campus

February 10

to interview undergraduate and graduate candidates for Bethlehem's '67 Loop Course —our highly regarded management training program

OPPORTUNITIES are available in steel plant operations, sales, research, mining, accounting, and other activities.

DEGREES required are mechanical, metallurgical, electrical, chemical, industrial, civil, mining, and other engineering specialties; also chemistry, physics, mathematics, business administration, accounting and liberal arts.

If you would like to discuss your career interest with a Bethlehem representative, see your placement officer to arrange for an interview appointment.

An Equal Opportunity Employer in the Plans for Progress Program

BETHLEHEM STEEL

You will be **AUTONOMOUS** and **AUTOCHTHONOUS**.
 Your rewards will be **AURIFEROUS**.
 You will have the opportunity for intellectual **ALLOGAMY**.

Renaissance types are definitely welcome at Philco! We need scientists, mathematicians and engineers . . . dreamers and do-ers . . . to help direct the world wide efforts that have made us a major company fast approaching \$1 billion in annual sales to consumer, industrial and government markets. We are a major subsidiary of Ford Motor Company. We have 10 divisions whose diverse interests range from exploring the moon to educating future leaders in depressed countries . . . from Automated Biological Laboratories to advanced systems of communications . . . from radios to radar.

If you are interested in a fast-paced, truly rewarding career with a fast-growing company, we'd like to talk to you. We will be visiting your campus on February 2. Contact your Placement Office. Stop by and talk to us about the future, or write to College Relations, Philco Corporation, C and Tioga Streets, Philadelphia, Pa. 19134.

PHILCO WILL BE HERE ON FEBRUARY 2

Career opportunities available on the East Coast, the Midwest, the Southwest, the West Coast, and throughout the world.

Divisions: Aeronutronic • Appliance • Communications & Electronics • Consumer Electronics • International • Lansdale • Microelectronics • Sales & Distribution • TechRep • Western Development Laboratories

PHILCO  AN EQUAL OPPORTUNITY EMPLOYER M/F

Only B's for Grappler Aces

"I feel like a student," said wrestling coach Ted Bredehoft, "who got a B in a course when he knows he should have gotten

an A." This was the feeling of the grappling mentor yesterday, three days after his squad had

taken a second place to Oklahoma State in the Sun Devil Invitational Wrestling Classic.

Bredehoft called 123-pounder Glenn McMinn's loss in the final round a "never-should-have-happened" thing.

To add to the coach's irony was the fact that James Lambson at 130 beat Oklahoma State's Jimmerson in the first round, a Cowboy who was picked to win his weight class. But then Lambson couldn't even make it into the finals.

Bredehoft also expressed surprise at the weak showing by Utah. The Utes finished with 29 points in the tourney.

Through the season the Devil grapplers are 4-1 in dual meets, including victories over Mankato State, UofA, Colorado State and the UNM. Only Western Colorado State has bested the Devils in dual competition.

PERISHES OPPONENT — Gene Parrish tries to drive his opponet through the mat in second-period action in the final round Saturday night.

Another Coach Leaves Devils

Last week the University lost its second football assistant in less than a month when back-field coach Paul Kemp left to take a similar position at Iowa State.

Kemp's resignation, coupled with that of offensive line coach Jack Stovall, leaves head coach Frank Kush with two staff spots to fill before the start of spring practice later this month.

Kush, recently returned from a recruiting trip in the East, has stated that rather than make a rush decision and possibly hire the wrong man, he will postpone spring practice in order to be sure of getting the people he wants.

Stovall, an alumnus of ASU and a three-year veteran of the staff, left to join his father in the used car business.

Kemp's loss will also be a sore one. He joined the staff nine years ago and was widely credited with playing a large part in the development of such backs as Charlie Taylor and Tony Lorick.

Look into our future and yours

At Ford Motor Company, the electric car, computerized teaching machines, and artificial limbs controlled by the brain are much more than hazy visions. And the man who can help us with these and other better ideas has a real future here.

If your major is arts, science or business. If thinking ahead is one of your skills. See your placement office now and make a date to meet the representative from Ford Motor Company.

special report

Computers Do The Walking For 9,000+

Over 9,000 Sun Devils avoided the January rush and long lines of walk-through registration by letting computers do the walking for them.

Of the 12,775 students who turned in course request cards during pre-registration last fall, 9,202 received completed schedules and 3,553 received partially completed schedules.

Alfred Thomas, Jr., registrar and director of admissions, reported that only 180 course request cards were not processed due to errors which could not be reconciled because students could not be reached to determine what was requested.

MORE ABOUT —

SOS

(Continued from page 4)

For premises such as dormitories controlled by the institution, an appropriate and responsible authority should be designated to whom application should be made before a search is conducted. The application should specify the reason for the search and the objects or information sought. The student should be present, if possible, during the search. For premises not controlled by the institution, the ordinary requirements for lawful search should be followed.

2. Students detected or arrested in the course of serious violations of institutional regulations, or infractions of ordinary law, should be informed of their rights. No form of harassment should be used by institutional representatives to coerce admissions of guilt or information about conduct of other suspected persons.

C. Status of Student Pending Final Action. Pending action on charges brought against a student by University or public officials, the status of a student should not be altered, or his right to be present on the campus and to attend classes suspended, except for reasons relating to his physical or emotional safety and well-being, or for reasons relating to the safety of students, faculty, or University property.

D. Hearing Committee Procedures. The disciplinary processes should be such as to guarantee fundamental "fair play" to the accused student. In all situations this requires that the student be informed, in writing, of the charges against him, that he be given a fair opportunity to refute them and that the institution not be arbitrary in its action. The jurisdictions of faculty or student judicial bodies, the disciplinary responsibilities of institutional officials and the regular disciplinary procedures, including the student's right to appeal a decision, should be clearly formulated and communicated in advance. The formality of the procedures required to guarantee "fair play" may vary with the degree of personalization in the relationship between the student and the institutional officials, with the gravity of the offense, and with the sanctions which may be applied; minor penalties may be assessed informally under prescribed procedures. If a student questions the fairness of disciplinary action taken against him and the misconduct may result in serious penalties, he should be granted the privilege of a hearing before the University Discipline Committee.
