

Metadata for Appendix A: List of Food Plants and Congeners Excel Spreadsheet

Files found within Flower.Appendix.A.Plant.List.xlsx.

Description

Excel file containing list of food plants and congeners used in the R/P analysis. This Excel file was created by Carolyn Flower in December 2018. Contains the following information:

Family	The family taxonomic rank of the species.
Genus	The genus taxonomic rank of the species.
SD_Food_Species	The food plant species.
Species_Name	The species name of the congener being compared to the food plant species.
Type	How the species was categorized. Each food plant was compared to both used and unused congeners. Sister species were used for comparison if available in the phylogenetic literature. Random congener or "R Congener" refers to congeners used if there was a lack of information in the phylogenetic literature.
Reference	The citation of the phylogenetic publications for each congener. Please see Appendix B for the phylogenetic literature review.
